We have a major reduction of $871 million in the Rural Development Insurance Fund, with one of the biggest victims being the water and sewer loan program which is so critically needed by many rural communities. There are more requests each year than can possibly be funded, and to reduce support for this program is to only put communities in danger of losing water service if they are being required by other provisions of Federal law to establish a new system.

Similarly, we have had a reduction of $50 million in the water and sewer grant program, with the implications that I have already described. This level is still a $50 million increase over the Reagan request, but probably not far enough.

One of the most dramatic differences between our bill and the President's recommendations is the treatment of the Rural Electrification Administration. Quite literally, we have saved the Rural Telephone Bank which was slated for extinction, and retained the funding level for REA loans that was provided in fiscal 1981, with this action being a $400 million increase over the President's request.

Finally, in this title, we have once again protected the agricultural conservation program, which was targeted for a reduction of $40 million. ACP is an extremely important program to protect the quality of our farmlands for the future. I am disturbed to hear in recent days, however, that the Department has decided to terminate various special ACP projects earlier than originally anticipated. For example, one project in my district involving areas in Tuscola and Huron Counties near the Saginaw Bay, was originally designed as a 5-year project. The good people at the local ASCS offices are now being told that this project ends this September, 2 years earlier than expected.

I appreciate the prerogative of any administration to change its priorities, but I believe that the Department has a moral commitment to live up to any agreement that was made with local operators, whether they particularly like the program or not. Obviously I am concerned about projects in my district, just as each one of my colleagues is concerned about matters in their area. That is their responsibility as a Member of Congress representing those people affected by these projects. It is wrong to make this last-minute change, and I will do all that I can as a member of the subcommittee to prevent the Department from essentially welching on the commitments that had been made previously.

Title III funds the various feeding programs operated by the Food and Nutrition Service of the Department of Agriculture, including food stamps, school lunch, the women, infants, and children feeding program, and the commodity supplemental feeding program.

This is the most trying title of our bill. The President wants to reduce funding in these programs substantially. Any cut will most likely have an impact on current program beneficiaries, and only through careful analysis and legislation can the adverse impacts of budget cuts be minimized.

We will see many changes made in the food stamp program when we consider the farm bill. We have already been subjected to many changes in the program as a result of the adoption of the substitute to the reconciliation bill. As soon as these changes are made and signed into law, then program eligibility will be modified and we will accept those changes.

But that point does not recognize two very critical problems with the food stamp funding level before us today.

The budget request submitted by President Reagan is $1 billion low because the supporting documents asserted that Puerto Rico would no longer get food stamps because of the establishment of a block grant program. From the standpoint of existing law this is simply not true. There is *no* block grant for Puerto Rico, and even the provisions that were adopted in the reconciliation bill do not take effect until fiscal 1983. So we start the year $1 billion short because Puerto Rico will continue to receive food stamps from the general food stamp account.

Additionally, with the proposed reductions in other assistance programs, more and more people who are eligible for stamps but have not elected to use them will turn to the Department for assistance. Most analysts of this program believe that we may have to appropriate as much as another $2 bil-

lion for fiscal 1982 in a supplemental appropriation.

It is for these reasons that while approving the President's dollar request, we have limited the availability of funds to no later than August 15, 1982. The administration will have to submit an additional budget request or face the shutdown of the program because all of its own predictions will have not held up.

We have also restored the full amount of the reduction proposed for the women, infants, and children (WIC) program and the community supplemental feeding program (CSFP). We have done so because no eligibility changes are proposed for these programs, and to adopt the budget recommendations would mean that 30 percent of those currently receiving food under these programs would be cut out.

The WIC program stands to lose 700,000 participants under the Reagan budget. This program has been proven to improve the health of newborn infants, mothers, and children up to age 5. It has reduced infant mortality, miscarriages, early births, and infant disease. It has concurrently reduced the health care costs of providing for these people who might not be able to afford health care otherwise. But these facts have not impressed the administration that believes it is necessary to cut some $317.6 million in order to bring the spending for this program "under control," at the same time as the National Advisory Council on Maternal, Infant and Fetal Nutrition has recommended to the Congress that we make efforts to make this program available to at least 50 percent of the eligible recipients by 1985. We are currently serving only 27 percent of those eligible.

We rejected this cut, and we reject any effort to arbitrarily reduce caseloads when so many need to be helped. That is why our report directs that we maintain the end of fiscal 1980 caseload level of 2.2 million recipients. Understand that we are not increasing the size of this program, but only maintaining it. There is a lot to be done, but we recognized that we could not fund this program at a higher level because of the limitations placed upon us by our highly unusual budgetary procedures this year.

The same is true for the CSFP program. Thirty percent of the recipients would be removed from the rolls, while there is a daily increasing demand for this program which is the only general feeding program which provides foodstuffs directly, rather than the intermediary of a stamp or a WIC-like voucher. This program is relatively small, serving 119,000 according to the March USDA participation figures. The administration wants it cut to 80,000.

We have provided $30.5 million for this program and directed that the originally anticipated end of year caseload of 113,000 be maintained. Again we cannot see any justification for reducing the size of this program with the absence of legislative changes in eligibility standards and with the crying need for expanding this program into more areas. The growth of this program has been strong in recent years, and could continue to be in the near future, especially with several communities expressing their interest in starting a program.

But again we are being frugal. We are maintaining the program and are expecting the Department's cooperation. Any action to the contrary would most certainly come under immediate scrutiny by our subcommittee.

We have also provided $900,000 for the initiation of pilot commodity supplemental feeding programs for fiscal 1982. This money is provided contingent upon the enactment of the authorizing provisions currently contained in H.R. 3603. This program is designed to test the concept of providing commodity packages to senior citizens, with these packages being designed to meet the nutritional needs of the elderly. Eligibility for the program will be linked to the criteria utilized for food stamp eligibility.

The report of the House Agriculture Committee points out that that committee anticipates that this program will be conducted by the existing CSFP operators in Detroit and New Orleans, the two largest in the Nation, in order to take advantage of existing administrative structures. Our report concurs in that recommendation. The program will feed up to 1,500 seniors in each of the two locations utilizing food products similar to those currently used in the CSFP.

Again, the subcommittee is very interested in any action that the Department may take with respect to these pilot projects, and will pay close attention to any action taken.

We are providing $124,800,000 for the special milk program based upon the provisions in existing law. We understand that the reconciliation process may once again force reductions in this program, but we do not want to prejudge the action of the conferees, especially since so many members of this subcommittee know of the value of this program and have supported it over the years.

We also are funding the school lunch and breakfast programs under the direction of existing law. These programs have been slated for radical changes by the administration, and if these changes are adopted, then it is possible that the funding levels provided for these programs will once again need to be reduced.

I am personally very concerned that we are facing the very real risk of many schools closing their lunch programs if some of these legislative proposals are adopted. It is one thing to say that the truly needy will be helped, but it is another thing entirely to find a way to help a needy schoolchild when his or her school discontinues the lunch program because the absence of certain amounts of Federal support make the program no longer economically viable. It is awfully hard to buy a lunch when you are truly needy and the kitchen is closed.

Mr. Chairman, I would like to discuss the utilization of dairy products as bonus commodities in the school lunch and breakfast programs.

Since the start of fiscal 1981, the Food and Nutrition Service has offered dairy products as a bonus item in the child nutrition programs, rather than as a basic commodity item. This has meant that schools have been able to get more dairy products for use in the school feeding programs, while helping to increase the availability of other commodities as basic commodity support in these programs.

The Department is to be commended for this use of dairy products in the school lunch program, and I know that the Subcommittee on Agricultural Appropriations trusts that this practice will continue. A press release from USDA in the past few months indicated that this would be the policy during the coming school year, and it is a very wise one.

There have been rumors that the Department might be directed by the Office of Management and Budget to terminate this bonus practice with respect to dairy products. The issue was raised at a meeting between Secretary Block and OMB Director Stockman within the past 4 weeks, and a meeting on this subject between OMB and the Administrator of the Food and Nutrition Service for last week on this point was canceled, with no further word at this time regarding any rescheduling of this meeting.

Mr. Chairman, the dairy industry has been criticized by this administration because of the volume of CCC-owned dairy stocks as a result of the dairy price support program. The prior administration made a good-faith effort to utilize these stocks for the benefit of our schoolchildren, while holding down the costs of the lunch program through this mechanism. While the Department of Agriculture holds to the position that this policy should continue. OMB may once again impose bad policy in order to meet some budgetary goal.

So the situation then will be that OMB criticizes the size of the dairy stock, and also prevents its proper utilization in the school feeding programs. Schools will receive fewer commodities if dairy products count against the basic allotment, and then

dairy products will become price competitive in the eyes of menu planners with the likely result being that they will use more oil and less butter because oil costs only half as much as butter. The dairy stock will then continue to grow and the American dairy farmer will once again be criticized for the size of this stock while the dairy farmer has no ability to influence the utilization of this stock. And schoolchildren will get poorer lunches because of a lesser ability for the schools to get a variety of food products, but OMB will meet its budget goals of passing on the cost of the dairy price support program to the child nutrition budget.

Mr. Chairman, we do not want this series of events to come about, and I sincerely hope that the Department is successful in its efforts to help OMB understand why the program should be conducted in this way. I am sure that the Department will have my support, as well as the support of several other Members of this body.

Title IV provides funding for the international programs of the Department, most notably those of the Foreign Agricultural Service and Public Law 480. Agricultural exports are extremely vital to our national economy. Exports of agricultural products in 1980 were valued at $41 billion. This level of sales is certainly an extremely positive factor on our balance of trade, and demonstrates that we need to do all that we can to retain and increase our export capabilities. Just imagine what the value might have been had we not been inflicted with the Soviet grain embargo. The Soviets are now buying much of their grains from Argentina, Brazil, Canada, and Australia. Those are sales that our farmers lost. Those are sales that would have helped our international trade posture. They would have helped assure our farmers of reasonable prices in the future, but our foreign policy once again singled out the American farmer, and he is likely to pay the price for years to come.

Mr. Chairman, these are the highlights of this bill as seen by this Member. As our chairman, Mr. WHITTEN, has said so eloquently so many times before, there is something in this bill that touches every single American every single day of his or her life. This bill deserves the support of every Member of this body, and represents our best efforts at dealing with an extremely restrictive budget limitation in a way which we believe is the most responsible. I urge my colleagues to vote in support of H.R. 4119.

Mr. WHITTEN. Mr. Chairman, may I make one further remark. The gentlewoman from Nebraska (Mrs. SMITH) did not wait to become the ranking minority member on the subcommittee to go to work. She has always been active in matters related to this bill and is very experienced in the field of agriculture.

Mrs. SMITH of Nebraska. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I would like first to commend the Subcommittee on Agriculture's distinguished chairman, the gentleman from Mississippi (Mr. WHITTEN). He is to be applauded by producers and consumers alike for his knowledge of and concern for agriculture. His firm belief, which I share, in the importance of the urban-rural partnership is largely responsible for the support this bill has garnered within the subcommittee and full committee.

Expressing his conviction that agriculture is the lifeblood of this Nation's economy, Mr. WHITTEN devoted his own energy—day after day—to guiding this bill through the hearing and markup process. The result reflects both his experience in and his dedication to this vital part of our economy.

I would also like to recognize the distinguished Members of the minority who serve with me on the subcommittee: the gentleman from Indiana (Mr. MYERS) and the gentleman from Virginia (Mr. ROBINSON), longtime subcommittee members who have been both helpful and supportive; and the gentleman from California (Mr. LEWIS), a new subcommittee member who has worked very hard on the measure. All of the gentlemen's efforts are appreciated.

Mr. Chairman, H.R. 4119, the bill before this House, is a bipartisan measure. The members of the subcommittee—majority and minority alike—have done their best to report a bill which both reduces spending and helps control the growth of credit programs. H.R. 4119, as reported, is $1.9 billion below the section 302 allocation agreed to in House Concurrent Resolution 115, the first concurrent budget resolution; $1.1 billion lower than the President's budget request; and $2.8 billion less than last year's appropriation.

Enactment of this legislation is essential. National farm income declined by 25 percent in 1980. A U.S. Department of Agriculture economist who briefed the subcommittee in February reported that agricultural cash receipts were expected to increase in 1981 by $13 to $23 billion, but that production costs were projected to rise by $13 to $17 billion. In other words, agriculture will be lucky to break even in fiscal 1981.

The gap between farm and nonfarm investments has widened, mainly due to sharp declines in returns from farming investments. The ever-increasing debt load, combined with unusually high interest rates, has increased farm interest expenses more than fivefold since 1920. As of January 1, total farm debt exceeded $108 billion. The only way debt can rise while income is decreasing is by increased value of land. Basing farm and ranch debt on increased land values, due primarily to inflation, instead of on income production capabilities, is not a sound financial basis for the industry.

H.R. 4119 addresses farm income and marketing problems through appropriations for programs, such as export promotion and research and education, as well as other functions of the Department of Agriculture.

As a farm State Representative, I want to emphasize that the benefits are not only to farm States but, in far larger measure, also to the entire country. The fact is that the farm sector's persistent and disturbing subpar profitability amounts to an immeasurably vast subsidy to consumers.

It is my hope that in my public service here in the Congress I can drive home among our city brethren the fact that unless agriculture becomes—somehow—more profitable, our abundance of American food, unmatched and perhaps unmatchable on this planet, will shrink and our fantastic food-producing capacity will shrivel with it.

The United States is well known as an industrial giant. What most of our population may not realize is that it is far more importantly the agricultural supergiant of the Earth. The objective of our farm programs is to help producers market their products in orderly fashion to achieve the cost of production plus a reasonable profit—while maintaining an abundance of food supplies at reasonable prices.

Because demand for food is fairly constant, small supply shifts can bring about large price fluctuations.

Preventing these fluctuations requires stocks of food held in farmers' hands to offset variations in annual crop production. Last year we experienced a severe drought throughout our most productive agricultural areas. If it were not for using stocks on hand from previous years, primarily as a result of our farm programs, prices would have increased dramatically.

The long history of farm programs revolves around an effort to assure adequate production and reserves for consumers and income support for farmers to keep production on an even keel.

Another important element of the agricultural effort consists of funds—commonly known as section 32 funds—to strengthen markets, income, and supply. This appropriation is used to purchase surplus perishable foods, thus providing market stability for producers. The committee has strengthened this program for fiscal 1982 by transferring $75 million from section 32 funds to the child nutrition program. This would allow the section 32 reserve for child nutrition—school

lunch—commodity purchases to be maintained at the $300 million level.

As I have just alluded, Mr. Chairman, the bill also contains very important domestic food programs. These include the school lunch, food stamp, special supplemental food (WIC), food donation, human nutrition research and education and information programs, as well as the section 32 program.

Food assistance programs are intended to provide access to nutritionally adequate diets for individuals and families with low incomes and encourage better eating patterns among the Nation's children.

The measure also includes crucial agricultural research and education provisions. I am pleased that the administration has recommended and the committee has provided for increases in these programs.

Production increases, which are about the only means for producers to beat the cost-price squeeze, can be largely attributed to research and education efforts conducted by our land-grant colleges and the Department of Agriculture's Agricultural Research Service.

A good example of the benefits derived from research is the recently announced vaccine for foot-and-mouth disease. This vaccine will stop the threat of deadly outbreaks in the United States and help underdeveloped countries in the constant battle against this scourge.

I am particularly pleased that the committee has included language recognizing the need for additional trained food-animal veterinarians and the need that exists for the development of a veterinary teaching facility in the Old West region. This region is composed of Nebraska, North and South Dakotas, Wyoming, and Montana.

The Nebraska Legislature has appropriated $13.3 million and the livestock industry has collected almost $2 million in private donations for such a facility, which combined make up 50 percent of the project cost. These moneys are contingent upon a Federal commitment for matching funds by December 1983.

Because of severe budgetary constraints, the committee has been forced to defer consideration of the project until next year.

I also am pleased that the bill contains a new integrated pest management program to evaluate the effects of a concentrated control effort on the horn fly, the major range cattle insect, in terms of secondary control of cattle lice and cattle grubs. This project would be a cooperative effort between the Department's Agricultural Research Livestock Insect Laboratory at Kerrville, Tex., and the University of Nebraska North Platte Experiment Station.

Another important feature of this bill is the soil and water conservation program. Fortunately, the effects of wind and water erosion on our farmlands and forests have received proper attention lately, as numerous major journals and magazines have included articles—and even feature stories—on the alarming loss of productive farmlands and forests each year. Unfortunately, Federal efforts to combat erosion have not increased.

The major source of conservation cost share funds is provided by the Department's agriculture conservation program (ACP), which is administered by the Agricultural Stabilization and Conservation Service.

For 26 out of the last 28 years, the executive branch has recommended reductions in ACP funding. Each year, the committee, under the leadership of Mr. WHITTEN, has not accepted the proposed cuts. That is again the case. Erosion is too great a problem to be approached halfheartedly, and H.R. 4119's $190 million level is needed for a full-fledged effort.

The value of our vast and productive farm and ranch lands cannot be underestimated. It is projected that the value of our agricultural exports will reach $48 billion in 1981, enough to cover over half the cost of petroleum imports into the United States in 1981. Agriculture will not only provide ample food for American consumers at reasonable prices but will also make available 45 percent of the world's wheat exports, 24 percent of rice exports, 81 percent of soybean exports, and 72 percent of total feed-grain exports.

Title II of H.R. 4119 addresses rural development. Let me emphasize the importance of the Farmers Home Administration (FmHA) and Rural Electrification Administration. Because of rural America's demographics and consequent underrepresentation in Congress, most Members do not realize the difficulty of addressing problems of the rural population. Small towns either are not eligible or do not have the resources to apply for most Federal programs. We wage constant battles to preserve needed services, such as weather stations, post offices, hospitals, and schools.

The funding levels adopted reflect the committee's effort to balance reductions in Federal credit programs while maintaining a strong rural economy. Loan programs administered by FmHA for farmers and ranchers include conservation, emergency disaster, real estate, and operating loans. While the administration recommends reductions in the first three categories, I am pleased to note that it supports increases in operating loans. These loans—completely repaid to the Government with interest—are used to help finance short-term costs associated with production.

Another rural development program, rural housing, includes loans for low- and moderate-income housing, rural rental housing, and very low-income housing.

Other FmHA programs consist of water and waste disposal grants and loans, community facility loans, and rural industrialization loans.

The Rural Electrification Administration (REA) was established in 1935, to make loans for the expansion of central station electric service to unserved rural people. More than 2.6 million farms and rural homes, almost the entire total, are electrified today by REA. Last year the association added another million member consumers, indicating the continued need for this valuable program.

Title IV of H.R. 4119 addresses international programs. These include maintaining and expanding foreign markets for U.S. agricultural products; monitoring and publishing data on export sales by private U.S. exporters; and coordinating, planning, and directing the Department's programs in international development and technical cooperation for food and agriculture.

The committee has included special language this year to encourage the USDA's Office of the General Sales Manager to work actively to sell dairy and other surplus agricultural products in world trade at competitive prices.

In addition, title V of H.R. 4119 provides appropriations for the Food and Drug Administration (FDA), Commodity Futures Trading Commission, and the Farm Credit Administration. I share the chairman's concern for FDA activities as they relate to "orphan drugs," antibiotics in animal feeds, drug lags, and minor-use veterinary drugs. The committee has reviewed these areas and has asked the FDA to reexamine its direction and policies so as to insure that Americans have access to safe, effective drugs in timely fashion.

It is important to note that the committee has been careful to consider new authorizations likely to result from enactment of the Omnibus Budget Reconciliation Act of 1981. Four programs are recommended for rescission when the reconciliation measure becomes law. They include: First, the Federal Grain Inspection Service, for legislation to require user fees to cover costs of supervision; second, Agricultural Marketing Service, for legislation to require user fees to cover the costs of grading and standardization activities; third, child nutrition programs, for legislation dealing with eligibility and other matters under the school lunch and other programs; and fourth, special milk program, for changes in legislation in

connection with eligibility under the program.

As we proceed with consideration of H.R. 4119, I would like, in closing, to emphasize that the minority members of the subcommittee, while having reservations about certain program changes, support this bill overall and ask for an affirmative vote on its passage as reported by the committee.

□ 1740

Mr. WHITTEN. Mr. Chairman, I yield 4 minutes to the gentleman from New York (Mr. McHUGH).

Mr. McHUGH. Mr. Chairman, I rise in support of this appropriations bill and urge my colleagues to vote for it. At the same time, I do want to express my concern about the level of funding for the food stamp program.

This bill appropriates $9.765 billion for food stamps, the amount formally submitted by the Reagan administration in its budget request for fiscal year 1982. Unfortunately, it is very clear that this appropriation will be wholly inadequate to meet the costs which can reasonably be anticipated next year.

The major reason for this deficiency is that no allowance is made for food stamp expenses in Puerto Rico. In submitting its budget request to Congress, the administration included no funds for Puerto Rico because it said it intended to submit separate legislation to establish a block grant program there. However, no such legislation has ever been submitted by the administration and the reconciliation package adopted by the House in June, with the active support of the President, postpones establishment of the block grant until fiscal year 1983. Since the funds needed for participants in Puerto Rico have neither been included in the original budget request nor been provided for in a separate block grant program, this appropriation, while meeting the President's initial budget request, is substantially short of the funds that will actually be needed.

The reconciliation package passed by the House recognized the inadequacy of the President's budget request and, reflecting the legislative cap adopted by the Agriculture Committee, provided for an authorization in fiscal year 1982 of $10.84 billion for the food stamp program, including Puerto Rico. In my judgment, it would have been better if this bill provided for an appropriation in that amount.

By not providing any funds for Puerto Rico, it is certain that a supplemental appropriation for fiscal year 1982 will be necessary if substantial, across-the-board cuts in benefits are to be avoided beyond those cuts already made necessary by reconciliation.

The bill recognizes the need for a supplemental by recommending that the appropriation of $9.765 billion be available only through August 15, 1982. The Appropriations Committee fully expects that the administration will meet its responsibility to request the additional funds which will clearly be required.

So that the record will be clear on this point, I would like to ask the chairman of our Appropriations Committee, the gentleman from Mississippi (Mr. WHITTEN) whether he agrees that a supplemental appropriation for food stamps will be necessary in fiscal year 1982?

Mr. WHITTEN. Mr. Chairman, will the gentleman yield?

Mr. McHUGH. I yield to the gentleman from Mississippi.

Mr. WHITTEN. May I say to my colleague from New York, a member of the committee, that we are in agreement that that will be necessary. The presentation that I have made in the RECORD will clearly commit ourselves to that. That is the understanding we had and it is made necessary by the situation we face in the law.

Mr. McHUGH. I thank my chairman very much for that, and I would like to make one other brief point which relates to the possibility of cutting off benefits.

Given the need for a supplemental appropriation in fiscal year 1982, I trust that in fiscal year 1982, the Secretary of Agriculture will take no action under section 18(b) of the Food Stamp Act to reduce allotments until such time as the House and Senate have had an opportunity to consider and reject any additional funding that the program might need to continue benefits undiminished throughout that fiscal year.

Until Congress takes negative action on such a supplemental by refusing to provide any additional funding, or until Congress in some other manner gives a clear indication, when confronted with the full impact on the program of the Puerto Rican situation and the budget reconciliation changes, that no supplemental appropriation will be forthcoming, the Secretary should not find pursuant to section 18(b) that the requirements of participating States will exceed the program's funding limitations, and furthermore the Secretary should have no reason to determine, pursuant to section 18(a)(1) that reductions in the value of household allotments will be necessary on the ground that Congress will fail to provide the necessary appropriations to meet the program's full uncurtailed fiscal year 1982 needs.

Mrs. SMITH of Nebraska. Mr. Chairman, I yield 3 minutes to the gentleman from Virginia (Mr. ROBINSON), a member of the committee.

Mr. ROBINSON. Mr. Chairman, I rise in support of the bill H.R. 4119, the Agriculture, rural development and related agencies appropriations bill of 1982.

Today the American farmer faces the specter of bankruptcy brought on by rapidly rising costs and declining prices. The farmer represents less than 4 percent of our population, and yet sustains all of the rest of us. American agricultural productivity is unmatched and, indeed, is unrivaled by any other nation. American consumers enjoy the highest quality food at the lowest cost provided by any nation. Yet, the farmer's share of the consumer dollar has become less and less.

I believe that the annual appropriations bill for agriculture we are presenting will benefit both the American farmer and the American consumer.

Agriculture is basic to the American economy and the American way of life. It is the foundation upon which all other segments of the economy rest. Reliable estimates indicate that each dollar of wealth taken from the soil generates $7 of income throughout the economy. It is the provider of the basic necessities of life—food, clothing, and shelter. We must protect it wisely.

The bill that we are considering today is almost $2 billion below the section 302 allocation agreed to in House Concurrent Resolution 115, the first concurrent resolution on the budget. The total new budget authority recommended in this bill is $22,730,534,000. This is $1.1 billion less in new budget authority than the President's request. It is also $2.8 billion less than last year's appropriation.

In spite of these reductions, there has been criticism from the Office of Management and Budget regarding an increase in outlays in 1982 in our bill over the President's request. The Appropriations Committee does not work, and is not equipped to appropriate, on the basis of outlays. The committee has met targets and limits of budget authority—the basis from which the committee has traditionally worked. It seems a logical presumption that reductions in budget authority will lead to reductions in outlays. OMB, in its criticism, has not taken reconciliation actions into account. OMB cites the administration's request of $742 million for special supplemental food programs (WIC), and the committee's $327 million increase to that program. The House version of Gramm-Latta II caps the authorization for the special supplemental food program (WIC) at $1.037 billion in each of fiscal years 1982-84. In addition, the Appropriations Committee specifically included report language saying that:

> $317.6 million of the funds recommended for this program shall be held in reserve, to be released when needed to maintain current participation levels unless the law is changed.

The committee has provided similar language for the reduction of appropriated funds from the child nutrition program, should legislative savings included in the reconciliation bill become public law.

I urge passage of this bill in the current form.

Mr. WHITTEN. Mr. Chairman, I yield such time as he may consume to the gentleman from Kentucky (Mr. NATCHER).

Mr. NATCHER. Mr. Chairman, the Subcommittee on Agriculture, Rural Development and Related Agencies Appropriations once again brings to the floor of the House for your approval, the annual appropriations bill for fiscal year 1982.

It has been a distinct honor and a privilege for me to serve on the Appropriations Committee for a period of 26 years with my friend, the gentleman from Mississippi (Mr. WHITTEN). As chairman of the full committee, he also serves as one of the members of the Subcommittee on Education, Health and Human Services and Labor Appropriations, the subcommittee that I have the honor to chair. It is a pleasure for me to serve with the other members of the Agriculture Appropriations Subcommittee.

Only 4 percent of the people in this country are engaged in agriculture and these are the people who feed and clothe the other 96 percent of our population. If our country is to survive and prosper, we must continue to be interested in and to assist when necessary, the custodians of the natural resources of our country.

A great many of our young people on our farms have no chance to get started in agriculture unless they either inherit a farm or succeed in borrowing a large sum of money to invest in land which is adequate for a living.

I am very much concerned about the new tax bill from the standpoint of Federal estate taxes. Mr. Chairman, here is where we can help the American farmer and all of our people. We hear a great deal about double taxation and when it comes time to pay a large Federal estate tax, this is the best example I can give you for the argument against double taxation. A number of us finally succeeded with our friends on the Ways and Means Committee, to set the Federal estate tax exemption at $175,000. This action took place a few years ago and this is now the law.

It is time to increase this Federal estate tax exemption and the amount should be either $500,000 or $600,000. If we succeed in increasing the $175,000 amount, then our next step should be to eliminate completely the Federal estate tax. The tax base can be adjusted accordingly, and the American farmer, the small businessman, and all of our people will then be placed in a position where the members of their families do not have to go out and borrow money to pay Federal estate taxes.

Our American farmer knows how to produce, and today our country is the world's largest exporter of food to the other nations of the world. It is imperative that we reforest our lands, protect our watersheds, and conserve the soil and water in this country. We must leave to future generations a fertile land and a land sufficient to produce food for our people.

The assets invested in agriculture today exceed those of any of the next 10 largest industries. Agriculture employs more workers than any other major industry and in fact, employs 23 times the number of people employed in the coal and oil industry and 5 times more than the number employed in the automobile industry.

Mr. Chairman, we all know that agriculture is one of the major markets for the products of labor and industry. Agriculture spends more for equipment than any of the other large industries. It uses more steel in a year than is used for a year's output of passenger cars. The American farmer uses more petroleum products than any other industry in this country and uses more rubber each year than is required to produce tires for 6 million automobiles. The American farmer's inventory of machinery and equipment exceeds the assets of the steel industry and is five times that of the automobile industry.

The American farmer is entitled to a fair share of our Nation's income. Today, the farmer does not receive enough money for his commodities.

Tobacco is produced in 118 of the 120 counties in Kentucky. This is the major cash crop of the Kentucky farmer. Again, the Department of Agriculture made a reduction of $1,048,000 in the budget for tobacco research. In the entire research program for tobacco, we only have $5,190,000. Tobacco pays into the Federal, State, and local treasuries about $7 billion a year in taxes and at my request, the sum of $1,048,000 was restored to the bill. In addition, we placed back into the bill $182,000 for research on stored tobacco insects which is the same amount that was available for fiscal year 1981.

Mr. Chairman, our bill contains the sum of $20,820,000 for inspection and grading of cotton and tobacco. The House and the Senate versions of the Omnibus Budget Reconciliation Act of 1981 provides for charging user fees to the producers of cotton and tobacco. This is a mistake and unless it is sustained in the conference between the Senate and the House, our provision for the usual amount of $20,820,000 will apply. This amount is small in comparison to the amounts that we expend on other agriculture commodities and all down through the years, tobacco has paid its way.

Mr. Chairman, for Agricultural Research Service we recommend the sum of $453,749,000. This is $26,918,000 over the 1981 fiscal year appropriation. For the Cooperative State Research Service, we recommend $219,936,000. For our Extension Service, we recommend $321,398,000. This is $17,609,000 over the 1981 appropriation. For Animal and Plant Health Inspection Service, we recommend $297,609,000. For our Marketing Service, we recommend $44,031,000. For the Commodity Credit Corporation, we recommend the sum of $2,220,000,000. For the Rural Electrification Administration, we recommend in the bill $1,100,000,000 for loan authorizations. For insured loans to rural electric systems, the committee recommends a floor of $850 million and a ceiling of $1,100 million. For insured telephone loans, the committee recommends a floor of $250 million and a ceiling of $325 million. For conservation operations under the Soil Conservation Service, we recommend $317,639,000. For watershed planning, we recommend $8,690,000. For watershed and flood prevention operations, we recommend $192,045,000. For agricultural conservation programs, we recommend $190,000. The ACP program, Mr. Chairman, is necessary today, the same as it has been down through the years.

For child nutrition programs, we recommend in the bill, $3,765,038,000. For the special milk program, we recommend the sum of $124,800,000. For supplemental food programs for women, infants, and children, we recommend $1,069 million. For Foreign Agricultural Service, we recommend $69,694,000. For Public Law 480 funding, we recommend $1,163,100,000. For the Food and Drug Administration, we recommend in this bill $336,032,000.

Mr. Chairman, this is a good bill and our Committee on Appropriations recommends it to the Members of the House; we should keep in mind that if our country is to survive and prosper, certainly we must continue to be interested in, and to assist when necessary, the custodians of the natural resources of our country.

Mrs. SMITH of Nebraska. Mr. Chairman, I yield 3 minutes to the gentleman from Illinois (Mr. O'BRIEN).

Mr. O'BRIEN. Mr. Speaker, my remarks would be directed to a rather special part of this bill, touched on by the gentleman from Kentucky (Mr. NATCHER) just a moment ago.

Page 35 of the bill refers to watershed and flood prevention operations and the same topic is covered at page 84 of the report for those who have a similar interest.

Mr. Chairman, construction of the proposed watershed project on the Little Calumet River in Illinois is urgently needed by the residents of the southern part of the city of Chicago, south suburban Cook County, and Will County.

On June 12 of this year, heavy springtime rains, 8 inches of rainfall within 6 hours in some areas, caused the Little Calumet River to flood. This flood caused $54 million in damage, forcing thousands out of their homes and businesses. This is only the most recent occurrence of flooding that yearly damages 7,000 homes and 140 businesses and washes out countless roads. This devastation will be repeated every year until the proposed watershed project is constructed.

Construction of the watershed project will ultimately require $45 million, $31 million from the Federal Government and $14 million from local governments. The fact that local governments have already appropriated $5 million without any guaranty that the watershed project would receive Federal Government approval underscores the local support for the project.

The proposed watershed project has twice been approved by the Soil Conservation Service, and all that is now needed is approval by the Office of Management and Budget and the House Committee on Public Works.

Mr. Chairman, I wish to address a question to the distinguished chairman of the Appropriations Committee, the gentleman from Mississippi (Mr. WHITTEN).

Mr. Chairman, are there sufficient funds within this bill to provide the amount necessary to initiate such projects as these?

Mr. WHITTEN. Mr. Chairman, will the gentleman yield?

Mr. O'BRIEN. I yield to the gentleman from Mississippi.

Mr. WHITTEN. I thank the gentleman for yielding.

May I say to the gentleman there clearly is a need, and I have discussed this with my colleague, a very fine member of the Committee on Appropriations. We have two funds that are available for what the gentleman describes.

We are sorry to know of the disaster which has hit the gentleman's area. We have recommended $10 million in this bill for emergency work in the area of soil conservation.

□ 1750

Also, it would be worthwhile to contact the State conservationist of your State to see if funds from that source would be available for what is described here. Insofar as work on the watershed, it will require authorization by the legislative committee on that particular project. We have recommended $25 million for 25 new starts in this bill. I am certain from the gentleman's description that he will be eligible, subject to approval by the Soil Conservation Service. Also, as I mentioned, we have the $10 million to look to for emergency relief.

May I say that I am glad to respond to the gentleman, and of course I will work with him in any way within the limitations of what we can do. Money is available as far as this goes from two sources to meet the gentleman's need.

Mr. O'BRIEN. I thank the chairman, and I commend him for including funds within this bill to provide for 25 more watershed projects, and I strongly urge the Office of Management and Budget and the Committee on Public Works to approve very quickly this most urgent project.

Mr. WHITTEN. Mr. Chairman, I yield 3 minutes to the gentleman from Hawaii (Mr. AKAKA), a member of the subcommittee.

Mr. AKAKA. Mr. Chairman, I rise in strong support for H.R. 4119, the Agriculture appropriations bill for fiscal year 1982.

I want to take this opportunity to tell my colleagues in the House that this is possibly the best agriculture appropriations bill to come out of the committee: This success is due to the outstanding efforts and leadership of the distinguished chairman, Mr. WHITTEN, ranking minority person, Mrs. SMITH, and the dedicated members and staff of the committee. In fact, all parties involved in this legislation worked so well together, that not once did we have to break up into minority and majority coalitions to call for a vote on a specific issue. The agreement we achieved, we achieved through a working consensus of opinion in committee. Given the budget constraints we faced, I am proud to say that all agriculture and nutrition interests are well served by this bill. This bill will turn out to be the cornerstone for the foundation of sound agricultural policy for the future.

This bill carefully weaves a tapestry of joint agricultural interests and partnerships. This is a bill for farmers and for consumers. This is a bill for partnerships between rural and urban interests. This is a bill for industry and for labor. It promotes production, rural development, and agricultural research. It encourages exports and will provide for the nourishment of millions of people. And, above all, this bill promotes agricultural conservation—and I am sure that you know that conservation must be carried out on a continual basis if we as a nation are to indeed be the breadbasket for the world's poor nations.

Certainly, as a leader in the arena of agricultural production, we should do no less.

I urge my colleagues to lend their wholehearted support to this bill.

Mrs. SMITH of Nebraska. Mr. Chairman, I yield 2 minutes to my good friend from California (Mr. PASHAYAN) for a question.

Mr. PASHAYAN. Mr. Chairman, I thank the gentlewoman for yielding.

Mr. Chairman, I rise in support of H.R. 4119 and should like to pose to the distinguished chairman of the subcommittee the following question:

Would a research project aimed specifically at developing a more acceptable, digestible, and low-cost protein food from dry beans be considered eligible for funding under the competitive grants programs? I have noted that the committee report states that "some funds for competitive grants can be used to complement the special grants program" and my concern is for a proposal of the California Dried Bean Advisory Board designed specifically to make dry bean nutrients and fibers more digestible. The project I just cited is being developed at the Center for Legume Studies at Chapman College in southern California, a non-land-grant college. Do you see any particular problem?

Mr. WHITTEN. May I say to my colleague that the committee is familiar with this problem. Through the years we have funded research by the Department. Clearly this situation, as we know it from testimony before our committee, would qualify for this kind of grant. Of course, the decision is not with us, but we have not neglected it. We have provided funds for some research by the Department over the years.

Mr. PASHAYAN. I thank the distinguished chairman for his cooperation.

Mr. WHITTEN. Mr. Chairman, I yield 3 minutes to the gentleman from New York (Mr. PEYSER).

Mr. PEYSER. Mr. Chairman, I thank the chairman for yielding to me at this time. I had planned during the amendment period to offer an amendment to the Farm Credit Administration section of this bill. The reason that I was contemplating doing this was to reaffirm the need to direct these moneys that are involved by the member banks to those truly involved in the agriculture field—farmers or those in the agribusiness—because reports have shown recently that a high proportion of the money being lent by these organizations was being lent to those who were barely in the agriculture business in any fashion; in fact, indicating that of their income, less than 10 percent came from farming or the agribusiness.

Since that time, Mr. Chairman, I have talked to the Farm Credit Administration. I have also talked to a number of the members of the committee, and I realize that my amendment could cause hardship where it was not intended to by restricting some new farmers, restricting some farmers that might have had severe losses, which was certainly not the intent.

Mr. JEFFORDS. Mr. Chairman, will the gentleman yield?

Mr. PEYSER. I will be glad to yield to my friend from Vermont.

Mr. JEFFORDS. Mr. Chairman, I commend the gentleman for bringing this matter to the attention of this body. These are problems in this area, and especially when we go into this time of extreme credit crunch which we are going to have both with respect to the FmHA and the Farm Credit Administration.

I think it is important to direct our attention to the needs of agriculture and not the needs of people who may come in for other purposes. The gentleman has an excellent point, and he also made an excellent point about how he recognizes the complexity of trying to draft his amendment which would accomplish his purposes without being counterproductive. I have talked to the administration, and they are aware of the concerns the gentleman has raised, and have given me assurances that the administration itself will do what it can to try to insure that the money goes to those in agriculture and not to those who have hobbies or whatever. I commend the gentleman for bringing this issue to our attention, and I for one will continue to work with him and the administration to try to correct these problems.

Mr. PEYSER. I thank the gentleman for his comments. As I stated, I will not offer this amendment, and I am pleased that we have the recognition again of the problem and the assurances of the administration and the committee that this issue will be addressed.

Mr. WHITTEN. Mr. Chairman, I yield myself 1 minute to comment on the gentleman's statement.

In the first place, I appreciate very much his cooperation here. This is an area in which it is difficult to determine just how to meet the problem the gentleman has described. I would point out that about 70 percent of the farmers earn more than half of their income off the farm. There are just a whole lot of things involved in analyzing the farmer's income. I also point out that the farm credit system borrows money on the commercial market and passes all costs on to the borrower. The situation the gentleman describes is difficult to deal with. I appreciate the cooperation of my friend from New York.

Mrs. SMITH of Nebraska. Mr. Chairman, I would like to associate myself with the comments of our friend and with the comments of the gentleman from Vermont (Mr. JEFFORDS).

Mr. Chairman, I yield 4 minutes to my good friend from Missouri (Mr. EMERSON).

Mr. EMERSON. Mr. Chairman, I rise in support of the bill. I am very pleased that the fiscal year 1982 Agriculture appropriation legislation includes funding for soybean cyst nematode research, and I want to extend my deepest thanks to the chairman, Mr. WHITTEN, and to my colleague, Mrs. SMITH, the ranking member, for their assistance in including funding for this worthwhile research during House appropriations consideration.

Farmers plant a million and a half acres of soybeans each year in southeast Missouri. That is a figure that has increased each year for the past 20, ever since research opened up an endless storehouse of uses for soybeans and their by products. The popularity of soybean planting may be its own worst enemy, however, because of the cyst nematode, a parasitic insect barely large enough to be seen with the naked eye. It clings to the roots of developing soybean plants and a heavy concentration will kill the plant through a process yet unknown to researchers. It is a pest native to the Missouri Bootheel's sandy soil, made even more prevalent by a steady diet of soybeans year after year.

Cyst nematodes were first detected in southeast Missouri in 1956, even before the boom in production that began around 1960. It is now estimated that 80 percent of all fields in southeast Missouri are to some extent infested with cyst nematodes. The most effective chemical control, Nemagon, has been banned by the Government after being linked to health hazards to those who used it. Researchers have been left with two natural alternatives, crop rotation and nematode-resistant varieties of beans. It is estimated that 4 to 5 years are needed in order to develop strains of seeds that are resistant to this devastating disease.

For the last 10 years, research has been conducted on soybean cyst nematode at the Delta Center Agricultural Experimentation Station south of Portageville, Mo. The work done at the center has been invaluable to farmers throughout the Nation. It has been estimated that cyst nematodes are currently present in 24 States, and the research that is ongoing at the Delta Center will be of national benefit.

Although funds were appropriated in the fiscal year 1981 Agriculture appropriations bill for cyst nematode research, there was no request for continued funding of this important work by the administration for fiscal year 1982. However, the House Agriculture Committee requested $250,000 in funds for this project in the funding request for fiscal year 1982 that was submitted to the House Budget Committee. Because of the empathetic understanding of the chairman and Mrs. SMITH and the subcommittee, the appropriations are included for continued research for fiscal year 1982.

I sincerely believe that the appropriation included in this bill for cyst nematode research represents a sound investment in our soybean industry and in the future of this lucrative commodity, which is worth well over $15 billion.

I want to again express my appreciation to Chairman WHITTEN and Mrs. SMITH and the subcommittee for their assistance, and to the fine people of the Delta Research Center for their work in finding the ways and means of combating this perplexing, serious, and costly problem.

□ 1800

Mr. WHITTEN. Mr. Chairman, I yield 3 minutes to the gentleman from Michigan (Mr. BONIOR).

Mr. BONIOR of Michigan. Mr. Chairman, it is an indication of whose star is in ascendancy at this particular moment in our history that a few shrill cheerleaders, in this body and elsewhere, have been able to pervert the rather ambiguous results of the 1980 Presidential election as an affirmative of their own prejudices. They have taken the people's call for a more efficient and humane Government and interpreted it as a call for the elimination of virtually all Government outside of the defense function. They feel that somehow our people are safer in the bosom of the profit motive and market forces than under the yoke of Government involvement in commerce and welfare. This magnificent faith would have you believe that, left to their own devices, market forces would take care of our elderly and unemployed, protect us from hazardous substances, monopolistic pricing, and rising medical costs. I have not found that faith echoed by my constituents.

Doubtless, this Government needs reform in some areas, paring in others. There are some functions that it performs badly but there are other examples of unqualified success in areas that would otherwise go unserved.

The bill before us today is illustrative of such an area of Federal involvement. It has been through the cooperative effort of the Federal Government and our hardworking farmers that we have become the greatest agricultural Nation in history. Unlike many countries, we will be able to pass this resource to the next generation expanded and enhanced.

Even the most rabid laissez-faireist—and I use the adjective advisedly—would have great difficulty in denying the contributions of the Federal Government in agriculture, contributions that have produced a continuous and relatively inexpensive supply of food for our people and many of our foreign neighbors.

It has largely been through Federal effort that we have:

Genetically improved yields and quality in pest-resistant crops;

Genetically improved livestock with higher reproductive rates;

Controlled livestock diseases and prevented their introduction from elsewhere;

Improved crop management and farm equipment;

Controlled diseases, insects, weeds, and parasites, including those affecting humans; and

Improved the nutritional quality of our food.

Through the Extension Service offices in almost all of our 3,000 counties, the Federal Government provides valuable technical information and assistance directly to farmers.

It makes it economically feasible for farmers to prevent the erosion of soil and to conserve water through timber plantings, set-asides, and water banks all providing payments to farmers.

Through the Commodity Credit Corporation, it has created programs to protect farmers against boom and bust cycles during which the market forces, so revered by the administration's Merlins, would ruin farmers and throw the Nation's food supply into chaos.

It has, through the Farmers Home Administration, the Farm Credit Administration, the Small Business Administration, and the Veterans' Administration, proven a source of credit in a high-risk business when the free market banking system declined in favor of more profitable, less risky ventures.

It freely distributes research information through its extension offices, through the agricultural colleges established in every State through the Morrill Land-Grant College Act of 1862, and the world's largest agricultural library in Beltsville, Md.

It was the Federal Government that eradicated bovine pleuropneumonia, anthrax, Texas cattle fever, fowl plague, Venezuelan equine encephalitis, sheep scabies, Newcastle poultry disease, and hog cholera.

It is the Federal Government that assures the quality of our meat and poultry, condemning some 56 million birds and 395,000 meat animals as unsafe in 1979.

It was through the research of the USDA that malaria and yellow fever were virtually eliminated in the United States.

Finally, it was Department scientists that discovered an effective, low-cost method of manufacturing penicillin.

The practical result is that today's farm labor produces 14 times what it did in 1920.

Today's farmers produce enough food and fiber for 68 people.

We are not only meeting our needs, but have reached the point where we are able to export the production of 1 out of every 3 acres of cropland.

Perhaps the Department of Agriculture's greatest tribute will be the silence or even support of the greatest detractors of Federal Government in this branch of Government as we debate this bill and move to a vote.

Federal involvement in agriculture, while not without fault, is overwhelming testimony that Government can be made to work to the clear benefit of its citizens and other millions of the world's hungry.

In fact, I cannot think of a single industry in this country where the Federal Government is more involved.

In his inaugural speech, President Reagan stated, "* * * Government is not the solution to our problem. Government is the problem. * * * It is no coincidence that our present troubles parallel, and are proportionate to, the intervention and intrusion in our lives that have resulted from unnecessary and excessive growth of Government."

It will give me no small amount of glee to note those faithful minions who lustily cheered the President's remarks, who castigated "Government's interference in the marketplace" during the recent budget debates, who will walk to the voting machines and vote "aye" on this bill. In doing so, they not only vote their own parochial interests but acknowledge the need and efficiency of the Federal Government.

It leads me to believe that those who seek to emasculate legitimate Federal intervention act upon prejudices rather than thoughtful commitment.

Mrs. SMITH of Nebraska. Mr. Chairman, I yield 2 minutes to the gentleman from Minnesota (Mr. WEBER).

Mr. WEBER of Minnesota. Mr. Chairman, I rise in support of the bill and to commend the efforts of the gentleman from Mississippi (Mr. WHITTEN) and the gentlewoman from Nebraska (Mrs. SMITH) for the leadership they have shown in this area, producing this outstanding agricultural appropriation bill.

I would particularly like to commend them for the work they have done in preserving the rural electrification and telephone revolving fund, maintaining the strength and vitality of the REA. The rural telephone programs are of utmost importance to the productivity of our farm economy in our rural areas. This bill has gone a long way toward allaying the fears that many people had regarding the future of those programs. I think the chairman and the ranking minority member have done a commendable job.

Mr. WHITTEN. Mr. Chairman, I have no further requests for time, and I reserve the balance of my time.

Mrs. SMITH of Nebraska. Mr. Chairman, I yield 2 minutes to the gentleman from California (Mr. SHUMWAY).

Mr. SHUMWAY. Mr. Chairman, I rise in opposition to those provisions of H.R. 4119 dealing with the committee's funding recommendations for the food stamp program in fiscal year 1982. In particular, I object to appropriating the entire $9.76 billion total from October 1, 1981, through August 15, 1982. Although funding would supposedly be available until the end of the next fiscal year, this action by the committee simply does not wash with the desires of Congress expressly embodied in the Omnibus Reconciliation Act. It is sheer deception on the part of the committee to recommend total funding in less than the full fiscal year. By doing so, we in the Congress are merely preparing ourselves for that annual event called supplemental appropriations.

I had thought that Congress, in the spirit of budget and tax restraint, would not allow for a repetition of the kind of appropriations battles which have been waged here for the past several years. In this new spirit, the Secretary should be allowed to use his discretionary authority to make benefit adjustments when appropriations are inadequate to pay for the full benefits through the entire year. If we do not pursue this path, what is the meaning of the food stamp reductions we have tried to make this year?

Indeed, the committee's recommendation flies in the face of what we are trying to accomplish here this year. It is inflation and unemployment which have placed the greatest strain on the food stamp program. To invite the need for a supplemental appropriation is to continue that seemingly unbreakable cycle of worse inflation and higher unemployment—in short, to allow for this possibility is to maintain the status quo and to deceive those food stamp participants who need the program the most. I urge my colleagues to oppose this backdoor funding proposal—an appropriation which amounts to more than one-third of the entire agriculture appropriations for fiscal year 1982. Thank you.

Mrs. SMITH of Nebraska. Mr. Chairman, I yield 1 minute to the gentleman from Vermont (Mr. JEFFORDS).

Mr. JEFFORDS. Mr. Chairman, I rise in support of the bill.

I would like to take a moment to praise the U.S. Department of Agriculture. The Department recently decided to continue the distribution of bonus commodities in the school lunch program and to retain dairy products as a bonus item.

I am pleased with the Department's decision, as it will help to reduce the inventory of dairy products in Commodity Credit Corporation storage. I am also hopeful that the Department will aggressively move forward to dispose of additional excess inventories of dairy products.

The bonus commodity program is effective, however, in both reducing the cost of the school lunch program and in providing a greater variety of foods served in that program. I again commend the administration for this action.

Mrs. SMITH of Nebraska. Mr. Chairman, I have no further requests for time.

Mr. WHITTEN. Mr. Chairman, I yield 2 minutes to my colleague, the gentleman from New York (Mr. WEISS).

Mr. WEISS. Mr. Chairman, I thank the gentleman very much for yielding this time to me. I have asked for this time to commend the chairman of the Appropriations Committee, Mr. WHITTEN, for his outstanding leadership in the area of orphan drug development and thank him for his continuing efforts which have helped produce the orphan drug project included in the Food and Drug Administration portion of this appropriations bill.

As the sponsor of legislation, with the support of 75 of my colleagues, designed to stimulate and assist in the development of drugs for low incidence diseases, I am especially pleased that this issue has been addressed by the Appropriations Committee. As you know, for millions of Americans the availability of these drugs is literally a matter of life and death.

Mr. Chairman, as the committee report indicates, the FDA currently has statutory authority under the Public Health Services Act to conduct research and testing of orphan drugs. In addition, an extensive report was submitted by the Interagency Task Force on Significant Drugs of Limited Commercial Value in 1979. However, little action appears to have been taken on the options and recommendations outlined in the task force study. I am sure I share your concern that more work be done as quickly as possible to facilitate the testing and the approval of these critical drugs, many of which are available in other Western countries.

Mr. Chairman, I wonder if the gentleman would respond to the following question:

Could the gentleman describe what action would be required by the FDA in this appropriations bill to document the agency's efforts in this area?

Mr. WHITTEN. Mr. Chairman, will the gentleman yield?

Mr. WEISS. I yield to the committee chairman.

Mr. WHITTEN Mr. Chairman, on page 103 of the report we go into this in some detail.

May I say to my colleague, the gentleman from New York (Mr. WEISS), who has been very active in this area, that under our system the registration of a new drug must be pursued by drug companies, and the cost goes to the drug producers, the drug companies. There may be some advantages to this, but it has some disadvantages. This leaves out a whole lot of new drugs, as well as drugs that have some limited uses because nobody can make any profit from them, so they do not initiate the drug approval process.

As a result of this situation, we have been trying for several years to push the Food and Drug Administration to go into those areas where the drug companies will not go.

□ 1810

Now, if they would exercise themselves in that area, anything that they developed could become available to all drug companies, and I think you would find a better market.

One other thing we have expressed consistently, is that there are many drugs approved for use in many of the major countries which must pass tests of safety and efficacy equal to our own. So we are trying to get a reciprocity agreement between ourselves and those countries where we approve of their system of drug regulation, in order that we have those drugs available. The gentleman touches on a subject that needs to be pursued and our committee is doing the best we can to pursue it.

Mr. WEISS. I thank the gentleman and approve his support.

● Mr. DERWINSKI. Mr. Chairman, I have recommended to the administration that under CCC credit provisions, we sell 400,000 tons of corn for chicken feed to Poland. They need this corn urgently for delivery starting late in August or they must slaughter huge numbers of chickens and further aggravate their continuing problem of food shortages. Although I naturally share the concern of some as to whether further support of the Government of Poland is practical at this juncture, I believe it is in the case of meeting their immediate needs for corn.

There is an interesting facet to Polish agriculture reform. It is now being completely decollectivized, an admission by the Communists that you have to give incentives to producers. It may well be that in years to come, we will quite logically be funding agricultural research and development in Poland with emphasis on free market economics.

Mr. Chairman, over the weekend of June 14, 1981, the southern suburbs of Chicago and a major portion of my Fourth Congressional District were inundated with floodwaters when the Little Calumet River overflowed its banks following a seasonal storm. This is a recurring event in that area and one that causes substantial economic losses. To eliminate this continuing hardship in southern Cook County, the Soil Conservation Service of the U.S. Department of Agriculture and the Greater Chicago Metropolitan Sanitary District prepared a flood control plan for the Little Calumet watershed.

This plan, completed in 1979, was made a candidate for funding under the Soil Conservation Service's Public Law 566 program. The Soil Conservation Service reviewed the plan and approved it in 1980. It was then forwarded to the Office of Management and Budget. Recently I was advised that the Office of Management and Budget has returned the prospectus on the Little Calumet to the Soil Conservation Service for further review. I further understand this additional review has been completed and the Soil Conservation Service is again recommending approval of the project.

The Federal share of the cost of the Little Calumet River watershed plan is estimated at $31 million and the local contribution is estimated at $14 million. The damages which occurred in the most recent flooding alone were $52 million.

Authorization of the project by the Appropriations Committees will not require any change in the fiscal year 1982 appropriation levels for the Soil Conservation Service. Accordingly, I urge that approval for this authorization be given so that work can begin in 1982 to eliminate the recurring disastrous floods in southern Cook County.●

● Mr. ALBOSTA. Mr. Chairman, I rise in support of H.R. 4119, fiscal year 1982 Agriculture appropriations bill. This piece of legislation is extremely important to rural America because it provides the funding so necessary to operate the Agriculture Department's loan programs as well as the Farmers Home Administration's community and economic development loan programs.

These programs have served America well by providing a stable supply of food at reasonable prices. In addition our agriculture production has enabled the United States to become a major grain exporter. This has reduced our trade deficit and contributed to lower inflation.

The Farmers Home Administration program builds water and sewer systems in our small towns and villages. The business and industry loan program gives loans to businesses who expand and create needed jobs in high unemployment rural areas. These are revenue producers, not revenue drainers.

Many people do not view farming as a big contributor to this country's economy. The facts may however surprise you. For example within my own State of Michigan, agriculture is now the No. 1 industry. We must strengthen American agriculture to get our economy moving again. This legislation will give us the tools to do this. As a farmer and a resident of a rural area all of my life, I know firsthand the importance of these USDA programs. I strongly urge my colleagues to approve H.R. 4119.●

● Mr. RUSSO. Mr. Chairman, again, I saw it firsthand, people left homeless, houses destroyed and possessions lost

because of severe flooding in the south Cook County area. Again, it was not necessary for this to happen, and again the area should not have been declared a Federal disaster area. On June 14, 1981, this flooding could have been stopped had the Little Calumet watershed project been complete.

For 3 years, I have asked that the Federal share of this program be funded anticipating the severe floods, and for 3 years I have met roadblock after roadblock both on the executive and legislative levels. No one denies the Little Calumet watershed is necessary, yet it is not being funded because it is being held up by the Office of Management and Budget with 12 other water projects. It is essential that this project be implemented immediately so as to head off any future flooding.

The cost benefit ratio of this project cannot be denied. The flood caused $54 million in damage, and the one time cost of the flood management project will cost an estimated $31 million from the Federal Government and $14 million from local governments. Upon completion of the Little Calumet watershed project 95 percent of the flooding will be eliminated. Already $5 million has been spent by local governments to purchase land for building the Calumet Reservoir. Negotiations are near complete on purchasing of the watershed project, and blueprints are finished.

As you know, construction costs are rising at a rate in excess of 10 percent a year and land costs are increasing at a similar level. Simple mathematics tell us that for every year the project is held up the cost of the project will increase by approximately $3 million.

Mr. Chairman, I have tried to illustrate the need for the funding of the Little Calumet watershed. It is cost effective, and is a badly needed flood management project that will head off devastating flooding in an area continually faced with damaging storms. I am sure you would agree that the Office of Management and Budget should expedite review of this project so funding for construction of the Little Calumet watershed project can begin immediately.●

● Mr. BEREUTER. Mr. Chairman, as we complete our considerations of the appropriations for these important agriculture and food assistance programs for the next fiscal year, let us not lose sight of the serious and threatening economic climate in the rural regions of the Nation. Farmers today are facing skyrocketing costs for credit, fuel, and the other necessities required to produce the abundant crops which feed this country and which are the mainstay of our export trade, and yet the prices which they receive for that produce remain at or below their costs of production. The market which was just beginning to recover from the disastrous effects of the Carter grain embargo has once again suffered severe shock at the news of the dumping of surplus grain onto the market by the Commodity Credit Corporation. Drought once again threatens producers in many regions of the Nation. The continuing loss of our precious soil and water resources bodes ill for the future. As both the House and the Senate continue work on the next 4-year farm bill, farmers and ranchers throughout the Nation rest uneasy, wondering as to the future role of the Federal Government in their operations.

As my colleagues from urban districts lend their support to the passage of this appropriations measure, let them rest assured that the barebones funding for the agriculture programs contained in this bill will go a long way toward assuring their constituents of a reliable and reasonably priced supply of wholesome food products in the years ahead. It is important that we farm State representatives work together with our urban colleagues to build bridges of understanding on these issues of importance to us all, from food stamps and other nutrition programs to soil conservation, and the commodity programs, and so let us join together to approve these funds, in the interests of all Americans.●

● Mr. WAMPLER. Mr. Chairman, I wish to commend the distinguished chairman of the Appropriations Committee, the members of that committee, and especially the members who serve on the Agricultural Appropriations Subcommittee. In this extremely restricted budgetary situation faced by the Congress this year, I believe the Appropriations Committee has done a particularly outstanding job in sorting out priorities necessary to meet Government support for the future needs of American agriculture. The bill reported by the committee will not fund certain individual items as generously as some of us would like, we all realize that, but if we are to deal with the enormous problems our country faces, we must exercise a great deal of restraint.

I would like to point out certain areas of research funding which I want to personally congratulate the committee for newly undertaking or continuing. These are: Increasing basic Federal research $3 million to $194.8 million; for retaining research on tobacco; for dairy herd improvement; for brucellosis research to guarantee a safe milk supply; for soil and water research; for tropical and subtropical research to insure the businesses in this country will be able to share in the large and growing market for agricultural products and services in the developing countries; and, I particularly want to commend the committee for directing the Agricultural Research Service to conduct a feasibility study to determine the role of the Department in food toxicology research. Food safety and USDA's participation in this vital area is of particular concern to the Committee on Agriculture, and I am sure to the entire agricultural sector and the consuming public. We must avoid a repetition of the nitrite fiasco in future food safety decisionmaking.

I have noted with particular joy, which I have reason to believe is shared by most supporters of agriculture, the $19.9 million increase recommended in the bill over the 1981 appropriation for cooperative State research. While this does not meet the congressional mandate authorized in title XIV of the 1977 farm bill to double agricultural research during the period fiscal years 1978–82, it does represent a continuing dedication on the part of the Appropriations Committee to support the Federal-State research partnership that has been the keystone in providing our Nation with world leadership in agricultural productivity, food safety, food processing techniques, and food marketing systems for over 100 years. I particularly want to commend the committee for providing an increase of $17.9 million over the amount available for fiscal year 1981 under the Hatch Act for agricultural research to be performed at our State agricultural research stations. At the same time, I want to also commend the committee for increasing State cooperative forestry research by $1.5 million. I also noted the committee's efforts to support the growing importance of aquaculture by earmarking $790,000 to this endeavor. Most importantly, the committee for the first time authorized $3 million for animal health research under the competitive research grant system. When this is coupled with the addition of $5.4 million for animal health and disease research under special research grants we can at long last say that the Congress is taking action to address the losses being suffered from major disease problems that we find in the Nation's animal herds and poultry flocks. The chance of preserving the life of half of the 20 percent of the Nation's food animals born every year which now succumb to one of a variety of diseases and never enter the human food chain—at a loss of over $2½ billion annually—is, I believe, a worthwhile effort of our Government.

Mr. Chairman, there is one area in this pending appropriations bill that I should like to take exception to. I refer to the decision of the committee to defer consideration of funding the Bankhead-Jones program in the Extension Service budget to assist land-grant colleges and universities to teach subjects that assist land-grant colleges and universities to teach students seeking undergraduate and graduate

degrees in agriculture and engineering. I recognize that the Department of Education and the Office of Management and Budget have, since 1960, recommended the elimination of this program. On the other hand, these same Federal institutions have pushed and expanded support for a wide variety of social science programs. The amount, $11.5 million, budgeted last year to support this program is small when you judge the whole educational support budget. Moreover, it only addresses and benefits 4 percent of our total population. Yet this 4 percent is the backbone of our largest industry and I say, at this instance, our only successful industry.

Mr. Chairman, we have to ask ourselves this question: Are we going to be able to continue to turn out and expand the number of college-trained farm managers, agricultural engineers, veterinarians, plant and animal scientists, and soil and water scientists to meet our own demands and the demands of an expanding world population that experts tell us will double in the next 20 years? We are already facing serious shortages in many important areas, including agricultural engineering, integrated pest management, plant and animal genetics, reproductive psychology, agricultural finance, and in food science and nutrition, at both the undergraduate and the graduate levels.

Our agricultural facilities have been staffed with relative adequacy in the past, but serious shortages are projected for the near future. Then who will conduct the research, the teaching, the extension service work so essential to the continued growth of this vital national resource? Will the United States continue to have a strong and dynamic agriculture—one that can continue to export agricultural products, science, and technology?

We do not need to defer this program. We need to expand this program.

Mr. Chairman, I call your attention to title XIV of the 1982 farm bill, H.R. 3603, reported by the House Agriculture Committee. Our committee in this bill, now awaiting House action, rededicated its position first set forth in title XIV of the 1977 farm bill, to expand teaching in the food and agricultural sciences. Moreover, we removed all remaining jurisdictional control over the Bankhead-Jones Act from the Department of Education and placed it in the Department of Agriculture where it can best be appreciated and is needed. We also transferred all control over the Morrill-Nelson Act, which has also provided an even smaller amount of financial support to agricultural teaching, from the Department of Education to USDA. Finally, we amended the language of the Bankhead-Jones and the Morrill-Nelson Acts to remove all teaching of subjects other than agricultural from these acts. Our committee supports funding for teaching in the agricultural sciences. I urge the Appropriations Committee to take action in conference to correct this situation.

I wish to refer briefly to the funding provided for the food stamp program, a program under the jurisdiction of the Agriculture Committee, on which I serve. The amount appropriated for the food stamp program in H.R. 4119 for fiscal year 1982 is $9.7 billion—through August 15, 1982. This is the amount requested by the administration in March 1981, and was based upon their legislative proposals and reforms submitted to the House at that time. Not all of the administration's legislative proposals have been approved by the Congress in the omnibus reconciliation bill, H.R. 3982, recently approved by the House-Senate conferees.

It is my understanding that the administration sent a request to the Senate 2 weeks ago for additional money for the food stamp program. The administration requested not a fixed amount, but the difference between their estimation of the cost of the food stamp program in 1982 ($12.5 billion) and the savings realized during the reconciliation process ($1.658 billion as finally agreed upon). It apparently was the administration's hope that the two different figures for food stamp appropriations in the House and in the Senate could be worked out in conference.

Based on the administration's request to the Senate, a total of $10.8 billion is needed for the food stamp program for fiscal year 1982, which would include the block grant for Puerto Rico which goes into effect July 1, 1982.●

● Mr. GOLDWATER. Mr. Chairman, I rise in support of H.R. 4119, the agriculture, rural development, and related agencies appropriation bill for fiscal year 1982.

It has been said that agriculture is the "first and most respectable of all the arts." As a proud Member from the Nations's foremost agriculture State, I am pleased to support this bill which aids our country's "custodians of the soil" through research programs, marketing services, rural development policies, soil and water conservation, pest control, agriculture exports, and domestic and international food programs.

It would be an understatement to say that the farmer must deal with many staggering problems. This is assuming, of course, that you can get into farming in the first place. Initial investment of upward of $350,000 are often necessary, and currently, only 5 percent of our farmland is owned by those under 35 years of age.

The farmer's share of the dollar is declining. This results from the failure of farm income to keep pace with escalating production costs. These costs have tripled in 10 years, from $44.4 billion in 1970 to $131.6 billion in 1980. Seed and fertilizer expenses have quadrupled; fuel costs and interest rates have quintupled. A farmer's share of the food dollar, however, has declined from 49 percent in 1951 to only 37 percent today. Per capita income for farmers has been less than nonfarmers in 7 of the last 9 years.

There is also the extraordinary cost of buying and maintaining $300 billion in sophisticated farming machinery. Since 1973, equipment costs have increased almost 200 percent.

Escalating taxes require a farmer to heavily mortgage his farmland which now have the highest interest rates in 60 years.

As a result, agriculture is $180.5 billion in debt, mostly due to land acquisition costs—$23.2 billion more than last year.

A farmer's crops and livestock are vulnerable to natural disasters, including drought, soil loss, disease, and pests. Most recently, for example, California agriculture is in a life-and-death battle with the Mediterranean fruit fly because of Governor Brown's inexcusable failure to eradicate that threat. His political gameplaying may very well bankrupt my State's $14 billion agriculture industry.

Agriculture is, regardless of Governor Brown's attempts, basic to the American way of life. It is largely our precious and plentiful natural resources coupled with the pride and determination of our people that has made America's agriculture the envied model for the rest of the world. In fact, our Nation's agriculture productivity is unparalleled by any other nation in the world today, or by any previous civiliztion in history.

With assets of over $1 trillion, or about equal to three-fourths of our corporations' capital assets, agriculture is our Nation's largest industry.

Agriculture spends as much for goods and services as our entrie Nation spends for importing oil. Agriculture uses 6½ million tons of steel per year, and enough rubber to put tires on 7 million cars. It directly or indirectly employs 17 million people and consumes enough electricity to light up the homes of New England, Kentucky, Washington, D.C., and Maryland combined.

The farmer plentifully supplies the 96 percent of our nonfarming population with fresh fruits, vegetables, grains, dairy products, and meat. A single farmer has the capability of feeding 60 hungry people. So much wholesome food is produced in our Nation that we can feed millions of people in foreign countries who other-

wise would have starved, making America's agriculture truly the "breadbasket of the world." Total agriculture exports, for example, will reach almost $50 billion in 1981, enough to pay for more than half the cost of our petroleum imports.

I might also add that the hard-working farmer contributes to a healthier economy. Each dollar received from our Nation's fertile soil contributes at least $7 to our economy.

Mr. Chairman, we must continue to help our agriculture community. We must have a national agriculture policy of abundance, not scarcity. We must not return to the misguided practices of the 1950's which stifled agriculture productivity and export.

Since 60 percent of our country is farmland, good management of our soil and water is essential. History tells us that resource exploitation leads to the ruination of great economies. It is estimated that our Nation once held 500 million acres of prime soil. We have exhausted 40 percent of its fertility, and we are steadily working our way through another 100 million acres. Furthermore, we are losing up to 1 million acres to homes and highways each year. Since 1935, however, we have made a conscious effort to rejuvenate our land. We have planted 7 million trees, built 2½ million reservoirs to store water and treated millions of acres of land. We must continue to be "good stewards" of our vast resources.

I therefore rise in support, Mr. Chairman, of not just a bill, but of agriculture. As Jonathan Swift once wrote:

> * * * whoever could make two ears of corn * * * grow upon a spot of ground where only one grew before, would deserve better of mankind, and do more essential service to his country, than the whole race of politicians put together.●

● Mr. WEBER of Minnesota. Mr. Chairman, I would like to commend the gentleman from Mississippi, Representative JAMIE WHITTEN, and the other members of the House Appropriations Committee for their strong support for funding for the Rural Electrification Administration (REA). The Appropriations Committee's financial commitment of REA, I believe, represents the sentiments felt by millions of Americans, that the REA program is a necessary component of a healthy rural economy and is vital for the quality of life in those areas.

Let us review the REA program and the two great achievements it has had over the last 50 years. Congress first established the program in 1936, and spent considerable time debating whether the private sector could provie basic electric services to rural areas. After concluding it could not, REA became the vehicle for providing these services to millions of rural families. As of today, the program has been a tremendous achievement, providing 99 percent of the people in rural communities with electric service; and it has all been done at a reasonable cost.

In 1949 the Congress added the rural telephone program to the REA. For the first time, families living on farms and in small towns could have a telephone, something they would value for a long time. This was the second achievement of the REA program. The private sector simply could not provide the service. The REA program, administered by the Federal Government, did.

During the Nixon administration, there were a number of proposals from the White House to restructure the program, to severely limit its scope. But Congress wisely responded by changing the funding mechanism for the guaranteed loans for REA cooperatives. Now, the money used for equipment purchases and facility expansion comes from a revolving fund with cooperatives paying back the money borrowed, thus requiring no significant additional Government expenditures.

Today, the REA program continues to provide needed electric and telephone services to rural America. In the 6th Congressional District of Minnesota alone, over 150,000 people are served by the program. And the program is not social welfare—it is a program which helps people become more productive, create more wealth, and enhance both the quality of life for rural communities and the quality of life for all Americans.

I only hope that in the future, the Congress will continue to recognize the importance of the REA program, not only for rural America, but for the whole Nation as well.●

Mr. WHITTEN. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

AGRICULTURAL RESEARCH SERVICE

For necessary expenses to enable the Agricultural Research Service to perform agricultural research and demonstration relating to production, utilization, marketing, and distribution (not otherwise provided for), home economics or nutrition and consumer use, and for acquisition of lands by donation, exchange, or purchase at a nominal cost not to exceed $100, $451,749,000: *Provided,* That appropriations hereunder shall be available for field employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $115,000 shall be available for employment under 5 U.S.C. 3109: *Provided further,* That funds appropriated herein can be used to provide financial assistance to the organizers of international conferences, if such conferences are in support of agency programs: *Provided further,* That appropriations hereunder shall be available for the operation and maintenance of aircraft and the purchase of not to exceed one for replacement only: *Provided further,* That of the appropriations hereunder not less than $10,526,600 shall be available to conduct marketing research: *Provided further,* That appropriations hereunder shall be available pursuant to 7 U.S.C. 2250 for the construction, alteration, and repair of buildings and improvements, but unless otherwise provided the cost of constructing any one building shall not exceed $100,000, except for headhouses connecting greenhouses which shall each be limited to $500,000, and except for ten buildings to be constructed or improved at a cost not to exceed $185,000 each, and the cost of altering any one building during the fiscal year shall not exceed 10 per centum of the current replacement value of the building or $100,000 whichever is greater: *Provided further,* That the limitations on alterations contained in this Act shall not apply to a total of $100,000 for facilities at Beltsville, Maryland: *Provided further,* That the foregoing limitations shall not apply to replacement of buildings needed to carry out the Act of April 24, 1948 (21 U.S.C. 113a).

AMENDMENT OFFERED BY MR. BROWN OF COLORADO

Mr. BROWN of Colorado. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BROWN of Colorado: Page 7, line 5, immediately before the period, insert ": *Provided further,* That the foregoing limitation shall not apply to purchase from Colorado State University Research Foundation of approximately 160 acres within the boundaries of the Central Plains Experimental Range, Nunn, Colorado, for not to exceed $115,000".

Mr. BROWN of Colorado. Mr. Chairman, this amendment does not add money to the bill. Its purpose is to exempt from the $100 limitation on land acquisitions by the Agricultural Research Service the purchase of 160 acres within the Central Plains Experimental Range in Nunn, Colo.

Mr. WHITTEN. Mr. Speaker, if the gentleman will yield, we have discussed this with the author. We have no objection on this side.

Mrs. SMITH of Nebraska. Mr. Chairman, if the gentleman will yield, the minority is familiar with this amendment. We have no objection.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Colorado (Mr. BROWN).

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

ANIMAL AND PLANT HEALTH INSPECTION SERVICE

SALARIES AND EXPENSES

For expenses, not otherwise provided for, including those pursuant to the Act of February 28, 1947, as amended (21 U.S.C. 114b-c) necessary to prevent, control, and eradicate pests and plant and animal diseases; to carry out inspection, quarantine, and regulatory activities; and to protect the environment, as authorized by law, $297,609,000 of which $2,500,000 shall be available for the control of outbreaks of insects, plant diseases and animal diseases to the extent necessary to meet emergency conditions: *Provided,* That $1,000,000 of the funds for control of the fire ant shall be placed in reserve for matching purposes with States which may come into the program: *Provided fur-*

ther, That no funds shall be usd to formulate or administer a brucellosis eradication program for the current fiscal year that does not require minimum matching by the States, of at least 40 per centum: *Provided further*, That this appropriation shall be available for field employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $40,000 shall be available for employment under 5 U.S.C 3109: *Provided further*, That this appropriation shall be available for the operation and maintenance of aircraft and the purchase of not to exceed two, of which one shall be for replacement only: *Provided further*, That, in addition, in emergencies which threaten the food resources of the country, the Secretary may transfer from other appropriations or funds available to the agencies or corporations of the Department such sums as he may deem necessary, to be available only in such emergencies for the arrest and eradication of contagious or infectious diseases or insect infestations of animals, poultry, or plants, and for expenses in accordance with the Act of February 28, 1947, as amended, and section 102 of the Act of September 21, 1944, as amended, and any unexpended balances of funds transferred for such emergency purposes in the next preceding fiscal year shall be merged with such transferred amounts.

AMENDMENT OFFERED BY MR. FAZIO

Mr. FAZIO. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FAZIO: Page 12, line 17, after "of which" insert "not to exceed $14,983,000 shall be available for the Mediterranean fruit fly program and".

Mr. FAZIO. Mr. Chairman, I am offering this amendment in conjunction with my colleague, the gentleman from California (Mr. LEWIS).

The amendment is very brief. It simply allows an additional $6 million to be spent by the APHIS section of the Department of Agriculture on eradication of the Medfly in California during fiscal year 1982.

Mr. Chairman, as you know, the Mediterranean fruit fly infestation in California has drawn national attention because of the Medfly's potentially devastating impact on over 200 varieties of fruits and vegetables and the impact a Medfly epidemic would have on the Nation's agriculture industry and consumers. As you know, the State of California and the U.S. Department of Agriculture have gotten together to agree on a program to combat the Medfly. The prime feature of this program is the aerial application of the pesticide malathion, which is being done by the State now, with equal support from the USDA using fiscal 1981 funds.

Authorities now appear confident that the outbreak can be controlled and that the source of much of the Nation's fruit and vegetables, California's intensive and vast agricultural regions, will be protected. However, in order to complete the eradication both the State and the USDA will have to take actions and expend funds in fiscal 1982. The USDA has stated that to perform its share of the agreed-upon work it will need $6 million in fiscal 1982 in addition to the $8.9 million now proposed for the Medfly but basically committed to the U.S. participation in the sterile fly breeding program with Mexico. This $6 million estimate is a hard figure, given the extent of the infestation now known. It may be that the future will require that more be spent in fiscal 1982; it is certain that $6 million at least will be needed.

In a letter to Chairman WHITTEN dated July 23, 1981, Agriculture Secretary John R. Block acknowledged that there will be a need to spend $6 million in fiscal 1982 in order to complete the eradication effort against this Santa Clara infestation and in order to monitor other areas vulnerable to Medfly infestation around the country. The Secretary, however, said he could do so within the level of funding already proposed in this bill.

Therefore, I am offering today an amendment to the Agriculture appropriations bill to allow up to $14,983,000 to be expended by the Animal and Plant Health Inspection Service for the Medfly program. This represents a $6 million increase in the amount considered for the Medfly account. It does not, however, represent an increase above the $297 million allotted by the bill for the overall APHIS program. Nor does it require that the Secretary spend the additional $6 million, though it is virtually certain that he will find the expenditure necessary. The amendment merely makes it much easier for the Secretary to make available the required funds quickly.

It should be understood by the Members that the $6 million is to be used for the "chemical treatments, sterile fly releases, nationwide surveys and to maintain any quarantines which are necessary" to which the Secretary referred in his letter to you, Mr. Chairman. These activities are more precisely described in a memorandum which APHIS has circulated on the Hill and which I am submitting for printing in the CONGRESSIONAL RECORD:

MEDITERRANEAN FRUIT FLY IN CALIFORNIA

BACKGROUND

The Mediterranean fruit fly (Medfly) is a destructive pest that attacks more than 200 varieties of host fruits, melons, and vegetables. It presently infests most major citrus-producing countries except the United States and Mexico. The Animal and Plant Health Inspection Service (APHIS) conducts a program to prevent sustained Medfly infestations in the continental United States, Virgin Islands, Puerto Rico, and north of the Isthmus of Tehuantepec in Mexico. The pest has been found in the United States on seven separate occasions in the last 50 years. These previous infestations were subsequently eradicated at a total Federal cost of over $20 million.

ECONOMIC SIGNIFICANCE

It is estimated that 81 percent of the citrus production in the United States falls in the zone in which the Medfly could become established if allowed to spread naturally. Losses in the citrus industry alone, based on a 1979 study, could range from $2.9 million to $22 million per year in California and from $70 million to $524 million nationwide, depending on the severity of the infestation.

Based on 1979 California production and control costs, production losses in all host crops would be many times this amount. In 1979, California harvested 2.4 million acres of host commodities, valued at $4.1 billion. Even at a very conservative 10 percent loss rate, costs to the agricultural industry there would exceed $400 million annually. Further, since California is a major source of exported citrus and other fruits, the United States could lose as much as one-half billion dollars in export markets due to foreign embargoes.

These damage estimates do not include costs for protective steps by other States or countries, such as quarantine, treatment, surveillance or inspection, which would likely be undertaken in any outbreak situation.

HISTORY OF CURRENT PROBLEMS

In early June 1980, APHIS confirmed that Medfly infestations existed in the Los Angeles and Santa Clara County, California, areas. APHIS, in cooperation with the State of California, immediately began extensive survey, regulatory, and control efforts to eradicate these infestations. Program efforts were successful in dealing with the outbreak in Los Angeles, and the pest was declared eradicated from that area in early December 1980.

The much larger Santa Clara County infestation has been more difficult to control. From June 1980 to January 1, 1981, the infestation was dealt with by utilizing full coverage foliar treatments of malathion using ground equipment, soil treatment with insecticides, and the release of sterile Medflies. These activities were not successful in eradicating the infestation in Santa Clara County. Based on USDA trapping reports, the number of wild Medflies and larvae was increasing in the originally infested area, which was growing significantly. USDA recommended immediate aerial spray to contain the infestation; opposition from communities in the area prevented this step. Because of this, California Governor Edmund G. Brown, Jr., declared a state of emergency on December 24, 1980, and on January 6, 1981, officials launched a full scale ground attack. Hundreds of California Conservation Corps workers, Federal and State employees, and local volunteers joined to strip all host fruit from a 50 square mile core area.

Fruit stripping was completed in the core area in February, and the large scale bait spray program using ground equipment was completed in late May. As warmer soil and air temperatures occurred it became evident that pupae had overwintered and regeneration was taking place. In a special meeting, the Mediterranean Fruit Fly Technical Advisory Group in Los Gatos and Sacramento, California, on July 7 and 8, 1981, voted unanimously to proceed with an aerial spray program in the Medfly-infested area in California. After initially rejecting the advisory group recommendations, Governor Brown ordered aerial spraying. Spraying began on July 14, 1981.

CURRENT SITUATION

It has been slightly over a year since the Medfly was detected in the Santa Clara Valley and California officials continue to

receive reports of new larval properties in the area. Fruit stripping and disposal and ground spraying conducted by the State supplement the cooperative aerial program.

Aerial spraying with malathion continues over the 150 square mile infestation. Random inspections of passenger vehicles leaving the regulated area produced large quantities of prohibited fruit daily. Infested materials may have moved into noninfested areas.

To prevent further artificial spread, State authorities, with APHIS support, have initiated several preventive measures. All commercial vehicles leaving the regulated area are stopped and their manifests checked to reduce the chances of artificial spread. Roadside fruit stands have been closed. Baggage and handbags leaving the area on Amtrak or through San Jose, San Francisco, and Oakland airports are inspected. Intensive trapping is conducted at 50 traps per square mile in the core area and at lesser intensities away from the core down to 10 traps per square mile on the periphery. All areas of potential infestation in the State will soon be monitored at the 5 trap per square mile level.

Release of sterile fruit flies has been halted during the spraying operation. Once aerial spraying is completed, intensive surveys will be conducted in the infested area to insure that eradication has been achieved. Ongoing nationwide surveys will be intensified to verify that the pest has not spread to other areas.

REQUIREMENTS FOR FISCAL YEAR 1982

The California Mediterranean Fruit Fly Emergency Program will continue into fiscal year 1982 and until this pest is eradicated from the continental United States.

A successful Medfly eradication program must combine treatment of the infestation with thorough followup work. Both the regulatory agencies and other threatened States must be convinced that eradication is complete. This can be accomplished in three steps.

(1) Chemical treatment supported by sterile fly release. The spray program should be complete before the beginning of fiscal year 1982. Sterile flies will be released through June 1982. The fiscal year 1982 cost of these operations is estimated at $1.8 million.

(2) Intensive quarantine of the infested area will continue until two insect generations after the last treatment (approximately 90 days). Careful monitoring of air, bus, freight, and shipping point terminals, as well as roadside inspection on the boundaries of the quarantine area, will continue until eradication is demonstrated. This includes treatment and certification of host commodities leaving the quarantine area. High intensity quarantine through November 1981 and a lower level through June 1982 will cost $1.8 million.

(3) The third phase of the Medfly eradication program will consist of nationwide surveys to ensure elimination of the infestation. This will be in addition to intensive trapping in the currently infested and adjacent areas. During the next growing season, all vulnerable production areas in the United States will be surveyed at a higher than usual level to ensure that the organism did not spread from California. The cost of this intensified surveillance and trapping will total $2.4 million in 1982.

Steps 2 and 3 are fully necessary components to an eradication program. The absence of fly or larvae detection, a sign of success, makes emergency funding more difficult to secure. Since the need is clear, it would be reasonable to have funds appropriated in the normal process.

California and USDA are cooperating in phases 1 and 2. Phase 3 is expected to be a cooperative effort between USDA and the producing States.

The costs above, totaling $6 million, represent our best estimate of Federal costs if such a program were implemented. California state spending for Medfly has reached $1.5 million per month and should continue at that rate through the program's conclusion.

DEPARTMENT OF AGRICULTURE,
Washington, D.C., July 3, 1981.

As you are well aware, the Department is working with the State of California to eradicate the current infestations of Mediterranean fruit flies from the United States. Assuming the current infestations do not spread to the major cropland areas of California, we anticipate spending $5.7 million on eradication efforts in fiscal year 1981. These costs will be absorbed from existing appropriations. In fiscal year 1982, we anticipate an additional $6 million will be expended. These funds will be used for chemical treatments, sterile fly releases, nationwide surveys and to maintain any quarantines which are necessary. We expect to be able to carry out these activities within the fiscal year 1982 budget currently being considered by the Congress and therefore, do not require additional funding.

Maintaining the Department's policy of keeping the Committee advised of significant changes in our activities we will notify the Committee once a decision is reached on how these funds will be absorbed.

JOHN R. BLOCK.

Mr. WHITTEN. Mr. Speaker, will the gentleman yield to me?

Mr. FAZIO. I would be happy to yield to the chairman.

Mr. WHITTEN. May I say that I am glad my two colleagues are offering this amendment. Over the years our committee has dealt with the Mediterranean fruit fly, not only in California, but in Florida and Hawaii and elsewhere. It is one of the most devastating insects that can hit any area.

The committee certainly backs up all efforts to bring it under control.

The Department advised us by letter that they had ample funds, but I am glad to see the gentleman offer this amendment so that there can be no misunderstanding.

This is a national problem. After all, the producers are there, but the consumers are all over the United States.

So we are glad to accept this amendment and may I commend the gentleman again.

May I point out to my other colleagues from California that we have received permission at the outset for all Members to revise and extend their remarks.

Mrs. SMITH of Nebraska. Mr. Chairman, will the gentleman yield?

Mr. FAZIO. I am more than happy to yield to the gentlewoman.

Mrs. SMITH of Nebraska. The minority shares the concern expressed about the Medfly.

Mr. LEWIS. Mr. Chairman, will the gentleman yield?

Mr. FAZIO. I yield to my colleague, the gentleman from California.

Mr. LEWIS. I thank my colleague.

I simply wanted to take a moment to express my deep appreciation to my colleagues from the committee, especially the chairman, the gentleman from Mississippi (Mr. WHITTEN), and my colleague, the gentlewoman from Nebraska (Mrs. SMITH) for their cooperation.

I wanted to bring to the attention of the House if the gentleman from California (Mr. FAZIO) will share with me for a moment the reality that this cooperation has come to us in spite of some parts of California itself. There is little question that experts in agriculture, both here and in our home State, are very aware of the incredible problem that has arisen as a result of the infestation of the Mediterranean fruit fly. Those experts have had answers and solutions for a long time now. Those solutions are before us not because, however, of our Governor, Jerry Brown, but in spite of him, for he has persisted in playing games in a political sense with this process.

I must say that in spite of that our people here in Washington have been willing to cooperate and extend their support as well as their dollars in funding.

So I appreciate the cooperation of the gentleman from California (Mr. FAZIO). I certainly hope that we get better support in the future from our Governor.

Mr. FAZIO. Well, the gentleman knows, I might have reclaimed my time, but I chose not to, because the gentleman's words are reflective of feelings that I share. I have been very critical of the inaction of the Government in the initial action not to spray Malathion in late June.

I am very pleased to see that my constituent, who is the State director of agriculture and his project director, have finally prevailed, and the initial decision has been overturned and we are now embarked on a fully cooperative program between the State and Federal agencies.

Before I conclude my remarks, I would simply like to say that I appreciate the gentleman's assistance in bringing about the leadership that would require the Federal Department of Agriculture in this instance to be willing to accede to congressional desires to see this funding explicitly mentioned in this bill.

I would like to thank the gentleman from California (Mr. SHUMWAY), who is on the floor now, and other Members on my side, particularly the gentleman from California (Mr. COELHO), the gentleman from California (Mr. MATSUI), the gentleman from California (Mr. PANETTA), and the gentleman from California (Mr. MINETA), who have also expressed a desire to be

clearly in favor of the position we have taken with this amendment.

In addition, I would like to yield to the gentleman from Kern County, Calif. (Mr. THOMAS), for any remarks the gentleman may wish to make.

Mr. THOMAS. Mr Chairman, I thank the gentleman from California.

I especially appreciate the remarks of the gentleman from California about the ability of our Governor to make timely decisions. It is always important that in a State that is viewed as a relatively conservative State that we have the willingness of the Federal Government to make right decisions, even when those folks in the State have some difficulty in determining what is the right decision.

I appreciate the willingness of the gentleman to make sure that the money is there to save California from itself.

Mr. FAZIO. Mr. Chairman, I want to thank the ranking minority member and the chairman for their assistance.

Mr. GOLDWATER. As a concerned California Member representing Ventura County's agriculture, I rise in support of my California colleague's amendment which would appropriate an additional $6 million for Federal efforts to eradicate the Mediterranean fruit fly. This amendment has the support of California's agriculture because they, like I, have given up hope on Governor Brown's ability to handle the crisis.

This pest, by threatening our $14 billion agriculture industry, could wreak economic disaster on our entire State. Sadly, Governor Brown could have acted decisively more than 9 months ago to eradicate the Medfly. Instead, Governor Brown chose to wait, and that waiting is costing California agriculture dearly.

The situation right now in California can only be described as chaotic. Farmers are scrambling to build fumigation chambers in anticipation of certification requirements, other States are attempting to quarantine California's produce, and agriculture is quite literally trying to save itself from bankruptcy.

Now, with California on the verge of catastrophe, the U.S. Department of Agriculture has got two gargantuan tasks ahead of it—saving California from the Medfly, and Governor Brown from himself.

● Mr. COELHO. Mr. Chairman, I applaud the efforts of my distinguished colleague from the Fourth District of California in his efforts to require continued Federal assistance in the cooperative effort by California and USDA to control and eradicate the Mediterranean fruit fly. It is my understanding that the Secretary of Agriculture estimates a need for $6 million for the eradication effort in California for fiscal year 1982, and we in Congress are responding to that request by the Secretary of Agriculture.

The current Medfly outbreak in California is a very serious crisis not only facing the $14 billion agriculture industry in California but all of the Nation. Effective and responsible efforts by both California and the Federal Government officials must be continued to eradicate this serious threat to the Nation's agriculture industry.●

● Mr. MINETA. Mr. Chairman, I wish to thank our colleagues Mr. FAZIO and Mr. LEWIS for the leadership they have exhibited in bringing this to the attention of the House.

I rise in support of this amendment, which appropriates no additional money, but simply earmarks a portion of the Department of Agriculture Animal and Plant Health Inspection Service's 1982 budget to be used for continuing efforts to control the Mediterranean fruit fly. This destructive pest is well established in many tropical and subtropical areas of the world, where its voracious appetite results in substantial fruit and vegetable production losses.

Just over 1 year ago, Medflies were discovered in two areas of California—Los Angeles and Santa Clara County. The southern infestation was brought under control relatively quickly, but in Santa Clara County the problem has proved to be more persistent. Throughout the past year, the State of California has carried out, with APHIS assistance, an active—and very expensive—program to eradicate this pest. In response to citizens' concerns about aerial spraying, this program relied on coordinated ground control methods, using fruit stripping, ground spraying, and release of sterile flies in order to interrupt the breeding cycle. The program has required, and has had, a remarkable level of citizen involvement and cooperation. For several months this spring, during which no wild flies or larvae were discovered, we were encouraged to think that this valiant effort had succeeded.

During the past month, however, it has become clear that the ground battle against the Medfly has failed. For those of us who have been involved in the battle, discovery of new larvae has been disheartening indeed—especially so because new finds have been concentrated in areas outside the original Medfly control zone. I did not approve of Federal pressure to initiate aerial spraying because I felt that we should give ground methods a chance in these new areas. Since then, however, new finds in even wider areas have convinced me that the pest has outrun our ground control capabilities, and that aerial spraying of Malathion is necessary to keep it from escaping altogether. One of the important lessons to be learned from this disappointing experience is the critical role of trapping. Adequate trap density, over a broad area, is the only way we have of knowing how widespread the problem is and whether our control methods, whatever they may be, are working.

This has been a local emergency with national implications. Fruit and vegetable growers from the rest of the State, as well as from other warm winter areas, continue to pay very close attention to our battle with the Medfly. Should this destructive pest escape, and become established in the productive farmland of California's central valley, the State would face losses of up to $2 billion. Because California leads the Nation in production of some 48 susceptible crops, this loss would immediately be reflected in higher consumer prices throughout the country. Spread of the pest to other areas, especially Florida and Texas, would be very difficult, and expensive, to prevent. Thus, it is in the interest of the entire Nation, from both the producer's and the consumer's viewpoint, to fight this pest vigorously.

This amendment would not channel funds into the current aerial spraying program, which should be complete before the end of this fiscal year. What it does do is assure adequate resources for the followup program which will continue well into next spring; $1.8 million would be made available for chemical treatments and sterile fly release, $1.8 million would be used to fund the quarantine and inspection operations, and $2.4 million would be spent on a nationwide trapping program to insure that the Medfly has not escaped the infested area. All of these programs are essential to protecting our national agricultural productivity,. and I urge your support of this amendment.●

● Mr. MATSUI. Mr. Chairman, I rise to support the amendment of my colleague and neighbor from California.

The Medfly problem in California has received national attention in recent weeks. It is a problem which poses an obvious and serious threat to agriculture in our State and to consumers across the country. I expect that before too long the issue will fade from the television networks' coverage and the pages of the national press. And we will be finding some immediate means to alleviate the problem. But that does not mean the problem will disappear.

As this problem was not created overnight, nor will it be solved overnight. I believe that the earmarking of this modest amount requested by the gentleman from California (Mr. FAZIO) for attention to the Medfly crisis will go a long way toward finding solutions in the long run, and to instilling confidence in the short run.

This amendment, Mr. Chairman, will not increase the amount of this appropriations bill. It will indicate

what a small portion of it will be devoted to; and I wholeheartedly urge the other Members to support it also.●

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. FAZIO).

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk continued to read title I.

Mr. WHITTEN (during the reading). Mr. Chairman, I ask unanimous consent that the remainder of title I be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The CHAIRMAN. Are there any points of order not covered by the waiver?

Are there any amendments? If not, the Clerk will read title II.

The Clerk proceeded to read title II.

Mr. WHITTEN (during the reading). Mr. Chairman, I ask unanimous consent that title II be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The CHAIRMAN. Are there any points of order not covered by the waiver to title II?

If not, are there any amendments to title II?

The Clerk will report title III.

The Clerk proceeded to read title III.

Mr. WHITTEN (during the reading). Mr. Chairman, I ask unanimous consent that title III be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The CHAIRMAN. Are there any points of order not covered by the waiver to title III?

Are there amendments to title III?

If not, the Clerk will report title IV.

The Clerk proceeded to read title IV.

□ 1820

Mr. WHITTEN (during the reading). Mr. Chairman, I ask unanimous consent that title IV be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The CHAIRMAN. Are there any points of order not covered by the waiver to title IV?

Are there any amendments to title IV?

The Clerk will report title V.

The Clerk proceeded to read title V.

Mr. WHITTEN (during the reading). Mr. Chairman, I ask unanimous consent that title V be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The CHAIRMAN. Are there any points of order not covered by the waiver of title V?

Are there any amendments to title V?

If not, the Clerk will report title VI.

The Clerk proceeded to read title VI.

Mr. WHITTEN (during the reading). Mr. Chairman, I ask unanimous consent that title VI be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The CHAIRMAN. Are there any points of order not covered by the waiver to title VI?

Are there any amendments to title VI?

Mr. WHITTEN. Mr. Chairman, I move that the Committee do now rise and report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The motion was agreed to.

Accordingly the Committee rose, and the Speaker pro tempore (Mr. NATCHER) having assumed the chair, Mr. GORE, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill, H.R. 4119, making appropriations for agriculture, rural development, and related agencies programs for the fiscal year ending September 30, 1982, and for other purposes, had directed him to report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The SPEAKER pro tempore. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER pro tempore. Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. QUILLEN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 343, nays 33, not voting 57, as follows:

[Roll No. 166]

□ 1830

The Clerk announced the following pairs:

Mr. de la Garza with Mrs. Schneider.
Mr. Zeferetti with Mr. Railsback.
Mr. Applegate with Mr. Vander Jagt.
Mr. Price with Mr. Rousselot.
Mr. Conyers with Mr. Frenzel.
Mr. Rosenthal with Mr. Grisham.
Mr. Solarz with Mr. Dickinson.
Mr. Santini with Mr. Chappie.
Mr. Shannon with Mr. DeNardis.
Mr. Holland with Mr. Kemp.
Mr. Barnard with Mr. Deckard.
Mr. Pepper with Mr. Williams of Ohio.
Mr. Whitley with Mr. Brown of Ohio.
Mr. Aspin with Mr. Evans of Delaware.
Mr. Volkmer with Mr. Staton of West Virginia.
Mr. Simon with Mr. Pritchard.
Mr. Russo with Mr. Horton.
Ms. Mikulski with Mr. Evans of Iowa.
Mr. Pickle with Mr. Gregg.
Mr. D'Amours with Mr. Hansen of Utah.
Mr. Brown of California with Mr. Conable.
Mr. Minish with Mr. Collins of Texas.
Mr. Dwyer with Mr. Gray.
Mr. John L. Burton with Mr. Dougherty.
Mr. Blanchard with Mr. Bonker.
Mr. Frank with Mr. Frost.
Mr. Weaver with Mr. Savage.

Mr. HANSEN of Idaho and Mr. CRAIG changed their votes from "yea" to "nay."

Mr. REUSS and Mr. DERWINSKI changed their votes from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERMISSION FOR COMMITTEE ON GOVERNMENT OPERATIONS TO SIT ON THURSDAY, JULY 30, 1981, DURING 5-MINUTE RULE

Mr. BROOKS. Mr. Speaker, I ask unanimous consent that the Committee on Government Operations be permitted to sit on Thursday, July 30, 1981, during the 5-minute rule.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

Mr. MICHEL. Reserving the right to object, Mr. Speaker—and I shall not—under my reservation I would simply like to mention, as I understand the situation, the gentleman from Texas has deferred to the wishes of the gentleman from New York (Mr. HORTON) to delay that committee meeting until Thursday when Mr. HORTON will be able to participate in whatever proceedings are to take place and that the gentleman from Texas is now making a unanimous-consent request, as is required, to have that committee sit during the 5-minute rule on Thursday.

It is my further understanding, in consultation with Mr. Meese, at the White House, that there will hopefully be some accommodation arrived at by the time the gentleman's committee meets, and for that reason I would not object to the gentleman's request.

Mr. MOFFETT. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Connecticut.

Mr. MOFFETT. Mr. Speaker, may I thank the distinguished minority leader for his help on this matter. Perhaps we will not even need the meeting with the benefit of his help.

Mr. MICHEL. I thank the gentleman. I certainly hope the matter can be amicably resolved.

I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

Mr. WALKER. Reserving the right to object, Mr. Speaker, I just reserve the right to object, and I shall not object, but I just want to find out whether or not the program would be as the gentleman previously outlined the program before the committee at the other point when he brought up this unanimous-consent request?

Mr. BROOKS. That is correct.

Mr. WALKER. I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

TAX CUT—A FRAUD UPON THE AMERICAN PEOPLE

(Mr. OTTINGER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. OTTINGER. Mr. Speaker, a tax cut of any kind at this time would be a fraud upon the American people. I cannot support a tax cut, be it the Democratic, Republican, or liberal version.

The administration has proposed, and Congress has supported, an unprecedented peacetime military buildup, contemplating expenditures of a trillion and a half dollars over the next 5 years. This is three times the Vietnam war expenditure in real dollars. President Johnson's unwillingness to run the political risks of paying for the Vietnam buildup is acknowledged by virtually all economists to have been the principal cause of our severe post-Vietnam inflationary problems.

The economic facts of life are simply that you cannot have a trillion and a half dollar military budget buildup, cut taxes, and have anything but runaway inflation. The tax breaks pretended to be offered the American people will dissolve instantaneously in erosion of the value of the dollar and soaring interest rates that will cripple the economy.

Indeed, the Reagan tax cut proposal is far more dangerous than President Johnson's because the economic circumstances of the country are far more adverse. Johnson's inflation rate was just 2 percent; his interest rate was a then-normal 6 percent; his economy was healthy and growing. If his actions eventually proved devastating to a healthy economy, what will Reagan's plan do to our faltering economy? Consider, too, that Reagan's military expenditure proposals are three times Johnson's and he is proposing tax cuts not proposed by Johnson.

I think that the defense budget increases are idiotic in view of the needs of our domestic economy and the fast erosion of our competitiveness with Japan and Europe—and in view of our

real national security needs which depend far more on efforts to avoid war, on reaching SALT agreements to limit military increases, on upgrading military manpower, and on becoming energy independent than on the hugely expensive pork barrel military equipment buildup proposed by Reagan and Congress.

It is clear, however, from the overwhelming congressional support given to the defense budget increases, that my defense views will not prevail. So, a skyrocketing defense budget must be taken as a given, and if that is so, then it simply must be paid for. I firmly believe that our economy and our people would be far better off paying for it through taxes than through inflation, the most damaging and inequitable tax of all.

There is another insidious aspect of the tax cut packages that are put before us. If they are adopted, then deficits of frightening proportions seem assured. Indeed, the Reaganomic plan contemplates budget shortfalls of more than $87 billion over the next 2 years, which the President and Mr. Stockman propose be alleviated through more draconian budget cuts. When you contemplate the enormous damage done by the $37 billion in cuts just passed by Congress to the social and economic infrastructure of the country, just think about what $87 billion more in cuts will do to jobs, retirement incomes, education, mass transportation, health care, our cities, energy research, and other programs vital to our future. I doubt such grave additional damage will be voted by Congress.

But the tax cuts will certainly force some additional cuts on top of the cuts already inflicted on vital programs, and on that basis alone the tax cuts should be opposed.

This leads one to ask where are our Democrats, liberal or otherwise? Why do the Democrats keep coming up with measures that are carbon copies of the Republican philosophy, with just minor rearrangement of the chairs on the deck of the Republican Titanic? Democrats should be proposing real alternatives to Republican disaster prescriptions, not just Democratic tax and budget cuts that are a little less damaging.

Mr. Speaker, I am dismayed at the Republican tax cut, but I am not surprised at its giveaways to the oil companies and other special interests. I am more dismayed, if anything, at the Democratic proposal which seeks to outbid the Republican giveaway for votes. I am most dismayed at the so-called liberal package that, while its focus is far better, still adopts as its basis the economically suicidal notion that we should have general tax cuts in the face of the kind of defense buildup that has been voted by Congress.

A plague on all your houses, I say. I will not support any of this nonsense and predict that those who do will rue the day.

WILLA CATHER GOLD MEDALLION

(Mrs. SMITH of Nebraska asked and was given permission to address the House for 1 minute, to revise and extend her remarks and include extraneous matter.)

Mrs. SMITH of Nebraska. Mr. Speaker, Nebraska has been singularly honored by the selection of the renowned authoress, Willa Cather of Red Cloud, Nebr., as one of two outstanding individuals in the American arts for the 1981 American Arts Gold Medallions to be sold and circulated by the Bureau of the Mint. The other author to be so honored this year is Mark Twain.

The Bureau's tribute to Willa Cather in announcing the selection tells why Nebraskans and the leaders of the literary world are so proud of her and the distinct contribution she has made to the arts. In Nebraska, we honor her each day through the Willa Cather Pioneer Memorial in Red Cloud, visited by hundreds of people in and out of the State each year, but this new honor should spark wider interest in her work and the place she holds in American literature.

I commend the following article on Willa Cather to my colleagues:

WILLA CATHER

Pioneer women helped to create a country out of an idea and in so doing, Willa Cather believed, exhibited unique, creative and forceful attributes. Willa Cather characterized such a woman in My Antonia, the young immigrant pioneer who is portrayed on the reverse of the 1981 half-ounce American Arts gold medallion. The theme of the human struggle against the Nebraska Prairie was often equated by Willa Cather to that of the artist striving to dedicate one's life to art. Both subjects were personal if not autobiographical and often appear in this author's writings.

Willa Cather, born near Winchester, Virginia, in 1873, moved at a young age to the open, virgin land near Red Cloud, Nebraska, where "the red of the grass made all the great prairie the color of winestains . . . And there was so much motion in it; the whole country seemed, somehow, to be running." Like their immigrant neighbors who lived in sod homes, she "had the feeling that the world was left behind, that (they) had got over the edge of it and were outside man's jurisdiction."

The remoteness of this locale held a grasp on Willa Cather throughout her life, yet "the need to know the world before (she) could know the village" drove her to seek education, work and travel. While attending the University of Nebraska, her first published work appeared. "Up to that time I had planned to specialize in science . . . to study medicine," she wrote, "but what youthful vanity can be unaffected by the sight of itself in print!" For the remainder of her college career, she held the post of drama critic for two city newspapers. It was commented that "her biting frankness" made her famous among actors, and many wondered what would appear "from the pen of that young girl of whom all of them had heard."

Just out of college in 1895, she secured the position of editor for the Pittsburgh magazine, Home Monthly. In this city she continued her journalistic career for ten years. As an aspiring writer, she wanted to break away from the daily drudgery of earning a living in journalism. She spent a short time teaching in a high school and in 1903 published April Twilights, a book of poems. The Troll Garden which soon followed brought her the editorship of McClure's Magazine in New York City and an invitation to attend Mark Twain's seventieth birthday celebration. By the end of World War I she had published O Pioneers!, a work which established her most successful literary reference. One of Ours received the Pulitzer Prize for 1922; yet it was her 1918 work, My Antonia, which was judged by H. L. Mencken and later critics as "the finest thing of its sort ever done in America."

Death Comes for the Archbishop and Shadows on the Rock, both written in the late 1920's, paint a different locale but again reveal Willa Cather's fascination with early settlers.

The last decades of her life, before her death in 1947, brought many literary honors to Willa Cather. During this time she often voiced a critical note about the effect of technical advancement upon individual energy. The pioneer spirit remained for her the most noble exhibit of human creativity. Her works remain today as documents of the pioneer achievements of those who immigrated to this country and built a nation.

AMENDMENT NEEDED TO PERMIT PUBLICATION OF COLOR PHOTOS OF CURRENCY

(Mr. McCLORY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCLORY. Mr. Speaker, I am today introducing a bill that will remove from current law two unnecessary burdens upon legitimate publishers. These burdens, no longer justified, are contained in technical restrictions of 18 U.S.C. 504 against those printing facsimile of monetary instruments.

The first restriction which my bill would remove from 18 U.S.C. 504 is its prohibition against use of color in reproducing facsimile of monetary instruments. The second restriction the bill would delete is the prohibition against publishing the facsimile of monetary instruments for advertising purposes; 18 U.S.C. 504 was enacted at a time when quality publishing was the domain of comparatively few highly skilled professionals. Because of the danger of counterfeiting, it was necessary to restrict the kinds of plates that these skilled printers could manufacture.

But now to continue to prohibit color reproduction of monetary instruments by legitimate publishers fails to recognize that times have changed. Quality publishing is by and large in

color and no longer an elite technology. With its skills in such wide circulation, a restriction against color reproduction is a burden only on the legitimate, law-abiding printer.

The prohibition against using a facsimile of currency for advertising purposes would no longer seem to have meaning today upon the prevention of counterfeiting. In a September 28, 1980, article, the Chicago Sun-Times quotes one Secret Service spokesman as indicating that increasing technical violations of the ban on advertising use make enforcement more difficult. Just as magazine and newspaper publishers often wish to dramatize a point by using a facsimile of currency, advertisers often will do likewise to promote some aspect of their product, more than likely ignorant that this could be a technical violation of 18 U.S.C. 504. I say technical violation because prosecution appears to be arbitrary and not at all certain. As an attorney for the Secret Service is quoted by the Sun-Times:

Absent certain circumstances, we do not go out looking for these things. This is not an area we generally seek business in.

It is noteworthy that current 18 U.S.C. 504 already permits illustrations of stamps and paper money to be used in numismatic and philatelic advertising. Moreover, my bill continues to prohibit the reproduction of currency at its actual size.

Mr. Speaker, I urge this bill be considered favorably.

□ 1845

TAX BILL PROGRESS

The SPEAKER pro tempore (Mr. RAHALL). Under a previous order of the House, the gentleman from Georgia (Mr. GINGRICH) is recognized for 60 minutes.

Mr. GINGRICH. Mr. Speaker, it is a real pleasure to be speaking this evening about an hour and 10 minutes before the President of the United States will address the country on the issue of tax cuts and turning the American economy around.

The President, I am certain, will explain to us that he is concerned with economy recovery, with creating jobs, with fighting inflation, and with developing what once upon a time was called prosperity, and that he has a tax bill, the Conable-Hance bill, which President Reagan supports, which is essentially an economic bill designed to develop more jobs, to allow people to have more real take-home pay, and to fit into a general economy recovery plan.

I am very pleased this evening to be able to put into the RECORD the statement of the Honorable Normal B.. Ture, the Under Secretary of Treasury for Tax and Economic Affairs, which was made this morning before the Republican House Task Force on Economic Policy.

Dr. Ture is an expert on taxes and economics. He is one of the founders of the supply-side school of economics, and I think if I may quote from his statements, which I will insert at the end of my special order, that he as much as anybody has drawn the lines between the Rostenkowski-O'Neill tax bill and President Reagan's efforts on a bipartisan basis with Mr. CONABLE and Mr. HANCE to develop a genuine economic recovery tax bill.

Dr. Ture points out, and I quote:

The Conable-Hance bill has been designed to provide families at all income levels with meaningful and permanent tax relief. It is the only bill now being offered which does this.

Dr. Ture continues:

The President's tax program is the only plan which will provide real long-term tax relief for the American people. Because it includes indexing, the Conable-Hance tax cut will not be repealed by bracket creep and inflation. The President and Members of Congress of both parties who support the bipartisan bill are making this pledge. We will get your tax rates down, we will keep your tax rates down, there will be no hidden tax increases, there will be no ifs ands or buts about it.

In other words, the Reagan tax program is clear. It is long term. It is permanent and is a genuine tax cut.

Dr. Ture goes on then to explain the alternative and I quote:

By contrast the Ways and Means bill is a temporary 2-year, 15-percent tax cut which turns into a tax increase in 1984. It is not even large enough to offset built-in tax increases of about 22 percent due to bracket creep and higher payroll tax between now and 1984. The Ways and Means bill is not a real tax cut at all, unless you only plan to live for two more years.

I mentioned earlier today in a 1-minute speech the distinction that President Reagan has drawn as the reason we were wearing the button that says, "I plan to live." President Reagan's tax cut is a real tax cut for your lifetime, it genuinely changes the Tax Code permanently.

On the other hand, the Rostenkowski-O'Neill tax bill is a short-term gimmick designed to buy time and then after time taxes go back up. The difference is immense. In the long run, in fact, as Dr. Ture points out, the Rostenowski-O'Neill bill actually increases the steepness of bracket creep. It actually means that if you get pay raises in the future, the jump will be higher and steeper. The way he puts it, and I quote:

The Ways and Means bill has a shock in store for middle bracket taxpayers, some of the biggest stepups in tax rates from one tax bracket to the next ever to appear in the tax code. Middle-income taxpayers filing joint returns would find themselves leaping through brackets in which they pay 25 percent, 34 percent, 41 percent, and 48 percent of additional income to the Government. Stepups of 9, 7, and 7 percentage points in taxable incomes of $30,300 and $46,200.

In other words, after 2 brief years of delay, under the Rostenkowski-O'Neill bill, suddenly you start leapfrogging into higher and higher brackets.

Dr. Ture compares the Rostenkowski-O'Neill tax increases with the World War II surcharges. Frankly, since I was born in 1943 this is history to me, but I think it is relevant history for everyone who lived through it and it is relevant history for everyone who wants to learn from it.

In World War II, faced with this Nation's greatest crisis, we had a tax surcharge which carried taxpayers from 22 to 47 percent, with six steps in between. They did it over a span that was almost three times as wide as the span in the Rostenkowski-O'Neill bill.

In other words, without a war, in peacetime, the Rostenkowski-O'Neill bill is going to leapfrog us higher and higher at a very rapid rate. It is in effect a bill which encourages you to get a pay cut rather than a pay raise.

Dr. Ture concludes, and I quote:

This is a clear demonstration of the cynical intent of the Ways and Means bill, to give a tax cut next year while rigging the tax code to take it all back at record rates just as quickly as possible. Nothing could be plainer. The committee's bill provides the form, not the substance, of incentive tax reduction.

I am inserting Dr. Ture's testimony in the CONGRESSIONAL RECORD because I believe that every American who is concerned about the decay of our economy, about high interest rates, about high unemployment, every American who wants to see us go back to an economy to become again a country in which you can work and save and in which you can get a pay raise and keep the raise, every American should read what Dr. Ture says.

Tonight President Reagan will address us. On Wednesday this House will decide. We do have an opportunity to genuinely change history in the next few days. A tax gimmick or a genuine tax cut, more decay, or return to real jobs and real opportunity.

The choice is ours.

The statement referred to follows:

STATEMENT OF THE HONORABLE NORMAN B. TURE, UNDER SECRETARY OF THE TREASURY FOR TAX AND ECONOMIC AFFAIRS

Mr. Chairman and Members of the Task Force, on July 25, Representatives Conable and Hance introduced a bipartisan tax reduction proposal which has the enthusiastic support of the Reagan Administration. The Conable-Hance bill will produce a real across-the-board multiyear reduction in marginal tax rates for individuals and meaningful investment incentives to restore the competitive edge of American industry here at home and around the world. This bill will do more to restore incentives to work, save, and invest than any other tax reduction bill in our history. Similarly, it will do more to promote job creation, productivity growth, and rising real wages for years to come.

The Conable-Hance bill contains important provisions targeted at stimulating investment in plant and equipment. Accelerated depreciation and an enhanced investment tax credit are designed to promote modernization and expansion of American productive capacity, all the way from our basic industries to the small businesses which create the majority of the Nation's jobs. These investment incentives are immediate, powerful, and certain, far more so than those in the Ways and Means Committee alternative. The Ways and Means bill relies heavily on promises of corporate tax reduction many years down the road. Industry will not respond to such promises of future relief dragged out of a reluctant committee. Industry needs tax relief it can count on, and it needs it now.

The Conable-Hance bill has been designed to provide families at all income levels with meaningful and permanent tax relief. It is the only bill now being offered which does this.

The Conable-Hance bill provides a full three years of personal tax rate reductions totaling 25 percent across the board. These reductions are permanent reductions, guaranteed to be permanent by the adoption of tax indexing, the annual adjustment of the tax brackets and personal exemptions for inflation. This will end the hidden tax increases that result when cost of living increases push taxpayers into higher brackets—the hidden tax increases which have robbed Americans of every one of the five so-called tax cuts of the last ten years. The President's tax program is the only plan which will provide real long-term tax relief for the American people.

Because it includes indexing, the Conable-Hance tax cut will not be repealed by bracket creep and inflation. The President and the Members of Congress of both parties, who support the bipartisan bill are making this pledge:

We will get your tax rates down.

We will keep your tax rates down.

There will be no hidden tax increases.

There will be no "ifs," "ands," or "buts" about it.

That is the sort of tax program which provides the steadiness of policy and certainty of tax relief which is absolutely necessary for a strong economy so that people can be secure in their jobs, in their household budgets, and in their savings for their retirement, home, or education.

By contrast, the Ways and Means bill is a temporary, two-year 15 percent tax cut, which turns into a tax increase in 1984. It is not even large enough to offset built-in tax increases of about 22 percent due to bracket creep and higher payroll taxes between now and 1984. The Ways and Means bill is not a real tax cut at all (unless you only plan to live for two more years).

A Treasury Department analysis shows that families at virtually every income level will receive a deeper tax cut, face lower tax rates, and enjoy a greater increase in income and living standards under the Conable-Hance bill than under the Ways and Means alternative. That may sound surprising, but it is true.

During the last few days, there have been a lot of claims about tax cuts for some individuals being larger in the early years of the Ways and Means Committee bill than under the bipartisan proposal. However, these numbers came from comparing the whole two-year, 15 percent Ways and Means bill with only part of the bipartisan proposal. The Conable-Hance bill, with its third year of guaranteed tax rate reduction, is a deeper cut in 1984 and each year thereafter, throughout the $15,000 to $50,000 middle-income range which the House leadership claims to be helping. (See Table 1.)

There has been a lot of talk about how the Ways and Means Committee is targeting the tax cut to those earning between $15,000 and $50,000. That talk is fiction, not fact. The truth of the matter is that what the Ways and Means Committee has really targeted at those earning between $15,000 and $50,000 is another decade of rising taxes.

To a family now earning $15,000, the Ways and Means bill gives $22 more in 1982 than the Conable-Hance bill and $25 more in 1983. But in 1984 the Ways and Means bill gives $73 less than the Conable-Hance bill. In 1985 it gives $129 less. In 1986 it gives $183 less. And the difference keeps growing because the Ways and Means bill does not include indexing for inflation.

This same pattern is true all across the board.

With all this phony talk about targeting, the Ways and Means Committee is hoping to target people's attention on the first two years of the bill so they will forget about all the rest. It is hoping they will look at the $47 in the first two years and forget about the $385 in the next three.

Not only is the Ways and Means tax cut inadequate, its reductions are temporary. By 1983, the Ways and Means tax cut is finished. Taxes start to rise again due to inflation and the resulting bracket creep. Even if the tentative third year of the Ways and Means bill is triggered, which is virtually impossible given the expensive budget-busting baggage which the Committee attached to it, taxes would turn up in 1984.

In fact, the real test of a tax cut is not what it does compared to current law, which has rising taxes built into it. The true test is what it does compared to the taxes the individual is paying now. Tables 2 and 3 show, in today's dollars, the real income tax payments and the changes in real after-tax income from current levels for middle-income taxpayers under the two bills. It shows clearly that the Ways and Means tax cut peaks in 1983, is substantially repealed by bracket creep by 1984, and is completely wiped out by 1985 for people now earning $15,000, and by 1986 for everyone earning between $20,000 and $30,000. These taxpayers will be worse off in just a few years than they are today.

Furthermore, the way that the Ways and Means bill has twisted the tax rates and rewritten the tax schedules, it makes sure that taxes will rise faster in the 1980's for millions of Americans than ever before. This perverse result in the Ways and Means bill comes from its increasing the zero bracket amount—the old standard deduction—and paying for this nonincentive tax cut with smaller reductions in the marginal tax rates in most of the brackets.

Tables 4 and 5 show this clearly. The Ways and Means brackets are shifted upward by $400 for joint returns and $200 for single returns compared to current law brackets, reflecting the changes in the zero bracket amounts. These shifts have practically no beneficial effect on incentives. They represent the equivalent of one or two months' cost of living adjustment for the typical worker, delaying for only a few weeks the worker's move into a higher tax bracket with higher disincentives.

Except for the shift in the zero bracket amount, the actual tax rate structure is as high or higher in each bracket under the Ways and Means bill than under the bipartisan bill, a fact of major adverse consequences for the economy. This higher rate structure reduces incentives to work, save, and invest.

This is another attempt to redistribute income, just like all the run-of-the-mill tax bills of the last 10 years, rather than increase incentives for real growth. This effort is doomed to failure. Without indexing, the value of the one-time increase in the zero bracket amount will be undone by inflation, and the higher marginal tax rates in the Ways and Means bill will capture a large slice of any pay increase.

Those who receive cost-of-living increases will face a truly staggering tax burden within a few years. In every tax bracket, every cost-of-living increase and every real pay increase will be taxed more heavily by the Ways and Means bill; in some brackets, the tax bite will be as much as 10 points higher under the Ways and Means bill. The only way for a taxpayer whose income is changing to do better under the Ways and Means bill is for the change to be a pay cut!

The Ways and Means bill has a shock in store for middle bracket taxpayers—some of the biggest step-ups in tax rates from one tax bracket to the next ever to appear in the tax code. Middle-income taxpayers filing joint returns would find themselves leaping through brackets in which they pay 25 percent, 34 percent, 41 percent, and 48 percent of additional income to the government, step-ups of 9, 7, and 7 percentage points between taxable incomes of $30,300 and $46,200. The corresponding rates under the Conable-Hance bill are 24 percent, 28 percent, and 38 percent, respectively.

Under the Ways and Means bill, at $30,300 taxpayers filing jointly are in the 25 percent tax bracket, keeping 75 cents of each additional dollar earned. At $30,301, they leap to the 34 percent bracket, a 9 point jump. They would keep only 66 cents of each additional dollar earned. But even that would not last long. The 34 percent bracket is only $5,300 wide. It would take only two years of 8 percent cost-of-living or real wage increases to push those taxpayers into the 41 percent bracket, a 7 point jump starting on the $35,601st taxable dollar earned. The taxpayers would keep only 59 cents on an added dollar of income. Even that would not last. Only 3½ years later the taxpayers would cross into the 48 percent bracket, another 7 point jump, and keep only 52 cents on added dollar of income.

Never before have tax rates risen so steeply. The uphill climb through the tax rates turns into a sheer rock cliff in the path of families who are not far above current median income levels. By the end of the decade, the majority of taxpayers would be facing that wall. Furthermore, to all these disincentives must be added the burden of State and local taxes.

Even the World War II surcharges, which carried taxpayers from the 22 percent bracket ($2,000–$4,000) to the 47 percent bracket ($14,000–$16,000) with only a $10,000 increase in income, had the courtesy to do it in six steps. Furthermore, $10,000 in the mid-1940's was worth $40,000 in today's dollars. The Ways and Means bill produces nearly the same rate increase in three steps over a $16,000 income range.

This is a clear demonstration of the cynical intent of the Ways and Means bill—to give a tax cut next year while rigging the tax code to take it all back in at record rates just as quickly as possible. Nothing could be

plainer. The Committee's bill provides the form—not the substance—of incentive tax reduction.

As if final proof were needed, the Ways and Means bill merges all current tax brackets above $60,400 in taxable income, and taxes them at the current maximum earned income tax rate of 50 percent. The Conable-Hance bill preserves four of these five current brackets, raising rates far more gradually to 42 percent at $60,400, to 45 percent at $85,600, to 49 percent at $109,400, and to 50 percent at $162,400.

Without any doubt, the Ways and Means bill would produce far less incentive for personal saving, and far less switching out of tax sheltered activity into more efficient taxable investment, than the Conable-Hance proposal. Billions of dollars of economic growth and revenue gains would be thrown away for a cosmetic twisting of the tax code for political ends.

The Ways and Means game plan is very simple. They want to toss a bone to the American taxpayer today and take it back with a pound of flesh attached tomorrow. They are trying to buy off the tax revolt for a year or two, hoping it will go away so they can start inflating government spending again and get back to government-as-usual. This must not be allowed to happen. The marginal tax rate reductions and indexing in the Conable-Hance bill can prevent it.

TABLE 1.—CHANGES IN TAX LIABILITY FROM CURRENT LAW UNDER CONABLE-HANCE TAX BILL, INDEXED BEGINNING JAN. 1, 1985, AND UNDER THE WAYS AND MEANS COMMITTEE PROPOSAL, SELECTED LEVELS OF INCOME—1-EARNER FAMILY OF 4

	Year

A TRIBUTE TO SRI CHINMOY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. ADDABBO) is recognized for 60 minutes.

GENERAL LEAVE

Mr. ADDABBO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order tonight.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. ADDABBO. Mr. Speaker, I consider it indeed an honor and a distinct privilege today to rise and offer birthday congratulations to a man many in this country and this world have come to respect and admire, Sri Chinmoy, who on August 27 will be celebrating his 50th birthday in New York City. He is a truly remarkable and creative human being, an utterly selfless individual who has devoted his life toward the betterment of world peace and understanding.

Seventeen years ago Sri Chinmoy arrived in this country from India where he was born and raised. When he came to this country he founded the Sri Chinmoy Centre whose headquarters are located in Jamaica, Queens, which encompasses part of my district. The centre, which has many branches all over the country, as well as the world, is dedicated to the twin goals of public service and personal spiritual growth through the use of meditation. The Sri Chinmoy Centre has sponsored many cultural and athletic activities worldwide, such as poetry contests, lectures on the use of meditation in our everyday lives, concerts, arts classes, and various athletic events. The centre is supported by contributions and from the over 400 books Mr. Chinmoy has written on a variety of subjects.

Sri Chinmoy is a fervent advocate of what he sees as the right for all people to be able to live in peace and harmony. He has been a strong supporter and advocate of the work and goals of the United Nations since arriving in the United States. Since 1970 he has conducted twice-weekly meditations for diplomats and staff in the U.N., his meditation and inspirational programs widely hailed as an important sustaining influence and motivational tool for all participants.

He has long found that athletics combined with meditation can be an invaluable source of motivation and enrichment for thousands of people, young and old alike. Last year, for example, 200 men and women from 50 States participated in a 4,500-mile marathon bicycle race to inaugurate the "Sri Chinmoy Cross-Country Bicycle Trail," a major national cycling route. In 1976 his interest in marathon running was recognized by a commendation from the President's Council on Physical Fitness for his role in the 9,000-mile "Liberty Torch" relay race held in honor of the U.S. Bicentennial.

A prolific writer and poet, he has written over 400 books of essays, plays, and short stories. His artistic accomplishments have long been recognized and he is the recipient of an award from the New York School of Visual Arts and has had his works exhibited in North America, Western Europe, and Australia.

You would think that this busy schedule and numerous interests would be enough for one man, but not for Sri Chinmoy, an accomplished musician and composer of over 4,000 songs for choir and instrumental. Con-

sidered one of the world's foremost authorities on Eastern philosophy, which is a systematic method of obtaining consciousness through meditation and prayer, he has lectured on this topic at many of the major universities in the United States, including Yale, Harvard, Stanford, and Columbia Universities.

On this, the celebration of his upcoming birthday I wish him the very best for many more happy and healthy years in contributing to world peace and brotherhood.

HOUSING RELATED TO OTHER ECONOMIC PERFORMANCE AND POLICIES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 30 minutes.

Mr. GONZALEZ. Mr. Speaker, ever since the beginning of this Congress, and the formation of committees, and the presentation of the administration's so-called economy recovery plan, and its intimations and impact on such a fundamental economic activity as the housing industry, and the housing question confronting Americans, and the problems associated with housing that have literally wrecked the industry, and, therefore, the economy, and the fact that the Congress in attempting to face the onslaught, which has been overwhelming, as all my colleagues will testify—succumbed to and actually in the name of fiscal and budgetary reduction, in effect, cripple and in some cases do away with and very seriously thereby affecting such a thing as the housing situation confronting Americans and did not and have not up to this time sort of stepped back and tried to assess the fact that this policy has changed without any kind of serious deliberation such as hearings and consideration, basic and fundamental policies and programs in the beginning, one of those that was included in the elimination process which would have resulted had it not been that this was one of the things we were able to successfully react on the housing subcommittee level, once it was organized in February and prevented the demise of this great and noble FHA.

The FHA program such as it is even now, is the only program that provides for any kind of accessibility to long-term mortgages. Even though I did realize the impact, very few of the Members, even of the subcommittee, were able to address themselves to the separate question, and that is, the elimination of programs and policies that have been established in some cases at FHA, more than 30 years.

Then, the process which for the first time, I do not have to remind my colleagues of this, has confronted the substantive, the authorizing committees, the reconciliation process and its meaningful way, which proceed and emanated from the direct mandate of the House, approved by a narrow margin, as reflected in the Gramm-Latta amendment.

□ 1900

So that therefore from the beginning I had a series of meetings with members of the subcommittee on the majority side, the Housing Subcommittee, and finally there was an understanding that we would have to approach this. Therefore I initiated, as chairman of the Housing Subcommittee—and let me point out the significance of this subcommittee. It is the largest subcommittee in the Congress on either side. It consists of 33 members. That is only 10 less than the whole entire membership of the Banking Committee, which is the full standing committee of which this is a subcommittee. It has some historic and unprecedented traditions that are not identified with any other subcommittee. For example, the majority budgets for both the minority and the majority. Always, there has been as a result a very close relationship between minority and majority.

But in this case it was obvious to me, as it continues to be, that unless the Congress is able to look objectively and then react that it will turn its back, as it has and as the administration obviously is, on the crisis situation facing the housing industry and therefore the economy, because there is no question that the housing industry and the economy of this country are inextricably linked. We do not have prosperity if the housing industry is sunk in a depression, which it is. In fact, it is facing extinction, especially those components of it that are truly labeled small business. The highest rate of unemployment is in the construction and building trades, which is directly associated with the construction of homes for Americans. Two generations at least of Americans are deprived or cheated of the American dream, the ownership of a home that one can call his own.

Anyway, we initiated hearings earlier this month independent of all of the hubbub associated with the budgetary crisis, and now the tax, because the tax situation is also related. There is no question about it. We simply cannot have both. We cannot have Reagan's ERP—economic recovery plan—and have prosperity in the housing industry unless that process is reversed to take care of establishing the truth, the veracity, that it is indistinguishable from the general wholesale health of the economy. That is not being done, and I want to alert the colleagues that at least on the Housing Subcommittee level we are indeed, and we began hearings earlier this month with the leadoff witness being a most unusual individual. In fact, I would say without any hesitation of successful rebuttal, the most prepared and experienced individual in this area of joint economics and housing in the world, not just in the United States.

It was Dr. Leon Keyserling, who goes back in direct experience to the very first Housing Act of 1933, which at that time led to the so-called HOLC, the Home Owners Loan Corporation, and the forerunner of FHA. He was the craftsman who shaped the first Housing Act of 1977 as a special aide to the then-Senator Wagner from New York. Since then, he later became involved in the drafting of every basic housing legislation, including the most substantive amendments thereto, up until 1965, the Omnibus Housing Act of 1965. But most of all, he also has had practical service as the head or chairman of the economic advisers during the Truman administration.

Now, what is significant about it? Very significant. He was intimately involved with the economic advisers during that period and immediately before. Why is it significant? Because he confronted the identical situation in the so-called postwar period. The truth is that we Americans have failed to realize realistically that there really has not been any termination of World War II. We do not stop to ponder that there has been no formal treaty terminating the war. The war continues. In fact, the current situation confronting us stems, I think from the basic fact that we fail to recognize that World War II really never has ended. If it has, we would not have a quarter of a million troops in Europe alone, not counting what we have in Asia, and the fact that half of our defense budget, $81 billion-plus, is dedicated and earmarked for the defense of Europe.

All of that is tied in with the economic situation that comes to high interest rates, that comes to no construction of homes for Americans, and of course more important, the dwindling of our available housing stock, whether it is new construction, standing existing housing stock, rental, or ownership. We have got a crisis, and every time I would ask this question of the administration spokesmen all the way from the Director of OMB, David Stockman, to the newly appointed Secretary of HUD, there was no denial. Yes, we do have a housing crisis. There is no question the American people are facing the most serious housing crisis since—since the built-up and pent-up demands of the so-called postwar World War II period.

So, the question then was, what do we do? Do we say it is not there? Can we act as if the problem does not exist? The only answer we were able to get from the administration and its spokesmen is, "Yes, but this comes

first. Everything has to be sacrificed on the altar of ERP, and until we resolve that and get that out of the way we will worry, but in the meanwhile what we are going to do is appoint a national commission to study the matter."

This brings back memories of 1931, 1932, when the original Hoover Commission that ran—incidentally, at least he was better than Coolidge. Coolidge did not even believe there ought to be commissions. There was no responsibility. Hoover did. At least there was that fundamental difference, but what we have now is a throwback not to Hoover, but to Coolidge.

This is what we are confronting, and I think that it is an abysmal surrender of our responsibility as representatives of the people if we do not address ourselves to a problem that is staring us square faced, and we cannot deny no matter what we say about what should have priority.

So, therefore, that first hearing had this eminent American, Leon Keyserling, who is as brilliant and alert and youthful as if he were still a chairman of the economic advisers in the 1950's for the Truman administration. He presented what I consider to be the most valuable testimony we have had yet directly tying in the housing situation with the economic, and vice versa. Therefore, I am at this point offering that testimony for the RECORD:

TESTIMONY OF LEON H. KEYSERLING,[1] "HOUSING RELATED TO OTHER ECONOMIC PERFORMANCE AND POLICIES (INCLUDING F.R.B.)," SUBCOMMITTEE ON HOUSING AND COMMUNITY DEVELOPMENT, HOUSE COMMITTEE ON FINANCE AND URBAN AFFAIRS, JULY 15, 1981

Mr. Chairman and Members of the Subcommittee: I appreciate this opportunity to discuss the current and prospective housing situation. But my treatment cannot be separated from attention to the interrelationship between housing performance and national economic performance, including the national policies—Government and Federal Reserve—affecting both. Similarly, the long-range aspects interpenetrate with the short-range across the board. I have become increasingly distressed by the tendency of economic thought and action, both public and private, to view each problem in isolation in the short-range, instead of developing the broader and longer term perspectives which are essential to sound and correct national policies.

MY EXPERIENCE IN HOUSING AND THE OVERALL ECONOMY

It appears reasonable for me to state at the outset my relevant experience in the housing field. My involvement during almost half a century in national economic performance and policies at large is rather generally known. As the top staff member with Senator Robert F. Wagner and the Senate Banking and Currency Committee during 1933-1937, I did a great deal of work on the original development of the National Housing Act (FHA), the Home Owners Loan Corporation Act, and the U.S. Housing Act dealing with public housing and slum clearance. From 1944 to 1949, I was the main draftsman and did most of the economic studies in connection with the Housing Act of 1949, the most comprehensive of all housing legislation which added greatly to the armory of weapons available to encourage private housing for middle- and lower-middle income groups, and also improved the public housing program. This seminal Act has been the foundation for all subsequent housing legislation.

My connections with the 1949 Act indicate my commitment to the proposition that housing is so vital to the well-being of the people and the strength of the economy that sound housing programs should evoke cooperative bipartisan support. To illustrate: While working on this Act for five years, I served as the sole expert advisor, not only to the Democratic Senators Robert F. Wagner and Allen J. Ellender, but also to the first Senator Robert A. Taft, "Mr Republican" himself. And one of the most valued items in my files is a letter which Senator Taft wrote when I was being considered for appointment by the President to head one of the housing agencies, an objective from which I turned away when I was appointed to the original Council of Economic Advisers by President Truman. Senator Taft told me at the time that he made it a policy not to recommend a head for a Government agency during a Democratic Administration except in the case of Republican members of bipartisan commissions, but that he was making an exception in my case. In this letter, dated June 25, 1946, Senator Taft said:

"I don't ordinarily take any part in recommendations for appointments in the Administration, but I have seen a good deal of Mr. Keyserling, and my opinion may have some weight with you. He has been working for many years with two committees on which I have been serving. He is a very able man and very accurate in his analysis of the problems which he has to meet. While I do not always agree with his point of view, he has been very fair in giving every consideration to my proposals. He has a more complete knowledge of the housing problem, and particularly of the legislative housing problems, than anyone I know. I believe he would be a firm and courteous administrator. I think the other Republican Senators who know him generally share my views."

Senator Taft was a confirmed conservative, but he was an enlightened and farsighted one. He was a leader in legislative proposals to affirm the obligation of the Federal Government to establish basic standards and programs for decency of service to all the people in housing, education, and health. We would all be much better off today, if the goals which he set had been carried forward in the field of housing on the quantitative scales which he espoused.

During 1937-46, I was Deputy Administrator and General Counsel of the U.S. Housing Authority, and for a time Acting Administrator of it and then of its successor the Federal Public Housing Authority as these two agencies moved into the public aspects of the defense housing and the war housing programs. While I was in charge of the defense and war public housing programs, Senator Harry S Truman as Chairman of the Committee investigating all of the domestic and defense and war programs found that the agency I headed was one of the best administered. In February 1942, at the request of President Roosevelt, I drafted Executive Order 9070 which combined 16 housing agencies into one wartime National Housing Agency, which under the 1949 legislation became the Housing and Home Finance Agency and still later became the Department of Housing and Urban Development.

THE CHRONICALLY POOR HOUSING PERFORMANCE

Unfortunately, housing performance in our country has fallen lamentably and increasingly short of the needs of both the economy and the people. As my chart 1 shows, housing starts in 1950 were 1,952,000, or above 2 million including farm housing for which data is not available for that year. In 1972, housing starts peaked at 2,357,000. But that performance has never been equalled since. During 1969-second quarter 1981, starts averaged annually only 1,687,000. In 1980, they were only 1,292,000. In second quarter 1981, the annual rate was only 1,250,000, and by now has fallen to about 1,100,000, or far less than half of the 1972 peak. And still worse is on the way. Yet way back in 1950, when the starts were about 2 million, both the Government and competent private analysts found that we needed an annual average of about 2 million starts a year. Considering vast increases in population, profound changes in geographic locations, the amount of substandard housing, and the huge cumulative housing deficit, it can be stated correctly that during 1981-1984 we need an annual average of 2,500,000 housing starts.

My chart 2 indicates that, during the almost three decades to date, there has been not only a persistent chronic rise in unemployment in housing and other aspects of contract construction, but also a unique high rate of unemployment in this sector of business activity. By March 1981, the unemployment rate in contract construction was 14.7 percent, or more than twice the 7.3-percent rate for the total economy. I regret that I do not have separate figures for housing alone, but the situation is much worse in housing than in contract construction as a whole.

My chart 3 indicates that during 1953-78—I regret that I have not had the time nor resources to carry the picture further forward—the increase in civilian employment in contract construction averaged annually only 1.3 percent, or much lower than in any of the other 10 categories shown on my chart except agriculture and manufacturing. For all nonagriculture wage and salary workers, the average annual increase in employment was 2.6 percent, or twice as great as in contract construction. The decline in agriculture is partly but not wholly explained by unique increases in productivity in agriculture, which have facilitated the salutary march toward increasing industrialization. The very low figure in manufacturing has been highly undesirable. Nonetheless, a large part of it is explained by strong technological advances which I shall discuss further. But there has been no such compensating factor in connection with the sadly low employment growth and increasing unemployment in contract construction, especially housing.

HOW THE HOUSING PERFORMANCE AFFECTS THE OVERALL ECONOMIC PERFORMANCE

I now come to the much neglected fact that the very poor housing performance must be viewed in relationship to the economy at large, both as cause and result. My chart 4 shows that the index of housing starts in first quarter 1981 was very close to 1953, and that this was true in most of the

[1] Chairman, Council of Economic Advisers under President Truman. President, Conference on Economic Progress.

intervening years. Meanwhile, the index of industrial production rose from about 138 to 384, and the index of gross national product in real terms rose from about 130 to 324. My chart 5 demonstrates that, measured as a percentage of GNP, contract construction averaged very much lower during 1970-first quarter 1981 than in 1953-61, and was still lower in first quarter 1981. Measured as a percentage of gross private domestic investment, the second long period averaged much lower than the first. This was also true of first quarter 1981. As I have already stated, the picture for housing alone is far more unfavorable than for contract construction. Yet, without going into the details, very large portions of GNP and gross private domestic investment have been far less essential to the well-being of the economy and the people than housing. It is thus very undesirable that the strenuous efforts now under way to increase private domestic investment in plant and equipment are accompanied by a variety of measures further to restrain housing output, as I shall soon disclose.

My chart 6 undertakes an exercise which I believe to be unique, although it should be of central concern to economic analysis. During 1953-79—again I have not been able to carry the picture further forward—the deficiencies in residential and commercial construction, measured in 1978 dollars, accounted with its multiplier effects for a deficiency of almost $2 trillion in GNP, with consequent Federal revenue losses of $380 billion, State and local tax losses of almost $143 billion, and also 20 million years of reduced employment opportunity throughout the economy.

THE CHRONIC POOR PERFORMANCE OF THE ECONOMY AT LARGE, AND ITS MANIFOLD CONSEQUENCES

To evaluate fully the foregoing examination of the costs which the poor housing performance imposed upon the economy at large, it is equally necessary to consider the poor chronic performance of the economy at large. For what happens in the economy at large, whether one looks at the income and employment-unemployment records, the inflation record, or the adverse effects upon public revenues, manifestly affects housing through its bearing upon what the American people at various income levels can afford to pay for housing, and what they get for what they pay. Correspondingly, the changes in national policies called for to restore the economy at large to full and stable prosperity are mostly the same policies as those required for direct application to housing.

As my chart 7 shows, in a "roller-coaster" performance, the average annual growth rate of the U.S. economy in real terms was only 3.5 percent from 1947 to second quarter 1981, only 2.9 percent from 1969 to second quarter 1981, and only 1.2 percent from 1979 to second quarter 1981. There was a brief upward spurt to an annual rate of 8.4 percent from fourth quarter 1980 to second quarter 1981, but virtually no growth from first quarter 1981 to second quarter 1981. By majority informed agreement, with absolute stagnation in prospect for the second half of 1981, the real growth rate for 1981 as a whole will be only about 2.1 percent, and for 1982 as a whole only slightly higher despite ebullient forecasts in some high quarters. These dreary figures are sharply in contrast with indications during better periods in the past that we need and can achieve an average annual growth rate of about 4.5 percent, or even 5 percent, despite overcomeable difficulties. In other words, under current national and projected national policies, the overall economic performance and the housing performance will continue to display the chronically increasing shortfalls from what we need and can achieve.

Inexorably, the low rate of real economic growth in the long-run has impacted most severely in human terms, and in purely economic terms as well, upon unemployment. My chart 8 shows that full-time employment as conventionally measured rose from about 3 percent in 1953 to 7.3 percent in first quarter 1981 and that, by the latter period, the true level of unemployment was about 9.4 percent, contrasted with about 4.7 percent in 1953, when account is taken of the full-time value of part-time employment and the concealed unemployment in the form of dropouts due to deficient employment opportunity. The chart also indicates the extraordinarily high rate of unemployment among nonwhites and among teenagers, and the much higher rates among women than among men. The fantastic rates of unemployment among nonwhites and teenagers has explosive civil potentials, translated into actuality some years back.

My chart 9 illustrates the cost of chronically low economic growth and chronically high and rising unemployment. From 1953 through first quarter 1981, the GNP forfeiture, very conservatively measured, has come to more than 9.7 trillion first quarter 1981 dollars, with the loss of employment opportunity aggregating 88.3 million years.

MAIN REASON FOR LOW PRODUCTIVITY GROWTH

We hear more and more about the disadvantages of low and declining productivity growth, and this stress is more than justified. But the hue and cry is accompanied by very little discernment of the preponderant reason for low productivity growth. The reason is not that the low real economic growth rate has resulted from low productivity growth, for if that were the case the low real economic growth would not have translated into chronically rising unemployment. To the contrary. The low real economic growth explains in the main the low growth rate in productivity, because the latter is due primarily to underutilization of employed workers when plants are running at about 80 percent of capacity or lower. My chart 10 demonstrates this conclusively for the private economy at large. It has hardly been noticed that, from fourth quarter 1978 to fourth quarter 1980, when GNP in real terms grew only 0.7 percent on an annual average, the productivity growth rate averaged minus 1.0 percent, and that from fourth quarter 1980 to first quarter 1981, when the annual rate of real economic growth spurted to 8.4 percent, the annual productivity growth rate shot upward to 4.3 percent. This was not due to more investment, better tools, or improved productivity, but rather to higher plant capacity use and thus to better utilization of employed workers. With the real economic growth rate falling to about zero in second quarter 1980 and likely to be very low through 1982, it is fairly certain that the productivity growth rate will again decline very sharply. And this is indicated by comparing the fourth quarter 1975-first quarter 1976-record with the record for first quarter 1976-fourth quarter 1978.

ADVERSE IMPACTS UPON LOCALITIES AND UPON SECTORS OF THE ECONOMY

It may be of particular and legitimate interest to Members of the Congress representing particular areas of the country, and should be of great interest to all, that the nationwide forfeitures, including those in home construction, have impacted almost everywhere. Without reading off all the details, my chart 11 indicates, for twelve of our largest cities, the forfeitures from 1953 through 1979 in real output, personal income, and employment opportunity. And my chart 12 makes available the same exercises as to forfeitures in output and employment opportunity in twenty basic sectors of the economy, beginning with agriculture including livestock and ending with business services, including advertising.

INTERNATIONAL IMPACTS

In terms of our international economic position, and our standing among the nations which so importantly affects the influence and leadership to which we properly aspire, the real economic growth rates in the United States compared with those in six other countries as shown on my chart 13 should be of deep concern. The chart deals with the two periods 1950-80 and 1967-80, and these long-range portrayals are far more significant than the short-range flutterings in some of these economies during very recent months. For these two long periods, the average annual real economic growth rates were 3.5 percent and 3 percent, respectively, for the United States; 8.4 percent and 7.1 percent for Japan; 5.4 percent and 3.8 percent for West Germany; 7.9 percent and 6.1 percent for Israel; 7.4 percent and 9.6 percent for Brazil; and 5.4 percent and 3.8 percent for Italy. In Japan and West Germany, the two countries we regard as most relevant to our own problems, the inflation rate has averaged much more favorably than in the United States; and in those countries where the inflation rates have been staggering, the very much higher real economic growth rates than in the United States should make us worry about forgetting that it is the real economic growth rate which adds to the capabilities and wealth of nations, and that seeking to restrain inflation by deliberately suppressing real economic growth has been a colossal flop in the United States, and proved to be undesirable in some of the other countries when tried.

THE TRUE CAUSES OF ROARING INFLATION

This leads directly into the subject of inflation in the overall, and also in housing. My chart 14 demonstrates as conclusively as anything can be demonstrated in economic analysis that, contrary to the classical theory and the so-called "tradeoff" between unemployment and inflation, higher rates of real economic growth and lower rates of unemployment have tended to be combined with reasonable price stability, while low real economic growth rates and higher rate of unemployment due to contrived stagflation and recession have spawned immensely higher rates of inflation and inflation growth. The chart also indicates the comparative impacts of high and low economic growth upon Federal Budget deficits.

My chart 15 is really an eleboration of the previous chart. It again demonstrates the colossal failure of the so-called "tradeoff." For example, from fourth quarter 1978 to fourth quarter 1980, when production and unemployment trends were so unfavorable, all basic price increases were far above the start of double digit. In contrast, from fourth quarter 1980 to second quarter 1981 when the production rate was very good although unemployment increased because the growth rate was not nearly good enough, the inflationary rate of price in-

crease was reduced greatly. But this latest development is being far too greatly exaggerated on the optimistic side. The longer run record indicates clearly that, with the prospects for real economic growth and unemployment being so bleak, the inflationary rate of price increase is likely to rise again. And even if it should not rise, which is most unlikely, we should stop emitting peals of satisfaction when the inflation rate, though lower than in recent years, continues to be intolerably high. As a matter of fact, one year of 5 percent or 6 percent consumer price inflation, piled on top of many years of double digit inflation, does more damage than would be done by a first year of double digit inflation following many years of reasonable price stability.

To be sure, the Administration and the Congress are to be applauded for their vocal condemnation of the "tradeoff" and their vocal espousal of the need for greatly elevated real economic growth rates and reduced unemployment. But action speaks louder than words. The national policies now being followed and those in prospect, as I shall shortly disclose, are just as much committed to trying to fight inflation by striking hammer blows at the real economic performance as those in recent years.

REQUIRED CHANGES IN POLICIES: INTEREST RATES ON HOME MORTGAGES

Mr. Chairman and members of the subcommittee, this concludes in the main my examination of what has been happening and continues to happen in the economy at large and in housing, and the inseparable connections between the two, as to both cause and effect. But the 164 dollar question is what should be done about it? What are the policy implications? In turning to consideration of these, it will immediately become obvious that there is virtually no difference between the policy changes needed for the economy as a whole and the policy changes needed for housing. To attempt such policy changes for one without applying them to the other would in some cases be impossible, and in all cases of very limited value.

Starting with the housing part of the picture, my chart 16 begins to demonstrate the devastating damage done to home production and occupancy by interest rates which are getting closer and closer to the moon. From 1952 to first quarter 1981, the average interest rate on new home mortgages rose from about 4¼ percent to 13.36 percent, for a percentage increase of 211.4 percent. And by now, these interest rates vary on the average between 15 and 17 percent.

What does this interest rate travesty do to home production and those who live in houses? My chart 17 grossly understates the damage, because I have not been able to bring it forward from 1977. Since then, the average price of a new home has risen from about $60,000 to at least $75,000 now; and the chart does not go higher than a 12 percent interest rate, while the current rate is 15 to 17 percent. Nonetheless, and I will not read the detailed figures, the chart ends up by showing that, with an interest rate of only 12 percent, only 7.9 percent of families are able to afford a home costing $60,000 to build. Even at a 4.5 percent interest rate, only 19.4 percent of the families are able to afford the $60,000 home, and only 44 percent are able to afford the $40,000 home. Considering also the much higher building costs and interest rates now, practically all of the families who need new homes most, and far more than half of the families who would like new homes, have become priced out of the market. This is the fundamental reason for the catastrophic decline in home construction, with its adverse impact not only upon living conditions but upon the economy at large as already depicted. My chart 18 is a companion to my chart 17, assuming a 40-year rather than a 30-year amortization.

SIGNIFICANCE OF MY 1972 PUBLISHED HOUSING STUDY

Again, I feel justified in saying that I feel that I know what I am talking about, and not exaggerating. In December 1972, I published under the aegis of the Conference on Economic Progress a very comprehensive study entitled "The Coming Crisis In Housing." I do not ask that this study be printed in the record, but I am making a copy of it available to each Member of this Subcommittee. In this study, I correctly depicted or understated, the enormous decline in housing starts from 2,357,000 in 1972 to 1,160,000 in 1975, as depicted in my chart 1. Correspondingly, I correctly foretold, partly in consequence of this as well as other national economic policies which I discussed, the sharp economic recession of 1973-1975, at a time when it was not acknowledged as being in prospect to most national policymakers. Of course, I assigned my bleak outlook in large measure to what then looked like horrendous increases in interest rates, although nothing like what came later.

THE DEPLORABLY LOW REAL GROWTH RATE IN THE MONEY SUPPLY

Before taking my interest-rate depiction further, I want to challenge the apologetic position of the Federal Reserve that they have shifted from prior concern with interest rates to primary concern with the rate of increase in the money supply. I deem this hogwash. In the first place, the increases in interest rates are largely in consequence of the trends in the money supply; the Fed cannot escape from its responsibility for the ravages of unthinkable interest rates by claiming that this is only a by-product of its primary concern. And in the second place, while the Federal Reserve and many other analysts talk about the extravagant growth in the money supply in recent years or even now, they forget that it is the real growth rate in the money supply rather than the nominal growth rate which determines whether the growth rate is adequate to float even a tolerable rate of real economic growth and even minimal reductions in unemployment. Very seldom does one see a portrayal of the trends in the real growth rate of the money supply. My chart 19 fills in this gap. From 1952 when the unfortunate so-called "Accord" between the Federal Reserve Board and the Treasury got going in earnest until first quarter 1980, the average annual real growth in the money supply was only 0.7 percent. From 1973 to 1974 it averaged negative 6.1 percent; from 1974 to 1975, negative 4.1 percent; from 1975 to 1977, it averaged practically no change. From 1977 to 1979, the annual average was negative 3.1 percent. From 1979 to 1980, negative 8.3 percent, and from fourth quarter 1980 to first quarter 1981, negative 26.4 percent at an annual rate. Moreover, the same chart shows how the tremendously deficient real growth rate in the money supply has contributed generally in the long run to the gravely deficient real economic growth rate. And that the soaring interest rates have contributed to inflation is demonstrated not only by the empirical record, but by even the slightest recourse to rational thinking. To insist that to adjust the real growth rate in the money supply to the real needs of the economy would be inflationary neglects the fact that the prevalent monetary policy has been per se a powerful aspect of inflation and a major cause of other economic-performance defaults which are the fundamental source of inflation.

DIRE CONSEQUENCES OF SOARING INTEREST RATES ACROSS THE BOARD

Returning to the performance of interest rates, I must go beyond the interest rates on housing mortgages because the housing rates are a natural concomitant of rising interest rates generally, and because rising interest rates generally hurt housing in many ways. When real economic growth is as deficient as unconscionable interest rates help to make it, housing, being more vulnerable, is usually hurt more severely in the economy at large. And because everybody uses housing, the rising interest rates across the board detract from the amount of disposable income which families otherwise would be able to spend for housing.

The extent and cost of rising interest rates is almost unbelievable. As my chart 20 shows, from 1952 to first quarter 1981 the increases in computed interest rates ranged from 170.5 percent in the case of State and local debts to 278.5 percent in the case of the Federal public debt. The excess interest costs imposed by these increases were $72.4 billion for State and local debts, $230.5 billion for the Federal public debt, $2,047.7 billion for private debts, and $2,350.6 for total public and private debts. It does not take much imagination to comprehend the effect upon home building and home occupancy of transferring more than $2 trillion in less than three decades from borrowers to lenders.

THE PRIME-INTEREST RATE EXTRAVAGANZA

My chart 21 sets forth in considerably more detail the soaring interest rates from 1953 to first quarter 1971. The last cross-sector of the chart shows that the prime rate rose from 3.0 percent in 1952 to 15.27 percent in 1980. After standing at 21 percent earlier that year, it was back to 19.50 percent in the first quarter 1981, and now appears to be about 21.5 percent. It may well go much higher.

Rising interest rates are an even more serious burden upon the economy and the people than most other types of inflation. This is because the transfers of income occasioned by rising interest rates have almost no positive benefits and do much positive injury. They involve the highly regressive redistribution of income. They are "passed on" by business into a higher price structure. They do not promote investment in housing, because the larger income to lenders is far more than offset by the higher costs imposed upon those who borrow to meet their housing costs. And I might add, in passing, that the rising interest rates have not helped to increase capital expansion in business or improvement in plant and equipment. The more than $2.3 trillion of increases in interest rates from 1952 through first quarter 1981, most going to those of high income who save higher portions of their incomes than those lower down, and to financial institutions which exist to lend money, cannot be reconciled with the prevalent claims that there has been a shortage of investment due to shortage of saving and investment funds. In fact for many years, the plea for higher interest rates were that they would augment investment.

I have still other examples of the hurtful burdens imposed by rising interest rates throughout the economy. As depicted on my chart 22, the ratio of total interest costs to GNP rose from 5.24 percent in 1952 to 22.7 percent in first quarter 1981. As depicted on my chart 23, over a period of less than 3 decades, the ratio of consumer credit to disposable income rose from 13.7 percent to 19.8 percent, and the ratio of consumer debt to disposable income rose from 39.3 percent to 64.8 percent. The rising interest costs helped to increase the consumer debt and the amount of needed consumer credit, and the rising interest costs increased the burden of obtaining the credit and financing the debt. As depicted on my chart 24, from 1952 to 1980 the ratio of farm debt to net farm income rose from 107.3 percent to 831.8 percent, and the ratio of this debt to farm personal income rose from 86.1 percent to 379.2 percent. Consumers and farmers, and also small businesses, have been among the worst victims of soaring interest rates, because they are least able to shift the cost to others.

And the damage has extended elsewhere. As depicted on my chart 25, the interest paid by electric utilities A and B rose from less than 3 percent of their long-term debt in 1952 to 7.31 percent in 1979. Their interest payments as percent of net income rose from about 33 percent to 73.8 percent over the same period of time. I do not have the figures for later years, but the situation has become much worse since then. And who is hurt more by rising fuel costs than the occupants of homes? And as shown on my chart 26, the ratio of long-term debt to total capital, in nine different key industrial sectors, comparing fourth quarter 1952 with fourth quarter 1980, increased about twice in some cases and about three times in others. These increases, which are so burdensome upon economic performance and also exacerbate inflation, are as I have said in part the result of soaring interest rates, while the increases in interest rates make the debts more onerous and repressive. In many of these industries, the situation is made worse because the costs of the higher interest rates are shifted to the users of goods and services, including home occupants.

THE FEDERAL RESERVE BANKS HAVE BATTENED ON SOARING INTEREST RATES

Even while the Federal Reserve Board has been perpetrating this interest rate travesty, the banking system has battened its income in consequence of this policy. My chart 27 depicts, both in the long run and in the short run, the glaring disparities between the growth rates in Federal Reserve Bank earnings and what is happening elsewhere in the economy. From 1978 to 1980, to take the most recent period available, the average annual growth rate in Federal Reserve Bank earnings in current dollars was 24.9 percent, while the figure was 8.8 percent for GNP, 8.7 percent for wages and salaries, and minus 30 percent for net farm income. In the case of GNP and wages and salaries, of course, the gains were very tiny when adjusted for price inflation.

THE MISDIRECTED TRENDS IN FEDERAL BUDGET OUTLAYS

Turning from Federal Reserve policies to national economic policies proper, the Federal Budget is being used in strange ways with deplorable results in general and in housing. The legitimate desire to eliminate waste, to get rid of outmoded programs, and to shift away from the Federal Government those activities which can better be conducted elsewhere, has resulted in an obsessionary trend toward cutting Federal outlays without regard to economic and social consequences. It has failed to recognize the fundamental purposes of the Federal Budget to do what needs to be done but cannot be done or done as well elsewhere, to use the words of Abraham Lincoln. As shown by my chart 28, the fiscal 1982 Budget proposed by President Reagan on March 10, 1981, when measured in fiscal 1982 dollars, is reduced to 21.80 percent of estimated GNP, compared with 23.18 percent as proposed by President Carter on January 15, 1981 and 22.97 percent in fiscal 1981. In 1982 dollar terms, the Reagan proposal is $44 billion below the latest Carter proposal, and Carter's latest is $27 billion below 1981. This is happening despite large increases in the category of national defense, international affairs, science, and space. Looking at all domestic programs, the Reagan proposal comes to 15.32 percent of estimated GNP, compared with 16.78 percent as last proposed by Carter and 16.67 percent in 1981. In 1982 dollar terms, the Reagan domestic proposal is almost $47 billion below the latest Carter proposal and about $28.5 billion below fiscal 1981. Measured in ratio to GNP and in uniform dollar terms, the slashes are large in income security, other than veterans; overwhelming and dangerous in the case of manpower programs, including public service jobs; large in the category of transportation and education; terrific in the category of agriculture, natural resources, environment and energy; and substantial in the category of health. In the category of housing and community development, the Reagan budget is almost $2 billion below the latest Carter budget, and reduces the ratio of GNP from 0.43 percent to 0.42 percent, when very large increases were imperative (for reasons already disclosed). And even the latest Carter budget represented an actual and avowed effort to move toward balancing the Budget—about which more will be said—at the expense of the needs of the economy and those who need help most and cannot obtain it elsewhere.

Even more importantly, the immediate budget trend is but the first bitter taste of what is to come. The aim is to reduce Federal outlays by somewhere in the neighborhood of $140 billion over a 5-year period, despite defense increases. The aim is to reduce housing outlays by about $54 billion during the next 4 years. The latest Carter proposal for subsidized housing was 260,000 units for 1982. The Senate has now come up with 150,000 and the House with 158,000. Carter sought, for 1982, $28.8 billion for housing and community development. The House has now come up with $18.4 billion and the Senate with $18.8 billion.

THE SURE WAY NOT TO BALANCE THE FEDERAL BUDGET

The glorious defense of all this is that it will help to get the Federal Budget in balance within a few years. But as my chart 29 shows, the effort to balance the Federal Budget at the expense of the national economy has been a monstrous failure. The growing deficiencies in GNP have been accompanied by horrendous increases in the size of the deficit. During the last year for which full records are available, the Federal deficit for 1980 was about twice what Carter originally estimated it would be. For fiscal 1982, Reagan now estimates a deficit of $27.5 billion. It is likely to be about twice that amount.

IMPACT OF MONETARY POLICIES UPON THE BUDGET ITSELF, AND UPON HIGH PRIORITY PROGRAMS

My chart 30 depicts the cruel impacts of the monetary policy upon the Federal Budget, whether measured in terms of the deficit or the needs of the economy and the people. For the calendar year 1981, the rising interest costs since 1952 directly lifted the interest charges upon the Federal Budget by $48.4 billion, or almost the whole size of the deficit in that year. This comes to more than 3½ times the size of fiscal 1982 budget outlays for education; almost 1½ times the size of the outlays for public assistance and other income supplements; almost 7 times the size of budget outlays for manpower programs; and more than 3½ times the size of budget outlays for housing and community development. How much better off we would all be, if a large portion of these excessive interest burdens upon the Federal Budget were redirected towards servicing some of our most important national priorities.

THE MISDIRECTED TAX POLICY

One hears today, on almost all sides, that the reductions in the Federal Budget will be more than compensated for by the reductions in taxes to induce more saving and encourage more private investment, and thus improve productivity and thereby fight inflation. Some selective tax reductions, for appropriate quid pro quos, are eminently desirable. But all experience and studies have demonstrated that a dollar of tax reduction helps economic growth and reduces unemployment far less than a dollar of increased Federal outlays with its multiplier effects. And this is entirely apart from the fact that a very large proportion of the proposed tax reductions will neither stimulate investment nor do anything at all to augment, as is necessary, the servicing of the great national priorities which requires more public outlays.

What the economy needs more than all else, for economic balance and economic progress, as I shall show, is progressive improvement in the distribution of income. Distribution has greatly worsened during recent years of poor economic performance, while it was greatly improved during years of good economic performance. In this connection, while the Federal income tax has become far less progressive than it used to be, the total tax burden, taking into account all forms of taxation at all levels, has long been horribly regressive and is becoming more so. As shown on my chart 31, if total taxes are looked at, those with incomes of $2,000 pay a higher percentage of their incomes in taxes than those of $50,000 and over. And those at $2,000 to $4,000 paid a higher percentage than any between $4,000 and $50,000. Unhappily, the last study I have available was for 1968. The situation has worsened immensely since then, because of adverse changes in the national tax policy since 1968.

Looking at my chart 32, it properly measures the effects of personal tax cuts by their impact upon disposable income. So measured, the impacts have been extraordinarily regressive. During 1945-63 as a whole, married couples with two children with incomes ranging from $3,000 to $15,000 experienced (by virtue of tax reduction) increases in their disposable incomes ranging from 5.2 percent to 9.8 percent, while those with incomes ranging from $50,000 to $200,000 received improvements in their disposable incomes ranging from 26.7 percent to 47.2 per-

cent. And as shown by my chart 34, which should have been numbered 33, the allocation of the 1971 tax cuts shows in its permanent effects that the amount allocated to the investment function came to more than 2⅔ times as much as the amount allocated to consumption. The same characteristics, in varying degree, have marked most of the tax cutting since 1964, and the imbalances in the current proposals are egregious indeed.

To state what is now happening in another way, the current tax proposals likely to become law, with only slight variations, would by 1984 reduce personal taxes on a $200,000 income enough to increase cumulative cash savings for a family of four by about $10,775, or about 4.5 percent of income, while the figures for a $10,000 income would be $95 or less than one percent of income. The exemptions applicable to estate taxes would in due course be lifted from $175,000 to $600,000, freeing 99.6 percent of all estates from such taxes. The top rate on investment income would be reduced from 70 percent to 50 percent, and the maximum tax on capital gains would be reduced from 28 percent to 20 percent.

CURRENT POLICIES ARE WRONG IN TERMS OF STIMULATING PRIVATE INVESTMENT

The towering central thesis of the policymakers is that these wayward spending, tax, and monetary policies will improve everything in the long run, especially productivity, by inducing more saving and thus greatly raising the ratio of private investment in plant and equipment to ultimate consumption (the latter includes both private spending and public outlays, called public investment, but really public consumption; the Government hardly builds producer facilities). Admittedly, because of the unusual volatility of private investment in plant and equipment, and the long chronically poor economic performance, it is now true that the rate of growth in such private investment should be considerably more rapid than the rate of growth in ultimate consumption. All of my projections of goals for the economy have taken account of this. However, this does not determine what will best accelerate private investment in the context of the balanced development of the three major components of GNP, and current policies are in my considered judgment and in the light of long experience utterly wrong in their determination of this crucial issue.

If one benefits by the experience of long years beginning at the latest with the famous tax reductions of 1964, it is clear that each period of so-called upturn or boom has been accompanied by a real growth rate in private investment in plant and equipment extraordinarily higher than the real growth rate in ultimate demand. Immediately after 1964, the tax reduction program stimulated the economy considerably. But by 1966, the enduring imbalances in the economy, to which these tax reductions contributed greatly, commenced the chronic problems of low growth, high unemployment, and rising inflation from which we have suffered from then to date. Each time when the excessively high relative growth rate in such investment became more fully apparent, it usually led to a sharp cutback in such investment. This, combined with the more enduring and much larger deficiencies in ultimate demand, helped to bring on the periods of stagnation and recession. Actually, the inordinate and misdirected tax reductions were directed mainly to investors who did not need more funds to stimulate more investment. In general, their retained earnings plus their ability to finance investment through increases in prices, and their ability to borrow even at higher interest rates which they passed on to the purchasers of their products through higher prices, stimulated as much or more investment that was justified by the demand for their products. It was the growing inadequacy of ultimate demand which caused the unfavorable developments which occurred all along the line.

All this is very well illustrated by my chart 33 which should be numbered chart 34. This chart traces the history of the developments in investment and ultimate demand from fourth quarter 1970 to second quarter 1981. Moreover, from fourth quarter 1978 to fourth quarter 1979, recessionary conditions did not prevent investment in plant and equipment from growing faster than ultimate demand by more than six times in real terms. From fourth quarter 1979 to fourth quarter 1980, a "stagnation-recession" period, investment was down 3.2 percent in real terms while ultimate demand was up only 0.5 percent, and the second situation was the main reason for the former. From fourth quarter 1980 to second quarter 1981 at an annual rate, investment in real terms was up 5.6 percent, and ultimate demand up only 2.9 percent. Although the data are not yet available to me, it would seem that the imbalance was even worse in second quarter 1981 alone. The lower half of the same chart demonstrates how these imbalances have been supported by relative trends in real incomes. From fourth quarter 1980 to second quarter 1981, for example, the annual rate of increase in corporate profits was 10.8 percent, while for ultimate demand it was only 1.7 percent. Fortifying this analysis, the models which I have made year after year for the performance of the economy at large and its major components, with my models adjusted from year to year in the light of actual developments, have turned out to be well-vindicated by actual developments.

THE DEFICIT IN PRIVATE CONSUMPTION IS BASIC AND CONTROLLING

In the context of the economy at large, my chart 35 depicts my findings as to the progressive and growing deficiencies in private consumer spending and their dominant share in the growing GNP deficiencies. My demonstration is for the period 1960-79. And although I have not yet been able to carry further forward in point of time, I am sure that the disparities in the same direction have become even worse. And my chart 35 demonstrates that, contrary to many assumptions by influential analysts both public and private, the deficiency in consumption has stemmed predominantly from the deficiency in consumer income both before and after taxes.

This resort to experience, even if not interpreted perfectly, drives home the lesson that the current and proposed admixture of Federal public outlays, national tax policies, and Federal Reserve policies is just as misdirected now as in the past, and close to certain to yield the same unfortunate results.

SIGNIFICANCE OF TECHNOLOGICAL TRENDS IN MANUFACTURING

In considering the unwisdom of the current and projected efforts to stimulate manufacturing and investment therein at the expense of ultimate demand, my charts 37 and 38 are much in point. They show that in manufacturing, despite good technological trends during a considerable part of the time, the ratio of the volume of employment to the physical volume of production fell from an index of 100 in 1953 to 43.6 by 1978, and I project it to fall further by 1983 even under a high economic growth rate. Consequently, we need to place major accent upon increases in other lines of activity, including the services. In some of the most important cases, this can be accomplished only by more accent upon public outlays and investment, and relatively less upon attempts to stimulate more investment and output in manufacturing. It is ironically strange that this problem is completely overlooked in almost all of the current analyses and discussion.

In addition to the need for vigorous efforts to stimulate rather than repress ultimate demand, we should greatly stimulate investment in housing rather than pressing it further downward. This would do the whole economy much more good short-run and long-run, including good to all private investment, than mis-formulated national efforts to bring on a nonsustainable investment boom in industry.

SUMMARY OF CONCLUSIONS

To conclude, Mr. Chairman and Members of the Subcommittee, I have not been partisan in the analysis and critique which I offer, as to current and intended national economic policies. What I now say is very close to the same as what I was stating publicly before Congressional Committees and elsewhere during the Carter Administration and earlier, when the mistakes were fundamentally similar and the results bad. What is happening now, in my considered judgment and conviction, is a weird combination of misguided policies. It is palpably inconsistent to try to stimulate the economy by tax reductions, even while restraining it even more by the trends in Federal spending policies. And even if these two policies were not unsound as they are, they are counteracted by a repressive monetary policy, unsound in its economics and terribly unjust and pernicious in its social effects.

There is no better nor more significant example of what is going wrong than what has happened and is still happening in housing. And what is happening in housing has dire consequences for the whole economy, because housing with its extensive ramifying effects upon other sectors is, by some tests, the most important of all of our industries, and certainly one of the two or three most important.

I again thank this Committee for the opportunity to set forth my views, and I hope and believe that they will have some impact upon the thought and actions of those who bear primary responsibility for what happens to the great American economy and its great people.

PROJECT CONCERN INTERNATIONAL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota (Mr. FRENZEL) is recognized for 30 minutes.

Mr. FRENZEL. Mr. Speaker, over the last decade I have had the privilege to be associated with Project Concern International, a nonprofit nongovernmental health care training and development organization headquartered in San Diego and providing pri-

mary health care services around the world. Since 1961, Project Concern International (PCI) has worked diligently to provide medical and dental relief and preventive health care in a dozen foreign countries and in several States here in the United States.

Project Concern's principal source of revenue is the Walk for Mankind. Last year, in the Twin Cities and 148 other communities across the country, 65,000 walkers sponsored by 630,000 people and assisted by 10,000 walk volunteers raised over $2 million to assist Project Concern's health care prevention and teaching projects in Bolivia, Guatemala, Gambia, Indonesia, Mexico, Kentucky, and the Navajo Nation in New Mexico.

Health care for those who have none has been Project Concern's dream and purpose since Dr. Jim Turpin founded the organization in 1961. In the beginning, Project Concern saw its work as medical relief. Bringing immediate care to those who were suffering. Curing people, one by one, of their illnesses or disease. As Project Concern established its clinics in Hong Kong, Vietnam, Mexico, in the United States in Appalachia, and on the Navajo reservation, it began to recognize a pattern in the health problems of the people it served. The project's staff were seeing patients again and again for the same illnesses. Mothers would bring to the PCI clinics one child, then another, then another—each with the same health problem. Project Concern saw a commonality of illness and disease everywhere it went.

The people Project Concern served were facing chronic health problems which were caused by simple, basic things that were a way of life: impure water, lack of sanitation, improper diets. Project Concern realized it had to treat the cause, not just the symptoms, to have a lasting impact. It was then, in the early seventies, that Project Concern began to develop the method to accomplish this through a preventive health care program to teach people how to prevent the illnesses that struck them over and over again.

To make the concept work, it would take only a few who would teach a few more. Those people Project Concern trained would spread what they had learned among their own and neighboring villages and communities.

And so, Mr. Speaker, began Project Concern's preventive health care approach in developing countries—helping people help themselves. By teaching people rather than just treating them, PCI encouraged their self-reliance. Their health improved while they continued to be responsible for themselves. Project Concern developed programs that belong to the people, not relief programs that are dependent on outside resources. As project areas become self-sufficient, Project Concern moves on to other areas of need, confident it is leaving behind a lasting health care program.

Through this method of primary health care, Project Concern reaches countless people in need. Primary health care is a network of people helping people toward better health. PCI has been at the forefront of the primary health care movement. The World Health Organization's International Conference on Primary Health Care in 1978 endorsed the concept. Project Concern is recognized by AID as a worldwide leader among private, voluntary organizations in providing health care programs.

Mr. Speaker, recently Project Concern prepared a position paper, "The Private Voluntary Organizations in International Health Care Program Development," based on its experiences gained from 20 years of health care delivery in developing countries. I am inserting this position paper in the RECORD for review by the appropriate committees of the Congress, the Agency for International Development, and all parties interested in health care services in developing countries.

THE PRIVATE VOLUNTARY ORGANIZATIONS IN INTERNATIONAL HEALTH CARE PROGRAM DEVELOPMENT

On the twentieth anniversary of Project Concern's involvement in efforts to improve the health status of the poor in developing countries, it seems appropriate that our observations and findings in approaches to providing assistance in this area of serious need should be shared with an interested government and with other private organizations and agencies who share with us a concern in this matter.

A. TECHNICAL ASSISTANCE

Over the years the developed countries have provided technical assistance at great cost in an effort to improve the economies of the poorer countries. The goal has been to enable those developing countries to take a place in the world of trade with the industrial countries, ultimately resulting in improvement of the socioeconomic conditions of the people, raising their level of education, improving health status, housing, communications, and transportation, and of paramount importance, improving the productivity of the people.

Notwithstanding the effort that has been made to narrow the gap between developed and less developed countries, world inflation is very seriously and adversely affecting the socioeconomic status of the poor countries of the world.

Deterioration is especially alarming in those countries lacking in the oil or mineral resources so essential to industrial development, whether manufacturing or agricultural. The petrochemical cost crisis, more than any other factor, is making economic cripples of the developing countries. This leads to curtailment of all manner of services, decline in nutritional and general health status and, ultimately, in productivity. Only considerable, enlightened, efficient, and sustained technical assistance to help people help themselves will avert a widening gap between the poor countries and developed nations.

B. COMMUNITY BASED DEVELOPMENT ASSISTANCE

Community development assistance, with intervention encouraged principally at the community level, is a most cost effective methodology. It provides seriously needed humanitarian aid where it is required most.

The community is encouraged to become actively involved in an assessment of felt needs. It organizes a development committee that plays a key role in the design supervision and evaluation of the development plan.

The infrastructure to support the development plan, whether it be for supply, management or additional training, grows from the community's perceived needs.

Decentralized development eliminates the possibility of imposed or foreign methodologies. It respects the sovereignty of communities and their citizens, as well as that of the nation while encouraging accessible, practical, acceptable and affordable change.

Therefore, we establish friendly and improved political relationships with lesser developed countries.

C. HEALTH-ORIENTED TECHNICAL ASSISTANCE

Development of human infrastructure is an essential prerequisite for development of the economic infrastructure of the poorer nations. Modern economies must acknowledge the economic value of their citizens. To achieve any semblance of success, the rural poor must be educated and trained. Adequately nourished and healthy individuals learn and function most efficiently. Thus, health and nutritional services protect the investments made for economic development; as well as providing for the alleviation of pain, disease and unnecessary early death.

D. UNMET HEALTH NEEDS IN DEVELOPING COUNTRIES

In the developing countries, considerable portions of their limited income have been used for expensive construction and support of city and regional hospitals. It is clear that a disproportionate percentage of the budget is used in this effort to emulate the practice of western medicine. Often 80% of the country's health budget is so invested, but serves as little as 1-20% of the total population, leaving extremely limited resources for solving the pressing problems of community health development, especially in rural areas. The hospitals, located principally in national and provincial captials, typically serve approximately 10% to 20% of the population and with essentially only curative health care, leaving approximately 75% or more of the rural poor with little or no scientifically accepted patient care and minimal or no preventive health care.

E. PRIMARY HEALTH CARE

Our experience over the last 20 years has shown that most health problems are relatively inexpensive and easy to prevent but costly to treat when left unattended. In any given developing country, 75% to 90% of the health problems are accounted for by approximately 10 conditions: those stemming from inadequate diet; infectious diseases against many of which immunizations are effective; respiratory and gastrointestinal illnesses; parasitic infestations; ear, eye, and skin infections; and minor injuries. As stated these conditions are relatively inexpensive to prevent and, when dealt with on an ongoing basis, are not difficult to treat.

Relatively little has been done in most developing countries to encourage the very real potential reservoir of intelligent, informed self-help educating the populace as

to the causes, prevention and primary basic treatment of common health problems and of the great impact the populace can have in helping themselves. Experience has also shown that an effective Primary Health Care program is a broadly integrated program with special emphasis on maternal and child health. The importance of this emphasis is seen in the demographic picture which shows that 40% to 50% of the population in a typical developing country is less than 15 years old, and 20% to 25% of the population is comprised of women in childbearing years. The integrated program consists of basic curative care, nutritional education, environmental sanitation and home hygiene, family planning, and health education, which is an integral part of each of the foregoing components.

Effective Primary Health Care delivery entails two key factors: 1) a locally trained health care provider, identified here as the Community Health Worker, and 2) a well-informed, motivated community which participates fully in the community program. It has been found that the most effective community health worker is a resident of his or her community who is nominated for the health worker role by the local population. Aptitude and motivation are principal requisites for the effective health worker. His or her background of formal education is of less importance. Community health workers with 4 to 6 years of elementary education or even less have performed very effectively. The basic training of the Community Health Worker, conducted in the community itself, is intensive over a period of weeks to months, with subsequent repeated on-the-job-training. The training is both formal and nonformal with heavy emphasis on practical application.

In addition to the Community Health Worker's delivery of preventive health care, experience has repeatedly shown that with the skills acquired, the health worker can provide approximately 80% of the curative care for illnesses in the community.

F. PRIVATE VOLUNTARY ORGANIZATIONS IN PRIMARY HEALTH CARE

The Private Voluntary Organizations of the U.S. are particularly effective where there is a wide range of health problems. We have the skills and experience needed to work at the grass roots level. We are responsible to local needs and able to tailor a primary health care program to meet those needs. A number of PVO's have experience in building up the primary health care infrastructure to ensure continuity of the program. From the outset of the implementation of a primary health care program, PCI's secondary goal is the replication of the program in adjacent or distant areas of need. To this end the local health care program serves as a model, the effectiveness of which the PVO actively demonstrates to the community leaders in other areas of need.

Traditionally, PVOs have developed a highly effective low cost primary health care delivery system. The World Health Organization's International Conference on Primary Health Care in 1978 called for an effective national and international action to develop and implement primary health care throughout the world, and particularly in developing countries, in a spirit of technical cooperation.

The development or demonstration, by American PVOs, of low cost primary health care delivery systems, is consonant with the American humanitarian ideal, that is encouraging and assisting people to assume the responsibility of helping themselves.

G. SUPPORT OF THE PRIVATE VOLUNTARY ORGANIZATION

Private Voluntary Organizations in primary health care work are to a very great extent supported by the private sector in the U.S. Project Concern International receives approximately 90% of its funding from private donors and has found that in many developing countries an American organization so founded is generally better received by the citizenry than programs directly administered by the U.S. Government.

After 20 years of experience in health care delivery—a period which has seen our organization change from a relief agency delivering curative care, to a promoter of community health and self-care—Project Concern International has formed the firm conviction that the Primary Health Care system described herein should be widely adopted and applied by all organizations and agencies dedicated to permanent improvement of the health and socioeconomic conditions of the poor in developing countries.

Experience has shown that a greater number of actual or potential requests for primary health care development assistance are forthcoming than is within the present financial possibilities of American PVOs. In this light, greater Congressional support for the activities of the PVOs should be considered. It is necessary that the U.S. Congress be apprised of the great potential of the PVOs to effect and expand primary health care in the developing countries. If Congress accepted this concept, the PVOs would, to a greater extent, serve U.S. foreign assistance policy and goals with more low cost self-help health services, so sorely needed in the developing countries. The flexibility of the PVOs permits us to respond more rapidly and with fewer constraints than would be so for governmental assistance.

Project Concern International is firmly dedicated to the belief that true socioeconomic development for all peoples, and of the world as a whole, is rooted in healthy, productive individuals and communities.

Project Concern International is pleased to provide a summary of its health policy.

PRESIDENT'S TAX PROPOSAL CALLS FOR INDEXING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. LUNGREN) is recognized for 60 minutes.

Mr. LUNGREN. Mr. Speaker, while I was waiting for this period in which to speak I had occasion to watch the nightly news and hear a suggestion by the Speaker of the House that the upcoming vote we are going to have on the tax cut bills, that somehow the majority Ways and Means Committee bill is preferable to that presented by the President, a bipartisan bill, the Hance-Conable bill, because somehow the President's bill is a rich man's bill, or helps the rich out rather than it does the poor.

□ 1910

Well, Mr. Speaker, if one goes over it and analyzes the two bills, I think what one can say very, very honestly is that the major difference between the two bills is that that bill which is presented by the majority helps no one after 2 years. In fact, it is a major tax increase just about across the board for all earnings, from the rich to the poor and everyone in between.

In fact, Mr. Speaker, if one would analyze it, one would see that the effect of the O'Neill-Rostenkowski bill essentially is to establish in this country the most sharply graduated and the deepest marginal rates across the board on middle America that we have ever seen.

One of the reasons from the standpoint of those of us who have been arguing for across-the-board tax cuts for tax relief for the American people is the impact on the economy of steeply progressive marginal rates across the board. What does that mean? Well, it means that people are tremendously concerned obviously about what the average tax rate is. That is, if we take their total income and figure out what the overall percentage of their income is that goes to taxation, but, more importantly, in terms of whether they are willing to invest, to save, whether they are willing to work a little bit longer, or whether they are willing to take a risk because of the possible bonus at the end of that risk if they are successful, one of the major controlling factors is the marginal rates. What will they pay on that extra dollar?

The unfortunate thing for many people who are classified as blue-collar workers, the American middle class, is that they are now paying an effective marginal rate of 50 percent. Yet "they ain't seen nothing yet" if we allow the O'Neill-Rostenkowski bill to be passed, because after 2 years that is all they get.

After 2 years they get no indexing of the tax rates as is presented by the bipartisan Reagan proposal, and that is the most important aspect in my judgment of the President's proposal. The President wishes to bring down the rates virtually across the board by 25 percent.

Why is that important? It is important because over the next 2 to 3 years the average American will be paying 22 percent more in taxation as a result of the increase in social security taxes and bracket creep, being thrown into higher tax brackets by virtue of the fact of inflation. It is a 22-percent increase, and they are being offered on the one hand from the Ways and Means Committee bill a 15-percent offset, which simple math will show leaves you 7 percent behind, versus a 25-percent cut that the President offers, which at least gives you something in terms of being ahead of the game.

But far more important than that is the element of the President's proposals which will allow indexing. That is, after that third year the tax rates will be indexed for the impact of inflation.

That means that no longer will we in Government be able to take a multiple of inflation as a bonus from the taxpayer. Studies done over the last few years have shown that for every 1-percent increase in wages that the average American gets to keep up with inflation Government takes in an increase in tax receipts of between 1.6 and 1.7 percent.

In other words, when we talk about windfall profits, it is the Federal Government that takes in windfall profits in the nature of taxes as the result of inflation and inflation's impact on a progressive tax structure.

Now, not only is that bad enough but in fact when we analyze the way in which the Ways and Means Committee bill has been written, it skews the tax rate such that the progessivity will be even greater for those people in the area of $20,000 to $50,000 after 2 or 3 years. In fact, as one would go through this, after 3 years, with income levels of $33,300 to $46,200, one is hit with these marginal tax rates: 25 percent, 34 percent, 41 percent, and 48 percent.

Now, we are talking about several years down the line. Even if we have just a moderate level of inflation down the line, the people who are going to be at the $46,000 income level are not going to be rich; in many cases they are going to be a lot of people in Middle America that the Speaker claims he is so concerned about.

Now, what is the comparison with the Conable-Hance proposal? The corresponding rates under Conable-Hance would be 24 percent, 28 percent, 33 percent, and 38 percent. In other words, it will be a differential of 1 percent, 6 percent, 8 percent, and 10 percent—a 10-percent difference between the Ways and Means Committee bill and the President's bill.

Now, Mr. Speaker, I must ask, which bill is more helpful to the middle class? Which bill is of more assistance to the great middle class that I have heard the Speaker of the House talk about, that is, those earning between $15,000 and $60,000? In every instance, after the second year Conable-Hance will give those people far more return than they would get under the bill presented to us by the Ways and Means Committee. As a matter of fact, a family of four, with one wage earner and a total of earnings to the family of $15,000, would receive under the Ways and Means Committee bill more than they would under Conable-Hance. As the President says, certainly they would for the first 2 years, and if one is only planning on living 2 more years, then this will help a little bit more. But most of us, I think, are planning on living a little bit longer than that, and we are planning on making some decisions for our family and for our family growth over the next 3 years, and we want them to be able to compete in the economic atmosphere of the United States.

But how much more do they get under the Ways and Means Committee bill than they do under Conable-Hance in 1982? Mr. Speaker, they get the grand total of $22 more. In 1983, how much better off are they than in Conable-Hance? Well, they get $25 more.

What happens in 1984? In 1984 they get $73 less than they do under Conable-Hance. In 1985 they get $129 less than they do under Conable-Hance. In 1986 they get $183 less than they do under Conable-Hance. And the difference keeps growing and growing and growing every year because the Ways and Means Committee bill does not include indexing for inflation.

This same pattern is true across the board, and even more so in terms of dollar amounts as you rise above $15,000.

So in other words, if you look at the Ways and Means Committee tax cut, it peaks in 1983, it is substantially repealed by bracket creep in 1984, and it is completely wiped out in 1985 for people earning $15,000 and in 1986 for everyone earning between $20,000 and $30,000.

Mr. Speaker, I must ask, which tax proposal is more helpful to the middle class, the one that gives them peanuts for a couple of years and then lets them ride the roller coaster of bracket creep for the foreseeable future or the open that gives them some certainty that there will be some hope at the end of 3 years and which indexes the tax rates in such a way that we in Government will not get the bonus of windfall profits as we have for so many years?

Mr. Speaker, there is another important point. Because of the fact that the Conable-Hance proposal allows for more substantial rate reductions across the board at the end of 3 years in all of these levels than does the Ways and Means Committee bill and because of the fact that at least 70 percent of all small business in this country files essentially individual income tax returns and not corporate tax returns, the Conable-Hance bill will be far better in terms of reinvigorating the economy, that great part of the economy which is made up of small business.

□ 1920

Why is small business so important? Small business is extremely important, because if you take the last 10 years, all of the total new jobs created in our economy were created in the small business sector. We had virtually no new jobs increased in the Fortune 500 and one economist told me recently that the Fortune 1,000 had no net increase in jobs over the last decade.

If we are going to have more jobs for those people who need jobs, if we are going to have more productivity in this country, if we are going to have a reinvigorated economy, what we need is a tax cut which treats those people fairly and which gives them an incentive to expand, an incentive to hire more individuals. That is another reason, Mr. Speaker, why the tremendous increase in progressivity among the middle income that is contained in the Ways and Means Committee bill is so devastating to the recovery of the economy of this country.

Mr. Speaker, we simply cannot afford to risk the economic future of this country merely because some people believe that a political victory should be denied this President.

It is very interesting, Mr. Speaker, that some months ago the President's idea that we needed tax relief in this country was being ridiculed by the leadership on the other side of the aisle. The Speaker himself had some things to say about that. There was some suggestion that this would be highly inflationary.

Now we have come to a position where the Ways and Means Committee, amply controlled by the majority side, disproportionately controlled by the majority side, controlled such that there was absolute assurance that the President's package would not be reported out of that committee, we come to a situation where they somehow now realize that there is some merit in tax cuts, and not just this year. Now there is merit in 2 years. As a matter of fact, there might be merit in 3 years if we insert some triggering mechanism which essentially will give Congress the decisionmaking power 2 years down the line as to whether we should allow individual tax cuts for that 3d year to allow them to continue to have a tax cut; but for some reason we cannot accept the 3-year tax cut presented by this President with some bipartisan support.

Mr. Speaker, we must do something. The people back home are asking us for a tax cut. The people back home do not know the intricacies of the legislative dance that is done behind closed doors in terms of organizing this House and seeing who will be sitting in the varsity row when the Ways and Means Committee meets; but the people back home do wonder whether this Congress is going to be true to the mandate presented to it by the people last November 4, and that is they want a tax cut and they want a real tax cut.

The fact of the matter, Mr. Speaker, is this, that after 2 years when you arrive at the third year, there is one bill that gives you a tax cut. There is another bill which gives you a tax increase. There is one bill which tries to project what I would call truth in taxation or truth in tax bill packaging and that is indexing, because indexing forces us as elected officials to make

decisions as to what the level of taxation ought to be. We are not allowed to ride along on the free ride given by inflation in excessively progressive tax rates such that we can go home election after election and say to the people, "I never voted for a tax cut," when the person looks at his paycheck and sees that a larger and larger bite is being taken by the Federal Government.

We have got to have the guts, Mr. Speaker, in this House to face the people and increase taxes if that is necessary, or cut down on spending back here. Frankly, we have had it both ways for a long period of time.

Because of the impact of inflation on highly progressive tax rates, we have been able to say, "Look, we have had five singular opportunities in which we have voted tax cuts for the American people in the last decade."

But the fact of the matter is those tax cuts have been phony because they have been more than compensated for by the impact of inflation upon steeply progressive tax rates.

It is time for something different. It is time for something new.

Mr. Speaker, I would ask all the Members of the House, all of my colleagues, to look at these two bills to see, in fact, whether there is a difference, because there is a difference and to see, in fact, whether they can go home and tell their constituents back home, "Yes, I voted for a tax cut," when in fact it is a tax increase if they support the Ways and Means Committee bill, or whether they want to go home and say to the American people and the constituents they represent, "We are willing to give a chance to some new economic theories in this country; that is, that it is not always inflationary for people to keep their own money and save it and spend it and invest it, but it is never inflationary for the Government to take that money and spend it as it sees fit."

Mr. Speaker, over the next couple of days we are going to have some very interesting arguments about how we arrived at the situation at the present time. In fact, last Friday, Mr. Speaker, I was sitting in my office and watching some special orders on television as I was preparing for a trip by plane back to my district in California when some Member started talking about the fact that somehow the President was responsible for being involved in a bidding war, that somehow instead of just an across-the-board tax cut we were talking about a lot of different goodies that have been added to the bag and that they did not support one or more of these goodies.

Mr. Speaker, I would just remind my colleagues that it was this President and this Secretary of the Treasury who came to the Hill and told us they did not want a goodie bag, they wanted a clean bill, that had, first, across-the-board tax cuts for relief to the individual taxpayers of this country; and, second, they wanted some reform of the depreciation mechanism such that we could give some incentive and some boosts to business, so that they could capitalize and so that they could give their workers the new investment that is necessary so that they would be surrounded by more modern equipment, so that their productivity could rise, so that they could compete with our foreign competitors in the foreign marketplace. That is what the President asked for. He asked for a clean bill.

Unfortunately, as we know, Mr. Speaker, this President and this party does not control the Ways and Means Committee. As a matter of fact, it is very strongly controlled by the leadership of the other side, sometimes I believe against some of the wishes of many Members of the other side.

It was in that arena that the bidding war began and it was in that arena that the chairman of the Ways and Means Committee became the auctioneer for the bidding war.

Mr. Speaker, I find it rather difficult to comprehend how the President can be criticized for entering a bidding war that he did not want to enter, that he told us would occur if we did not just have a clean bill approach, but which he was forced to enter if he was going to have any opportunity to have his proposal for basic tax relief accepted by this Congress.

Mr. Speaker, one of the problems with the bidding war has been this. It has allowed some to try and bring a cloud over the essential debate and the essential differences in these tax-cut proposals; that is, it has brought us away from the debate on the 25-percent-across-the-board, 3-year tax cut, versus a 2-year, 15-percent illusory tax cut.

Mr. Speaker, that is the essential difference in the two bills. That is the one on which our membership is going to have to make a judgment.

Mr. Speaker, I believe that the American people understand that.

Mr. Speaker, I believe that the American people will judge our actions based on how we vote with respect to those essentials in the two tax-cut proposals.

□ 1930

UNFAIR MINORITY REPRESENTATION ON COMMITTEES LEADS TO COURT SUIT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DANNEMEYER) is recognized for 30 minutes.

Mr. DANNEMEYER. Mr. Speaker, Wednesday of this week we are scheduled in the House to take up the Ways and Means Committee tax bill, and also, as an alternative to that bill, President Reagan's tax bill; but I think one of the essential features that relates to this entire matter deserves mentioning this evening, because it helps put this matter in a little perspective.

Article I, section 7 of our Constitution says that all bills for raising revenue shall originate in the House of Representatives. Any sixth-grade civics student will know that and relate it on request by his teacher; but how about the House of Representatives? Who is responsible for drafting tax legislation in this House? It is the Ways and Means Committee. Who gets on the Ways and Means Committee and what is the division on that committee? We find that when this committee, which is charged by the Constitution with writing tax policy for the country, in January of this year, when the 97th Congress was organized, the Democratic leadership under Speaker O'NEILL, provided that this Ways and Means Committee would have 23 Democrats and 12 Republicans. The mathematicians here can figure out very quickly that that means that we Republicans were given 34 percent of the slots on that committee.

The irony of it is that in November 1980, we had a national election. Everyone knows that. In that election, Republican candidates for Congress received some 49.48 percent of the total vote for seats in this House of Representatives. Democratic candidates for Congress received 49.15 percent of the votes. In other words, Republican candidates for Congress received a higher percentage vote nationwide than the Democratic candidates. What happened on the organization of the House? We Republicans received 44 percent of the slots in this House, some 192 of the 435 seats, and the Democrats were given some 55.86 percent of the slots, or 243 seats. In other words, we Republicans ended up with some 44.14 percent of the slots in the House of Representatives.

Then one may ask, "Wait a minute. If Republican candidates and Republicans have 44 percent of the slots in the House, how did it come that they only turned up with 34 percent of the slots on the Committee on Ways and Means, the committee which writes the tax policy for the Nation?"

The answer is quite simple: Republicans were shorted six slots on the Ways and Means Committee in the House of Representatives because the Democratic leadership was determined that its liberal tax, spend, and elect philosophy would continue to dominate what the work product of that committee was for the term of the 97th Congress. That is precisely what this committee has done now.

Check the RECORD last week. The Rostenkowski-O'Neill tax increase bill

in the third year, which is scheduled for consideration by the House on Wednesday of this week, came out by a voice vote, not by a rollcall vote. If one does the mathematics, one will find that with 23 Democrats and 12 Republicans on the Ways and Means Committee, one needs 18 votes to get a bill out. That means that we Republicans would have to get six Democrat votes on that committee to put a bill out of that committee in order to reflect the Republican philosophical tax bill which the House will consider on Wednesday.

If we had our rightful entitlement on that committee, we would have had 18. To get a bill out, one needs 21 votes which means that we would need 3 Democratic votes to vote with the 18 Republicans to get a majority of 21.

When the bill goes from the Ways and Means Committee, it goes to the Rules Committee of the House. Here on the Rules Committee, rather than giving Republicans 44 percent of the slots, the Democrats gave us 31.25. We were shorted three slots on the Rules Committee as well; so when the Rules Committee sets the ground rules for consideration of the tax bill in the House, it is predictable. The last word we had was that four amendments would be in order: A liberal alternative which does not want to cut taxes at all; a Black Caucus alternative which is about of the same persuasion; a Republican alternative; and then the product of the Ways and Means Committee itself.

One may ask why are there not other amendments in order for consideration on the floor of the House of those issues that need to be debated on this major tax cut legislation? The answer is, the gentleman from Massachusetts (Mr. O'NEILL) does not want that to happen. The gentleman does not want the House to consider those amendments because the gentleman wants to dominate what that committee will produce in the way of legislation.

We who serve in the U.S. House of Representatives are very proud and privileged to have the opportunity of serving here, but it is on a note of sadness that I bring this issue to the Members this evening, because we find ourselves on the issue of apportionment of committee slots in this House in the minority of parliaments of the world. Michael Ameller produced a massive work analyzing the 55 parliaments of the world and found that without exception, most of the parliaments of the Western World based slots on committees on the percentage of the division of the house of the parties. The exceptions were—with interest that it is otherwise—Albania, Bulgaria, Poland, the U.S.S.R., and the U.S. House of Representatives.

I do not know how the Members react to this, but I find that it is a little sad that this disparity would exist in the U.S. House of Representatives, and we find ourselves allied with Communist countries in the method by which we treat division of party slots on major committees in our parliament in this country.

Fourteen Republicans last Thursday felt that this was such an important issue that it is deserving to bring to the attention of the American people. It is also of such importance that we should bring it to the attention of the court system, because the threshold question of how many Republicans, minority Members in this House, get to serve on the Ways and Means Committee is of vital importance as to what legislation will be considered by this House at all.

So we filed suit last Thursday in the U.S. District Court here in the District of Columbia and our prayer for relief is that we ask that the committee slots in this House be apportioned on the basis of the percentage which we Republicans have in the House of Representatives.

It is my sincere feeling that if the court so decides—and there is legal precedent in appellate court decisions in this country to suggest that it is quite likely that it will do so—that we Republicans will have an increased allocation of slots on the Ways and Means Committee of not less than six.

We would also note that on the Appropriations Committee in this House we Republicans have been shorted four slots. We have been given 40 percent of the slots with 22 Members. Our 44-percent entitlement would give us 4 additional, to 26. On the Rules Committee we have been given five. We deserve three more. We have been given 21.5 percent of the slots. We deserve three more to bring us close to our 44-percent total. On the Ways and Means Committee, with 23-12 the division, we have been given 24.29 percent of the slots. We deserve at least six more to bring our total to the minimum.

Mr. COLLINS of Texas. Mr. Speaker, will the gentleman yield?

Mr. DANNEMEYER. I yield to the gentleman from Texas.

Mr. COLLINS of Texas. Mr. Speaker, as the gentleman was speaking about the Ways and Means Committee, and with this vital issue coming to the floor on Wednesday, I thought how the gentleman has really put the essence of this alternative that is coming before Congress. Because on the one hand we have this packed committee—what is the exact count?

Mr. DANNEMEYER. Twenty-three Democrats, twelve Republicans.

Mr. COLLINS of Texas. Twenty-three to twelve.

Mr. DANNEMEYER. We have 34.29 percent of the slots. We have 44 percent of the slots in the House of Representatives.

Mr. COLLINS of Texas. In other words, a fair representation, instead of 23 to 12, would be about 23 to 18?

Mr. DANNEMEYER. That is right. We have been shorted six slots on this committee.

Mr. COLLINS OF Texas. This is an example of why it is so essential that the vote be based on the merits of whether we are going to take President Reagan's plan or this plan drawn up by the Democrats for every pork barrel reason that you can ever devise in their tax plan. This alternative is one of the crucial decisions before America, because President Reagan's plan will mean savings for America, the opportunity to build more capital, and one gets right back to why do we have this alternative? It is because we do not have a fair break in this Ways and Means Committee.

I thank the gentleman from California for yielding. The gentleman hit the issue right on the head.

Mr. DANNEMEYER. I thank the gentleman for his comments.

In closing, let me make this observation. We Republicans have been shorted altogether 30 slots on the 21 committees of the House of Representatives. We have been shorted 37 slots on the subcommittees in this House. The Ways and Means Committee is the most egregious example of the despicable division which the Democratic leadership in this House has visited upon us Republicans. I can say without equivocation that the division, the slots that we Republicans have been allocated on the Ways and Means Committee in the 97th Congress, is a violation of every historical precedent in the House of Representatives in the history of this Republic.

Why? Because the Democratic leadership is desperate. They lost the election in November 1980. They are hoping by their strangulation of this committee, the Ways and Means Committee in this House, to impress, to force, to stifle their philosophical point of view of tax, spend, and elect which has run this country for the last generation.

I hope that the American people will understand the difference between the two major parties, the difference between the two tax bills, and our hope and desire that we can bring a rectification of this injustice, this travesty. I am reluctant, as a Member of this House, to go outside this body, frankly, into the court system to ask them to look into our tent to correct an injustice; but analyze for a moment what our alternative would be. We could object to every unanimous-consent request that comes along. We could ask for repeated quorum calls to delay everything that comes along. We could, in effect, obstruct the processes of this House to bring its proceedings to a halt in order to bring to the atten-

tion of the people of this country the disparity we Republicans have sustained in this House.

But would that be responsible? I have to answer that no, for the reason that there is legislation that the people of this country need and want, not the least of which is this tax bill which we will vote on this week.

Had we elected to go the obstructionist route, nothing would move. That is not in the interests of this country.

That, to me, tells me that the only alternative we really have as a practical matter is to file this suit in the U.S. district court and ultimately I firmly believe the matter will be resolved by the U.S. Supreme Court in deciding whether or not the U.S. House of Representatives is going to have to get in step with the vast majority of the parliaments of the free world in deciding that the allocation of slots on committees of that House is to be consistent with the division of the parties as reflected by the last election of the American people.

I yield back the balance of my time.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. NELSON) is recognized for 5 minutes.

● Mr. NELSON. Mr. Speaker, I was not present on Friday for rollcalls 162 and 163. Had I been present I would have voted "no" on the amendment to delete $10 million in funds for the Barnwell nuclear fuel plant and to increase funds by the same amount for the Savannah River nuclear waste solidification project in South Carolina, and I would have voted "yes" on final passage of H.R. 4144, making appropriations for energy and water development for the fiscal year ending September 30, 1982.●

HIGH INTEREST RATES AND HOW TO REDUCE THEM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Rhode Island (Mr. ST GERMAIN) is recognized for 10 minutes.

● Mr. ST GERMAIN. Mr. Speaker, tomorrow our colleague, Chairman HENRY S. REUSS, will floor manage House Concurrent Resolution 160, a concurrent resolution expressing the sense of Congress with respect to monetary policy, inflation, and high interest rates. This resolution is scheduled for House action under suspension of the rules tomorrow.

It is important that all Member support this resolution and its principles that current interest rates are needlessly and destructively high, that they are wreaking extensive damage on the economy, that they are damaging the economies of our major trading and financial partners throughout the world, and that they result from an excessive reliance on tight monetary policy coupled by an expected large fiscal deficit.

This resolution calls for the administration to take immediate action to reduce the future budget deficit, encourage the banking system to concentrate scarce credit resources for those sectors of the economy which contribute most to long-term productivity and inflation fighting. Finally, it encourages the Federal Reserve to lower interest rates without loosening its firm control over the aggregate rate of growth of money and credit.

I urge all Members to support the resolution tomorrow. The resolution follows:

H. CON. RES. 160

Concurrent resolution expressing the sense of the Congress with respect to monetary policy, inflation, and high interest rates.

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that—

(1) current interest rates are needlessly and destructively high, taking into account the current rate of inflation;

(2) high interest rates are wreaking extensive damage on the economy and, in particular, on construction, on housing, and on the automobile industry, on the thrift institutions, on small business, and on productive capital investment;

(3) high interest rates in the United States are also damaging the economies of our major trading and financial partners, and the economies of the developing world, causing unemployment, impeding growth, and contributing to the risk of social and political disorder;

(4) high interest rates in the United States are the result, in part, of an excessive reliance on tight monetary policy to fight inflation, coupled with an expected large fiscal deficit; and

(5) interest rates can and should be brought down now. Among other steps, the administration should—

(A) take immediate action to reduce the future budget deficit and so permit lower interest rates;

(B) design and implement a policy of encouraging the banking system to concentrate available credit on those uses which contribute most to long-term productivity improvement and inflation fighting; and

(C) encourage the Federal Reserve to lower interest rates in response to these measures, without jeopardizing firm control over the aggregate rate of growth of money and credit.●

LEGISLATION REGARDING TAXATION OF QUALIFIED GROUP LEGAL SERVICES PLANS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. SHAMANSKY), is recognized for 5 minutes.

● Mr. SHAMANSKY. Mr. Speaker, today I am introducing legislation to make permanent the current provision of the IRS Code relating to the taxation of qualified group legal services plans.

Under current law, section 120, effective from 1977 through 1981, employer contributions to qualified legal services plans are treated as business deductions and the benefits provided to an employee are excluded from their income. My bill would make this provision permanent by merely deleting the January 1, 1982, expiration date. The bill is similar to legislation introduced on April 29, 1981, by Senator BOB PACKWOOD.

Mr. Speaker, the ability to exercise one's legal rights is vital to the functioning of our country. Unfortunately the high cost of legal services all too often means that only the rich or the poor, with access to Government-sponsored legal services, can exercise these rights. One way to bring legal services within the reach of the great bulk of the middle class is through the establishment of prepaid legal services plans.

The city of Columbus, Ohio, has been a leader in this field. It has the largest and oldest qualifying legal services plan in the country. It provides services to 5,700 municipal employees at a cost to the employer of $8.08 per month per person. Within certain ceilings it reimburses employees for legal services related to personal legal problems. The program has been in operation since 1975 and has received high praise from both the city and its employees.

Nationwide we have seen a substantial growth in these plans, from 75 in 1975 to 400 in 1980. It is estimated that 1 million individuals benefit from these plans. This is a trend which we should encourage.

Federal legislation has contributed to this growth through favorable tax treatment. Under IRS Code section 120 the income tax exclusion is available if the legal services program complies with certain requirements. For example, the plan must not be limited to certain employees.

The IRS has published proposed regulations—April 29, 1980—to implement this section. While these proposed regulations are, in my opinion, too restrictive, it is my hope that we will see changes in the final regulations.

I hope that this legislation can be speedily adopted as a means of assuring that the middle class in this country will have greater access to vital legal services.●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. SAM B. HALL, JR.) is recognized for 5 minutes.

● Mr. SAM B. HALL, JR. Mr. Speaker, on Friday, July 24, the House passed H.R. 4144, energy and water development appropriations bill for

fiscal 1982, on a 244-to-104 vote. I was unavoidably absent from the House Chamber at the time of the record vote, but if I had been present, I would have voted for bill passage.

H.R. 4144 is of particular significance to the people of Texas First Congressional District because it provides funding for several worthwhile and necessary water projects. Of major importance is the $750,000 for the Cooper Lake and Channels, Texas flood control project. I commend the House for its adoption of this legislation.●

NO TAX CUT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. CROCKETT) is recognized for 10 minutes.

● Mr. CROCKETT. Mr. Speaker, I find it inconceivable that any worker—employed or unemployed—or any poor person, or any senior citizen, or any minority group member would support any bill that calls for a reduction in Federal taxes at this time. And since the overwhelming majority of my constituents in Michigan's 13th Congressional District fall in one or the other of these categories, I, as their representative, will oppose and will vote against any bill that calls for a reduction in Federal revenues, and I urge my colleagues to do likewise.

Most Americans are still struggling to make sense of the Reagan budget cuts and their impact on the disadvantaged in our country. Now we are confronted with an even more insidious proposal: a combined effort by both Republicans and Democrats designed to further withdraw the Federal Government from its commitment to serving the majority of the people.

The budget cuts voted by the Congress in June broke a half century of public trust in the Government's ability and its commitment to assist its needy. Then, just days later, the largest military budget in this Nation's history sailed through this same Congress, beginning a spiral of weapons development and purchases that will top $1.5 trillion in the next 5 years.

Any reduction in Federal revenue now would, I believe, be catastrophic for the poor in this country. It would signal a further reduction in the Government's ability to care for the needs of the people.

This Member refuses to believe that the American people have been mesmerized by the public relations blitz of the White House into accepting the notion that a tax cut now is not only desirable, but essential. The mail from my district convinces me that the Reagan shell game with the economy—taking money from domestic social programs and throwing it into the Pentagon's war chest—has not deceived the people into thinking that the budget has actually been cut, when it indeed has not. The same or more revenue is needed, since all that has been accomplished is a mammoth transfer to the military of funds heretofore committed to the social needs of the people.

More important, the very real needs of our people have been hidden under the rhetoric and promises of prosperity being shouted by the tax cutters.

When the veneer is stripped away, some very real questions remain:

How can the Federal Government turn its back on the millions of unemployed, disadvantaged, aged, and other needy citizens that look to their Government for justice?

How can the Federal Government afford to cut the tax revenue when it claims the social security system is in imminent danger?

How can the Government justify a tax cut when it has committed this Nation to spending over $1.5 trillion for the military over the next 5 years? This breaks down to spending an average of $1 million a day for 4,000 years for the expensive new war toys.

How can the Federal Government hope to keep commitments, made by this administration, to give $1.2 billion in military assistance to Israel and an almost equal amount to Egypt and friendly Arab nations, when it has insufficient tax revenues?

How can this administration even dream of a balanced budget in the next 4 years without retaining at least the present intake of tax revenues?

How can States and local governments, which now stand at the brink of bankruptcy, be expected to take up the slack of reduced Federal contributions?

Clearly, reducing taxes will profit only those who seek to reorder the national agenda and forsake our responsibilities.

We have no business cutting taxes when so much work needs to be done. Every dollar lost through a tax subsidy, or exemption, or reduction, is 1 less dollar the Federal Government has to spend on education, on health, on equal justice, on housing. Each tax dollar lost through tax breaks retrenches the Federal Government from its responsibilities and makes more impossible the stated goals of controlling inflation, stimulating economic growth, and balancing the Federal budget.

I will vote against all tax cuts when the measure comes before the House later this week, and urge my colleagues to join me.●

THE PRODUCT LIABILITY RISK RETENTION ACT OF 1981

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LAFALCE) is recognized for 30 minutes.

Mr. LAFALCE. Mr. Speaker, I rise in support of the Product Liability Risk Retention Act of 1981.

I first became aware of the problems of product liability insurance during the fall of 1976 when I started receiving complaints concerning the unbelievably high premium increases from small businessmen within my congressional district in upstate New York. In February of 1977, I was elected chairman of a small business subcommittee, and in that capacity, started receiving complaints from across the country. I decided to embark on a series of hearings regarding the impact that product liability insurance was having generally, and especially on the small businessman. We wound up having 16 days of hearings with six volumes of testimony

Our subcommittee's report to Congress found two principal causes of the problem: The product liability ratemaking mechanisms and uncertainty in the tort-litigation system. While I have introduced in Congress a variety of measures addressed to these primary causes, even if these were adopted today, product liability rates would not be impacted until many years hence.

Thus, it was felt that there was the need to impact the problem of excessively high rates in the short term—an objective the Risk Retention Act of 1981 is designed to accomplish. It must be emphasized, however, that the Risk Retention Act does not strike at the root causes of this problem. Remedies addressed to the two aforestated principal causes must be adopted if we are to truly solve the product liability problem.

The stated purposes of the Product Liability Risk Retention Act of 1981, which was drafted by the Department of Commerce, are to reduce product liability insurance costs, to insure the prompt payment of legally valid claims, to promote competition among providers of product liability coverage, and to reduce the outflow of capital to offshore captive insurance companies. One additional feature of the act is that it has the effect of preempting State laws which prohibit selling product liability insurance to "fictitious groups"; this would thus facilitate the ability of groups of manufacturers in the commercial marketplace.

This proposal would permit "risk retention groups." These groups would be organized by businesses for the purpose of insuring themselves against product liability claims. The amount of premiums charged would ultimately reflect the experience of a particular group. Thus, there is a direct incentive for all participants in a group to adopt appropriate loss prevention techniques. Moreover, it is contemplated that premiums paid to the groups will

be taxed in a manner similar to insurance companies.

The proposal has the support of virtually all business groups who have considered it, including the National Association of Manufacturers, the National Machine Tool Builders Association, the National Federation of Independent Businesses, the Sporting Goods Manufacturers Association, the Scientific Apparatus Makers Association, and the National Association of Wholesaler Distributors. It also has the support of the Consumer's Union, the National Consumers League, and Congress Watch.

While I am pleased that the administration has seen fit to endorse the Product Liability Risk Retention Act, and that the House Commerce Committee has taken expeditious action, I would note that it was neither the first choice of my small business subcommittee, nor of the Department of Commerce's Task Force on Product Liability, in our respective quests for a remedy which would ease the product liability affordability/availability problems in the short term.

In the last Congress, both my subcommittee and the task force recommended permitting businesses to obtain tax deductions of amounts set aside in trust, the purpose of which was to pay product liability claims and expenses. The effect of such trusts would enable businesses to provide "self-insurance" for their potential product liability exposure with pretax dollars.

Unfortunately, the Department of Treasury under the Carter administration was vigorous in its opposition—an opposition which I believe was unwarranted. Treasury was of the opinion that the trust concept embodies an unacceptable form of subsidy, and as a result, the Carter administration rejected it as an inappropriate remedy.

Thus, while it was not my first choice, I am pleased that we are today considering the Product Liability Risk Retention Act of 1981. The gentleman from New Jersey is to be applauded for his efforts in shepherding this important measure through the House.

Mr. Speaker, I also think it appropriate to give a bit of historical perspective to the product liability problem. Federal consideration of the problem of product liability began in the year 1976 under the Ford administration. At that time President Ford created an interagency task force, led by the Department of Commerce and whose membership included virtually every department of the Federal administration.

In 1977, Mr. Speaker, when I assumed the chairmanship of a subcommittee of the Committee on Small Business, I began working very closely with the interagency task force, whose working chairman was Prof. Victor Schwartz and conducted 16 days of hearings on the totality of the product liability problem.

At the conclusion of my hearings, Mr. Speaker, my subcommittee recommended, No. 1, that there should be improvements in the insurance ratemaking mechanism; and No. 2, that there should also be uniformity in product liability tort law in order to resolve the ambiguities and differences that exist amongst the many States. These were the primary areas for reform.

Mr. Speaker, we also said, though, that a temporary, stopgap measure would be needed, pending the more remedial long-term measures.

As for the insurance ratemaking mechanisms—and anybody who has followed my hearings and the various discussions in which I have engaged over the past years realizes—that this is where we must give major emphasis.

Mr. Speaker, I would note the fact that the Department of Commerce Task Force on Product Liability and Accident Compensation, issued an excellent report on product liability ratemaking practices in August of 1980. While this report was designed to contribute to the deliberations of State insurance commissioners, State legislatures, and insurers themselves, there is little evidence to suggest that this report has done anything but gather dust at the State level.

The task force conclusions concerning investment income were particularly significant: First, insurers potentially earn substantial amounts of investment income from the writing of product liability insurance which is not reflected in product liability rates; and second, the product liability underwriting losses complained of may be significantly offset by the substantial amounts of investment income.

Let me put this in perspective. If we very conservatively assume a pretax rate of return of only 9.5 percent on product liability insurer's investment income, the income generated amounts to $40.94 after taxes for every $100 of premiums written. While we do not have separate figures from product liability insurers, we do know that property casualty insurers as a whole admit to earning more than $11 billion in 1980 from investment income. During that same year the property/casualty industry (which includes the product liability market) sustained its second largest annual underwriting loss at $3.04 billion.

Notwithstanding this evidence, the fact remains that product liability investment income is not reflected in product liability rates. As incredible as this situation is, I must point out that H.R. 2120 will not change this absolutely unjustifiable ratemaking practice. Under H.R. 2120, the insureds would of course be able to enjoy this investment income from their own "risk retention groups."

Permit me to reiterate that while this bill should alleviate some of the current marketplace problems facing the purchasers of product liability insurance, I must point out that H.R. 2120 does not address either the ratemaking issue or the uncertainties underlying our tort litigation system. These two issues will remain the root causes of the ills which have beset the product liability area. The Congress must address these areas as well if it is to provide the business community with any long-term solutions.

H.R. 2120 is a very good bill and a necessary step that must be taken but we would be fooling ourselves if we believed that this represents any sort of final resolution of the issue.

In the meantime, Mr. Speaker, as an expedient, as a short-term interim response, this law must be passed. It has the approval of every single person and every single organization concerned about the product liability problem. Even the insurance industry has finally come to recognize the inevitability of the enactment of this legislation. I urge my colleagues to support this measure.

CRITICAL MATERIALS ACT OF 1981

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. FUQUA) is recognized for 5 minutes.

● Mr. FUQUA. Mr. Speaker, in the closing days of the 96th Congress an important bill entitled the "National Materials and Minerals Policy, Research and Development Act of 1980" was passed and signed into law. That bill, Public Law 96-479 represents the first major statement on materials policy that has been developed in over three decades, requiring the President to take a number of steps in addressing materials problems. This includes a requirement to provide Congress a program plan by the end of this year. I would make the following important points:

The issue of critical materials and strategic minerals continues to be urgent. It is gaining more attention as the ramifications of our materials vulnerability become known.

We have all heard in the media and elsewhere of the possibility of a "resource war" in southern Africa, and the response by the Secretary of the Interior that accelerated development of public lands is the answer to such a war.

The President and others have called for increased acquisition of critical minerals for the strategic stockpile, and Congress is now deliberating concerning those needs.

The Defense Production Act, which includes the allocation of defense priorities regarding critical materials is

also under scrutiny by congressional committees.

In my own committee, from a different perspective, we are seeing the importance of materials to our energy, space and aeronautical programs, and are concerned, as well, with the tension between maintaining a strong basic materials industry and a healthy environment.

A vital economy requires maintaining a strong basic materials industry. The materials industry represents over $20 billion annually and when translated into actual products and services magnifies to over $200 billion in the national economy.

The Committee on Science and Technology will continue its oversight of the implementation of Public Law 96-479 with particular emphasis on organization in the Executive Office. However, it has been increasingly apparent to me that further legislative action may be necessary to more fully address the problems of materials and national materials policy. As such, I am introducing today a new bill entitled the "Critical Materials Act of 1981" to focus further on organization concerns.

This bill calls for the creation of a "Council on Critical Materials." This is a small coordinating council within the White House Executive Office to oversee the multitude of Federal materials programs (in materials research alone there are over 14 agencies and departments involved with over $1 billion in research programs). The Council will act as the President's focal point to analyze and evaluate materials policy as it would concern our energy, minerals, defense, and foreign policies, among others. It will also provide to those groups important information and data concerning materials needs, problems, and projections, particularly as they would relate to materials research and development.

It is not intended that the Council be yet another bureaucracy to impede effective action on critical materials, but to provide sorely lacking policy coordination and analysis at a sufficiently high level.

As in the past with the original materials bill I do not necessarily consider this legislation to be the final solution to our materials problems. Rather, I see it as yet one more step to insure continued attention to this important matter. I look forward to interacting further with other Members in arriving at a final and comprehensive approach to this issue.●

VOTING RIGHTS STILL IMPERILED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. BINGHAM) is recognized for 5 minutes.

● Mr. BINGHAM. Mr. Speaker, I rise this afternoon to express my full support for H.R. 3112, Judiciary Chairman RODINO's bill to extend the Voting Rights Act of 1965.

As my colleagues well know, the Voting Rights Act has been one of the most effective pieces of civil rights legislation of this century. We have witnessed a leap in minority voter registration unparalleled in our Nation's history. More than 1 million black people were added to the registration rolls in the first 7 years of Voting Rights Act coverage. In the 5-year period beginning in 1975, the last extension of the act, registration of Hispanics has increased 30 percent nationally and 20 percent in my home State of New York. Without doubt, the Voting Rights Act has been effective in insuring minorities access to the voting booth.

But as we have begun to win the fight to insure minority citizens the opportunity to register to vote, civil rights opponents have adopted less blatant methods of discrimination. Now local governments trying to prevent minorities from fully exercising their right to participate in the electoral process are using methods such as shifting from single-member to at-large districts, annexing outlying districts to dilute minority strength, and discriminatory gerrymandering of district lines. As these sorts of practices become more common, the need for effective enforcement of the preclearance provisions of section 5 of the act, which require affected jurisdictions to submit election law changes to the Justice Department for approval, becomes ever greater.

For example, we have seen a massive increase in the number of discriminatory annexations, in which jurisdictions annex outlying white districts in order to dilute the minority vote—from 9 in the first 10 years of the act to 234 in the subsequent 5 years. It seems that opponents of civil rights are ever on the prowl for new and more devious ways to deny minorities their just voice.

Moreover, since the Voting Rights Act was passed, there have been no fewer than 811 proposed State or local election changes rejected for their discriminatory effects. Even more shocking, and illustrative of the need for continuation of the act, is that of those 811 rejected changes, 538, or nearly two-thirds, were in the period from 1975 to 1980. Clearly, the need for vigorous enforcement has not subsided; indeed, if anything, it has grown more pressing.

Neither should we effectively gut the Voting Rights Act by applying the preclearance provisions of section 5 to every jurisdiction in the country. This so-called nationalization of the act is not only unnecessary, but administratively impossible. Without increased appropriations for the Justice Department's enforcement unit, which I think my colleagues will agree is unlikely, such nationalization of section 5 would render the act unenforceable, overburdening the Department with every single election change from each of the Nation's thousands of jurisdictions. Furthermore, the act already is national, since any jurisdiction—North, South, East, or West—which meets the established criteria, is covered. My home county, the Bronx, is covered, and New York State is one of 22 States covered in whole or in part by section 5. Moreover, any jurisdiction in the Nation which demonstrates a history of discrimination can be brought under the act at any time in the future.

We must also be certain that the bilingual election provisions of the act are extended. These provisions are critical to the effort to insure that language minorities are able to exercise their 14th and 15th amendment right unfettered by their unfamiliarity with written English. Only by enabling these citizens to vote can we fulfill the promises of our Constitution. Further, the bilingual provisions do not pose a disproportionate economic burden, as was demonstrated by Los Angeles County, which last year provided its citizens with a bilingual election at an additional cost of 1.2 percent of the total election cost.

President Reagan has said, and I find myself in somewhat uncharacteristic agreement, that "the spirit of the act marks this Nation's commitment to full equality for all Americans, regardless of race, color, or national origin." Since the Reagan budget cuts disproportionately injure the very people that the Voting Rights Act was intended to protect, how can we now dare to tamper with these citizens' fundamental right to vote?

In short, we cannot afford to grow complacent. The Voting Rights Act has been successful in treating the symptoms of discrimination and prejudice. But as long as these problems continue, we cannot relax our efforts to insure all our citizens their equal rights. We must not be fooled into believing that, simply because the Voting Rights Act has been successful, it is no longer necessary.●

U.S. FOREIGN POLICY LOSES A TRUSTED SERVANT AND ADVISER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. ZABLOCKI) is recognized for 5 minutes.

● Mr. ZABLOCKI. Mr. Speaker, the retirement of distinguished public servants has often been the subject of remarks on the floor of the House. This practice could not easily be given

greater meaning than today for it is both a privilege and a regrettable task to bring to the attention of the Members the retirement of Lt. Gen. Ernest Graves.

General Graves has represented the finest military tradition of service to one's country. He has devoted 36 years of his life to a number of challenging and highly important duties.

To name just a few accomplishments, General Graves has:

Directed the entire nuclear weapons program in a manner complementary to U.S. national security and arms control policies;

Established training programs for nuclear power technicians in the United States;

Supervised water resource development, management, and conservation for the U.S. Army Corps of Engineers in a manner so skillful that few of his proposed projects were ever modified by his superiors; and

Directed U.S. military assistance and sales programs as head of the Defense Security Assistance Agency (DSAA).

I directly encountered General Graves' efficiency and administrative skills in the last 3½ years in his service as Director of DSAA. Managing the multibillion-dollar military assistance and sales program is no easy task. It involves careful stewardship to help insure that sensible arms transfer programs consistent with U.S. foreign policy objectives are implemented.

General Graves accomplished this task. He realized that military assistance and sales were foreign policy tools to be used prudently if they were to be ultimately successful. He also realized that a strong, coherent rationale for military assistance and sales was necessary in a democratic society, and always sought close and continuing consultations with the Congress on a number of important but controversial issues. My many consultations with him were without exception fruitful and productive.

I offer General Graves my sincerest best wishes for a happy and healthy future in his well-earned retirement, and hope that his future endeavors are as successful as his career of military service. He has been a credit to himself, to the U.S. Army, and to the country which he has served so well.●

RECONCILIATION ACT WILL ADVERSELY AFFECT ELDERLY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. WEISS) is recognized for 5 minutes.

● Mr. WEISS. Mr. Speaker, the Gramm-Latta Omnibus Reconciliation Act is one of the most draconian measures ever approved by the House of Representatives.

This error-filled and hastily conceived measure will eliminate or markedly change numerous Federal programs which have been vital for millions of Americans.

Most Members had absolutely no idea what was contained in this 860-page bill thrown together shortly before it was to be considered on the floor. In fact, the bill passed the House with the telephone number of a staffer etched on it.

H.R. 3982 makes a mockery of the administration's repeated claim that the proposed budget cuts would not affect the truly needy because a "safety net" would remain in place to protect these individuals.

The harsh reality is that the elderly, the poor, and the disabled will suffer greatly because of the Gramm-Latta reconciliation substitute.

Representative PEPPER, the distinguished chairman of the Committee on Aging, has analyzed carefully the impact of Gramm-Latta II on the elderly.

His memorandum makes it abundantly clear that the elderly would be hard hit by the unprecedented cuts in H.R. 3982. In fact, the vast majority of older Americans will be adversely affected by Gramm-Latta II in one form or another.

The low-income elderly are likely to be victimized the most because the deepest cuts are in the programs which affect their daily lives.

The $122 minimum monthly social security payment would be wiped out for more than 3 million older Americans. Some would be eligible for supplemental security income. Many, however, will simply be forced to live on less.

The $255 lump-sum death benefit will be eliminated when there is no eligible spouse or entitled child.

A more stringent recency of work test will prevent many disabled persons from receiving social security benefits. This has far-reaching implications for older Americans because more than one-half of all disabled workers are 55 to 64 years old.

Nearly a half million persons will be hurt by the additional $600 to $700 million cut in social services programs. An estimated 250,000 aged, blind, and disabled individuals will no longer receive essential social services to enable them to live independently. About 80,000 elderly and disabled persons will lose homemaker services and Meals on Wheels.

Many elderly tenants in subsidized housing will be faced with rent hikes because the maximum payment for renters will increase from 25 percent to 30 percent of their income.

Mr. Speaker, I include Representative PEPPER's memorandum on the impact of the Budget Reconciliation Act on the elderly at this point in the RECORD:

SELECT COMMITTEE ON AGING,
CLAUDE PEPPER, CHAIRMAN,
June 30, 1981.

MEMORANDUM

To: Members, Select Committee on Aging.
From: Claude Pepper, Chairman.
Re: Impact of Budget Reconciliation Act on the Elderly.

Passage of S. 1377/H.R. 3892, the Omnibus Reconciliation Act of 1981 on June 25 and 26, will result in reductions in programs affecting the elderly. S. 1377 will reduce outlays in FY 82 by $38.1 billion and the House bill, as amended by Gramm-Latta (text of H.R. 3964), will cut FY 82 spending by $38.2 billion. Differences between the totals, although they generally do not affect the elderly (with the major exception of the Medicare and Medicaid provisions) will be worked out in conference. The following briefly outlines major amendments to programs affecting the elderly contained in both reconciliation bills.

I. SOCIAL SECURITY

Termination of minimum benefit as of April 1982 for current and future beneficiaries.

Elimination of new postsecondary student benefits after June 1982; 25 percent reduction and elimination of COLA for current beneficiaries.

Elimination of lump-sum death benefit effective October 1981 in cases where there is no eligible spouse or entitled child.

Round-down of benefit amount to nearest dime in each stage of the benefit computation (effective August 1981).

Pension reform act (ERISA) cost reimbursement to trust funds.

Elimination of trust fund payments for DI vocational rehabilitation services.

H.R. 3982 only

Termination of mothers' and fathers' benefits when child attains age 16.

Retention of retirement test exempt age at 72 until January 1983.

Delay of benefit receipt until first full month entitlement.

S. 1377 only

Require 6 out of 13 covered quarters for disability insured status.

Institute a disability "megacap".

II. MEDICARE

Repeal of temporary delay in the periodic interim payment (transfers loss from FY 82 back to FY 81).

Provide authority for HHS Secretary to impose civil money penalties for persons who file fraudulent Medicare and Medicaid claims.

Less frequent inspection of nursing homes.

H.R. 3892 only

Increased annual deductible for Medicare part B (SMI) to $70 and index in future years to reflect cost of living increases.

Imposition of a $1 per day coinsurance payment.

Increased part A hospital deductible from $228 (current law) to $258.

Shift reimbursement to the Federal Employees Health Benefits Program for people aged 65 and over who have coverage under both programs.

S. 1377 only

Repeal of certain home health benefits enacted in the 1980 reconciliation bill.

Elimination of the 8½ percent nursing home differential.

III. MEDICAID

H.R. 3982 only

Reduction in the Federal Medicaid match to states of 3 percent in FY 82, 2 percent in FY 83, and 1 percent in FY 84. States with high unemployment, a hospital cost review program, or savings due to fraud and abuse control could have up to one-third of the reductions restored.

Repeal of the requirement that states pay hospitals on the basis of reasonable cost as defined by Medicare.

Authority to use competitive bidding arrangements for the purchases of clinical laboratory services, medical devices and drugs. The freedom of choice of providers could be limited to those selected under the competitive bidding arrangements.

Options to include home and community-based care services as alternatives to long-term institutional care, if arrangements to control total long-term care expenditures are satisfactory to the Secretary. A preadmission screening program for persons seeking nursing home or ICF care would be required.

Elimination of Federal matching for excessive preoperative stays, tests which the physician did not order, and ineffective drugs.

S. 1377 only

Reduction in the minimum Federal Medicaid match to 40 percent of expenditures (current law—50 percent).

Institute a "cap" of 9 percent on aggregate Federal Medicaid payments. Increase payments in future years by GNP deflator.

Accelerated collection of unapproved state Medicaid expenditures.

IV. FOOD STAMPS

Delay cost-of-living adjustments to thrifty food plan from January 1 to April 1 in 1982, July 1 in 1983, and October 1 in 1984.

Increase benefit reduction rate from 30 percent (current law) to 31.5 percent in fiscal year 1983 and 32.5 percent in fiscal year 1984.

Restrict eligibility to households with gross incomes under 130 percent of the poverty line.

Freeze standard and shelter deductions for 1982.

Prorate monthly benefits according to date of application.

Repeal 1980 liberalizations in medical and shelter deductions for elderly households.

Elimination of boarders from eligibility.

Elimination of strikers and their households from eligibility.

S. 1377 only

Exempts elderly, blind, or disabled households from 130 percent of poverty line gross income eligibility requirement.

V. SUBSIDIZED HOUSING

Increases Section 8 tenant rent contribution from 25 percent to 30 percent of income.

Eliminates congregate housing services program.

Reduces funding of Section 8 subsidized housing from 260,000 unit level requested in the Carter budget.

H.R. 3982

Reduces Section 8 funding to a maximum of 162,500 units.

S. 1377

Reduces Section 8 funding to a maximum of 150,000 units.

VI. TITLE XX SOCIAL SERVICES

Repeal of Title XX Social Service program.

Consolidation of repealed Title XX program along with repealed child abuse, community services, and runaway youth into a single block grant funded at a 20 percent reduction from the FY 82 level provided under current law.

VII. SUPPLEMENTAL SECURITY INCOME

Use of retrospective rather than prospective computation of benefit eligibility and benefit levels.

Imposition of 180-day limit on the negotiability of SSI checks.

VIII. ENERGY ASSISTANCE

S. 1377 only

Repeal of Federally administered Low-Income Energy Assistance program authorized by the Crude Oil Windfall Profits Tax Act.

Consolidation of repealed program with repealed AFDC emergency assistance program into a new energy and emergency assistance block grant funded at an aggregate reduction of $372 million in 1982, $672 million in 1983, and $992 million in 1984 under current law levels.

H.R. 3892—Committee provision (unaffected by Gramm-Latta)

Authorization of a new Title XXI of the Social Security Act—Energy Assistance to Low Income Households. The Act would require the Secretary of HHS to make payments to states that submit and have approved state plans for low income energy assistance. Funds appropriated under the Act would remain available until spent.

H.R. 3892 (Gramm-Latta substitute)

Authorization of a new "Home-Energy Assistance Block Grant Act." The Act would authorize the Secretary of HHS to make grants to states to assist eligible households to meet the cost of home energy.

Repeal of Federally-administered Low-Income Energy Assistance program.

IX. CIVIL SERVICE/MILITARY RETIREMENT

Limit cost-of-living adjustments for Federal CSR and Military Retirement beneficiaries to once annually.

Cancellation of scheduled September 1981 COLA—future adjustments to be made in March.

X. SUMMARY OF RECONCILIATION PROVISIONS—PROGRAMS AFFECTING THE ELDERLY

REDUCTIONS IN OUTLAYS

[By fiscal years, in billions of dollars]

	1982	1983	1984
H.R. 3982 as amended by Gramm-Latta:			
Social security (OASDI)	2.041	3.656	4.455
Medicare	1.642	1.405	1.645
Medicaid	.971	.973	.890
Food stamps	1.624	2.146	2.561
Subsidized housing	.122	.352	.747
Energy assistance	.847	.947	1.067
SSI	.087	.138	.146
Title XX social services	[1]	[1]	[1]

Discrepancy between House and Senate SSI reductions is accounted for by a provision in the House bill affecting "cash-out" of Food Stamps for SSI recipients in California, Massachusetts, and Wisconsin.●

CONFERENCE REPORT ON S. 694

Mr. PRICE submitted the following conference report and statement on the bill (S. 694) to authorize supplemental appropriations for fiscal year 1981 for the Armed Forces for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, and for research, development, test, and evaluation, to increase the authorized personnel end strengths for military and civilian personnel of the Department of Defense for such fiscal year, to authorize supplemental appropriations for such fiscal year for construction at certain military installations, and for other purposes:

CONFERENCE REPORT (H. REPT. NO. 97-204)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 694) to authorize supplemental appropriations for fiscal year 1981 for the Armed Forces for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, and for research, development, test, and evaluation, to increase the authorized personnel end strengths for military and civilian personnel of the Department of Defense for such fiscal year, to authorize supplemental appropriations for such fiscal year for construction at certain military installations, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House to the text of the bill and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the House amendment insert the following:

"That this Act may be cited as the 'Department of Defense Supplemental Authorization Act, 1981'.

"TITLE I—PROCUREMENT

"AUTHORIZATION OF SUPPLEMENTAL APPROPRIATIONS

"SEC. 101. In addition to the funds authorized to be appropriated under title I of the Department of Defense Authorization Act, 1981 (Public Law 96-342; 94 Stat. 1077), funds are hereby authorized to be appropriated for fiscal year 1981 for the use of Armed Forces for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles, as authorized by law, in amounts as follows:

"AIRCRAFT

"For aircraft: for the Army, $128,000,000; for the Navy and Marine Corps, $143,600,000; for the Air Force, $716,625,000.

"MISSILES

"For missiles: for the Army, $27,000,000; for the Air Force, $205,869,000; for the Marine Corps, $10,700,000.

"NAVAL VESSELS

"For naval vessels: for the Navy, $149,900,000.

"TRACKED COMBAT VEHICLES

"For tracked combat vehicles: for the Army, $796,000,000; for the Marine Corps, $11,300,000.

"TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

"AUTHORIZATION OF SUPPLEMENTAL APPROPRIATIONS

"SEC. 201. In addition to the funds authorized to be appropriated under title II of the Department of Defense Authorization Act, 1981 (94 Stat. 1079), funds are hereby authorized to be appropriated for fiscal year 1981 for the use of the Armed Forces for research, development, test, and evaluation, as authorized by law, in amounts as follows:

"For the Army, $83,463,000.

"For the Navy (including the Marine Corps), $138,067,000.

"For the Air Force, $242,462,000.

"For the Defense Agencies, $16,936,000.

"TITLE III—ACTIVE FORCES

"INCREASE IN FISCAL YEAR 1981 ACTIVE DUTY END STRENGTHS

"Sec. 301. Section 301 of the Department of Defense Authorization Act, 1981 (94 Stat. 1082), is amended by striking out '775,300', '537,456', '188,100', and '564,500' and inserting in lieu thereof '780,000', '540,456', '190,600', and '569,000', respectively.

"TITLE IV—RESERVE FORCES

"INCREASE IN NUMBER OF MARINE CORPS RESERVISTS AUTHORIZED TO BE ON FULL-TIME ACTIVE DUTY ON SEPTEMBER 30, 1981, IN SUPPORT OF THE MARINE CORPS RESERVE

"SEC. 401. Section 401(b)(4) of the Department of Defense Authorization Act, 1981 (94 Stat. 1084), is amended by striking out '67' and inserting in lieu thereof '133'.

"TITLE V—CIVILIAN PERSONNEL

"INCREASE IN NUMBER OF CIVILIAN PERSONNEL AUTHORIZED FOR THE DEPARTMENT OF DEFENSE AS OF SEPTEMBER 30, 1981

"SEC. 501. Section 501(a) of the Department of Defense Authorization Act, 1981 (94 Stat. 1085), is amended by striking out '986,000' and inserting in lieu thereof '1,012,250'.

"TITLE VI—MILITARY CONSTRUCTION

"AUTHORIZED ARMY CONSTRUCTION PROJECTS

"SEC. 601. (a) In addition to the amounts authorized for acquisition and construction by title I of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1749), the following amount is authorized for the location specified:

"UNITED STATES ARMY, EUROPE

"Various Locations, $1,800,000.

"(b) There is authorized to be appropriated for fiscal year 1982 for the purpose of subsection (a) the sum of $1,800,000.

"AUTHORIZED NAVY CONSTRUCTION PROJECTS

"SEC. 602. (a) In addition to the amounts authorized for acquisition and construction by title II of the Military Construction Authorization Act, 1981 (94 Stat. 1752), the following amount is authorized for the location specified:

"UNITED STATES MARINE CORPS

"Marine Corps Air Station, El Toro, California, $2,000,000.

"(b) There is authorized to be appropriated for fiscal year 1981 for the purpose of subsection (a) the sum of $2,000,000.

"AUTHORIZED AIR FORCE CONSTRUCTION PROJECTS

"SEC. 603. (a) In addition to the amounts authorized for acquisition and construction by title III of the Military Construction Authorization Act, 1981 (94 Stat. 1756), the following amounts are authorized for the locations specified:

"AIR TRAINING COMMAND

"Laughlin Air Force Base, Texas, $4,700,000.

"STRATEGIC AIR COMMAND

"K. I. Sawyer Air Force Base, Michigan, $540,000.

"SPECIAL PROJECT

"Various Locations, Special Project, $50,000,000.

"(b) There is authorized to be appropriated for fiscal year 1981 for the purpose of subsection (a) the sum of $55,240,000.

AUTHORIZED CONSTRUCTION PROJECTS FOR THE DEFENSE AGENCIES

"SEC. 604. (a) In addition to the amount specified for minor construction projects by section 403 of the Military Construction Authorization Act, 1981 (94 Stat. 1761), the Secretary of Defense is authorized to accomplish minor construction projects under section 2674 of title 10, United States Code, in the amount of $900,000.

"(b) There is authorized to be appropriated for fiscal year 1981 for the purpose of subsection (a) the sum of $900,000.

"MILITARY FAMILY HOUSING

"SEC. 605. Section 510(a) of the Military Construction Authorization Act, 1981 (94 Stat. 1767), is amended—

"(1) by striking out '$276,100,000' in clause (1) and inserting in lieu thereof '$260,078,000'; and

"(2) by striking out '$1,880,760,000' in clause (2) and inserting in lieu thereof '$1,896,782,000'.

"AIR NATIONAL GUARD OF THE UNITED STATES

"SEC. 606. In addition to the amount specified in section 701(3)(A) of the Military Construction Authorization Act, 1981 (94 Stat. 1774), the Secretary of Defense may establish or develop facilities for the Air National Guard of the United States in an amount not to exceed $6,500,000.

"LIMITATIONS APPLICABLE TO USE OF FUNDS

"SEC. 607. (a) Authorizations contained in this title shall be subject to the authorizations and limitations of the Military Construction Authorization Act, 1981 (94 Stat. 1749), in the same manner as if such authorizations had been included in the Act.

"(b) For the purposes of the limitations set forth in section 603 of the Military Construction Authorization Act, 1981 (94 Stat. 1768), the amounts authorized to be appropriated for titles I through V of that Act shall be deemed to be increased, respectively, by the amounts authorized to be appropriated by sections 601 through 605.

"MODIFICATION OF PRIOR YEAR AUTHORIZATION FOR FAMILY HOUSING UNITS AT TINKER AIR FORCE BASE, OKLAHOMA

"SEC. 608. (a) Section 501(c) of the Military Construction Authorization Act, 1980 (Public Law 96-125; 93 Stat. 940), is amended by striking out "three hundred thirty-two units" in the item relating to Tinker Air Force Base and inserting in lieu thereof "two hundred units".

"(b) The authorization for construction of, or acquisition of sole interest in, family housing units at Tinker Air Force Base, Oklahoma, contained in section 501 of the Military Construction Authorization Act, 1980, as amended by subsection (a), is hereby modified to authorize construction of such family housing units on base at Tinker Air Force Base.

"TITLE VII—COMPENSATION PROVISIONS

"SUBMARINE DUTY INCENTIVE PAY

"SEC. 701. (a) Paragraphs (1) and (2) of section 301c(a) of title 37, United States Code, are amended to read as follows:

"'(1) Subject to regulations prescribed by the President, a member of the Navy who is entitled to basic pay, and (A) holds (or is in training leading to) a submarine duty designator, (B) is in and remains in the submarine service on a career basis, and (C) meets the requirements of paragraph (3) of this subsection, is entitled to continuous monthly submarine duty incentive pay in the amount set forth in subsection (b) of this section.

"'(2) Subject to regulations prescribed by the President, a member of the Navy who is entitled to basic pay but is not entitled to continuous monthly submarine duty incentive pay under paragraph (1) of this subsection is entitled to submarine duty incentive pay in the amount set forth in subsection (b) of this section for any period during which such member performs frequent and regular operational submarine duty (as defined in paragraph (5) of this subsection) required by orders.'.

"(b) Paragraph (5)(A)(i) of such section is amended by inserting 'while serving as an operator or crew member of an operational submersible (including an undersea exploration or research vehicle),' after 'to a submarine.'.

"(c) The amendments made by this section shall take effect as of January 1, 1981.

"EFFECTIVE DATE OF ACCUMULATED LEAVE AMENDMENT

"SEC. 702. The amendment made by section 10 of the Military Pay and Allowances Benefits Act of 1980 (Public Law 96-579; 94 Stat. 3368) shall apply with respect to the accumulation of leave by members of the Armed Forces who after September 30, 1979, are assigned (1) to a deployable ship or mobile unit, or (2) to other duty designated after the date of the enactment of this Act as duty qualifying for the purpose of section 701(f) of title 10, United States Code, as amended by that amendment."

And the House agree to the same.

That the Senate recede from its disagreement to the amendment of the House to the title of the bill and agree to the same.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 694) to authorize supplemental appropriations for fiscal year 1981 for the Armed Forces for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, and for research, development, test, and evaluation, to increase the authorized personnel end strengths for military and civilian personnel of the Department of Defense for such fiscal year, to authorize supplemental appropriations for such fiscal year for construction at certain military installations, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference reports:

The House amendment to the text of the bill struck out all of the Senate bill after the enacting clause and inserted a substitute text.

The Senate recedes from its disagreement to the amendment of the House with an amendment which is a substitute for the Senate bill and the House amendment, and the substitute for the Senate bill and the House amendment. The differences between the Senate bill, the House amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

PRIOR FISCAL YEAR 1981 AUTHORIZATION AVAILABLE FOR FISCAL YEAR 1981 SUPPLEMENTAL AUTHORIZATION

There are a number of programs in Titles I and II of the fiscal year 1981 Department of Defense Supplemental authorization request for which funds were previously authorized in the Department of Defense Authorization Act, 1981 (Public Law 96-342) but for which funds were not appropriated in the Department of Defense Appropriations Act, 1981 (Public Law 96-527).

The Senate version of the Department of Defense supplemental authorization bill provided, in effect, a reauthorization for each such program. The House amendment contained no authorization in all but one case for such programs. This was not because such programs lack the full support of the House, but, rather, because the House has determined that authorization provided by the Department of Defense Authorization Act, 1981, is still available.

The Senate recedes to the House.

This action does not in any way suggest anything but full support for any such programs where prior authorization is available. For example, the conferees fully support the availability of $89.0 million for the Battleship *New Jersey*, BB-62, $15.2 million for the LSD-41 long lead, and $57.1 million for the FFG-7 and LAMPS III (cost growth) in Navy procurement.

TITLE I—PROCUREMENT

The seventeen money and one language differences contained in title I, procurement, were resolved by the conference, as follows:

AIRCRAFT

Navy and Marine Corps

The supplemental budget request for Navy and Marine Corps aircraft procurement was $143.6 million. The Senate bill contained an authorization in the amount of $47.6 million. The House amendment contained an authorization in the amount requested.

The conferees recommend an authorization for Navy and Marine Corps aircraft procurement in the amount of $143.6 million.

The Senate recedes.

F/A-18 Aircraft (Hornet)

The supplemental request contained $95.9 million to fully fund the 60 F/A-18 aircraft that were previously authorized for fiscal year 1981. The Senate bill provided no additional authorization for procurement of the F/A-18 aircraft. The House amendment included the $95.9 million requested.

The conferees recommend an additional authorization in the amount of $95.9 million for procurement of F/A-18 aircraft.

The Senate recedes.

Air Force

The supplemental budget request for Air Force aircraft procurement was $740.625 million. The Senate bill contained an authorization of $716.625 million. The House amendment contained an authorization of $702.825 million.

The conferees recommend an authorization for Air Force aircraft procurement of $716.625 million.

The House recedes.

F-16 Aircraft (Falcon)

No additional authorization was requested for advance procurement of F-16 aircraft. The Senate bill contained no additional authorization for advance procurement of additional F-16 aircraft. The House amendment contained $65.7 million for advance procurement of 60 additional F-16's in fiscal year 1982, thereby sustaining a production rate of 180 aircraft per year.

The conferees found that a production rate greater than 120 aircraft per year proposed for fiscal year 1982 and following years would result in considerable savings over the planned life of the program due to economies of scale. The conferees agreed to an additional authorization in the amount of $65.7 million for advance procurement for the F-16 aircraft. Of the amount authorized, $14.6 million shall be derived from prior authorization.

The Senate recedes with an amendment.

Modification of Air Force Aircraft

The supplemental budget request contained $82.3 million for the modification of Air Force aircraft, including a request for $43.0 million to restore modification funds that the Air Force had planned to transfer to other accounts by reprogramming action.

The Senate bill contained $43.0 million. The House amendment contained no authorization based on disapproval of the reprogramming action.

An Air Force RC-135 reconnaissance aircraft was destroyed in an accident subsequent to the submission of the fiscal year 1981 supplemental budget request. On April 7, 1981, the President submitted an amendment to the supplemental budget request for an authorization of $24.0 million for a modification program to replace this specially-configured aircraft. The budget amendment was received too late for action by the Senate. The House amendment included an authorization of $24.0 million as requested.

The Senate recedes.

The conferees recommend the disapproval of the $43.0 million requested. The conferees recommend an additional authorization for Air Force aircraft modifications in the amount of $39.3 million, including $24.0 million for the RC-135 modification and $15.3 million requested for various other aircraft modifications.

The Senate recedes.

Air Force Aircraft Spares and Repair Parts

The supplemental budget request included $605.2 million for Air Force aircraft spares and repair parts. The Senate bill provided an authorization in the amount requested. The House amendment provided an authorization of $544.7 million—a reduction of $60.5 million. The conferees recommend an authorization of $605.2 million. Of the amount authorized, $32.1 million shall be derived from prior authorization.

MISSILES

Navy

BGM-109 Cruise Missile (Tomahawk)

No supplemental authorization was requested by the Administration for BGM-109 (Tomahawk) cruise missile procurement. The Senate bill contained no authorization for this item. The House amendment provided an authorization in the amount of $41.2 million.

The conferees recommend no additional fiscal year 1981 authorization for BGM-109 (Tomahawk) cruise missile procurement.

The House recedes.

Air Force

The supplemental budget request for Air Force missiles was $209.4 million. The Senate bill contained an authorization of $228.3 million—an increase of $18.9 million. The House amendment contained an authorization of $205.9 million.

The conferees recommend an authorization of $205.9 million.

The Senate recedes.

National Foreign Intelligence Program

The supplemental budget request contained $10.5 million for the national foreign intelligence program. The Senate bill contained an authorization of $29.4 million. The House amendment contained an authorization of $7.0 million ($3.5 million was transferred to Research, Development, Test and Evaluation, Air Force).

The conferees recommend an authorization of $7.0 million for the national foreign intelligence program.

The Senate recedes.

NAVAL VESSELS

The supplemental budget request contained $317.7 million for naval vessels.

The Senate bill contained an authorization of $172.1 million for naval vessels. The House amendment contained an authorization of $139 million.

The conferees recommend an authorization totalling $149.9 million as follows:

Program:	*(Millions)*
CG-47 Aegis cruiser	$129.0
LAMPS III cost growth (CG-47)	20.9
Total, naval vessels	$149.9

CG-47 Aegis Cruiser

The supplemental budget request contained $129.0 million for the CG-47 Aegis Cruiser.

The Senate bill recommended authorization of $129.0 million for the CG-47.

The House amendment recommended authorization of $129.0 million for the CG-47 program by transfer of prior authorization from other programs.

The House recedes.

LAMPS III Cost Growth (CG-47)

The supplemental budget request contained $20.9 million for LAMPS III cost growth.

The Senate bill recommended new authorization of $20.9 million for LAMPS III.

The House amendment recommended authorization of $20.9 million for the LAMPS III program by transfer of prior authorization from other programs.

The House recedes.

BB-62 U.S.S. *New Jersey* (Reactivation)

The supplemental budget request contained $89.0 million for the battleship U.S.S. *New Jersey* (BB-62) reactivation.

The Senate bill recommended new authorization of $89.0 million for the battleship *New Jersey* reactivation.

The House amendment did not recommend additional authorization for reactivation of the battleship *New Jersey,* since prior authorization is still available in the Department of Defense Authorization Act, 1981 (Public Law 96-342).

The Senate recedes.

CV-34 U.S.S. *Oriskany* (Reactivation)

The supplemental budget request contained $139.0 million for reactivation of the aircraft carrier, U.S.S. *Oriskany* CV-34).

The Senate bill did not recommend authorization for the aircraft carrier, U.S.S. *Oriskany* (CV-34) reactivation.

The House amendment recommended authorization of $139.0 million for reactivation of the aircraft carrier, U.S.S. *Oriskany* (CV-34).

The House recedes.

LSD-41 Landing Ship Dock

The supplemental budget request contained $21.8 million for the LSD-41 program. The request was predicated on a planned reprogramming of funds from the LSD-41 program. The reprogramming was not completed.

The Senate bill recommended $15.2 million for long lead funding for the LSD-41.

The House amendment did not provide additional authorization for the LSD-41.

The Senate recedes.

LAMPS III Cost Growth (FFG-7)

The supplemental budget request contained $57.1 million for FFG-7 LAMPS III cost growth.

The Senate bill recommended additional authorization of $57.1 million for the FFG-7 LAMPS III program.

The House amendment did not recommend additional authorization for the FFG-7 LAMPS III cost growth.

The Senate recedes.

SSN-688 Nuclear Attack Submarine

The supplemental budget request contained a net reduction of $0.8 million for the SSN-688 program.

The Senate bill recommended additional authorization of $21.0 million for cost growth in the SSN-688 program, offset by a recommended reduction of $21.8 million for the SSN-688 program, for a net reduction of $0.8 million.

The House amendment did not contain a recommended reduction of authorization for the SSN-688 program.

The Senate recedes.

Reductions for Inflation and Efficiencies

The supplemental budget request included a reduction of $138.3 million to account for revised estimates of inflation and efficiencies.

The Senate bill recommended reduction in authorization of $138.3 million attributed to revised inflation indices and efficiencies.

The House amendment did not recommend a reduction in authorization to account for revised estimates of inflation and efficiencies.

The Senate recedes.

TRACKED COMBAT VEHICLES

Army

The supplemental budget request for Army tracked combat vehicles was $796.0 million. The Senate bill contained an authorization for the amount requested. The House amendment contained an authorization of $781.0 million.

The conferees recommend an authorization for Army tracked combat vehicles in the amount of $791.0 million.

The House recedes.

M-1 Tank

The supplemental budget request contained $337.5 million to provide the additional authorization necessary to permit full funding of the 569 M-1 tanks that were authorized for procurement in fiscal year 1981. The amount requested includes $278.1 million for tank procurement and $59.4 million for essential items not directly related to the additional tanks. The Senate bill contained authorization of $337.5 million—the amount requested—but restricted the expenditure of $336.7 million of these funds in section 101(b) until the Secretary of Defense certified to the Committees on Armed Services of the Senate and House of Representatives that (1) results of the reliability, availability, maintainability and durability (RAM-D) testing program for such tank would not present an unacceptable level of risk in terms of satisfying the Army's operational mission requirements, and (2) such results support the procurement of such tanks in a number greater than the 360 for which funds were appropriated prior to the date of the enactment of this supplemental legislation.

The House amendment contained an authorization of $327.5 million, a reduction of $10 million.

The conferees recommend an authorization of $337.5 million and deletion of restrictive language from the bill. However, the conferees direct that $278.1 million not be obligated or expended until the Secretary of Defense advises the Committees on Armed Services of the Senate and the House in writing that the transmission durability performance results in the RAM-D testing to date do not indicate an unacceptable level of risk in terms of satisfying the Army's operational mission requirements.

The House recedes on the amount authorized. The Senate recedes on Section 101(b) in light of the above restrictive language in this Statement of Managers.

M-2 Fighting Vehicle System

The supplemental budget request contained $158.5 million for the M-2 fighting vehicle system procurement (100 units). The Senate bill contained an authorization in the amount requested. The House amendment provided an authorization in the amount of $153.5 million—a $5.0 million reduction.

The conferees recommend an authorization in the amount of $158.5 million.

The House recedes.

TITLE II—RESEARCH, DEVELOPMENT, TEST AND EVALUATION

GENERAL

The fiscal year 1981 supplemental authorization bill included a request for $598,300,000 for research, development, test and evaluation. As shown in the following table, the conferees agreed on a total of $480,928,000 which is $117,372,000 less than the requested amount.

R.D.T. & E. SUMMARY

[In thousands of dollars]

	Fiscal year 1981 request	Authorization Public Law 96-342	Appropriation Public Law 96-527	Supplemental request	House	Senate	Conference
Army	3,234,483	3,248,005	3,086,757	79,500	83,963	79,500	83,463
Navy	[1] 4,865,639	[1] 5,112,775	4,867,212	146,900	96,567	139,900	138,067
Air Force	7,033,393	7,159,857	6,774,011	330,900	211,062	339,200	242,462
Defense agencies	[2] 1,344,800	[2] 1,367,802	[2] 1,296,702	41,000	16,936	41,000	16,936
Total	16,478,315	16,888,439	16,024,682	598,300	408,528	599,600	480,928

[1] Includes $2,760,000 for special foreign currency.
[2] Includes $42,100,000 for Director, Test and Evaluation.

The details of the twenty-four money differences in Title II and the recommendations adopted by the conferees are reflected in the following tables.

Two programs in the Air Force merit comment with respect to the source of the authorization provided. The Air Force "Special Programs" program had $800,000 in prior authorization remaining from the Department of Defense Authorization Act, 1981 (Public Law 96-342), and the conferees agreed to authorize an additional $2,200,000 thereby providing the $3,000,000 authorization requested. The Air Force request "Special Activities" program had $14,078,000 in prior authorization remaining, and the conferees agreed to authorize an additional $622,000, for a total of $14,700,000. The amount recommended would be sufficient to provide the $11,200,000 requested plus an additional $3,500,000 authorization required

to accommodate a transfer of $3,500,000 from the Air Force missile procurement account to the "Special Activities" RDT&E program. The $3,500,000 was incorrectly identified as a procurement activity in the supplemental budget submission and, at the request of the Administration, was moved to the RDT&E account.

TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION SUMMARY OF CONFERENCE ACTION: ARMY—FISCAL YEAR 1981 SUPPLEMENTAL

[In thousands of dollars]

Description	Amended budget request	Senate—S. 694 as passed Apr. 7, 1981	House—S. 694 (H.R. 2614) as passed June 23, 1981	Change from Senate	Conference action

ITEMS OF SPECIAL INTEREST

B–52 Squadrons

The Senate bill included the full authorization request of $20 million for Electro-Magnetic Pulse (EMP) hardening of the B–52 aircraft. The House amendment did not contain authorization for the program.

The conferees agreed to authorize $20 million for this program but in so doing directed that none of the funds could be obligated or expended until the President presents to the Congress a comprehensive bomber modernization program in accordance with the requirement in section 204 of the Department of Defense Authorization Act, 1981 (Public Law 96–342).

The House recedes.

Grass blade/protective systems

The Senate bill contained the $11 million requested for the Army Grass Blade program and the $10 million requested for the Air Force Protective Systems program. The House amendment did not contain authorization for either of these programs.

The conferees agreed to authorize $8 million for the Grass Blade program and the $10 million requested for the Protective Systems program. The conferees further agreed that specific congressional concerns over these programs would be provided to the Secretary of Defense under separate correspondence.

The House recedes with an amendment.

The conferees are aware that amounts in excess of that authorized have been appropriated for RDT & E accounts that could be identified as available to be used for the Army's Grass Blade program, as well as the Navy's Advanced Lightweight Torpedo (ALWT) and the Air Force's Night Attack (LANTIRN) programs. However, after careful consideration of the merits of each such program compared to other programs, the conferees are in agreement that the Department of Defense must not obligate or expend funds in amounts above that authorized for these programs as identified in the tables above.

Ground-launched cruise missile

The Senate bill contained the full authorization request of $41.4 million for the Air Force Ground-Launched Cruise Missile (GLCM) program. The House amendment contained no authorization for this program.

The conferees recognize the importance of the Ground-Launched Cruise Missile program to the overall North Atlantic Treaty Organization theater nuclear force modernization program. The conferees do not wish to delay the Initial Operational Capability for GLCM and, accordingly, recommended authorization of the budget request of $41.4 million. However, none of the funds authorized are to be obligated or expended until the Secretary of Defense provides to the Committees on Armed Services of the Senate and the House of Representatives a more complete justification for the requested funds together with a plan to bring GLCM development costs under control.

The House recedes.

Low altitude airfield attack system (JP–233)

The Senate bill contained the full authorization request of $66 million for the Low Altitude Airfield Attack System (LAAAS) program. The House amendment did not contain authorization for the program and directed that the LAAAS program be terminated.

The Senate recedes.

Medium-range-air-to-surface missile (MRASM) Harpoon missile

The Senate bill contained the full authorization request of $14 million for the Air Force Medium-Range-Air-to-Surface Missile (MRASM). The House amendment contained the amount requested for the Air Force program but also reduced the Navy Harpoon missile program by $14 million. The House amendment supported continuation of the MRASM program with the understanding that both a land attack and a Navy aircraft compatible imaging infrared anti-ship variant would be developed, but did not support the development of an imaging infrared guidance and control system for the Harpoon missile.

The Senate recedes.

TITLE III—ACTIVE FORCES

The active duty military strength for the Army in the Senate bill and the House amendment differed by a total of 4,700. There was no disagreement on the Navy, Marine Corps or Air Force strength. The conferees' agreement is summarized in the following table:

	House	Senate	Conference
Army	780,000	775,300	780,000
Navy	540,456	540,456	540,456
Marine Corps	190,600	190,600	190,600
Air Force	569,000	569,000	569,000
Total	2,080,056	2,075,356	2,080,056

The conferees agreed to the increase in the Army strength of 4,700 contained in the House amendment to permit the Army to recruit 2,000 more prior service personnel, 2,000 more non-prior service high school graduates, and 700 additional officers. In recruiting non-prior service accessions, the conferees expect the Army to use the additional strength approved only for high school graduates.

The Senate recedes.

TITLE V—CIVILIAN PERSONNEL

The Department of Defense requested an adjusted end strength for fiscal year 1981 of 1,013,900.

The Senate bill authorized an end strength of 1,010,600.

The House amendment authorized an end strength of 1,013,900—a difference of 3,300.

The conferees agreed to provide an adjusted authorization for civilian personnel in fiscal year 1981 of 1,012,250—a reduction of 1,650 from the Administration request.

TITLE VI—MILITARY TRAINING STUDENT LOADS

The Senate bill and the House amendment differed only on the military training student load for the Air National Guard. The Senate bill authorized a training load of 2,509—579 above the current authorization. The House amendment left the current authorization unchanged.

The Senate recedes.

TITLE VII—COMPENSATION PROVISIONS

CLARIFICATIONS TO SUBMARINE CAREER INCENTIVE PAY (SEC. 701)

The Senate bill contained a provision (sec. 801) that would clarify the authority to pay submarine career incentive pay to personnel who serve on operational, self-propelled submersibles, including undersea exploration and research vehicles, and to personnel who are not designated as submariners, but who, on a continual and regular basis, perform operational submarine duty. The provision is consistent with the original intent of the legislation and, with regard to the latter category of personnel, would provide submarine career incentive pay to these individuals only for that period of time that the member is actually assigned to the submarine for duty.

The House amendment contained no similar provision.

The House recedes.

ACCRUED LEAVE (SEC. 702)

Last year the Congress authorized accrual of up to 90 days of leave for individuals who were in a deployed status and who were unable to utilize that leave before the end of the fiscal year. Leave in excess of 60 days is normally lost at the end of each fiscal year. The effective date of that provision (January 1, 1981) failed to cover individuals who had been deployed prior to that date. The Senate bill contained a provision that would establish the effective date as October 1, 1979, and that would cover all personnel who have been deployed to the Indian Ocean.

The House amendment contained no similar provision.

The House recedes.

GENERAL LEAVE

Mr. ANNUNZIO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the joint resolution (H.J. Res. 223), passed earlier.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. GONZALEZ, for 60 minutes, today.

(The following Members (at the request of Mr. WEBER of Ohio) to revise and extend their remarks and include extraneous material:)

Mr. FRENZEL, for 30 minutes, today.

Mr. LUNGREN, for 60 minutes, today.

Mr. CARMAN, for 30 minutes, July 28, 1981.

Mr. DANNEMEYER, for 30 minutes, today.

Mr. NAPIER, for 10 minutes, July 28, 1981.

(The following Members (at the request of Mr. DONNELLY) to revise and extend their remarks and include extraneous material:)

Mr. NELSON, for 5 minutes, today.

Mr. ST GERMAIN, for 10 minutes, today.

Mr. SHAMANSKY, for 5 minutes, today.

Mr. SAM B. HALL, JR., for 5 minutes, today.

Mr. CROCKETT, for 10 minutes, today.

Mr. LAFALCE, for 30 minutes, today.

Mr. FUQUA, for 5 minutes, today.

Mr. BINGHAM, for 5 minutes, today.

Mr. ZABLOCKI, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. WEISS, for 5 minutes, today.

Mr. ALEXANDER, for 60 minutes, on July 28.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. GONZALEZ, and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the CONGRESSIONAL RECORD and is estimated by the Public Printer to cost $2,400.

(The following Members (at the request of Mr. WEBER of Ohio) and to include extraneous matter:)

Mr. YOUNG of Alaska.

Mr. ROBERTS of South Dakota.

Mr. DERWINSKI in two instances.

Mr. COLLINS of Texas in two instances.

Mr. HOPKINS.

Mr. LEBOUTILLIER.

Mr. KEMP.

Mr. ROTH.

Mr. RUDD.

Mrs. MARTIN of Illinois.

Mr. GUNDERSON in two instances.

Mr. SKEEN in two instances.

Mr. SHUMWAY.

Mr. DORNAN.

Mr. DAUB.

Mr. BEARD.

Mr. BROWN of Ohio.

Mr. JEFFORDS.

Mr. BEREUTER.

Mr. DREIER in two instances.

(The following Members (at the request of Mr. DONNELLY) and to include extraneous matter:)

Mr. GAYDOS in two instances.

Mr. HOYER.

Mr. FORD of Michigan.

Mr. UDALL.

Mr. BARNES.

Mr. HAWKINS.

Mr. ROSE.

Mr. EDGAR in two instances.

Mr. FRANK.

Mr. HERTEL.

Mr. MARKEY.

Mr. CONYERS.

Mr. STARK.

Mr. IRELAND.

Mr. PEASE in two instances.

Mr. WATKINS.

Mr. RAHALL.

Mr. MATSUI.

Mr. GIBBONS.

Mr. SWIFT.

Mr. ERTEL.

Mr. ANDERSON in 10 instances.

Mr. GONZALEZ in 10 instances.

Mr. BROWN of California in 10 instances.

Mr. ANNUNZIO in six instances.

Mr. JONES of Tennessee in 10 instances.

Mr. BONER of Tennessee in five instances.

Mr. MCDONALD.

Mr. WEISS in two instances.

Mr. HARKIN.

SENATE JOINT RESOLUTIONS REFERRED

Joint resolutions of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S.J. Res. 84. Joint resolution to proclaim March 19, 1982, "National Energy Education Day"; to the Committee on Post Office and Civil Service.

S.J. Res. 94. Joint resolution to designate October 10, 1981, as "National Jogging Day"; to the Committee on Post Office and Civil Service.

SENATE ENROLLED JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to an enrolled joint resolution of the Senate of the following title:

S.J. Res. 28. Joint resolution designating the week beginning March 7, 1982, as "Women's History Week."

ENROLLED JOINT RESOLUTION SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled an enrolled bill of the House of the following title, which was thereupon signed by the Speaker:

H.J. Res. 308. Joint resolution making an urgent supplemental appropriation for the Department of Health and Human Services for the fiscal year ending September 30, 1981.

ADJOURNMENT

Mr. GONZALEZ. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 7 o'clock and 45 minutes p.m.), the House adjourned until tomorrow, Tuesday, July 28, 1981, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1894. A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend the Perishable Agricultural Commodities Act, 1930, to increase the ceilings on license fees, remove the exemption from branch fees, and increase the level of damages claimed which entitles a respondent to an opportunity for oral hearing; to the Committee on Agriculture.

1895. A letter from the Assistant Secretary of the Army (Installations, Logistics and Financial Management), transmitting notice of the proposed conversion to contractor performance of the laundry activity at Fort Bragg, N.C., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

1896. A letter from the Assistant Secretary of the Air Force (Research, Development and Logistics), transmitting notice of the proposed conversion to contractor performance of the family housing maintenance function at Minot Air Force Base, N. Dak., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

1897. A letter from the Chief, Legislation Division, Office of Legislative Liaison, Department of the Air Force, transmitting the semiannual report covering the period ended June 30, 1981, on Air Force experimental, developmental, and research contracts of $50,000 or more, by company, pursuant to 10 U.S.C. 2357; to the Committee on Armed Services.

1898. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Army's proposed sale of defense articles and services to Saudi Arabia (Transmittal No. 81-73), pursuant to section 813 of Public Law 94-106; to the Committee on Armed Services.

1899. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact of U.S. readiness of the Army's proposed sale of defense equipment to Greece (Transmittal No. 81-75), pursuant to section 813 of Public Law 94-106; to the Committee on Armed Services.

1900. A letter from the Assistant Secretary of the Treasury for Legislative Affairs, transmitting reports on the adequacy of International Monetary Fund resources and IMF borrowing from oil exporting countries and the private markets; possible IMF incentives to promote direct recycling by oil exporting countries; IMF cooperation with commercial banks; and proposals for a substitution account in the IMF, pursuant to sections 34 and 35 of the Bretton Woods Agreements Act, as amended (94 Stat. 1553); to the Committee on Banking, Finance and Urban Affairs.

1901. A letter from the Secretary of Energy, transmitting a report on the Administration's analysis of the issues involved in responding to oil supply interruptions; to the Committee on Energy and Commerce.

1902. A letter from the Secretary, Federal Energy Regulatory Commission, transmitting a proposed regulation providing for an exemption from incremental pricing, pursuant to section 206(d)(2) of the Natural Gas Policy Act of 1978; to the Committee on Energy and Commerce.

1903. A letter from the Deputy Director, Defense Security Assistance Agency, transmitting a report on a proposed memorandum of understanding between the United States and the United Kingdom of Great Britain and Northern Ireland to establish a joint program for the development, production, and support of the AV-8B/Harrier GR5 (Transmittal No. 03-81), pursuant to section 27(c) of the Arms Export Control Act; to the Committee on Foreign Affairs.

1904. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense articles to the Yemen Arab Republic (Transmittal No. 81-61), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

1905. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment to Saudi Arabia (Transmittal No. 81-72), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

1906. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense articles and services to Saudi Arabia (Transmittal No. 81-73), pursuant to section 36(b) to the Arms Export Control Act; to the Committee on Foreign Affairs.

1907. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment to Greece (Transmittal No. 81-75), pursuant to section 36(b) of the Arms Export Control Act, together with certification that the sale is consistent with the principles contained in section 620C(b) of the Foreign Assistance Act, pursuant to section 620c(d) of the act; to the Committee on Foreign Affairs.

1908. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment to Italy (Transmittal No. 81-77), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

1909. A letter from the Assistant Secretary for Health, Department of Health and Human Services, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552(o); to the Committee on Government Operations.

1910. A letter from the Acting Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders entered in cases in which the authority contained in section 212(d)(3) of the Immigration and Nationality Act was exercised in behalf of certain aliens, pursuant to section 212(d)(6) of the act; to the Committee on the Judiciary.

1911. A letter from the Executive Director, Reserve Officers Association of the United States, transmitting the audit report on the association for the year ended March 31, 1981, pursuant to section 3 of Public Law 88-504; to the Committee on the Judiciary.

1912. A letter from the Vice Chairman, Merit Systems Protection Board, transmitting the first annual report on significant actions of the Office of Personnel Management, pursuant to 5 U.S.C. 1209(b); to the Committee on Post Office and Civil Service.

1913. A letter from the Acting Under Secretary of Energy, transmitting notice of a delay in submission of the comprehensive wind energy program management plan required by section 4(b) of Public Law 96-345; to the Committee on Science and Technology.

1914. A letter from the Special Assistant, Office of the Secretary of Defense, transmitting a report on Defense Department procurement from small and other business firms for October 1980 through February 1981, pursuant to section 10(d) of the Small Business Act, as amended; to the Committee on Small Business.

1915. A letter from the General Counsel of the Department of Defense, transmitting a draft of proposed legislation to authorize the establishment of a senior cryptologic executive service and merit pay and awards system within the National Security Agency and to make necessary amendments to title 5, United States Code; jointly, to the Committees on Post Office and Civil Service and the Permanent Select Committee on Intelligence.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 4053. A bill to amend section 21 of the Act of February 25, 1920, commonly known as the Mineral Leasing Act; with an amendment (Rept. No. 97-202). Referred to the Committee of the Whole on the State of the Union.

Mr. GAYDOS: Committee on House Administration. House Concurrent Resolution 106. Concurrent resolution to provide for the printing of the brochure entitled "How Our Laws Are Made" (Rept. No. 97-203). Referred to the House Calendar.

Mr. PRICE: Committee of conference. Conference report on S. 694 (Rept. No. 97-204). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BUTLER:

H.R. 4271. A bill to provide for the voting rights of individuals within the jurisdiction of the United States; to the Committee on the Judiciary.

By Mr. CONYERS:

H.R. 4272. A bill to amend title 18 of the United States Code to provide for the assistance of counsel before Federal grand juries in certain cases; to the Committee on the Judiciary.

By Mr. LEACH of Iowa (for himself, Mr. PURCELL, and Mr. REGULA):

H.R. 4273. A bill to amend the Internal Revenue Code of 1954 to encourage economic growth through reduction of the tax rates for individual taxpayers, acceleration of capital cost recovery of investment in plant, equipment, and real property, and incentives for savings, and for other purposes; to the Committee on Ways and Means.

By Mr. LEBOUTILLIER:

H.R. 4274. A bill to amend the Internal Revenue Code of 1954 to allow individuals a deduction for commuting expenses; to the Committee on Ways and Means.

By Mr. MCCLORY:

H.R. 4275. A bill to amend section 504 of title 18, United States Code, to modify the restrictions placed upon the publishing of certain Government instruments; to the Committee on the Judiciary.

By Mr. PRICE (for himself and Mr. DICKINSON) (by request):

H.R. 4276. A bill to amend title 10, United States Code, to repeal the requirement that the Secretary of Defense request suggestions from certain military and civilian retirees for methods to improve procurement policies; to the Committee on Armed Services.

By Mr. SHAMANSKY:

H.R. 4277. A bill to make the exclusion of amounts received under a qualified group

legal services plan permanent; to the Committee on Ways and Means.

By Mr. YOUNG of Alaska:

H.R. 4278. A bill to provide for the transfer of the Alaska Railroad to the State of Alaska, and for other purposes; to the Committee on Energy and Commerce.

By Mr. ZEFERETTI:

H.R. 4279. A bill to provide assistance for the construction, acquisition, and renovation of State and local prison facilities, and for other purposes; to the Committee on the Judiciary.

By Mr. DREIER:

H.R. 4280. A bill to direct the U.S. Postal Service to provide and sell a postage stamp issue to honor all American servicemen and civilians still unaccounted for as a result of the conflict in Indochina; to the Committee on Post Office and Civil Service.

By Mr. FUQUA (for himself, Mr. GLICKMAN, Mr. WALGREN, Mr. BROWN of California, Mr. SANTINI, Mr. ROE, Mrs. BOUQUARD, Mr. FLIPPO, Mr. YOUNG of Missouri, Mr. MCCURDY, Mr. DYMALLY, Mr. BEDELL, Mr. BENNETT, Mr. BREAUX, Mr. DAN DANIEL, Mr. RAHALL, Mr. HOLLENBECK, Mr. FORSYTHE, Mr. RITTER, Mr. YOUNG of Alaska, and Mr. LUJAN):

H.R. 4281. A bill entitled: "Critical Materials Act of 1981"; to the Committee on Science and Technology.

By Mr. LONG of Maryland:

H.R. 4282. A bill to amend the Education of the Handicapped Act to provide that certain handicapped children shall be entitled to a free appropriate public education after they attain 21 years of age; to the Committee on Education and Labor.

By Mr. VENTO:

H. Res. 197. Resolution regarding minimum social security benefits; to the Committee on Rules.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

163. By the SPEAKER: Memorial of the Legislature of the State of Alaska, relative to the Voting Rights Act; to the Committee on the Judiciary.

164. Also, memorial of the Legislature of the State of Alaska, relative to Vietnam war dead; to the Committee on Veterans' Affairs.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 4: Mr. YOUNG of Florida and Mr. WHITEHURST.

H.R. 52: Mr. MYERS, Mr. RITTER, and Mr. DENARDIS.

H.R. 1250: Mr. STOKES, Mr. MARRIOTT, Mr. ASHBROOK, Mr. WAMPLER, Mr. PASHAYAN, and Mr. DREIER.

H.R. 1648: Mr. HUNTER.

H.R. 1921: Mr. VENTO.

H.R. 1990: Mr. ROSENTHAL, Mr. PEYSER, Mr. DYMALLY, Mr. ECKART, Mr. ADDABBO, Mr. DANIELSON, Mr. DANNEMEYER, Mr. VENTO, Mr. MURPHY, Mr. EDGAR, MR. WOLPE, Mr. MOFFETT, Mr. OTTINGER, Mr. BADHAM, Mr. CROCKETT, Mr. PATTERSON, Mr. WALGREN, Mr. LANTOS, Mr. LAFALCE, Mr. MCCLOSKEY, Mr. MATSUI, and Mr. ASPIN.

H.R. 2973: Mr. SCHEUER.

H.R. 3112: Mr. BINGHAM, Mrs. CHISHOLM, Mr. DUNN, Mr. MARKEY, Mr. MICA, Mr. SWIFT, and Mr. DYMALLY.

H.R. 3575. Mr. AUCOIN, Mr. ANNUNZIO, Mr. CHAPPIE, Mr. FORSYTHE, Mr. JEFFORDS, Mr. KILDEE, Mr. LEHMAN, Mr. MOTTL, and Mr. SEIBERLING.

H.R. 3607: Mr. GRAY.

H.R. 4057: Mr. BONIOR of Michigan, Mr. EDGAR, Mr. HYDE, and Mr. YOUNG of Alaska.

H.R. 4164: Mr. DAUB, Mr. CHAPPELL, Mr. RINALDO, and Mr. BEDELL.

H.J. Res. 124: Mr. ARCHER, Mr. BEREUTER, Mr. BIAGGI, Mr. CARMAN, Mr. COATS, Mr. DANIELSON, Mr. DWYER, Mr. GRISHAM, Mr. LENT, Mr. MCDADE, Mr. MOORHEAD, Mr. PICKLE, Mr. PEPPER, Mr. PURSELL, Mr. SABO, Mr. SHELBY, Mr. SHUMWAY, Mr. SMITH of Alabama, Mr. SOLARZ, Mr. STANGELAND, Mr. WAMPLER, Mr. WHITTEN, Mr. WYLIE, Mr. YATRON, Mr. MCCLORY, Mr. STRATTON, Mrs. BYRON, Mr. KRAMER, Mr. AUCOIN, Mr. RITTER, Mr. BENNETT, Mr. BREAUX, Mr. BROWN of California, Mr. BROWN of Colorado, Mr. CHENEY, Mr. CLAUSEN, Mr. COLLINS of Texas, Mr. DELLUMS, Mr. DICKINSON, Mr. DOWDY, Mr. EDWARDS of California, Mr. FOGLIETTA, Mr. GRADISON, Mr. GRAY, Mr. GREEN, Mr. HANCE, Mr. HARTNETT, Mr. HATCHER, Mr. HIGHTOWER, Mr. HOLLAND, Mr. HOLLENBECK, Mr. HOWARD, Mr. HUBBARD, Mr. JOHNSTON, Mr. KAZEN, Mr. LOTT, Mr. MCCURDY, Mr. MAVROULES, Mr. MOLINARI, Mr. MOORE, Mr. MOTTL, Mr. MURTHA, Mr. NICHOLS, Mr. O'BRIEN, Mr. PATMAN, Mr. RICHMOND, Mr. SEIBERLING, Mr. TRAXLER, Mr. WHITEHURST, Mr. YOUNG of Missouri, Mr. BEDELL, Mr. SHANNON, Mr. SKELTON, Mr. SMITH of Oregon, Mrs. SNOWE, Mr. SPENCE, Mr. STANTON of Ohio, Mr. TRIBLE, Mr. UDALL, Mr. WEBER of Ohio, Mr. WHITE, Mr. WORTLEY, and Mr. WYDEN.

H.J. Res. 125: Mr. MARRIOTT

H.J. Res. 199: Mr. YOUNG of Missouri, Mr. PERKINS, Mr. SCHEUER, Mr. FAZIO, Mr. FAUNTROY, Mr. PEPPER, Mr. RAHALL, Mrs. CHISHOLM, Mr. WINN, Mr. AKAKA, Mr. GORE, Mr. SUNIA, Mr. CONYERS, Mr. VENTO, Mr. FOGLIETTA, Mr. SIMON, Mr. KRAMER, and Mr. GILMAN.

H.J. Res. 220: Mr. BENJAMIN, Mr. FOWLER, Mr. ROBERT W. DANIEL, JR., Mr. COUGHLIN, and Mr. HOYER.

H.J. Res. 223: Mr. LANTOS, Mr. WASHINGTON, and Mr. WYLIE.

H. Res. 124: Mr. ROE.

H. Res. 176: Mr. WILSON.

PETITIONS, ETC.

Under clause 1 of rule XXII,

149. The SPEAKER presented a petition of the Citizens Advisory Committee, Department of Elder Affairs, Commonwealth of Massachusetts, Boston, relative to social security; which was referred to the Committee on Ways and Means.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 3603

By Mr. FRANK:

—Page 60, line 4, strike out "and sunflower".

Page 60, beginning on line 10, strike out "sugarcane, and sunflower seeds" and insert in lieu thereof "and sugarcane".

Page 60, line 11, insert "and" at the end thereof.

Page 61, strike out line 8 and all that follows through line 15.

H.R. 4120

By Mr. DUNN:

—Page 6, strike out lines 1-6.

By Mr. FRENZEL:

—Page 7, strike lines 1 through 6.

By Mr. WYLIE:

—On page 22, after line 21, insert the following new section:

SEC. 206. No part of the funds appropriated by this Act shall be available to the Library of Congress for reproduction in braille of the magazine entitled "Playboy".

H.R. 4121

By Mr. ERTEL:

—Page 43, immediately after line 21 insert the following new sections:

SEC. 617. Except for services provided for the President and Vice President and their families, none of the funds provided in this Act to any Department or Agency shall be obligated or expended to provide a personal cook, chauffeur, or other personal servants to any officer or employee of such Department or Agency.

SEC. 618. Except for vehicles provided to the President, Vice-President and their families, or to the United States Secret Service, none of the funds provided in this Act to any Department or Agency shall be obligated or expended to procure passenger automobiles as defined in 15 U.S.C. 2001 with an EPA estimated miles per gallon average of less than 22 miles per gallon.

H.R. 4169

By Mr. COLLINS of Texas:

—Page 43, after line 14, add the following new section:

SEC. 508. No part of any appropriation contained in this Act shall be used by the Department of Justice to bring any sort of action to require directly or indirectly the transportation of any student to a school other than the school which is nearest the student's home, except for a student requiring special education as a result of being mentally or physically handicapped.

H.R. 4242

By Mr. HARTNETT:

—Page 28, insert after line 16 the following:

SEC. 103. RECOUPMENT OF CERTAIN FEDERAL BENEFITS.

(a) GENERAL RULE.—If any individual receives a benefit to which this section applies during any taxable year, the amount of any overpayment of Federal income tax for such taxable year which would otherwise be credited or refunded to such individual shall be reduced by the amount of such benefits so received.

(b) FEDERAL BENEFITS TO WHICH SECTION APPLIES.—This section applies to any benefit provided under a Federal program (or a State or local program financed in whole or in part with Federal funds) if eligibility for benefits under such program (or the amount of such benefits) is based on income or any other test based on need. This section shall not apply to any loan.

(c) EFFECTIVE DATE.—The provisions of this section shall apply to taxable years beginning after December 31, 1981.

EXTENSIONS OF REMARKS

SRI CHINMOY KUMAR GHOSH

HON. BALTASAR CORRADA

OF PUERTO RICO

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. CORRADA. Mr. Speaker, I consider it both a pleasure and a privilege to announce before this honorable House of Representatives, that on August 27 of this year we will celebrate in Puerto Rico the 50th birthday of an extraordinary man born in India—presently domiciled in Jamaica, N.Y.—who has made many contributions to America during the last 17 years.

I refer to the Honorable Sri Chinmoy Kumar Ghosh, the founder of the Sri Chinmoy Centres throughout the United States and the rest of the world—four of them in Puerto Rico—dedicated to render active services to the community in the cultural, civic, and athletic fields. The centres have sponsored art exhibitions, concerts, lectures, poetry festivals, tennis tournaments, free meditation classes, and a number of small businesses.

I point out with pride that the first Sri Chinmoy Centre was established in the city of Ponce, P.R. The founder is regarded in the island with admiration and affection, and a number of honors have been bestowed upon him. In January 1975 the Senate of Puerto Rico paid tribute to Sri Chinmoy in a special ceremony. In 1976, he was declared distinguished guest and honorary resident of Puerto Rico. In 1980 he was invited to open the Pan American games with a silent meditation. In July of this year, Sri Chinmoy held a series of cultural activities in San Juan, including a public meditation ceremony at the State capitol. Each year the Sri Chinmoy marathon team holds a marathon in December. This marathon has been declared to be the official marathon of the city of San Juan.

The activities of Sri Chinmoy in the United States include numerous art exhibits—many of his own paintings, which have won for him awards from the New York School of Visual Arts and the Lake Placid School of Art. As a musician, he has performed at Carnegie Hall and in hundreds of free concerts across the Nation. He has lectured at scores of mainland universities, including Harvard, Yale, Stanford, and Columbia.

Sri Chinmoy has also rendered important services to the United Nations during the past 11 years. The Sri Chinmoy Meditation Group at the U.N. meets regularly twice a week, gathering a good number of diplomats and staff members of the world organization. The group sponsors many activities, honoring different countries and distinguished leaders.

In recognition for his contributions the Secretary General, Hon. Kurt Waldheim presented him with the Silver Medallion.

I wish to join the hundreds of Puerto Rican fans and admirers of Sri Chinmoy in wishing him many happy returns on his 50th birthday, August 27, 1981.●

THE SAVINGS AND LOAN INDUSTRY: ATTENTION NEEDS TO BE PAID TO ITS PROBLEMS

HON. JOHN LeBOUTILLIER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. LEBOUTILLIER. Mr. Speaker, within the last several months, leading spokesmen from the savings and loan industry, as well as from the academic and governmental field have spoken out about the pressing problems that are faced by the industry. The arcane nature of interbanking difficulties are not easily understood by many people, including those of us in government. Nevertheless, the implications of an ailing thrift industry affect each and every American consumer, whether he or she seeks to build a home or obtain a loan for educating their children. Therefore, the illness of the industry is an economic problem faced by many.

John H. W. Rhein III of the Long Island firm, the Investor Intelligence Group, has written a remarkably cogent and all-inclusive letter to President Reagan on the subject of the problems of the savings and loan industry. I would like to share Mr. Rhein's letter with my colleagues:

THE INVESTOR INTELLIGENCE GROUP,
July 8, 1981.

President RONALD REAGAN,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: As a director of Suburbia Federal Savings and Loan Association of Long Island I am concerned by the administration's apparent perception of the S&L industry.

Your position, as I read it, does not consider factors that have been basic to the existence of this industry; ones that, if not recognized in time, could widen the gap between the haves and the have nots.

One of the most prosperous periods in our nation's history was the 1950s and one of the obvious reasons for this prosperity was the existence of a public commitment that was best described as the pursuit of the "American Dream." The Federal government, recognizing the value of stimulating the economy by bringing a high priced consumption intensive item within the reach of most of the people, had been responsible, in 1933, for establishing an institution that would promote thrift and, at the same time, help most people become home owners. This mechanism was in a perfect position to be the catalyst for economic expansion in the '50s.

To many the 30 year fixed rate mortgage offered by the S&Ls provided the only opportunity they would have to participate in the American Dream and rather positive things resulted:

Labor intensive houses that consumed a host of products and materials were purchased by thousands of people who positively believed tomorrow would be better than today.

Land was used, turning vast undeveloped tracts into inhabited revenue-producing areas.

Education flourished due to decentralization and community pride.

Money was circulating productively.

Many people began to feel less estranged from the capitalistic system because they could participate in some of its tangible benefits.

A positive attitude toward the future was fostered by people who felt they had equity in something that was sound, basic and valuable—a home and property.

The S & L industry was made the well font for these "people positive" things. Its sole reason for being was to allow the community to have access to housing with low cost, long range, fixed rate mortgages and to stimulate thrift. Commercial banks could focus upon business but S & Ls were chartered to be servants of the people.

Now the industry has been victimized by events over which it had no control. Inflation has made the value of a 5¾% passbook account seem ridiculous; high interest rates have made it impossible to attract capital profitably; the existence of hundreds of thousands of low yielding long range mortgages (made when a nation needed them to help promote the vision of a prosperous, peaceful and progressive America) has prohibited the S & Ls from being competitive as financial institutions.

Now it is essential that the administration seeks the answers to some key questions that relate to the future of this industry. Questions such as:

Question. Is the promotion of housing still important to the fulfillment of the "American Dream"?

I say it is. For all of the reasons I cited earlier it's important, but certainly one of the most significant of these is the role this promotion plays in reducing the social anxiety created by a system that will allow the few to have benefits that are denied the many.

The ultimate result of social frustration is revolution, be it by ballot or bullet. No one should be more sensitive to this than a person who just won the support of the country with the promise of positive redirection.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

Question. Are there other institutions that can serve as providers of low cost long range mortgages?

Of course there are, but their very nature prevents them from being as intimate with or as sensitive to the communities they would be called upon to serve as the institutions that are now in place.

Question. Would the public be best served by a unified banking system that would eliminate the need for institutions with the singular purpose of promoting housing?

Perhaps so, if Utopias exist. If the persons involved in collectivized financial institutions could think of the benefits made possible by the promotion of housing as an instrument for general prosperity and not be concerned with immediate banking profits, a positive result could be achieved. Unfortunately to expect this is a bit naive. History has proven the public benefits more by the availability of diverse options that foster better service. Where there is centralization human concerns tend to fade in favor of more selfish contemporary aims.

Question. Would it be disasterous to have the S & Ls fail or have an avalanche of closings and mergers?

At a time when we are trying to rebuild public confidence in our financial system it seems unlikely this goal could be achieved in an atmosphere in which thousands of mortgage holders and savers watch closings, mergers and dimissings of personnel in an industry that is so intertwined in their financial affairs. Also, the public would ultimately be called upon to bail the industry out at some point if the closings and mergers become too precipitous.

Question. Are the ways that have been suggested to help the S & L industry survive sufficient to put it back on a stable footing?

If only two things were accomplished the health of the thrift industry could be restored: The retirement of old low yielding fixed rate mortgages through some form of buyout plan and the restoration of public confidence in the stability of the value of the dollar.

Any measures that are taken to solve these fundamental problems will be remedial.

I am delighted that you have embarked upon a course that will get our economic system into synchronization, but I am gravely concerned that if something is not done to aid the S & L industry many of the things we wish for our country simply won't materialize.

An institution that acted as the fuel supply for a dynamic economy will be missing, the benefits of the capitalistic system will be available to fewer and fewer, the social frustration felt by the have nots toward the haves will be intensified and a valuable tool for economic and social progress will be missing when it could play such a constructive role in our Nation's future.

Sincerely,

JOHN H. W. RHEIN III.●

PERSONAL EXPLANATION

HON. LARRY J. HOPKINS

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. HOPKINS. Mr. Speaker, on Friday, July 24, I was not recorded on the vote for final passage of H.R. 4144, the Energy and Water Development Appropriations legislation. Because of a previous commitment, I was obliged to leave for my district before debate and voting were completed on this bill.

If I had been present, I would have voted in favor of final passage of the legislation.●

SECTION 22 TESTIMONY

HON. CHARLES ROSE

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. ROSE. Mr. Speaker, on June 24, 1981, the International Trade Commission held hearings in its section 22 investigation on the importation of foreign scrap tobacco and its effect on the U.S. tobacco price support program.

Senator JESSE HELMS was one of those to submit comments for these hearings. I would like to share these with you.

U.S. SENATE,
COMMITTEE ON AGRICULTURE,
NUTRITION, AND FORESTRY,
Washington, D.C., June 23, 1981.

Re Certain Tobacco, Investigation No. 22-43.

Mr. BILL ALBERGER,
Chairman, International Trade Commission, Washington, D.C.

DEAR MR. CHAIRMAN: I urge your most earnest consideration of testimony submitted in connection with Investigation No. 22-43, the stated purpose of which is to determine whether certain tobacco is "imported into the United States under such conditions and in such quantities as to render or to tend to render ineffective, or materially interfere with, the tobacco program, or to reduce substantially the amount of any product being processed in the United States from such domestic tobacco."

This matter has been of great concern to me for several years. In fact, it was I who first brought the question of unusual and dangerously large volumes of tobacco imports to the attention of the U.S. Customs Service and the Comptroller General of the United States. Joining me was Senator Walter D. Huddleston in joint letters dated October 13, 1978. A week later, on October 20, 1978 Congressman Walter B. Jones, then Chairman of the House Agriculture Subcommittee on Tobacco, officially added his support to the request filed by Senator Huddleston and me, likewise requesting a thorough review and investigation of imports of unmanufactured tobacco under the classification of "scrap" (TSUS Item 170.60).

On August 6, 1979 the president of the North Carolina Farm Bureau, John Sledge, petitioned the Customs Service to classify the "scrap" tobacco as "stemmed" tobacco (TSUS Item 170.35). On November 6, 1979, the Comptroller General reported to Congress that the General Accounting Office found "that Customs misclassified tobacco strips as scrap tobacco." The full GAO Report is hereby transmitted for your consideration. I respectfully request that it be included in the official record of the hearing.

Despite almost constant appeals to the Customs Service for proper classification of import tobacco—in the fashion petitioned by Mr. Sledge and recommended in the GAO Report—the Customs Service delayed a ruling. Then, on May 20, 1980, the Treasury Department finally issued a ruling classifying stemmed and stripped tobacco as "tobacco not specially provided for" (TSUS Item 170.80). It is worthy of note that such a finding was—and still is—without statutory basis.

The GAO Report assesses Congressional intent regarding these tobaccos as follows:

"First, there is no basis to depart from the more specific classification for stemmed filler tobacco. An *eo nomine* or named classification such as stemmed filler tobacco takes priority over a more general description such as tobacco, not specifically provided for. That is, when Congress has provided for an article by a specific name, the specific classification must prevail over a provision where the article is included within the terms of a general description. Second, the catchall item would, like the present 'scrap' approach, deny reality and essentially classify filler tobacco out of existence as an import product."

It seems quite clear that the Customs Service is currently violating the intent of Congress by classifying stemmed and stripped filler tobacco under TSUS 170.80. The fact that the tobacco has been stripped in no way diminishes the fact that it has been stemmed; and that such a classification is specifically provided for by Congress in TSUS Item 170.35 is irrefutable.

On December 16, 1980, I again urged the Commissioner of Customs to give his immediate attention to the proper classification of imported tobaccos. I enclose herewith a copy of that letter detailing the basis for the request, as well as copies of letters on the same subject bearing dates of November 6, 1979, and February 25, 1980.

Now, some contend that the damage of the "scrap" imports is a fait accompli, with foreign production encouraged and enhanced, and the art of producing, handling and marketing of tobacco fully developed abroad. They assert that the reductions in the tariffs—provided for in the years ahead by the statutory requirements of the Multilateral Trade Negotiation agreements—and the drawback provisions of the tariff laws, have diminished the importance of resolving the customs misclassification issue.

That, of course, is yet to be determined one way or the other. However, the issues which caused Senator Huddleston and me to raise the issue in 1978 remain valid. In our original letter to the Commissioner of Customs and to the Comptroller General of the United States on October 13, 1978, we stated the problem presented by excessive imports of foreign tobacco as follows:

"The adverse impact upon the domestic producers is caused by the fact that avoidance of proper and appropriate tobacco tariffs has encouraged an increase in the importation of foreign unmanufactured tobacco into the United States, particularly in the type of tobacco known as 'scrap.' These increased imports come at a time when the market share of domestic tobacco growers has been declining, both in the United States market and in the world trade. Further, the application of improper tariffs has had the effect of encouraging the foreign production of tobacco for the world trade, thereby creating domestic and worldwide competition for U.S. producers that would not have otherwise existed. Finally, the increase in the incidence of importation of such foreign tobaccos has come at a time

when the surplus of tobacco, held by the Flue-Cured Tobacco Cooperative Stabilization Corporation, has reached record levels, currently totaling some 540 million pounds. The incidence of increased imports threatens to weaken the economic stability of the Tobacco Program, thereby threatening the livelihood of some 500,000 farm families in America."

These issues have come under the purview of the International Trade Commission, at least in part, because the Customs Service has refused to deal with them and to meet the problems head on. I am confident that the ITC will fulfill its responsibility to carry out the law intended by Congress.

That is why I respectfully urge that these issues be given your most earnest consideration as you contemplate the harmful effects of unrestrained imports of foreign tobacco.

Sincerely,

JESSE HELMS, *Chairman.*

TRANSFERRING THE ALASKA RAILROAD

HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. YOUNG of Alaska. Mr. Speaker, I am introducing today a companion bill to S. 1500, legislation authored by my colleagues from Alaska, Senator STEVENS and Senator MURKOWSKI, which will transfer the Alaska Railroad to the State of Alaska.

The Alaska Railroad is unique in that it is the only railroad run entirely by the Federal Government. The Alaska Railroad has played a unique role in Alaska's history and has been a major factor in the development of our two major cities, Anchorage and Fairbanks.

For some years now, the Federal Government has expressed interest in turning the Alaska Railroad over to a private entity or to the State of Alaska. After lengthy negotiations, legislation has been developed with the help of the U.S. Department of Transportation which will transfer the railroad to the State of Alaska at no charge as long as the State continues to operate the rail system. This plan has been endorsed by the Governor and the State legislature.

One issue remains unresolved, however—the question of insuring that the railroad, as a State entity, does not compete unfairly with private carriers. It is my intent to work with private businesses, the State government, and the Department of Transportation to develop legislative language which will solve this problem.

The plan envisioned in this bill for the transfer of the railroad is a good one. It will save the Federal Government money by transferring the railroad to the State of Alaska. It will keep the Federal Government out of the transportation business, a goal endorsed by many of my colleagues in the House. Finally, it will allow this important rail system to continue to operate.

It is my hope that the committee having jurisdiction over this bill will begin to work on it immediately after the August district work period. The Senate has announced its intent to hold hearings on this measure in Alaska during the month of August. If proper emphasis is placed on this important legislation, we can see it signed into law in the near future. I hope that my colleagues will join with me in supporting this bill.●

PASTOR ARTHUR N. THOMPSON

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. EDGAR. Mr. Speaker, I would like to take this opportunity to recognize and express appreciation for the good work of Pastor Arthur N. Thompson, pastor of the Colwyn Baptist Church.

His dedication thoughout this half century in the ministry is a particularly beautiful example of service to one's fellow man. What is most impressive about Pastor Thompson is his record of service to the community at Colwyn Baptist Church, continuing in his office following illnesses that would have caused others to retire long ago.

The people of Colwyn and in fact, the people of Delaware County will feel a great loss with Pastor Thompson's retirement from the ministry. We wish him and Mrs. Thompson all of the best with their future plans.●

INCONSISTENT TAX-INDEXING POLICY

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. HAWKINS. Mr. Speaker, recent Senate action added a provision in the tax bill which would index future tax rates and deductions starting in 1985, without any knowledge of the economic conditions ahead. Crystal ball economics has taken shape at a time when our Nation cries out for sound and responsible policymaking. If it is then wise to offer tax-indexing benefits in this category, then why not also for the special programs which assist the poor and disadvantaged members of our society who are disproportionately affected by the evils of inflation. Mr. Speaker I wish to submit an article written by David Broder of the Washington Post which points out the injustice and incongruity of this selective tax-indexing policy.

REVENUE-ROULETTE

The membership of Congress is almost certainly smarter and better educated today than it was a decade ago. The investment in education that began with the GI Bill and continued with Sputnik and federal aid to higher education—to say nothing of the increasing competitiveness of electoral politics—has had a marked effect in reducing the number of hacks in the House and Senate.

How, then, is one to explain the extraordinary inability of Congress to extract the lessons of experience in one area and apply them to other, related questions?

This conundrum has been gnawing at me ever since the Senate decided, in a rather offhand way, to throw into the tax bill a provision that would index future tax rates and deductions for inflation, starting in 1985, when the last of the scheduled Reagan-suggested cuts go into effect.

The political appeal of indexing is obvious. It ends bracket creep—the unlegislated increase in your tax burden that comes when a cost-of-living pay raise moves you into a higher bracket. It ends the situation, in the words of Sen. Dave Durenberger, one of its proponents, where the "government, one of the primary causes of inflation, is also the main beneficiary of inflation."

Hooray.

But indexing—especially when mandated four years in advance by people who can have no real idea what the economic climate will be—is also the most hazardous form of revenue-roulette. It is a classic example of the Congress of 1981 hogtying and hampering the reasoned choice of the Congress that will be sitting in 1985.

Now, the discouraging thing is that if anyone ought know that fact, it is the 57 senators who voted for indexing last week and the 218 representatives who have signed on as co-sponsors of a similar provision in the House.

Why should they know it? Because much of the agony they have been going through this year on the budget and reconciliation bills is the direct by-product of their predecessors' past embrace of indexing for Social Security, government and military pensions and a variety of other programs.

The folks who indexed those benefits were operating off what they considered a fine ringing principle. If Durenberger and Sens. Bob Dole and Bill Armstrong can see the wickedness of government "profiting" from inflation, their worthy predecessors in the 1970s could see that it was equally iniquitous to make retirees the victims of inflation.

When then Senator Frank Church put the cost-of-living indexing for Social Security into the law in 1972, the principle of equity seemed so obvious that it passed 82-4. What 82 senators could not foresee was that indexing would become so expensive within a decade that it could threaten the system with bankruptcy and could force Congress to such desperate expedients as eliminating the minimum Social Security benefits for a couple million 70- and 80-year-olds living on the ragged edge of poverty.

Ah, but the sponsors of tax-indexing say their provision is different, because it af-

fects revenues, not expenditures. It is not. The principle, and the mischief, are identical. In both cases, the lawmakers of one era are telling a selected group of citizens that for all times, under all circumstances, they will be protected against inflation.

It is a double folly. Inflation is not a scourge that affects particular groups. It clobbers everybody, and it can be cured only when everyone understands that discipline and sacrifice are involved. To "index" anyone—taxpayer or beneficiary—fully against the impact of inflation is to reduce the odds that everyone will see the need for joint action against the common enemy.

Second, it is demonstrably dangerous to lock the government into a long-term fiscal policy that restricts future room for maneuver. We are not talking about trivial sums. The Congressional Budget Office estimates that in its first two years, tax-indexing would cost the government $50 billion. No one now sitting in Congress can possibly know whether those $50 billion will be needed to balance the budget in 1986 or whether returning them to the taxpayers in that year will stimulate a lagging economy or just feed the fires of inflation.

What we do know is that this Congress has yet to bite the bullet and reduce the major items of indexed benefits it inherited. Yet it seems blithely ready to forge for its successors a new set of fiscal handcuffs called tax-indexing.

A government in which benefits are indexed to rise with inflation while taxes are indexed to resist inflation would be a government on the way to bankruptcy, of course.

It boggles the mind that these smart folks we got in Congress now can't see that for themselves. Maybe we need to send them to summer school.●

THE NATIONAL TOURISM POLICY ACT

HON. TOBY ROTH

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. ROTH. Mr. Speaker, I call upon my colleagues to give their wholehearted support to H.R. 1311, the National Tourism Policy Act.

The travel and tourism industry is of vital economic importance to the State of Wisconsin. In 1980, travel and tourism netted over $6 billion for Wisconsin—1981 projections indicate that tourism, Wisconsin's second largest industry, will make even greater economic contributions to the benefit of the State.

One out of every six persons is employed in a tourism-related occupation in Wisconsin. In addition, tourism generated over $151 million to the State general fund through the 4-percent sales tax alone.

The average traveler to Wisconsin spends over $45 per day while visiting the State at over 32,000 small businesses that cater to the needs of the visitor.

Wisconsin, a State of great natural beauty, owes much of the continuing preservation of that famous beauty to the tourism industry's vigorous efforts to maintain the unblemished quality of Wisconsin's landscapes.

I have illustrated tourism's tremendous impacts upon my own State; those effects extend throughout the United States.

The far-reaching impact of the travel and tourism industry on our Nation can be seen in the fact that it is the largest retail industry in the United States; ranking as one of the top three retail industries in 40 of the 50 States. In 23 of those States it is the largest employer. Statistics indicate that the travel and tourism industry will be the most important economic activity in the United States by the year 2000.

H.R. 1311 requires the Secretary of Commerce to name an Assistant Secretary of Commerce and Tourism who will develop a detailed plan to stimulate and encourage travel to the United States. In addition, an advisory board, composed of 15 members appointed by the Commerce Secretary will review the activities of the administration as they affect travel and tourism and report yearly to the Congress.

This is a commonsense plan of action which will effectively perform the activities needed to determine the direction the Nation's travel and tourism industry will take in an effort to stimulate the economy. This task will be undertaken not to regulate or assist the industry in a commercial sense, but to encourage the best use of the Nation's travel and tourism resources to sound economic ends that will benefit all Americans.

Mr. Speaker, I urge my colleagues to support the National Tourism Policy Act—an initiative whose time has come. I am also pleased to note the administration's unconditional support for H.R. 1311.

The Federal Government must take an active part in recognizing the far-reaching importance of the travel and tourism industry. The National Tourism Policy Act provides the most balanced, cost effective, efficient means of achieving this goal.

The continuing prosperity of our Nation depends, in part, upon the vitality of the travel and tourism industry. A vote for the National Tourism Policy Act is a vote for a sound economy.●

COUNTY GOVERNMENTS RELY ON PILT

HON. CLINT ROBERTS

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. ROBERTS of South Dakota. Mr. Speaker, last week during consideration of H.R. 4035, the Interior Appropriations Act, this body refused to accept an amendment submitted by my colleagues, Mr. LUJAN and Mr. MARRIOTT, to restore funds for the Public Law 94-565 payments-in-lieu-of-taxes program.

Unfortunately, a death in the family prevented me from being in Washington last week to participate in the debate on that amendment. Had I been here, I would have wholeheartedly endorsed my colleagues' efforts to reinstate funding for the PILT program.

In 1976, Congress determined that individual counties in which there are large acreages under Federal ownership deserve to be compensated for the loss of tax revenues from land that has been removed from their tax rolls.

The payments-in-lieu-of-taxes program is a perfect example of Federal-local cooperation, and it is a shame that this body voted to deprive the thousands of counties in America who need this program for the sake of less important funding priorities.

We are talking here about counties who are struggling to provide essential services like law enforcement and fire protection and decent roads. The Federal Government owns land in those counties for parks and the like, and the counties cannot collect taxes from the owner, Uncle Sam.

The PILT program is federalism at work. What priority can be more important than assisting our counties in providing essential services?

During fiscal year 1980, counties in South Dakota received a total of over $2 million in PILT funds. While that may not seem like such a large amount to many of my colleagues, I assure you that the counties receiving those payments would find it difficult to come up with alternative funding sources.

Most counties in South Dakota will be unable to raise property taxes to make up for the loss of PILT, as they are already at their maximum mill levy. Therefore, services will have to be drastically reduced or totally eliminated if House action on PILT is sustained.

Every State in this Nation has received payments-in-lieu-of-taxes moneys in recent years. Some have received much more than others depending on the amount of Federal land which has been taken off the tax rolls; however, I am sure that all counties receiving those payments have benefited to some extent from that assistance.

It has been argued that increases in revenues from mineral leasing, timber sales and grazing fees will offset the PILT payments. I would like to point out that only seven counties in South Dakota received section 4 payments, totaling only $726,804, while 35 coun-

ties received PILT moneys totaling over $2 million.

It has also been argued that increases in revenue sharing will compensate those counties for the loss of PILT. However, there is no provision in the general revenue sharing formula to give extra funds to counties whose tax base is impacted by Federal lands, and funds under the six additional revenue-sharing programs proposed to be included in a revised section 4 affect only a few counties currently receiving payments-in-lieu-of-taxes in South Dakota.

The PILT program is one of the most constructive concepts of American federalism enacted in recent years. This program returns funds to local government without the excessive involvement of the Federal Government. As a result, the overhead for the PILT program is under 1 percent.

I am disappointed that this body chose to turn its back on the grassroots level of our Nation by defeating the PILT amendment.●

NEW AUSTERIANS WORRY TOO LITTLE ABOUT RESULTS

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. GAYDOS. Mr. Speaker, the debate on waterways appropriations seemed to dwell too little on result and too much on detail, which is not good for the Congress or the country.

The Stonewall Jackson Dam in West Virginia is a good example.

It is a good example because it is not a particularly big project, yet with a $17.8 million appropriation and a $142 million completion cost it is visible.

Thus visible, it was vulnerable to deletion by those who wanted, for whatever reasons, to make a record of fiscal responsibility or of being proenvironmentalist or anti-pork-barrel, or whatever.

But it really does not work that way, and here is where it is useful to consider result rather than detail.

The Stonewall Jackson Dam is part of a system of waterways that runs through what used to be called America's heartland, like major bones through the body; and like bones, they support and tie together the whole.

This system carries agricultural commodities, raw materials, and finished goods, and its efficiencies are one of the edges we have had for our industry and commerce.

By the way, of the 50 largest North American ports listed in the World Almanac, 8 are on American rivers or lakes, and other authorities list landlocked Pittsburgh as the fourth largest port in the United States, which gets me back to the Stonewall Jackson Dam, which is in West Virginia.

You see, when localized heavy rains cause flooding in West Virginia it is not long before we feel it along the Monongahela in Pittsburgh and Braddock and McKeesport.

Thus a $142 million dam in one State means protection for billions worth of industry and housing in another.

A more significant feature of the Stonewall Jackson Dam in regard to jobs and commerce is that it will allow for evening out the rises and falls of the Monongahela by what is called low-water augmentation.

Low water means less depth for navigation and requires lighter loads on the barges, which means operating a major asset at less than maximum efficiency.

But the dam will allow control of water levels and provide year-around maximum efficiency.

The system will not fail without the Stonewall Jackson Dam, but it will work much better with it in place.

And that is what Congress should really be about these days—making things better in ways that will give America's working people an edge on the competition.

A good, efficient transportation system in the heartland is one of these edges.

And, although the effort to delete the dam appropriation failed, this is why I offer it as an example of why it would benefit the Nation and its working people if this Congress would worry less about looking like the holiest group in the "New Church of Austerity" and more about results and how things fit together.●

THE UNITED STATES SOUTHERN FLANK

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. BARNES. Mr. Speaker, I would like to commend our colleague from Michigan, DAVE BONIOR, for his excellent article on U.S. policy toward the Caribbean basin, entitled "The United States Southern Flank," which appeared in the New York Times, July 9.

Recognizing that in the past our attention to the Caribbean region has waxed and waned depending on our perception of the Communist threat in the area, DAVE argues that—

The only hope for a consistent United States foreign policy is to anchor it not in separate global issues but in the persistent, unique problems of the region itself.

As a case in point, DAVE mentions the foreign policies of our neighbors, Venezuela and Mexico, which try to understand and respond to the specific problems and needs of the countries in the area.

He also warns the administration against using the Caribbean basin policy as a cover for advancing our own economic interests without regard to the real development needs of the region. I feel that it is the responsibility of Congress to remind the administration, as does our colleague from Michigan, that—

The future depends upon the recognition that interdependence means that our security is protected by advancing the region's economic interests.

The Subcommittee on Inter-American Affairs, which I have the honor to chair, is now conducting hearings on the Caribbean basin, with the purpose of exploring the historical, political, and economic reasons responsible for the underdevelopment of the area and the possible shape of a viable Caribbean basin policy. I wish to thank DAVE BONIOR for his contribution to the debate and to include his article at this point.

[From the New York Times, July 9, 1981]

THE UNITED STATES SOUTHERN FLANK

(By DAVID E. BONIOR)

WASHINGTON.—Under the Reagan Administration, United States foreign policy toward Central America markedly contrasts with the policies of emerging leaders in the region's neighborhood, Mexico and Venezuela.

While we have suspended food assistance and economic-support funds for Nicaragua, Mexico has committed itself to spend $200 million in development aid there. Despite their foreign-affairs policy differences, the Presidents of Mexico and Venezuela have spoken out strongly in opposition to the Reagan policy toward El Salvador. As if to underscore its solitary position, the Reagan Administration has announced a "greater emphasis on bilateral rather than multilateral assistance," and has proposed a 30 percent cut in our contribution to the Inter-American Development Bank.

The Administration's policy is not faulty because it violates liberal axioms—that economic aid is everywhere and necessarily good, that military aid is everywhere and necessarily bad, that unilateral United States action is, by definition, evil. Rather, the Reagan foreign policy toward Central America and its neighbors is anachronistic because the alternative leadership and economic assistance of Mexico and Venezuela means that we are less able to dictate policy. Developing a cooperative relationship with Mexico and Venezuela will be critical for our future foreign policy.

An apparently cordial relationship between Ronald Reagan and President José Lopez Portillo of Mexico is a step in the right direction but the warmest of relationships is only the context for reaching policy agreements.

The recently advanced United States plan for multilateral development assistance in the Caribbean, with help from Mexico and Venezuela as well as Canada and others, could be an opportunity for translating diplomatic toasts into working arrangements. However, the Reagan Administration persists, despite opposition in the Caribbean and in Mexico, in insisting that certain countries be excluded from participation in any development program. That is only part

of a larger insistence that the program must function explicitly as a security package designed to confront perceived Communist threats in the Caribbean. Pressed by budget constraints that limit direct aid, we are emphasizing an offer of badly needed special trade concessions. However, even that offer seems dependent on Caribbean countries' reciprocating with special treatment for United States corporate investments.

On each count, long overdue attention is frustrated by long outdated ideas. The dominance of United States-defined security interests turns the Caribbean-aid program basically into a policy tool for our interests, robbing it of even the appearance of being a mutual answer to mutual problems. In contrast to development aid, which might directly promote the formation of infrastructure and new industries under local control, incentives for locating United States industries in the Caribbean just mean further dependency of the local economy on foreign business. This approach extends the Administration's "trickle-down" domestic economic policies into foreign affairs. There seems little chance that Venezuela and Mexico will participate in the program under these terms.

These difficulties have been implicitly recognized through Washington's face-saving proposal that the Caribbean program be reduced to a series of coordinated bilateral decisions that leave the United States, Mexico, and Venezuela free to pursue independent paths. Overlooking existing institutions, like the Inter-American Development Bank, the program becomes multilateral in rhetoric only. While that may save face now, it will create future problems, for it will highlight the stark contrast between policies of the United States and its neighbors.

If the program is to succeed, it must reflect an awareness of the region's history and economic interdependence. The Reagan Administration is not the first to define our policy in the Caribbean in terms of larger global issues. Caribbean nations will remember that John F. Kennedy's Alliance for Progress lost its priority in Washington as soon as the United States changed its perception of the Soviet Union. The only hope for a consistent United States foreign policy is to anchor it not in separate global issues but in the persistent, unique problems of the region itself.

In 1978, perhaps one-third of all United States investments in Latin America were concentrated in the Caribbean. We increasingly depend on Venezuelan and Mexican oil—in 1980, they constituted 15 percent of all imports. Our primary source of bauxite for the production of aluminum, a vital strategic material, is in the Caribbean.

In the past, our policy has erred by the assumption that this interdependence means that our security is protected by advancing our own economic interests. The future depends upon the recognition that interdependence means that our security is protected by advancing the region's economic interests.●

SUNFLOWER SEEDS

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. FRANK. Mr. Speaker, title IX of H.R. 3603, the Food and Agriculture Act of 1981, contains a provision—section 901—that would provide a mandatory loan program for the first time for sunflower seeds. Currently, the Secretary of Agriculture has discretionary authority to set up a price support program if the Secretary feels it is warranted. I oppose the inclusion of this new mandatory program in the Food and Agriculture Act of 1981. At a time when Congress is cutting back on such programs as food stamps and school lunches, inclusion of a mandatory sunflower seed loan program would be an unjustified expenditure of scarce funds.

The administration opposes the provision for sunflower seeds on the basis of potential cost and the mandatory, rather than discretionary, character of the provision. Furthermore, the North Dakota Sunflower Council representing growers of 58 percent of U.S. production of sunflower seeds in 1980, has stated that they do not want the sunflower seed production included in the Federal Government loan program. Council letter to Senator MARK ANDREWS, dated March 3, 1981. At a time when Congress is retrenching program after program, it is foolhardy to spend taxpayer moneys on a program that a large segment of the industry does not want or need. In this era of agricultural subsidy and price support programs, it is refreshing to see this viewpoint.

In the committee report to accompany H.R. 3603, the committee wrote:

SUNFLOWER SEED

Sunflower seed, a minor crop just a few years ago, has become a crop of major significance to several producing areas in the United States. In 1977 plantings amounted to 2.3 million acres. It increased to 5.6 million acres in 1979 and has fallen off slightly to 4.4 million acres for 1980. It has developed into a crop of major export significance. Prices have trended upwards in the recent past and in March and April of 1981 have averaged approximately $11 a hundredweight. The crop is produced primarily in the northern tier of states, particularly in Minnesota and North Dakota. The legislation has provided requirements for a price support loan program at a minimum rate of $9 a hundredweight in order to insure a source of financing to producers. This support rate is less that the cost of production excluding land, which has been estimated by the Department for 1981 at $9.34 per cwt. The program remains essentially a market-oriented program with no provisions for production controls.

A careful reading of this statement of "Purpose and Need" shows the profile of a healthy agricultural commodity, whose markets are growing and whose prices are well above production costs. Clearly, this is not an industry that needs help, even if one accepted the premise that such help is theoretically justified.

While the program is intended to be self-liquidating each year (that is, loans made in advance of the harvest would be paid off by the start of the next growing season), the Agriculture Committee's report estimates the cost to the Federal Government of $10 million per year. Of course, if commodity prices should fall below the loan level, the Federal Government would find the cost much larger than $10 million, as the Federal Government would take possession of crops that are unredeemed, plus all the attendant storage and disposal problems.

I have already written the chairman of the House Committee on Agriculture, opposing the mandatory loan provision for sunflower seeds. In the meanwhile, I will offer the following amendment to eliminate the sunflower seed provision from H.R. 3603:

AMENDMENT TO H.R. 3603 OFFERED BY MR. FRANK

Page 60, line 4, strike out "and sunflower".

Page 60, beginning on line 10, strike out "sugarcane, and sunflower seeds" and insert in lieu thereof "and sugarcane".

Page 60, line 11, insert "and" at the end thereof.

Page 61, strike out line 8 and all that follows through line 15.

In a few days, I will circulate a "Dear Colleague" letter asking that other Members of the House join in cosponsorship of my amendment.●

FRANKING LEGISLATION

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. FORD of Michigan. Mr. Speaker, I am pleased to report that at long last the Senate has acted on franking legislation substantially the same as bills which this House passed in the 95th and 96th Congresses.

Last week the Senate passed the bill S. 1224, which in its provisions affecting the House is almost identical to H.R. 3777 in the 96th Congress, and H.R. 7792 in the 95th Congress—both of which passed the House overwhelmingly under suspension of the rules—but both of which the Senate failed to take up.

The House Commission on Congressional Mailing Standards met on Friday, reviewed the provisions of S. 1224, and decided to strongly recommend immediate House passage. With a lengthy recess imminent—and in view of the fact that we have already waited a long time for the Senate to act—the bill S. 1224 has been scheduled for floor action tomorrow, July 28, under suspension of the rules. The amendments to the franking bill made in markup by the Committee on Post Office and Civil Service during the 96th Congress are contained in S. 1224.

The bill has strong bipartisan support, entails no additional costs, and essentially strengthens the principle of self-regulation which has governed

the House's use of the frank since enactment of the Franking Act of 1973.

I strongly recommend its passage tomorrow.●

TRIBUTE TO SHEPARD DAVIS

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. LEHMAN. Mr. Speaker, the Miami Beach community, and especially the low-income renters, recently lost a great friend and champion at the death of Shepard Davis. Shep was an active, articulate member of the Miami Beach Housing Authority, the Tenants' Association of Florida, and the League of Women Voters. He will be sorely missed at all their meetings. I would like to express my sympathy to his widow, and to add my tribute to the memory of this fearless, outspoken citizen. I insert in the RECORD this article from the Miami Herald of July 18:

TENANTS' BEST FRIEND GOES DOWN A FIGHTER

(By Margaria Fichtner)

"His hobby," said Rabbi Mayer Abramowitz, "was poor people. He wanted to help the poor, and if it meant always to be the fighter, the dogmatic fighter, he undertook to do that, and he undertook to be their champion."

And Shepard William Davis, the nettlesome activist, was a fighter to the end. He died Wednesday, at 70, after being stricken at a Miami Beach Commission meeting where he was to speak as a member of the Miami Beach Housing Authority.

Death did something nothing else had been able to do for 20 years. It shut Shepard Davis up.

Friday, 200 to 300 family members, friends, former adversaries and admirers gathered at Riverside's Alton Road funeral home to honor this small, well-to-do retired businessman who became a legend on Miami Beach by championing the rights of those who were not—or could not be—so outspoken or so fearless as he.

Miami Beach Mayor Murray Meyerson was there. Former mayors Leonard Haber and Jay Dermer were there. Former Commissioner Hal Spaet, who now represents Miami Beach in the Legislature whispered, "Everybody in this room owes him so much." Everybody there, in one way or another, has been a Rose Goldberg.

Several years ago, Goldberg, a 74-year-old widow, was locked, shoeless, out of her Miami Beach hotel room for being 10 days late with her rent.

Shep Davis blew his stack. Then he calmed down, called people, marched to the widow's hotel and announced to the owner, "If this door isn't opened, I'll bust it down."

The door was opened. Shep Davis gathered up the pitiful scraps of Rose Goldberg's life. He made sure he had her hairbrush, her medicine and, particularly, her shoes. then he demanded the landlord give back her $150 rent deposit.

Shepard Davis, who had retired from his successful publications promotions company at 52, moved from Coral Gables to a new highrise Miami Beach apartment in the late '60s. There, for the first time in his life, he became a tenant. He griped about the building's unfinished hallways, unpainted walls and the landlord's broken promises. And he discovered everyone who rents can become a Rose Goldberg overnight.

"I got to thinking. My building is full of millionaires and people who own department stores and delicatessens and other lucrative businesses," he once said. "If they treated us like this, then what happens to those people down on South Beach living on fixed incomes?"

Davis founded the Presidents Club, a loosely knit group of the heads of Miami Beach high-rise social clubs. Shortly after that, he was elected president of the newly formed Tenants Association of Florida. For the rest of his life, he fought against high rent increases, picketed landlords, prevented evictions and lobbied for good low-cost housing on South Beach.

He made friends and enemies with equal ease. When he took on an issue, it stuck like a bone in his craw. He worried it until he beat it. He behaved like a human whirlwind, once shouting at a former Miami Beach council member, "I'm not going to stand here and listen to you, because I don't think you're worth a *dime.*"

And he never stopped. Remembers one admirer, "You wanted him to do this, but you wondered why he just couldn't take the afternoon off sometimes."

Sheppard Davis was the first man to join the Dade County League of Women Voters.

"All male people should join," he said.

He once settled out of court after suing the publisher of a weekly newspaper that had referred to him as "Shep the Knife" and "the shark with the pearly teeth." Davis pouted that as a result of the paper's allegations, he suffered "a loss of capacity for the enjoyment of life."

His rallying cries were more suitable to the ballpark than the commission chamber, but he spoke his mind on principle, with little respect for the nuances of time or place:

"Fearful tenants will be emboldened, and the landlords will have the hell scared out of them," he said.

"Like it or not, the world revolves around who you know and what you have. The peasant never got the emperor's ear."

"Tenants who say nothing get nothing."

Friday, before they buried Shep Davis, Mayer Abramowitz, the rabbi, said, "If there's any betterness in the community today, it is because of Shep Davis. I say that Shep Davis is alive. What he has accomplished did not die. What he has done for this community—the support he got—did that die? Of course not.

"Shepard Davis is alive, because his spirit lives. Amen."●

A TRIBUTE TO HON. STEVEN B. DEROUNIAN

HON. JOHN LeBOUTILLIER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. LEBOUTILLIER. Mr. Speaker, I rise today to pay special tribute to the Honorable Steven B. Derounian.

Those fortunate to have served in Congress for many years may recall that Mr. Derounian was elected to the 83d Congress, and served as a Member of Congress until 1965.

In addition to his noteworthy congressional service, Justice Derounian has dedicated considerable time and effort in numerous other fields. His efforts have contributed greatly to the betterment of all Long Island. Those fortunate enough to have made his acquaintance can attest to his ability and dedication.

I bring this man, and his impressive achievements, to the attention of the Congress because Mr. Derounian is retiring from his position as a justice of the New York State Supreme Court. In a short while, he and his lovely wife, Emily Ann, will be moving to Austin, Tex.

Educated at the Mineola Public Schools in Nassau County, N.Y., Mr. Derounian later received his B.A. degree from New York University and his LL.B. from Fordham Law School in 1942.

However, prior to entering the study of law, Mr. Derounian entered the U.S. Army as a private and graduated from OCS as an infantry officer in 1943. While serving overseas he attained the rank of captain and was awarded the Purple Heart and Bronze Star with Oak Leak Cluster in conjunction with his military service.

In the pursuit of his law career, Justice Derounian began practicing law in Nassau County, N.Y., in 1946. Since that time, he had been admitted to practice before the U.S. Supreme Court, the U.S. District Court for the Eastern and Southern Districts, District of Columbia Bar, Federal Communications Commission, Interstate Commerce Commission, and the Board of Immigration Appeals.

Justice Derounian's professional record is indeed most accomplished, and while I laud the man for his past achievements, I must confess a degree of remorse. Long Island's loss shall be Texas' gain.

Those of us who have come to know Justice Derounian shall miss him dearly, and as he prepares to embark on yet another phase of personal growth in his life, I know I speak for many is wishing him good health and all God's blessings.●

SOLAR IS COMING OF AGE

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. MARKEY. Mr. Speaker, last week we passed the energy and water appropriations bill for fiscal year 1982. Included in this bill is funding for solar energy programs. I would like to take a moment to reflect on the development of this energy source.

During the past decade, solar energy has been shown to be both a viable option to the problem of expensive and depletable resources and the rudiments of a new and vital industry.

Solar's course has not always been straight and true. As with any developmental program, there have been failures as well as successes. However, upon reflection, it seems remarkable that this benign and renewable energy source should have had its Federal beginnings within the confines of the Atomic Energy Commission's heir, the Energy Research and Development Administration, and has managed to maintain developmental continuity under three separate administrations.

When Federal efforts first began, solar supporters looked to their work as the beginning of a long-term process which would result in the marketplace application of an energy source which was both inexpensive and indigenous. For domestic hot water heating, photovoltaics, and passive solar designs and materials, the process is nearly complete. Industry has begun to assume an increasingly larger developmental role; as a consequence, the time at which Federal support for the development of these technologies can be terminated is in the near future. The time, however, is not yet upon us. Continued Federal efforts to develop, integrate, and communicate the information necessary to stimulate private investment and application are still required.

We should begin to wean industry away from reliance on Federal dollars; we should not cast them adrift. Should the Federal Government turn its attention away from the completion of the task it had begun almost a decade ago, it is likely that the Nation will not realize the widespread benefits of solar energy until a time in the too distant future. The efforts of the past will have succeeded in reducing the gap between national need and technological capacity, only to leave a gulf too wide to cross.

We must finish what we have begun. I commend Mr. BEVILL, Mrs. BOGGS, Mr. AUCOIN, and other members of the Appropriations Committee who have worked to expand the programs of the Department of Energy to include development of an industry-Government partnership for the introduction and industrialization of passive and active solar technology. I would also like to point out that through the programs and policies of such industrial organizations as the Northeastern Retail Lumbermen's Association and the International Union of Bricklayers and Allied Craftsmen; I believe solar will attain its potential for freeing this Nation from its dependence on depletable energy resources.●

CRISIS IN THE MIDDLE EAST

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. RAHALL. Mr. Speaker, no doubt the entire membership of this body is well aware of the present crisis taking place in the Middle East. The situation has escalated to a point where sides can no longer be taken, and any hopes for even a lingering peace have been dashed by bombing attacks, missiles, and the killing of innocent citizens.

Last week, I introduced a House concurrent resolution that I believe expresses a comprehensive outline, and which can be supported by a broad majority of Members of both House and Senate.

The text of my resolution follows:

Concurrent resolution expressing the sense of Congress that acts of violence and aggression in Israel, Iraq, and Lebanon aimed at innocent citizens be condemned; that the administration be commended for its decision to suspend the shipment of military planes to Israel, and calls for further temporary suspension of arms to Middle East combatants; that Congress be involved in the development of a comprehensive U.S. policy leading to peace in the Middle East region; and that Congress urges all parties to the violence to halt all aggressive acts

Whereas the level of violence and aggression in the Middle East region has been escalating: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of Congress that the repeated acts of aggression and violence in Israel, Iraq, and Lebanon aimed at innocent citizens in population centers be condemned, and regrets the tremendous human suffering and loss of life and property in the aforesaid countries caused by the continuing violence, and commends the administration for its decision to suspend shipment of the F-16's scheduled for delivery to Israel, and calls for a further temporary suspension of arms deliveries and issuances of military sales credits to Middle East combatants in the escalating spiral of violence in Israel, Iraq, and Lebanon until assurances are made to the U.S. Government that U.S.-built weapons will be restricted to those provisions stated under U.S. law and will not be used for aggressive purposes against neighboring countries, and asserts that Congress should be intimately and continuously involved in the development of a comprehensive U.S. policy leading to lasting peace between all parties involved in the crisis, and urges all parties to the violence to halt all aggressive acts and seek peace through negotiation rather than by military confrontation, and requests friendly Arab states and the United Nations to urge Palestinian military groups to refrain from further violence against Israel, and so requests the President to urge Israel to refrain from further military violence against Palestinians and Lebanese in Lebanon.

Mr. Speaker, I urge my colleagues to join in support of this resolution, and likewise would urge them to review the following editorial which appeared in Tuesday's Washington Star.

It is imperative that this senseless violence be brought to speedy halt, and I know the Members of the House who share my concern will join in this effort.

[From the Washington Star, July 21, 1981]

THE DAMAGE OF LEBANON

The air is full of glib advice for every party to the tragic conflict that is again wrecking Lebanon. The uselessness of much of that advice flows from the obvious point that only a coordinated settlement involving Mr. Begin's government, the PLO leaders, the Syrians and the U.S., can hold out hope of outlasting the day it is signed.

President Reagan's emissary, Mr. Philip Habib, is and has been seeking just such a settlement, but the prospect has dimmed dishearteningly as he has shuttled from capital to capital.

Now the violence is growing. We gather that the view we hold is shared by many Israelis that Friday's Israeli bombing raid on a crowded quarter of Beirut harboring a PLO headquarters was as ill-advised as it was bloody and undiscriminating.

No fair-minded observer expects Israel to submit meekly to the continued terroristic bombing of her northern villages and settlements by rocket and artillery fire. And perhaps it may be argued that the loss of one, or a few, innocent lives in these atrocities is as outrageous as the loss of hundreds of innocent lives in Beirut.

But the argument, like the retaliation itself, is out of scale. Even in muted warfare, scale matters. Israel has, until now, tried scrupulously to spare bystanders in its anti-PLO operations in Lebanon. Now Mr. Begin, has not only disavowed that restraint, he has gone to the length of saying that noncombatants so hapless as to live near PLO targets are responsible for their own safety; and doctrine that raises 20th Century callousness to civilian victims of warfare to a new level of explicitness.

Moreover, Mr. Begin's policy puts the United States in an untenable position. Let us concede that the provisos of U.S. arms-sales law that purport to limit the use of American-made weapons to "defensive" purposes make it a sham. The law is a semantic sham because few nations ever admit that retaliatory and pre-emptive actions such as Israel has taken in Lebanon are "offensive" or aggressive. It is a political sham because not even the so-called "moderates" of the Arab world can be expected to differentiate to suit the conveniences of U.S. law. It is a diplomatic sham because it is unrealistic to think that the U.S. can successfully monitor their use.

If we do not insist upon prior consultation, we are blamed for silent acquiescence in Mr. Begin's policy of repaying savagery with savagery. If, on the other hand, we insist on prior consultation we risk being branded as co-conspirators in that policy, and forced to make judgments about Israel's security that only Israel can or should make.

The problem with the on-again, off-again handling of F-16 deliveries to Israel will, we suspect, be that Israel cannot be put at a disadvantage for exercising its view of military necessity, however questionable. If so, the administration will have displayed intrinsic weakness, going through the ritual of "reviewing" the plane deliveries in response

to the Osirak bombing and, again, after Friday's raid on Beirut.

But perhaps the chapter isn't closed. It needs to be said, in fact, that Menachem Begin—if he is acting on this or some similar calculation—is trifling dangerously with the good will of an administration predisposed to be as protective of Israel's security as any is ever likely to be. Mr. Begin may believe he has Mr. Reagan in a bind. He may find that he is wrong about that—that his failure to temper Israeli policy in Lebanon has cost his government not only good will but critically needed arms.

Mr. Begin could not be as ignorant of the political dimension of Israel's relationship with the U.S. as he sometimes seems. He must know that the U.S. needs to maintain good relations with nations of good will in the Arab world and cannot afford being frivolously cast as an accomplice in inflammatory acts.

Israel is beleaguered, and was so long before Menachem Begin became prime minister. But the stockade mentality has its limits. Even Israel's friends in the administration and in the U.S. at large are beginning to wonder whether Mr. Begin's stark insensibility to the political factor in Israel's security is lessening, or magnifying, his country's peril. When his policy is thus questioned, as it is now, it is time for Mr. Begin to take stock and to heed the counsels of reason and restraint in his own land and throughout the world.●

HOYER JOINS CALL TO CONSCIENCE VIGIL

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. HOYER. Mr. Speaker, as a new Member of Congress, I am honored to take part in the Congressional Call to Conscience Vigil for Soviet Jews. The plight of any people who are denied the freedom to choose their homeland is one which concerns me greatly, and one made even more real to me in my recent trip to the Soviet Union.

There, in a Moscow hotel room, members of a congressional delegation led by my esteemed colleague from Illinois, PAUL SIMON, met with a number of Soviet dissidents and refuseniks and heard the extent of the problems these people and their families face in the Soviet Union today.

With us were Dr. Yelena Bonner, wife of physicist Andrei Sakharov; Ida Milgrom, mother of Anatoly Shcharansky; and Alexander Lerner, who have all seen firsthand what the Soviet system can do to those who wish to escape or to criticize it.

Mr. Speaker, during the past year the number of Jews permitted to leave the Soviet Union has declined by 55 percent. Since 1977, emigration has dropped 73 percent. New administrative roadblocks have been erected to reduce this number even more.

Some of the members of the informal group we met with have been waiting 10 years to emigrate, only to be told that their departure would not be expedient for the state. We heard of health and food problems, of the Soviet's jamming of the Voice of America, of the very real day-to-day job of survival for these brave people who have made public their purpose to leave the Soviet Union.

Individuals expressed concern that the number of watch groups formed to oversee the Helsinki accords have dwindled, as our Nation's attention has been turned in other directions.

In my discussions with the refuseniks and later with high Soviet officials, I stressed the continuing need for full Soviet compliance with the humanitarian provisions of the Helsinki agreement. Only through vigilant efforts will we prevent a worsening plight to befall the thousands of Jews who remain in that country.

The Congressional Call to Conscience Vigil is but one effort in the continuing press for full recognition of the rights of all the people now living in the Soviet Union.

Mr. Speaker, the words of one of my new friends expresses this need best. "For us, forgetting is death, remembering is life."●

SHOULD CONGRESS BE AFFECTIONATE?

HON. DONALD J. PEASE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. PEASE. Mr. Speaker, tomorrow we will vote on a seemingly small budget item—$7.2 million—and the authorization of an independent Government agency to promote national tourism.

But the $7.2 million just plants a seedling in the Federal forest which will surely blossom and grow as predictably as the cherry blossoms here in the spring. It will be nurtured by a big and booming business, the travel industry which is already aided by 56 travel promotion departments of individual States and territories—nurtured by a total of $33.4 million spent on advertising alone.

The need for this agency is not apparent at this time. In fact, I think it is inappropriate to even discuss funding this special interest as we continue to eliminate and reduce funding for programs which provide for the care and feeding of our Nation's poor. If the individual States find it cost effective to promote tourism, that is surely their privilege. But this does not belong at the Federal level. The States and territories are already budgeted for $113 million to promote tourism. It is not reasonable to expect taxpayers to dig into their pockets twice for the same purpose.

Today's Washington Post carried the following article which suggests that Congress will act to "show its affection." I suggest we direct our affection elsewhere.

[From the Washington Post; July 27, 1981]

TOURISM INDUSTRY FEELS NEGLECTED, AND CONGRESS ACTS TO SHOW ITS AFFECTION

(By Philip J. Hilts)

The tourism business feels slighted. Agriculture has its own Cabinet department. So does housing. But the multibillion-dollar tourism business has nothing more than a miniature bureau and a mere assistant secretary.

"Grossly neglected" is the phrase used by the lobbyist for the Holiday Inns.

What they'd really like is their own agency, independent of any department. But they would settle for an undersecretary inside the Commerce Department. An undersecretary reports directly to the secretary and usually oversees a vast portion of a Cabinet department.

As it happens, the Congress is sympathetic to the tourism industry. The Senate has already passed a bill giving it an independent agency and $10 million to get started.

And today, the House will take up the issue on a slightly different bill, upgrading the current U.S. Travel Service and giving its chief under-secretary-level powers, and a salary of $60,662—on a par with the director of the Central Intelligence Agency.

Similar bills passed Congress last session, but were pocket-vetoed by President Carter.

The bill does have its opponents, few though they appear to be. "When we are trying to balance the budget by, just to cite one example, cutting Social Security benefits to the elderly, it is hardly in good taste for the casino, resort and hotel industry to come to Congress asking for a handout," said Rep. Patricia Schroeder (D-Colo.).

She points out that the tourism business promotes itself prodigiously without help from the government. American Express, for example, spent $62 million in 1978 on advertising, and the largest hotel chains spent $59 million on advertising in 1979.

Burt L. Talcott, lobbyist for the Holiday Inns, wrote to Schroeder in defense of the bill, pointing out that tourism is the third-largest industry in the nation, and "may be larger than agriculture."

"McDonald's may employ more persons than U.S. Steel," he wrote. "Seventy percent of Holiday Inns' guests are business-related."

A factor throwing a bit of weight on the side of tourism is that more than half the members of the House belong to the U.S. Congressional Travel and Tourism Caucus. The same is true in the Senate.

Sponsors of the House bill are so confident, in fact, that they have put the House bill on the calendar under rules that require a two-thirds vote of the House for passage.

That will send the matter to President Reagan. So far, despite its stance against subsidizing private industry, the administration has not declared itself in open opposition to the House bill, but has said only that it would prefer to move the U.S. Travel Service to the international trade section in Commerce.●

RESOLUTION ON SOCIAL SECURITY WAS MEANINGLESS POLITICAL VOTE

HON. DENNY SMITH

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. SMITH of Oregon. Mr. Speaker, last week the House of Representatives enacted House Resolution 181, urging that the necessary steps be taken to insure that social security benefits are not reduced for those currently receiving them. While I supported this resolution, because I wanted to reassure elderly Oregonians that the Congress is sensitive to their economic situation, I think it is important to emphasize that this particular vote was long on political rhetoric and short on solutions.

It amazes me that while the Republican Party is being accused of the wholesale destruction of the social security system, a resolution of this nature does not even make an attempt to address the real problem—the long-term solvency of a near-bankrupt system. I would like to point out that the social security system, as originally proposed, was destroyed long ago by politicians who robbed those who paid in, by distributing benefits to those who had not paid the price of admission. It seems apparent that the Democratic leadership is calling up resolutions of this kind, which are not in any way binding on the House-Senate conferees, as a means of camouflaging the real issue. That is not surprising, as the Democrats have had a difficult time finding issues on which they and the voters can reach agreement.

The only way to protect beneficiaries is to provide a vested system wherein those workers who paid in are assured of getting their dollars back. I doubt very much that this will occur unless Members of Congress and new Government employees are required to be put under the same system as everyone else. Government employees who have a retirement contract with the Federal Government should not be used to bail out a failing system, but there is no just reason why new Federal employees should be exempt. I have introduced legislation which requires those politicians who must make tough decisions on the survival of the system to be subject to the vagaries of the tax and the vagaries of the benefit schedule.

Mr. Speaker, I truly hope that during the next few months, when the House will consider social security legislation of substance, we will avoid such meaningless political votes as that which was cast on House Resolution 181. That we must insure the survival of the social security system is clear to every Member of Congress and every worker across this Nation. The question remains on how to accomplish this goal.●

THE CLINCH RIVER REACTOR, A NECESSARY INVESTMENT

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. GAYDOS. Mr. Speaker, I have acquired a habit of browsing through compilations of quotations and proverbs for the perspective they offer, and recently I found a thought of Samuel Johnson's that fits the Clinch River Breeder Reactor like a tailor-made suit.

"We are constantly becoming what eventually we are going to be," he wrote.

If you do nothing, you have nothing, you will have nothing.

The breeder reactor is to future electric energy what the first voyage of Columbus was to the settlement of the New World, and it should be considered in that context.

It is the beginning point, a place where knowledge will be put to practical use and more accumulated, where ideas will be tested and more suggested.

Nuclear energy represents one of our best chances of solving our energy problems, and Clinch River represents one of our best chances of moving into an era of nuclear energy free of today's fears and difficulties.

Problems at Clinch River have drawn much publicity and discussion recently.

If the management of the project is bad, let's have it changed.

If there is corruption, prosecute it.

But we should not dismiss developing the technology.

Drawing back from it would be the equivalent of Columbus turning east to return to Palos after 65 days at sea and with the New World less than a week over the horizon.

We know we will need this energy, and, if we do not make the necessary investment now, it always will be just over the horizon.

And we will have chosen to become less than we are and less than we could be.●

HOW TO SURVIVE THE VOLATILE RATES OF THE 1980'S

HON. WES WATKINS

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. WATKINS. Mr. Speaker, I am inserting the article entitled "How to Survive the Volatile Rates of the 1980's" by one of my new constituents, an outstanding young banker, into the RECORD.

I would encourage all my colleagues to take time to read this most timely article concerning the interest rates of this country:

HOW TO SURVIVE THE VOLATILE RATES OF THE 1980'S

(By Thomas E. Bennett, Jr.)

Advent of the six month money market certificate of deposit in June, 1978, signaled the "beginning of the end" for stable rates in community banks. Prior to that time, most of us had enjoyed relatively stable rates as prescribed by Regulation Q. Only those depositors who had $100,000 or more to invest in timely certificates could negotiate an interest rate higher than 7.75 percent.

For most depositors, getting the high rate of 7.25 and 7.75 percent meant tying up their savings from four to six years. We were provided a very stable supply of fixed rate term money to be reloaned at fixed rates to consumers of small businesses in our communities.

Effective June 30, 1978, the banking system gave birth to the six money market certificates of deposits of any customer capable of gathering up $10,000. Who would have thought that so many people had $10,000? Not only was the rate paid on this new child of our industry higher than any other deposit under $100,000, but it was only fixed six months at a time.

Who would have thought that rates would change so rapidly in only six months? Well, as most parents know, sometimes your children provide unanticipated happenings. In the case of independent banks during 1979 and 1980, there was a wholesale rush of deposits to six month instruments bearing rates up to 15.8 percent.

This gives rise to the questions of the 1980's—how to survive in the volatile times in which we live? Certainly the "Chase Manhattan prime" is not an appropriate index or an effective pricing tool for community banks for one very important reason: our source of funds is on a 90-day to six month roll; New York's is on a one day to 30-day roll. Naturally, they must price based on an incremental cost of funds, i.e. the price of the money they buy today. We cannot afford to join them.

Community banks must accomplish two very important objectives in the 1980's to survive:

1. Community banks must move immediately to match the interest sensitivity of their assets (primarily loans) to their liabilities (an increasing portion of which have a six month maturity).

2. Community banks must arrive at an appropriate and effective index, based on their cost of funds, from which to price their loans.

Interest sensitivity may be accomplished by either shortening maturities or floating the rate over a stated index—or both. At the Stillwater National Bank, we have wrestled with the question of whose index to use or how to create our own. There is no way that we could have afforded to follow the New York City's prime rate down to its lows of the past, remembering that it was six percent in December, 1976, and 10.75 percent in August, 1980.

Also, we did not need to go as high as that area's prime in April, 1980, nor do we now.

We did research a variety of pricing formulae for creation of a local index, including:

1. Average cost of six month money market certificates on deposit,
2. Average cost of certificates of deposit over $100,000,
3. Average cost of six month money market certificates of deposit and $100,000 certificates,
4. All of the above marked up by a fixed percentage (i.e. three percent) or multiplied by a fixed percentage (i.e. 30 percent), and
5. An incremental increase on a graduating scale upward over average cost of funds (in an effort to "carry" old fixed rate loans).

However, the formula that made the most sense for our bank was to create a base rate of five percent over our average cost of all savings and time deposits.

First, we do not call our index a "prime" rate. The term "prime" has been understood badly by the public. It is an anachronism that must be replaced.

Second, all loans made on our base rate will float, or be subject to adjustment, as our index changes.

Third, because our formula is based on the average cost of funds versus the incremental cost of funds, it will be a much more stable rate.

All of these factors are very important to the success of our pricing system.

By calling our index a "base rate" rather than a prime rate, we diffuse the status issue of everyone considering himself as "prime" customer. The media have repeatedly told the public that the prime rate is that rate which banks charge their most credit worthy customers. They fail to discuss compensating balances and the costs of servicing different types of credit.

Naturally, everyone considers himself credit worthy and there-in lies a problem. We have found that introducing a base rate changes the focus of the discussion. It allows for appropriate markups based on all relevant costs, with minimum emotional resistance.

All loans must "float." A sure way to go broke is to make fixed-rate loans on average cost of funds. By floating all rates—including consumer loans—we take account of the incremental change in costs of funds as it impacts our average costs.

The main selling point of this pricing system is its stability relative to that of, say, the Chase Manhattan prime. In 1980, alone, we saw that prime start at 15.25 percent, rise to 20, drop to 10.75, rise to 21.5, and end at 20.5. This was a total change of 25.75 percent in 12 months. During this same period of time, the SNB base rate would have started at 14 percent, risen to 16, dropped to 14, and ended at 15.5. This would have been a total change of 5.5 percent.

Community banks serve consumers primarily—small business persons and agricultural businesses. Unlike the national and regional corporations, our customers do not normally have the choice of borrowing money, selling commercial paper, going to the bond market, or issuing additional stock. In most cases, it they don't borrow money, they won't stay in business or buy the consumer goods they need and want.

An important element of their planning process is their cash flow needs for a given period of time. When interest rates vary 100 percent or more within six months' time, who can plan? For auto dealers, building contractors and agricultural business people tied to the Chase Manhattan prime rate in 1980, it was not a question of do I borrow or not; it was a question of survival.

We have found an overwhelmingly positive response to our pricing system for our customers. As a community bank with stable ownership, management and staff, we have further developed our kinship to small businesses in our community by providing a stable rate of interest.

Whatever index the bank chooses, it must account for coverage of all bank overhead in determining a minimum markup on loan rates. Certainly this degree of coverage is dependent on a variety of factors, including the amount of other income, amount of fixed rate "historical" loans, and percentage of liabilities in interest sensitive instruments. These factors will vary between banks. The more efficiently a bank operates and more adequately it matches the interest sensitivity of its assets and liabilities, the more competitive it can be.

A bank, as any other business, must know its costs and must price its goods and services at a reasonable markup over that cost. The markup must be fair both to the buyer and the seller to be both a marketable and profitable transaction. If we guess at our selling price, or use some other institution's cost of funds, we may price too high—or too low. It we're high, we risk losing our customers. If we're too low, we will lose money and risk the survival of the bank.

The creation of a pricing system based on your own average cost of funds, one in which all loans float as the average costs change, will insure you of consistent performance as Regulation Q is eliminated.

And if the 1980's prove to be as volatile as many observers forecast, you will have taken a major step toward insuring that your customers will survive in the times ahead.●

CALIFORNIA DREAMIN'—MEDFLY REALITY

HON. ANDY IRELAND

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. IRELAND. Mr. Speaker, the prompt and courageous action by Agriculture Secretary John Block to quarantine California produce because of the Medfly outbreak has helped raise Gov. Jerry Brown to a higher state of consciousness—an awareness of the public interest of the people of the United States.

His failure to act until forced to by the Federal Government flies in the face of logic, experience, and a decent regard for the agricultural interests of our Nation.

We can only hope that his irresponsible decision against aerial spraying—and indeed his present insistence on night spraying, which is far less effective then early morning spraying when the Medfly is active—did not delay matters to the point where irretrievable damage has been done to California and the Nation.

I could go on at length, but Governor Brown has really been properly skewered by the editorial writers of a prominent newspaper in my district, the Lakeland Ledger.

So, despite all temptations, I will shut down my boilers at this point and let the Ledger's editiorial of July 20 steam full speed ahead:

[From the Ledger, July 20, 1981]

CALIFORNIA DREAMIN'

Shirley Temple Black, asked why she and her husband replaced 3,000 square-feet of grass around their northern California home, replied: "We did that because we didn't like the idea of grass going patchy on us."

That mind-frame recently infested California Gov. Jerry Brown, whose ultimate plan for saving the state's $14-billion agricultural crop from the devastation of the Mediterranean fruit fly may have been to pave the groves over with green concrete. Fortunately for the protection of Polk County's citrus crops, federal agricultural agents were able to strong-arm him into changing his gameplan.

The Medfly is to be taken seriously, particularly in California. The state's warm tropical climate is ideal for the Medfly to lay its egg in fruits, nuts and vegetables, thereby ruining the crop. And California has crops—four counties in the Central Valley area grow more produce than 43 states.

Moreover, those crops—and Medfly eggs lurking in them—find their way across the nation. California grows nearly one-half the fresh produce consumed in the United States. Indeed, some plums, nectarines and peaches now piled on Polk County grocery shelves are imported from California. Imagine what would happen if a few Medflys hatched and found their way into Polk County's $1 billion citrus crop. California, which gave us freeways, hot tubs, sonic booms and smog also can dish out an agricultural calamity.

The Medfly could thrive here again as it did in 1956, before Malathion spraying ended it. Thus Florida agricultural oficials were understandably alarmed when Medfly eggs were discovered in California more than a year ago. Back then, quick, decisive action would have nipped it. But Gov. Brown waffled by deciding infected fruit would be hand-stripped from the trees, carted off and buried. Malathion—the only chemical known to effectively treat Medfly—would not be used.

Perhaps Gov. Brown took that option because he is considering a U.S. Senate bid next year and didn't want to send environmental voters scurrying from him like spectators watching a cross-eyed shotputter. So he ignored a recommendation from his own Medfly advisory committee to allow aerial spraying of Malathion.

To be sure, chemicals should not be scattered across the countryside willy-nilly. But Malathion has been tested by the National Cancer Institute and the Environmental Protection Agency and deemed safe. It is used in flea dips for dogs, yet deformed puppies have not inherited the earth. Common home insecticides contain Malathion. And so do Polk County spray trucks which have combated mosquitoes for the past 17 years. In addition, the chemical's potency dissipates quickly; crops sprayed one day can be harvested the next.

The evidence, then, indicated Malathion is safe and effective. And the evidence also indicated Gov. Brown's plan to hand-strip crops and bury the larva-infested fruit wasn't working. The Medfly infestation area grew larger every week.

The California Supreme Court finally put the issue in proper prospective by balancing the health hazards of Malathion against the

health hazards of a nation losing half its agricultural crop and possibly more if California exports infested other states. It ruled in favor of the Malathion spraying program offered by U.S. Agricultural Secretary John Brock in place of a nationwide embargo of California produce.

Gov. Brown, meanwhile, can happily say to his constitutents that Big Brother made him do it and at the same time pacify agricultural interests by giving them Malathion.

Ah, but here's the catch. To somewhat appease environmentalists, California is spraying only at night—a questionable time to apply Malathion, which is most effective in the morning hours when Medflys are milling about. And pilots can easily miss infected areas during a night sortie. "It's for the birds," noted Charles Poucher, Florida's chief of pest eradication.

But just to make sure Malathion is safe, Gov. Brown promised to spend a night in a Los Altos home when the Malathion helicopters descend on the city.

Who knows? Perchance it will do him good. Malathion could turn out to be a cure for political grandstanding.●

THE REAGAN ADMINISTRATION'S ANTIENVIRONMENTAL EXTREMISTS

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. BROWN of California. Mr. Speaker, one would have to be callous or naive to not have some concerns about the environmental policies, as they have been described in the general press, of the Reagan administration. What some people do not realize, as the controversy has centered on Secretary of the Interior James Watt, is that many of these same policies he is attempting to implement are being carried out throughout the Reagan administration. We appear to have a radical, destructive, and shortsighted anti-environmental ethic being articulated in policy positions throughout the Government. This is a matter which deserves, and will get, increased public attention.

Lest my colleagues think I exaggerate, I would like to share with them a recent editiorial from Oceans magazine. Most of you have never heard of this publication, which is published by the Oceanic Society. Suffice it to say that this is an apolitical publication that has never, to my knowledge, published a political accusation in its lifetime. However, the president of the Oceanic Society, Christopher du Pont Roosevelt, has written a forceful editorial on the Reagan administration, which has been published in the July issue of Oceans magazine.

I wish to share that editorial now with my colleagues:

DANGER SIGNALS FROM THE RADICAL RIGHT

(By Christopher Roosevelt)

Perhaps a strange title for an editorial in a nonpolitical journal: certainly an out-of-character subject for an Oceanic Society publication. Yet the pattern of policy and activities emanating from our national administration in Washington is causing us real concern for the wisdom, direction, and balance of our natural resource programs. More importantly, we sense a disquieting confusion in our country's inability to characterize properly many of these actions as radical and extreme rather than conservative and centrist.

Please do not get us wrong. We are not a political activist organization. In fact we have long held a reluctance to join extremist elements in any fray, far preferring to offer a rational process for decision making and conflict resolution based upon sound information, farsighted, balanced resource management principles, and the public interest. We also join wholeheartedly in the moves to reduce government, balance budgets, and stimulate the economy. But it is precisely because we see the need for many changes that we object strenuously to their accomplishment through a process that will weaken their vitality and that evidences ignorance, relies on irrationality and caters to self-interest.

A case in point: Who is minding the store? Late in May of this year, the New York Times published an editorial captioned "Foxes and Chickens". It pointed to several Reagan administration nominations that appear to contravene the spirit and the letter of laws by placing people in positions who have a record of opposition to the very programs of which they will now be in charge.

Thorne G. Auchter: a former Florida construction contractor, who worked to curtail federal enforcement of federal job safety and health standards, has been named as Assistant Secretary of Labor in charge of Occupational Safety and Health and in April this year exempted federal contractors from federal job safety standards.

John B. Crowell, Jr.: a former general counsel to the Louisiana-Pacific Corporation, the largest timber buyer from federal forests, has become Assistant Secretary of Agriculture in charge of natural resources and the environment, including the forest service. Ann M. Gorsuch: a former Colorado State Legislator, who vigorously opposed federal and state supervision of toxic wastes (in favor of local counties!) has been named as the Administrator of the Federal Environmental Protection Agency. James G. Watt: (need one say more than has come from his own lips?) headed a legal foundation supported by industry interests that advocated accelerated offshore development, strip mining and coal leasing, favored significantly greater development of public lands, and opposed federal environmental legislation, has been appointed Secretary of the Interior in charge of public lands and wilderness areas and responsible for serving the public interest in all the mentioned programs. Edward L. Rowny: a retired general, who participated in strategic arms limitation talks until 1979 when he resigned and publicly protested the proposed SALT treaty, has been named chief negotiator for the U.S. Arms Control and Disarmament Agency.

In the past, any attempts to place people in positions of authority where there was little likelihood of their serving the avowed legislative intent (the will of the people expressed through their elected representative), and where there was strong evidence of a penchant for dedication to private or other interests, were strongly rejected. Yet the litany grows longer, with essential and valuable policies and programs being cut or severely curtailed in an irrational process clothed in the guise of budget cutting that in fact encompasses little cost-benefit analysis, and often fuels quite private interests. Examples that are directly within the Oceanic Society's expertise are: Coastal Zone Management: local implementation funds are proposed to be substantialy cut with no planned phase-down that could allow state and local shouldering of budgets, thus effectively gutting the implementation of any coastal management.

Sea Grant: proposed total cut with minor funding for closing down a low-cost program that provides advisory services and applies research for marine businesses and fishing interests.

Law of the Sea: complete disruption of a long-term international treaty negotiation process that had the support of two previous Republican administrations and was viewed favorably (with some modifications) by much of the seabed mining industry.

Offshore Oil and Gas: Mr. Watt has, singularly, caused a completely unnecessary confrontation on OCS Lease Sale 53 between the Interior Department and all Western states, many Northern California communities, the California Coastal Commission and all conservation groups. He reversed an earlier negotiated compromise for the lease of, at best, questionable areas, not desirable to the oil companies, and very near sensitive and valuable marine ecosystems, productive fisheries, and shoreline tourism areas.

Sewage Treatment Plants: eliminated all 1982 construction funds, rescinded $1.7 billion in appropriations from prior years, and reduced future funding by about 50 percent, causing a virtual close-down in plant construction, an increase in coastal and waterway pollution, and a loss of thousands of construction jobs.

Water Resources Council: eliminated, thus abolishing the executive branch's only agency that can conduct independent reviews of proposed water projects.

Judging from these and many more actions by the Reagan administration and Secretary Watt, the entire perspective of government is being warped in a reckless and radical manner without process, without thought, and without reason. We do not believe that the "Reagan mandate" calls for unbridled irrationality. We do not believe it calls for abandoning productive, cost-effective programs. We do not believe it calls for catering to private interests at the expense of the majority. We do not believe it calls for the arrogance of one administration member's perceived Messianic complex to be substituted for declared Congressional intent and the will of the people.

Our call is for a return to responsibility, rationality, and reality. Let us not be drawn divisively into mindless and wasteful confrontation. We have accomplished too much.●

GRAND JURY REFORM BILL

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. CONYERS. Mr. Speaker, today I am introducing a bill to create a

right whose time has come. This bill would allow counsel to accompany a witness into the grand jury room—thereby helping to assure due process during all Federal grand jury investigations.

It is vitally important that the question of adequate representation of grand jury witnesses receive prompt congressional action. This question must be resolved because it seems that the due process revolution has overlooked the grand jury. Many of the major developments during the past 20 years in the criminal justice area have brought due process rights to defendants and targets of investigations. Despite developments such as the requirement of Miranda warnings, the right to counsel, and the right to be free from unreasonable searches and seizures, and despite judicial attention to the broader issue of what is appropriate Government conduct in the investigation of alleged criminal activity, only very recently has attention been focused on due process rights of those appearing before grand juries. See M. Frankel & G. Naftalis, "The Grand Jury" (1975).

Fairness demands that a lawyer be allowed to accompany the client before the grand jury. The right to assistance of counsel now requires the Government to guarantee the presence of counsel at every other key stage of a criminal justice proceeding, including custodial interrogation, *Miranda* v. *Arizona*, 384 U.S. 436 (1966), postpresentment, preindictment interrogation, *Brewer* v. *Williams*, 430 U.S. 387 (1977), and preliminary hearings, *Coleman* v. *Alabama*, 399 U.S. 1 (1970). The same right to counsel should also attach at the critical stage of a grand jury proceeding.

The American Bar Association, the American Law Institute, and numerous other professional groups have urged adoption of this critical reform on the basis of fundamental fairness; 102 ABA reports, resolution approved by the House of Delegates, report No. 115, Reports to the House of Delegates, August 1977; American Law Institute Model Pre-Arraignment Code section 340.3 (1975). The distinguished members and leaders of these organizations have the relevant experience in State and Federal courts to qualify them to advocate a workable reform.

Federal grand jury witnesses are now allowed to leave the room every time they wish to consult counsel. *United States* v. *Mandujano*, 425 U.S. 564, 581 (1976); *United States* v. *Kopel*, 552 F. 2d 1265, 1271 (7th Cir.), certiorari denied, 434 U.S. 970 (1977). See also note, "The Presence of Counsel in the Grand Jury Room," 47 Fordham L. Rev. 1138 (1979); American Bar Association, "Parallel Grand Jury and Administrative Agency Investigations; The Criminal and Civil Implications for Corporations and Their Officers" (1978). There are, however, a number of unacceptable problems with this procedure. First, the process of getting up to leave the grand jury room usually prejudices the witness in the eyes of grand jurors; as a result, witnesses are subtly discouraged from exercising their right to counsel. Second, this procedure delays the proceedings. Third, at least one court has said that a witness may be limited in the frequency with which that witness consults counsel outside the grand jury room. In re *Tierney*, 465 F.2d 806 (5th Cir. 1972). Fourth—and most important—the witness is often unaware when there should be consultation with a lawyer. Intimidated by the setting, witnesses often inadvertently waive their privilege against self-incrimination.

Some critics claim that allowing lawyers in the grand jury room will disrupt the proceedings. This allegation is contradicted by the experience of 16 States which now admit lawyers.[1]

There is too much at stake for a grand jury witness to be denied the right to counsel. The witness faces the possibility of having his/her fifth amendment right against self-incrimination taken away without consent, being jailed for contempt, perjury or evasive answers, as well as possible indictment. Counsel is essential to enable the witness to challenge the subpena and thereby minimize the systematic effect of the widespread abuse of the grand jury process.

Counsel has a pivotal role to play at every stage: raising the witness' rights in court, advising the witness in the appearance before the grand jury, and presenting a witness' claims to the grand jury to insure that it can fully evaluate the need and impact of the exercise of its coercive or punitive powers. Witnesses without counsel may incriminate themselves without even realizing that their own words could be used to convict them in a crime. People should not be tricked into jail.

We must balance the vast investigative power and efficiency of the Federal grand jury with a measure of fairness and due process. Allowing a lawyer to accompany a client before the grand jury will help achieve this goal. Such legislation providing for counsel in the grand jury demands our prompt attention.●

Laws Ann. §23-30-7 (Supp. 1978); Va. Code §19.2-209 (1975); Wash. Rev. Code Ann. §10.28.120 (Supp. 1978); Wis. Stat. §756.145.

In addition, the Louisiana Supreme Court has held that, in the absence of a statute, a juvenile has a right to be accompanied by counsel in the grand jury. *In re Grand Jury Subpoena (Graham)*, 27 Crim. L. Rep. 2346 (June 23, 1980).

PUTTING SOCIAL SECURITY ON A SOUND BASIS FOR OUR SENIOR CITIZENS

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. RUDD. Mr. Speaker, more than 36 million Americans depend upon social security benefits, and the news reports they hear daily about the shaky financial condition of the system are reason for great alarm.

In a recent Associated Press-NBC poll, 74 percent of those surveyed "expressed little or no confidence" that the social security system will pay off in their retirement. This is a clear indication that the American people want us to get down to business, and stop politicking.

Because of this, I believe the President's proposal addressing the root causes of social security's recurrent funding problems is good news. The administration has brought forth the true picture of just how serious the funding crisis is for those millions of retirees who have faithfully paid into the system. What everybody must recognize is that the funding crisis is real, and will not disappear unless steps are taken to assure the long-term solvency of the program.

Before I discuss just exactly what proposals have been mentioned, I think it is appropriate to recall what happened the last time solvency of the system was at stake.

Just 4 years ago, President Carter told the American people the social security system was in dire financial trouble. His solution was the largest single tax increase in the peacetime history of the Nation. Because of this, a high-paid worker is now subject to a maximum annual tax of $1,975, an astonishing rate when considering that in 1970 the amount was $374.40, and from 1937 through 1949, a meager $30 a year.

Unfortunately, the heavy tax burden set in 1977, which was proclaimed by the former President as the savior of the retirement system, was not the answer. It was a temporary and burdensome solution that simply passed the problem onto the backs of the next administration. The social security system is in deeper trouble now than it has ever been.

Without immediate action, the social security fund will run dry as early as 1982. In the past, Congress has propped up the program with exorbitant tax increases and cosmetic changes which have only exacerbated the problems and postponed the immi-

nent reckoning day. We must not evade this issue any longer. If we are to honor the commitment this Government has made to the millions of Americans participating in good faith in the social security program we must act to stabilize its funding.

Let me explain how the original concept of the program has dramatically changed since 1935. If an employee had been paying the maximum amount to the system since 1935, he or she would have paid in as of 1980, $12,790.64. If the worker retired at age 65 earlier this year, after having paid the maximum tax, that worker would be eligible for a benefit of $677 per month. That means that the individual worker would have received from the system all that he or she paid in with 19 months, or within 13 months with the combined benefit for worker and spouse.

Since social security became law nearly 50 years ago in 1935, it has grown far beyond the original intent of the congressional mandate that created it. Widespread liberalizations have occurred in 1939, 1956, 1960, and 1965 through the addition of survivors benefits, disability benefits, medicare, early retirement, and even benefits to pay for college tuition for students whose families have outside incomes. Today social security is more a welfare program than an insurance program.

It is primarily the welfare programs—many of which simply overlap with already existing programs, like supplemental security income—that we need to reform, not the basic program structure. The original intent of the social security system was to provide a base of retirement security to assist our Nation's elderly population. If this contract was followed to its word, there would be no program crisis today.

Today, because of the birth rate decline and the rise in our life expectancy, there are only three workers for every one who is retired. At the present rate, the ratio will be 2 to 1 in the year 2055. These figures compare with the ratio of 11 to 1 person 65 years or older paying into the system when the program was instituted in 1935.

The essence of what I am communicating is that we must avoid the misguided and politically advantageous approaches of the past and concentrate on preserving the system on a permanent basis for the retirees who have worked and planned on receiving the benefits for which they are entitled.

I want to emphasize that we cannot consider legislation which will jeopardize those retirees who have already based their plans in the near future on the benefits available under the current system. Any changes must be fair and designed to give all Americans time to adjust.

To be sure, none of the proposals by the President remove from the roles or cut benefits for any current recipients of social security. Retirees who are dependent on monthly checks should not feel threatened by the administration's facing up to the funding crisis.

Frankly, it is a breath of fresh air to hear President Reagan tell it like it is. It is this type of courage and foresight which will allow Congress to address these critical problems openly, and honestly, without retreating into another makeshift solution. We can now tackle this controversial issue head on and take the appropriate action to save the system.

There are a number of proposals being looked at to restore the integrity of the social security system. Among them:

One. Encouraging work until the traditional retirement age of 65. This reduction would be scaled so that each month spent on the work force past age 62 would increase the level of a person's benefits. This would not mean any change in the full retirement age.

Two. Elimination of the vocational rehabilitation funding.

Three. Correct certain inequities which allows Federal retirees who enter social security-covered employment for only a few years to receive higher benefits than low wage earners who contribute to the system for a lifetime.

Four. Placing an overall cap on disability benefits so the such payments from all public sources do not exceed one's prior earnings, adjusted for inflation.

Five. Financing the medicare portion in whole or in part through general tax revenues and the shifting of medicare funds to the retirement and survivors account.

Six. Allowing the transfer of funds from one trust fund to another within the three separate funds—retirement and survivor, disability, and medicare.

Seven. Financing the social security system through general revenues.

Eight. Delaying or recomputating cost-of-living allowances.

Nine. Elimination of future student tuition benefits, or a reduction in those benefits.

Ten. Relate disability insurance more closely to medical factors, and not on such factors as age, education, and work experience.

Eleven. Adjust or eliminate the "unearned" minimum benefit so that beneficiaries with additional income sources are not receiving more than they put in the system.

Twelve. Raising the retirement age to 68 on a gradual basis over 20 years.

I should also point out that there are several proposals being considered, like the President's recommendation to phase out the retirement earnings test, which would stop penalizing beneficiaries for continuing to earn outside income past the retirement age.

Of course, in dealing with any of the alternatives mentioned above, we must be flexible and willing to address the real inequities of the current benefits structure. As the President has suggested, any changes must be looked at in such a manner to insure that the social security system is put on a permanently sound financial basis—for both present and future retirees.

As Members of Congress, we should put unfair political rhetoric aside on this vital issue, and take an indepth look at each and every one of the available options. With his candid appeal, the President has offered a foundation from which we must take action to keep the social security system afloat.

I am confident that we can administer the necessary reforms so that our senior citizens can once again rest assured about their hard-earned retirement benefits.●

HIGH INTEREST RATES PAINT GRIM PICTURE

HON. DONALD J. PEASE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. PEASE. Mr. Speaker, I have in recent weeks been trying to direct the attention of my colleagues to the very serious effect on interest rates of the Reagan economic policies—particularly the President's insistence on a 3-year tax cut which will create huge budget deficits in at least the next 3 fiscal years.

Mr. Speaker, the Reagan economic package will insure that devastatingly high interest rates will continue—thus wreaking havoc in the homebuilding, real estate, savings and loan, and auto industries.

This grim prospect was corroborated this past weekend in an incisive analysis by syndicated financial columnist Dan Dorfman. I commend it to the attention of my colleagues.

HIGH INTEREST RATES PAINT GRIM PICTURE

(By Dan Dorfman)

Everyone's griping about those murderously high interest rates. But what are the implications? And what's the latest word on the subject from Dr. Death (economic guru Henry Kaufman of Salomon Brothers)? And where do rates go from here? For some answers on the hottest economic story of the day, read on.

First the implications, and they're ominous.

A million more people will be thrown out of work by October—ballooning the ranks of the jobless to about 8.8 million.

The bankruptcy rate among small businesses, already running at a record 313 a week thus far in 1981 (up from 220 in the

comparable 1980 period), could shoot up another 10 percent or so.

The illiquidity in the housing market—namely, the ability to sell your home—will worsen in the face of those booming mortgage rates (over 16 percent nationally).

As for the stock market, given the prospects of deeper than expected corporate earnings declines because of the lofty rates, the recent agonizing sell-off should continue and possibly accelerate (though allowing for periodic rebounds).

This bleak scenario is sketched by Ed Yardeni, E. F. Hutton's chief economist.

The Federal Reserve is so bent on breaking the back of inflation that the bottom line from Washington has to be policies designed to increase the level of pain, he told me the other day.

There's no denying that the Fed intends to hang tough with stingy credit allocations (which will obviously intensify the severity of any economic decline). Fed boss Paul Volcker made that abundantly clear last week when he told the House Banking Committee that the Fed has lowered its monetary expansion goals for the balance of 1981, as well as for 1982.

The Fed's targets for growth in money supply—that's the cash in circulation, plus checking deposits—range from 3½-6 percent. And the Fed is going to continue to focus on the lower end of that range.

Yardeni, who's now forecasting a 2-3 percent decline in real gross national product in the current quarter (after a 1.9 percent drop in the second quarter), sees the unemployment rate rising from its current 7.3 percent to just under 8 percent by October.

And that means, says Yardeni, that the surging number of layoffs, such as the loss of 160,000 jobs in the construction industry in just the last 2 months alone, will spread to a host of other sectors. These will include business equipment manufacturing (from semiconductors to transportation and mining equipment), the retail trade (including more layoffs in the auto and auto-related areas) and services (from hotels to travel agencies).

The pain will be felt almost everywhere, he says.

Back a few weeks ago during the spirited bond market rally, critics of Henry Kaufman, the well-regarded and well-publicized, interest-rate bear, were lambasting the man some call Dr. Gloom or Dr. Death for rigidly holding to his grim prediction of still higher rates. The growing consensus was that rates had finally peaked. Well, rates did drop, but they quickly went back up again. And the bond market took a drubbing.

Now, with the Fed reiterating its tight-credit policies, Kaufman is beginning to pick up some supporters. There's a growing view, though still in the minority, that the killer rates could remain at current levels possibly through the rest of 1981. And some financial pros are grudgingly conceding the possibility of still higher rates.

In a brief update, Kaufman told me "how high is high is difficult to say." But he believes the roughly 17½ percent interest paid by money-market funds could rise to about 20 percent. And further, he felt the prime rate—the rate at which banks lend money to their best customers—could increase several percentage points above the all-time high in the prime of 21½ percent.

"We're in an environment of volatility and interest rates will fluctuate, but on balance they're going higher," Kaufman says.

His reasoning is simple enough. He regards Reagan's economic program—namely, a tax cut and a large increase in defense spending—as inflationary. And high inflation and high interest rates go hand in hand.

Accordingly, it's Kaufman's view that at some point down the road—with one arm (the administration) trying to stimulate and the other arm (the Fed) trying to exercise restraint, you could wind up with a potential credit clash. The end result of this, as he sees it, would be still higher rates—with rising illiquidity leading to the prospects of some major corporate failures. Is there a way out of the high interest-rate mess?

Only if there's a major change, responds Kaufman. And by major change, he means at least one of the following: (1) an administration push to cut government spending even more, (2) lowering the proposed tax cuts, (3) a cutback in the amount of defense spending, (4) wage-price controls, and (5) the initiation of new programs designed to control the total growth of credit.

For the moment, at least, Kaufman isn't holding out any hope, since he believes that Washington does not yet fully perceive the problem.

"It bothers me greatly what's going on in this country," he says. "To be hopeful and to be wrong (without doing anything) will lead to a disaster."

One of the ongoing arguments of the forecasters of a sharp drop in rates is that a combination of a sagging economy and declining inflation will be sufficient to knock them down. But one economist who's been right on target in his rate predictions this year, the outspoken Pierre Rinfret of Rinfret Associates, challenges this view. He expects rates to remain at their current high levels for the remainder of the year.

With a tax cut likely coming in October and defense spending increasing in the fourth quarter at an annual rate of 20-30 percent, it would be insanity for the Fed to ease up just before a period of stimulation, observes Rinfret. "That would mean Volcker throwing away his whole inflation battle. It'll never happen and you have to be crazy to think otherwise . . ."●

EASING ONE MARRIAGE PENALTY MAY ONLY CREATE ANOTHER

HON. STEVE GUNDERSON

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. GUNDERSON. Mr. Speaker, one of the many idiosyncrasies of our income tax system is what is commonly referred to as the marriage penalty. Simply stated, under current Federal tax laws, two persons with individual incomes will pay less Federal income tax if they are single than if they are married.

There appears to be a consensus in Congress and throughout the country that it is bad public policy for the American tax system to create disincentives to marriage. As such, this disparity must be corrected. At that same time, however, we must be very careful in exactly how we remedy this differential.

Both of the major tax packages presented to Congress for consideration this week claim to "ease" the marriage penalty by permitting a deduction of a percentage of the lesser earning spouse's wages.

This deduction will, in fact, minimize the existing differential in taxation between the case of two single individuals who, for example, have a combined income of $25,000 in 1980 and the case of the two-earner married couple who make the same amount of money. Yet, at the same time the deduction creates a new disparity between the two-earner married couple and the traditional one-earner family.

To illustrate this, let us consider these family units in 1984 assuming that they each have family incomes of $33,674—adjusted for inflation from $25,000 in 1980. Under either of the major tax plans before us, a 10-percent deduction would be applicable to the lesser earning spouse's wages of the two-earner family.

Further assuming that the "lesser earning spouse" makes 25 percent of the total wages of the two-earner family, they will pay $3,297 in Federal income taxes in 1984. The one-earner family, on the other hand, will pay $3,682 in Federal income taxes. Thus, the easing of one marriage penalty has created another.

It seems to me that the same pro-family public policy that determined it is wrong for our tax system to discourage marriage would also say that it is improper for our tax system to penalize one-earner families because one spouse has chosen to remain at home with the family unit rather than to become a second wage earner.

Mr. Speaker, we must move to ease, if not totally eliminate, the existing marriage penalty. We should not, however, do this at the expense of one-earner families.●

PRESIDENT REAGAN'S PROGRAM OF REGULATORY RELIEF

HON. JOE SKEEN

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. SKEEN. Mr. Speaker, today I would like to generally address the economic recovery package and specifically, regulatory relief. President Reagan has commenced a number of swift, effective actions to eliminate unproductive and unnecessary regulations, better coordinate and improve the management of the entire regulatory process, and reduce Federal intervention in the lives of all Americans. Let me take this opportunity to highlight the administration's efforts in this regard.

These actions include:

ESTABLISHMENT OF THE TASK FORCE ON REGULATORY RELIEF

On January 22, the President created a cabinet-level Task Force on Regulatory Relief, chaired by Vice President George Bush. Among its ongoing responsibilities, the Task Force will review proposed regulations, assess existing regulations with an eye toward their revision, and coordinate proposals for legislative change.

POSTPONEMENT OF PENDING REGULATIONS

On January 29, the President requested the heads of 12 Federal departments and agencies, to the extent permitted by law, to postpone the effective dates of regulations scheduled to become effective before March 29 and refrain from issuing any new final regulations during the same 60-day period. This action was taken to allow review of regulations issued during the previous administration, allow time for Reagan Administration appointees to familiarize themselves with the details of these regulations and programs, and allow the Presidential Task Force on Regulatory Relief to develop procedures to improve management and oversight of the regulatory process.

SIGNING OF EXECUTIVE ORDER 12291

On February 17, the President signed a new Executive Order designed to produce better quality regulations. The Executive Order sets forth the President's regulatory principles; directs agencies to determine the most cost-effective approach for meeting any regulatory objective; requires that agencies prepare Regulatory Impact Analyses to evaluate the potential benefits and costs of their major regulatory proposals; and establishes the pre-eminence of the Presidential Task Force in spearheading the Administration's regulatory relief efforts.

ANNOUNCEMENT OF CHANGES IN NATIONAL AIR POLLUTION RULES

On March 7, the Vice President, in his capacity as Chairman of the Presidential Task Force on Regulatory Relief, announced that the Environmental Protection Agency would propose an important change in its national air pollution regulations. The change, dealing with EPA's treatment of new sources of air pollution, sharply reduces Federal restrictions on new industrial development while continuing to protect the public against air pollution hazards.

FURTHER POSTPONEMENT AND REVIEW OF FEDERAL REGULATIONS

Building on the actions announced by the President on January 29 and February 17 for more cost-effective regulations, the Vice President on March 25 announced that 63 regulations which had been in effect or awaiting adoption by a number of government agencies would be candidates for modification or elimination.

The Vice President also announced that: (a) he had solicited views on regulation and priorities from business, labor, consumer, academic, and other groups, (b) the Environmental Protection Agency had approved New Jersey's rule to permit more flexible emission standards, known as "bubble" rules, and (c) the Calendar of Federal Regulations would continue to be published, with input gathered from both executive and independent agencies.

INITIATIVES AFFECTING THE AUTO INDUSTRY

On April 6, the Administration's Auto Industry Task Force and the Presidential Task Force on Regulatory Relief announced changes in regulation designed to save the U.S. auto industry $1.4 billion in capital costs, hold down consumer prices by some $9.3 billion over the next five years, and return 200,000 idle auto workers to their jobs by the end of 1982.

REGULATORY RELIEF ACTIONS AT THE AGENCIES

Many cabinet departments and agencies, in coordination with the Presidential Task Force on Regulatory Relief, have taken significant regulatory actions of their own. These include:

On February 2, the Secretary of Education withdrew the proposed bilingual education rules. These rules would have required all school systems to offer bilingual instruction to each child whose primary language is other than English. The Department estimated that the proposed rule could have cost up to $1 billion over the first 5 years of the program and an annual maintenance cost of between $72 million and $157 million thereafter.

On February 17, the Secretary of Energy:

Announced that national energy efficiency standards for major household appliances will not be issued until a thorough review is completed. The 1980 proposal would require producers to redesign, by 1986, virtually all existing models of these appliances, and retool their production lines. As a result, many small firms would probably be forced out of business and consumers would face sharply higher costs—about $500 million annually. Low-income families could be especially hard-hit, since the standards would inhibit the production of lower cost appliances.

Withdrew proposed standby energy conservation measures involving a compressed work week, vehicle use stickers, and the part of the employer-based commuter and travel measures concerning working hours and transit subsidies. In addition, the Secretary proposed to withdraw several interim final measures, including odd-even day motor fuel purchases, additional employer-based commuter and travel measures, increased enforcement and/or reduction of the 55 m.p.h. speed limit, and mandatory temperature restrictions. This action rescinded measures which, if implemented, would have interfered excessively in citizens' daily lives.

On February 17, the Director of OMB revoked the Department of Energy's clearance under the Federal Reports Act for the collection of industrial energy consumption data. This action terminated the collection of industrial energy data for sites not subject to Federal regulation and precluded the Federal Government from expanding certain regulatory programs.

On February 17, President Reagan revoked Executive Order 12265, which established a cumbersome, duplicative, and burdensome regulatory policy regarding the export of some hazardous substances. The rescinded Executive Order would have threatened American workers' jobs and could have disrupted production abroad where affected U.S. exports serve as vital material inputs. Procedures already exist which inform foreign governments of hazards associated with exported American products.

Mr. Speaker, I am confident that this administration and the regulatory relief task force headed by Vice President GEORGE BUSH will produce results at no cost to the safety of our workers or the sanctity of our environment. Now is the time to lift the regulatory burden from the backs of the American people. I urge you, my colleagues, to support the President in his efforts. The people are concerned about the Government's ability to devise an effective agenda for the years ahead. Regulatory reform is a key part of this agenda. If we act positively, and we act soon, we will send a message to the American people that we have heard their message and that we will act reasonably in reflecting their will.●

TAX LAWS MUST BE FAIR

HON. AL SWIFT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. SWIFT. Mr. Speaker, there is another issue related to taxes that concerns people besides tax cuts—that is the fairness of our system. Howard Pellett of Bothell, Wash., said it well in a recent letter to me.

The American tax system is disintegrating through the proliferation of tax shelters and tax protestors and because of inadequate staffing and budget for IRS. It is imperative that legislation be passed to both strengthen and simplify the tax laws.

Americans are concerned that our tax laws be fair and that the IRS not have arbitrary or dictatorial authority to enforce them. Frankly, these issues are not really being considered by either the administration or the Congress during the current debate. We are concentrating on the size and type of tax cut rather than overall reform of the tax system. Perhaps it cannot all be done at once, but a tax system that treats everybody fairly would seem to be a very high priority.

I urge the Ways and Means Committee to concentrate on this issue of the integrity of the tax system as soon as its heavy workload on the tax cuts and social security revisions is complete.

Whatever Americans believe about whether we need a tax cut or not, how great it should be, Kemp-Roth or not—if they lose faith in the fairness and responsibility of the Internal Revenue Service itself the equitable enforcement of our tax laws, whatever they may be, will become a nightmare. It is our responsibility in Congress to exercise the oversight necessary to see that does not happen.●

HOYER JOINS OBSERVANCE OF SEVENTH ANNIVERSARY OF INVASION OF CYPRUS

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. HOYER. Mr. Speaker, I wish to add my voice to those of my distinguished colleagues in expressing concern over the situation on the island of Cyprus. I also wish to thank my col-

league, Mr. YATRON, for raising this important issue.

Though I am new to Congress, I am very familiar with the problems of the Cypriot people. Until 1960, the citizens of the island were never allowed to exercise the fundamental right of self-determination. Instead, the island was for centuries a battleground for and a spoil of victory of invading armies. The people, subjugated and exploited by leaders of countries miles away, had no right to speak for themselves. Yet they suffered the consequences of the changing balance of power in the region.

In 1960, the island became an independent republic for the first time. At long last one of the wealthiest islands in the Mediterranean Sea was free to utilize its rich resources to establish its own identity in the community of nations. But the promise of peace and prosperity was shattered by the actions of external forces, which sought once again to subjugate the island and its people. And now, 7 years later, Greek and Turkish Cypriots alike have yet to recover.

The present situation on Cyprus has had grave consequences for the parties involved. The economies on both sides of the attila line which separates the Greek and Turkish sectors have suffered. Even though Turkey controls 70 percent of the island's former productive capacity, it has been unable to repair the damage done to the land by the invasion and restore that sector to its former usefulness. And while the Greek Cypriot Government has engaged in an aggressive economic revitalization program in the southern sector, the loss of the resources of the north has slowed the rate of economic recovery and growth.

The social structure of the country has been damaged, perhaps irreparably. A total of 200,000 Cypriots are refugees in their own country, many of whom are still living in emergency housing. An additional 2,100 people, including 8 American citizens, are still unaccounted for. After 7 years, even the most hopeful and optimistic of people must begin to face the prospect of a life separated from home and loved ones.

In the past, Greek and Turkish Cypriots coexisted peacefully, if not always happily. With the separation of these groups by the enforced division of the island, such peaceful coexistence is no longer possible. The effect of this is to prevent the natural evolution of peace and trust through understanding and acceptance of the differences between people. The present environment breeds hatred, prejudice, and intolerance, an unhealthy condition for people of any society.

Mr. Speaker, the ramifications of the Cyprus situation go beyond the confines of the island's shores. The situation has strained relations between Greek and Turkish Governments, relations which are already weakened to the point of collapse by centuries of animosity. This tension between our two allies has also destabilized the eastern Mediterranean and the southern flank of the NATO alliance, which in turn threatens vital national security interests of the United States. This situation cannot continue if the peace and security of the area is to be maintained against a growing Soviet naval presence in the Mediterranean Sea.

It is time to end this crisis, which has produced no victors, only victims. I join my colleagues in requesting the President to urge all parties to this conflict to expedite a lasting solution so that Cyprus can regain its status as an independent nation, and so that the Cypriot people can reunite and begin the long process of economic and social recovery and bring some peace to a troubled region.●

BIPARTISAN TAX SUBSTITUTE

HON. LYNN MARTIN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mrs. MARTIN of Illinois. Mr. Speaker, today, I want to express my pleasure in what is about to take place in the House later this week: Meaningful tax relief for those American citizens who have been paying more and more in taxes and living on less and less. I find it very gratifying that we are about to do what only a year ago was merely a dream.

A $35.8 billion tax cut for 1982, combined with the $37.1 billion cut in outlays made through the reconciliation bill, will put us right on target for economic recovery and a balanced budget. Locking in tax cuts for 3 years will give the American people confidence that inflation can be controlled and our economy revitalized.

I support the bipartisan substitute program because it does assure cuts for 3 years, and indexes beyond that to insure that bracket creep does not raise taxes again, without congressional action. I also support the bipartisan program because of the difference it makes to my home State of Illinois. Under the bipartisan plan, Illinois will receive $88.2 million more in cuts over 3 years than under the Ways and Means plan.

I must reiterate my pleasure at being able to make good on our promise for tax relief.●

STATEMENT BY REPRESENTATIVE ROBIN BEARD

HON. ROBIN L. BEARD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. BEARD. Mr. Speaker, my interest in this Nation's military preparedness has long been a matter of record. Recently, events have come to my attention which reinforce my belief that the All Volunteer Force does not provide the quality of manpower necessary to maintain a proper level of preparedness. In recent European contests with our allies, reported by John Fialka of the Washington Star, U.S. crews consistently finished poorly despite the fact that they were operating more sophisticated equipment. In a tank shooting and maneuvering contest held last June in Bavaria, our tank crews finished 5,000 points behind the winning West German team. These tanks were M-60A3's, technically the most superior in Europe, and were operated by our best units available in Germany; the very units which would be called upon in case of any military action.

In another contest staged in Britain, U.S. airmen flying the B-52H, the most recent version of the B-52, finished 13th, 15th, 19th, and 22d out of 22 planes in a bombing contest codenamed "Double Top." British pilots participating in the "far less-sophisticated" RAF Vulcan were shocked at the inferior performance of the technically superior U.S. squadron.

Another distressing episode occurred at the Volante Rodeo, a U.S. military airlift command contest held at Pope Air Force Base in North Carolina. A British RAF security police unit had to arrive early in order to learn how to use the American-made M-16's and then went on to humble U.S. Air Force units by winning the contest.

An even more recent and potentially catastrophic example of the dismal quality of much of the AVF's manpower took place on July 14 during U.S. naval training exercises in the vicinity of St. Croix Island in the Caribbean. On that date a destroyer the U.S.S. *Coontz,* accidently launched an active Harpoon missile. The Harpoon is a surface-to-surface missile, appoximately 15 feet long and carrying 215 pounds of high explosive. Fortunately, the wayward missile apparently did not hit anything of consequence but, nevertheless, one can conceive of the possibly devastating effects of such future accidents.

Today, I have obtained a copy of the Navy's preliminary report on the matter. This report states that "a detailed initial review of all factors leading to the inadvertent launch indicates that neither design deficiency nor ma-

terial failure contributed to the event." Instead, the report blamed the inadvertent launching on "a series of substantial personnel errors, including failure to follow test procedures and improper test sequencing." Thus, a live Harpoon missile was launched toward our own territory because of the inability of naval personnel to follow test procedures and sequencing.

The above incidents glaringly point to the need for an investigation of the AVF and its manpower quality capabilities. Members should not be deluded by the new wave of assurances from the Pentagon that the AVF is showing signs that it can eventually become a viable force. One cannot ignore the constant failure of our forces in competition and in training exercises where, despite superior weapons technology, they continue to perform abominably.●

EXPANDED DEFENSE BUDGET DOES NOT CONFLICT WITH CARE OF NATION'S AGED

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. McDONALD. Mr. Speaker, Mr. Speaker, last Friday, the Subcommittee on Retirement Income and Employment of the House Select Committee on Aging held a hearing to "Examine the Effect of the Recently Approved Budget on Older Americans, Specifically Concerning the Proposed Military Spending for the Next Four or Five Years." Certainly, the title to the hearing is not very well constructed, nor were the arguments heard that all our senior citizens were doomed as a result of the increased defense budget. Two witnesses who took the view that the increase in our defense budget was long overdue and need not conflict with the care of the elderly were Mr. Howard Phillips, national director of the Conservative Caucus and retired Adm. Thomas H. Moorer, former Chairman of the Joint Chiefs of Staff. I insert their two statements in the CONGRESSIONAL RECORD at this point for the edification of my "chicken little" colleagues who are running about saying, "The sky has fallen in." The statements follow:

STATEMENT BY HOWARD PHILLIPS

Mr. Chairman, the stated purpose of this hearing is to "Examine the effect of the recently approved budget on older Americans. (sic) Specifically concerning the proposed military spending for the next four or five years."

In this context, it is indicated that "hearings will address the following questions:

"1. From where does the military budget for the next four or five years take its money from (sic) . . .

"2. Offer views on what the economic and psychological impact on older Americans will be due to the reduction in social spending and the increase in military spending.

"3. Inflation reduces real income. To what extent will the Administration's proposed military buildup add to current and future inflation rates and, therefore, erode real income of those on fixed incomes."

The unstated, but clearly implied premise of these hearings, Mr. Chairman, is that a conflict exists between, on the one hand, your constitutional obligation to provide for the national defense and, on the other hand, the interests of certain of our citizens.

A corollary implication of this premise is that, because of their calendar age alone, certain Americans are less concerned about, and have less of a stake in assuring an adequate defense for our country.

I challenge your premise.

No government to which responsibility for managing the people's public affairs has been delegated can be judged to be faithfully performing its duties if it fails to undertake all that is necessary to assure the nation's independence from external domination or destruction.

All Americans, regardless of age, sex, race, economic status, religion, or national origin, have the same preeminent stake in national survival and self-preservation, which each individual has in personal survival.

No other issue, no other consideration ought to be allowed to obscure this compelling reality. The defense of the nation must come first.

As General Douglas MacArthur said in 1936, quoting Dioysius, "It is a law of nature, common to all mankind, which time shall neither annul or destroy, that those who have greater strength and power shall bear rule over those who have less."

The overwhelming majority of Americans recognize that our nation is worth preserving and defending, and they realize that growing Soviet power must be countered. Those Americans born prior to 1921 or 1916 are no less patriots than those born at a later date.

The task of the Select Committee on Aging's Subcommittee on Retirement Income is not to pose a conflict between the nation's elderly and the citizenry as a whole. Such a conflict does not exist. Once it is determined what measures and expenditures are required to defend America, then, with those resources remaining, other priorities may be established and determinations reached as to how those priorities may best be met.

Inflation is, indeed, a threat to the well-being of all citizens, particularly those relying on fixed incomes or past savings and investments.

In order to achieve a balanced budget, get the Federal government out of the credit markets, lower interest rates, and thereby control inflation, it is vitally necessary to reduce government spending overall to the level of government receipts.

To stimulate the growth of the economy and reduce the growing economic squeeze which excessive government spending has imposed on all of us, we must also sharply reduce taxes.

If, as has been adjudged to be the case, additional resources are to be devoted to defense, and if, at the same time, we are to reduce taxes and hold expenditures to the level of income, it is therefore necessary to reduce and eliminate Federal programs which are not absolutely necessary to our economic and military survival.

As Lincoln said, "we must think anew, and act anew." Only thus can we fulfill our solemn obligation to our parents and grandparents.

Thank you.

STATEMENT BY ADM. THOMAS H. MOORER

Mr. Chairman and Members of the Committee, I am pleased to participate in this important hearing which is being held regarding the economic and social implications involved in the federal budget for fiscal year 1982.

While I do not claim to be an expert with respect to either the budget or social programs overall, I do feel I am well qualified to discuss the budgetary policy concerning defense.

In the first place, I do not consider that the caring for elderly Americans, or for that matter any American who is physically unable to care for himself, on one hand, and the provision of sufficient defense to provide maximum deterrence as well as fighting capability, on the other hand, are in any way in conflict. In short, it is not an either/or situation.

While it is true that our defense budgets degenerated from 43 percent of the federal budget during the Eisenhower administration to something on the order of 24 percent prior to the advent of the Reagan administration, I am very pleased to see now a reversal in this dangerous trend. We are now in effect playing catch-up ball and it will take several years to restore our military fighting capability and staying power to the required level. In recent years there has been an increasingly negative budgetary impact on the combat readiness of our armed forces. To seek a few examples: it is obvious that during recent years our military personnel have been underpaid and consequently the most qualified and experienced men have been leaving the services at an alarming rate. Secondly, the personnel level of the reserve forces has reached a totally unsatisfactory state. Furthermore, consumables, such as missiles, rockets, bombs, shells, etc., are also at a very low level. These items in our stockpiles are necessary in order to provide staying power. Certainly anyone can understand the danger of getting involved in some kind of conflict and then very shortly thereafter expending all available ammunition.

Mr. Chairman, in your letter to me of 14 July you posed several specific questions which I will attempt to answer.

Question 1. Does the proposed military budget for the first half of the 1980s enhance our security?

Answer. I would answer that question by stating that the proposed military budget as proposed by President Reagan not only enhances our national security, as a matter of fact, it will restore our national security which at present in my view at least is in an unsatisfactory state. Not only must we build up the stockpiles of consumables as stated above, but also it is necessary to take advantage of technology and move forward with the development and production of many critical items. Certainly we will be unsuccessful in deterring aggression and possible conflict if we are perceived by any potential enemy as being unprepared to protect our interests worldwide.

Question 2. Are the proposed cuts in social programs which benefit the elderly as well as the proposed reductions in social security benefits beneficial to our national security?

Answer. I certainly think it is crystal clear that in recent years we have extended all social programs to the point that not only

do we run an ever increasing deficit with respect to the federal budget, but I believe in many instances the welfare program and the various handouts made by the federal government have destroyed initiative and, in fact, encouraged many of our people to sit on their hands since they have come to the conclusion that whatever they need will be supplied by the government. In short, unless this trend is reversed we will very shortly have more tax eaters than tax payers, however, with the same budget.

I would like to point here that if there is any social security at all, this should be focused on the elderly and those who suffer physical handicaps which prevent them from providing for their own support.

Finally, in response to your question, I do not think that one can equate cuts in social programs or benefits to the elderly with the funds required to the proposed buildup of our national security. In other words, I do not think they are in any way in competition. The point here is that if we do not provide for our own defense all other questions, including social programs and benefits, stand moot.

Question 3. Do those proposed reductions harm our older Americans?

Answer. As I said before, I am not familiar in detail with the extent of the proposed reductions. Obviously any cut in benefits to which one has become accustomed results in some difficulties. However, in my view, the allocation of those resources that are made available for social programs should give top priority to our older Americans as well as those that are suffering some physical and mental impediments which prevent them from self-support.

Question 4. How would you rectify the problems caused by reductions in social programs?

Answer. While I recognize that some problems and indeed hardships may be caused to those who are accustomed to receiving extensive benefits over a period of time, at the same time it should be clear to all there is a limit to which the American taxpayer can be expected to go on providing social benefits of every kind imaginable. In my view, the best way to rectify any problems which may arise from reductions in social programs is to invigorate the economy, reduce inflation, and do what we can to improve the purchasing power of those who can least afford the budget reductions.

In summary, Mr. Chairman, I would simply say that I feel that every American is quite willing and ready to support or to provide social benefits to the elderly and incapacitated. However, I do think that the majority of Americans are getting sick and tired of the many many handouts which have been introduced to our social programs in recent years. And, finally, in any event, I do not see that the budget for social programs and the budget for defense are in an either/or situation. The increase in the defense budget as proposed by President Reagan is long overdue.●

THE PLIGHT OF BENJAMIN LIVSHITZ

HON. HAL DAUB

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. DAUB. Mr. Speaker, I want to call attention to the plight of Benjamin Livshitz, a longtime refusenik in the U.S.S.R. Since 1971 this man and his wife have attempted to reunite with their children in Israel.

The excuse for repeated denials of this simple request is Mr. Livshitz' access in 1948 to sensitive material. Mr. Livshitz in that year completed service as a colonel in the Soviet military.

It is difficult for us in the West to comprehend a restriction on this basic freedom of travel. It is also difficult to comprehend a political system which denies a couple's innocuous request to reunite with their loved ones at a time when both are in their older years and in ill health.

Mr. Speaker, I am sure that all Members will join me in publicly urging the Soviet Union to allow the emigration of Mr. and Mrs. Livshitz.●

BABY GULLS AT MONO LAKE HAVE DIED

HON. NORMAN D. SHUMWAY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. SHUMWAY. Mr. Speaker, on July 22, the Los Angeles Times published a disturbing article which reported that nearly all of the baby gulls at Mono Lake have died this year. Researchers indicate that a lack of sufficient food—in this case, the lack of brine shrimp which have always been readily available—is to blame for this most recent turn of events. The problem is no doubt linked to the increased salinity levels of the water and the continued decline of the lake level because of water diversion by the city of Los Angeles.

As my colleagues are aware, I recently introduced legislation—H.R. 4057—which would establish the Mono Lake National Monument and thereby provide recognition commensurate with the significant biological and geological resources of the Mono Lake Area. Although such action would not interfere with existing water rights in the Mono basin, H.R. 4057 would promote greater visibility and increased management for this precious national treasure.

I urge my colleagues to join myself, Mr. THOMAS, Mr. FAZIO, Mr. DYMALLY, Mr. LANTOS, Mr. MARKEY, Mrs. FENWICK, Mr. FORSYTHE, Mr. BONIOR of Michigan, Mr. EDGAR, Mr. YOUNG of Alaska, Mr. WINN, and Mr. HYDE in sponsoring H.R. 4057, and in calling for hearings at the earliest possible date. Surely, as the following article points out, this issue deserves to be addressed by the Congress in the immediate future.

[From the Los Angeles Times, July 22, 1981]

NEARLY ALL OF BABY GULLS AT MONO LAKE HAVE DIED—DROP IN FOOD SUPPLY BLAMED

(By Robert A. Jones)

The gulls of Mono Lake have suffered another disaster. Almost all of the baby gulls in this spring's hatch have died, apparently because the adult birds were unable to find sufficient food in the lake itself.

Researchers say the cause of the food shortage has not been established but several indicated that "circumstantial" evidence pointed to the continued decline of the lake and increased salinity levels of the water.

The volume of the lake on the eastern slopes of the Sierra Nevada has been shrinking steadily as a result of a water diversion program by the city of Los Angeles.

Only a month ago, the gulls were believed to be having a modestly successful year on their breeding islands in the midst of the lake. Surveys counted 11,700 chicks, far below past levels but more than some biologists had expected.

Even as the survey was taking place, however, the newly hatched chicks were weakening from lack of food. The brine shrimp in Mono Lake that always have been used by the adult birds to feed their young suddenly were not available. The chicks began to flounder, some succumbing to heat prostration or parasites, others starving outright.

At last count 97% of the chicks had died, according to David Winkler, A university of California ornithologist. "Unlike most gulls, these feed on a very narrow diet, and when it doesn't come through they have nowhere else to turn," Winkler said in a telephone interview from Berkeley.

Starvation is only the latest of plagues to be visited in the gulls over the last few years. Returning to breed each year, they have found the lake smaller each time as Los Angeles continues to draw on streams that normally feed the lake.

At present the city diverts about 100,000 acre feet per year for its own uses, and as the lake has shrunk it also has bared land bridges connecting some of the breeding islands to the shore. Coyotes, lurking in the mainland, were then able to trot across the bridges to feast on the gull eggs.

A technical solution to this problem was attempted in 1979 by blowing up the land bridges with dynamite and then, when that failed, by constructing a large fence across the peninsula. The birds, now reduced to small fractions of their original numbers, eventually abandoned the connected islands and repaired to sites still protected on all sides by water.

The latest blow caught both conservationists and city water officials by surprise. Though salinity levels in the lake have risen, laboratory tests have suggested that brine shrimp could tolerate those levels and even more.

Nonetheless, research at the lake this spring by another University of California biologist showed that one hatch of the brine shrimp had fallen to less than 10 percent of past levels. It was this hatch that adult birds would have used to feed their young in June and July.

"This is unprecedented and unexplained," said David Gaines, head of the Mono Lake Committee, a conservation group. "It is too early for a scientific evaluation, but I don't know of any explanation being advanced other than those that deal with chemical changes taking place in the lake."

Gaines noted that a second hatch of brine shrimp now reaching adulthood has restored the population of shrimp to near-normal levels. But this hatch, he said, has a different life cycle and its eggs are not forced to survive the winter at deep lake levels as is the case with the first hatch.

If the first hatch has succumbed to the increasing salinity of the lake, Gaines said, the gulls are finished at Mono. "It means there's no hope for the future of the gulls, and it means that the other birds who use the lake during migration (and eat brine shrimp) will be forced elsewhere."

An official at the Department of Water and Power, which conducts the diversion program, said the department has begun studies aimed at determining the cause of the gull deaths.

"We don't have an explanation at this point," said Bruce Kuebler, senior engineer at the department, but added that a preliminary analysis might be available in several days.●

A POSITIVE STEP TOWARD ENERGY INDEPENDENCE

HON. JOE SKEEN

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. SKEEN. Mr. Speaker, on Friday, by a vote of 186 to 206, this body successfully turned back an attempt to kill funding for the Clinch River breeder reactor project in Tennessee. As a Member of a body that too often deals in half measures, I could not have been more enthused. Clearly, to have walked away from demonstration of this vital energy source would be a clear signal to energy consumers and other nations that we were not serious about pursuing increased energy production, and that we were not serious about reducing our costly dependence on foreign energy sources.

The vote on CRBR represented the first major vote for the administration's nuclear program. Mr. Speaker, this action comes at a time when we can move ahead with our national and international commitment to the development of nuclear energy. My support for CRBR is based on the broad consensus in the scientific and technological community as well as the major developed countries that breeder technology is important to future energy security. Presently, it appears prudent to have breeder plant technology fully demonstrated by the turn of the century. The CRBR schedule for initial power operation by 1990 supports this need.

Mr. Speaker, I believe the most important goal now is to build the Clinch River breeder reactor as soon as possible. We cannot put off the day of settlement indefinitely. We cannot ignore the great fuel resources promised by this technology. We have let the debt accumulate long enough in funding CRBR. CRBR is ready to go now.●

BILL DOODY'S PRIVATE MIA MEMORIAL

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. DORNAN of California. Mr. Speaker, in behalf of those who have publicly insisted for a decade and a half that it is this Nation's duty to demand a full accounting for Americans imprisoned or missing in Southeast Asia, I have reserved this space today to commend Mr. Bill Doody, of Simi Valley, Calif. It is heartening to learn of citizens for whom the sacrifices of American servicemen in Indochina is a source of quiet pride and personal admiration. No memorials we might build, no ceremonies we could observe in remembrance of POW's and MIA's, have meaning unless, like Mr. Doody, we honor these men in our hearts.

I believe that the following article, "MIA Bracelet Is Far From a Piece of Jewelry," from the July 5 edition of the Daily Breeze of Torrance, Calif., deserves the attention of every Member of this House:

MIA BRACELET IS FAR FROM A PIECE OF JEWELRY

SIMI VALLEY (UPI).—Sometimes, when he's sitting alone or lost somewhere in thought, Bill Doody will look down at the bracelet on his right arm and wonder whatever happened to old Roscoe.

His friends tell him he should stop wondering. Roscoe, a Vietnam vet who didn't come home, must be dead.

But Doody won't let go. He says he will wear the bracelet with Roscoe's name on it until the missing soldier either comes home or is accounted for.

He's been waiting since 1971, when he was a freshman in high school and first put the bracelet on his arm. He hardly ever takes it off.

Maj. Roscoe Fobair is one of America's remaining MIA's. He was lost in Vietnam July 24, 1965. It isn't likely he could still be alive, but Doody hopes. At least his memory lives on, emblazoned on the nickel bracelet Doody proudly and staunchly wears.

"When I first put this thing on, I resolved I would never take it off," Doody, 24, said.

Many took the vows similar to Doody's when the MIA (missing in action) bracelets first made their appearance in the United States as part of the Voices in Vital America Program, but few kept it.

In some cases, the MIA's have come home, or their deaths have been verified, and people removed the bracelets. In other instances, wearers treated the bracelet as jewelry and removed it when the fashion passed.

Doody doesn't view the bracelet as jewelry, though. After so many years of wearing it, it has become a part of him, he said.

"If he ever comes back, I'll take it off, but I'm used to it now. It's a part of me."

He said he's removed it only once, to shift it to his right arm after he broke his left arm and needed surgery.

But even in the operating room he refused to let doctors remove the bracelet, insisting instead that they sterilize it.

"I had to fight the doctors on that one, but they did it," he said with a smile.

"I'm a sincere person. If I'm going to take a vow, I keep it. For a lot of people, this was a fad, but it was really never a fad for me. It had real meaning."

Today with the uproar over the lack of concern shown to the men and women who returned from the Vietnam War, the meaning is more evident than ever before.

"People just don't care about the veterans," says Doody. He points out how few parades have been held for them.

The point was hammered home by the welcome given in January to the 52 hostages held in Iran.

Doody said he never supported the Vietnam War, which he viewed as an American fiasco on a grand scale, but he felt for the men who fought it.

"Those people were forced to go over there and fight a limited action which they couldn't possibly win, and they need to be recognized," he said.

Now, Doody's bracelet is, for many people, an item of nostalgia, something to carry them back to the "good old days of the 70s."

"Mostly they just smile at me when they notice it," he said.

But he still doesn't believe it is too late for his MIA. "When he comes home, or when they account for him, I'll have no qualms about taking it off. But until then, I'm going to keep it on."●

JIM VORDENBAUM

HON. SAM GIBBONS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. GIBBONS. Mr. Speaker, Jim Vordenbaum, customer services representative, Eastern Airlines, died at home—presumably of a heart attack—on Saturday, July 25.

He worked for Eastern Airlines for 35 years. A memorial service will be held tomorrow, July 28, at 6 p.m., at the Old Presbyterian Meeting House, 321 South Fairfax Street, Alexandria, Va.

The family requests that in lieu of flowers contributions be made either to the Old Presbyterian Meeting House or to the Heart Fund.

Jim was a friend of all those who needed travel assistance. He was always helpful and cheerful.●

TERRORIST MEANS IN SERVICE OF SOVIET ENDS

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. KEMP. Mr. Speaker, the significance of Lenin's maxim, "the purpose of terrorism is to terrorize," is what it says about what terrorism is not. It is not a means to social progress or constructive change. It is instead the provocateur of fear, of social disruption, and of repressive policies that seek to

expunge the terrorist threat. Terrorists and their apologists may point to political motivations in an attempt to justify acts of terror. But whatever the root causes of terrorism and the underground political culture that gives it nuture, the terrorists quickly and inevitably develop a stake in opposing solutions to the problem.

This telling observation is the focal point of the following article by James Wilson, excerpted from Comment. As the author points out, Soviet sponsorship of terrorism tells us something profoundly important about the nature of terrorism. Terrorist movements feed upon the terror and repression they generate, leading to more repressive policies, more terror, and continuing instability throughout the world—in concert with the goals of an anti-status-quo power such as the Soviet Union.

Recognizing Soviet complicity in international terrorism is the key to understanding the threat that terrorist groups represent to the peace and security of the West. Professor Wilson's article makes a valuable contribution to that understanding.

[From the Washington Star, July 19, 1981]

THE TERRORIST'S GOAL IS NOT TO SOLVE THE PROBLEM

(James Q. Wilson)

For a decade or more, the U.S. government, like the governments of most Western powers, was largely silent on the question of Soviet complicity in international terrorism. But beginning in 1979, and culminating in 1981 with the publication of Claire Sterling's book, The Terror Network, the evidence that the Soviet Union had provided, at a minimum, substantial supplies of arms and training facilities to a broad spectrum of terrorist organizations became so compelling that it was difficult to deny it.

Suppose, however, you wished to reject the hypothesis that the Soviet Union, either directly or through its satellite regimes, was deeply involved in a variety of terrorist enterprises. Suppose further that you were skeptical of the claims of unnamed "Western intelligence sources."

You would still have to explain, or explain away, the following facts:

When the wealthy Italian publisher and financial patron of the red underground, Giangiacomo Feltrinelli, was killed by a bomb he was trying to affix to a high-tension pylon near Milan, the police discovered that he had a false passport showing that he had made, under an assumed name, at least 22 visits to Czechoslovakia.

When Gen. Jan Sejna, military counselor to the Central Committee of the Czech Communist Party, defected to the West in 1968, he brought with him a list of 13 Italians, including Feltrinelli, who had attended a KGB school for terrorists set up in Karlovy Mar.

After the Italian police began to crack the Red Brigades, a key leader, Patrizio Peci, confessed, stating, among other things, that Red Brigade members had attended training schools in Czechoslovakia throughout the 1970s and had received Czech-made arms, shipped from Prague by way of Hungary and Austria.

When the Israeli police arrested a Dutch terrorist, Ludwina Janssen, she confessed that she had been trained by Cuban instructors at camps in South Yemen, a Soviet satellite regime, and that there were also in attendance at these camps students from the Provisional Wing of the IRA, the German Revolutionary Cells, and other terrorist groups in Japan, Latin America, and the Middle East. All this was subsequently confirmed by a German terrorist who defected and who had actually taught at a camp in Aden.

When the Irish Navy seized the S.S. Claudia in 1973, it was carrying Soviet-bloc arms consigned to the IRA and accompanied by an IRA member. Four years later, another ship was seized off Antwerp—the SS Towerstream—and it was also loaded with Soviet-bloc weapons destined for the IRA. In 1971, the Dutch police seized a shipment of Czech arms, ordered by the IRA from Omnipol, an arms factory in Prague. An IRA member was later to write that they ordered the weapons from an illustrated catalogue supplied them in Prague.

When Viktor Sakharov defected from the KGB, he described being trained in the South Yemen camps for his assignment—to work in Kuwait on plans to mount terrorist campaigns in Arab nations and in Turkey.

After several dozen fedayeen were arrested in Israel, they admitted—both to the Israeli police and later to a Canadian Broadcasting Corporation reporter—that they had been trained in Soviet camps located near the Black Sea.

Terrorist training camps in Yemen and Libya were staffed by, among others, Cuban instructors long after Cuba had become totally dependent on the Soviet Union and the Cuban Intelligence Service (DGI) had become an adjunct of the KGB.

In the light of all this, it is a bit hard to understand why Secretary Haig's statement about Soviet complicity in terrorism should have been the occasion for so much journalistic tongue-clucking.

Let us be clear about what we do not know. We do not know the extent, if any, to which the Soviets direct any terrorist organization. Moscow seems to have had great influence over the Popular Front for the Liberation of Palestine (PFLP) but less over other factions within the Palestine Liberation Organization (PLO). Most of the money for many terrorist groups probably comes, not from the Soviet Union, but from wealthly Arab nations and from criminal activities.

Moreover, right-wing terrorism is on the rise: there have been bombings of a French synagogue, an Italian railroad station, and a German festival that have been the work, apparently, of various fascist groups.

It ought to be possible to condemn terrorism no matter who commits it, but what passes for an intellectual discussion of the matter today seems not to allow that possibility. Instead of proposing a definition of terrorism and then attempting to deal with it in all its ugly manifestations, we seem locked into the familiar rhetorical tactic of answering a charge by leveling a charge. The key to this is the speed and facility with which one can employ the phrase, "But what about . . .," followed by some atrocity allegedly committed by your opponent:

"The Soviet Union murdered its own citizens in the Gulag."

—But what about the Indians at Wounded Knee?

"The IRA Provos kill innocent persons in Belfast."

—But what about the torture of Jacob Timerman by the Argentine police?

"The Soviet Union is supporting world terrorism."

—But what about the CIA in Chile?

The tactic is not confined to foreign affairs. When I speak about the problem of urban street crime to a college audience, the first rejoinder is usually, "But what about pollution?" (or poorly designed Pintos, or the Lockheed loan, or Watergate).

DISCUSSION IMPOSSIBLE

The purpose of such tactics, obviously, is to avoid discussion of an issue by changing the subject in a manner that implies the moral inferiority of your opponent. Since there is always more than one evil loose in the world, this method means that no single evil can ever be discussed without all simultaneously. And since one cannot, even in principle, discuss all things at once, nothing can be discussed. Moreover, the "but-what-about?" rejoinder implies that the counter-example is precisely analogous to the original example and, thus, that no distinctions among cases can be made. Since the essence of intelligent discussion is the willingness and capacity to make useful distinctions, the "what-about" gambit renders discussion impossible.

* * * were plain enough—to maintain the position of those in power. But just as often there are not: who can describe in anything more than empty generalities the political aims of the IRA Provos or the Red Brigades? For many of their members, the purpose of terrorism is simply to terrorize. The modern terrorist employs it, not as a last resort, but as a preferred method; as Paul Johnson has written, the terrorist exalts violence over other forms of political activity. This leads in turn to the supression of the natural moral instincts so that it is no longer easy—perhaps no longer possible—for members of such conspiracies to distinguish between the political zealot and the psychopathic killer. The routinization of violence, the melding of the true believer and the bloodthirsty killer, leads to the final irony. As Johnson has pointed out, terrorism assists in the spread of the totalitarian state.

TERRORISTS VS. HEROES

Not all political violence we see in the world about us deserves to be called terrorism, but enough of it does to make one wonder why some of us strain to call it something else. A favorite intellectual device is to remark that what to one person is a terrorist is to another person a revolutionary hero, as if it were not possible to distinguish between terrorists and heroes. This kind of moral relativism, applied to ordinary shootings, would make it impossible to describe a common criminal. Does anyone really think it especially helpful, or even decent, to remark that one person's mass murderer is another person's "role model"?

We are more inclined to confound terrorists with heroes than we are to confuse psychotic killers with decent people because the former claim a political justification, and we tend to accept political justifications for acts that are otherwise unjustifiable. That acceptance might be defensible—if not persuasive—if we examined with care the justification, but usually we do not. We simply note that a person claims a political motive, that he employs some conventional bits of ideological bluster, and then assume that this must indicate the existence of some well-reasoned political argument that, had we the time and opportunity, we could discover. On the contrary, there is typically less to the matter than meets the ear.

There are essentially two ways of thinking about terrorism. One is to assume that terrorists are but an extreme expression of underlying social injustices and political tensions and that this symptom cannot be treated without first treating the underlying causes. This view is half right: terrorism rarely exists for long where there is neither freedom nor injustice. The error in this view is the assumption that if the underlying causes can be addressed, the extremist systems will disappear.

This is an error because it overlooks the second way of thinking about terrorism—the way Claire Sterling makes so vivid for us. It is that, whatever the root causes of terrorism and the underground political culture that gives it nurture, the terrorists quickly and inevitably develop a stake in opposing solutions to the problems. They will do whatever they can, make whatever alliances are necessary (including alliances with common criminals and homicidal maniacs), to prevent any "political solution" short of the destruction of the state itself. They will thus direct their attacks chiefly against groups desirous of constructive change. The Red Brigades, after all, killed Aldo Moro, a center-liberal politician, and not some monarchist fanatic. The aim of the true terrorist is not to hasten progress, but to provoke a fascist reaction. The most encouraging thing to know about the terrorist network is that in the West, after a dozen years of trying, and endless bloodshed, it has failed.

NATURAL RESULT

This suggests why it is important to recognize that the Soviet Union has aided parts of the terrorist enterprise. It is not because we can get them to stop it (for all I know, they may have stopped already), or because being aware of the facts of Soviet involvement makes it easier to cope with terrorism from a law-enforcement point of view.

The most important reason is that it tells us something about the nature of terrorism itself and puts us on our guard against assuming that it is the natural result of social inequity. If we judge, as we have tended to do, the quality of a society or a regime by the amount of terrorism directed at it, assuming that the level of violence is a measure of the degree of injustice, then we may be making a very great error. For to the extent other nations abet and support terrorism, the correlation, otherwise perhaps nature, between the level of injustice and the level of violence in a democratic society is distorted. So long as we think terrorism natural or inevitable, or wholly the product of underlying causes, we cannot be prepared for what in fact happens. Once West Germany was sufficiently aroused, it was able to destroy the Baader-Meinhof gang without destroying German democracy. After Aldo Moro was murdered, the Italian police broke the back of the Red Brigades. Society did not change; terrorism changed.

An especially deplorable, but by no means unusual example, of this kind of intellectual obfuscation can be found in a review of the Sterling book by Jonathan Marshall. Writing in Inquiry, Marshall asserts that Israel is a client state of the United States much as Cuba is a client of the Soviet Union. Having implied that the two cases are analogous, Marshall can accuse Sterling of practicing a double standard by failing to condemn the "regular practice of terrorism" by Israel, an American "surrogate."

I had not thought that anyone's capacity to make distinctions had atrophied to the point of being unable to find differences between the two instances. The Soviets control the DGI, the Americans, at best, can only envy the Mossad Israel is a free society with a vociferous opposition; Cuba is a closed society with an imprisoned or emigre opposition. Cuban instructors teach terrorists from a score of nations how to kill in order not to defend Cuba but to "destabilize" the rest of the world; Israel launches reprisals against those who have attacked it. There are few simple rules by which to evaluate the actions of a beleaguered democracy—no doubt some of Israel's acts deserve condemnation—but it is not hard to know what to think of a totalitarian regime that has sold itself, lock, stock, and barrel, to an imperialist power.

TERRORISM DEFINED

Let us try to clear away this thicket of rhetorical tricks and offer a definition of terrorism. Though perhaps it can be improved upon. I would begin with that adopted by a conference on international terrorism held in Jerusalem in 1979; terrorism is the "deliberate, systematic murder, maiming, and menacing of the innocent to inspire fear in order to gain political ends."

Whatever its deficiencies, this definition at least permits one to distinguish between pure terrorism (e.g., random murder in Turkey) and guerrilla warfare directed at the political or military arms of an occupying power. It also suggests a difference between force used to disrupt a particular political or military order and force used to make impossible the maintenance of any form of order under any auspices.

Moreover, the definition implies that one must judge any killing by the extent to which other, less violent means exist to achieve political ends. If terror is practiced in a society with free elections, open courts, and a legitimate opposition, it is more despicable than when terror, even defined as the killing of innocent persons, occurs in a society where no alternative means of change exists. Such a definition can be applied to terror of the Right as well as of the Left, terror practiced by a government as well as terror practiced by those who oppose a government.

If their is one thing wrong with the definition, however, it is the implication that there are known "political ends" toward which terror is customarily directed. Sometimes there are: the aims of terror in the Soviet Union or in Nazi Germany.●

SOLVENT REFINED COAL (SRC-I) PROJECT

HON. CLARENCE J. BROWN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. BROWN of Ohio. Mr. Speaker, last Wednesday, the House took a positive step toward insuring the development of one of our most abundant domestic energy resources—coal—by defeating an amendment to delete funding for the solvent refined coal (SRC-I) project. The solvent refined coal (SRC-I) project is a synthetic fuels project which we must move forward with, or we may not move forward at all. Let me explain.

As my colleagues will remember, I voted against the Energy Security Act because I was concerned it would foster a synfuels industry forever dependent on the Federal Government. But there is a role for the Federal support of essential research. SRC-I is one of the examples of a proper role for the Federal Government to help ease the transition from conventional fossil fuels to the energy supplies of the future.

As a representative from the coal State of Ohio, I have long advocated the supply side of all energy sources; advocating more production of oil, of gas and of alternatives such as synthetic fuels. It is time to advocate the increased production of our greatest domestic energy resource—coal.

With 80 percent of all of America's energy supply in coal, coal now only supplies less than 20 percent of all energy produced.

Why? Because of regulatory barriers imposed by the Federal Government which hold down the sales of coal far below the levels which would prevail in a free market. In large part, these regulatory impediments are imposed in the name of protecting the environment but not always with a basis in scientific fact. The so-called "margin of safety," often a margin of overregulation, contributes to the fact that there are 20,000 unemployed coal miners in the United States today.

To reverse this situation, and to add to our energy supplies in general, we must support projects such as SRC-I. Now, today, this Congress is offered SRC-I, a project designed to transform our high-Btu, higher sulfur eastern coals into a uniform, environmentally clean fuel. Will we say no?

If we do say no, we cannot hide behind a rationale of environmental protection. Powerplants fired with SRC-I, for example, are well within the levels for all air pollution emissions under existing Federal standards. In fact, plants burning SRC-I fuel will produce between 99 percent and 70 percent less than the emissions of an existing coal-burning utility plant burning the same amount of coal.

I have heard, over the last several months, the argument that coal-burning utility powerplants are responsible for acid rain. There is not yet an accepted scientific explanation for increases in acidity of rain. We have all heard that there are some 200 dead lakes in New York State—but no one can state with certainty what the cause has been. Nonetheless, the allegation has been made that one of the causes is coal-fired powerplants.

Let us assume for a moment, although I do not concede this point, that this allegation is true. The logical conclusion would be that my colleagues would want to reduce this alleged cause of acid rain. If so, they should have voted against the Weber

amendment and for continuing the SRC-I project because SRC-I substantially reduces sulfur dioxide emissions, and therefore, substantially reduces one of the alleged causes of acid rain.

In other words, to vote against SRC-I would quite simply have been a vote against a project designed to transform eastern coals into a cleaner burning fuel.

There will come a day when all the existing coal-burning facilities in my State of Ohio will need to be replaced. If we continue the SRC-I project and if it is successful, there will be an opportunity to supply those powerplants with an environmentally clean fuel, and therefore reduce powerplant emission far more reliably than scrubber technology could provide.

For the compelling reason that we have an opportunity to support an important synthetic fuel project and to support a potential solution to the emission levels of eastern coal, I commend my colleagues for voting "no" on the amendment offered by the gentleman from Minnesota.●

UNITED STATES WRONG ON BABY FORMULA VOTE

TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. HARKIN. Mr. Speaker, on May 21, 1981, the United States cast the only negative vote at the 34th World Health Assembly of the World Health Organization (WHO) on the "International Code of Marketing Breastmilk Substitutes." I believe this vote was a great mistake, as does the House of Representatives which recently passed a joint resolution expressing its dismay at the vote.

Among the thoughtful journalists who also expressed their disapproval of our WHO vote was Dave Yoder of the Perry Daily Chief in Perry, Iowa. Mr. Yoder makes a strong case for supporting the code and properly takes the administration to task for voting no. "The United States had everything to lose and nothing to gain by voting no on the resolution," he wrote. "It set itself up as an uncaring pigheaded giant among the Third World that it is trying to court. And worst of all, it did so needlessly." I commend his comments to the attention of my colleagues and ask unanimous consent that it be printed at this point in the RECORD.

[From the Perry Daily Chief, Wednesday, May 27, 1981]

BABY FORMULA VOTE SEEN AS WRONG MOVE

(By Dave Yoder)

Usually it's not the big things that upset me.

War, famine, pestilence and politics I can handle. I can't solve them, but I can deal with their existence. That's the way it is with big things. The four items mentioned above have been part of the status quo of human life for so long, concerned curiosity is about the only emotion left.

Instead, it is the little acts of idiocy and stubbornness that sends me searching for a club to beat some sense into those responsible.

Such things are the gnats above the hammock of life.

The United States' vote on the ban on advertising milk formula in poor countries is the most recent of those items.

For those who have missed the controversy, it goes like this:

Companies that produce powdered milk formula—notably Nestle's—have been going into poor underdeveloped countries and getting mothers to feed their babies on the formula rather than mother's milk.

There's nothing wrong in that except putting the sales people in white uniforms so they look like doctors and nurses.

The formula costs money, of course. Investigators from the World Health Organization and others found that a mother without money was doing the same thing with the formula that she did with soup and stew: diluting it with water to make it go twice as far.

It only did half as much for the baby, however. The baby starts showing signs of malnutrition, the mother finds she has fed the kid long enough on formula that her own milk has dried up, and she's faced with spending money she doesn't have for formula or looking for a coffin in a child's size.

Besides that, the water being used to mix the formula was contaminated.

The formula companies shrug their shoulders and say let the buyer beware. We just sell it, how they use it is their business, they say.

Caveat emptor is an adequate defense if the victims are middle-class Americans. but when the victims are pets, endangered species or hundreds of thousands of destitute, starving, helpless, innocent parents the defense better be very good.

The companies say there's no evidence to support the claim. In a rat's eyelid, say 118 different countries.

Truth consists of who shouts his version of the facts the loudest and the deaths of a few hundred thousand babies is a goodsized scream.

So when the WHO voted to ban advertising the formula, unanimity was expected. The United States voted against it. The vote was 118 to 1.

Voting for the ban was such a small thing to do. There was no way the ban was going to fail. After all, how can you vote against a dead child?

The death of the children is one tragedy. Another tragedy is that the United States not only did not see the need to go along with an obvious public relations chance, it went to great effort by making itself the bad guy.

It took so little effort to appear a humanitarian, especially since American-based companies were at the heart of the whole matter. If nothing else, going along would have indicated to the world that America is not being run by big corporations as everyone in the United States suspects and everyone else knows.

The effect of the vote will be minor. Sales aren't banned, just advertising. And corporations will find a way around that.

There was nothing at stake. The United States had everything to lose and nothing to gain by voting no on the resolution. It set itself up as an uncaring pig-headed giant among the third world that it is trying to court. And worst of all, it did so needlessly.

The vote was a small item in the scheme of war and corruption. But if the United States can't act with an ounce of humanitarian concern when it takes no effort, how will it act when it takes courage?●

REMEMBERING THE MISSING

HON. DAVID DREIER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. DREIER. Mr. Speaker, active American military involvement in Vietnam officially ended on January 27, 1973, with the signing of the Paris peace accords. Under this agreement, it became the clear responsibility of the Hanoi government to return all American POW's within 90 days as well as to provide a full accounting of all MIA's. Now, over 3,100 days later we are still waiting for the Hanoi government to fulfill its legal and moral obligations.

The issue of Vietnam-era MIA's and POW's who remain unaccounted for has received much renewed interest with the recent return of the bodies of three missing American servicemen. Diplomatic concern has been heightened by the nearly 300 firsthand refugee sightings of Americans still being held captive in the jungles of Southeast Asia.

But interest in unaccounted-for American POW's/MIA's has always been great on the part of a group known as the National League of Families. This organization is comprised of close relatives of the nearly 2,500 men who remain unaccounted for.

Recently, I had the privilege of meeting with two members of this organization in my Washington office. Fran Masterson, of Upland, has spent many agonizing years since that fateful day in October of 1968 when Lt. Col. Michael Masterson was first reported missing in action over Laos.

Similarly, Janet Townley, of Ontario, has anxiously awaited word on the status of her father, Roy Townley, a civilian missing since December of 1971.

Unfortunately, for these people the war has never ended. Every day brings renewed yet painful, anguishing hope that some additional bit of information concerning the status of their loved one will be uncovered.

It is imperative that America never forget those who sacrificed so much for their country. For this reason, today I am introducing a resolution which directs the U.S. Postal Service to issue a commemorative stamp to honor these valiant missing men. I call on my colleagues to support this resolution and to do all they can to bring

the Vietnam conflict to a final and conclusive end for all Americans.●

LOOTING THE MEANS OF PRODUCTION

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. STARK. Mr. Speaker, an article appeared in today's New York Times that I though would be of interest to my colleagues. The statistics are fascinating. Perhaps we should all consider them when we vote on the conference report on the reconciliation bill this week.

LOOTING THE MEANS OF PRODUCTION

(By Semour Melman)

SOUTH WELLFLEET, MASS.—"America in Ruins" is both the title and forecast of a 1981 report by the Council of State Planning Agencies, an organization of the planning and policy staffs of the nation's governors. The Council finds major deterioration in parts of the country's infrastructure—that is, vital services such as clean water, reliable transportation, efficient ports, and competent waste disposal, which are indispensable underpinnings for an industrial system. The report finds—as any traveler on United States railroads knows—that "the maintenance of public facilities essential to national economic renewal has been deferred."

Simultaneously, the means of production of United States industry have been deteriorating.

Production incompetence, now endemic, is spreading fast, not only in the well-publicized case of automobile firms but also in the following industries: steel, machine tools, radio and television manufacturing, railroad equipment, precision optics, fine cameras, men's shoes, flatware, hi-fi electronics, etc., etc., etc.

As private and public managers become better at making money without making economically useful goods, a new issue finally will have to be confronted: Will American industry reach a condition of "no return," making the achievement of industrial renewal problematic?

The way that an economy uses its capital—its production resources—is a crucial determinant of its productivity and economic well-being.

By 1977, for every $100 of new (producers') fixed capital formation, the United States applied $46 to the military economy. In Japan, the ratio was $3.70 for the military. The concentration of Japan's capital on productive economic growth goes far to explain the current success of that country's industry, where productivity grew 6.2 percent in 1980. By contrast, with the United States' aging machinery stock, the average output per person in manufacturing industry decreased 0.5 percent in 1980.

The United States has "achieved" its present state of industrial deterioration by assigning to the military economy large quantities of machinery, tools, engineers, energy, raw materials, skilled labor, and managers—resources identified everywhere as the "fixed and working capital" that is vital for production.

Since a modern military budget is used to purchase such resources, it is, effectively, a capital fund. A large ratio of military to civilian capital formation drains the civilian economy. The viability of the United States as an industrial society is threatened by the concentration of capital in a fund that yields no product useful for consumption or for further production. This looting of the means of production on behalf of the military economy can only be accelerated as a consequence of the unprecedented size of the war budgets advocated by the Reagan Administration.

The vital resources that constitute a nation's capital fund cannot be enlarged by waving a budgetary wand. Neither can manufacturing facilities be multiplied by ever richer subsidies to the managers of military industry. Basic machinery, skilled labor, engineers and scientists—all are finite in number and difficult to increase.

The concentration of capital on the military portends sharply diminished opportunity for a productive livelihood for most Americans. Clearly, a choice must be made as to where these resources will be used.

The accompanying list of trade-offs illustrates the kinds of choices that the Reagan Administration and the Congress are now making with their budget and tax plans, intended or not.

The following are principal sources of these data: military-program and unit costs, and cost changes (overruns), the Department of Defense: "SAR Program Acquisition Cost Summary (Unclassified)," Dec. 31, 1980, and related reports, and "Procurement Programs (P-1)", March 10, 1981; and news media reports. The civilian capital-cost data range from reported prices (machine tools, buses, trolleys) and reported Federal budget items to informed estimates of industrial-research and project costs and of costs of public works. Economic and engineering estimates are from Representative Les Aspin (Congressional Record, April 27, 1981), Prof. John E. Ullmann of Hofstra University; Mark Hipp, a Columbia University doctoral candidate; the Council on Economic Priorities, the city of San Diego, and the California Public Policy Center.

Seven percent of the military outlays from fiscal 1981 to 1986=$100 billion=the cost of rehabilitating the United States' steel industry so that it is again the most efficient in the world.

The cost overrun, to 1981, on the Navy's Aegis-cruiser program=$8.4 billion=the comprehensive research-and-development effort needed to produce 80- to 100-mile-per-gallon cars.

The cost overrun, to 1981, on the Navy's current submarine, frigate, and destroyer programs=$42 billion=for California, a 10-year investment to spur solar energy for space-, water-, and industrial-process heating; this would involve 376,000 new jobs and lead to vast fuel savings.

Sixty-three percent of the cost overruns, to 1981, on 50 current major weapons systems=$110 billion=the 20-year cost of solar devices and energy-conservation equipment in commercial buildings, saving 3.7 million barrels of oil per day.

The cruise-missile programs=$11 billion=the cost of bringing the annual rate of investment in public works to the 1965 level.

Two B-1 bombers=$400 million=the cost of rebuilding Cleveland's water-supply system.

Cost overruns, to 1981, on the Navy's Trident and the Air Force's F-16 programs=$33 billion=the cost of rehabilitating or reconstructing one out of five United States bridges.

The Navy's F-18 fighter program=$34 billion=the cost of modernizing America's machine-tool stock to bring it to the average level of Japan's.

Seventy-five percent of the cost overrun, to 1981, on the Navy's 5-inch guided-projectile program=$263 million=President's Reagan's proposed fiscal 1981 and 1982 cuts in the Northeast rail-corridor improvement programs, and in the alcohol-fuels development program.

Two nuclear-powered aircraft carriers=$5.8 billion=the cost of converting 77 oil-using power plants to coal, saving 350,000 barrels of oil per day.

Eighty-eight percent of the cost overrun, to 1981, of the Navy's Tomahawk cruise missile=$444 million=President Reagan's proposed fiscal 1981 and 1982 cuts in the Federal solar-energy budget.

Three Army AH-64 helicopters=$82 million=100 top-quality, energy-efficient electric trolleys (made in West Germany).

One F-15A airplane=$29 million=the cost of training 200 engineers to design and produce electric trolleys in the United States.

46 Army heavy (XM-1)=$120 million=500 top-quality city buses (West German-made).

The cost overrun, to 1981, on Navy frigates (FFG-7)=$5 billion=the minimum additional annual investment needed to prevent water pollution in the United States from exceeding present standards.

The cost of unjustified noncombat Pentagon aircraft=$6.8 billion=six years of capital investment that is needed to rehabilitate New York City transit.

The cost overrun, to 1981, on the Army's heavy-tank (XM-1) program=$13 billion=the shortfall of capital needed for maintaining water supplies of 150 United States cities for the next 20 years.

The MX missile system, first cost=$34 billion=the cost of a comprehensive 10-year energy-efficiency effort to save 25 percent to 50 percent of United States oil imports.

Reactivating two World War II mothballed battleships=$376 million=President Reagan's fiscal 1981 and fiscal 1982 cut in energy-conservation investment.

The cost overrun, to 1981, on the Navy's F-18 aircraft program=$26.4 billion=the cost of electrifying 55,000 miles of mainline railroads, and the cost of new locomotives.

The fiscal 1981 nuclear-weapons funding, adding to more than 20,000 on hand=$5.06 billion=eight years of capital costs for rehabilitating New York City's sewers.

The cost of excessive, nonstandardized military aircraft service equipment=$300 million=President Reagan's fiscal 1981 and fiscal 1982 reduction in capital grants for mass transit.

The cost overrun, to 1981, of the Army's UH-60A helicopter program=$4.7 billion=the annual capital investment for restoring New York City's roads, bridges, aqueducts, subways and buses.

One nuclear (SSN-688) attack submarine=$582 million=the cost of 100 miles of electrified rail right-of-way.

Ten B-1 bombers=$2 billion=the cost of dredging six Gulf Coast and Atlantic Coast harbors to handle 150,000-ton cargo vessels.

One A-6E Intruder (attack plane)=$23 million=the annual cost of a staff of 200 to plan mutual reversal of the arms race, and conversion of the military economy to a civilian economy.●

RETIREMENT SECURITY TODAY AND IN THE 21ST CENTURY

HON. JAMES M. JEFFORDS
OF VERMONT
IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. JEFFORDS. Mr. Speaker, the Reagan administration has undertaken a necessary but painful task by proposing to the Congress a series of changes in the social security system. These proposals are intended to place the system on a sound financial footing. Although I salute the administration for bringing attention to the social security funding crisis, I regret that I cannot support several of the specific proposals. I think that there are enough reasonable proposals to consider that the Congress will find a fair and equitable way to solve this short-term funding crisis.

I am more concerned, however, that both the administration and the Congress have failed to come to grips with our social security crisis in the context of establishing a comprehensive approach to retirement security which includes reform of private pension and savings programs as well as the reform of social security. The social security crisis is not only a short-term financing crisis. The more critical problem and the one to which I believe that the Congress should now turn its attention, is how to provide the incentives and structures necessary to give every American an opportunity to earn a livable pension. I am convinced that this system alone will not be sufficient to meet the needs of our aging population. Improved pension and savings programs are essential to this goal.

Our current savings and pension policies are not adequate. Less than half of the workers in the United States participate in private pension plans and many of these workers will not meet vesting requirements and may never draw funds from these pension programs.

The challenge to this Congress is to change the social security system in ways that can return confidence to the system and concurrently to make changes in pension and savings policy so that private systems can be developed to pick up the slack that will inevitably result when social security benefits or coverages are changed. As part of this reform, we should reassess the goals of the current social security system and our capacity to meet these goals. We need to look at the program's original intent as well and determine whether or not this is still valid. If we fail to reform and strengthen our retirement systems comprehensively, we may end up with a large disenchanted aged group in our society that feels that it has been betrayed by its Government and that it has not been given the opportunity to develop alternative sources of income for its retirement years.

Today, I want to briefly discuss the crisis of confidence facing the social security system, the proposals that have been offered for restoring short-term financial stability for the fund, and the proposals which have long-term implications for the structure of the system and the ability of Americans to plan for their retirement years with some confidence. I also want to suggest some general principles that I think should guide the Congress as it considers our social security problems.

A CRISIS OF CONFIDENCE

Let me describe what I believe is a crisis of confidence facing the social security system. Like the overall problems facing the system this crisis is of two types.

First, those who are nearing retirement age are extremely concerned that benefits which they feel they have earned may not be paid them. The primary cause for this alarm is the administration's proposal to discount early retirement benefits more substantially for any individual retiring in 1982 or later. They have come to the edge of their retirement—many have made their plans for many years—and now they fear that their plans and commitments may have to be changed. They feel that there is a social contract between themselves and the Government and they feel that the Government is reneging. I think that they have made their case. Social security benefits have been promised and we should be very reticent to change the system when individuals no longer have an opportunity to prepare for their retirement. We need to provide a lot of lead time in social security reforms so that individuals will have time to make their own arrangements and so that they know what level of support they can expect the Government to provide.

An equally important crisis exists among the young. As they watch benefits being scaled back, they legitimately question what they are paying almost 7 percent of their salary for. Many of them believe that they will never receive any return on it. The Hart public opinion survey for the National Commission on Social Security found that 62 percent of all nonretired Americans have little or no confidence that they will receive any social security benefits. The Louis Harris and Associates 1979 survey on American attitudes toward pensions and retirement confirms this perception: Over 80 percent of those questioned had little confidence that they would receive social security beneifts, and over 40 percent of those questioned had no confidence that they would receive any benefits from social security.

Much of this lack of confidence has resulted from recent congressional actions to reduce benefits and raise revenues for the beleaguered fund. It would be tragic if we undermine support for the social security fund in our efforts to save it. Concerns about the long-term health of the fund are well founded. It is unreasonable to assume that two workers in the early 21st century will be able to carry the burden for financial support of the fund that is now being carried by three or more workers. However, we have promised those who have retired and those who are nearing their retirement age a certain level of benefits. We should keep these promises. At the same time, we should make a new, realistic promise to those who are years away from retirement. We should tell them what changes they must expect and we should tell them what opportunities they can have to preserve some earning and investment power in their later years. This requires that we not only face our social security crisis, but that we also evaluate and modify the ground rules for private pensions and savings.

I would like to describe some of the proposals that have been made for the short- and long-run reform of the social security system and to describe the principles and criteria on which these proposals should be judged.

SHORT-RUN FINANCING ISSUES

Most of the publicity about the social security crisis has centered on the short-run cash position of the fund. If no new authorities are granted to the administration by the middle of next year, the old age and survivors insurance fund will be unable to meet its current obligations. This is essentially a cash-flow problem. Even though the fund will be operating on a narrow or slightly deficit margin for the next 10 years, it will remain essentially healthy through the year 2020. This is because there is a relatively small group of individuals reaching retirement age during the period 1995 to 2025. During that period, the fund will accumulate 19 months of reserves.

I think that there are several principles that we must observe in responding to this short-run crisis:

We should not cut the basic benefits of those who have already retired and therefore have limited capacity for generating earnings to replace the cuts.

We should not cut the basic benefits of those on the verge of retirement who have planned for their retirement on the assumption that the Government would honor its benefits promise. Basic changes, if any, should be made with long leadtime.

We should be willing to consider and analyze changes in selected benefits that are not basic to the system or essential to the standard of living for retirees. The lump sum death benefits in

cases where there are no survivors is an example of such a change.

If at all possible and consistent with these principles, we should not jeopardize the link between contributions to the system and benefits received. This link has worked to keep social security somewhat immune from attempts to use it to balance the budget and the linkage has also imposed a discipline upon the management of the fund that is sensitive and concerned about possible fund deficits.

I realize that these are very general principles. Nevertheless, they give us an important standard against which to judge the proposals that have been put forward to improve the financial stability of the old age and survivors insurance fund. Let us look at some of those proposals:

First, raise the payroll tax: This is what the Congress did in 1977 when we thought that we were solving this short-term financing crisis. Because of poor economic performance and high unemployment rates over the last 3 years, the revenues that we expected to generate have not been realized. I am concerned that additional taxes will not only work against our overall economic strategy, but will also undermine support for the social security system among the young taxpaying public.

Second, change basic benefit computations: A variety of proposals to change rounding formulas, change "bend point" computations, and make other changes in computation have been suggested. The Congress must decide whether these are basic benefit changes or, as their advocates suggest, merely technical adjustments that have some important economic side effects. Much of the short-run savings advanced by the Reagan administration proposals depend on this type of change.

Third, cutting benefits for those retiring at age 62: A basic theme in the administration proposal is the discounting of benefits for those who retire before age 65. This policy would impose a heavy burden on those who planned to retire next year. I think that the Congress should provide much, much more warning before it makes any change of this magnitude.

Fourth, broadening the coverage of employees: There has been a longstanding debate over the advisability of expanding social security to employees who are not now covered by the system. These include Federal, State, and local, and nonprofit organization employees. Increased coverage would bring substantial revenue into the social security funds whether the expanded coverage included all current employees or only employees entering the work force in the future. These employees would also receive some new benefits from this change. This is a difficult and highly complex issue because many of these workers already have major investments in pension programs that are not linked to the social security system.

Fifth, allowing interfund borrowing: This is a part of all major short-run proposals. It makes no permanent change in the system. It allows the administration authority to temporarily redistribute funds among the purposes funded by the payroll tax.

Sixth, fund the deficit from general revenues: In general, this approach violates the connection between payroll contributions and funding for the social security system. We should attempt to maintain this linkage if we can find a way to do so. However, I do feel that disability and medicare should be shifted to a broader based tax, as against further increases in the social security tax.

Seventh, eliminate less important benefits: The Congress has approved changes in the death benefit and student benefits. Clearly these are less essential than the basic benefit for retirees and survivors. The Congress must be willing to make the difficult judgments about which benefits are basic and which are supplemental or less essential.

Eighth, engage in short-term borrowing: The fund can retain its integrity by borrowing against future income it will receive during the period 1995 to 2025. This is an approach which deserves to be explored further, but with great caution.

We have already received a wide variety of detailed short-term proposals and will undoubtedly receive more. Frankly, however, I believe that this problem is considerably less momentous and difficult than the longrun problems that face the system. I hope that the Congress will not be so hasty in solving the immediate problems of the fund that it overlooks the critical issues ahead. I also hope that we do not undertake radical restructuring of the system without full consideration of the longrun implications of this restructuring.

LONGRUN FINANCING ISSUES

A number of social security reform proposals that have been advanced would have a dramatic effect on what benefits the system would provide in the 21st century. It is my view that any longrun reform of the social security system must also take into consideration the laws that control and regulate both private pensions and private savings. When the "baby boom" generation reaches retirement age in the early 21st century, we will not be able to finance a social security system that is as complete and extensive as the one we have today. Therefore, we must change that system and justice demands that we give fair and timely warning to those who will be affected by these changes.

I suggest that the Congress commit itself to the following set of principles as it addresses long-term changes to the structure of the social security system.

We need to redefine and reestablish the goals of the social security system. This involves prioritizing benefits and making sure that all of the benefits we do include are adequately funded.

Any changes in basic social security benefits ought to be announced well before they become effective.

Any long-term reform ought to consider private pension reform, IRA and Keogh reform, other retirement savings reform, and related tax reform issues as well.

Today, much to my regret, none of the proposals before the Congress satisfy these criteria. So far, the proposals are limited to reform of the social security system alone or to separate, unrelated liberalizations of pension or savings laws. What is missing is that vital connection which answers the question of today's average 18- to 50-year-old worker: "How do I plan for my retirement?" Congress has a responsibility to address that question and to address it now.

Let us review some options:

First, increase the retirement age: Because of medical advances and basic changes in modern lifestyles, people live a lot longer today than they did when the social security system was established. Raising the retirement age to 68 or older or reducing pensions to early retirees is not an unreasonable long-term reform. If we do this, however, we may need to take another serious look at our laws regulating mandatory retirement.

Second, decrease basic benefits: I oppose this as a short-term solution. It would be unconscionable for us to take this action without providing alternative retirement savings possibilities for those who will be affected. Before we consider either decreases or increases in basic benefits, we will have to concurrently examine the possibility of generalizing and removing the restrictions on IRA accounts and also take steps to make sure that those who are covered by private pensions have an avenue for preserving these pensions from inflation and from undue tax treatment.

Third, eliminate the earnings cap: Eliminating the earnings cap is a fundamental change in the social security program. It virtually assures that any individual above a designated age will draw benefits from the fund. With an aging population and a depleting fund, I think that we need to be extremely careful about making such a change. It might be more appropriate to raise the cap or to adjust benefit formulas so that there is also an incentive to draw less than full benefits from the

fund. I do believe, however, that present caps are too low.

CONCLUSION

I do not advance my ideas as a complete and comprehensive solution to our social security problems. Rather, I urge the House to find this solution. We cannot do this unless we take off our social security blinders and look at the broader and more complex issue of retirement security in this country for the future.

Social security is only part of the solution for the financial stability of our aging population in the next century. If we are to address this problem effectively, we must consider all of the relevant issues associated with it. I hope that the Congress will use the immediate crisis in social security financing to spur it to fundamental reform of our retirement and pension laws. We need to make promises for the future of social security that can be kept, and we need to recognize that our future retirement system cannot be built on a Government-pay-all system.

Only if we take this kind of forward-looking and courageous action, can we reinspire confidence and support for the social security system among those who must pick up the tab for its operation.●

AN "AMERICAN HELPING AMERICANS" MORTGAGE LOAN

HON. STEVE GUNDERSON

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. GUNDERSON. Mr. Speaker, for several weeks the House Ways and Means Committee and the Senate Finance Committee have been vigorously debating the exact form of a tax-exempt savings certificate, the proceeds from which are earmarked for housing and agricultural loans.

At the same time these debates have been raging in Washington, D.C., a resident of my district has been quietly setting up his own Americans-helping-Americans low-interest mortgage loan program for the benefit of young families in the Eau Claire, Wis., area.

Ken Sherwood of Altoona, Wis., has made arrangements with Northwest Savings & Loan in Eau Claire, Wis., to offer a savings certificate that pays but 1 percent interest per annum. The proceeds from these certificates will be used to finance 3 percent home mortgage loans for qualifying young families in the area.

Despite the seemingly low return on the investment, the program is gathering significant support in the Eau Claire area and is a tribute to the rebirth of the American patriotic spirit that we are witnessing throughout our country today.

I am including a recent newspaper account of this program for the review of my colleagues in the event they may wish to recommend such a program to civic and business leaders in their districts as well.

[From the Eau Claire Leader-Telegram, July 11, 1981]

HOUSING: PLAN WOULD FUND LOW-INTEREST MORTGAGES

(By Rhonda Ebbers)

Would you invest $500 or more in a savings certificate that pays only 1 percent interest if it would make low-interest mortgage money available to the area's young families? Ken Sherwood is betting that you will.

The low-interest savings certificates are the cornerstone of Sherwood's "Americans Helping Americans" mortgage plan, which already has the backing of a local savings and loan association and area home builders.

Here's the idea Sherwood is pushing: Businesses, civic groups and people throughout the community would invest funds in five-year AHA savings certificates at Northwest Savings & Loan Association in blocks of $500 or more. Investors would earn 1 percent interest.

Qualifying area homebuyers would borrow up to half their needed mortgage from the AHA fund at 3 percent, allowing a 2 percent return to Northwest to cover its costs in administering the certificates.

The other half of the mortgage would be borrowed from Northwest at its prevailing interest rate. The total package would have to be refinanced after five years.

The effect would be lower monthly payments—Sherwood estimates interest equivalent to an overall rate of 9½ percent or 10 percent—and faster accumulation of equity.

Assume that a young couple borrows $30,000 for 20 years, $15,000 at 3 percent and $15,000 at 16 percent. The monthly payment would be $291.88, compared with $417.38 if the entire amount was borrowed at 16 percent, a typical rate for standard mortgages.

After five years, the couple would have accumulated $3,748.70 in equity, compared with $1,590 if the entire amount had been borrowed at 16 percent. That equity would help keep costs down at refinancing time.

Certificates are not ready for sale yet, said William Hay, president of Northwest, and Sherwood emphasized that many details of the mortgage plan are not set yet, such as possible income limits that might be built into eligibility standards for borrowers. (The program would not be for families with big incomes, Sherwood said.)

Hay and Sherwood described the program as being in the conceptual stages, but Sherwood said he would like to get the program going yet this summer.

What is needed now, Sherwood said, is for people in the community who are interested in supporting the plan to come forward. If support becomes evident, details could be resolved fairly quickly and certificates could be issued. He is looking to raise quite a bit of money.

Sherwood and Hay tentatively have agreed that loans should be made in blocks of $500,000, which would finance sale of more than 10 homes. After $250,000 is invested in AHA certificates, Northwest would make another $250,000 available at its going rate and mortgage loans would become available.

Sherwood, a retiree who rents an apartment at 1743 Vernon St., Altoona, with his wife of 46 years, Evie, has been pushing the plan since February, when the idea came to him while pitching hay at his daughter's farm near Eau Claire. A former vice president of marketing for the Soo Line Railroad, he said most retirees find some activities to occupy their time, and the AHA plan is his project.

The mortgage plan is "idealistic, patriotic and altruistic," he says, unabashedly adding that he doesn't see anything wrong with that.

A description of the plan written by Sherwood is laced with patriotism: "When there is a crisis anywhere in the world, we Americans respond with every kind of help at our disposal. There is a crisis in our own community, but up to now we really haven't done much about it. The crisis faced by innumerable young families is that while they need and want to purchase a home of their own, current mortgage interest costs prohibit them from taking this important step.

"I believe we have it within our power in this community to make it possible for many families to realize their dreams and buy that first home if we will invest in and support an alternative mortgage plan which would be known as AHA (Americans Helping Americans)."

One group already has come forward to back the plan. The Eau Claire Area Home Builders Association has voted to support the AHA plan and is trying to establish a joint committee with area real estate brokers to promote it, according to Jeff Bahnub, president of the builders' group.

Although the group did not vote to put any of its funds into certificates, Bahnub said several group members are planning to invest.

Mark Bugher, president-elect of the Eau Claire-Chippewa Board of Realtors Inc., said he knows about the plan and wants to get involved, but his group hasn't made any formal decision on the matter. Bugher said he is "in favor of anything that would help people buy homes at lower interest rates."

But Sherwood admitted that his idea will need support from people throughout the community, not just home builders and realtors, or it will remain just that—an idea.

Even though 1 percent interest is paltry when compared with current rates in the 14 percent range, Sherwood is optimistic that people will give up a little income to help young families who have been squeezed out of home ownership by high mortgage rates.

"If you think about it, in a community like this, there are a number of people who should buy" these certificates, he said. ". . . This is not a poor community."

Eau Claire has many nice homes, he said, and he hopes that people living in those homes will be willing to share their good fortune with young families in the area.

Sherwood says he doesn't blame people for putting their money where they can earn high interest, but he says it wouldn't hurt area residents to take $500 or $1,000 and "instead of sending it to New York, Tokyo or London, invest it right in Eau Claire." The difference between 1 percent interest on $500 and 14 percent is not that great after taxes, he pointed out.

Just who would benefit from creation of an AHA mortgage pool? Of course, the plan would help young families who otherwise could not afford homes and businesses related directly to home-building. But on a broader level, Sherwood said, everyone in the community—all types of businesses and

their employees—would benefit because the area economy would stabilize, providing a better business environment and stimulating employment.

Bahnub also said that, although he thinks potential homebuyers would line up for a chance at the reduced-rate mortgages, the whole community would benefit. And Sherwood plans to approach retirees on the theory that the best way to strengthen Social Security is to get people working, which AHA would help do.

Northwest also might benefit, if the program is successful, because the S&L would make money on the funds lent at 16 percent. The S&L also could profit from the 2 percent charged for administering their certificates if it can keep its administrative costs low enough.

But Hay said he considers the 2 percent charge fair and that he thinks it would just cover the S&L's costs. Northwest is a private firm and exists to make a profit, he pointed out, but he also said he would get "a real kick in seeing some people benefit" from the AHA plan.

One person who would not benefit is Sherwood. All funds would be invested directly through Northwest and would be insured, as are other deposits. But Sherwood admitted that he would receive some compensation: the satisfaction of seeing young families move into their first homes and watching the business community prosper.

Sherwood already has experienced the first type of satisfaction several times, when he helped his four children and three other young couples buy homes. Sherwood explained that he had help buying a first home for himself and his wife, Evie: Her mother lent the young Sherwoods the $600 down payment on the $3,850 house in 1938. Sherwood recalls that he was earning $153 a month.

When the AHA plan is discussed in groups Sherwood has attended, he often asks how many of the people present had help in buying their first home, and he reports that "95 percent say yes." The problem today is that, even if parents help their children with the down payment, monthly payments are unaffordable because interest rates are so high, he said.

Hay also compared the plan to parental help. The concept is no different, he said, except that a blood relative would not be involved.

Sherwood has high hopes for the AHA plan, although he doesn't see it as a panacea to solve housing problems. Plans are in the works to develop bumper stickers and placards for participating individuals and businesses to display, and if the AHA plan works in Eau Claire, it should work elsewhere, he said.

Sherwood's goal is to have $2 million invested in AHA certificates.

Hay said he is optimistic that more than $1 million can be raised for the program, and he's ready to buy the third certificate to be issued; Ken and Evie Sherwood plan to buy the first two.●

CAPTIVE NATIONS WEEK

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. DERWINSKI. Mr. Speaker, we in the United States and throughout the free world must confirm our determination to work for the restoration of the independence of those enslaved peoples held captive by the U.S.S.R. and other Communist countries. The annual commemoration of Captive Nations Week reminds us once again of the tragedy inflicted upon millions of innocent people by Soviet aggressive and imperialistic policies.

I include in the RECORD several very timely proclamations issued for Captive Nations Week. They follow at this point:

The freedom of the individual is the cornerstone of the American system of government. Support for the liberty and freedom of others has always been a basic principle of our democratic society.

By unanimous vote, the Congress of the United States has established the third week of July as Captive Nations Week, inviting all our citizens to observe this week with appropriate prayer and ceremonies to express sympathy and support for the continuing aspirations of captive peoples.

New York city, where so many first experienced individual freedom after fleeing totalitarian systems, continues to maintain a special commitment to those still living in captive nations.

Now, therefore I, Edward I. Koch, Mayor of the City of New York, do hereby proclaim the week of July 12-19, 1981, as "Captive Nations Week" in New York City, and call upon all our citizens to rededicate themselves to the cause of freedom for all and continue their support of peaceful efforts to liberate oppressed and subjugated people all over the world.

CAPTIVE NATIONS WEEK, JULY 12-18, 1981

By the Mayor of the District of Columbia—a Proclamation

Whereas by a joint resolution approved July 17, 1959, the Congress authorized and requested the President of the United States of America to issue a proclamation designating the third week in July as "Captive Nations Week", and to issue a similar proclamation each year until such time as freedom and independence shall have been achieved for all captive nations of the world; and

Whereas there is a strong belief that the observance of "Captive Nations Week" throughout our country and our community will serve the cause of America and the entire free world; that the keeping alive of the spirit of liberation is the free world's most effective instrument; and

Whereas it is deemed appropriate and proper for the people of our community to extend to the peoples of the captive nations our support and sympathy for their just aspirations for freedom and national independence: Now, therefore,

I, the Mayor of the District of Columbia, do hereby proclaim the week of July 12-18, 1981, as "Captive Nations Week" and invite the people of the Nation's Capital to participate in the observance of this period by offering prayers in their churches and synagogues for the peaceful liberation of the peoples throughout the world who are denied their fundamental human rights.

STATE OF NEW MEXICO, EXECUTIVE OFFICE—PROCLAMATION

Whereas the imperialistic politics of Russian Communists have led, through direct and indirect aggression, to the subjugation and enslavement of the peoples of Poland, Hungary, Lithuania, Ukraine, Czecho-Slovakia, Latvia, Estonia, Byelorussia, Romania, East Germany, Bulgaria, Mainland China, Armenia, Azerbaijan, Georgia, North Korea, Albania, Idel-Ural, Serbia, Croatia, Slovenia, Tibet, Cossakia, Turkestan, North Vietnam, Cuba, Cambodia, South Vietnam, Laos, Afghanistan and others; and

Whereas the desire for liberty and independence by the overwhelming majority of peoples in these conquered nations constitutes a powerful deterrent to any ambitions of Communist leaders to initiate a major war; and

Whereas the freedom loving peoples of the captive nations look to the United States as the citadel of human freedom and human rights and to the people of the United States as the leaders in bringing about their freedom and independence; and

Whereas the Congress of the United States by unanimous vote passed Public Law 86-90 establishing the third week in July each year as "Captive Nations Week" and inviting the people of the United States to observe such week with appropriate prayer, ceremonies and activities; expressing their sympathy with and support for the just aspirations of the captive nations: Now, therefore,

I, Bruce King, Governor of the State of New Mexico, do hereby proclaim the week of July 12th through 18th, 1981, as "Captive Nations Week".

THE STATE OF MARYLAND—PROCLAMATION FROM THE OFFICE OF THE GOVERNOR—CAPTIVE NATIONS WEEK, JULY 12-18, 1981

Whereas the greatness of the United States is in large part attributable to its having been able to achieve a harmonious national unity of its people, even though they stem from diverse racial, religious and ethnic backgrounds; and

Whereas this harmonious unification has led the people of the United States to possess a warm understanding and sympathy for the aspirations of people everywhere; and

Whereas many nations continue to struggle to assert their independence, despite the aggressive policies of more powerful neighbors, and most recently we have seen evidence of this in Afghanistan and Poland; and

Whereas the freedom loving peoples of the captive nations look to the United States as the citadel of freedom and human rights and to the people of the United States as the leaders in bringing about their freedom and independence: Now, therefore,

I, Harry Hughes, Governor of the State of Maryland, do hereby proclaim July 12-18, 1981, as Captive Nations Week in Maryland, and commend this observance to all our citizens.●

CONGRESS SHOULD REJECT CURRENT TAX CUT PROPOSALS

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, July 27, 1981

● Mr. WEISS. Mr. Speaker, I recently received the following mailgram from the National Retired Teachers Association—American Association of Retired Persons, although I do not

concur with every proposition it sets forth, I believe it overall to be a very rational position on the proposed tax cuts we will consider this week. Basically, the statement suggests that this is neither the time for, nor the kind of, tax package that our economy needs.

I urge my colleagues to carefully consider this letter:

Sustained high rate inflation is the chief threat to and concern of the elderly. Consequently, the 13 million member National Retired Teachers Association—American Association of Retired Persons are mandated by their leadership to oppose all actions which promise to increase inflation, and to evaluate fiscal and monetary policies, as well as other actions, in terms of their effects on inflation. Viewed from that perspective, the Economic Recovery Tax Act of 1981 is at variance with the kind of fiscal policy the Nation needs at the present time. The across-the-board cuts in personal income taxes for which this legislation provides, although reduced somewhat from the administration proposal, are still too large, particularly in conjunction with the planned very large increase in defense spending. This remains so even taking into account the approved expenditure reductions in other budget categories. The basic policy approach of relying on stringent monetary policy to (hopefully) restrain inflation while pursuing a stimulative fiscal policy is the wrong policy combination.

It is simply asserted, without convincing proof, that large cuts in personal income tax rates, which will certainly increase Federal budget deficits, will quickly generate large gains in output and incomes, the taxes on which will more than offset the initial revenue loss. It seems far more likely that the revenue loss will not be offset, because taxpayers are not likely to change their behavior radically and save a significantly larger proportion of their incomes—especially in the current, high-inflation economic environment. While we do not share the belief that Federal deficits have been the only cause of inflation, they have certainly contributed to it in a major way. Large Federal budget deficits, year after year, are not something that can safely be ignored. Inflation is much too high. The Federal budget must be brought into balance and the sooner the better.

Apparently, the thinking behind the tax bill is that budget deficits can be ignored because monetary policy can and will be used to restrain inflationary pressures. While monetary policy certainly has an important role to play in restraining inflation, all the burden cannot be put on monetary policy without severe damage to the economy. The natural tendency of the "tight" monetary policy which is now being pursued by the Federal Reserve, and its accompanying high interest rates, is to curtail investment, both by business in new or modernized production facilities and by consumers in housing and automobiles. Although the tax bill contains provisions intended to encourage business to devote a larger share of profits to investments, the effect of the monetary policy which the Federal Reserve will have to follow to dampen inflationary pressure, is to make credit more expensive, and thereby discourage investment. All of these factors lead to the conclusion that a better policy mix would be to have a less stimulative fiscal policy and a less restrictive monetary policy.

There is, however, an even more fundamental failing of current policy, and that is that it assumes that the primary cause of inflation is excess demand—"too much money chasing too few goods." There is ample evidence to suggest that the cost-push (wage-price spiral) part of the inflation is the larger and more intractable part. The abolition of the council on wage and price stability removed whatever stabilizing influence the wage-price guidelines supplied, and it may not have been much, but nothing has been put in their place.

It is vitally important not to be lulled into complacency by the recent slackening pace of inflation as measured by the consumer and producer price indexes. This is due largely to the current weakness in prices of oil, not to any abatement of the underlying or "core" rate of inflation. As we have found out before, the only constant in oil prices is their volatility. The United States has been lucky in the current weakness of oil and other commodity prices, but it has made little or no progress in reducing the basic inflation rate, and the tax package now being considered in the Ways and Means Committee offers no promise that it will do so.

Proponents of this tax package make much of its supposed beneficial effect in increasing employment, but this misses the point. The economy has been quite successful in creating jobs over the past decade. What it has not done, in addition to bringing inflation under control, is maintain an adequate level of productivity growth, the basis for the increase in standards of living we all want. One way to stimulate productivity growth is to invest in more productive facilities, but investments in human capital—education and training—are also necessary, and these are not being increased. Some of the budget cuts, in fact, would reduce them.

If we are going to invest more we will have to save more, and the tax bill does not do nearly enough to stimulate savings. It reduces the $200 to $400 exclusion of dividend and interest income, which is much too low to begin with, in favor of an untried instrument that, to the extent it does stimulate savings, does so at a high cost to the treasury in order to furnish a barely concealed subsidy to the thrift industry. We acknowledge that the thrift industry has severe problems (most of which are the result of inflation), but the so-called "all-savers" certificate is a very poor way to try to solve them.

We also question the long-run utility of indexing the personal income tax. While we agree that "bracket-creep" is an undesirable product of inflation, the better solution is to curb inflation, not to set up what may become a new rigidity in the tax system.

It is past time for Congress and the administration to establish a comprehensive and effective anti-inflation program, unconstrained by ideology. Under such a policy monetary and fiscal policy should be mutually supportive—not working at cross purposes. Inflation is seriously damaging the economy and social fabric of the Nation, and the elderly in particular.

PETER W. HUGHES,
Legislative Counsel.●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, July 28, 1981, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

JULY 29

8:30 a.m.
Governmental Affairs
To hold hearings on the nomination of James R. Richards, of Virginia, to be Inspector General of the Department of Energy.
3302 Dirksen Building

9:00 a.m.
Commerce, Science, and Transportation
Business meeting, to consider pending calendar business.
235 Russell Building

Governmental Affairs
Intergovernmental Relations Subcommittee
To continue discussion of alternatives for delivering public services, focusing on certain private sector involvement in social services.
357 Russell Building

*Labor and Human Resources
To resume oversight hearings on the activities of the Office of Federal Contract Compliance Programs of the Department of Labor, focusing on Executive Order 11246, regulations relating to affirmative action.
4232 Dirksen Building

*Select on Ethics
To continue hearings on matters involving Senator Williams.
6226 Dirksen Building

9:30 a.m.
Agriculture, Nutrition, and Forestry
To hold hearings on the nominations of Charles W. Shuman, of Illinois, to be Administrator of the Farmers Home Administration, and Harold V. Hunter, of Oklahoma, to be Administrator of the Rural Electrification Administration.
324 Russell Building

Banking, Housing, and Urban Affairs
To resume oversight hearings on the conduct of monetary policy.

9:30 a.m.

*Veterans' Affairs

Business meeting, to mark up S. 349, providing for limited judicial review of the administrative action of the Veterans' Administration, and for reasonable fees to attorneys representing legal counsel for veterans.

412 Russell Building

HOUSE OF REPRESENTATIVES—*Tuesday, July 28, 1981*

The House met at 12 o'clock noon.

The Reverend Dr. D. Frederick Wertz, bishop, United Methodist Church, Washington, D.C., offered the following prayer:

Almighty God, You have given us life and taught us what it means to pursue happiness. You have revealed Yourself as truth and taught us to love what is beautiful and true. You have made us free and taught us to understand that no one of us is free until all are free. We are grateful.

Forgive our selfishness which refuses to recognize the rights of others. Forgive our greed which fails to acknowledge our need to share. Forgive our violence which is born of the false notion that problems can be solved by a demonstration or power.

Make us worthy of the times to which we have been born. And by Your grace, empower all who labor within these walls and all who bear the responsibilities of government, to be faithful. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. WALKER. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 379, nays 14, answered "present" 2, not voting 38 as follows:

Mr. BONER of Tennessee changed his vote from "nay" to "yea."

So the Journal was approved.

The result of the vote was announced as above recorded.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 736. An act to provide for the control of illegally taken fish and wildlife; and

S. 917. An act to amend title 38, United States Code, to increase the rates of disability compensation for disabled veterans; to increase the rates of dependency and indemnity compensation for their surviving

spouses and children; to authorize the Administrator of Veterans' Affairs to guarantee home loans with provisions for graduated-payment plans; to increase the maximum amount payable in Veterans' Administration specially adapted housing assistance; to expand eligibility for memorial markers; and for other purposes.

THE REVEREND DR. D. FREDERICK WERTZ

(Mr. EDGAR asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EDGAR. Mr. Speaker, I would like to welcome to the House today the bishop of the United Methodist Church for the Washington area who shared in the opening prayer, Bishop Fred Wertz.

Bishop Wertz was president of Lycoming College in Williamsport, Pa., when I was a student there back between 1961 and 1965.

Bishop Wertz has been bishop of the West Virginia area conference from 1968 to 1980 before becoming resident bishop for the Washington area.

I share this welcome with my colleagues for this very important reason. Bishop Wertz, in my opinion, represents the best of those who have heard the call to the ministry. Several years ago I had the privilege of reading a book by the author, and fellow minister, Rev. Robert Rains, entitled, "Creative Brooding." In the first chapter there is one line which I will never forget: "Lord, help me notice the stains when people get spilled on."

Bishop Fred Wertz as a college president, as a bishop in the United Methodist Church, as a pastor, as a chaplain, as a committed person in the faith, has always recognized those people who have been stained on the most.

I believe that the words of Robert Rains are the words of this particular bishop. He noticed the stains when the poor, the elderly, and the handicapped and those in need are spilled on and really need the love and the attention, not only of their faith, but of their Government and of their Nation.

I join with my colleagues in welcoming Bishop Frederick Wertz, who gave the opening prayer to the House of Representatives today.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C., *July 27, 1981.*

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: I have the honor to transmit herewith a copy of the Certification of the results of the Special Election held on July 21, 1981 for the Office of Representative of the United States House of Representatives for the 3rd Congressional District of Pennsylvania. This certification lists Mr. Joseph F. Smith as the apparent winner by a margin of 5,517 votes.

Since the Pennsylvania Election Code requires a five day waiting period after completion of the computation of votes, the Secretary of the Commonwealth will not be able to release a Certificate of Election before July 30, 1981. However, a letter from the Chairman of the City Commissioners of Philadelphia, who certified the election results, states that "there are no outstanding absentee ballot challenges, no reported voting machine breakdowns and no complaints have been lodged with us from any candidate, so it would appear the Certification will be forthcoming at the appropriate time".

With kind regards, I am,

Sincerely,

EDMUND L. HENSHAW, Jr.,
Clerk, House of Representatives.

SWEARING IN OF HON. JOSEPH F. SMITH OF PENNSYLVANIA AS A MEMBER OF THE HOUSE

Mr. MURTHA. Mr. Speaker, I ask unanimous consent that the gentleman from Pennsylvania, Mr. JOSEPH F. SMITH, be permitted to take the oath of office today. His certificate of election has not arrived, but there is no contest, and no question has been raised with regard to his election.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The SPEAKER. The Chair recognizes the gentleman from Pennsylvania (Mr. GRAY).

Mr. GRAY. Mr. Speaker and my colleagues, on behalf of the Philadelphia delegation, I am pleased to introduce JOSEPH SMITH, the newly elected Representative of the Third Congressional District of Pennsylania, who was elected in a special election on July 21.

He has served for 10 years as the State senator of the Fourth District of Pennsylvania.

I am proud to present to you, Mr. Speaker, and to my colleagues, the new Democratic Member from the City of Brotherly Love, Philadelphia, Pa.

Mr. SMITH appeared at the bar of the House and took the oath of office.

The SPEAKER. The gentleman is a Member of the Congress of the United States. Congratulations.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair will make the following announcement:

There is an unusual amount of 1-minute requests for speeches today on both sides of the aisle and the House has a full schedule so the Chair will recognize one Member from the Democratic side and then one from the Republican side until the hour of 1 o'clock. That will finish the 1-minute period at this time and the House will then proceed to consideration of suspensions.

PRESIDENT REAGAN'S PROMISE

(Mr. PEYSER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEYSER. Mr. Speaker, I, as I know all Members of the Congress, respect and honor the Office of the President of the United States. I think one of the things that is vitally important is that the President, regardless of party, always maintains credibility; yet last night, Mr. Speaker, I heard the President of the United States, and I quote from the prepared text from his Office, say the following, and this is the President saying this:

> I stated during the campaign and I repeat now I will not stand by and see those of you who are dependent on social security deprived of your benefits. I make that pledge to you as your President. You have no reason to be frightened. You will continue to receive your checks in the full amount due you.

That is the end of the quotation.

Mr. Speaker, those of us in this House of Representatives know that the legislation presented by this administration, by the President, stripped nearly 3 million people of their social security benefits effective February 1982. I do not think that it serves the President well or this Congress or the people of the country to have this type of misrepresentation stated to the people. I believe that we have to let the people know what the facts are on this issue.

THE WAYS AND MEANS GAME PLAN

(Mr. PARRIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PARRIS. Mr. Speaker, yesterday the Task Force on Economic Policy on which I am privileged to serve as chairman held a hearing comparing the final provisions of the Speaker's tax bill and the President's bipartisan proposal to reduce taxes for all Americans.

In his testimony, Dr. Norman Ture, Under Secretary of Treasury for Tax and Economic Affairs, said:

> The Ways and Means game plan is very simple. They want to toss a bone to the American taxpayer today and take it back with a pound of flesh attached tomorrow.

Dr. John Albertine, president of the American Business Conference, testified:

> A 3-year tax bill with a trigger for the third year is a 2-year tax bill for business planning purposes.

□ 1230

The suggestion that the Democrat bill is better for Americans with incomes under $50,000 a year over a long term is simply not factually correct. It will not create jobs, and it will not lead to economic recovery that is so desperately needed in our Nation today.

The American people will understand that before the Sun sets tomorrow night. I trust, and I predict, that this House will adopt the President's proposal in a critical and historic vote on tomorrow.

HOW DO YOU SPELL TAX RELIEF?

(Mr. WEBER of Ohio asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEBER of Ohio. Mr. Speaker, watching the President last night I was reminded of that question they ask in the commercial:

How do you spell tax relief?

I spell it R-e-a-g-a-n.

And that is how millions of Americans spelled it in the election of 1980.

Democrats and Republicans joined in supporting the Presidential candidate who promised true long-term tax relief. That spirit is reflected in the Conable-Hance bill.

The American people have made it clear that they want a real change; not just the appearance of a change; not just part of a change; not just change for a couple of years—they want real, lasting change.

They want the chance to start planning their lives once again without having to look over their shoulders to see if Congress is going to take it all away.

We have a choice tomorrow.

Either we vote for the new, real thing or else we vote for the same old thing.

Mr. Speaker, the same old thing just will not do these days. The American people have spoken. That is why 87 percent of my phone calls today back in my district support Conable-Hance.

ADMINISTRATION'S SHAMEFUL DELAY IN THE NAMING OF A NEW COMMISSIONER ON AGING

(Mr. RATCHFORD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RATCHFORD. Mr. Speaker, it is July 28, and we still do not have a confirmed Commissioner on Aging. It is unfortunate that over the past 7 months this administration has pursued a budget plan, a major tax proposal, and serious changes in the social security system—all without the benefit of advice from a Commissioner of the Administration on Aging—unbelievable.

There is no person in the administration today, truly sensitive to the special problems of our growing elderly population, and expert in addressing their concerns, who is in a position to offer advice directly to the President, and the Secretary of Health and Human Services. In the meantime, some 3 million older Americans are being eliminated from the social security minimum benefit program, vital legal services to the elderly are being drastically restricted, and critical medicare and medicaid benefits are being cut back significantly.

The country needs a confirmed Commissioner on Aging now. I would hope that in the days and months ahead, the Commissioner-designate will be confirmed, extended a meaningful policymaking role in the administration, and serve as an effective advocate to the Congress, and for elderly Americans across the Nation.

DELAWAREANS SUPPORT REAGAN PACKAGE

(Mr. EVANS of Delaware asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EVANS of Delaware. Mr. Speaker, I have the great privilege of representing the State of Delaware with close to 600,000 citizens. All segments of our country are represented in the State of Delaware; it is truly a microcosm of America.

I point this out by way of background because so many phone calls have been received in our Delaware office this morning, over 200 calls, and the phones are ringing off the hooks. Of those calls only 6 opposed the President's program and close to 200 supported President Reagan in the bipartisan tax relief package. That is a reflection of Delaware and a reflection of the American people, and they know that the President's program is a comprehensive one.

A bipartisan tax program is essential if we are to restore hope and opportunity once again for all Americans. The passage of this essential tax incentive ingredient of the program is clearly important to give work for savings and investment.

But remember also that the economic strength of our country also impacts in large measure on the credibility of our Nation's foreign policy. It determines the adequacy of our national defense program.

In short, our economic revitalization is more important than any one man—any one party. It really is a question of whether or not we are going to retain the basic freedoms we have always enjoyed in the United States of America.

A NATIONAL STRATEGY OF PEACE THROUGH STRENGTH

(Mr. STRATTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STRATTON. Mr. Speaker, today I have introduced, along with some 228 cosponsors, what most Members will recognize as the National Strategy of Peace Through Strength resolution.

This was the same resolution over one-half of the Members of the House in the 96th Congress also cosponsored, but which the Committee on Foreign Affairs was unwilling to report out intact.

The theme of our resolution is a very simple one, and one which most Americans today enthusiastically support: If we seek peace in today's world, we can only hope to achieve it by developing a military capability second to none.

After all, where does the major threat to the United States come from? From the Soviet Union, of course, and its clients and satellites.

And why have the Soviets managed to pose such an impressive threat? Not because they match this country industrially, or technologically, or agriculturally. The single area today in which they possess clear-cut superiority is military strength.

Over the past 10 years, while we have repeatedly cut our defense budgets, the Soviets have spent $240 billion more than we have on defense. And they surpass us now in virtually every category of military capability except aircraft carriers and helicopters.

That is why they have been so effective in spreading their political control into Southeast Asia, the Persian Gulf, Cuba, Africa, and Eastern Europe.

Only by restoring the military balance between ourselves and the Soviets, can we reassure our allies, and persuade the wavering states of the Persian Gulf and the Indian Ocean, that we not only intend to defend our interests but are truly determined to develop the power to support that aim.

This is the very issue, I believe, on which the American people spoke out with such unmistakable clarity last November.

By adopting our Peace Through Strength Resolution this Congress will demonstrate that when it comes to national security, there is no difference between the executive and the legislative branches in America and no difference between Republicans and Democrats.

O'NEILL POINTS A DAGGER AT AMERICA'S MIDDLE CLASS

(Mr. CRAIG asked was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CRAIG. Mr. Speaker, the President pointed out, clearly, last night that the Rostenkowski-O'Neill tax bill is a dagger aimed at the heart of the American middle class.

According to Treasury Department projections for 1984, there is no income group that fares better under Rostenkowski-O'Neill than under Conable-Hance. Let us compare the marginal tax rates faced by middle class income groups under the two bills:

Families from $25,000 to $30,000 hit 24 percent under Conable-Hance, 25 percent under Rostenkowski-O'Neill;

Families from $30,000 to $35,000 hit 28 percent under Conable-Hance, 34 percent under Rostenkowski-O'Neill;

Families from $35,000 to $46,000 hit 33 percent under Conable-Hance, 41 percent under Rostenkowski-O'Neill; and

Families making from about $46,000 to $60,000 will get hit the worst. In 1984 under Rostenkowski-O'Neill, they will reach a marginal income tax rate of 48 percent. Under Conable-Hance, they would only reach 38 percent.

Let us face it: The idea that Rostenkowski-O'Neill does anything for the American middle class is fundamentally untrue. If we want to cut taxes for the people that produce most of America's wealth—the middle class—then we must take the President's lead made so well last night and pass the Conable-Hance bill this week.

RED-LETTER DAY TOMORROW

(Mr. BETHUNE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BETHUNE. Mr. Speaker, tomorrow will be a red-letter day for many Members here in this Chamber.

Those who vote for the Democratic Ways and Means bill will be voting for more of the tired, old policy of redistributing wealth and income in the country. They will be voting against income growth and economic growth in our country.

They will be voting for continued tax increases instead of a real tax cut for everyone over $10,000.

They will be voting for more bracket creep and against indexing to stop bracket creep.

They will be voting for $4.5 billion more in the deficit according to the Joint Tax Committee in the first 2 years and against a balanced budget and supply-side economics.

Why is it a red-letter day for everyone here in the Chamber tomorrow? Because it will be the last day of their political career that Members who vote against the President's tax cut can consider and call themselves a conservative or friend of the taxpayer and get away with it.

PRESIDENT'S SPEECH A GROSS FORM OF MENTAL RESERVATION

(Ms. OAKAR asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. OAKAR. Mr. Speaker, I was deeply disturbed that the President gave a political speech on prime time TV and began by misleading the American people about his stand on social security cuts. The President said he will not stand by and deprive our people of their social security benefits. He said, "You will continue to receive your checks."

How misleading and what a gross form of mental reservation. The President supported the bill that cut social security for 3 million people, most of whom are between 70 to 90 years old who receive the minimum benefit. The President also supported the cuts for widows who have children in college by reducing the children's benefit. He said, "You will continue to receive your social security checks."

The President forgot to tell these American people that their checks would be cut by at least 25 to 40 percent in the near future.

PRESIDENT WANTS TO GET AMERICA MOVING AGAIN

(Mr. ROTH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROTH. Mr. Speaker, we who are on the other side of the aisle want to get America moving again. That is the essence of the President's message last night. I know the American people are going to join with the President in supporting his tax legislation.

Under the plan supported by the President, the cuts the people see they get and the cuts they get, they get to keep. We on our side of the aisle are unwilling to accept 7½ million people unemployed. We will not continue to accept exorbitant interest rates that have brought our housing industry to its knees and have been responsible for over 700,000 small business bankruptcies last year. We will not accept this unbearable inflation which is financially wiping out our middle class, our senior citizens, and the people on fixed incomes.

It is time to turn America around. It is time to put America back to work. It is time to stop playing petty politics. It is time to work for what is in the best interests of our country and all of the American people.

THE REAGAN-VOLCKER INTEREST RATES

(Mr. DONNELLY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DONNELLY. Mr. Speaker, in spite of President Reagan's magnificent public relations performance last evening, he continues to advocate a monetary policy that exacerbates Government spending and will inevitably lead to higher taxes. The Reagan policy of exorbitant interest rates is staggering our economy and the economies of our trading partners and allies.

The Reagan interest rates are denying working families the chance to buy a home and a car. The Reagan interest rates have caused a depression in the construction and the housing industry and these exorbitant rates have prevented industry from expanding to provide new jobs.

President Reagan is jeopardizing the fight against inflation and lower interest rates by guaranteeing huge budget deficits with an absolute reckless tax program. President Reagan and Federal Reserve Chairman Paul Volcker must change direction before plunging this entire Nation into a massive recession.

PRESIDENT'S TAX PROGRAM OFFERS HELP TO EVERYONE

(Mr. DANNEMEYER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DANNEMEYER. Mr. Speaker, it was with sadness that I saw on the tube this morning the distinguished chairman from Illinois (Mr. ROSTENKOWSKI) talking about the President's tax program which we will vote on tomorrow. If I heard right, the gentleman from Illinois (Mr. ROSTENKOWSKI) said the President's program only helps people who earn $50,000 a year or more. That is hogwash and he knows it.

The following table shows that the Reagan tax program treats each income group substantially the same. This across-the-board tax cut does not favor the rich over the poor, or vice versa.

COMPARISON OF INDIVIDUAL INCOME TAX UNDER CURRENT LAW AND UNDER THE ECONOMIC RECOVERY TAX ACT OF 1981 (H.R. 3849)

1980 wage level	1984 tax under current law		1984 tax under H.R. 3849		
	Tax increase from inflation-caused bracket creep since 1980	Total amount of tax	Total amount of tax	Reduction from current law tax	
				Amount	Percent
$5,000	$266	−$408	−$408	0	0.0
10,000	463	967	650	−$316	−32.7
15,000	385	2,046	1,413	−634	−31.0
20,000	547	3,259	2,272	−987	−30.3
25,000	830	4,738	3,297	−1,441	−30.4
30,000	1,153	6,429	4,442	−1,987	−30.9

PERMISSION FOR COMMITTEE ON RULES TO FILE RULE ON H.R. 4242, TAX INCENTIVE ACT OF 1981

Mr. LONG of Louisiana. Mr. Speaker, I ask unanimous consent that the Committee on Rules have until midnight tonight to file the rule on H.R. 4242, the Tax Incentive Act of 1981.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

CORPORATE DOUBLE-DIPPERS

(Mr. MOORE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOORE. Mr. Speaker, there is a special provision in the Ways and Means Committee's tax bill which will allow a select group of corporations to double dip into the Treasury.

These double-dippers are the six distressed industries which are eligible for a privileged tax bailout created by the committee's bill.

They will be able to cash in unused investment tax credits against past tax liabilities. It is a windfall which could amount to $3.3 billion.

But the windfall does not just stop with this rebate—this is just the first dip.

Once these companies spend this money on new industrial equipment they are then entitled to all of the other investment incentives which are in the committee bill.

These companies will be able to use the expensing provision and partially write off the cost of that equipment. The portion of these purchases which are not expensed will be eligible for new investment tax credits. That is the second dip.

In effect, the Government will give these six select industries free money to buy new equipment and then will give them additional tax advantages for spending it. All in all, these companies will achieve better than a 200-percent return from the Treasury.

No other groups of taxpayers are treated so generously. It is hard to see how the Speaker's tax bill is better for the poor when corporate America can double dip like this.

THE ADMINISTRATION'S LATEST FALL GUYS—THE FEDERAL RESERVE

(Mr. PEASE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEASE. Mr. Speaker, one of the many contradictions in the Reagan economic policy is being addressed today in House Concurrent Resolution 160, a sense-of-the-Congress resolution with respect to monetary policy, inflation, and high interest rates.

Economists have made pointed reference to the inherent inconsistency in the Reagan plan—large, across-the-board tax cuts that will put large amounts of money back into the market to seek goods and services, and at the same time a thumbscrew tightening of money supplies through the Federal Reserve.

I can foresee now the President innocently blaming the Fed for high interest rates in the future. He and his administration will make these charges despite, or perhaps because, they have carefully set up the Fed to be the fall guy in their fun and games with national economic policy.

Given a perfect chance at the Ottawa economic summit to repudiate his heavy reliance on high interest rates as a national policy tool, President Reagan was not able to make any definitive statement. The other important economic powers of the world who also oppose the Reagan high interest rate policy were able only to hear muted, confusing, and unhelpful ramblings by the President as way of justification for his programs.

Mr. Speaker, supply-side economics rests crucially on the inflation rates that we may experience under a Reagan administration. The President and his advisers are guaranteeing that our country will see a continuation of high inflation and perhaps see it go even higher if national policy does not do more than depend on this economic folly. The President can no sooner tax cut us to prosperity than we can spend ourselves to prosperity.

I hope that Members will keep in mind that we will not be doing our constituents any favors by voting them a tax cut while at the same time we allow the President to diminish that saved tax money through higher interest rates and inflation.

A PHONY ARGUMENT BY DEMOCRATS ON PRESIDENT REAGAN'S TAX CUTS

(Mr. KEMP asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KEMP. Mr. Speaker, this argument that President Reagan—who wants to lower the tax rates across the board for all the American people—is only interested in cutting taxes for people above $50,000, while our Democratic friends are interested in cutting tax rates for people below $50,000, is one of the phoniest arguments going on in the country today.

First of all, let us recognize that we are debating only one tax cut bill. The Ways and Means bill is not a tax cut for any Americans; instead, it is a tax increase.

Over the next 3 years, inflation, bracket creep, and scheduled payroll tax increases will raise taxes by about 22 percent. The 25 percent, 3-year tax rate reductions in the Conable-Hance bill will offset this tax increase, and the indexing provision in the Conable-Hance bill will prevent bracket creep in the future.

In contrast, the 15 percent, 2-year Ways and Means bill leaves the American taxpayer with a real tax increase and a real decline in take-home pay.

In 1965 the top Federal tax bracket encountered by a median-income family of four was 17 percent. A family with twice the median income had a top bracket of 22 percent. Unless tax rates are cut, in 1981 the median income family, now earning about $25,000, will be in the 28 percent Federal bracket, rising to 32 percent in 1984. A family with twice the median income will face a 43-percent bracket, rising to 49 percent in 1984. When social security and the various State income taxes are included, the disincentives are even harsher, with average families this year facing 40 to 44 percent marginal tax rates. Under the Conable-Hance bill, the median-income family will be in the 24-percent Federal bracket in 1984 and for many years thereafter. A family with twice the median income will be in the 38-percent bracket.

By contrast, under the Ways and Means bill, the median family will be in the 25-percent bracket by 1984 and the 34-percent bracket by 1986 or 1987. The twice-median income family will be in the 48-percent bracket in 1984 and in the 50-percent bracket by soon thereafter.

Clearly, by holding back on a third year of tax rate reduction and by omitting indexing, the Ways and Means bill is scheduling ordinary middle-income people from some of the biggest tax increases in history. The adverse effects on the economy will be tremendous.

In 1984, all families earning over $15,000 will be worse off under the Ways and Means bill than the Reagan bill. The same is true for single taxpayers earning over $10,000. And, be-

cause the Reagan tax rates are indexed, but the Ways and Means rates are not, things will keep getting worse.

The Ways and Means bill ignores the fact that, to keep people who are now in low-tax brackets from being pushed higher, it is necessary to cut the brackets above their current incomes. But the Rostenkowski bill does not do that.

Under the Ways and Means bill, people will hit the top 50 percent tax bracket on wage income almost exactly where they do now—at taxable incomes of $60,400 for families and $41,700 for single taxpayers. Because of inflation, that income will be worth less and less each year. The bipartisan bill, on the other hand, cuts the tax rate at those incomes to 42 percent, and makes sure that you can never go any higher merely because of inflation.

If the Democrats are suddenly the friends of the middle class, the middle class does not need any enemies.

I think Mr. Reagan is trying to cut everybody's tax rates, and in the interest of equity I would suggest that he be supported.

ADMINISTRATION'S ECONOMIC POLICY CAUSES A TRANSFER OF WEALTH FROM BORROWERS TO LENDERS

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALEXANDER. Mr. Speaker, when a new economic policy is established, spending, tax, and monetary policies change. The effect of the change is to transfer wealth from one economic group to another.

The administration's high-interest-rate policies transfer wealth from Americans who borrow money to Americans who lend money.

Week before last, money-market funds rose by $2.4 billion, to an aggregate of $136 billion. The beneficiaries of the money-market fund are principally wealthy people and the Wall Street brokerage houses that maintain them—like Merrill Lynch, Treasury Secretary Donald Regan's spiritual home.

WHOM DO YOU TRUST?

(Mr. FIELDS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FIELDS. Mr. Speaker, last night I heard one of the most exciting speeches in my lifetime, and I came away with one question, a question to the American people: Whom do you trust? Do you trust the Democratic leadership, who are accustomed to large tax bites out of the paychecks of working America to finance massive social programs? Do you trust the Democratic leadership who, back in last year's campaign, did not want a tax cut? In February they wanted a 1-year tax cut; in June they wanted a 2-year tax cut. Now they are talking about a trigger. Do you trust a party who does not want to give a 25-percent 3-year tax reduction to working America, only wants to give all of working America 15 percent, or do you trust a President who has come in and kept his promise? He has reduced the level of Federal spending, he is now trying to keep a second promise, to reduce the level of taxation. Who do you trust?

As a young person, my future is in this country. My future is tied to what we do in this body. I want new leadership. I want the leadership of Ronald Reagan. I think this tax bill is important.

Tomorrow is a red-letter day for America.

NEW ECONOMIC POLICY LEADING TO A RECORD DEFICIT

(Mr. SCHUMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHUMER. Mr. Speaker, today we will be voting upon a resolution about high interest rates, House Concurrent Resolution 160, monetary policy, inflation and high interest rates. The condemnation of high interest rates is, of course, greatly justified. Our economy is now an automobile hurdling down a hill, and high interest rates attempts to brake that economy by putting the brakes to only one wheel. The result is going to be that the automobile is going to fall off the track unless there is a balanced economic policy.

Who is to blame for this? Well, it is easy to blame the Chairman of the Federal Reserve. But what choice does he have when his friend down the street on Pennsylvania Avenue, the President of the United States, is going to bring us—despite all of the rhetoric—a higher deficit than we ever had in the past?

If the Chairman of the Federal Reserve were to see some real restraint, if he were to see a tax policy that made some sense, and if he were to see some kind of policies that would allow money to be allocated more equally, I think we would see a difference in what kind of interest rates we would have.

So let us focus not on the Chairman of the Federal Reserve, but on the President of this country and his new economic policy which is leading to a record deficit.

THE TAX CUT

(Mr. MARTIN of North Carolina asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MARTIN of North Carolina. Mr. Speaker, tomorrow we decide whether the taxpayers will get a tax cut that actually cuts taxes, for good, as President Reagan proposes. Or else we give them another one of those patented so-called tax cuts from the Democratic Party leadership that results in higher tax burdens as usual.

It was expected that the Democrat leadership would roll out their old snake oil populisms to try to stir up class rivalry. Sure enough, our swell Speaker has claimed that the President's bill will favor those making $50,000 a year or more. He is absolutely correct about that. He would also have been correct had he claimed, as the independent Library of Congress study has shown, that everybody making $35,000 or more is better off immediately under the President's bill as is everybody making over $10,000 by the third year.

Independent studies show that while $15,000-to-$20,000 families will start out slightly better under the Speaker's bill, with the redistributive equivalent of Jimmy Carter's old $50 rebate, even if they could invest that little crumb at 20 percent interest, tax-free, they would still be better off by 1984 under the Reagan plan.

In fact, the President's bill cuts taxes in proportion to your tax burden, and makes permanent the cuts to protect everyone from ever again being punished into higher tax brackets by inflation. That is why the President's bipartisan bill ends up better for everybody than the partisan, illusory tax cut which only favors higher taxes for all, automatically and guaranteed.

RETURN THE CUBANS TO CUBA

(Mr. DE LA GARZA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DE LA GARZA. Mr. Speaker, I have a suggestion for relocating the 950 Cubans remaining at Fort Chaffee, Ark.

Let us return them to Cuba by relocating them to Guantanamo—there is plenty of room there.

As a result of a policy mistake by our previous administration, some parts of the Nation such as Bainbridge, Md., and Port Isabel, Tex., are now being considered as sites for the remaining Cubans.

On the 21st of July, I proposed an alternative to relocating this last group of Cubans, most of whom have been found to have severe mental or social disorders, to our quiet communities in the United States. I suggested to the Attorney General then that the Cubans be taken to our base at Guan-

tanamo Bay in Cuba, where sufficient facilities exist to house them while maintaining U.S. control.

Let me stress that these Cubans have been found to have problems so severe that they cannot be assimilated into everyday community life. There are 250 mentally ill or retarded in the group, 400 antisocial, 100 homosexual, and 100 alcoholics or drug users, among others.

It would be a simple matter to get a few airplanes and take the Cubans to Guantanamo. It would save the quiet communities of Bainbridge and Port Isabel the headaches and disruption of having hundreds of antisocial, mentally ill, and criminal persons dumped into their laps.

TO HELP AMERICA, VOTE FOR PRESIDENT REAGAN'S BIPARTISAN BILL

(Mr. LUNGREN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUNGREN. Mr. Speaker, I received in my office today a "Dear Colleague" from one of the Members on the other side of the aisle who serves on the Ways and Means Committee in which he suggested that the Congressional Research Service studies comparing the Republican bill with the O'Neill-Rostenkowski bill supports the Ways and Means Committee bill.

Well, Mr. Speaker, I have just received copies of the two studies. I have gone over them. And either there has been a mistake in printing, or the gentleman has misread the report. The report suggests very, very clearly that the Republican bill, if you only take it in the first 2 years, is better for everyone over $35,000, not $50,000. And if you take the third year, which is what we are talking about because we are going to vote tomorrow on whether you get a guaranteed third year, everybody over $10,000 does better under the Republican bill than they do under the Ways and Means Committee bill.

Mr. Speaker, we ought to have truth in packaging here. We ought to be talking about the differences in the two bills. If you want to help America, vote for President Reagan's bipartisan bill.

PRESIDENT REAGAN ALERTED CONGRESS OF NEED TO ENACT HIS TAX CUT—NOW

(Mr. SMITH of Oregon asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of Oregon. Mr. Speaker, President Reagan, in his speech to the Nation, has alerted Congress of the need to enact his tax cut proposal now. The present attempt to defeat the President's tax cut bill has been supported largely by misleading rhetoric and economic scare tactics so that those who have traditionally opposed lower taxes can salvage respectability. While this 11th hour political ploy is threatening to water down the administration's proposal, the American people are crying out "we've had enough."

To those more interested in political games rather than economic necessity consider that Federal taxes for the average family has increased 400 percent in the last 15 years. Also, consider that the typical American worker labors for 2 hours and 45 minutes per 8-hour day to pay his tax obligations.

We can no longer afford to tolerate a tax system that penalizes economic efficiency and destroys incentive while subsidizing inefficiency and encouraging unemployment. Those entering business are compelled to make Uncle Sam a silent partner who puts up no capital, yet demands more than half the profit.

To those who wish to continuously haggle during a time when a tax break for the people is more necessary than ever, remember it is they who have given you the chance to determine their well-being.

□ 1300

NATIONAL TOURISM POLICY ACT

(Mr. BONER of Tennessee asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BONER of Tennessee. Mr. Speaker, I wish to take this opportunity to solicit the support of my colleagues for the National Tourism Policy Act, H.R. 1311. This legislation will establish an interagency coordinating counsel, headed by the Secretary of Commerce, which will coordinate policies, issues, and other programs in Federal departments and agencies that relate to tourism. The coordinating counsel would use existing departmental resources and personnel and would not require additional funds. A tourism advisory counsel composed of representatives from the tourism and travel industry, would advise the administration on the formulation of the marketing plan and study its ongoing operations. Additionally, this bill authorizes $6.5 million to carry out the national tourism policy. This funding is consistent with the administration's budget request for tourism programs.

This legislation is the result of over 6 years of deliberations by the Congress and reflects the belief that an aggressive, imaginative effort to promote tourism in the United States will provide tremendous economic and social benefits.

I urge you to support the continued development of a strong tourism program in the United States. The passage of the national tourism policy will herald a new beginning for the U.S. tourism program. I earnestly solicit your support for H.R. 1311.

TAX BILL

(Mr. RITTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RITTER. Mr. Speaker, the President asked the American people to support the bipartisan tax reduction plan. Let us look at the arguments.

First, no matter how you cut it, 25-percent tax reduction is greater than 15 percent. And, by indexing the brackets, the tax reduction is made permanent. The opposition has no indexing provision. Their plan allows the Federal Government to continue to profit as inflation drives wage earners into higher tax brackets. Frankly, most taxpayers plan to live beyond 2 years.

Second, the bipartisan plan is aimed more at savings, investment, and economic growth to provide jobs for districts like mine, the Lehigh Valley of Pennsylvania and for America beyond. This bipartisan tax plan is a key feature of a well-thought-out economic recovery program while the opposition is only out to win a political victory.

Just a few months ago they said a tax cut was irresponsible. They have no overall economic plan. Their only plan, put together out of desperation, is to survive past economic failures.

They are the same folks that have spent us into the inflation and high interest rate troubles we are in now. They are the same folks dependent on Government gift-giving for their political futures. Those people promising tax cuts are like hangmen promising a looser noose.

WHOM DO YOU TRUST?

(Mr. COATS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COATS. Mr. Speaker, we have heard from both sides now. We heard from the President last night, we heard the Democratic response. Both sides said that their bill would best help the middle class. Both sides said that their bill would best help small business. Both promised that their tax package would provide the economic cure that this Nation needs.

So it really comes down to whom do we believe, whom do we trust.

The Democratic leadership says, "Trust us, we will take your money, we will decide what to do with it." That is

what we have done in the last 20 years. These are the same people who have given us 19 out of 20 deficits in those 20 years. These are the same people who say we have given you tax cuts over the last 10 years, five of them. Yet the tax burden has increased 249 percent over this same period. Can anybody say they are better off now than they were before? Or do we trust the President who said, "I came to Washington to cut spending—which we have done—and now I will cut taxes."

We back this bill. We will bring to the American people what the American people asked for in November and what they want now. I suggest that it is the President and the Republicans in Congress that have the trust of the American people to deliver on their promises. We need only weigh the Democrats' performance against the President's performance to know who we can trust.

THE CONGRESSIONAL BASEBALL GAME

(Mr. CONTE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONTE. Mr. Speaker, the time draws near and I have yet to learn of a good reason to be concerned with the challenge that the Democrats hope to present to my Republican team at the congressional baseball game tomorrow evening.

Have they been lulled into an unconscious state, or are they just overconfident based on their fluke victory last year. Well let me tell you right here and now, the Republicans of 1981 are a new breed, and we aim to win the congressional baseball game again this year. I have 9 young bulls, who are meaner than junkyard dogs.

Mr. Speaker, as I am sure you are already aware, our ace pitcher JOHN "RAZOR-TONGUE" LEBOUTILLIER, continues to prepare for the awesome responsibility which is his; and he will stop at nothing to bring the Republicans back into the winning circle. I say "back to the circle" because as you know all too well, it would take nearly 10 years of victories for the Democrats to even the score in games against my Republican ball club. The record shows that the Democrats have proven ineptitude in the game of baseball.

This is not to suggest, of course, that the Democratic Party knows nothing about baseball; I will stop short of saying that. No, they have dug out after each encounter with the Republican nine and come back swinging. Unfortunately, it just is not in their blood: They are prone to err, fated to foul, likely to lose.

Mr. Speaker, once again, I invite everyone to come on out and witness another Republican victory tomorrow evening at 8 p.m. in Four-Mile Run Park in Alexandria. And for those of you out there who think that this contest is just all fun and games, please remember that the proceeds will be going to Childrens Hospital, and regardless of the outcome, I am sure that the evening will be loads of fun.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

NATIONAL TOURISM POLICY ACT

Mr. FLORIO. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1311) to establish a national tourism policy and an independent Government agency to carry out the national tourism policy, as amended.

The Clerk read as follows:

H.R. 1311

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "National Tourism Policy Act".

NATIONAL TOURISM POLICY

SEC. 2. (a) The International Travel Act of 1961 (hereinafter in this Act referred to as the "Act") is amended by striking out the first section and inserting in lieu thereof the following: "That this Act may be cited as the 'Tourism Promotion Act of 1981'.

"TITLE I—NATIONAL TOURISM POLICY

"SEC. 101. (a) The Congress finds that—

"(1) the tourism and recreation industries are important to the United States, not only because of the numbers of people they serve and the vast human, financial, and physical resources they employ, but because of the great benefits tourism, recreation, and related activities confer on individuals and on society as a whole;

"(2) the Federal Government for many years has encouraged tourism and recreation implicitly in its statutory commitments to the shorter workyear and to the national passenger transportation system, and explicitly in a number of legislative enactments to promote tourism and support development of outdoor recreation, cultural attractions, and historic and natural heritage resources;

"(3) as incomes and leisure time continue to increase, and as our economic and political systems develop more complex global relationships, tourism and recreation will become ever more important aspects of our daily lives;

"(4) the existing extensive Federal Government involvement in tourism, recreation, and other related activities needs to be better coordinated to effectively respond to the national interest in tourism and recreation and, where appropriate, to meet the needs of State and local governments and the private sector;

"(5) it is in the national interest to encourage the orderly growth and development of tourism to and within the United States;

"(6) the orderly growth and development of tourism depend on the efforts of government and the tourism industry to assure that the objectives of the national tourism policy (established by subsection (b)) are achieved to the maximum extent consistent with other public policy objectives;

"(7) orderly growth and development of tourism, while matters for regional, State, local, and private development, are also of appropriate and important concern to the Federal Government;

"(8) the national interest requires that the extensive Federal policy and programmatic involvement in tourism be responsive to the needs of the tourism industry; and

"(9) in view of the importance of travel and tourism to the economy of the United States, and the pervasive Federal policy and programmatic involvement in tourism, it is necessary and appropriate for the Federal Government to complement, assist, and support mechanisms that will most effectively assure implementation of the national tourism policy.

"(b) There is established a national tourism policy to—

"(1) optimize the contribution of the tourism and recreation industries to economic prosperity, full employment, and the international balance of payments of the United States;

"(2) make the opportunity for and benefits of tourism and recreation in the United States universally accessible to residents of the United States and foreign countries and insure that present and future generations are afforded adequate tourism and recreation resources;

"(3) contribute to personal growth, health, education, and intercultural appreciation of the geography, history, and ethnicity of the United States;

"(4) encourage the free and welcome entry of individuals traveling to the United States, in order to enhance international understanding and goodwill, consistent with immigration laws, the laws protecting the public health, and laws governing the importation of goods into the United States;

"(5) eliminate unnecessary trade barriers to the United States tourism industry operating throughout the world;

"(6) encourage competition in the tourism industry and maximum consumer choice through the continued viability of the retail travel agent industry and the independent tour operator industry;

"(7) promote the continued development and availability of alternative personal payment mechanisms which facilitate national and international travel;

"(8) promote quality, integrity, and reliability in all tourism and tourism-related services offered to visitors to the United States;

"(9) preserve the historical and cultural foundations of the Nation as a living part of community life and development, and insure future generations an opportunity to appreciate and enjoy the rich heritage of the Nation;

"(10) insure the compatibility of tourism and recreation with other national interests in energy development and conservation, environmental protection, and the judicious use of natural resources;

"(11) assist in the collection, analysis, and dissemination of data which accurately measure the economic and social impact of tourism to and within the United States, in order to facilitate planning in the public and private sectors; and

"(12) harmonize, to the maximum extent possible, all Federal activities in support of tourism and recreation with the needs of the general public and the States, territories, local governments, and the tourism and recreation industry, and to give leadership to all concerned with tourism, recreation, and national heritage preservation in the United States.".

DUTIES

SEC. 3. (a) The following heading is inserted before section 2 of the Act:

"TITLE II—DUTIES".

(b) Section 2 of the Act (22 U.S.C. 2122) is amended by striking out "purpose of this Act" and inserting in lieu thereof "the national tourism policy established by section 101(b)".

(c) Section 3(a) of the Act (22 U.S.C. 2123(a)) is amended—

(1) by inserting "(A)" after "(4)" and by adding after paragraph (4) the following:

"(B) shall establish nine offices in foreign countries which are in addition to the offices established under subparagraph (A);";

(2) by striking out "and" at the end of paragraph (6), by striking out the period at the end of paragraph (7) and inserting in lieu thereof a semicolon, and by adding after paragraph (7) the following new paragraphs:

"(8) shall establish facilitation services at major ports-of-entry of the United States;

"(9) shall consult with foreign governments on travel and tourism matters and, in accordance with applicable law, represent United States travel and tourism interests before international and intergovernmental meetings;

"(10) shall develop and administer a comprehensive program relating to travel industry information, data service, training and education, and technical assistance;

"(11) shall develop a program to seek and to receive information on a continuing basis from the tourism industry, including consumer and travel trade associations, regarding needs and interests which should be met by a Federal agency or program and to direct that information to the appropriate agency or program;

"(12) shall encourage to the maximum extent feasible travel to and from the United States on United States carriers;

"(13) shall assure coordination within the Department of Commerce so that, to the extent practicable, all the resources of the Department are used to effectively and efficiently carry out the national tourism policy; and

"(14) shall develop and submit annually to the Congress, within six weeks of transmittal to the Congress of the President's recommended budget for implementing this Act, a detailed marketing plan to stimulate and encourage travel to the United States during the fiscal year for which such budget is submitted and include in the plan the estimated funding and personnel levels required to implement the plan and alternate means of funding activities under this Act.".

(d)(1) Paragraph (5) of section 3(a) is amended (A) by striking out "foreign countries." and inserting in lieu thereof "foreign countries;", (B) by striking out "this clause;" and inserting in lieu thereof "this clause.", (C) by inserting the last two sentences before the first sentence of subsection (c), and (D) by striking out "this clause" in such sentences and inserting in lieu thereof "paragraph (5) of subsection (a)".

(2) Section 3 of the Act is amended by striking out "clause (5)" each place it appears and inserting in lieu thereof "paragraph (5)".

(e) Sections 2 and 3 of the Act are redesignated as sections 201 and 202, respectively, and section 5 is inserted after section 202 (as so redesignated) and redesignated as section 203.

(f) The following section is inserted after section 203:

"SEC. 204. (a) The Secretary is authorized to provide, in accordance with subsections (b) and (c), financial assistance to a region of not less than two States or portions of two States to assist in the implementation of a regional tourism promotional and marketing program. Such assistance shall include—

"(1) technical assistance for advancing the promotion of travel to such region by foreign visitors;

"(2) expert consultants; and

"(3) marketing and promotional assistance.

"(b) Any program carried out with assistance under subsection (a) shall serve as a demonstration project for future program development for regional tourism promotion.

"(c) The Secretary may provide assistance under subsection (a) for a region if the applicant for the assistance demonstrates to the satisfaction of the Secretary that—

"(1) such region has in the past been an area that has attracted foreign visitors, but such visits have significantly decreased;

"(2) facilities are being developed or improved to reattract such foreign visitors;

"(3) a joint venture in such region will increase the travel to such region by foreign visitors;

"(4) such regional programs will contribute to the economic well-being of the region;

"(5) such region is developing or has developed a regional transportation system that will enhance travel to the facilities and attractions within such region; and

"(6) a correlation exists between increased tourism to such region and the lowering of the unemployment rate in such region.".

ADMINISTRATION

SEC. 4 (a)(1) The first sentence of section 4 of the Act (22 U.S.C. 2124) is amended to read as follows: "There is established in the Department of Commerce a United States Travel and Tourism Administration which shall be headed by an Under Secretary of Commerce for Travel and Tourism who shall be appointed by the President, by and with the advise and consent of the Senate, and who shall report directly to the Secretary.".

(2) Section 4 is amended by striking out the last sentence and inserting in lieu thereof the following: "The Secretary shall designate an Assistant Secretary of Commerce for Tourism Marketing who shall be under the supervision of the Under Secretary of Commerce for Travel and Tourism. The Secretary shall delegate to the Assistant Secretary responsibility for the development and submission of the marketing plan required by section 202(a)(14).".

(3) Section 5314 of title 5, United States Code, is amended by striking out "Under Secretary of Commerce" and inserting in lieu thereof "Under Secretary of Commerce and Under Secretary of Commerce for Travel and Tourism".

(b)(1) The following heading is inserted before section 4:

"TITLE III—ADMINISTRATION".

(2) Section 4 is redesignated as section 301 and the following new sections are inserted after the section:

"SEC. 302. (a) In order to assure that the national interest in tourism is fully considered in Federal decisionmaking, there is established an interagency coordinating council to be known as the Tourism Policy Council (hereinafter in this section referred to as the 'Council').

"(b)(1) The Council shall consist of—

"(A) the Secretary of Commerce who shall serve as Chairman of the Council;

"(B) the Under Secretary for Travel and Tourism who shall serve as the Vice Chairman of the Council and who shall act as Chairman of the Council in the absence of the Chairman;

"(C) the Director of the Office of Management and Budget or the individual designated by the Director from the Office;

"(D) an individual designated by the Secretary of Commerce from the International Trade Administration of the Department of Commerce;

"(E) the Secretary of Energy or the individual designated by such Secretary from the Department of Energy;

"(F) the Secretary of State or the individual designated by such Secretary from the Department of State;

"(G) the Secretary of the Interior, or the individual designated by such Secretary from the National Park Service or the Heritage Conservation and Recreation Service of the Department of the Interior;

"(H) the Secretary of Labor, or the individual designated by such Secretary from the Department of Labor; and

"(I) the Secretary of Transportation, or the individual designated by such Secretary from the Department of Transportation.

"(2) Members of the Council shall serve without additional compensation, but shall be reimbursed for actual and necessary expenses, including travel expenses, incurred by them in carrying out the duties of the Council.

"(3) Each member of the Council, other than the Vice Chairman, may designate an alternate, who shall serve as a member of the Council whenever the regular member is unable to attend a meeting of the Council or any committee of the Council. The designation by a member of the Council of an alternate under the preceding sentence shall be made for the duration of the member's term on the Council. Any such designated alternate shall be selected from individuals who exercise significant decisionmaking authority in the Federal agency involved and shall be authorized to make decisions on behalf of the member for whom he or she is serving.

"(c)(1) Whenever the Council, or a committee of the Council, considers matters that affect the interests of Federal agencies that are not represented on the Council or the committee, the chairman may invite the heads of such agencies, or their alternates, to participate in the deliberations of the Council or committee.

"(2) The Council shall conduct its first meeting not later than ninety days after the date of enactment of this section. Thereafter the Council shall meet not less than four times each year.

"(3) All meetings of the Council, including any committee of the Council, shall be open to the public.

"(d)(1) The Council shall coordinate policies, programs, and issues relating to tourism, recreation, or national heritage resources involving Federal departments, agencies, or other entities. Among other things, the Council shall—

"(A) coordinate the policies and programs of member agencies that have a significant effect on tourism, recreation, and national heritage preservation;

"(B) develop areas of cooperative program activity;

"(C) assist in resolving interagency program and policy conflicts; and

"(D) seek and receive concerns and views of State and local governments and the private sector with respect to Federal programs and policies deemed to conflict with the orderly growth and development of tourism.

"(2) To enable the Council to carry out its functions—

"(A) the Council may request directly from any Federal department or agency such personnel, information, services, or facilities, on a compensated or uncompensated basis, as he determines necessary to carry out the functions of the Council;

"(B) each Federal department or agency shall furnish the Council with such information, services, and facilities as it may request to the extent permitted by law and within the limits of available funds; and

"(C) Federal agencies and departments may, in their discretion, detail to temporary duty with the Council, such personnel as the Council may request for carrying out the functions of the Council, each such detail to be without loss of seniority, pay, or other employee status; and

"(3) The Administrator of the General Services Administration shall provide administrative services for the Council on a reimbursable basis.

"(e) The Council shall establish such policy committees as it considers necessary and appropriate, each of which shall be comprised of any or all of the members of the Council and representatives from Federal departments, agencies, and instrumentalities not represented on the Council. Each such policy committee shall be designed—

"(1) to monitor a specific area of Federal Government activity, such as transportation, energy and natural resources, economic development, or other such activities related to tourism; and

"(2) to review and evaluate the relation of the policies and activities of the Federal Government in that specific area to tourism, recreation, and national heritage conservation in the United States.

"(f) The Council shall submit an annual report for the preceding fiscal year to the President for transmittal to Congress on or before the thirty-first day of December of each year. The report shall include—

"(1) a comprehensive and detailed report of the activities and accomplishments of the Council and its policy committees;

"(2) the results of Council efforts to coordinate the policies and programs of member agencies that have a significant effect on tourism, recreation, and national heritage preservation, resolve interagency conflicts, and develop areas of cooperative program activity.

"(3) an analysis of problems referred to the Council by State and local governments, the tourism industry, the Secretary of Commerce, or any of the Council's policy committees along with a detailed statement of any actions taken or anticipated to be taken to resolve such problems; and

"(4) such recommendations as the Council deems appropriate.".

"SEC. 303. (a) There is established the Travel and Tourism Advisory Board (hereinafter in this section referred to as the 'Board') to be composed of fifteen members appointed by the Secretary. The members of the Board shall be appointed as follows:

"(1) Not more than eight members of the Board shall be appointed from the same political party.

"(2) The members of the Board shall be appointed from among citizens of the United States who are not regular full-time employees of the United States and shall be selected for appointment so as to provide as nearly as practicable a broad representation of different geographical regions within the United States and of the diverse and varied segments of the tourism industry.

"(3) Twelve of the members shall be appointed from senior executive officers of organizations engaged in the travel and tourism industry. Of such members—

"(A) at least one shall be a senior representative from a labor organization representing employees of the tourism industry; and

"(B) at least one shall be a representative of the States who is knowledgeable of tourism promotion.

"(4) Of the remaining three members of the Board—

"(A) one member shall be a consumer advocate or ombudsman from the organized public interest community;

"(B) one member shall be an economist, statistician, or accountant; and

"(C) one member shall be an individual from the academic community who is knowledgeable in tourism, recreation, or national heritage conservation.

The Secretary shall serve as an ex officio member of the Board. The duration of the Board shall not be subject to the Federal Advisory Committee Act. A list of the members appointed to the Board shall be forwarded by the Secretary to the Senate Committee on Commerce, Science, and Transportation and the House Committee on Energy and Commerce.

"(b) The members of the Board shall be appointed for a term of office of three years, except that of the members first appointed—

"(1) four members shall be appointed for terms of one year, and

"(2) four members shall be appointed for terms of two years,

as designated by the Secretary at the time of appointment. Any member appointed to fill a vacancy occurring before the expiration of the term for which the member's predecessor was appointed shall be appointed only for the remainder of such term. A member may serve after the expiration of his term until his successor has taken. Vacancies on the Board shall be filled in the same manner in which the original appointments were made. No member of the Board shall be eligible to serve in excess of two consecutive terms of three years each.

"(c) The Chairman and Vice Chairman and other appropriate officers of the Board shall be elected by and from members of the Board other than the Secretary.

"(d) The members of the Board shall receive no compensation for their services as such, but shall be allowed such necessary travel expenses and per diem as are authorized by section 5703 of title 5, United States Code. The Secretary shall pay the reasonable and necessary expenses incurred by the Board in connection with the coordination of Board activities, announcement and reporting of meetings, and preparation of such reports as are required by subsection (f).

"(e) The Board shall meet at least quarterly and shall hold such other meetings at the call of the Chairman, the Administrator, or a majority of its members.

"(f) The Board shall advise the Secretary with respect to the implementation of this Act and shall advise the Assistant Secretary for Tourism Marketing with respect to the preparation of the marketing plan under section 202(a)(14). The Board shall prepare an annual report concerning its activities and include therein such recommendations as it deems appropriate with respect to the performance of the Secretary under this Act and the operation and effectiveness of programs under this Act. Each annual report shall cover a fiscal year and shall be submitted on or before the thirty-first day of December following the close of the fiscal year.".

AUTHORIZATIONS

SEC. 5. (a) Section 6 of the Act (22 U.S.C. 2126) is redesignated as section 304 and is amended by striking out the first sentence and inserting in lieu thereof the following: "For the purpose of carrying out this Act (other than section 202(a)(4)(B)), there is authorized to be appropriated an amount not to exceed $6,500,000 for the fiscal year ending September 30, 1982. The Secretary shall carry out section 202(a)(4)(B) with funds appropriated for the International Trade Administration.".

(b) Section 7 of the Act (22 U.S.C. 2127) is redesignated as section 305 and sections 8 and 9 of the Act (22 U.S.C. 2127, 2128) are repealed.

EFFECTIVE DATE

SEC. 6. The amendments made by this Act shall take effect October 1, 1981.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from New Jersey (Mr. FLORIO) will be recognized for 20 minutes, and the gentleman from New York (Mr. LENT) will be recognized for 20 minutes.

The Chair recognizes the gentleman from New Jersey (Mr. FLORIO).

Mr. FLORIO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 1311, the Tourism Promotion Act, is the result of over 6 years of deliberation by the Congress and reflects the belief that an aggressive, imaginative effort to promote tourism and travel to the United States from abroad, will provide this country with tremendous social and economic benefits.

Tourism is one of the three largest employers in at least 38 States and total employment in this industry is close to 7 million people, almost 7 percent of the total work force. The bill before the Congress today recognizes tourism's important role in the U.S. economy.

Title I of the bill establishes both a national tourism policy and sets the

stage for a tourism program that will maximize its economic contribution and insure its continued growth.

In title II, the present U.S. Travel Service is replaced with a U.S. Travel and Tourism Administration within the Department of Commerce. The USTTA would be given elevated status and expanded responsibility with the Department of Commerce to carry out a program that will promote foreign tourism to the United States.

The USTTA would be headed by a new Under Secretary for Tourism, who in turn will appoint an Assistant Secretary for Marketing to be in charge of developing and submitting to the Congress annually a comprehensive tourism marketing plan.

In title III, the bill establishes an Interagency Coordinating Council, headed by the Secretary of Commerce, that will coordinate policies, issues, and programs in Federal departments and agencies that affect tourism. The Coordinating Council will use existing departmental resources and personnel and would not require additional funds.

The bill will also establish a Tourism Advisory Council comprised of representatives from the tourism industry and others who are knowledgeable about tourism and travel matters. The advisory council will provide the USTTA with a rich source of creative talents and ideas in the development of the tourism program and in the implementation of the national tourism policy.

Finally, the bill authorizes $6.5 million to carry out the national tourism policy—a funding level that is consistent with the administration's budget request for tourism programs.

The Tourism Promotion Act has achieved broad bipartisan support, and it reflects the consensus that there is a need for a stronger tourism program in this country. I am pleased to note that the administration has now recognized the need for such a program and we welcome its support. I hope you will join with me today in putting the United States firmly behind an effort to encourage the continued vitality of tourism and travel by voting in favor of H.R. 1311.

Mr. Speaker, I would like to incorporate into the RECORD an expanded list of individuals and Members of Congress who have requested that they be authorized to cosponsor this piece of legislation and I am pleased to welcome them as cosponsors. Their names follow:

COSPONSORS

Mr. Dan Marriott (Utah).
Mr. James Oberstar (Minnesota).
Mr. Earl Hutto (Florida).
Mr. John L. Napier (South Carolina).
Mr. Ken Kramer (Colorado).
Mr. Glenn Anderson (California).
Mr. Don Albosta (Michigan).
Mr. Steve Gunderson (Wisconsin).
Mr. Edward Markey (Massachusetts).
Mrs. Cardiss Collins (Illinois).
Mr. John Murtha (Pennsylvania).
Mr. Sam Gejdenson (Connecticut).
Mr. David Emery (Maine).
Mr. Tom Lantos (California).
Mr. E. Clay Shaw (Florida).

Mr. LENT. Mr. Speaker, I yield myself such time as I may consume.

□ 1310

Mr. Speaker, I want to commend the chairman of the subcommittee, the gentleman from New Jersey (Mr. FLORIO), also my colleague from New York (Mr. LEE), for their help; and commend the other members of the subcommittee for the work that they did on this particular bill.

Because of my strong support for a comprehensive tourism policy, Mr. Speaker, today I rise in support of H.R. 1311, the Tourism Promotion Act of 1981. This bill articulates a national tourism policy to promote tourism which is one of the top three industries in most of the 50 States and which accounts for over $140 billion annually in consumer expenditures.

As most of the Members of the House are aware, tourism has been the focus of a number of legislative initiatives in recent years which culminated last year in the passage of a measure which would have established an independent Federal tourism agency. President Carter, however, then pocket vetoed that measure.

This year, early strong indications from the new administration were that any legislation which expanded the Federal bureaucracy in a time of governmental frugality would be strongly opposed and probably vetoed by President Reagan. Therefore, a bipartisan coalition of the members of the Commerce, Transportation, and Tourism Subcommittee of the Energy and Commerce Committee began seeking an alternative to the independent agency bill. The result, known as the Lent substitute, was introduced by me in full committee markup on May 12 of this year and was passed, without amendment. That is the bill we have before us today.

. I am extremely pleased to be able to report that the administration, in a July 24 letter from OMB Director Stockman to Congressman JIM SANTINI, has endorsed H.R. 1311. I would like to quote briefly from that letter now:

> The administration originally preferred a different approach in this area, but we have always agreed on the importance of travel and tourism in the Nation's economy.
>
> Given developments in the legislative process—including the passage in the Senate of S. 304, which would establish an unnecessary and counterproductive independent U.S. Travel Agency—we find H.R. 1311 a reasonable middle-of-the-road position, and support its enactment.

To its credit, the tourism industry has recognized the new political climate and has acted responsibly in endorsing H.R. 1311 as reported by the Energy and Commerce Committee. The Tourism Caucus Industry Advisory Board also lent its unanimous support to H.R. 1311. Further, H.R. 1311 has strong bipartisan support—a "dear colleague" letter signed by Congressman JIM FLORIO and me, outlining the merits of H.R. 1311, was delivered to your offices in the last few days. Hopefully, you have had time to review that letter. However, in the event you did not, I would like to now briefly mention some of the strengths of H.R. 1311.

First, H.R. 1311 keeps tourism promotion and development programs in the Department of Commerce, but replaces the U.S. Travel Service with the U.S. Travel and Tourism Administration (USTTA). The USTTA will be headed by an Under Secretary for Travel and Tourism, who will be responsible for submitting a comprehensive tourism marketing plan and for implementing the national tourism policy. Second, H.R. 1311 establishes an Interagency Coordinating Council, headed by the Secretary of Commerce, that coordinates policies, issues, and programs in Federal departments and agencies that relate to tourism. Third, H.R. 1311 establishes a tourism advisory council comprised of representatives from the tourism and travel industry, who are to advise the administration on the formulation of the marketing plan and on the implementation of the national tourism policy. Finally, H.R. 1311 comports with the administration's budget requests for tourism. It authorizes $6.5 million for fiscal year 1982 to carry out the act. The $6.5 million is in addition to the $1.1 million already programed for tourism through the Foreign Commercial Service budget.

In sum, I believe H.R. 1311 provides a blueprint for a strong and comprehensive national tourism promotion policy. It reflects the bipartisan support of this Congress and has the backing of the administration. I urge your support for it today.

Mr. McCLORY. Mr. Speaker, will the gentleman yield?

Mr. LENT. I yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Speaker, as one of the cosponsors of this legislation, I ask my colleagues to reflect on the enormous economic importance of establishing a national policy on tourism. Over the years, there have been a number of studies, promotions, and a deluge of legislative attempts to bring the travel industry into national focus. We may remember the Eisenhower promotion of "Visit USA Year," Lyndon Johnson's efforts to promote national travel with "See the United States," and John Kennedy's encouragement of domestic travel and support of a "See America Now" program.

Other good and well-meaning efforts have been launched since then to bring together the components of the third largest industry in the United States.

Now comes the opportunity to pass legislation that will provide for an orderly growth and advancement of tourism, a growth that will have widespread effects on employment, small businesses, and will be of economic significance to our international balance of payments. It is projected that travel will be the world's largest industry by the year 2000. I would like to think that we would be prepared for this eventuality.

Think about the sheer numbers that the various segments and entities of the industry employ. Small businesses in this country employ more workers than the large corporations. The travel industry has a majority of small businesses such as restaurant owners, operators of small hotels and inns, taxicab owners, travel agents, and so forth. It is estimated that, together, they number more than 1 million. They are the source of livelihood for a very large portion of the population of the United States. The opportunity for individuals to own their own firms and to provide specialized services is probably greater than in any other industry and, no doubt, much of its strength.

Establishments, such as restaurants, provide jobs for an impressive number of our citizens, and when restaurants are lumped together with the lodging segment, they comprise employment for over 5 million people. Many of those who service this industry are economically disadvantaged. More women, blacks, and teenagers are employed by this industry than any other. It is an opportunity for the economically deprived to work and pick up skills to help them advance into a better way of life. The travel industry has proven itself to be a dependable source of abundant job opportunities, and has shown counter-recessionary patterns by continuing to create jobs while other unemployment figures rise.

Not to be overlooked, are the expenditures made by foreign visitors to our country. While foreign travel to the United States has increased, it is not a time to be contented. It is important to realize that in order to keep our share of international travel receipts, we have an important national role in promoting inbound travel. Our neglect in promoting this concept could choke this flow of foreign visitors with dollars to spend.

Mr. Speaker, I have only highlighted the effects of this industry on the present and future development of our Nation. There are far-reaching benefits that all portions of this great industry can and will provide. We cannot, at this time, fail to support a cohesive and consistent policy to national tourism which will affect us all.

Mr. ROEMER. Mr. Speaker, will the gentleman yield?

Mr. LENT. I yield to the gentleman from Louisiana.

Mr. ROEMER. Mr. Speaker, I thank the gentleman for yielding. I am not an expert in this area by any means. I frankly do not understand what we gain from having this at a Federal agency level. Perhaps the gentleman could approach it from a different angle for me. What do we lose by not having it? What will this apparatus do to get people to come to America that is worth this kind of investment?

Mr. LENT. The main consideration here is that we upgrade and improve the Federal Government's travel and tourism mechanism within the Commerce Department, creating an Under Secretary of Commerce for Travel and Tourism rather than creating a new agency and thus increasing the bureaucracy. This new Under Secretary of Commerce will be assigned exclusively to the development and implementation of a national tourism plan to increase the number of foreign travelers to the United States. The gentleman has to understand where we are coming from. For the last several years in this Congress, either the Senate or the House, and last year both Houses, have passed legislation creating separate tourism agencies. We decided not to follow that route again this year because of the political constraints against increasing the Federal bureaucracy. So we have compromised. We have come a long way, and we have created this Under Secretary. The bill contains other provisions designed to encourage tourism and travel. I think the gentleman will find that we will gain a great deal economically from this legislation.

I would be glad to yield to the gentleman from Nevada.

Mr. SANTINI. Mr. Speaker, I thank the gentleman for yielding. The question of the gentleman from Louisiana is very well taken. The United States of America presently is No. 17 in expenditures of moneys to induce foreign travel to the United States of America; that market presently is over $100 billion.

We have testimony, and I think it is generally conceded that for every $1 tax invested—that was 2 years ago—we get $18.40 back in terms of foreign travel to the United States of America. For far too long, unfortunately, tourism and travel have been one of the disregarded entities in both the legislative branch and executive branch of Government. Given the fact that it is one of the 3 principal industries in 39 States in this Nation, it seems to me that a Nation that commits itself to realizing the importance of selling its commercial products overseas, selling its agriculture overseas, should recognize that there is a $10 billion tourism and travel market there that needs a foreign representative from the United States of America; not from Holiday Inns or from Pan American, but from the United States of America.

We must appreciate that if we sell widgets, if we sell corn, we can sell tourism because the United States of America is the best tourism and travel buy on the globe today.

Mr. ROEMER. If the gentleman will yield further, so these representatives would walk foreign capitals or in foreign nations saying what a great place America is to visit? To follow the gentleman's argument, if we get back $8 for every $1 invested, maybe the way to balance the budget would be to invest about $6 billion.

Mr. SANTINI. I accept the gentleman's amendment.

Mr. LENT. Mr. Speaker, I reserve the balance of my time.

Mr. FLORIO. Mr. Speaker, I yield 4 minutes to the gentleman from Nevada (Mr. SANTINI).

Mr. SANTINI. Mr. Speaker, the National Tourism Policy Act of 1981 is crucial to the continued strength and vitality of the travel and tourism community. It has been long needed, long studied, and long awaited.

This legislation begins the process of developing an effective plan to market the United States as a tourism destination. It will enhance greatly our ability to attract foreign visitors to our shores to stimulate our economy with foreign spending and reduce our balance of payments deficit.

The economic potential of tourism is virtually unlimited—if we are willing to make a reasonable commitment to market this country. I believe the commitment should be made and should be made now. The administration is willing to make that commitment and supports H.R. 1311. I quote from a letter I received Friday from David Stockman, Director of the Office of Management and Budget:

> I am writing to express the administration's support for H.R. 1311, the National Tourism Policy Act.
>
> The administration originally preferred a different approach in this area, but we have always agreed on the importance of travel and tourism in the Nation's economy.
>
> Given developments in the legislative process—including the passage in the Senate of S. 304, which would establish an unnecessary and counterproductive independent U.S. Travel Agency—we find H.R. 1311 a reasonable middle-of-the-road position, and support its enactment.

This is heartening news indeed since the Federal effort in tourism over the last several years has substantially decreased. Most other countries, on the other hand, have either continued or accelerated their effort in promoting tourism to their countries. This has placed our country at a tremendous

competitive disadvantage. At a recent travel industry meeting a British tour operator commented that "The United States is a superb holiday!" He went on however, to bemoan the fact that "Nobody's selling the dream of a U.S. vacation." This British gentleman was joined by German and Japanese spokesmen in calling the U.S. Government's efforts inadequate, "shortsighted" marketing.

As in any business that can make a positive contribution to the Nation, the international marketplace for tourism is viciously competitive. It is a growing industry and the U.S. share should also be growing but it is not. Since 1972 the U.S. share of the international travel marketplace has markedly declined. It is time to turn that trend around.

Perhaps it is easier for some of us to understand the real need for the United States to promote travel to the United States when viewed from the angle of an "export commodities" or "foreign exchange earnings." When we get a foreign traveler to come to the United States and spend their money here, it is the same as selling U.S. manufactured goods abroad. Now is the time to more effectively and aggressively generally promote our country abroad and attract foreign visitors here to add to our foreign exchange earnings. Our country is truly our most prized commodity and we should more agressively and proudly promote the many natural and manmade attributes we have to offer. Besides the important economic benefits we have to gain there are significant side benefits. An improved image and good will can be garnered by exposing our Nation and our Nation's people to the people of the world. This is an important but often neglected and ignored aspect.

At a time when our country is yearning for more meaningful government through efficiency and economy—this legislation offers an opportunity to make sense out of the over 100 different programs and 50 different Government departments and agencies that impact tourism. The Federal Government's mish-mash or crazy quilt approach to travel and tourism will be pulled together and coordinated to make our efforts meaningful and productive. The cabinet level coordinating council established in H.R. 1311 will greatly assist us in accomplishing our objectives.

The legislation will also provide the Federal Government with the opportunity to tap the wealth of knowledge and expertise of the industry by establishing an Industry Advisory Board. This board will serve without compensation but should greatly contribute to the knowledge and information as to how the Federal efforts have gone astray and how they might be improved for the general economic well-being of the Nation and its residents.

The U.S. travel and tourism industry is the second largest private employer in this country—a labor intensive industry that generated over $163 billion in 1980. The time has come to exploit this potential—to increase the revenues—to provide more jobs for women, youth, and minorities in the many entry level opportunities the industry offers.

The time has come to enact a comprehensive national tourism policy—to recognize the important role travel and tourism plays in our economy—to accept the Federal role as the catalyst for coordinating a national tourism promotion effort. H.R. 1311 is the realistic vehicle for attaining the benefits to our society that travel and tourism offer. I urge you to support this legislation.

● Mr. CHAPPELL. Mr. Speaker, I rise today in support of H.R. 1311, the National Tourism Policy Act because I believe that this is the type of action needed to promote foreign travel within the United States. This particular effort will greatly enhance our capability to attract visitors to our shores who will spend money, stimulate the economy, and reduce our balance-of-trade deficit, all of which are critically important to a vibrant domestic economy.

It is estimated that international visitors spent $10 billion in 1980 in the United States. In fact, tourism is now this Nation's third largest export industry. This legislation will authorize $6.5 million in fiscal year 1982 for the operations of the U.S. Travel and Tourism Administration (USTTA). Indeed, this is a modest sum when one considers the return on investment due to the increase in international tourism it will promote. More specifically, the tax revenues accruing to the States and cities as a result of money spent by foreign visitors are impressive. The U.S. Travel Data Center has calculated that 11 cents of every dollar that a tourist spends comes back into the public treasuries in the form of taxes, either Federal, State, or local. It is for these reasons the United States has become dependent on the international tourism dollar to help offset our balance-of-payments deficit.

In addition, such expenditures provide jobs for close to 7 million Americans, a significant proportion of which are women, youth, and minorities. Realizing that travel and tourism is the largest single employer in 14 of our 50 States, my State of Florida included, and the second and third largest private employer in at least 38 States, one can truly appreciate the significance of the industry to our economic well-being.

Mr. Speaker, I hope today that the House will overwhelmingly pass this legislation, because it is only through a new tourism policy that we can create the appropriate atmosphere which will lead to continued growth in the tourism market. This, in turn, will reduce further our balance-of-payments deficit and generate new jobs in the private sector.●

□ 1320

Mr. LENT. Mr. Speaker, I yield 3 minutes to the gentleman from New York (Mr. LEE).

Mr. LEE. Mr. Speaker, I rise in support of the Tourism Policy Act now before us for consideration, and I take this opportunity to congratulate the gentleman from New Jersey (Mr. FLORIO) the gentleman from New York (Mr. LENT), the gentleman from California (Mr. BADHAM), and the gentleman from Nevada (Mr. SANTINI) for the leadership they have demonstrated in bringing this bill to the House for a vote today.

I am a sponsor of H.R. 1311, and feel the issue of tourism promotion and the importance of tourism to our Nation's economy is much too critical to further delay the Federal Government's participation in the marketing process.

I believe tourism promotion deserves a more prominent role within our Government because of the enormous economic dividends that can be achieved—in jobs, in sales revenues, and in reducing our balance-of-payments deficit.

The measure under review by this Congress represents a very wise and prudent investment of our citizens' tax dollars. I am very pleased to report this measure has the full support of the President, and that the Reagan administration recognizes the value of tourism to our Nation's economy. I am confident the structure put in place today will go a long way to implement a cooperative and coordinated effort between the public and private sectors.

Unquestionably, the tourism industry is a significant contributor to our national economy. The tourism industry is an industry that—

Is forecasted to be the world's largest industry in the year 2000;

Is the largest private employer in 14 States;

Is the third and possibly the second largest retail industry in the United States;

Is the fourth largest export industry in the United States; and

Generates over $33 billion in wages and salaries, $15½ billion in Federal, State, and local tax revenues, and $140 billion in domestic spending.

Tourism's $10 billion in receipts from foreign visitors provides jobs for some 6½ million Americans, a significant portion of which are women, youths, and minorities.

Current indicators show that the number of last year's "inbound" tour-

ists exceeded "outbound" tourists for the first time since the end of World War II. In effect, America welcomed approximately 20 million foreign visitors who spent in excess of $10 billion, a revenue figure which makes tourism our Nation's fourth largest export industry.

A 1980 U.S. Department of Commerce study documents the importance of tourism to the U.S. economy. According to that study—and I quote, "The benefits of International Tourism to the Nation's economy go far beyond the expenditures registered in the data in U.S. international transactions." The multiplier effect of tourism is generally considered to be in the 3 to 3.5 range. Therefore, we see that inbound travel and tourism produced a ripple impact of some $30 to $35 billion in 1979. Yet the Federal Government has not been prepared to capitalize on this resource; 125 other countries aggressively promote foreign travel and visitation but the United States has not kept pace.

International tourism is one of the world's major growth industries, yet the growth in the number of foreign travelers to the United States has been slower that the world's international tourism growth. Presently, the United States receives only 6.7 to 8 percent of the world's tourists. Because of its important impact on employment and revenues in the transportation, lodging, food, and recreation industries we must do more to promote our Nation to the foreign tourist market. In 1979 alone, over 1.3 billion people left their home countries to visit or travel. Tourists around the world, be they domestic or international, spent as estimated one-half trillion dollars.

The evidence is in and the verdict is clear. Our balance of payments, our unemployment rate, and the growth and potential of the international, as well as domestic, marketplace and our general economic health suggest—no, demand—that the United States become more involved in promoting the United States as a travel destination for foreign visitors.

We cannot continue to stand by and watch the 125 other countries who have national tourist offices, often at a departmental level, outmarket us in the international marketplace. This is especially the case when you take into consideration the United States has more to offer in the form of attractions and facilities than any other country in the world.

In large part because of the reduced role and effectiveness of the U.S. Travel Service, there is serious question over the future of the beleaguered agency. Presently, the USTS is scheduled to go out of business in September of this year, and its activities will be folded into another division of the Department of Commerce. The antagonism toward USTS is long standing and bipartisan. Successive administrations have slashed its budget mercilessly, reduced its effectiveness, and damaged the morale of the personnel who are charged with the important responsibility of promoting this country as a travel destination.

I believe there definitely is potential for the international and domestic tourism market to grow and further develop and that the National Tourism Policy Act can construct a meaningful framework for tourism growth.

The significant aspects of the Policy Act are:

Recognizes the importance of travel and tourism to the Nation's social and economic well-being and encourages facilitation of travel to and within the United States;

Replaces the U.S. Travel Service with a U.S. Travel and Tourism Administration headed by an Under Secretary with an Assistant Secretary for Marketing;

Creates an interagency policy council, chaired by the Secretary of Commerce, to coordinate the over 100 Federal policies impacting tourism which are strewn among at least 50 Federal agencies;

Creates an advisory group of industry, labor, and consumer interests to lend expertise to the administration; and

Authorizes the Under Secretary to coordinate overseas promotion activities closely with others in the Commerce Department, particularly the International Trade Administration.

The Policy Act will highlight within our Federal Government the importance of tourism promotion and marketing, and construct the mechanism where the impact of Government rules, regulations, and policy affecting the tourism industry can be adequately assessed and evaluated prior to their enactment.

I urge my colleagues to join in support of the National Tourism Policy Act—a measure that will reap significant economic dividends, increase jobs, and reduce our balance-of-payments deficit.

Mr. FLORIO. Mr. Speaker, I yield 1 minute to the gentleman from New York (Mr. SCHEUER), a member of the subcommittee.

Mr. SCHEUER. Mr. Chairman, I want to congratulate the chairman of the subcommittee, the gentleman from New Jersey (Mr. FLORIO), for the fine leadership job he has done in putting this bill together. I also want to congratulate the gentleman from Nevada (Mr. SANTINI) for his many years of effort organizing and leading the travel caucus.

As a member of the subcommittee, while traveling in Europe on other official matters, I have had opportunity to visit the U.S. Travel Service offices in London, Paris, and Frankfurt. We have some excellent, highly professional, and devoted people over there, but we are starving their offices for funds. All of their offices are on second-floor locations. All of the major developed countries of the world have beautiful ground-floor offices where members of the public can drop in and look over brochures, and so forth. Even developing countries in Asia, Africa, and Latin America have far better equipped offices than we do, and they have far more adequate promotional material than our offices do.

We are starving the efforts to build an American tourism industry, and this bill will be an excellent measure to begin to do right by our tourism industry in encouraging foreign travel to the United States.

Mr. FLORIO. Mr. Speaker, I yield 2 minutes to the gentleman from Massachusetts (Mr. MARKEY), a member of the subcommittee.

Mr. MARKEY. Mr. Speaker, I, as well, congratulate the gentleman from New Jersey (Mr. FLORIO) on the fine job he has done with this legislation, and I congratulate also the gentleman from Nevada (Mr. SANTINI) and the gentlemen on the other side who put together and drafted this fine piece of legislation.

Mr. Speaker, I rise in strong support of the National Tourism Policy Act. I also am glad to have this opportunity to commend the chairman for his efforts on this legislation and for an excellent bill.

I am proud to represent a State, Massachusetts, which has the second lowest unemployment rate in this country. The travel and tourism industry very much contributes to this by being the third largest private employer in the State.

Last year alone, the travel industry employed over 100,000 people in my home State. Also, in 1980, Massachusetts produced over $3 billion in revenues from the travel and tourism business. Nationwide, over $16 billion in taxes were created from this growing industry.

While travel and tourism continues to be one of the largest and fastest growing businesses in the Commonwealth of Massachusetts, the picture is not necessarily as rosy for the rest of the country. The growth and economic potential of this industry has not kept pace with other nations. And the growth in the number of foreign travelers to the United States has not matched the pace of the world's tourism growth. Although foreign travelers across the globe increased their expenditures last year by 20 percent—by $12 billion—the U.S. international travel dollar account had a deficit of almost $1.7 billion.

A well-articulated and well-coordinated national tourism policy could change this. It would: Provide jobs;

stimulate the economy; and improve our balance of payments.

Again, Mr. Speaker, I strongly support this fine piece of legislation, and commend the chairman, Mr. FLORIO, for his efforts. I share in his commitment to see this bill passed. I urge my colleagues' support.

Thank you.

Mr. NELSON. Mr. Speaker, will the gentleman yield?

Mr. MARKEY. I yield to the gentleman from Florida.

Mr. NELSON. Mr. Speaker, I rise in support of H.R. 1311—the National Tourism Policy Act of 1981.

In the last Congress, the National Tourism Policy Act passed the House overwhelmingly. The Senate is a step ahead of us this year—they have already passed the companion of this bill early this year.

H.R. 1311 is an excellent example of a bill proceeding in an orderly fashion through the legislative process. It has been refined, improved, and will accommodate the many divergent positions on the issue of a national tourism policy. The administration has already notified the Tourism Caucus of its endorsement of H.R. 1311.

In my own State of Florida, the travel and tourism industry ranks as the No. 1 industry in the State. It employs more than half a million persons in Florida and contributes about 20 percent of the personal income of the State. During the last year, Florida realized about 10 percent of its annual operating budget from revenues generated from tourist spending. During 1980, 35.9 million people visited Florida and spent about $17 billion during the year. This breaks down to about $47 million in tourist spending a day.

It is important to note that tourism is not only important to my State, but is a vital industry throughout the Nation. It is the third largest retail industry in the United States and employs over 7 million Americans. It contributes more than $160 billion toward our national economy. Additionally, this industry is in the top 3 in about 40 of our States. We can no longer afford to ignore the importance of this industry to our economy.

I believe that the passage of this National Tourism Policy Act today will—for the first time in our history—give this industry the recognition that it deserves. It will insure that the effects on this industry are taken into account as national policies are formulated. Small changes of policy in areas such as transportation and energy can result in substantial effects on the tourism industry and the Federal Government must be made aware of these effects in its decisionmaking.

The bill that we are considering today calls for an upgraded tourism organization within the U.S. Department of Commerce—to be called the U.S. Travel and Tourism Administration. The objective of this new Administration will be to encourage the foreign traveler to consider the United States as a vacation spot. The flow of dollars from these visitors will help us in our balance of payments, reduction of unemployment, and stimulation of our economy.

The funding for this new administration is identical to that requested for the U.S. Travel Service—which the new, upgraded U.S. Travel and Tourism Administration replaces. By designating a new Assistant Secretary for Tourism, this industry will attain more visibility in the policymaking decisions of the Government.

To implement the national tourism policy, the new U.S. Travel and Tourism Administration is responsible for developing a detailed marketing plan to stimulate and to encourage travel to the United States. This plan is to be submitted annually to the Congress. In addition, nine more tourism promotion offices are to be established in foreign countries in addition to those already in place.

This bill will also create a Travel and Tourism Advisory Board to be appointed by the Secretary of Commerce. This Advisory board will be composed of 15 members—12 of whom are to be senior executive officers of organizations in the travel and tourism industry. This Board will review the activities of the administration and will report its recommendations annually to the Congress.

Today, we have the opportunity of a lifetime to initiate the process that will make the United States the hub of international travel.

We have the opportunity to properly recognize the important role that travel and tourism play in every congressional district. We have the opportunity to encourage the more than 50 Federal agencies that have an impact on travel and tourism to cooperate and to coordinate their efforts—reducing redtape and making our programs more effective and responsive.

I intend to vote for this important piece of legislation and I urge each of my colleagues to do the same.

Mr. LENT. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. BADHAM).

Mr. BADHAM. Mr. Speaker, I rise in support of H.R. 1311, the National Tourism Policy Act of 1981. As a Representative of the State of California where tourism is the second largest private employer, I know this legislation is constructive and essential. As vice chairman of the House Travel and Tourism Caucus, I have had the opportunity to be exposed to the tremendous value tourism has for our Nation as a whole as well.

Travel and tourism is the first, second, or third largest employer in 39 of the 50 States. The job opportunities are skewed toward women, minorities, and our young people. Currently, women comprise more than half of the travel industry work force; blacks constitute about 14 percent versus a 10-percent participation in the remainder of the work force. One-third of all employed youths, aged 16 to 21, have jobs in the travel and tourism industry. That is a rather impressive story. Even though the U.S. share of the international travel market has not been growing, the job opportunities continue to increase. Just think what this can mean if we make the investment of a strong commitment to increasing America's share—more jobs during a time when we have clearly recognized the need to stimulate national employment.

□ 1330

The administration supports this bill completely because it will put us on the way to exploiting the economic benefits of essential coordination among governmental agencies for travel and tourism to and within the United States of America.

We face aggressive national travel policies from the other nations in the free world and the not so free world and the Third World.

This House should now demonstrate its commitment to a strong economy and support this legislation, which will insist in advancing and realizing the tremendous benefits of travel and tourism to our Nation.

We have the strongest sales force in the world with America's salesmen. We should coordinate this with our Government to sell the United States of America at home and abroad.

Mr. FLORIO. Mr. Speaker, I yield 1 minute to the gentleman from the Virgin Islands (Mr. DE LUGO).

Mr. DE LUGO. Mr. Speaker, I am pleased to rise in support of H.R. 1311, the National Tourism Policy Act, which establishes a U.S. Travel and Tourism Administration within the Commerce Department to replace the current U.S. Travel Service. As a cosponsor of this legislation, I believe this bill is necessary to create a strong and creative tourism industry in this country.

We all know that the growth of foreign tourism in the United States has failed to keep pace with the growth of tourism throughout the world, therefore better coordination of tourism programs and increased promotion of travel to this country could resolve these problems—and that is the purpose of this bill.

For my native Virgin Islands, a thriving tourism industry is vital to our economy. For example, it is estimated that in 1980 a total of $350 million was spent by visitors to the islands of St. Croix, St. Thomas, and St. John. This revenue obviously contributes significantly in providing aid to

private enterprise and assistance to the local government so that it can provide essential services to the people of the territory.

A thriving tourism industry means jobs for those residing in the Virgin Islands. Approximately one-third of the people employed in the Virgin Islands work within the tourism industry. What we are talking about here is approximately 13,000 jobs—from hotel employees to hotel managers, from taxi drivers to the Virgin Islands director of tourism.

What the above statistics indicate is that tourism is a major industry in the U.S. Virgin Islands which deserves to be aggressively supported by the Federal Government. Passage of H.R. 1311 would certainly be a boon to our tourism industry, which in turn will provide a much-needed shot in the arm to our local economy.

Mr. LENT. Mr. Speaker, I yield 3 minutes to the gentleman from Texas (Mr. COLLINS).

Mr. COLLINS of Texas. Mr. Speaker, this subject has been up several times before. This is one of the most disappointing bills that Congress has before it for this year's consideration.

We have talked about cutting the budget and we talk about the need for cutting taxes and here we have before us the creation of a new agency which is not needed in any shape, manner, or form. We have one of the really great private industries in American in travel and tourism. There are 7 million people employed by tourism. It creates consumer spending that amounts to $140 billion—$140 billion that creates jobs. It creates that much in business.

What are we doing with this bill? We are putting the Federal Government into a great private industry.

Now, there is not any reason to inflict this burden on private industry. What they are doing, they are creating in this bill an under secretary of travel and tourism. Now, that is an awful high position for a bureaucrat, so he will get busy to develop many forms and reports to justify this position.

Also they are going to create an advisory commission. This group is going to meet four times a year to plan ways that Government can supervise tourism. This new department takes six existing agencies that do not accomplish a thing; we already have six foreign offices. We are going to add nine more offices to build staff.

Foreign visitors know what is going on in this country. What attracts them lately has been the fact that the dollar was selling at a discount. Well, now, the dollar was selling low so foreign money bought more in U.S. travel. The reason travel has gone off a little bit lately, is that the dollar is strong in exchange.

This new Federal travel bureaucracy in Washington will not accomplish anything. I keep thinking, what is it that they will do in their office? For instance, they will ask a report on all the travel agencies in America. They will say, "How many people from France went to Mantoloking, N.J., last summer?"

Or they will ask, "How many people from Spain had children between the ages of 10 and 14 that ate hot dogs when they visited Kansas City?"

You know the kind of questions the Government asks. Let me tell you, the other day a Federal agency spent over $100,000 printing up Playboy in braille. I guess when this travel agency finds out about that, they will start giving Playboy to every foreign tourist.

We do not need these Federal agencies running what is a truly outstanding private operation in tourism.

Let me just give you some examples of how big this tourism is. It is the third largest industry, third largest industry in 46 States in America—the third largest industry in 46 States in America. Tourism grew under private enterprises. They did it because the Government left them alone.

Now we are talking about creating this big Under Secretary of Tourism and Travel.

Who dreamed this project up? Where did it ever get started? Private industry will rue the day that we inflict this overloaded bureaucracy on them.

Mr. Speaker, this year we are again discussing legislation to establish a national tourism policy and to establish the U.S. Travel and Tourism Administration in the Department of Commerce. This year, with the need for fiscal austerity, why should we add another bureaucracy by expanding and renaming the present U.S. Travel Service?

Is H.R. 1311 necessary in authorizing $6.5 million for fiscal year 1982 for a U.S. Travel and Tourism Administration, establishing a Travel and Tourism Advisory Board, and a National Tourism Policy Council within the executive branch? When a 1979 report by the Department of Commerce stated that the U.S. international tourism business remained "vigorous," you have to wonder why the Federal Government wants to interfere with such a successful industry. With double-digit inflation, you have to applaud the success of the tourism industry, which saw growth in tourism and fare receipts for 1979 that outpaced inflation. In fact, in 1979, international tourism and fare receipts for international travel to the United States rose to new levels, exceeding $10 billion for the first time—an 18-percent increase. Also encouraging is the fact that the U.S. travel deficit in current dollars decreased 17 percent to $2.4 billion for 1979. This is the lowest travel deficit since 1970.

The travel industry is clearly capable of fulfilling its service, without the Federal Government. Yet, ever since 1961, a group of lobbyists has talked Congress into funding the U.S. Travel Service. Now we are talking about spending $6.5 million for fiscal year 1982, to enable the Federal Government to "be better coordinated to effectively respond to the national interests in tourism." This legislation would mandate Government intervention and regulation of our present successful tourism private business system. We should not push Government involvement with tourism promotion, under the guise that we will be saving money. In fact, last year, during House and Senate hearings on the National Tourism Policy Act, it was indicated in testimony that to be effective, an advertising and promotion program would cost the American taxpayer as much as $75 million. That is $75 million that could be better spent by private industry. It is hard to imagine that we are asking the taxpayers to subsidize travel promotion when we are asking them to cut back in every other area.

Tourism is the third largest industry in 46 States, growing to such proportions because of its reliance on the free enterprise system. Travel expenditures have rapidly grown over the years, from $50 billion in 1970 to $128 billion in 1978. That is a growth rate of 157 percent over 8 years. During this same period, tax receipts grew from $4.4 billion to $17.1 billion—a 289-percent increase. Likewise, employment in the tourism industry jumped from 3.5 million to 6.3 million. In 1978, 19.8 million foreigners came to the United States, which resulted in receipts of $8.4 billion. By 1979 this grew to 20 million visitors, with receipts of $10 billion. One year later, in 1980, the international tourists visiting the United States rose by 238,000 to 20.1 million. This equaled approximately 55,000 visitor arrivals per day.

We have 50 different departments in the Federal Government now in the travel business. There are no statistics to show that they have aided the travel industry in any way. Instead, the travel industry's strength is attributable to the strong support shown in the private sector. In 1978, American Express spent $62 million; Greyhound spent $46 million; Eastern Airlines spent $35 million. Statistics for 1979 showed $59 million spent in 1979 on advertising by 14 of the largest hotel chains in America, including Holiday Inn, Best Western, Hilton and Hilton International, Hyatt Regency, Marriott, Sheraton, and Western International—and this is only a very small segment of the travel and tourism industry's promotional expenditures. A Federal subsidy program for a thriving industry will duplicate private indus-

try's tourism efforts, waste millions of dollars, and destroy a thriving and prosperous industry.

With the U.S. Travel Service, we presently have six overseas travel offices: Canada, Mexico, Japan, West Germany, France, and the United Kingdom. This service currently spends $8 million to encourage foreigners to vacation in the United States. There is absolutely no need to justify continuation of the U.S. Travel Service, let alone set up a new governmental bureaucracy. We do not need a Federal program to subsidize major advertising and promotion programs, as the statistics have clearly shown the travel industry's effectiveness—without Federal intrusion.

We have been down this destructive road before—where the Federal Government enters areas which are better handled without a Federal bureaucracy. Take, for example, the Department of Energy, created in 1977 with a budget of $5.2 billion, with 18,000 employees. Only 3 years later, this Department had a budget of $13.4 billion, and in excess of 20,000 employees. In addition, look at the newly created Department of Education. The Department has a $17 billion budget at present. If we pass this legislation to spend $6.5 million on tourism in 1982, I can assure you that this will only be the beginning of another increasingly expensive bureaucracy.

A U.S. Travel and Tourism Administration will damage our tourism business in this country. It is going to spend funds on studies and paperwork, instead of encouraging the private sector to stay active and involved in the tourism industry. We have a great tourism industry, so let us keep Federal bureaucracy from taking it downhill.

Mr. FLORIO. Mr. Speaker, I yield 1 minute to the gentleman from Illinois (Mr. RUSSO).

Mr. RUSSO. Mr. Speaker, I would like to speak today on the importance of the National Tourism Policy Act. Often when people think of Tourism they think only of fun and relaxation. They do not realize that tourism is the third largest industry in the United States. The impact of the tourism industry is felt, not only in every area of the United States, but throughout the world. The total expenditure for travel in the United States for 1980 was $157 billion. For every $1 spent on travel, $18 is funneled into the economy. Travel industry receipts have grown at the rate of 12 percent per year compared to the 11 percent growth of the GNP.

Tourism is also one of the largest employers in the country. It is responsible for 35 percent of the new jobs created in 1980. It has outperformed the entire U.S. economy in creating job opportunities. It is important to note that this is counterrecessionary because it creates jobs both in times of recession and in times of prosperity. This is greatly beneficial in these days of high unemployment since most of the employees of the travel industry are largely minorities, women, teens, and the unskilled.

The travel industry also brings needed revenue to the Government. The Federal Government received $8.6 billion from the travel industry in 1980. And State's taxes generated $5.9 billion.

I recognize the importance of the tourism industry. The House of Representatives can recognize this importance through the passage of H.R. 1311, the National Tourism Policy Act. The result will be the coordination of the different aspects of the travel industry and the promotion of travel throughout the United States and the world. Thus, this important, viable industry will have the Government support that it needs to continue to help the economy and to flourish as an industry.

Mr. LE. .. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. GOLDWATER).

Mr. GOLDWATER. Mr. Speaker, I am frankly surprised that this legislation is before us and I am even more surprised that it is supported by the OMB.

Now, this bill does not have the saving grace of trying to bail out a failing industry such as Chrysler or Lockheed. What this bill is asking taxpayers to support is the promotional activities for tourism which, of course, covers everything from hotels to airlines. I believe the industry is well able to do this now—without the help of the Government.

"Visit Las Vegas," you see them all over Europe.

"Fly American Airlines. Stay at this American Hotel." Visit such-and-such State or city—we do not need the Federal Government to promote tourism.

My staff called OMB and asked them why in light of the President's election and mandate to reduce the size and influence of Government does OMB support this?

They said, "Well, among other things, it is only $6 million."

I thought to myself, well, pardon me, if you will, but I have got a lot of projects that I am interested in that were turned down this year due to a tight budget. Operation Firescope in the county of Los Angeles could use $6 million. If it were in place it would save millions of dollars, perhaps thousands of lives and property by better coordinating the management of our forest and forest fires.

Another effort to save the California condor, there are only 30 condors left. We were asking for $250,000 and were turned down due to a tight budget.

I could go on and on.

Mr. Speaker, the point is the National Tourism Act is nice, but it is a luxury that the Federal Government cannot afford at this time.

We are holding hearings over in Public Works and Transportation on international flag carriers. The State Department, the CAB, the Department of Transportation, all intervened on behalf of international transportation. They lost $150 million last year. The last thing the tourism industry needs is help from our Government who has big trouble delivering the mail.

What this industry needs is a stable economy and sufficient fuel supplies. Free market economics is a far better approach to encouraging and coordinating tourism in this country and abroad.

Mr. FLORIO. Mr. Speaker, I yield 2 minutes to the gentleman from Arkansas (Mr. ALEXANDER).

Mr. ALEXANDER. Mr. Speaker, I rise today in support of the National Tourism Policy Act. I commend my colleagues who serve on the Energy and Commerce Committee for their determination in arriving at a legislative vehicle which is solid and has been marked by a melding of views from the Congress and the administration.

Over the past few years the Congress has come to recognize the potential of travel and tourism and has grappled with the problem of how best to approach the Federal role. In H.R. 1311 we find a bill that has the strong backing of both legislators and administrators.

The U.S. Government will make a worthwhile investment as we pass this legislation. For every dollar we put in to marketing America we get more than $18 in return. That is the kind of return on investment we must capitalize upon. As our share of the tourism market grows we will see a positive contribution made to our international balance of payments. We will see additional growth in our national economy as more positions become available in this labor intensive industry. Already, close to 7 million Americans are employed in the tourism community.

The benefits for this country's social and economic welfare are vast. They are there to be realized, once this commitment is made.

For some time I have espoused the importance of a strong export orientation to strengthen the U.S. economy. Bringing foreign visitors to the United States brings foreign exchange earnings. We must broaden our export focus to recognize the service industries. Yet we cannot hope to succeed if we think all exports are alike—to be marketed the same way. Thus far our commitment to the tourism industry has been next to nothing. Now is the

time to carefully nurture tourism development.

It is time for the Federal Government to play a role in seeing that we continue to get the incredible return on investment and to see that the return grows.

Recent studies of thousands of counties in the United States indicate that almost all receive a positive economic impact from tourism activities. It is not something that affects only our well-known tourism meccas. And with a coordinated Federal effort to aid in its growth, tourism dollars will have a positive impact on every American taxpayer.

For this reason I urge you to support H.R. 1311.

Mr. LENT. Mr. Speaker, I yield 2 minute to the gentlewoman from Massachusetts (Mrs. HECKLER).

Mrs. HECKLER. Mr. Speaker, I rise in support of H.R. 1311, the National Tourism Policy Act. As the representative on the steering committee of the Congressional Travel and Tourism Caucus from New England, I strongly recommend this important bill to our colleagues.

Our floor consideration today of H.R. 1311 could not be more timely. We are now in the time of year when America is vacationing. Americans are touring our Nation's historic sites and beholding its scenic wonders. What better time than this to enact our Nation's first comprehensive, coherent, and coordinated tourism policy program.

I commend President Reagan and Commerce Secretary Baldrige for their support of this important legislation. Last year a similar bill which overwhelmingly passed both Houses of Congress was pocket vetoed by the President at that time. The commitment to this important industry by President Reagan and Secretary Baldrige is heartening and welcome, particularly in my State, where tourism is a major industry.

Yes, there are programs of tourism in the Federal Government. Yes, there are Government officials who administer these programs.

But, no, there is no comprehensive plan for a Federal approach to the Nation's third largest industry, which accounts for $160 billion in personal wages and salaries, and which generates $16 billion annually in tax revenue.

Yes, there is a vacuum in policy development and program implementation in the Federal Government with regard to travel and tourism.

Yes, we need to establish a separate, independent, and focused effort to promote tourism at home and attract foreign tourists from abroad—we have only a meager 7 percent of the world tourism market. Moreover, Mr. Speaker, we have a national tourism deficit. Americans spend $1.7 billion more in tourism abroad than foreign tourists spend in the United States.

H.R. 1311 establishes a Travel and Tourism Administration at the Department of Commerce. It establishes an Under Secretary for Travel and Tourism; and an Assistant Secretary for Tourism Marketing.

The legislation also establishes a council within the Federal Government to coordinate Federal efforts to comply with the new national tourism policy. And an advisory board is created comprised of travel and tourism officials to advise us of the industry's ongoing needs and priorities.

As the Nation's third largest industry, travel and tourism also is among the top three industries in at least 39 of the 50 States.

At a time when we are experiencing unemployment, the travel and tourism industry is a labor-intensive industry. It tends to hire those who need jobs—the young, women, minorities; 99 percent of the industry are small businesses, the backbone of our Nation's economy. For every 100 jobs created by tourism, 50 ancillary jobs are created.

Tourism is a growth industry. Since 1958, this industry has grown by 184 percent; more than twice the rate of payroll growth during the same period for our national economy.

In my State, tourism is a major industry from Plymouth Rock to the Berkshire Mountains. Travel and tourism in Massachusetts is a $3 billion industry, employing 115,000 directly and generating $145 million to the State in tax revenue.

Massachusetts is a tourism center, a four-season State, a State for all seasons. There is skiing in the winter; spring festivals; summer beaches; and beautiful fall foliage. All this provides a backdrop to our historical sites and heritage.

America is a nation of travelers. First on the *Mayflower;* then the covered wagon; the railroad; car; the airplane; and now the Space Shuttle. We are constantly on the move, seeking and making change.

Let us with this comprehensive legislation coherently promote travel at home and attract tourism from abroad. H.R. 1311 can be the legislative breakthrough that propels travel and tourism into our Nation's No. 1 industry in this century. We stand at the threshold. I urge my colleagues to vote to pass this pioneering bill.

Mr. FLORIO. Mr. Speaker, I yield 1 minute to the gentlewoman from Colorado (Mrs. SCHROEDER).

Mrs. SCHROEDER. Mr. Speaker, today we have the opportunity to vote on free enterprise. If you believe in more government, in government interferring with the private sector by subsidizing a thriving industry, vote for H.R. 1311, the National Tourism Policy Act. If, however, you believe, as I do, that competition and free enterprise, without government interference, will produce the most good for our people, oppose this boondoggle.

Supporters of this legislation say tourism is a huge industry in the United States, employing over 6 million people, accounting for $128 billion in expenditures, producing 20 million foreign visitors. They say this is a reason to support the bill. To my mind, it is the best reason to defeat this turkey. Our tourism industry is strong, aggressive, and not cheap when it comes to promoting its own cause. American Express spent $62 million in 1978 on advertising, 14 of the biggest hotel chains spent $59 million in 1979 advertising. Why should the Government spend $6.5 million, as the bill authorizes, to help them? To the travel industry, $6.5 million is a drop in the bucket. To the American taxpayer, $6.5 million is serious business and should not be wasted on unneeded new Government programs.

This year's version of the bill—this proposal has new incarnations about as often as the airlines change their fares—creates a new Under Secretary of Commerce for Travel and Tourism, instead of creating a new agency. This Under Secretary would be paid the same salary as is David Stockman and Paul Volcker, to supervise 75 employees and oversee a budget of $6.5 million. Such ridiculous position overgrading would be funny if it were not such a waste of money.

If you believe in free enterprise, if you want to cut the budget, if you care to stop the cancer-like growth of the Federal Government, vote against this silly bill.

Mr. FLORIO. Mr. Speaker, I yield 1 minute to the gentleman from Hawaii (Mr. AKAKA).

Mr. AKAKA. Mr. Speaker, I rise in strong support of H.R. 1311, the National Tourism Policy Act of 1981.

For years, tourism has been the third largest industry in the United States; in fact, in 39 out of the 50 States, tourism is one of the top three employers. In 1978 alone, over 6.5 million Americans depended on the travel and tourism industry for their jobs.

In spite of the importance of the tourism industry to the economic well-being of this country, our Government has never taken the industry very seriously. Deep concern for the continued vitality of one of our top industries lies at the very heart of this legislation. It makes very little economic sense for the Congress to continue to ignore this vital industry.

In the past, the Federal Government has not responded to the needs or encouraged the development of the tourism industry. All of us know that we are now approaching what looks like an era of economic hardship. Now, more than ever, we need to capitalize

on the resources of the healthy and profitable industries we do have. It is shameful to have to admit that we only spend approximately 4 cents per person in this country to promote our third largest industry. It is shameful to be forced to admit that we spend the least on the promotion of tourism of all major non-Socialist nations.

Passage of this bill means that the Congress of the United States recognizes the importance of tourism to our Nation's economic health. Passage of this bill also means that we, as a country, will do all that we can to insure the continued good health of this vital industry. Passage of this bill will insure that for the first time, there is a coordinated Federal effort to develop and implement effective tourism policies and activities.

Because this is legislation critical to the economic stability of the tourism industry, I urge my colleagues to lend the measure their full support.

Mr. FLORIO. Mr. Speaker, I yield 1 minute to the gentleman from Hawaii (Mr. HEFTEL).

Mr. HEFTEL. Mr. Speaker, I am pleased to rise in support of the National Tourism Policy Act. My colleagues on the Energy and Commerce Committee are to be commended for their diligent work in arriving at legislation which will provide for the development and implementation of a national tourism policy.

Tourism is a vital segment of our economy, providing a broad spectrum of American jobs. Although the tourism industry has prospered, I nevertheless am convinced that it has not realized its maximum potential. Our Nation has not had an aggressive or coordinated national tourism policy. By creating such a policy and by bringing together private industry and Government, I believe we can enhance our efforts to attract foreign capital and a greater share of the international travel market. We can better plan for orderly growth and development of the tourism market.

This legislation does not create new bureaucracy or subsidize private industry. Rather, it will simply upgrade our already existing tourism agency and will establish a council of government and private industry which will assure that the Government does, in fact, coordinate its efforts with private industry.

Mr. Speaker, it is evident from past experience that the Government must work more closely with private industry to enhance, not inhibit its efforts. If the United States is going to continue to compete in world markets and if we are going to avoid future Chrysler bailouts then we must begin to realize a role where the Government and industry are allies, not adversaries. I hope my colleagues will see the sensible approach that this legislation offers and will vote in support of it.

Mr. FLORIO. Mr. Speaker, I yield 1 minute to the gentleman from New York (Mr. BINGHAM).

Mr. BINGHAM. Mr. Speaker, the new Under Secretary would have responsibility for about 75 employees and a budget of about $8 million. By contrast, the only other Commerce Department Under Secretary supervises 2,200 employees and a budget of $175 million. Promoting tourism is an extremely important and beneficial activity, which accounts for many U.S. jobs and could account for more. But by this standard many other equally important functions and programs in the Commerce Department and many other departments would be eligible to be headed by an Under Secretary. If the public wonders how the number of high-paying Government positions escalates, and the bureaucracy expands, this legislation is one of the answers. It concerns me that the creation of an Under Secretary for this program could contribute to efforts by other interests to get their very own Under Secretary (and staff) at added cost to the taxpayer but with relatively little added benefit in terms of program effectiveness.

It also concerns me that while we are cutting back on many extremely important social programs, we should be expanding our subsidy, however indirect, to a particular industry that is thriving and is perfectly capable of doing its own very effective advertising and promotion, and in fact is doing so to the tune of several hundred million dollars every year.

So although this bill is an improvement over those presented to the House in past years, I feel compelled once again, for the reasons outlined above, and without wishing to deny in any way the significance of the tourist industry to the U.S. economy, to vote against this legislation.

When legislation similar to that now under consideration, H.R. 1311, came to the floor in the last Congress, I opposed it. I did so then principally because that earlier version of this legislation would have authorized creation of a U.S. Travel and Tourism Administration funded by the Federal Government, but virtually independent of supervision by or accountability to Government. Among other things, that proposed agency would have had authority to represent the United States to foreign governments and international bodies with respect to matters relating to tourism without appropriate coordination with and supervision by the Secretary of State and the diplomats who officially represent us abroad. The legislation, nevertheless, passed in the last Congress, but was wisely vetoed by President Carter.

H.R. 1311, I am pleased to note, is an improvement over previous bills with respect to the provisions about which I was most concerned. Under this bill, to the extent that the U.S. Travel and Tourism Administration represents the United States officially abroad, it may do so only "in accordance with applicable law." Such a limitation would certainly include close coordination with the Department of State and recognition of the Secretary of State's role and authority as chief adviser to the President with respect to U.S. foreign affairs and his authority, acting through our ambassadors abroad, over all conduct abroad on behalf of the United States.

On the other hand, H.R. 1311 includes certain other revisions which give me new concerns. It takes more than $1 million away from the Foreign Commercial Service in order to expand our tourism representation abroad, but makes those representatives solely responsible to the newly created Under Secretary of Commerce for Tourism. That new position itself strikes me as unduly exalted given the relatively small tourism budget and personnel level.

Mr. FLORIO. Mr. Speaker, I yield 1 minute to the gentleman from Illinois (Mr. DERWINSKI).

Mr. DERWINSKI. Mr. Speaker, I rise in support of H.R. 1311. Travel and tourism in the United States is the third largest retail industry and is the first, second, or third largest industry in 37 States.

The industry generates over $33 billion in wages and salaries, $15.5 billion in Federal, State, and local tax revenues, and $147 billion in domestic spending by travelers in the United States. For every dollar spent by the Federal Government to promote foreign visitation, $18 was spent by foreign visitors in this country.

H.R. 1311 articulates a national tourism policy to promote tourism to the United States. It establishes a U.S. Travel and Tourism Administration within the Department of Commerce to implement tourism policy and programs, an interagency tourism council and creates a Tourism Advisory Board comprised of representatives of the industry to coordinate and monitor Federal Government policies and programs that effect tourism.

H.R. 1311 would elevate the current Assistant Secretary for Tourism to an Under Secretary which is significant in terms of status.

Employment in travel-related businesses increased 4.2 percent, outpacing the total economy in creating new jobs in 1980. In 1980 travel-related businesses accounted for 7.6 million employed or 9 percent of all jobs in the United States.

Mr. Speaker, the travel and tourism industry is the largest private employer in 14 States and experts predict that by the year 2000 it will become the leading industry in the world.

Earlier this year the Senate passed a bill which would establish an independent Government agency for tourism. H.R. 1311 authorizes appropriations to the Secretary of Commerce in the amount of $6.5 million for fiscal year 1982. I urge my colleagues to support this legislation.

● Mr. DASCHLE. Mr. Speaker, the importance of the National Tourism Policy Act has been discussed recently by a number of my colleagues, particularly its provision for an agency within the Department of Commerce which can forcefully pursue the goal of encouraging travel to the United States by people from foreign lands.

Often it has been assumed that foreign travelers spend their time almost exclusively in States along the Atlantic and Pacific coasts. Although this assumption may have been correct in past years, it is no longer valid. Large numbers of international visitors are now learning about and choosing to visit areas in America's beautiful heartland, such as my own State of South Dakota.

This growing trend—and the significance of the National Tourism Policy Act in enhancing it—was examined by writer Jake Henshaw of the Gannett News Service in a story which appeared on May 9, 1981, in the Sioux Falls Argus Leader. I submit portions of that story for your consideration and review:

Jack Oberlitner, the South Dakota secretary of economic and tourism development, said that 200,000 tourists visit his State annually, with about 5 percent of the total being foreigners. With an aggressive Federal program, he said, that number could be doubled.

He said an aggressive independent agency is particularly important since President Reagan is trying to end funding for regional commissions. Right now, he said, the State's existing international tourism program primarily is a joint effort with four other States through the Old West Regional Commission.

Oberlitner said that this commission supports a full-time employee in West Germany who is producing a travel program called Dakota Badlands that 400,000 persons are expected to view in West Berlin.

Ed Glasgow, president of the South Dakota Hospitality Association, stressed that the existing U.S. Commerce Department Travel Service has promoted travel in South Dakota through films and trips there by foreign travel writers.

But for their State, where the $600-million-a-year tourism industry is the State's second largest, Glasgow and Oberlitner agreed that greater Federal effort is needed.

"In view of the significant benefits received from promoting international tourism * * * the costs of Federal participation seem to be not only justified, but demanded," Oberlitner said.●

● Mr. CORRADA. Mr. Speaker, I rise in strong support of H.R. 1311, the National Tourism Policy Act of 1981.

This legislation is extremely important in encouraging and fostering a national tourism policy. H.R. 1311 establishes a U.S. Travel and Tourism Administration within the Department of Commerce to implement tourism policy and programs. It creates an interagency Tourism Council consisting of representatives from the Departments of Commerce, Energy, State, Interior, Labor, Transportation, and the Office of Management and Budget to coordinate and monitor Government policy and programs that affect tourism. H.R. 1311 also creates a Tourism Advisory Board with members of the industry to advise the Secretary of Commerce in this area.

This bill, Mr. Speaker, is almost identical to legislation approved by both the House and Senate by wide margins during the 96th Congress. Unfortunately, the legislation was rejected by President Carter. The Senate has already unanimously approved S. 304, its version of this legislation.

Tourism is not only a nationally important industry, but it is a crucial component in the economy of a majority of our States. The tourism industry is one of the 3 largest employers in at least 38 States. Total employment in this industry is almost 7 million—approximately 7 percent of the total work force. Jobs in the tourism industry are being created at an annual rate of 5.5 percent, and the potential exists for even larger increases if we foster its development.

Other countries have national tourist offices to promote their attractions and while we may believe that the United States is an automatic choice of travelers, in 1980, we received only 7.8 percent of the world's tourists.

Mr. Speaker, according to U.S. travel center figures, Puerto Rico ranks first in total travel promotion from among all States' travel offices with a $10.1 million budget in 1980. This figure reflects the importance of tourism to Puerto Rico's economy. Tourism is the third largest sector of the Puerto Rican economy, behind manufacturing and government. Tourism is a labor-intensive sector of the Puerto Rican economy and accounts for about 11 percent of total employments of our labor force.

I urge all my colleagues to vote in favor of H.R. 1311.●

● Mr. GILMAN. Mr. Speaker, I rise in support of H.R. 1311, the National Tourism Policy Act.

Tourism and travel is one of the more vigorous areas of our Nation's economy, and yet it is vulnerable to Government actions which may inadvertently harm it. Furthermore, although travel and tourism within the United States is growing, we need to take concerted action—in the face of Government-backed national tourism promotion efforts abroad—to retain our Nation's share of the international tourism market.

The National Tourism Policy Act addresses these problems by elevating and reorganizing the national tourism promotion effort within the Department of Commerce; establishing an advisory board of tourism executives and private citizens to bring the views of the industry and its consumers to the attention of the highest levels of the administration.

This bill bears a very modest price tag, and it is predicted that its cost will be returned to the Treasury manyfold in the form of increased tax receipts from a thriving travel industry.

The tourism bill is supported by the administration and I am pleased to add my voice today in favor of its passage.●

● Mr. BROOKS. Mr. Speaker, some pieces of legislation seem to have a life of their own. No matter how flawed they are, no matter how much they are out of step with the prevailing mood of Congress, they just keep coming back until they slip through. Such a piece of legislation is H.R. 1311, the National Tourism Policy Act. Last year we saw a similar bill with the same title slip through the House under suspension of the rules. Its trip through the Senate was just as quick. The only thing that kept last year's Tourism Policy Act from becoming law was a very wise pocket veto by President Carter.

Last year's National Tourism Policy Act was a model of legislation that did the wrong thing at the wrong time. At a time when the American people were hitting Congress over the head with their concern over the growth of the size of the Government, it created a new independent agency to promote the interests of the tourism industry. At a time when it became clear that accountability was the cornerstone of efficient management, the tourism bill prohibited the Office of Management and Budget and all Federal officers and agencies from exercising any advance control over the Tourism Administration's budget request or estimates, legislative recommendations, testimony for congressional hearings, or other actions and, at a time when the American people were up in arms over the size of the Federal bureaucracy, the 96th Congress tourism bill authorized $6.6 million in fiscal year 1981, set up an Administrator at level II of the Executive Schedule, and a Deputy Administrator at level III.

It can be said that the 97th Congress National Tourism Policy Act, H.R. 1311, is a little less awful than last year's version. Instead of setting up an independent agency to promote the tourism industry, H.R. 1311 places this promotional effort inside the Department of Commerce. The provisions of the 96th Congress bill which made the Tourism Administration unaccountable to anyone but itself and the tourism industry have been eliminated.

But, Mr. Speaker, the problem with the National Tourism Policy Act is that the basic idea behind it is bad. For the past 6 months, this Congress has been working toward drastic cuts in funding for programs that have served essential needs of our citizens. We have cut programs in health, education, and other social services. At the same time, the new administration has been working mightily to curtail Government regulatory control and involvement with private industry. This is exactly the wrong time for us to be setting up a new bureaucracy to promote a private industry that seems to be doing a perfectly adequate job of promoting itself. I suggest that the Members read the dissenting views of my good friend, TOBY MOFFETT, which are printed in the Energy and Commerce Committee's report on H.R. 1311. As Congressman MOFFETT notes, the States and the industry are doing a fine job of promoting travel. This is the wrong time for the Federal Government to be assuming a greater load in this area. I urge defeat of H.R. 1311.●

● Mr. NAPIER. Mr. Speaker, I rise in support of the National Tourism Policy Act being considered here today. This legislation is essential for the continued strength and vitality of the travel and tourism community. The tourism industry is increasingly becoming one of the major industries of our Nation and deserves our attention and support.

The tourism industry is forecasted to become the world's largest industry by the year 2000. Here, in the United States, it generates $33 billion in wages and salaries annually, while employing 4.4 million people. There are nearly 1 million businesses, virtually all of which are small businesses, involved directly in tourism. Mr. Speaker, we need to focus on an industry of this magnitude in order to utilize it to the fullest extent possible. The National Tourism Policy Act will help us to do this. It will establish a national policy which recognizes the importance of tourism to the Nation's social and economic welfare and will set up the appropriate instruments for implementing that policy.

The implementation of tourism policy and programs will be facilitated by the establishment of an administration within the Department of Commerce. The administration will have the responsibility of monitoring and directing the growth of the tourism industry in this country. The proposed legislation will direct the administration to develop a comprehensive tourism development plan, to be approved by Congress. This plan will become the basis for efforts to promote tourism here, and more especially in other countries. This will have a number of positive economic and cultural advantages as more foreigners come to visit our country. Foreign visitation will aid in the continued strengthening of the dollar and will help to offset our serious balance-of-payments deficit. In addition, mutual understanding will be enhanced by other nationals experiencing our way of life. We need to insure these benefits by supporting the concerted approach to planning.

The National Tourism Policy Act will not require additional funding. The funding levels are identical to those requested by the administration for tourism. In actuality, the funding requirement is considerably less than that provided last year. The benefits it will return will outweigh the costs which will be incurred. By placing our emphasis on planning and promotion of a valuable and replenishable resource, we will help secure the employment of millions, strengthen thousands of small businesses across the Nation, reinforce our economy, and promote international good will.●

● Mr. RITTER. Mr. Speaker, I rise in support of H.R. 1311, the National Tourism Policy Act and urge my colleagues to support this needed piece of legislation.

As indicated in the debate today this legislation represents a reasonable and middle-of-the-road compromise and gives a tourism industry a more effective position within the Commerce Department.

The bill keeps tourism promotion and development programs in the Department of Commerce while replacing the U.S. Travel Service with an agency called the U.S. Travel and Tourism Administration. The USTTA would be headed by an Under Secretary for Travel and Tourism who would be responsible for submitting a comprehensive marketing plan to the Congress annually and for implementing national tourism policy.

The bill will establish an interagency coordinating council, headed by the Secretary of Commerce, that would coordinate policies, issues, and programs in Federal departments and agencies that relate to tourism. The Coordinating Council would use existing departmental resources and personnel and would not require additional funds. A Tourism Advisory Council comprised of representatives from the tourism and travel industry, will advise the administration on the formulation of the marketing plan and study its ongoing operations.

Moreover, the funding for this bill is consistent with the administration's budget request for tourism programs. It does not increase the bureaucracy, but rather redirects many of the already existing resources within the Government to be more effective and efficient. In addition, it has the administration's support and does not require any additional Government expenditures. In fact, this legislation demands substantially fewer dollars than required by the Senate bill or the measure the House passed last year.

The tourism industry is critical to this Nation's social and economic welfare. Coming from a State that is highly dependent on the travel and tourism industry, it is easy to recognize tourism as the Nations third largest industry, which produces over $157 billion in revenues and generates $16 billion in taxes.

The tourism industry is a labor-intensive industry. Ninety-nine percent are small businesses. The industry employs over 6 million people and is outperforming the overall U.S. economy in creating job opportunities. Since 1958, these jobs have increased 184 percent. This is more than twice as fast as the growth in total U.S. payroll employment over this period. My own district, the Lehigh Valley of Pennsylvania is experiencing rapid growth in this area.

Another major purpose of this bill is to develop and then implement a plan to increase the number of foreign travelers to the United States. This helps to improve our balance of payments and contributes to the overall strength of the economy. The U.S. share of the international tourism marketplace has consistently decreased since 1972. This new focus on tourism will help correct that situation.

Mr. Speaker, as one concerned about economic growth and particularly the growth of jobs in the private sector, I urge my colleagues to support this legislation.

Thank you.●

● Mr. GUNDERSON. Mr. Speaker, recent studies show that existing tourism programs in the United States are fragmented and lack cohesiveness. It is, therefore, essential that the Congress act now to adopt a national policy to promote tourism such as that outlined in H.R. 1311—the National Tourism Policy Act of 1981.

The basic thrust of H.R. 1311 is the coordination of national tourism policy through an interagency council and an advisory body would serve a dual purpose of reviewing the expenditure of Federal moneys on tourism and preparing an annual marketing plan for Congress.

H.R. 1311 is the culmination of 6 years of intensive study and 3 years of congressional consideration. Most importantly, it does not need to authorize any additional expenditures for fiscal year 1982 over the spending levels already requested by the administration for tourism programs. Clearly, this is the most realistic and cost-effective method of promoting tourism presently under consideration by Congress.

Through H.R. 1311 we can enhance the contribution of the tourism industry to economic prosperity, full employment, and the international bal-

ance of payments. Accordingly, we can encourage the welcome entry of individuals traveling to the United States, eliminate unnecessary trade barriers, encourage competition in the tourist industry, and coordinate all Federal activities in support of tourism with the needs of the general public, the States, territories and local municipalities.

The $6.5 million authorized in this bill for fiscal year 1982 plus the $1.1 million from funds appropriated for the tourism activities of the International Trade Administration, is less than the $8 million included in the 1981 continuing resolution for the U.S. Travel Service—the very agency which would be replaced by the newly proposed U.S. Travel and Tourism Administration in H.R. 1311.

Recent employment information for the Department of Labor indicates that in 39 of the 50 States, the tourism industry is either the first, second, or third major employer. In fact, it is the largest employer in 18 States, the second is 15, and third in 6 others.

America's tourism industry is comprised of nearly 1 million businesses out of a total of 14 million in the United States. To fully understand the magnitude of this industry and its benefits to our Nation's economy, it is important to realize that the tourism industry includes airlines, hotels/motels, attractions, rental car companies, bus-rail-and-cruise lines, convention and visitor bureaus, food service establishments, and a host of other enterprises providing services to travelers in America.

Clearly, tourism has the ability to provide jobs in both rural regions and in hard-pressed major cities. It not only supplies a large number of entry-level positions but is preeminent in providing employment for women, young people, and members of minority groups.

In my home State of Wisconsin alone, tourism is the second largest revenue producer, second only to manufacturing. During 1980, Wisconsin's economy was boosted by gross tourism sales of close to $6 billion. Even more striking, is the fact that almost 15 percent of the entire work force in the Badger State is employed in tourism-related jobs.

It is because of the impact the tourism industry has had and will continue to have on this great Nation, that we simply must develop a clear and concise national policy on tourism and travel.

I strongly encourage my colleagues who are not yet committed to expanding tourism in the United States to join with the administration and over 130 Members of Congress in support of passage of H.R. 1311.●

Mr. FLORIO. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New Jersey (Mr. FLORIO) that the House suspend the rules and pass the bill (H.R. 1311), as amended.

The question was taken.

Mr. COLLINS of Texas. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Pursuant to clause 5 of rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

The point of no quorum is considered withdrawn.

PRODUCT LIABILITY RISK RETENTION ACT OF 1981

Mr. FLORIO. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2120) to facilitate the ability of product sellers to establish product liability risk retention groups, to facilitate the ability of such sellers to purchase product liability insurance on a group basis, and for other purposes, as amended.

The Clerk read as follows:

H.R. 2120

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Product Liability Risk Retention Act of 1981".

DEFINITIONS

SEC. 2. (a) As used in this Act—

(1) "completed operations liability" means liability arising out of the installation, maintenance, or repair of any product at a site which is not owned or controlled by—

(A) any person who performs that work; or

(B) any person who hires an independent contractor to perform that work;

but shall include liability for activities which are completed or abandoned before the date of the occurrence giving rise to the liability;

(2) "insurance" means primary insurance, excess insurance, reinsurance, surplus lines insurance, and any other arrangement for shifting and distributing risk which is determined to be insurance under applicable State or Federal law;

(3) "product liability" means liability for damages because of any personal injury, death, emotional harm, consequential economic damage, or property damage (including damages resulting from the loss of use of property) arising out of the manufacture, design, importation, distribution, packaging, labeling, lease, or sale of a product, but does not include the liability of any person for those damages if the product involved was in the possession of such a person when the incident giving rise to the claim occurred;

(4) "risk retention group" means any corporation or other limited liability association taxable as a corporation, or as an insurance company, formed under the laws of any State, Bermuda, or the Cayman Islands—

(A) whose primary activity consists of assuming and spreading all, or any portion, of the product liability or completed operations liability risk exposure of its group members;

(B) which is organized for the primary purpose of conducting the activity described under subparagraph (A);

(C) which is chartered or licensed as an insurance company and authorized to engage in the business of insurance under the laws of any State, or which is so chartered or licensed and authorized before January 1, 1985, under the laws of Bermuda or the Cayman Islands, except that any group so chartered or licensed and authorized under the laws of Bermuda or the Cayman Islands shall be considered to be a risk retention group only after it has certified to the insurance commissioner of at least one State that it satisfies the capitalization requirements of such State;

(D) which does not exclude any person from membership in the group solely to provide for members of such a group a competitive advantage over such a person; and

(E) which is composed of members each of whose principal activity consists of the manufacture, design, importation, distribution, packaging, labeling, lease, or sale of a product or products;

(5) "purchasing group" means any group of persons which has as one of its purposes the purchase of product liability or completed operations liability insurance on a group basis; and

(6) "State" means any State of the United States or the District of Columbia.

(b) The definition of "product liability" in paragraph (4) of subsection (a) of this section shall not be construed to affect either the tort law or the law governing the interpretation of insurance contracts of any State.

RISK RETENTION GROUPS

SEC. 3. (a) Except as provided in this section, a risk retention group is exempt from any State law, rule, regulation, or order to the extent that such law, rule, regulation, or order would—

(1) make unlawful, or regulate, directly or indirectly, the operation of a risk retention group except that the jurisdiction in which it is chartered may regulate the formation and operation of such a group and any State may require such a group to—

(A) comply with the unfair claim settlement practices law of the State;

(B) pay, on a nondiscriminatory basis, applicable premium and other taxes which are levied on admitted insurers and surplus lines insurers, brokers, or policyholders under the laws of the State;

(C) participate, on a nondiscriminatory basis, in any mechanism established or authorized under the law of the State for the equitable apportionment among insurers of product liability or completed operations liability insurance losses and expenses incurred on policies written through such mechanism;

(D) submit to the appropriate authority reports and other information required of licensed insurers under the laws of a State relating solely to product liability or completed operations liability insurance losses and expenses;

(E) register with and designate the State insurance commissioner as its agent solely for the purpose of receiving service of legal documents or process, and, upon request, furnish such commissioner a copy of any financial report submitted by the risk reten-

tion group to the commissioner of the chartered or licensing jurisdiction;

(F) submit to an examination by the State insurance commissioner in any State in which the group is doing business to determine the group's financial condition, if—

(i) the commissioner has reason to believe the risk retention group is in a financially impaired condition; and

(ii) the commissioner of the jurisdiction in which the group is chartered has not begun or has refused to initiate an examination of the group; and

(G) comply with a lawful order issued in a delinquency proceeding commenced by the State insurance commissioner if the commissioner of the jurisdiction in which the group is chartered has failed to initiate such a proceeding after notice of a finding of financial impairment under subparagraph (F) of this paragraph;

(2) require or permit a risk retention group to participate in any insurance insolvency guaranty association to which an insurer licensed in the State is required to belong;

(3) require any insurance policy issued to a risk retention group on any member of the group to be countersigned by an insurance agent or broker residing in that State; or

(4) otherwise discriminate against a risk retention group or any of its members, except that nothing in this section shall be construed to affect the applicability of State laws generally applicable to persons or corporations.

(b) The exemptions specified in subsection (a) apply to—

(1) product liability or completed operations liability insurance coverage provided by a risk retention group for—

(A) such group; or

(B) any person who is a member of such group;

(2) the sale of product liability or completed operations liability insurance coverage for a risk retention group; and

(3) the provision of insurance related services or management services for a risk retention group or any member of such group.

(c) A State may require that a person acting, or offering to act, as an agent or broker for a risk retention group obtain a license from that State, except that a State may not impose any qualification or requirement which discriminates against a nonresident agent or broker.

PURCHASING GROUPS

SEC. 4. (a) Except as provided in this section, a purchasing group is exempt from any State law, rule, regulation, or order to the extent that such law, rule, regulation, or order would—

(1) prohibit the establishment of a purchasing group;

(2) make it unlawful for an insurer to provide or offer to provide insurance on a basis providing, to a purchasing group or its members, advantages, based on their loss and expense experience, not afforded to other persons with respect to rates, policy forms, coverages, or other matters;

(3) prohibit a purchasing group or its members from purchasing insurance on the group basis described in paragraph (2) of this subsection;

(4) prohibit a purchasing group from obtaining insurance on a group basis because the group has not been in existence for a minimum period of time or because any member has not belonged to the group for a minimum period of time;

(5) require that a purchasing group must have a minimum number of members, common ownership or affiliation, or a certain legal form;

(6) require that a certain percentage of a purchasing group must obtain insurance on a group basis;

(7) require that any insurance policy issued to a purchasing group or any members of the group be countersigned by an insurance agent or broker residing in that State; or

(8) otherwise discriminate against a purchasing group or any of its members.

(b) The exemptions specified in subsection (a) apply to—

(1) product liability or completed operations liability insurance, and comprehensive general liability insurance which includes either of these coverages, provided to—

(A) a purchasing group; or

(B) any person who is a member of a purchasing group; and

(2) the provision of—

(A) product liability or completed operations insurance, and comprehensive general liability coverage;

(B) insurance related services; or

(C) management services;

to a purchasing group or member of the group.

(c) A State may require that a person acting, or offering to act, as an agent or broker for a purchasing group obtain a license from that State, except that a State may not impose any qualification or requirement which discriminates against a nonresident agent or broker.

APPLICABILITY OF SECURITIES LAWS

SEC. 5. (a) The ownership interests of members in a risk retention group shall be—

(1) considered to be exempted securities for purposes of section 5 of the Securities Act of 1933 and for purposes of section 12 of the Securities Exchange Act of 1934; and

(2) considered to be securities for purposes of the provisions of section 17 of the Securities Act of 1933 and the provisions of section 10 of the Securities Exchange Act of 1934.

(b) A risk retention group shall not be considered to be an investment company for purposes of the Investment Company Act of 1940 (15 U.S.C. 80a-1 et seq.).

(c) The ownership interests of members in a risk retention group shall not be considered securities for purposes of any State blue sky law.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from New Jersey (Mr. FLORIO) will be recognized for 20 minutes, and the gentleman from New York (Mr. LENT) will be recognized for 20 minutes.

The Chair recognizes the gentleman from New Jersey (Mr. FLORIO).

Mr. FLORIO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the bill, H.R. 2110, now under consideration is a rare phenomenon, a bill that solves a significant and difficult problem at no cost to the Federal or any other treasury, and does so with minimal interference with prevailing insurance practices and State insurance regulation. This bill enjoys broad bipartisan support in Congress and is heartily endorsed by over 200 business trade groups and corporations representing well over 1 million businesses. The administration has endorsed H.R. 2120, which, unlike last year's bill which passed the House by a vote of 332-17, contains no Federal regulatory role.

This bill is crafted to address the growing product liability insurance problem which has made insurance either unaffordable or unavailable to many businesses. In testimony received by my Subcommittee on Commerce, Transportation, and Tourism, one witness described his situation in which his only option was $4 million in insurance coverage at a premium of $1 million. Other manufacturers of high-risk products such as certain medical equipment and gym equipment are unable to secure coverage at any price. This leads to the unfortunate situation of these businesses "going bare," without product liability insurance. If one of these manufacturers is found liable for an injury caused by its products, a large judgment could bankrupt the business, or allow a victim to go uncompensated.

H.R. 2120 enables product manufacturers, distributors, and sellers, to band together to form self insurance cooperatives. Such cooperatives have resulted in significantly lower insurance costs for doctors and lawyers who form groups to cover their malpractice liability exposure. Under present State insurance laws, these professional insurance pools are possible because their members reside in one State and are thus subject only to regulation by that State's insurance authority. Federal action in H.R. 2120 enables manufacturers and product sellers who are situated in different States to form similar insurance cooperatives. The bill provides an avenue to businesses to insure their product liability claims in such a way that their premiums may accurately reflect their loss record. It may be said that this bill can increase the incentive to produce safer products, since these efforts will be reflected in insurance rates. Lower premiums, or those which do not fluctuate wildly, impact the cost of doing business and can counter our present inflationary trends.

The bill before the House was amended once in subcommittee and again in the full Energy and Commerce Committee. The subcommittee amendment limited to 3 years the time period during which new groups formed under H.R. 2120 could charter in Bermuda and the Cayman Islands. The amendment also required that those groups chartering in these two offshore jurisdictions must meet the capitalization requirements of at least one State. The amendment serves to extend more domestic control over entities chartered offshore. The time limit on offshore charters will encourage relocation of these groups back to States which have amended their in-

surance laws to attract the business of risk-retention groups.

The amendment at full committee addressed concerns expressed by the Securities and Exchange Commission. The subcommittee bill exempted risk-retention groups from Federal securities laws, since the groups will not be soliciting investments from the public at large. The amendment limited this exemption to make the groups—and those providing risk-management service to them—subject to the antifraud provisions of the Federal securities laws. The amendment would govern the situation in which an unscrupulous promoter solicits funds in the name of establishing a risk-retention group but absconds with the money collected, having failed to create the intended group. The committee accepted the amendment to afford securities antifraud protection to product manufacturers and sellers attempting to form risk-retention groups under H.R. 2120.

I ask the House to approve this bill, as a necessary solution to the crisis in product liability insurance.

□ 1350

Mr. LENT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 2120, the Product Liability Risk Retention Act of 1981. I would like to join in commending the chairman of the Subcommittee on Commerce, Transportation, and Tourism, the gentleman from New Jersey (Mr. FLORIO), and also my colleague from New York (Mr. SCHEUER).

Mr. Speaker, as we all know, many businesses, particularly smaller businesses, have experienced continuing problems in obtaining product liability insurance at a reasonable cost. As documented during the Energy and Commerce Committee's extensive hearings, this problem has taken a variety of forms. It began in the mid-1970's when thousands of businesses were hit with huge increases in the cost of their product liability insurance. These increases were often opposite to the excellent claims experience of many of the businesses affected.

Some businesses were also forced to accept deductibles that were so high they amounted to self-insurance. Other businesses were unable to obtain product liability insurance at any cost. Ultimately, an increasing number of businesses were forced to go without product liability insurance altogether, either because it was unaffordable or unavailable. This development not only meant that such businesses risked their assets to the ravages of future lawsuits, but also that the future claims of injured consumers could go uncompensated.

Nor do we have any reason to believe that the problem will simply go away. Indicators such as the huge underwriting losses recently sustained by the property-casualty insurance industry, further extensions of liability as decreed by various courts, and the probability of lower interest rates all point to the continued increase of product liability costs.

The legislation before us seeks to address this problem. Specifically, it does so in two ways. First, it permits product manufacturers, distributors, and sellers to form their own insurance cooperatives called risk retention groups so as to spread and assume all or a portion of their product liability and completed operations risk exposure. Second, it enables such businesses to purchase product liability insurance on a group basis.

This legislation should help alleviate the problem by adding capacity to the product liability insurance market and by promoting greater competition among insurers when they set rates and premiums for such insurance. The net result should be greater affordability and availability of product liability insurance for businesses.

As such, this bill represents a marketplace solution to the problem which does not establish or interject Federal authority as did the predecessor bill, H.R. 6152, considered and overwhelmingly passed 332–17 by the House last year. Nor does it interfere substantially with existing insurance practices.

Since we last considered this bill, ongoing cooperative negotiations between business and insurance groups have resolved almost all of the remaining differences between them. The bill before us as introduced and amended generally reflects these efforts. I would like to recognize and applaud such efforts, since they were instrumental in the development of a bill which not only provides a marketplace solution for the product liability problem at no cost to the Federal Treasury but also helps assure that consumers who have a valid product liability claim against a manufacturer will not go uncompensated.

As such, this bill has the support of not only most of the insurance community affected but also the consumer groups as well as a large number of business organizations. Over 200 product seller trade associations support this bill. In its letter of endorsement, the Department of Commerce states that, "The Risk Retention Act would help allay the product liability problem and encourage industry to be both more productive and innovative."

The complete letter follows:

THE SECRETARY OF COMMERCE,
Washington, D.C., July 24, 1981.

Hon. NORMAN F. LENT,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN LENT: During the week of July 27, the Product Liability Risk Retention Act, H.R. 2120, will come to the House floor for your consideration. I urge you to adopt this measure.

For a number of years excessively high product liability insurance rates have been a threat to the very existence of certain businesses. Premiums for such insurance have been so high that, in some cases, the funds paid for protection outweighed the potential benefits. Although a necessary business expense, such large payments cannot be borne by many companies, particularly small businesses.

Although this problem has abated somewhat, the Risk Retention Act proposes a simple long-term solution to the problem. H.R. 2120 allows industries to purchase product liability insurance on a group basis or to pool their resources to form risk retention groups. These are, in effect, self-insurance vehicles which allow an industry to combine its resources for industrywide protection.

The bill before you has evolved over several years and has bipartisan support. It represents a compromise between consumers, the insurance industry, manufacturers, and the Federal Government.

The Federal charter provisions which so many Members found objectionable during the last Congress have been eliminated from this bill. This elimination of the Federal role, together with a new amendment which would require conformity to state chartering and financial responsibility requirements, strikes the proper balance between national and state interests.

If passed, the Product Liability Risk Retention Act would help allay the product liability problem and encourage industry to be both more productive and innovative. These are the twin goals we all share.

Sincerely,

MALCOLM BALDRIGE,
Secretary of Commerce.

I would like to conclude my statement by recommending that you support this bill.

Mr. FLORIO. Mr. Speaker, I yield 3 minutes to the gentleman from New York (Mr. SCHEUER).

Mr. SCHEUER. I thank the gentleman for yielding.

Mr. Speaker, this is an excellent bill, well conceived, well put together. I want to congratulate the gentleman from New Jersey (Mr. FLORIO) for his outstanding leadership in this very hectic Congress in having hearings and achieving a consensus on this bill.

I was chairman of the subcommittee during the last Congress that also dealt with this bill and then, as now, we find that the bill has an enormous consensus behind it.

I know of no segment of either the insurance industry or the manufacturing industry that does not support this bill wholeheartedly. It does not require any Federal expenditures; it does not require any Federal bureaucracy. It is a classic marketplace consensus that has been achieved largely under the leadership of the gentleman from New Jersey (Mr. FLORIO), and I urge all the Members to support it. It will radically reduce the cost of insurance to private industry and the broad range of manufacturing and other industries that need it. The insurance

companies support it. It makes a great deal of sense, and again, I congratulate the gentleman from New Jersey for his outstanding leadership.

I yield back the balance of my time.

□ 1400

Mr. LENT. Mr. Speaker, I yield 3 minutes to the gentleman from Texas (Mr. COLLINS).

Mr. COLLINS of Texas. Mr. Speaker, I want to thank the gentleman from New Jersey (Mr. FLORIO) and the gentleman from New York (Mr. LENT) for the bill that we have on the floor before us this year. It is a tremendous improvement. In fact, it solves the situation without any Federal involvement. This new bill, compared to the bill we had before us last year, where we had a Federal agency, is now providing the most expeditious and the best way that it could possibly be handled.

But withdrawing any past opposition that I have to this concept, I still hope that somewhere in this Government we are going to move on and do even more in the field of product liability. Unlimited liability is one of the most serious problems that faces manufacturers in this country. I am not a lawyer, and I do not understand torts, but they need to do about three things to improve product liability. The first thing, they need is to have a statute of limitations. They cannot let these claims run on and on, 20 years after you manufacture a product. The second thing, they cannot have the secondary or tertiary responsibility; in other words, if you manufacture a truck and someone hangs something on your truck, a person should not be able to, because of that little item that is on there, sue the truck company.

The third thing is, I think we should establish some reasonable limits on what courts and juries could give in the way of compensation. In other words, whatever they give in damages eventually comes back for us to pay as consumers, and whatever we do should be fair and equitable completely across the country.

So I am asking that somewhere—and possibly it is not within our committee's jurisdiction—we establish a sound way to once and for all give balance, and give a final answer to this product liability, this overwhelming problem that faces industry in America today.

Mr. Speaker, as we all know, many businesses, particularly smaller businesses, have experienced continuing problems in obtaining product liability insurance at a reasonable cost for several years now. As documented during the Energy and Commerce Committee's extensive hearings, this problem has taken a variety of forms. It began in the midseventies when thousands of businesses were hit with sudden and substantial increases in the cost of their product liability insurance. These increases were often opposite to the excellent claims experience of many of the businesses affected. Some businesses were also forced to accept deductibles that were so high they amounted to self-insurance. Other businesses were unable to obtain product liability insurance at any cost. Ultimately, an increasing number of businesses were forced to go without product liability insurance altogether, either because it was unaffordable or unavailable. This development not only meant that such businesses risked their assets to the ravages of future lawsuits but also that the future claims of injured consumers could go uncompensated.

As reported by the committee, H.R. 2120 seeks to address the product liability problem in two ways. First, it permits product manufacturers, sellers, and distributors to form their own insurance cooperatives called risk retention groups so as to spread and assume all or a portion of their product liability and completed operations risk exposure. Second, it enables such businesses to purchase product liability insurance on a group basis. Clearly, this legislation represents a marketplace solution to the problem and should help alleviate the problem by providing an opportunity to reduce insurance costs for some businesses, particularly smaller businesses, and by promoting greater competition among insurers when they set product liability insurance rates and premiums.

However, I do not believe that it addresses the root of the problem, that is, uncertainties in the tort-litigation system. Therefore, I would like to take this opportunity to express my hope that we will soon proceed to address such uncertainties in the tort-litigation system with appropriate Federal legislation.

The product liability problems associated with our current tort system are well documented. In early 1976, pursuant to communications from the capital goods sector, in particular, and other business sectors that a crisis had arisen in the area of product liability, the Ford administration formed an Interagency Task Force on Product Liability. After a year of extensive study, the Task Force issued a final report which identified uncertainties in the tort-litigation system as a principal cause of the product liability problem.

The present tort-litigation system has produced a number of decisions which are moving away from a balanced system in which those who are injured by a product are reasonably compensated only by those who are at fault. I would like to note several particularly troublesome areas: First, the imposition of principles of strict liability on some manufacturers relating to the design of the product and/or warning about hazards connected with that product; second, excessive product liability costs for wholesalers, retailers, and distributors who are frequently brought into a product liability suit even though they usually act as a conduit by passing on a finished product, unaltered, in its original package; third, the absence of a cutoff point after which a manufacturer is no longer subject to liability for an injury caused by an older product; and fourth, the awarding of excessive punitive damages.

Admittedly, the consideration of these and other areas of the product liability tort-litigation system will have to be thorough because of the system's complexity; but I would like to emphasize the need to promptly address these areas in uniform Federal legislation. I see such action as essential if we are to reach the root of the product liability problem.

Mr. FLORIO. Mr. Speaker, I yield 2 minutes to the gentleman from Massachusetts (Mr. MARKEY).

Mr. MARKEY. Again I thank the gentleman for yielding, and I applaud him for the leadership he has given in another area that needs addressing on the national agenda.

Mr. Speaker, the Risk Retention Act would provide desperately needed relief for small business. In my district in Massachusetts alone, there are over 7,000 small businesses. We have a combination of high-technology firms and a large number of small manufacturing businesses. Over the past 5 years, these firms have experienced only a marginal increase in the actual legal actions taken against them due to product liability. There virtually has been no increase in the actual claims that have been settled by the courts for damage caused by these firms' products. In spite of this, the cost of premiums for liability insurance has increased on the average of 200 percent with deductible levels substantially increasing over the past 5 years. Those that can afford the expense continue to pay these exorbitant liability insurance costs while continuing to suffer severe financial strain. This high price, however, has put needed liability insurance out of reach for many small businesses struggling to stay afloat.

Since there currently is no alternative to obtaining liability coverage, it appears that the forces of competition have been suspended. This is unacceptable.

The businesses in my district and in every congressional district across this country need and deserve relief from these excessive premium costs.

By allowing product sellers to form product liability risk retention groups, protection for small business can much more reasonably be achieved. In addition, this effectively will increase competition in the insurance industry

and will encourage rates to be based on actual risks and loss experience rather than anticipated losses. I also believe that quality control on the part of manufacturers would increase. Surely, it would not be in the best interests of the risk retention group members to manufacture products that would not produce a large number of claims. I believe strongly that the Risk Retention Act represents a significant step toward making essential coverage available to small businesses at prices they can afford to pay.

I urge support for this excellent legislation and I commend the chairman (Mr. FLORIO) for guiding this bill to passage.

Mr. LENT. Mr. Speaker, I yield 2 minutes to the gentleman from Indiana (Mr. HILER).

Mr. HILER. Mr. Speaker, I rise in support of the bill.

Mr. Speaker, during the years of 1975 through 1978, jolting changes in the property-casualty insurance market caused many companies' premiums for product liability to soar upwards by 300 percent and more. Further, some product sellers were unable to obtain product coverage at any price, thus leading to extreme exposure and the inevitable decision of whether to continue business.

In the last Congress, the House Subcommittee on Consumer Protection and Finance initiated 9 days of hearings to determine the cause of the product liability dilemma and to analyze the various solutions available. The subcommittee and the House Committee on Energy and Commerce have determined that because of the severity of the problem and because individual State legislation cannot facilitate the formation of effective self-insurance groups, Federal legislation is the only viable avenue to product liability insurance at reasonable costs. H.R. 2120 is the product of that determination.

The burgeoning costs of product liability insurance, whether through increased premiums or higher deductibles, continues to impose unacceptable economic burdens on product sellers and, especially, on small businesses. The possibility of businesses closing, resulting in increased unemployment, and the unproductive drain on resources caused by extreme premiums, are contrary to programs now underway to restore our economic strength.

H.R. 2120, the Product Liability Risk Retention Act of 1981, seeks to solve the problem of escalating product liability insurance premium costs by permitting product manufacturers to buy insurance as a group or to self-insure by forming "risk retention groups," or insurance cooperatives. As such, it is a responsible response to a serious problem.

I urge every Member of Congress to vote for its passage.

Mr. FLORIO. Mr. Speaker, although I have no further requests for time, I would like to just publicly recognize the contribution of the gentleman from New York (Mr. LAFALCE).

Mr. Speaker, I yield back the balance of my time.

Mr. LENT. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New Jersey (Mr. FLORIO) that the House suspend the rules and pass the bill, H.R. 2120, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

EXPRESSING SENSE OF CONGRESS WITH RESPECT TO MONETARY POLICY, INFLATION, AND HIGH INTEREST RATES

Mr. REUSS. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 160) expressing the sense of the Congress with respect to monetary policy, inflation, and high interest rates, as amended.

The Clerk read as follows:

H. CON. RES. 160

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that—

(1) current interest rates are needlessly and destructively high, taking into account the current rate of inflation;

(2) high interest rates are wreaking extensive damage on the economy and, in particular, on constuction, on housing, and on the automobile industry, on the thrift institutions, on small business, and on productive capital investment;

(3) high interest rates in the United States are also damaging the economies of our major trading and financial partners, and the economies of the developing world, causing unemployment, impeding growth, and contributing to the risk of social and political disorder;

(4) high interest rates in the United States are the result, in part, of an excessive reliance on tight monetary policy to fight inflation, coupled with an expected large fiscal deficit; and

(5) interest rates should be brought down now. Among other steps, the administration and Congress should—

(A) take immediate action to reduce the future budget deficit and so permit lower interest rates;

(B) encourage the banking system to concentrate available credit on those uses which contribute most to long-term productivity improvement and inflation fighting; and

(C) encourage the Federal Reserve to lower interest rates, without jeopardizing firm control over the aggregate rate of growth of money and credit.

The SPEAKER pro tempore. Is a seconded demanded?

Mr. STANTON of Ohio. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was not objection.

The SPEAKER pro tempore. The gentleman from Wisconsin (Mr. REUSS) will be recognized for 20 minutes, and the gentleman from Ohio (Mr. STANTON) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Wisconsin, (Mr. REUSS).

Mr. REUSS. Mr. Speaker, the issue is a vital one, and the resolution is right to the point. It enjoys, I think, bipartisan support, and I hope it is passed unanimously.

Let me, if I may, Mr. Speaker, walk us through the language, because it is quite self-explanatory.

"Current interest rates," the resolution says, "are needlessly and destructively high, taking into account the current rate of inflation."

Well, they certainly are. The current rate of inflation is something around 8 percent. Yet current interest rates, prime rates, are in excess of 20 percent. How skewed and how out of line can they be?

Second, "High interest rates are wreaking extensive damage on the economy * * *." They sure are. In the quarter just passed, gross national product declined.

□ 1410

In particular, high interest rates are tough on housing. Indeed they are. One million starts so far this year at an annual rate, about one-half of what there should be, and a 38-percent decline since last January.

High interest rates are tough on the automobile industry. They sure are. Auto sales are 32 percent lower than last March. They are murder on the thrift institutions, many, many of which are in very, critical shape because of high interest rates.

On small business, on productive capital investment, and on our friends abroad, current interest rates are simply destructive.

They are the result, the resolution goes on to state, of an excessive reliance on tight monetary policy to fight inflation, coupled with an expected large fiscal deficit.

And the resolution sums up by saying that something can be done about high interest rates, and that they should be brought down and brought down now. The administration and the Congress should: First, encourage the Federal Reserve not to overtighten money. The general Federal Reserve target of 3 to 5½ percent increase for the most common monetary aggregate, M_{1B}, which is cash and

checking accounts, instead of being within the target range for the first 6 months of this year, has hovered at around zero. That should be brought up to the target range, and the Federal Reserve can do it.

Second, it is up to the administration and the Congress to exercise budgetary control, and bring the budget into balance, so that the Treasury does not get out into the market bidding up the price of money in competition with the private economy.

Third and last, all branches of Government ought to encourage our banking industry to soft-pedal loans for commodity speculations, for corporate takeovers, for excessive foreign lending, and thus encourage more money to be available, and at lower interest rates, for housing, construction, capital investment, farmers, small business, and the thrift institutions.

Mr. Speaker, Congress has not only a right, but a duty, to speak out on high interest rates.

Article 1, section 8 of the Constitution vests in the Congress "the power to coin money, regulate the value thereof." High interest rates are currently the scourge of the American economy.

I hope, Mr. Speaker, that there will be unanimous support for House Concurrent Resolution 160, and that all who hear its message will pay heed.

Mr. STANTON of Ohio. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the gentleman from Wisconsin deserves to be commended for the intent of this resolution. Interest rates are too high and are creating serious financial problems for both businesses and individuals.

This is not, however, a resolution which I, or the administration, would emphasize. It is far from complete. While every American feels the press of high interest rates, the source of this problem is inflation and the answers to inflation are not the ones outlined in House Concurrent Resolution 160.

The answers are set forth in the President's economic program which calls for a reduction in Federal spending, a lowering of taxes, a commitment to a stable monetary policy, and a lessening of Federal regulation. The enactment of these programs is where this body should focus its attention.

I am somewhat disturbed by the provision which would call on the administration to—

> Encourage the banking system to concentrate available credit on those uses which contribute most to long-term productivity improvement and inflation fighting.

Quite simply, this is a call for credit allocation. Credit allocation would be the ideal solution to the problem of high interest rates if it worked. The fact is that credit allocation is an unworkable economic program. It is impossible for the Federal Government to intervene in the marketplace to adequately replace the millions of credit decisions and judgments which are made every day. Moreover, as we all know, our Nation's economy is increasingly controlled by decisions that are made halfway around the world and these determinations could never be assumed by the bureaucracy.

Thus, the impact of credit allocation is the opposite of its intent. It serves to skew market decisions and channel resources, both financial and industrial, in directions that were never envisioned.

I am also bothered by the provision which asks the administration to "encourage the Federal Reserve to lower interest rates * * *." There are three problems with this provision. First, it ignores the delicate balance between the operations of the Fed and the administration. The Fed was created by the Congress as an independent agency subject only to legislative mandate and not the dictates of the administration.

Second, the call on the Fed to lower interest rates implies a return to unrestrained monetary growth. The unrestrained growth in the money supply that has occurred in the past is one of the root causes of the high interest rates we face today. One of the best solutions to lowering inflation and interest rates is a stable monetary policy, and as Chairman Volcker announced to our committee last week, that is the path they have already chosen to follow. As the Chairman stated:

> Curbing inflation will require persistent restraint on the growth of money and credit. An attempt to escape from high interest rates and strains on financial markets and institutions by abandoning that restraint would be self-defeating. By encouraging expectations of more inflation, that approach would soon stimulate even more borrowing, further reduce incentives to save, and ultimately result in still higher interest rates and more economic difficulty . . . Indeed, sustained monetary restraint, by encouraging greater confidence in the price outlook, will in time help bring interest rates lower.

Third, the provision which asks the Fed to lower interest rates ignores the procedure of the Humphrey-Hawkins Act which directs the House and Senate Banking Committees to comment upon the Fed's policies on a semiannual basis. This procedure is the proper forum for the ideas contained in this resolution. In fact, the Members of this body should be aware that although this resolution was referred to the Banking Committee, it has never been formally considered by our committee.

Finally, since this resolution is simply a statement of sentiment, it is not binding on the administration and I have no objections to its passage.

Mr. BETHUNE. Mr. Speaker, will the gentleman yield?

Mr. STANTON of Ohio. I yield to the gentleman from Arkansas.

Mr. BETHUNE. I thank the gentleman for yielding.

The thing I have noticed about sense of Congress resolutions is that very frequently it is like beauty in the eyes of the beholder, it means to the reader whatever he wishes for it to mean.

As I read over this concurrent resolution, it occurred to me what we are really talking about here is overall economic policy, and what each of us believes in that respect.

It was November of 1980, 8 full months ago, that the President was elected and we embarked on a four point economic recovery program to get this country going again and get inflation down and get interest rates down—8 months ago.

Up to this point, we have not passed any part of the President's economic program because the Congress has not responded.

So, as I read the resolution, here is what it means to me.

Part 1: Current interest rates are needlessly and destructively high. I agree with that. We need the President's four point economic recovery program.

Part 2: High interest rates are wreaking extensive damage on the economy. We all agree with that. We need the President's four point economic recovery program.

Part 3: High interest rates are damaging the economies of our major trading and financial partners. I agree with that. We need the President's four point economic program. Next, high interest rates are the end result in part of excessive reliance on tight monetary policies. I agree with that because we have not asked for the other three parts of the President's economic recovery program. Until we do, naturally there is going to be excessive reliance on monetary policy.

Then for the remainder of it where it suggests what we should do, part 5(A) says that we should take immediate action to reduce future budget deficits. That is part 1 of the President's economic recovery program. Then it says that we should encourage the banking system to concentrate available credit. Some people said that that is credit allocation. Maybe it was the way the gentleman from Wisconsin first drew it, but now I read that, how do we encourage the banking system to concentrate available credit to the most productive uses?

We develop and nourish those market forces that naturally through competition and all other natural forces will cause the banking industry to direct the resources to the most productive use. That is what that means to me.

I am not sure what part 5(C) means. It is just gobbledygook. But I wonder where the third page of the resolution is. I asked the drafters of it because

the third page of the resolution should call for implementation of the President's tax policy, and it should call for implementation of the regulatory measures.

□ 1420

This is just a statement that goes about halfway toward explaining the interest rate problem in the country. I wish we would go ahead and complete it, but unfortunately we have come here under this truncated procedure. I really do not see much to this, and I doubt anybody else will either.

Mr. STANTON of Ohio. I thank the gentleman for his contribution.

Mr. WYLIE. Mr. Speaker, will the gentleman yield?

Mr. STANTON of Ohio. I yield to my colleague from Ohio.

Mr. WYLIE. Mr. Speaker, I thank the gentleman for yielding. I have read this sense of the Congress resolution and I think that the sense of the Congress resolution expresses a resolve with which we can all agree. It is a little bit like motherhood. Of course, we are all against high interest rates, and we want the Federal Reserve to do something about it, and high interest rates are damaging the economy.

I think that the thrust of the resolution, however, may be a little bit hard on the Federal Reserve Board. I happen to think that high interest rates are due almost entirely to high budget deficits which have been voted by previous Congresses. We are in a position to do something about it in this Congress, and we have taken the first step in that regard by passing President Reagan's budget which calls for a reduction in Federal spending.

Last night, he encouraged us to vote for his tax package, and I might say that there is no question in the minds of the people of the 15th district which I represent as far as approval of this bipartisan approach to bringing down the inflation rate, and in the process bringing down the interest rates. People have confidence in the President, and they believe that his economic recovery program will reduce inflation, bring down interest rates, and improve their standard of living.

But, as I say, I think what we are really missing here is the fact that we need to have a more responsible fiscal policy, and the high interest rates will remain as long as we have huge deficits.

I commend the gentleman from Ohio (Mr. STANTON) for his statement.

Mr. STANTON of Ohio. I appreciate the comments of my colleague.

Mr. KEMP. Mr. Speaker, will the gentleman yield?

Mr. STANTON of Ohio. I yield to the gentleman from New York.

Mr. KEMP. I thank the gentleman for yielding. Would the gentleman mind if I took time on his time to ask the author of the resolution, what do they mean by suggesting that Congress should take action to concentrate available credit on those uses which contribute most to long-term productivity improvement and inflation fighting? Surely we do not believe in credit allocation or capital allocation. I certainly cannot support something that suggests that we are going to turn over to Congress or to the White House or to the Federal Reserve the credit and capital allocation responsibilities of the marketplace. Can the distinguished chairman tell us what he means by this?

Mr. STANTON of Ohio. I will yield to my friend in just a minute, but I will tell the gentleman how I feel.

It is like the gentleman from Arkansas said, we encourage the private banking system to concentrate available credit for productive purposes. We tell them that they ought to do it.

Mr. KEMP. What definition is the gentleman suggesting? Is housing productive or nonproductive?

Mr. STANTON of Ohio. I would like to see them certainly moving toward our auto dealers and small business, not Conoco, for example, or other speculative mergers. We tell them we would like to see that, not that they must do that.

I certainly yield now to my friend from Wisconsin.

Mr. REUSS. Mr. Speaker, I appreciate the gentleman yielding, and I am glad to address myself to the question propounded by the gentleman from New York.

What is meant by this is perfectly clear; namely, that the administration and Congress want to encourage the major American banks to move away from their present practice of grubstaking the commodity speculators, the Bunker Hunts, from grubstaking the corporations, the conglomerates and other measures of bank loans which contribute to inflation by bidding up the price of existing assets; and instead to concentrate their lending on inflation-fighting productivity-enhancing loans, largely for enhanced capital investment.

If that were done, I think we could deal a major blow to inflation. Just a few days ago Mr. Gaylord Freeman, chairman emeritus of the First National Bank of Chicago, one of the Nation's largest, testified that in his view bankers would patriotically respond to such a request from the Congress. That is one that I have in mind.

Mr. STANTON of Ohio. We are running out of time on our side. I will yield further to the gentleman from New York.

Mr. KEMP. Well, there is no definition in here. We have the chairman's word that he knows what he means by those words, but no one else does. It frankly seems to me that they are putting something across on the American people by supporting legislation that has no teeth in it. Sure, we are against high interest rates. What are we going to do about them? I believe a simultaneous strategy of tax reduction, fiscal and monetary restraint, and regulatory reform will reduce inflation, expand the productive capacity of the country, and, therefore, reduce high interest rates. Just denouncing high interest rates does nothing but try to fool the American people into believing we are doing something about this problem. They are not that easily fooled. I am sorry that I cannot support this.

Mr. STANTON of Ohio. I appreciate that. We are against high interest rates.

Mr. DANNEMEYER. Mr. Speaker, will the gentleman yield?

Mr. STANTON of Ohio. I yield to the gentleman from California.

Mr. DANNEMEYER. Mr. Speaker, I thank the gentleman for yielding. I have mixed emotions about this resolution. Subdivision A, page 2, interests this Member very much when it talks about taking immediate action to reduce the future budget deficit and so permit lower interest rates.

The gentleman from Wisconsin may be interested to know that this week, I believe, the Republican research committee will be sending out for the Members' examination a document which suggests and identifies 272 items listing some $52 billion in savings that could be achieved in fiscal year 1982 if we in the Congress have the guts to do it. It would be my hope that the Congress would have the judgment to further reduce the deficit by making more rescissions in our proposed spending.

There is another feature about the resolution that disturbs me. It is the inference that the Federal Reserve System has been putting excessive reliance on tight money policy. I do not know how you define tight money policy, because my information indicates that for 1981, on an annualized basis, M_{1B} expanded in January, 10.2 percent; February, 7.2 percent; March, 6.9 percent; April, 8.5 percent; May, 6 percent.

Now, there is a drumbeat going around saying that we are in an era of tight money. I suggest to the gentleman that we are actually in an era of an expansive money supply as administered by the Federal Reserve System, and it is this irresponsible expansion of the money supply which the managers of the capital markets of this country are perceiving will cause further inflation down the line. Hence, high interest rates now.

Mr. STANTON of Ohio. I appreciate the gentleman's contribution. He made a very good contribution.

Mr. PARRIS. Mr. Speaker, will the gentleman yield?

Mr. STANTON of Ohio. I yield to a very valuable Member, the gentleman from Virginia (Mr. PARRIS).

Mr. PARRIS. Mr. Speaker, I appreciate the gentleman yielding to me. I just want to make the point to the ranking Republican Member and my colleagues that this resolution is an example of the issue of the week brought forth by the majority in an attempt to embarrass Members on this side of the aisle. Last week it was social security. Next month it will be student loans or school lunches. After that, there will be something else.

We are all concerned about high interest rates which are going to kill the American dream, but I suggest, Mr. Chairman, the problem with this resolution is that it is code for credit allocation. The suggestion that the principle of credit allocation is a desirable one to impose on the Nation's financial markets is simply absurd. Can you imagine the Government telling the financial institutions of this Nation who to loan money to and for what purpose, to provide money for this but not for that, to build motels but not to buy cars, or for some or any other purpose? It would be economic chaos. If you like the way the Government runs the Post Office, you will love the way they will run the banks.

I submit however, Mr. Chairman, that the worst part of this measure is the way it was reported to the floor of this House. To be permitted to bring this resolution forward in this bizarre and extraordinary manner, on an issue of this magnitude, is simply astounding. This resolution was not addressed by any committee nor any subcommittee. No hearings were held. There was no input from anybody other than the author and the Speaker of this House. The minority did not even receive a copy until this morning, and then it appeared magically on today's calendar. We cannot continue this way.

It is my hope that any resolution of this magnitude will in the future be considered in accordance with the usual rules and procedure of this House.

Mr. STANTON of Ohio. I did promise to try to yield to my friend from California (Mr. ROUSSELOT).

Mr. ROUSSELOT. Do you mean to say that this came out of the Banking Committee without a hearing, without a report? Gracious.

Mr. STANTON of Ohio. I was the first to point that out. Certainly the procedure was something which we all abhor and are totally opposed to. If there was any strength in this particular resolution I would certainly look on it differently, but it simply says we are against high interest rates.

□ 1430

Mr. PAUL. Mr. Speaker, will the gentleman yield?

Mr. STANTON of Ohio. I yield to the gentleman from Texas.

Mr. PAUL. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I rise in opposition to this resolution, mainly because I see this resolution as just more of the same. I believe we have been doing exactly what this resolution proposes we do; that is, we have been credit-allocating for a good many years, we have done it unsuccessfully, and I believe if we continue with it, we will continue with the same bad results.

Our main problem is our overall monetary policy; managing a fiat currency does not work. For the past 10 years we have been doing that. In the last 10 years, with this type of management, we have increased the money supply by 186 percent, and the prices have gone up that much, and at the same time, due to the dollar depreciation, the average wage has gone down by 14 percent.

I would suggest to the other side that we could join hands in doing something that would really get to the bottom of this. If the Federal Reserve is responsible, then we should raise the question and follow through with auditing the Federal Reserve System.

In 1978 we did pass a bill to partially audit the Federal Reserve System, but we exempted from this audit certain transactions which I think are very important, such as the transactions now under the direction of the Open Market Committee and the deliberations and decisions and actions on all of our monetary policy are held in secret from the American people.

Mr. Speaker, I would hope that we could get to the bottom of our monetary crisis. If we could do this, we could solve the problem of high interest rates.

Mr. STANTON of Ohio. Mr. Speaker, let me thank my friend, the gentleman from Texas (Mr. PAUL). We are down to the last portion of our 20 minutes, and I would like to utilize some of the time.

I would hope that the majority side would understand what we have attempted to point out in this resolution. First, we are all against high interest rates, so we support it. But, second, there is nothing here about inflation, so when we get back to Banking Committee business, let us concentrate on that subject matter and make it clear to the American people that we have the high interest rates due to the excessive promises and the excessive spending of previous administrations. Now we are resolved—the Congress and the administration—to reduce future budget deficits in order to help lower interest rates in the future.

Mr. Speaker, let us hope sincerely that this effort helps to bring down our high interest rates which are so sufferable to so many of our good constituents.

Mr. REUSS. Mr. Speaker, I yield 7 minutes to the distinguished chairman of the Committee on Banking, Finance and Urban Affairs, the gentleman from Rhode Island (Mr. ST GERMAIN), who is a cosponsor of this resolution.

Ms. OAKAR. Mr. Speaker, will the gentleman yield?

Mr. ST GERMAIN. I yield to the gentlewoman from Ohio.

Ms. OAKAR. Mr. Speaker, I thank the gentleman for yielding.

I just want to be on record, Mr. Speaker, as saying that we should make no apology about offering the resolution, and I am very delighted that it is a bipartisan resolution. I am proud to be a cosponsor.

Our auto industries, our thrifts, our small businesses, and our housing industry and so forth, are just being paralyzed by these high interest rates, and it is about time we went on record as saying that the sense of Congress is that we are opposed to this, and that we want our Federal Reserve Board, along with the President, to do something positive about this very dire situation.

Therefore, I join my colleagues in support of this resolution which marks the first step in our efforts to restore some sense of equilibrium to an economy in a state of flux and uncertainty.

The monetary policy being pursued by the administration and the Federal Reserve Board, coupled with the inflationary psychology of the times, has pushed interest rates higher than they ought to be—and, indeed, higher than the Fed itself and the administration expected them to be. Every economist has a different explanation for the contradictory pattern of escalating real interest rates that are outpacing the rate of inflation and the Consumer Price Index. Meanwhile our critical industries—housing, auto sales, thrifts—are paralyzed, consumers and small businesses panic and desperately scavenge for short-term ventures and hedges, or simply go broke or bankrupt. This shows our committee's concern and will to do something about it. I proudly support the resolution.

Mr. ST GERMAIN. Mr. Speaker, I thank the gentlewoman from Ohio (Ms. OAKAR) for her contribution.

Mr. Speaker, I rise in support of House Concurrent Resolution 160, expressing the sense of Congress that the Federal Reserve Board and the administration should relax their stranglehold on the national economy. Their policies are perpetuating high and volatile interest rates. Worse yet, those rates operate with built-in inequities.

Last week Federal Reserve Chairman Volcker admitted to the Banking Committee that, as a result of the

tight money and credit policies fully supported by the administration:

There are so many credit demands out there in the market including by the U.S. Government, somebody is getting squeezed out. Somebody says Uncle first, and it tends to be the homebuyer or other people that are in the weakest position.

The small businessman, who is seeking to finance his inventory, cannot afford the 22 percent or 24 percent interest rates he is charged. However, the major corporations are gobbling each other up as fast as possible. As Chairman Volcker said, "They are perfectly willing to pay the rates." The small businessman and homebuyer might be willing to pay the rates, too, but they cannot afford to.

I urge the Members to support this resolution because I am deeply concerned that the basic sense of fair play which keeps this heterogeneous society together may be eroding. At every turn the administration supports policies to heap the burden on those least able to bear it, all in the name of so-called supply side economics, but better known as trickle-down economics. How can we expect the young people, the black and Hispanics, or the struggling small businessmen to have faith in our efforts if they are pinched into unemployment or bankruptcy by policies that leave the superrich, and multinational corporations unscathed? The citizens of this country are willing to sacrifice for the national good, they have shown that throughout our history. But they must be convinced that their sacrifice is for the national good, and not for the benefit of a small group, at the expense of the vast majority. The current bidding war for Conoco, which will soon spread to other oil companies if press reports are right, shows clearly that the tight money policy of this administration and the Federal Reserve Board is heavily tilted toward the rich.

Chairman REUSS and I have had Paul Volcker before the committees in the last 2 weeks, and although he indicated little concern about the takeovers before the Joint Economic Committee, by the time he appeared before the Banking Committee last week, the bidding war had begun in earnest, and some lines of credit had been drawn down. At that time Chairman Volcker said he was concerned about the possibility of unproductive mergers, and violations of normal banking practices.

Since that time, 1 week ago today, the bidding wars have further escalated. Yesterday the offers, and counteroffers were flying at supersonic rates. Perhaps one offer, by one bidder, for Conoco could be mistaken for a productive use of resources, but an expensive and elaborate high stakes poker game among the Nation's largest corporations is an exhibition in conspicuous consumption that flies in the face of administration declarations of restraint and evenhandedness. After Seagram boosted its Conoco offer from $85 to $92 a share, DuPont followed suit with a $95 offer for 50 percent of the stock and Mobil trumped the other leviathans by offering $105 a share, or $8.1 billion. Still this is not enough for some Wall Street plutocrats; as one said, "For $110 Mobil could have gotten my attention. But no way at $105."

Any illusion that this bidding war is an exercise in productive investment, rather than a game is dispelled by one speculator who told the Wall Street Journal this morning that, "I'm staying with Seagram because they'll cut me a check next Monday morning and I'll have the cash Tuesday. Then I'll probably buy some more Conoco and tender it to DuPont."

Over $40 billion in credit commitments have been locked up through this kind of speculation, and it is being condoned by the Reagan administration which refuses to give any signal that it disapproves of horizontal mergers between the largest corporations in the country. First the administration and the Federal Reserve dry up much of the credit and money growth in the country, and then they stand by as the few remaining drops are sopped up by credit-hungry gamblers and speculators in massive takeover binges.

House Concurrent Resolution 160, before us today, calls on the administration to design and implement a policy of encouraging the banking system to concentrate available credit on those uses which contribute most to long-term productivity improvement and inflation fighting. If the administration would send the signals necessary, it could help restore the sense that this country's policies are designed to help all of its citizens, and not to benefit a few at the expense of the many. This is why I urge you to support this resolution.

Mr. Speaker, in the past, my colleague, the gentleman from California (Mr. ROUSSELOT), a former member of the committee, would rant and rave about the lack of hearings. I often said to myself, "He has got a point." I said "Yes; he has got a point."

However, when he got up today, I harkened back a few weeks to well-known piece of legislation that was 800 pages long, with telephone numbers in it and a few other hen scratches, and it seems to me that I recall he voted for that piece of baggage. And talk about hearings, nobody knew what was in that thing and we certainly didn't have a hearing record.

So unfortunately, I say to the gentleman, in the future he has a problem with me when he yells about the lack of hearings.

I agree that it is always the right procedure to have full hearings, and I agree that when we are having hearings, we should hear from everybody. But we have had hearings. We had Chairman Volcker up here, we had Deputy Under Secretary of the Treasury Beryl Sprinkel, and we had Assistant Secretary Mehle up here, and we had representatives from labor, small business, public power, and we had people representing the mayors of our communities. We intend to have further extensive hearings on monetary policy and on the impact of high interest rates on the small businessman and on BILL STANTON's mother.

Mr. STANTON of Ohio. Mr. Speaker, will the gentleman yield?

Mr. ST GERMAIN. I yield to the gentleman from Ohio.

Mr. STANTON of Ohio. Mr. Speaker, I think personally the gentleman from California was making an excellent point, and I am very surprised that the committee chairman would get up and speak in this way.

What I was doing is protecting the rights of the minority and saying that this resolution, House Concurrent Resolution 160, was brought to the House floor today without any previous knowledge of the ranking minority member of the Banking Committee. I think this is what the gentleman from California was speaking to, and that is what I spoke to first in my remarks.

I would hope now that the chairman would not say these things, and I asked the gentleman from Wisconsin (Mr. REUSS) to tell me that the chairman would not say that we are going to do this again, because if we are, we are going to lose an awful lot of votes.

Mr. ST GERMAIN. Mr. Speaker, the chairman is not saying that at all. Listen, I say to my colleague, to what the chairman stated.

I was always impressed when our friend, the gentleman from California, would complain about the lack of hearings. I have always been impressed by that, and I felt he often had a good point. In fact, he has a good point now, but I am not as impressed today because of his vote on Gramm-Latta, and I think I am allowed to make that observation.

Mr. STANTON of Ohio. Mr. Speaker, will the gentleman yield further?

Mr. ST GERMAIN. Of course, I yield to the gentleman from Ohio.

Mr. STANTON of Ohio. Mr. Speaker, I thank the gentleman for yielding.

I just want to reiterate that I sincerely hope the gentleman from California has the right to point out that hopefully we would not have any more resolutions like this, with the ranking minority member not knowing about it and knowing that it was going to come out.

Mr. ST GERMAIN. Mr. Speaker, the gentleman knows full well that the Chair has done his utmost and intends to continue to do his utmost to work in concert with him on any and all matters.

Mr. STANTON of Ohio. Mr. speaker, I thank the gentleman for that assurance, because ordinarily he does do his best to cooperate, and I am happy to hear the gentleman repeat that.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. ST GERMAIN. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Speaker, I appreciate my colleague's yielding.

I appreciate the fact that my colleague, the chairman of the Banking Committee, has acknowledged that this was probably brought up too quickly and that there were not adequate hearings.

Mr. ST GERMAIN. No; what I said was that we had had hearings. I will ask the gentleman not to put words in my mouth.

Mr. ROUSSELOT. Mr. Speaker, the gentleman said that my point was well taken, except, as he stated, that I voted for the reconciliation bill known as Gramm-Latta II. You bet I did. And as the gentleman well knows, it was fashioned from committee reports from each of the committees, and our ranking minority members spoke in detail how the Gramm-Latta reconciliation bill was constructed. Gramm-Latta did not represent new legislation.

Mr. ST GERMAIN. Mr. Speaker, I will ask the gentleman to excuse me because I do not yield any further.

Mr. ROUSSELOT. All right. I just wanted the gentleman from Rhode Island to understand how much care and effort was given to shaping the Gramm-Latta reconciliation bill.

Mr. ST GERMAIN. Mr. Speaker, I do not yield any further.

□ 1440

Mr. REUSS. Mr. Speaker, I yield 2 minutes to the gentleman from Arkansas (Mr. ALEXANDER).

Mr. ALEXANDER. Mr. Speaker, I have been listening to the debate today and the representatives of the administration, our friends on the other side of the aisle, persist in blaming previous administrations for high interest rates.

I believe that this administration is hiding behind deficit spending as a cause of high interest rates, because the Secretary of the Treasury, Mr. Regan, has clearly said on numerous occasions that it is necessary to maintain a tight money policy, to restrict capital, to impose high interest rates as a method of controlling inflation. Inflation is, in fact, down because of the administration's budget cuts, but interest is up and, in fact, Wall Street responded last week to the dip in inflation by providing a downward trend in the Dow Jones average.

I think that what we saw at the economic summit in Ottawa was an administration that actually revealed itself on monetary policy. I think we saw a President speaking for an administration that came out of the closet on monetary policy.

I think as time goes on and more evidence of this revelation is made known throughout our society, that people will judge that this administration is consciously and deliberately maintaining a high interest rate, tight money policy, as a means it believes to curb inflation.

The SPEAKER pro tempore. The time of the gentleman from Arkansas has expired.

Mr. REUSS. Mr. Speaker, I yield 1 additional minute to the gentleman from Arkansas (Mr. ALEXANDER).

Mr. ALEXANDER. Mr. Speaker, I will agree that tight money is a valuable tool for controlling inflation for a short period of time, but when it is maintained as a policy, an overall policy, it becomes part of the problem.

Twenty-two percent interest rates must be absorbed by businesses, by farms, by manufacturers, and by families alike, that must have credit in order to exist. I believe that this policy is breaking the backs of the American people and that unless we continue to put pressure on the Federal Reserve and on the administration to reverse this policy, that the administration will continue to hide behind deficit spending as a reason for maintaining this cruel high interest rate policy.

I thank the chairman for yielding.

Include the following article pertinent to this issue:

[From the New York Times, July 21, 1981]

THE INTEREST RATE ISSUE—REAGAN BLAMES INHERITED INFLATION FOR RISE, BUT OTHERS CITE TIGHT MONEY POLICY OF U.S.

(By Leonard Silk)

OTTAWA, July 20.—Interest rates, once considered a topic that appealed mostly to financiers, have moved to the top of the agenda of this summit conference of the leaders of the industrial world.

The reason for this dramatic change is the extraordinary height of interest rates in the United States, Japan and Western Europe and the danger they pose to the industrial world in rising unemployment and falling output.

For months now, the Europeans have singled out the United States, and particularly the monetary policies of the Reagan Administration, as the culprit behind the run-up in rates, and the resulting disruptions that high rates have caused their economies.

Today, Secretary of the Treasury Donald T. Regan quoted a striking statement on the subject by Chancellor Helmut Schmidt of West Germany. Chancellor Schmidt, Mr. Regan recounted, recently told a meeting of the finance and economic ministers that interest rates in his country, at 15 to 16 percent, were "the highest rates of interest in Germany since the birth of Christ, as far as real interest rates are concerned."

By the "real" rate of interest, Mr. Schmidt meant the difference between the nominal rate charged by lenders—such as the 15 to 16 percent rate he cited—and the rate of inflation. Since the consumer price index in West Germany was rising at an annual rate of 5.8 percent in the second quarter of 1981, this means that the real rate of interest there was roughly 10 percent.

Historically, economists have considered a real rate of interest of 2 or 3 percent—the real sacrifice that lenders make in letting borrowers use their savings—normal over the longer run. Thus a 10 percent real rate—and it is slightly higher than that in the United States today, with the prime rate at 20½ percent and inflation under 10 percent—is about five times normal.

Advances in the real rate of these dimensions are highly unusual, whether or not Chancellor Schmidt is right in saying that the current level, at least in his country, is the highest since the Christian era began. The leading American monetary theorist, the late Irving Fisher of Yale University, contended that the real rate of interest was remarkably constant over time, with the nominal rate of interest moving up and down more or less in phase with the increase or decrease in the rate of price inflation.

This theory in fact underlies the Reagan Administration's explanation of why interest rates have climbed so high. It is blaming the inflation created by earlier administrations for the high interest rates.

Treasury Secretary Regan, asked at a news conference here what kind of justification President Reagan was offering the other leaders, replied: "What he has told them is: look what he inherited when he came in, the rate of inflation, things of that nature and high interest rates. Remember interest rates were high when the President took office. So what he is telling them is that his policies—his fiscal policy, the monetary policy, particularly that of the Federal Reserve, our deregulation policy, and above all, our tax policy, these things are going to get inflation down."

POSITION CALLED DISINGENUOUS

Oddly enough, the President and his aides are stressing at this summit conference that it is the Federal Reserve that controls interest rates, not the Administration. This position is being taken here as disingenuous, since the Administration has been leaning hard on the Federal Reserve—sometimes even publicly—to keep money tight, no matter what the effect on interest rates.

Again, the Fisher theory of the link between inflation and interest rates is why Administration officials up to President Reagan are assuring foreign leaders that they expect American interest rates to come down, possibly by the end of this year. By how much? The Treasury Secretary said he did not want to be pinned down but "I'd say by several points."

How long is the Administration prepared to stick with this policy of trying to bring down interest rates by keeping money tight to squeeze inflation out of the system? Secretary Regan said the policy had already been in effect for three months and "sticking with it for another six months, that would be nine months of tight interest, would be really sticking with it; it's been a long time since we've done that in the United States."

What might be the effect of this policy? The Europeans are growing increasingly concerned that it might have a more devastating effect on employment in their countries than on inflation. Secretary Regan acknowledged that President Francois Miterrand of France had warned of the dire consequences that would develop if interest rates did not come down by the end of this year, and reported his saying that "unem-

ployment in France as well as in Germany and other countries in Europe was getting to a flash point, to a point where it might cause social upheaval." "And," he said, "they wanted to avoid that."

COST OF LOANS INCREASED

High United States interest rates force other countries to raise their own rates to prevent investors from shipping their funds abroad to take advantage of the rates. In raising their own rates, however, the other countries raise the cost of loans to their own industries and consumers. The higher rates dissuade industry from investing in the plants and machinery that provide jobs and discourage consumer buying of all those products that are bought on credit—houses, automobiles and other durable goods.

The widespread rioting and arson that Prime Minister Margaret Thatcher has faced in recent weeks in Britain clearly underlies the anxiety over a tight money and high interest rate policy being forced upon other countries by the United States. Although the Americans here have sought to describe high interest rates as a common problem among the industrial countries—really a consequence of general inflation—the Europeans are seeking to link the high interest rates to the United States. What they are suggesting is that it is not inflation alone but the monetarist solution to inflation being pursued by the United States that has driven interest rates so high.

They are worried not only about the effect of high interest rates on unemployment but also on business activity, sales both at home and abroad, investment and productivity growth in their countries. Chancellor Schmidt said high interest rates cut down on small German businesses and their efforts to raise capital, carry inventories and expand.

Mr. REUSS. Mr. Speaker, I yield 2 minutes to the gentleman from North Dakota (Mr. DORGAN).

Mr. DORGAN of North Dakota. Mr. Speaker, I think there is an inherent conflict in the fiscal and monetary policy in our Government. I recently questioned the Vice Chairman of the Federal Reserve Board before one of the committees that I serve on. After a number of questions, he admitted that there is a conflict in the short run, at least, between our current monetary policy and the fiscal policy. The monetary policy adopted by the Federal Reserve Board and the fiscal policy espoused by the Reagan administration are in conflict with each other.

The only conceivable reason to support high interest rates that are at least eight points above what they ought to be today, is to retard economic growth and throw the country into a recession. That is the only conceivable reason to support that kind of interest-rate policy. That is 1950's economics. It might have worked then, but it certainly will not work now, because we do not have classic demand pull inflation confronting this country.

So while we have a monetary policy that is intent on dampening the economy and retarding economic growth, it is supported by an administration whose economic policy foundation requires economic growth. The fiscal policy of the Reagan administration requires consistent real economic growth of 4.2 to 5.1 percent for 4 consecutive years; so we have the spectacle of a bicycle built for two with Mr. Reagan on the front seat peddling uphill and Mr. Volcker on the back seat with his foot on the brakes.

It is conflicting monetary and fiscal policy. I just do not understand why the very best of supply side economics which represents low interest rates is not supported in this Chamber by people who call themselves supply siders.

Do you want to make quick amounts of capital available to American industry, to make American industry more productive? Then just push for a change in the interest rate policy of the Federal Reserve Board in this town and you will have substantial amounts of capital available at reasonable prices to American industry very, very quickly.

Mr. REUSS. Mr. Speaker, I yield 2 minutes to the gentleman from Oregon (Mr. WYDEN).

Mr. WYDEN. Mr. Speaker, I appreciate this opportunity to rise in support of the resolution. There is just no question that high interest rates are sapping the vitality of our economy. High interest rates hit the people who are essential to this society, our producers. High interest rates ravage our industrial base just as certainly as would cutting off our highways and waterways. Perhaps no area has been hit harder than my own—than the Pacific Northwest. Our housing industry basically from the stump to the stud is at a standstill. Our fruit canners, the growers who are a vital part of the economy in the Pacific Northwest, tell us that high interest rates will probably add an extra 10 cents per can to their fruit this year. All because they are forced to carry a lot of their inventory at poor credit terms. It is just going to be devastating to them.

What particularly concerns me today is that the administration contends that high interest rates are an absolute prerequisite to our economic recovery.

I just could not disagree more with that kind of a statement and the kind of views that Secretary of the Treasury Regan has expressed over the last few days. High interest rates will do nothing more than to laminate into our economy another layer of inflation, roaring inflation, that is going to devastate the economy of the Pacific Northwest—my home area.

I just would like to urge my colleagues today to join in support of this resolution, which at least is a small step toward putting this economy back together.

Mr. DASCHLE. Mr. Speaker, I rise in strong support of House Concurrent Resolution 160. High interest rates have inflicted serious damage on the Nation's economy and interest rates must be lowered now before any more damage is inflicted.

The consequences of a high interest rate policy are grim indeed. Nationally, as a direct result of record and near-record interest rates, domestic auto sales have plummeted to an annual rate of 5 million, a 20-year low, and 10,000 former auto retailers are no longer in business. New housing starts by home builders fell to an annual rate of 1.03 million in June, a 38-percent decline since January, and permits issued for future construction have dropped just as significantly. Projected Federal spending for this fiscal year and next has increased by an additional $17 billion since spending estimates made just last March, 4 months ago, and this dramatic increase in Federal spending has been fueled by high interest rates.

These impersonal statistics convey the national dimensions of the damage inflicted by high interest rates, but missing from this statistical accounting is a description of the personal consequences of a high interest rate policy. My constitutents have clearly conveyed to me the personal consequences of high interest rates. Their message must be heard.

From the president of a major manufacturing firm in Rapid City, S. Dak.:

Due to high interest rates, our company employment has dropped from 250 people to 70 people and will likely drop further.

From a banker in Clark, S. Dak.:

My farm and business customers are having to shoulder a fearful load because of high interest rates. If the rates can be eased to a decent rate by the end of this year I think we can survive. If these terrifically high rates are prevalent again next year, I am afraid many farmers and small businessmen will have to get out of business or seek help from Farmers Home Administration or whatever agency can help them.

A home builder in Sioux Falls, S. Dak.:

I have been in the home building business for 22 years and have been developing land for single family homes for nine years. The high interest rates charged by Savings & Loans, and banks have had devastating effects on my business.

In past years we've always had 8 to 10 builders building in our development. Today, we have one builder plus a spec. home I am building just to keep my crew together.

One year ago I had 8 carpenters working for me. Today, we are trying to keep 4 working. The interest on my development costs me $5,600.00 a month. That amount is eating up what little revenue I do have.

The effects of high interest rates doesn't stop with me and my situation. I'm not the only builder-developer that could lose my business of 22 years because of high interest rates. One of my subcontractors has a small business loan, his interest is costing him $175.00 per day. Last year at this time he dug 100 basements. This year, to date, he has dug 6.

Another builder built 97 homes in 1979, 57 in 1980, and now he's working on one spec. home. And, yet another builder had 31 employees two years ago, now he has 7. My situation and the 3 others I have mentioned are just a few examples of what interest rates have done to 4 of some Sioux Falls Home Builder Association members. We'll all soon go out of business if interest rates don't go down.

A businessman in Volga, S. Dak.:

The high interest rates are well on the way to completely halting the economy and putting thousands of South Dakotan's in debt for life, if not bankruptcy.

A banker from Arlington, S. Dak.:

There is one thing I understand, and that is if rates stay high, many farmers and small businessmen will be out of business before too long. They are borrowing long-term credit on a short-term basis. These are mainly young people. In addition, we have many Savings and Loans in trouble, and if these should start toppling, it is hard to tell what will happen.

A businessman from Winner, S. Dak.:

I really don't know of any businesses that can survive the present rates. There have been many businesses in South Dakota that have gone bankrupt, and with the present economic situation, the end is not in sight.

From a banker in Cresbard, S. Dak.:

High interest rates, in my estimation, do not curtail inflation, but add to the fire, as far as a farming community such as ours is concerned. It adds to the cost of machinery, feeds, fuel, parts and everything else the farmer buys. Then it also cuts the cost of what he gets for his grains and livestock, as the elevators have to pay a high rate of interest on the grain they buy from him from the time the farmer sells it until the grain is sold at the terminals and the elevator gets his funds back. The same works with the sale of livestock. We have very few farmers in this area that can afford 15 percent interest, say nothing of the "Prime Rate" of 20½ percent where it is right now.

And from a retail merchant in Aberdeen, S. Dak.:

First, interest rates at record levels have forced most small businessmen to reduce their inventories drastically. The only means we have to finance inventories are by using equity capital, which many small businesses simply do not have, or by bank borrowing. While bank borrowing was practical at eight or ten percent, at eighteen or twenty percent, it is not. By being forced to cut back our inventory size, not only do we jeopardize jobs at the companies which supply us, but we lower the variety we can offer our customers, which in turn reduces our profits (where they still exist).

Second, because of the huge new costs many small businessmen face, in order to try to cut other expenses, they reduce employment at their firms. This is bad enough, but when the process is repeated at business after business in a community, the payroll is cut (not to mention the tax base); and it has a multiplier effect that only worsens the problem for everyone.

Third, it goes without saying that when the high cost of borrowing forces us to reduce inventories and cut our number of employees, capital formation and equity building is simply not taking place in our businesses. The longer this goes on, the more over-extended and vulnerable each of us is becoming. Already, there are more individual and small business bankruptcies taking place than at any time since the depression.

Fourth, while many older businesses have built up sufficient capital to remain viable in times of great difficulty, many younger firms have not. High interest rates thus strike most severely at the younger businessmen and women who are just getting started and will provide the new competition and leadership that our country wants to develop.

Fifth, I think that everyone of us watches our receivables with alarm. They are not only getting later and later, but their quality is rapidly deteriorating. The high cost of interest for others, thus has a double impact on us; as we need to finance our inventories for a much longer period of time than normal, resulting in much greater costs.

Sixth, expansion has become virtually impossible. Not only has inflation been greater in the construction industry than most other sectors of the economy, but mortgage rates also are at astronomical levels. Few of us could possibly commit to a long term mortgage, let alone handle the monthly payments. I could name more than a dozen substantial expansion programs in Aberdeen, each one of immense potential benefit to the community, that have been postponed or cancelled within the last twelve months solely because of interest rate levels.

Seventh and last, small businesses do not have access to the great American capital markets that major corporations do, which puts them at a huge disadvantage in terms of interest rates. Each day I see in the Wall Street Journal that major firms are selling bonds (in other words borrowing money from the public) at rates of 14.5% to 15%, while small businessmen only have recourse to banks, where the going rate is much higher. The difference in rates frequently is the difference between profits and losses, and in long term often survival or bankruptcy. While I doubt that anything can be done to give small borrowers access to the capital markets, lower interest rates in general will certainly give us a fighting chance to stay alive and grow.

These are the personal consequences of a high interest rate policy. High interest rates are a silent economic epidemic which is killing and crippling America's small business community. This epidemic must be controlled, interest rates must be reduced now, because our merchants and farmers, and ranchers can no longer endure a high interest rate policy.

Mr. REUSS. Mr. Speaker, I yield myself 2 minutes.

Mr. Speaker, I take this time to comment on just a couple of points.

No. 1, the gentleman from California (Mr. DANNEMEYER), whom I do not see at the moment, referred to M_{1B}, indicating that M_{1B}, which is currency outside of banks and demand deposits. The gentleman from California suggested that M_{1B} had, indeed, showed a surprise and active growth in this year of 1981.

Were that, in fact, the case, I would not be including the Federal Reserve in my list of institutions that we are complaining about today. But, in fact, it is not the case. In fact, the Federal Reserve's figures, on an adjusted basis, which is the way the Federal Reserve issues them, shows that M_{1B}, the aggregate we are talking about, has increased this year in the first 6 months at a rate of less than 1 percent.

The gentleman was using unadjusted figures, and the Federal Reserve itself uses figures which it adjusts.

This is a matter of some importance, because the gentleman indicated that he might vote against this anti-high-interest rate resolution because of the Fed's performance.

In view of what I am now telling the gentleman is the Fed's performance, I hope the gentleman will find it in his heart to cast his vote against high interest rates and against money that is too tight even for the Federal Reserve and its own targets. This brings me to my second and last point, that this is really a very simple and straightforward resolution. People who believe that it is desirable and possible to have interest rates lowered should vote for it. People who for one reason or another believe either that high interest rates are affirmatively good, or that though they may not be so good, we cannot do anything about it, should vote against the resolution.

□ 1450

No hard feelings, no rancor, no gripes, that is the democratic process in action.

Mr. Speaker, I yield back the balance of my time.

Mr. STANTON of Ohio. Mr. Speaker, in conclusion let me simply say we on our side are voting for this resolution because we are against high interest rates. Other than that, this is a totally meaningless resolution; it just means nothing. So I ask my colleagues to vote for it.

Second, I would say to my friend from Oregon, I do not know that the President ever has said that he favored high interest rates. I just never, ever remember him saying that. He has regretted them as much as our vote will show today.

Last but not least, Mr. Speaker, I think my colleagues on the other side should have some doubts about voting for this resolution because simply it clearly says in the last line that we should encourage lowering of interest rates without changing the aggregate growth of money and credit. If that is what my colleagues on the other side want to do, then I think they ought to think twice.

● Mr. FAUNTROY. Mr. Speaker, I am pleased to join Mr. REUSS, distinguished chairman of the Joint Economic Committee, Mr. ST GERMAIN, distinguished chairman of the House Committee on Banking, Finance and Urban Affairs, in support of this Resolution expressing the sense of the Congress with respect to monetary policy, inflation and high interest rates.

High interest rates in the United States result in part of an excessive reliance on tight monetary policy to fight inflation, while pursuing loose fiscal policies with the expectation that it is the Federal Reserve System alone that will bear the burden. The administration's program of large tax cuts and large increases in defense spending make it virtually impossible for this Nation to reduce inflation without a very heavy toll in unemployment among those who are least responsible for this inflation and are most vulnerable to it. This policy is morally wrong, and is economically counterproductive.

These high interest rates are also damaging to the economies of our major trading and financial partners. They have an extraordinarily deleterious impact on the economies of the developing world, unemployment, impeding growth and contributing to the risk of social and political disorder.

By expressing the sense of the Congress that these rates are needlessly high, I believe that we can signal both the Federal Reserve System and the administration that we are concerned with their impact and hope that both will pursue a coordinated policy of targeting tax cuts, stimulating investment employment, and productivity, while reducing the deficit to employ 8 million people who are without work.

At hearings last week, the Banking Committee found that both the administration and the Federal Reserve System have done little to encourage development of productive resources, provision of credit to small business, homeowners and other productive users at reasonable rates. Yet, we are engaged in financing substantial takeover attempts that will add little to employment and little to increased productivity. The interest rate and credit policies of this country need to be guided with a firm hand to discourage these kinds of activities. We need, instead, to encourage savings, to reform our social security system, and our tax system.

It can be done. Just as we passed several years ago, the first resolution that allowed the Congress to hear from the Federal Reserve System how it conducts monetary policy, let us now pass this resolution that will give effect to the Humphrey-Hawkins Full Employment and Balanced Growth Act so that we will restore a full employment, balanced growth economy by pursuing lowered interest rates with a firm monetary policy coupled with a sensible fiscal policy of wise spending and targeted tax cuts.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wisconsin (Mr. REUSS) that the House suspend the rules and agree to the concurrent resolution, House Concurrent Resolution 160, as amended.

The question was taken.

Mr. ALEXANDER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

PARLIAMENTARY INQUIRY

Mr. STANTON of Ohio. Mr. Speaker, as a point of order, could the gentleman not simply object to the vote on the grounds that a quorum is not present and ask for the yeas and nays? I ask that as a parliamentary inquiry.

The SPEAKER pro tempore. Objecting to the vote on the ground that a quorum is not present makes it a de novo vote and automatically it will be postponed.

Pursuant to clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

The point of no quorum is considered withdrawn.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Debate has been concluded on all motions to suspend the rules.

Pursuant to clause 5, rule I, the Chair will now put the question on each motion on which further proceedings were postponed in the order in which that motion was entertained and on which further proceedings were postponed on Monday, July 27, 1981, in the order in which that motion was entertained.

Votes will be taken in the following order: H.R. 1311, de novo; House Concurrent Resolution 160, de novo; and H.R. 4053, de novo.

The Chair will reduce to 5 minutes the time for any electronic votes after the first such vote in this series.

NATIONAL TOURISM POLICY ACT

The SPEAKER pro tempore. The pending business is the question of suspending the rules and passing the bill, H.R. 1311, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New Jersey (Mr. FLORIO) that the House suspend the rules and pass the bill, H.R. 1311, as amended.

The question was taken.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 321, nays 98, not voting 15, as follows:

[Roll No. 168]

NOT VOTING—15

Albosta	Frost	Minish
Atkinson	Gramm	Oxley
Cotter	Harkin	Rosenthal
Fascell	Holland	Volkmer
Fish	Horton	Wampler

□ 1510

The Clerk announced the following pairs:

Mr. Minish with Mr. Fish.
Mr. Fascell with Mr. Horton.
Mr. Atkinson with Mr. Wampler.
Mr. Holland with Mr. Oxley.
Mr. Albosta with Mr. Volkmer.
Mr. Harkin with Mr. Gramm.
Mr. Rosenthal with Mr. Frost.

Messrs. COURTER, BIAGGI, and DELLUMS changed their vote from "yea" to "nay."

Messrs. PARRIS, GOODLING, WORTLEY, and McCOLLUM changed their vote from "nay" to "yea."

So (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

The title was amended so as to read: "A bill to amend the International Travel Act of 1961 to establish a national tourism policy, and for other purposes."

A motion to reconsider was laid on the table.

Mr. FLORIO. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 304) to establish a national tourism policy and an independent government agency to carry out the national tourism policy.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 304

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Tourism Policy Act".

TITLE I—NATIONAL TOURISM POLICY

SEC. 101. FINDINGS AND PURPOSE.

(a) The Congress finds that—

(1) the tourism and recreation industries are important to the United States, not only because of the numbers of people they serve and the vast human, financial, and physical resources they employ, but because of the great benefits tourism, recreation, and related activities confer on individuals and on society as a whole;

(2) the Federal Government for many years has encouraged tourism and recreation implicitly in its statutory commitments to the shorter workyear and to the national passenger transportation system, and explicitly in a number of legislative enactments to promote tourism, and support development of outdoor recreation, cultural attractions, and historic and natural heritage resources;

(3) as incomes and leisure time continue to increase, and as our economic and political systems develop more complex global relationships, tourism and recreation will become ever more important aspects of our daily lives and our growing leisure time; and

(4) the existing extensive Federal Government involvement in tourism, recreation, and other related activities needs to be better coordinated to effectively respond to the national interests in tourism and recreation and, where appropriate, to meet the needs of State and local governments and the private sector.

(b) It is the purpose of this Act to establish a cooperative effort between the Federal Government and State and local governments and other concerned public and private organizations, to use all practicable means and measures, including financial and technical assistance, to implement a national tourism policy that will—

(1) optimize the contribution of the tourism and recreation industries to economic prosperity, full employment, and the international balance of payments of the Nation;

(2) make the opportunity for and benefits of tourism and recreation in the United States universally accessible to residents of the United States and foreign countries and to insure that present and future generations be afforded adequate tourism and recreation resources;

(3) contribute to personal growth, health, education, and intercultural appreciation of the geography, history, and ethnicity of the United States;

(4) encourage the free and welcome entry of individuals traveling to the United States, in order to enhance international understanding and goodwill, consistent with immigration laws, the laws protecting the public health, and laws governing the importation of goods into the United States;

(5) eliminate unnecessary trade barriers to the United States tourism industry operating throughout the world;

(6) encourage competition in the tourism industry and maximum consumer choice through the continued viability of the retail travel agent industry and the independent tour operator industry;

(7) promote the continued development and availability of alternative personal payment mechanisms which facilitate national and international travel;

(8) promote quality, integrity, and reliability in all tourism and tourism-related services offered to visitors to the United States;

(9) preserve the historical and cultural foundations of the Nation as a living part of community life and development, and insure future generations an opportunity to appreciate and enjoy the rich heritage of the Nation;

(10) insure the compatibility of tourism and recreation with other national interests in energy development and conservation, environmental protection, and the judicious use of natural resources;

(11) assist in the collection, analysis, and dissemination of data which accurately measure the economic and social impact of tourism to and in the United States, in order to facilitate planning in the public and private sector; and

(12) harmonize, to the maximum extent possible, all Federal activities in support of tourism and recreation with the needs of the general public and the States, territories, local governments, and private and public sectors of the tourism and recreation industry, and give leadership to all concerned with tourism, recreation, and national heritage preservation in the United States.

TITLE II—THE UNITED STATES TRAVEL AND TOURISM ADMINISTRATION

SEC. 201. PURPOSE.

It is the purpose of this title to establish an independent agency of the United States to be known as the "United States Travel and Tourism Administration".

SEC. 202. CONGRESSIONAL DECLARATION OF POLICY.

The Congress finds and declares—

(1) that it is in the national interest to encourage the orderly growth and development of tourism to and within the United States;

(2) that orderly growth and development of tourism depends on the efforts of the public and private sectors of that industry to assure that the objectives of the national tourism policy are implemented to the maximum extent consistent with other public policy objectives;

(3) that orderly growth and development of tourism, while matters for regional, State, local, and private development, are also of appropriate and important concern to the Federal Government;

(4) that it furthers the national interests to assure that the extensive Federal policy and programmatic involvement in tourism is responsive to the needs and interests of the public and private sectors of that industry;

(5) that in view of the importance of travel and tourism to the economy of the United States, and the pervasive Federal policy and programmatic involvement in tourism, it is necessary and appropriate for the Federal Government to complement,

assist and support mechanisms that will most effectively assure implementation of the national tourism policy; and

(6) that an agency should be created to promote and facilitate the orderly growth and development of tourism and to assist in the implementation of the national tourism policy.

SEC. 203. ADMINISTRATION ESTABLISHED.

There is established an independent agency of the United States, to be known as the "United States Travel and Tourism Administration" (hereinafter in this title referred to as the "Administration").

SEC. 204. OFFICERS AND EMPLOYEES.

(a) The Administration shall be headed by an Administrator (hereinafter referred to as the "Administrator") who shall be nominated by the President not later than 60 days after the date of enactment of this title and appointed by and with the advice and consent of the Senate. The Administrator shall serve at the pleasure of the President and shall be compensated at the rate now or hereafter prescribed for offices or positions at level II of the Executive Schedule.

(b) The President shall appoint a Deputy Administrator by and with the advice and consent of the Senate who shall be compensated at the rate now or hereafter prescribed for offices or positions at level III of the Executive Schedule. The Deputy Administrator shall perform such duties as the Administrator may prescribe. The Deputy Administrator shall act for and perform the functions of the Administrator during any absence or disability of the Administrator or during a vacancy in the office of the Administrator.

(c) The Administrator shall have power to appoint and fix the compensation of such personnel as he or she determines advisable, however, not more than five such appointments may be placed in grades GS-16, GS-17, and GS-18 of the General Schedule, to carry out the functions of the Administration. The authority with reference to appointments in grades GS-16, GS-17, and GS-18 of the General Schedule will be subject to the procedures prescribed under section 5108 of title 5 of the United States Code. Included among any personnel appointed by the Administrator, no more than three persons may be appointed, compensated, or removed without regard to the Civil Service laws and regulations. Such positions shall be in addition to those otherwise authorized by law, including those authorized by section 5108 of title 5 of the United States Code. Under such regulations as the President may prescribe, officers and employees of the United States Government who are appointed without regard to the Civil Service laws and regulations may be entitled, upon removal from such position, except for cause, to reinstatement to the position occupied at the time of appointment or to a position of comparable grade and salary.

(d) The Administrator, to such extent as he determines necessary, may procure supplies, services, and personal property; make contracts; expend funds appropriated, donated, or received in pursuance of contracts hereunder in furtherance of the purposes of this Act; and exercise those powers that are necessary to enable him to carry out efficiently and in the puclic interest the purposes of this Act.

SEC. 205. PURPOSES AND ACTIVITIES OF THE ADMINISTRATION.

(a) In order to achieve the objectives and to carry out the purposes of this Act the Administration is authorized to assist the Congress of the United States and all Federal agencies having policy and programmatic responsibilities affecting tourism.

(b) Not later than April 15, 1982, the Administrator shall develop and submit to the House Committee on Energy and Commerce and the Senate Committee on Commerce, Science, and Transportation a comprehensive and detailed tourism development plan (including the estimated funding and personnel levels required to implement such plan and alternative means of funding) to obtain the objectives and carry out the purposes of this Act.

(c) The plan developed under subsection (b) shall include, among other things, provisions for—

(1) the establishment of branch offices in foreign countries and facilitating services at United States ports-of-entry;

(2) consultation with foreign countries on travel and tourism matters and, in accordance with applicable law, and representing United States travel and tourism interests in international meetings, conferences, and expositions;

(3) participation as a party in interest in proceedings before Federal agencies when such initiation or intervention is necessary to implement or further the national tourism policy;

(4) monitoring the existing and proposed policies and programs significantly affecting tourism of all Federal agencies to ascertain whether, insofar as consistent with other public policy objectives, they are in furtherance of the objectives of the national tourism policy, and reporting the results of such monitoring activities to the Congress yearly or more frequently if necessary;

(5) monitoring the policies and programs significantly affecting tourism of all Federal agencies for the purposes of ascertaining instances of intra-agency and interagency duplication or contradiction and reporting the results of its monitoring activities to the concerned agencies, and the Congress yearly or more frequently if necessary;

(6) developing and administering a comprehensive program relating to industry information, data service, training and education, and technical assistance;

(7) developing and administering a comprehensive program relating to consumer information, protection, and education;

(8) developing a program to seek and to receive information on a continuing basis from the tourism industry, including consumer and travel trade associations, regarding needs and interests which should be met by an agency or program, and directing that information to the appropriate agency; and

(9) encouraging to the maximum extent feasible travel to and from the United States on United States carriers.

SEC. 206. ADMINISTRATIVE POWERS AND PROVISIONS.

(a) In carrying out this title, the Administrator is authorized to—

(1) enter into such contracts, agreements, or other transactions as the Administrator determines appropriate, except that in entering into any contract, agreement, or transaction the Administrator shall rely on competitive bidding to the maximum extent practicable;

(2) accept in the name of the Administration and employ or dispose of in furtherance of the objectives of this act any money, or property, real, personal, or mixed, tangible or intangible, received by gift, devise, bequest, or otherwise;

(3) obtain the services of experts and consultants without regard to section 3109 of title 5 of the United States Code except that no such expert or consultant may be compensated at rates which exceed the daily equivalents of rates now or hereafter prescribed for GS—18 of the General Schedule by section 5332 of title 5 of the United States Code;

(4) accept voluntary and uncompensated services of attorneys, consultants, and experts notwithstanding any other provision of law;

(5) appoint without compensation, such advisory committees as the Administrator deems appropriate;

(6) accept and use with their consent, with or without reimbursement, such personnel, service, equipment, and facilities of agencies of the Federal Government, State governments, or local political subdivisions thereof, as are necessary to conduct the activities of the Administration efficiently; and

(7) promulgate, issue, rescind, and amend such internal administrative procedures as may be necessary to carry out the purposes of this title.

(b) Upon request made by the Administrator, each Federal agency shall—

(1) make its services, personnel, and facilities available to the greatest practicable extent to assist the administration in the performance of its functions; and

(2) furnish to the Administration, subject to the provisions of applicable law, such information, suggestions, estimates, and statistics as the Administration may request.

(c) The Administration may not provide or arrange for transportation or accommodations for persons traveling between other countries and the United States, or between points within the United States, in competition with businesses engaged in providing or arranging for such transportation or accommodations.

(d) The General Services Administration shall furnish the Administration with such offices, equipment, supplies, and services as it is authorized to furnish to any other agency or instrumentality of the United States.

(e) The Administrator shall not enter into contracts, agreements or other transactions the time period for which extends beyond the end of the fiscal year for which appropriations have been made available for such purposes.

SEC. 207. REPORTS.

(a) Whenever the Administration submits or transmits any budget estimate, budget request, supplemental budget estimate, or other budget information, legislative recommendation, prepared testimony for congressional hearings, comment on legislation, or report required by this part to the President or to the Office of Management and Budget, it shall concurrently transmit a copy thereof to the Congress. No officer or agency of the United States shall have any authority to require the Administration to submit its budget requests or estimates, legislative recommendations, prepared testimony for congressional hearings, comments on legislation, or reports required by this title, or comments on any action by a Federal agency affecting tourism to any officer or agency of the United States for approval, comments, or review, prior to the submission of such recommendations, testimony, comments, or reports to the Congress or to such Federal agency.

(b) The Administration shall submit an annual report for the preceding fiscal year

to the President for transmittal to the Congress on or before the 31st day of December of each year. The report shall include a comprehensive and detailed report of the Administration's operations, activities, financial condition, and accomplishments and may include such recommendations as the Administration deems appropriate.

SEC. 208. FUNDING.

(a) Not later than 30 days after the date of enactment of this title, the United States Travel Service shall make available to the Administration $1,000,000 to carry out its functions in the fiscal year ending September 30, 1981.

(b) Funds made available under subsection (a) shall remain available for obligation until expended.

SEC. 209. ADVISORY BOARD.

(a) There is established the Travel and Tourism Advisory Board (hereinafter in this section referred to as the "Board") to be composed of 17 members appointed by the Administrator. The members of the Board shall be appointed as follows:

(1) Not more than nine members of the Board shall be appointed from the same political party.

(2) The members of the Board shall be appointed from among citizens of the United States who are not regular full-time employees of the United States and shall be selected for appointment so as to provide as nearly as practicable a broad representation of different geographical regions within the United States and of the diverse and varied segments of the tourism industry.

(3) Fourteen of the members shall be appointed from senior executive officers of organizations engaged in the travel and tourism industry. Of such members—

(A) at least one shall be a senior representative from a labor organization representing employees of the tourism industry; and

(B) at least one shall be a representative of the States who is knowledgeable of tourism promotion.

(4) Of the remaining three members of the Board—

(A) one member shall be a consumer advocate or ombudsman from the organized public interest community;

(B) one member shall be an economist, statistician, or accountant; and

(C) one member shall be an individual from the academic community who is knowledgeable in tourism, recreation, or national heritage conservation.

The Administrator shall serve as an ex officio member of the Board. The duration of the Board shall not be subject to section 14(a)(2) of the Federal Advisory Committee Act. A list of the members appointed to the Board shall be forwarded by the Administrator to the Senate Committee on Commerce, Science, and Transportation and the House Committee on Energy and Commerce.

(b) The members of the Board shall serve for three-year terms. Vacancies on the Board shall be filled in the same manner in which the original appointments were made. No members of the Board shall be eligible to serve in excess of two consecutive terms of three years each.

(c) The Chairman and Vice Chairman and other appropriate officers of the Board shall be elected by and from members of the Board other than the Administrator.

(d) The members of the Board shall receive no compensation for their services as such, but shall be allowed such necessary travel expenses and per diem as are authorized by section 5703 of title 5, United States Code. The Administrator shall pay the reasonable and necessary expenses incurred by the Board in connection with the coordination of Board activities, announcement and reporting of meetings, and preparation of such reports as are required by subsection (f).

(e) The Board shall meet at least quarterly and shall hold such other meetings at the call of the Chairman, the Administrator, or a majority of its members.

(f) It shall be the duty of the Board to make a continuing study of the programs and activities of the Administration. Specifically, the Board shall review preliminary plans and final budget requests of the Administrator and submit its comments thereon to the President and the Congress. The Board shall prepare an annual report concerning the results of its studies of Administration activities and include therein such recommendations as it deems appropriate with respect to the performance of the Administration and the operation and effectiveness of its programs. Each annual report shall cover a fiscal year, shall be submitted on or before the 31st day of December following the close of the fiscal year, and shall be submitted to the committees referred to in subsection (a). The Board shall have the power to do those things that are necessary and proper to carry out the foregoing activities.

SEC. 210. TRANSFER OF FUNCTIONS.

(a) Not later than 180 days after the date of enactment of this Act the Administration and the United States Travel Service (hereinafter referred to as the "Travel Service") shall complete such steps as are necessary to transfer to the Administration—

(1) the assets, funds, supplies, materials, equipment, and records of the Travel Service;

(2) the rights, privileges, powers, duties, and liabilities of the Travel Service in respect to any contract, agreement, loan, account, or other obligation; and

(3) any unexpended balances of funds appropriated or otherwise accruing to the Travel Service.

The transfer of rights, privileges, powers, duties, and liabilities of the Travel Service under paragraph (2) shall not limit or extend any period of limitation otherwise applicable to the contract, agreement, loan, account, or obligation involved.

(b) Upon completion of the transfer prescribed by subsection (a), the International Travel Act of 1961 (22 U.S.C. 2121 through 2127) and the Act of July 19, 1940 (relating to the encouragement of travel) (16 U.S.C. 18 through 18d) are repealed and the United States Travel Service is abolished.

TITLE III—AMENDMENTS TO THE INTERNATIONAL TRAVEL ACT

SEC. 301. AUTHORIZATION OF APPROPRIATIONS.

(a) The first sentence of section 6 of the International Travel Act of 1961 (22 U.S.C. 2126) is amended—

(1) by striking out "and" immediately before "(8)"; and

(2) by inserting immediately before the period at the end thereof the following: "; and (9) $8,600,000 for the fiscal year ending September 30, 1981, of which not more than—

"(A) $100,000 shall be available to carry out projects meeting the requirements of subsection (c)(1) of section 5A; and

"(B) $500,000 shall be available to carry out projects meeting the requirements of paragraph (2) of subsection (c) of section 5A.".

(b) Nothing contained in this Act shall be construed to commit the Federal Government to provide any sums for the payment of any obligation of the Administration which exceeds amounts provided in advance in appropriation Acts.

SEC. 302. FEDERAL ASSISTANCE FOR REGIONAL PROMOTION OF TOURISM.

(a) The International Travel Act of 1961 (22 U.S.C. 2121) is amended by inserting after section 5 the following new section:

"SEC. 5A. (a) The Secretary is authorized to provide financial assistance to a region of not less than two States or portions of two States to assist in the implementation of a regional tourism promotional and marketing program. Such assistance shall include—

"(1) technical assistance for advancing the promotion of travel to such region by foreign visitors;

"(2) expert consultants; and

"(3) marketing and promotional assistance.

"(b) Any program carried out under this section shall serve as a demonstration project for future program development for regional tourism promotion.

"(c)(1) An applicant for financial assistance under this paragraph for a particular region must demonstrate to the Secretary that—

"(A) such region has in the past been an area that has attracted foreign visitors, but such visits have significantly decreased;

"(B) facilities are being developed or improved to reattract such foreign visitors;

"(C) a joint venture in such region will increase the travel to such region by foreign visitors;

"(D) such regional program will contribute to the economic well-being of the region;

"(E) such region is developing or has developed a regional transportation system that will enhance travel to the facilities and attractions within such region; and

"(F) a correlation exists between increased tourism to such region and the lowering of the unemployment rate in such region.

"(2) An applicant for assistance under this paragraph shall demonstrate to the Secretary that (A) the particular region has been declared a major disaster area by the President or (B) the travel and tourism industry of the particular region has suffered severe economic damage as a result of force majeur.".

(b) The program established under section 5A(c)(2) of the International Travel Act of 1961, as added by subsection (a) of this section, shall commence not later than 30 days after the date of enactment of this title.

SEC. 303. TIME PERIOD FOR PERSONNEL REDUCTION.

Section 9 of the International Travel Act of 1961 (22 U.S.C 2128) is amended by striking out "as of September 1, 1979, and thereafter," and substituting "during the period beginning October 1, 1980, and ending September 30, 1981,".

SEC. 304. RESTRICTIONS ON REDUCTIONS OF PERSONNEL OR FUNDS.

The International Travel Act of 1961, (22 U.S.C. 2121) is further amended by adding at the end thereof the following new section:

"SEC. 10. (a) Nothwithstanding any other provision of law, the Secretary may not reduce the number of employees of the United States Travel Service in the offices

of such Service in foreign countries to a number that is less than the number of authorized employees assigned to such offices in fiscal year 1979.

"(b) Notwithstanding any other provision of law, the Secretary may not reduce the amount of funds appropriated pursuant to this Act that are available for obligation to pay for the activities of the offices of the United States Travel Service in foreign countries to an amount that is less than the amount of funds that were available for obligation to pay for the activities of such offices in fiscal year 1980.".

Mr. FLORIO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FLORIO moves to strike out all after the enacting clause of the Senate bill, S. 304, and insert in lieu thereof the provisions of the bill, H.R. 1311, as passed by the House.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill to amend the International Travel Act of 1961 to establish a national tourism policy, and for other purposes."

A motion to reconsider was laid on the table.

A similar House bill (H.R. 1311) was laid on the table.

GENERAL LEAVE

Mr. FLORIO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 5 of rule I, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device may be taken on all the additional motions to suspend the rules on which the Chair has postponed further proceedings.

EXPRESSING SENSE OF CONGRESS WITH RESPECT TO MONETARY POLICY, INFLATION, AND HIGH INTEREST RATES

The SPEAKER pro tempore. The pending business is the question of suspending the rules and agreeing to the concurrent resolution, House Concurrent Resolution 160, as amended.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wisconsin (Mr. REUSS) that the House suspend the rules and agree to the concurrent resolution, House Concurrent Resolution 160, as amended.

The question was taken.

Mr. ALEXANDER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 403, nays 17, not voting 14, as follows:

[Roll No. 169]

NOT VOTING—14

Bafalis	Holland	Rosenthal
Cotter	Horton	Savage
Fascell	Minish	Volkmer
Frost	Oxley	Wampler
Ginn	Pursell	

□ 1520

The Clerk announced the following pairs:

On this vote:

Mr. Fascell with Mr. Bafalis.
Mr. Ginn with Mr. Wampler.
Mr. Volkmer with Mr. Pursell.
Mr. Rosenthal with Mr. Horton.
Mr. Holland with Mr. Oxley.
Mr. Minish with Mr. Frost.

So (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution, as amended, was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

MINERAL LEASING ACT AMENDMENTS

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill, H.R. 4053, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Nevada (Mr. SANTINI) that the House suspend the rules and pass the bill, H.R. 4053, as amended.

The question was taken.

Mr. RUSSO. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 408, nays 5, not voting 21, as follows:

[Roll No. 170]

Broyhill	Horton	O'Brien
Cotter	Hunter	Oxley
Crockett	McClory	Rosenthal
Edwards (CA)	McCloskey	Volkmer
Erlenborn	Michel	Wampler

□ 1530

The Clerk announced the following pairs:

On this vote:

Mr. Minish with Mr. Erlenborn.
Mr. Mollohan with Mr. McClory.
Mr. Rosenthal with Mr. Broyhill.
Mr. Alexander with Mr. O'Brien.
Mr. Fascell with Mr. Oxley.
Mr. Edwards of California with Mr. Wampler.
Mr. Applegate with Mr. McCloskey.
Mr. Volkmer with Mr. Hunter.
Mr. Frost with Mr. Horton.
Mr. Crockett with Mr. Michel.

Mr. GEJDENSON changed his vote from "yea" to "nay."

So (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

DIRECTING CLERK IN ENGROSSMENT OF H.R. 4053 TO CORRECT FIRST SENTENCE OF PARAGRAPH (d) ON PAGE 4

Mr. SANTINI. Mr. Speaker, I ask unanimous consent that the Clerk be directed in the engrossment of H.R. 4053 to correct the first sentence of paragraph (d) on page 4 of the amendment to read:

(d) The Secretary may lease such additional lands as may be required in support of operations necessary for the recovery of oil shale from lands subject to a lease issued under subsection (a) of this section.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Nevada?

Mr. MARRIOTT. Mr. Speaker, reserving the right to object, would the gentleman tell us what the nature of this amendment is?

Mr. SANTINI. The subject language was approved by the committee, but inadvertently omitted from the language presented to the committee on yesterday's amendment.

The words "from lands subject to a lease issued under subsection (a) of this section." were approved by the committee, but were inadvertently omitted from the language presented in the committee amendment yesterday.

Mr. MARRIOTT. This is the amendment we unanimously agreed to in committee?

Mr. SANTINI. The world-famous Seiberling amendment, yes.

Mr. MARRIOTT. I thank the gentleman, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Nevada?

Mrs. SCHROEDER. Mr. Speaker, reserving the right to object, as I understand it what the gentleman is doing is putting the Seiberling amendment back in. Let me compliment the gentleman. I am delighted that he is doing that. I was very worried.

Mr. SANTINI. I am happy to have a moment of accord during the day with the gentlewoman from Colorado.

Mrs. SCHROEDER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Nevada?

There was no objection.

PERSONAL EXPLANATION

Mr. HARKIN. Mr. Speaker, I was unavoidably detained, chairing my subcommittee, during the vote of H.R. 1311, the National Tourism Policy Act.

Had I been present for that vote, I would have voted "aye."

TREASURY, POSTAL SERVICE AND GENERAL GOVERNMENT APPROPRIATION, 1982

Mr. ROYBAL. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 4121) making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain independent agencies, for the fiscal year ending September 30, 1982, and for other purposes; and pending that motion, Mr. Speaker, I ask unanimous consent that general debate be limited to not to exceed 1 hour, the time to be equally divided and controlled by the gentleman from Ohio (Mr. MILLER) and myself.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. ROYBAL).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 4121, with Mr. STUDDS in the Chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the unanimous-consent agreement, the gentleman from California (Mr. ROYBAL) will be recognized for 30 minutes, and the gentleman from Ohio (Mr. MILLER) will be recognized for 30 minutes.

The Chair recognizes the gentleman from California (Mr. ROYBAL).

Mr. ROYBAL. Mr. Chairman, I yield myself as much time as I may require.

Mr. Chairman, I bring a bill to the floor today for your consideration that would appropriate $9,765,717,000 for the various agencies of the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and a number of independent agencies for fiscal year 1982. While the President presented an austere budget for these agencies, the committee, after careful consideration, is able to recommend a reduction below the President's budget of $98,921,000. The amount recommended in this budget is $551,207,000 below the amount appropriated for these same agencies for the fiscal year 1981. The details of the committee proposals are carefully and fully set forth in the report which accompanies the bill. I would like to summarize briefly the sections of the bill.

□ 1540

Mr. Chairman, title I of the bill provides funds for the activities of the various bureaus and offices of the Treasury Department, such as the Internal Revenue Service, the Customs Service, the Secret Service, and the Bureau of Alcohol, Tobacco, and Firearms, as well as administrative offices. The bill recommends $3,982,287,000, an increase over the President's budget of $53,401,000. This increase over the budget consists of $38 million for the Internal Revenue Service; $18,467,000 for the Customs Service; and $5 million for the Bureau of Alcohol, Tobacco, and Firearms. These increases are offset by decreases in other Treasury agencies.

In recommending these increases, the committee felt that two basic functions of Government should not be reduced at this time—those of law enforcement and those for collection of the revenue. The increase for IRS of $38 million would provide about 1,500 additional personnel to maintain collections at a reasonable level. The Ways and Means Committee recommended increases to correct serious deficiencies in the IRS budget and to turn IRS around after years of documented understaffing.

Every witness at the Ways and Means Committee oversight hearings, including the IRS and Treasury Department, testified that increased IRS staffing over the levels proposed in the fiscal year 1982 budget is clearly needed. Testimony before the committee indicates that each additional dollar of appropriations would generate between $6 and $7 in revenue collections.

In connection with the increase for Customs, which is $18.5 million, and BATF, which is $5 million, the additional funds would not provide any additional personnel. The funds would only maintain employment at the April 30, 1981, level, together with some additional funds for the air-interdiction program to combat narcotics smuggling.

In title II, the U.S. Postal Service, the committee recommends the same amount as in the President's budget, $869,240,000—a reduction of $473,977,000 below the amount that was appropriated in 1981. The committee report directs the Postal Service to continue 6-day mail service and prohibits wholesale closings of small post offices.

Title III of the bill provides funds for most of the offices in the Executive Office of the President. The amount recommended is $8,688,000 below the President's budget request and $8,350,000 below the amount appropriated in 1981. This reduction consists primarily of two items—a denial of an increase of $4,735,000 that was requested for the Office of Management and Budget and a denial also of $2,959,000 for the Office of Policy Development.

In connection with the committee's denial of an increase of $4.7 million for OMB over the 1981 budget, the committee felt that OMB should set the example for fiscal austerity which it advocates and which it imposed on other agencies of Government. In many cases OMB reduced other agency budgets to the 1981 level, and in some cases below that level, and directed those agencies to absorb the cuts by better management and increased productivity. Because the committee felt that OMB should at least follow its own advice, we denied their request for an increase and instead provided for OMB the same level of funding as in the 1981 budget.

In connection with the denial of the budget for the Office of Policy Development, the responsible officials of this office refused to appear formally before the committee to present and justify their budget. The committee feels that this attitude is an affront, not only to the committee but to the House as well. It appears, however, that this matter will be resolved in the Senate, and if it is, I would have no hesitation in considering an appropriation for this office. At this time, however, I strongly urge the House to support the committee in order not to establish a most undesirable precedent.

Title IV of the bill provides funds for a number of independent agencies such as the General Services Administration, the Office of Personnel Management, and the Tax Court of the United States.

The amount recommended in the bill for these agencies is $4,829,717,000—a reduction below the budget of $143,634,000 and a reduction below 1981 of $216,687,000.

The reduction below the budget consists primarily of two items—a denial of the $120 million for contributions to the international buffer stocks for tin. This program has not been authorized, and the administration has not yet even sent proposed legislation to the Congress.

The committee recommends $100 million for the national defense stockpile transaction fund, a reduction of $20 million below the President's budget.

Mr. Chairman, there will be several amendments that will no doubt be offered by various Members of the House. I sincerely hope that we can limit some of those amendments. It is my intention to ask unanimous consent to limit to 10 minutes an amendment on abortion. As the Members know, we have debated that over and over again for many years, not only in this bill but particularly in the bill on Health and Human Services. Since we have already made all these presentations, I sincerely hope we can submit for the RECORD any arguments that we may have, and that unanimous consent would be granted that we limit debate to 10 minutes.

Mr. Chairman, I believe that this is a good bill. It is an austere bill, but it is one that provides for the basic needs of the various agencies to perform their functions.

Mr. ADDABBO. Mr. Chairman, will the gentleman yield?

Mr. ROYBAL. I yield to the gentleman from New York.

Mr. ADDABBO. Mr. Chairman, I thank my subcommittee chairman for yielding.

I take this opportunity to commend my chairman on the exceptional job he has done in bringing this bill to the floor. This is the first regular appropriation bill the gentleman is chairing, and he follows in the great footsteps of our former colleague, Tom Steed.

In keeping with the practices and the beliefs of our great chairman, Tom Steed, the gentleman continues our great interest in Customs, making sure that Customs is not cut, because he knows of their great importance in our fight against drugs and Custom's importance in protecting our borders.

Our chairman, the gentleman from California (Mr. ED ROYBAL), together with our ranking minority member, the gentleman from Ohio (Mr. MILLER), have put many hours into bringing this bill to the floor. This is legislation which I believe is a good bill, a bill that is austere but which protects the rights of all, and, more importantly, protects us against illegal drug trafficking.

I urge my colleagues to support this bill, without amendments.

Mr. Chairman, I support the bill now before the House: the Treasury, Postal Service, and general Government appropriation bill for fiscal year 1982.

First, I want to wholeheartedly commend our new chairman, ED ROYBAL of California, for the great job he has done. He has picked up the baton passed by one of our most experienced and beloved former colleagues, Tom Steed of Oklahoma, and he has carried it as confidently as the old maestro himself. I extend to ED ROYBAL my fullest respect and support. I also honor, with friendship, our minority leader, CLARENCE MILLER of Ohio and I thank our loyal staff, Tex Gunnels and Bill Smith, for their invaluable support.

This is a tough bill. The figures speak for themselves. Recommended new budget authority totals $9,765,717,000, a reduction of $98.9 million below the budget request and $551.2 million below the amounts appropriated for fiscal year 1981. Some of the individual items included are funded at, and even below, last year's levels. In some areas, no funding was requested by the administration and none has been provided.

Additionally, the bill makes available permanent new budget authority of over $150 billion, up more than $16.5 billion from last year, for items which are not subject to consideration during our annual appropriations process. Included in here is payment of interest on the public debt which is anticipated to reach, if not exceeded, $106.5 billion for fiscal year 1982, up $12.4 billion from 1981.

Clearly, this is an austere bill. Equally clear is the message transmitted in title I. Title I makes appropriations to the Department of the Treasury which includes the Bureau of Alcohol, Tobacco and Firearms, the Customs Service, the IRS, and the Secret Service. Funding for title I is increased by $53.4 million over the budget request. This small increase signals our firm intent that austerity shall not translate into a bonanza for drug runners, smugglers, tax dodgers, or criminal users of guns and explosives. We shall not condone the decimation of our law enforcement and revenue-gathering agencies. To do so is pennywise, and pound-foolish, and destructive to our national interest.

The recommended appropriation for the Bureau of Alcohol, Tobacco and Firearms is $155,591,000, an increase of $5 million over the budget request. Your committee does not support the proposal to reduce 229 people in this agency. We are all anguished by the toll in lives and property resulting from irrational shootings, bombings, and arson. We must support BATF if we are to reduce these despicable acts. The purpose of the additional funding is to maintain the April 30, 1981, level of full-time permanent personnel.

An appropriation of $498,468,000 is recommended for the Customs Service. This is the same amount provided last year. The administration had proposed a reduction of $18,467,000 below fiscal year 1981. This incredible proposition would have resulted in a reduction of 625 positions in fiscal year 1982 in this already seriously understaffed agency. The restoration of these funds will maintain the 1981 personnel strength.

Having served as a representative from New York—the largest gateway to the Nation—for more than 20 years, I doubt that there are many in this House more conversant than I am with the colossal responsibilities and workload borne by our Customs personnel. We could not serve our national interest by weakening our first line of defense against the entry of drugs and other contraband, by inadequate enforcement of import quotas, or by complicating and delaying the processing of international passengers, mail and legitimate merchandise. Neither can we afford the loss of revenue that would result from the depletion of a service that brings into the Treasury $5 for every $1 invested.

Your committee has taken several other actions regarding the Customs Service. We have requested reports on the results of various test programs currently underway or proposed, the so-called One Stop, ACCEPT, and others. The results of these tests require careful assessment as we look to the future. The critical understaffing at Customs will only multiply if we do no more than maintain current strengths. Such programs, if they work, could serve to alleviate future workload increases.

This bill approves the requests increase in the Customs overtime pay cap. It should be pointed out that it is essential to the Service that we do so. According to the subcommittee record, page 301, part I of our hearings, in fiscal year 1980 it cost Customs over $1.5 million to administer and monitor the existing cap. Since then we have had a 9.2 percent pay increase, effectively reducing the number of overtime hours. Personnel had to be transported, at considerable expense, to other ports at which employees were not eligible to perform overtime due to the cap. Overtime, I would remind you, is obligatory and a condition of employment for customs inspectors. Much of this off-hour service is provided as a convenience to and at the request of carriers and, as such, is reimbursed by them.

An appropriation of $2,603,649,000 is recommended for the Internal Revenue Service. This amount is $38 million and 1,500 average positions over the budget request. It is estimated that the additional $38 million will result in increased revenue to the Treasury of about $275 million, a return of 7 to 1. As I have said before, one way we can reduce the burdens of taxation is to get the cheats and the evaders off the backs of honest citizens and onto the tax rolls. We must also maintain a standard of taxpayer assistance in order to simplify and encourage voluntary compliance with our intricate tax laws and to avoid imposing a hidden tax, the cost of seeking assistance elsewhere by those who can ill afford to pay it. The modest increase in this area does no more than maintain the program at around the 1981 level. Included also is an increase

of $500,000 for the tax counseling for the elderly program. VITA, vounteers in tax assistance, will be maintained at the $1,300,000 level.

The full budget request for the Secret Service, an increase of $885,000 over 1981, is recommended. The most unhappy events of March 30, afforded us all an opportunity to witness on TV the selfless discipline and dedication to duty of the highly trained men and women of the Secret Service. We commend them and we support them.

Finally in title I, a general provision has been included prohibiting Treasury from shortening the time allowed for payment of excises taxes. Both the House and the Senate have taken positive and concerted action on this issue in the past.

Title II goes along with the budget request of $869,240,000 for payments to the Postal Service. When the Postmaster General appeared before our subcommittee he was fully aware of the magnitude of the proposed cutbacks and the further potential loss of revenue due to the Postal Rates Commission action on the requested rate increase. He nonetheless testified, "we will not look to changes in 6-day delivery or other major, nationwide services," and "we will not have any wholesale closings of small post offices." I remain concerned over the precipitous cuts in both public service and the revenue foregone subsidies. However, the Postmaster General has both responsibility and accountability for the Service and we accept his testimony.

I would point out that the witnesses before our subcommittee were not always as authoritative. To this date, some key positions have not yet been formally filled. This situation must be as untenable to those who must carry on the daily work as it is for us who must look beyond what is said and done today.

Title III provides funding for the Executive Office of the President. Although the total net amount shows a reduction of $8,350,000 from 1981, this is largely due to the fact that no funds were requested, and none provided, for the Council on Wage and Price Stability which received an appropriation last year of over $7.9 million. Some cuts have been made where they were seen to be justified in consonance with cuts elsewhere in the bill. The Office of Management and Budget, as an example, had requested a funding increase of 12½ percent over 1981. I would not deny that the workload at OMB appears to have gone up. I am also aware of the increased workload of other agencies for which the administration has requested less funding than last year. OMB has been provided the same amount as in 1981.

Title IV, independent agencies, is the largest dollar component of new budget authority in the bill. There are myriad agencies and offices here, from GSA and OPM to small committees and commissions, which contribute to the general functioning of the Government. Every one of these line items has been combed and the net amount provided is $143.6 million below the request and $216.7 million below the fiscal year 1981 appropriation. A major factor is the reduction of $120 million requested for contributions to international buffer stocks. This denial was made without prejudice due to lack of authorization.

Two relatively small programs in title IV were marked for extinction this year by the administration, two programs that I consider important. The National Historical Publications and Records Commission plays a unique role in the preservation of our heritage. The bill earmarks $3 million so that this program can continue. Intergovernmental personnel assistance, administered by OPM, has been terminated. I believe this to be a most untimely end to a program designed to provide assistance to State and local governments. In my view, this program should have been bolstered in the coming year when personnel at the State and local level will have to fathom, translate, and adjust to the impact of the actions of the Federal Government this year.

Obviously, I have some concerns. Nonetheless, within the constraints that we face, your committee has exercised its collective best judgment and I urge the adoption of this bill by the House.

Mr. KAZEN. Mr. Chairman, will the gentleman yield?

Mr. ROYBAL. I yield to the gentleman from Texas.

Mr. KAZEN. Mr. Chairman, let me ask the gentleman to go over the section dealing with the Customs Service. What has the committee provided for the Customs Service?

Mr. ROYBAL. Mr. Chairman, in the Customs Service we have made an additional appropriation of $18.5 million.

Mr. KAZEN. Is this for additional personnel, additional inspectors, or additional supervisors?

Mr. ADDABBO. Mr. Chairman, will the gentleman yield?

Mr. ROYBAL. I yield to the gentleman from New York.

Mr. ADDABBO. Mr. Chairman, in answer to the gentleman, this is not any increase in personnel. What this does is to maintain employment at the April 30, 1981 level. It was the intention of the administration to reduce the number of customs inspectors, and this bill keeps them at the present level and requires that there be no reduction.

Mr. ROYBAL. Well, the attempt originally was to reduce the personnel. What the committee has done is maintaining the same personnel we had before instead of following the recommendations originally made to reduce.

Mr. KAZEN. Mr. Chairman, if the gentleman will yield further, let me submit to the distinguished chairman that if we keep the number of slots that we now have, they would be woefully inadequate to deal with the international trade that we now have.

I have an international bridge at Laredo that is supposed to be open 24 hours a day. The lines are tremendously long coming out of Mexico and going into Mexico simply because we do not have the Customs and Immigration personnel. Therefore, we are not open 24 hours a day and this country is losing a tremendous amount of revenue.

This is being pennywise and poundfoolish, when we do not have the adequate personnel to increase this country's revenue.

Mr. ROYBAL. May I respond to the gentleman?

Mr. KAZEN. Yes, certainly.

Mr. ROYBAL. I wholeheartedly agree with the gentleman that that is the case, but in this particular instance the committee did the very best it possible could. We did, in fact, increase it by $18.5 million.

We also fought back the recommendation made by the administration to reduce the personnel.

Now we are bringing this to the floor for House consideration and any amendment that can be made or that will be made will be debated in the House and then we will take whatever position the House desires.

Mr. ADDABBO. Mr. Chairman, will the gentleman yield?

Mr. ROYBAL. I yield to the gentleman.

Mr. ADDABBO. I fully agree and I fully agree with the gentleman from Texas that this is one place we should not make cuts; but we were under the budget constraints. When we increased and kept it at the same level we were again maneuvering moneys and dollars within the bill and we did it as much as we could; but again, most of the members of the subcommittee fully agree with the gentleman that this is one place where no cuts should be made and, if anything, it should be increased.

Mr. KAZEN. Mr. Chairman, if the gentleman will yield further, where is the additional money that the gentleman says is going in here, what is it going to be used for?

Mr. ADDABBO. The money is over the budget request, the $18.5 million is more than the administration had requested and what that money is being used for is to maintain present level employment and in some cases for more equipment and improvement of stations.

Mr. KAZEN. I thank the gentleman.

Mr. GONZALEZ. Mr. Chairman, will the gentleman yield?

Mr. ROYBAL. I yield to the gentleman from Texas.

Mr. GONZALEZ. I rise also in continuation of this discussion because I represent at least a part of the city of San Antonio where we have somewhat of a different, but still the same impact as the situation in Laredo, because we have the airport and there we have been facing some real crisis that is adverse to the national interest of trade and commerce, as the gentleman from Texas (Mr. KAZEN) pointed out.

My question is, that personnel at the current level would remain the same that we have at such place or post as say the San Antonio International Airport.

Mr. ROYBAL. That is correct.

Mr. GONZALEZ. I was intrigued a while ago by the gentleman referring to limiting debate on an expected proposed abortion amendment on this bill.

Mr. ROYBAL. Yes.

Mr. GONZALEZ. This has nothing to do with HEW. Who are they trying to prevent from aborting, the postman?

Mr. ROYBAL. The gentleman probably remembers such an amendment was previously made in the bill last year and it is expected and has already been announced that such an amendment would be offered again today.

Mr. GONZALEZ. I do not recall last year's amendment, but to what section, does the gentleman remember, can the gentleman tell me; was it to the Post Office section, the postman, the mailman?

Mr. ROYBAL. No; this is going to be to the health benefit plans. This is the moneys that an employee pays for health services, Blue Cross, and so forth and so on. The amendment is going to be made that will affect that section of the bill.

Mr. GONZALEZ. I just could not conceive of it, because the only main thing I see here is the Postal Department and I just did not understand.

Mr. ROYBAL. Well, I gather by the gentleman's concern that he does not expect such an amendment to be in this bill. I did not, either. I do not think it has any business in the bill, but it is my understanding that it is going to be made.

Mr. GONZALEZ. Oh, I agree whole heartedly. I just could not conceive under what circumstances, because it usually takes the form of "None of the funds herein provided for shall be used for the purposes."

I could not see how that could be done, except directed to some poor postal deliveryman trying to deliver the mail and being under the injunction that none of his salary could be used for the purposes of that, or if it was done while he was in the course of delivering the mail. I just did not see how, but I can understand and I certainly sympathize with the desire for a limitation on debate.

I just could not understand how it could be germane. It must be a violation of the rules, because this is an appropriations bill.

Mr. ROYBAL. Well, if the gentleman will yield back to me, perhaps I can refresh the gentleman's memory that again last year a point of order was called and it was ruled to be germane. Therefore, it is my understanding that it will again be offered and we are going to try to limit the debate so that we can expedite the consideration of the the bill. This matter has been debated so many times.

Mr. GONZALEZ. It is understandable and I certainly sympathize and agree with the distinguished chairman.

I thank the gentleman very much.

Mr. MILLER of Ohio. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I appreciate this opportunity to at least say a few words about this bill, but first I want to compliment the subcommittee chairman, the gentleman from California (Mr. ROYBAL) for the efficient and businesslike way in which he conducted the subcommittee hearings and the markup.

I also want to compliment the subcommittee staff, Tex Gunnels and Bill Smith, for their hard work and instructional counsel during the year.

Now, the chairman conveyed the message that we have in this bill, $9,765,000,000, a reduction of $551 million from last year's bill.

I will not go over all the figures. There is no reason to duplicate that, but we heard a few minutes ago about the Customs Bureau and there were questions asked about Customs. The Customs appropriations in the bill is $498 million, an increase of $18 million.

Customs has 13,099 employees. If there are problems at the borders, perhaps we need to get more Customs personnel out of the office and into an area where they will be able to do some good at the borders.

Customs needs the guidance of a commissioner, and I would hope that in the near future we will have a Commissioner of Customs appointed.

Customs last year had a one-time appropriation of $10 million in the supplemental for aircraft. When we add the $8.4 million proposed reduction that was restored, we are $18.4 million over last year.

We also had something else that was added in our markup of the bill. We had $38 million added to the Internal Revenue Service budget and that was for 1,500 new employees in IRS. Undoubtedly, we will hear more about that, with the possibility of an amendment to be offered to either strike or reduce that amount. It was proposed, as I understand, by an oversight committee of Ways and Means.

I believe it is important that we convey the message that last year this committee reduced the payment to the Postal Service by one-quarter of a billion dollars and in this bill we have decreased the payment to the Postal Service approximately one-half billion dollars.

We may only be prolonging the agony. That is very possible, because somewhere along the line those payments will need to be made up, the Postal Service will need to increase efficiency, or increase the price of stamps.

□ 1600

Somewhere along the line the taxpayers are going to pay, I would say. But there is a reduction in this particular bill for the Postal Services.

In this bill we have almost 60 accounts for various agencies, bureaus, and offices. Some of them, like GSA, are the basic Government housekeeping activities, or with the IRS and Customs, for revenue collection. Others provide basic Government functions like the Executive Office of the President while others, like the Postal Service, provide other basic service to all Americans.

Others are for law enforcement agencies such as the Customs that we spoke of, and the Bureau of Alcohol, Tobacco and Firearms.

One agency, the Bureau of the Public Debt, is charged with managing our massive national debt. Appropriations for that agency will be $206 million for this fiscal year 1982.

But I think here we need to mention something else. That $206 million is just for administrative costs, costs for administering the national debt.

In the bill, or at least for the items that are covered by the committee, we have permanent authority for new budget outlays, and amounts to $160 billion. That is covered by the committee but not covered by the bill itself because it is permanent authority.

We have Federal funds of $120 billion. We have trust funds of $30 billion.

We have the national debt interest payment within this permanent authority. I think it is important to keep that in mind because somehow perhaps that is how we got into trouble in the beginning. The national debt will be $1 trillion, possibly by the end of next month. There are many hidden items behind this bill, such as permanent authorities for spending, but my colleagues are not voting on that spending here on the House floor.

Mr. Chairman, I feel that we will have some 15 or 20 amendments and, instead of covering the total bill I

would like to cover the balance at the time of the amendments.

Mr. ROYBAL. Mr. Chairman, I yield 6 minutes to the gentlewoman from New York (Ms. FERRARO).

Ms. FERRARO. Mr. Chairman, I rise in strong support of maintaining the committee-approved staffing levels in the U.S. Customs Service, the Internal Revenue Service (IRS), and the Bureau of Alcohol, Tobacco and Firearms (BATF) and urge rejection of any amendment to reduce those employees. These revenue-generating agencies are charged with the enforcement of our drug laws, protecting our borders, collecting taxes, and providing a number of other vital services.

The appropriations subcommittee acted carefully and responsibly in rejecting the cuts and inadequate staffing levels proposed by the administration, and I commend the gentleman from California (Mr. ROYBAL) for his work in this matter.

Candidate Reagan campaigned with a pledge to reduce the size of Government and get it off the backs of the people. Some Members in this House are supporting his moves to reduce committee-approved Customs, IRS, and BATF personnel. What would be the effects on such a move?

Do the President and his supporters want to get Government agents off the backs of drug traffickers who smuggle their contraband through our ports of entry and peddle it in the streets and schoolyards of our cities and towns?

Do the President and his supporters want to get import specialists off the backs of foreign exporters wishing to violate import quotas and undermine our domestic markets?

Do the President and his supporters want to get revenue agents off the backs of tax cheats?

Do the President and his supporters want to increase the already lengthy processing waits which must be endured by foreign visitors wishing to spend time and money visiting the United States?

Do the President and his supporters want to get Federal agents off the backs of those who break U.S. firearms and explosives control laws?

I find each of these results unacceptable, yet inevitable if approved staffing levels at these agencies is reduced. As chairwoman of the subcommittee with jurisdiction over Federal personnel levels, I have visited an IRS service center and several district offices in New York and met with the employees who process and audit tax returns, bringing $5 to the Treasury for each $1 spent on their salaries. I have looked at a number of other agencies and have held a hearing on the proposed reductions in Customs and Immigration and Naturalization Service. As a result, I have concluded that those cuts bear no relationship to agency workload whatsoever.

I am not alone in this conclusion. GAO issued a report to me last week stating, "Federal departments and agencies have not developed comprehensive work force planning systems that relate to staff needs to work requirements." One of the agencies included in the scope of that review was the Department of the Treasury.

We must act responsibly in dealing with the proposals forwarded by the President. We must balance the politics of the moment with sound administration of our federal system. Frankly, staffing cuts in these agencies may be good short-term politics but it is bad policy.

Mr. Chairman, at the same time the administration wants to cut staffing at these important operating agencies, it has requested increases of more than $8.8 million in appropriations to support staff in the Executive Office of the President (EOP). I commend the committee and subcommittee chairmen for approving significantly less funds than the administration requested, and especially for keeping OMB funding levels down to the 1981 level.

I was really surprised by the request of our former colleague Dave Stockman, I found it totally inconsistent for the chief budget-cutting agency to request $4.7 million over last year's funding level for staff—a full 14-percent increase. Although the duties and workload may be increasing at OMB, this is also occurring in many other agencies of Government for which the budget authority requested is either at or below 1981 levels.

In its fiscal year 1982 budget revisions the administration announced it would achieve a 12-percent staffing reduction in 1981 in the Executive Office of the President, which includes OMB, through cutbacks in the Council on Wage and Price Stability (COWPS), the Council on Environmental Quality (CEQ), and the Office of Science and Technology Policy (OSTP). Indeed the latest figures available from the Office of Personnel Management show that the COWPS staff has been reduced by 160 positions between January and May of this year. The Council on Environmental Quality and the Office of Science and Technology Policy show staff reductions of 35 and 19, respectively, in the same period.

Yet these reductions have been almost totally offset by staff increases in other EOP agencies. As chairwoman of the subcommittee with authorizing jurisdiction over the size of many of the EOP offices, I was shocked when I examined the figures. Staffing in the Office of Administration has increased by 17 positions, or 10 percent over the January level. The Office of the Special Representative for Trade Negotiations has increased by 12 positions or 9 percent since January. The White House Office has grown by, would you believe, 113 positions since January—a 32 percent growth since the President took office and 69 more employees than were on board in May of last year.

The bottom line, Mr. Chairman, is this—the President's announced 12 percent staff reduction in his own Executive Office has fizzled to little more that 2 percent . . . and the President has requested $8.8 million more than was appropriated last year to pay for his staff.

This is a clear example of the Washington shell game at its worst. This administration continues to push for reductions in the number of lower grade employees who protect our borders and enforce our laws, while conveniently overlooking its own failure to reduce high paid political appointees inside the White House.

For the same salary of each $50,000 a year political appointee we could hire three GS-7's to aid in identifying drug smugglers, process tax returns or aid in Federal law enforcement activities.

I commend the gentleman from Mississippi (Mr. WHITTEN) and the gentleman from California (Mr. ROYBAL) for their efforts to bring this appropriation bill into better balance in this regard.

For the administration I recommend a little variation on the old adage . . . budget cutting like charity, should begin at home—even if that home happens to be the White House.

□ 1610

Mr. MILLER of Ohio. Mr. Chairman, I yield 5 minutes to the gentleman from Arizona (Mr. RUDD).

Mr. RUDD. I thank the gentleman from Ohio (Mr. MILLER) for yielding.

Mr. Chairman, I would like to take this opportunity to congratulate the distinguished chairman, the gentleman from California (Mr. ROYBAL), and my distinguished colleague, the gentleman from Ohio, for the excellent work that they performed in putting this bill together, along with my other colleagues on the committee, and also thank the staff for the diligence and hard work that they put into this bill so we could bring it to the floor.

My colleagues, the chairman, the gentleman from California, and the ranking member of the committee, the gentleman from Ohio, have already outlined for you the general contents of the bill H.R. 4121.

The committee asks for $9.8 billion in round figures for fiscal year 1982 for the Treasury Department, the Postal Service, and the Executive Office of the President, as well as a variety of independent agencies such as

the General Services Administration, the Office of Personnel Management, for a total appropriated funding amount that is, I must say, $551 million less than was available in the fiscal year 1981 appropriation and $98.9 million less than the administration asked for this year.

As we deliberate this bill today, as we work on it, we would do well to keep things in perspective by remembering that these moneys are not the only funds available to some of these agencies. There are also permanent authority appropriations, moneys that go out automatically to these agencies without Congress raising a finger. These built-in expenses for operation of the entire Government will amount to $150.2 billion for fiscal year 1982, which is an increase of $16.6 billion or 12 percent over fiscal year 1981.

For example, the Bureau of the Public Debt will spend $106.5 billion for interest on the national debt alone, which totals, as of June 30, I might add, $971 billion.

Another permanent authority appropriation is for $10.9 billion for the civil service retirement and disability fund and $600 million will be spent for the interest alone on income tax refunds.

This is a great deal of money, Mr. Chairman, by anyone's measure; and these are just some of what could be termed hidden costs of Government. They are hidden not because anyone is trying to conceal anything, but because, as ordinary, ongoing costs of doing business, they tend to be overshadowed by the news events of other appropriations concerns.

So all I would like to do is to say that we ought to remind ourselves now and then that these are obligations of permanent authority appropriations and money for these operations just does not grow on trees any more than money for anything else grows on trees.

Mr. Chairman, there will be, without any doubt, some amendments proposed to this appropriations bill, and I simply ask that my colleagues give careful consideration to them so no additional spending will be added to this bill because I think it is a proper bill in the form in which it has been presented.

I yield back the balance of my time.

The CHAIRMAN. The gentleman from Ohio (Mr. MILLER) has 19 minutes remaining. The gentleman from California (Mr. ROYBAL) has 7 minutes.

Mr. MILLER of Ohio. Mr. Chairman, I yield myself such time as I may consume.

I would like to follow up a little on what the gentleman from Arizona (Mr. RUDD) has stated concerning the national debt. I think it is appropriate to mention, even though we are not appropriating in this bill, that the actual money for the national debt, but we are appropriating the administrative costs. I think it would be good for the Members to have a copy of part I of our hearings on the Department of the Treasury. Look at page 737, which is foreign holdings of U.S. Treasury securities. I had requested the Treasury Department to give us a list of those nations that are holding our U.S. Treasury securities, and let us not fool ourselves, we know that is our national debt.

On that page, we show that France, as of December 31, 1980, is holding $8,380,000,000 of our national debt. West Germany is holding $34,276,000,000 of our national debt. Switzerland is holding $8,556,000,000. The United Kingdom, $8,118,000,000.

Now, we have heard on the House floor many, many times about the problems in India. India is holding $179 million of our national debt. Israel is holding $101 million, and Japan $20,871,000,000. A total of $130 billion is held by foreign nations.

Most of those that are holding our securities are really the governments of those nations. They are central banks and in most of the nations the Government owns the central bank.

We might go just a little further on that as to how much interest is paid to those various nations, and I will just point out a couple of them.

In 1980, we paid West Germany $3 billion interest. We paid Japan $1,758,000,000. We paid the United Kingdom $761 million interest for the money that we borrowed from them to cover our national debt. A total of $11,477,000,000 in interest that we paid on the national debt, left our country and went to foreign nations.

Mr. GONZALEZ. Mr. Chairman, will the gentleman yield?

Mr. MILLER of Ohio. I yield to the gentleman from Texas.

Mr. GONZALEZ. Mr. Chairman, I rise to ask a question in connection therewith, or maybe there is no connection. On page 6 of the committee report, among other things, in speaking there about the international affairs programs of the Office of the Secretary of the Treasury, the second paragraph there toward the end, it says:

> U.S. policy regarding international financial institutions; assistance in economic aspects of programs funded jointly by the U.S. and Saudi Arabian governments; and a variety of other programs.

Could the gentleman tell me what those joint programs are with Saudi Arabia that this apparent provision refers to in the way of funding? It says:

> Assistance in economic aspects of programs funded jointly by the United States and Saudi Arabian governments.

Mr. MILLER of Ohio. Perhaps the chairman will have the answer to the gentleman's question.

Mr. ROYBAL. Mr. Chairman, will the gentleman yield?

Mr. MILLER of Ohio. I yield to the gentleman from California.

Mr. ROYBAL. Mr. Chairman, the moneys made available for this purpose, which totals $22,896,000, is money made available for these people to be attending—that is for the Secretary of the Treasury and the personnel of the Office of International Affairs—to attend these meetings and negotiate with international leaders on economic problems and monetary matters of great importance.

Mr. GONZALEZ. The wording is "assistance in economic aspects of programs funded."

So the word "programs" refers to conferences, meetings and the like?

Mr. ROYBAL. That is correct. Negotiations and meetings with international organizations.

Mr. GONZALEZ. I thank the gentleman.

□ 1620

Mr. MILLER of Ohio. Mr. Chairman, I yield 3 minutes to the gentleman from Arizona (Mr. RUDD).

Mr. RUDD. I want to thank the gentleman for yielding and to commend him for bringing out these points which so graphically illustrate what sort of spending this Government is confronted with and what the Congress of this Nation must take into consideration in passing out various bills, including the one before us today, in the hope that we can keep our spending down.

I would like to say that this morning I received several telephone calls from my district urging me to vote for and support the President's tax bill, which has something to do with this, but at the same time one very distinguished constituent of mine, a former Senator in my State legislature, requested and I furnished her the national debt figures, the interest figures, et cetera, and she was alarmed and outraged.

The reason I bring this up is to tell the gentleman how concerned the citizens are, at least in my State, about the spending the Government has been engaging in. She indicated that she was going to put a banner across Central Avenue in Phoenix, Ariz., stating the amount of the national debt, the interest rate, and then change it daily to show the daily interest rate on the national debt. I mention this just to bear out the commendation I have given to the gentleman from Ohio, to tell the gentleman there is great support, great interest, and a lot of concern by the people of this country about how we are spending our money, how big the debt is, and how big the interest on the debt is.

Mr. FORD of Michigan. Mr. Chairman, will the gentleman yield?

Mr. RUDD. I yield to the gentleman from Michigan.

Mr. FORD of Michigan. Mr. Chairman, the gentleman might suggest to his constituent that she mark the date on the calendar when the solid Republican majority over there votes for the President to raise the debt ceiling through the trillion dollar mark. I think it will be sometime in September.

Mr. RUDD. I will give her my colleague's name, and maybe she would like to communicate with him on that aspect.

Mr. CAMPBELL. Mr. Chairman, will the gentleman yield?

Mr. RUDD. I yield to the gentleman from South Carolina.

Mr. CAMPBELL. We might also point out that that debt ceiling was reached without this President ever having put through one budget of his own under which we have operated, and that there are others who must take the responsibility. Especially those who have controlled the Congress for the past quarter century.

Mr. MILLER of Ohio. Mr. Chairman, I have no additional requests for time, and I reserve the balance of my time.

Mr. ROYBAL. Mr. Chairman, I yield 3 minutes to the gentleman from Hawaii (Mr. AKAKA).

Mr. AKAKA. Mr. Chairman, I rise in support of H.R. 4121 and urge my colleagues in the House to join me. Chairman ROYBAL has done an excellent job in pulling together the diverse interests in this bill, and I commend him for it. No less important has been the contribution of Mr. MILLER from Ohio, and all the members on the minority side. I realize that during our subcommittee's deliberations there was not complete agreement on all issues. Nonetheless, this bill is the result of a bipartisan consensus of opinion, and it is a bill which all of us have reason to support.

One area where our subcommittee has made great strides is in the area of Government efficiency. I hope all Members will take the time to read the sections of the report that deal with fraud, waste, and abuse. I know that these concerns are ones that both sides of the aisle can lend their full support. Specifically, I want to direct your attention to those which will promote efficiency.

The committee has recognized that while the level of observable fraud, waste, and mismanagement in the Federal Government is high, the degree to which employees actually report such abuses is disappointingly low. We have directed the Merit Systems Protection Board to review this situation and to make recommendations as to how existing whistle-blowing programs can be strengthened.

We have directed the GSA to review, and wherever possible to implement, the 16 pages of recommendations contained in a report by the National Academy of Public Administration. We have also included provisions that require GSA to make Government-owned buildings more energy efficient. Under the terms of this bill, we have also included provisions which require that all Government-owned building space be filled to capacity before allowing agencies to rent space. I think that significant savings will be achieved through the improvements we have recommended, and I want to assure the Members of the House that the subcommittee will closely monitor Federal agencies to see that the improvements are carried out.

Finally, I want to address an issue that has generated a great deal of concern among Members. In fact, this issue may even be the subject of amendment. During markup, our subcommittee restored funds for personnel in the Bureau of Alcohol, Tobacco and Firearms, the Customs Service, and the Internal Revenue Service. What is important to recognize is that the auditing, enforcement, and investigation functions performed by these agencies actually produce revenue for the Federal Government.

In IRS investigations and collections, for example, $6 is returned to the Treasury for every dollar in personnel expenses. In IRS examination, the figure is $15 returned for every personnel dollar spent. For the Customer Service, $4 is returned for every dollar expended for personnel. There are very few agencies that produce revenue, and fewer still that have such high rates of return.

For these reasons, I urge my colleagues to join me in supporting the Treasury-Postal Service appropriations bill.

Mr. ROYBAL. Mr. Chairman, I yield such time as he may consume to the gentleman from New York (Mr. BIAGGI).

Mr. BIAGGI. Mr. Chairman, earlier this year I reintroduced a bill, H.R. 2280, to authorize a Federal study to identify and ultimately ban handgun bullets that are capable of penetrating bulletproof vests used by police officers. I had intended to offer this legislation in the form of an amendment to the pending bill, but the amendment could have faced a point of order that, in all likelihood, would have been sustained.

Nonetheless, this life-threatening situation remains and it merits our attention today. At this time, I wish to provide a brief history of the problem and then engage the chairman in a colloquy on an alternative course of action.

Due largely to improved design and an alarming increase in violent crime, police officers are relying more and more heavily on bulletproof vests for protection. Unfortunately, a preliminary investigation I have conducted at the request of the New York City Patrolman's Benevolent Association reveals that these vests may not be enough.

My study has determined there is an entire class of handgun bullets—often referred to as metal- or armor-piercing—which can penetrate bulletproof vests. Most of these bullets are available to the public on a nationwide basis. My findings are based largely on discussions I have had with numerous recognized experts in the field of ballistics and firearms from both the private and public sector.

These so-called killer bullets are generally constructed of steel-jacketed lead or hard metal alloys; pointed in shape rather than being flat, rounded, or hollow-pointed; and are classified as high velocity. Size does not seem to be a major factor, since these metal-piercing bullets include some varieties of the small .22 caliber as well as the much larger .357 caliber.

Yet, while the facts seem to indicate a very dangerous situation for law enforcement officers, the data is simply not sufficient enough to justify a ban at this time. Instead, it appears that we must first conclusively identify the handgun bullets capable of penetrating the vests before we can ban them from the public marketplace. That is what my legislation proposes and that is the direction I am hoping to move in today.

Preliminary and informal discussions I have had with the Director of the Bureau of Alcohol, Tobacco and Firearms, G. R. Dickerson, has convinced me that the Bureau has the resources to perform a cost-efficient study in this area if instructed to do so. Last year, I was encouraged when I received expressions of concern about this situation from then-chairman of the House Subcommittee on Treasury Appropriations, Tom Steed. While Mr. Steed's retirement soon thereafter prevented his taking action in this matter, I am confident the gentleman from California (Mr. ROYBAL) will also recognize the critical nature of this problem.

Mr. Chairman, I raise this issue with a special sensitivity to the need to protect our law enforcement community. Having served 23 years on the New York City Police Force and having been wounded 10 times during the line of duty, I fully recognize that the protection of our Nation's law enforcement officers is essential to the morale and effectiveness of our crime prevention force.

Earlier this year, President Reagan was seriously wounded by a would-be assassin's handgun bullet. Since that time much attention has been focused on the need for Presidents to wear bulletproof vests during public appearances. That fact, along with the real-

ization that handgun bullets kill more police officers than any other weapon should be reason enough to require the study I have proposed.

For further documentation, I wish to insert a copy of a report prepared by the Congressional Research Service entitled, "Bullet Threats to Protective Body Armor."

At this time, Mr. Chairman, I would like to engage the chairman, Mr. ROYBAL, in a colloquy regarding this issue, and ask the gentleman if he shares my concern on this issue.

Mr. ROYBAL. Mr. Chairman, if the gentleman will yield, let me assure the gentleman from New York that I certainly do share his concern, and I fully recognize the critical need for such a study to be conducted as soon as possible.

To insure that this goal can be achieved, I will inform the Treasury Secretary and his associates of the subcommittee's interest in this study, and I will request the Secretary to prepare a preliminary plan and cost-estimate for conducting the study. I am hopeful that a full report detailing the preliminary plan and cost-estimate could be submitted to the subcommittee by the end of the year so that we can make the necessary funding arrangements.

Finally, I would like to thank my distinguished colleague from New York for raising this important issue and acknowledge him for his untiring efforts on behalf of the law enforcement community.

Mr. BIAGGI. I appreciate the Chairman's concern, and am grateful for the active role he has pledged.

Mr. Chairman, I include in my remarks a report prepared by the Congressional Research Service, entitled "Bullet Threats to Protective Body Armor."

BULLET THREATS TO PROTECTIVE BODY ARMOR

(By William C. Boesman, Science Policy Research Division, November 27, 1979)

INTRODUCTION

Since about 1975, law enforcement officers have been using protective body armor of the "soft" or "lightweight" variety to an increasing extent. This type of body armor, unlike the heavy flak jackets worn by the military and by special police units on dangerous tactical assignments, is designed to be lightweight and soft enough to be worn comfortably under law enforcement officers' uniforms or under plain clothes officers' outer garments.

This type of soft or lightweight body armor has been developed to the extent that it quite effectively "defeats" (stops the penetration of) many types of handgun bullets and some rifle bullets. It is the purpose of this report to analyze the characteristics of bullets which are most likely to defeat soft, lightweight body armor. The following section discusses various types of bullets and the purposes for which bullets are designed. The third section discusses recent law enforcement officer fatalities and the related use of soft body armor. The fourth section discusses recent developments in, and characteristics of, soft body armor. The last section presents a brief analysis of bullet characteristics, particularly those that can defeat currently available soft body armor.

SUMMARY

Existing, commercially available soft, lightweight body armor apparently can effectively stop most of the handgun bullets which pose a threat to law enforcement officers today. However, there is a class of handgun and rifle bullets—often called armor- or metal-piercing—that can penetrate such armor. These types of bullets are: generally constructed of steeljacketed lead or hard metal alloys; often pointed in shape rather than being flat, rounded, or hollowpointed; and generally high velocity. Smaller handgun and rifle bullets (for example, .22 caliber) with the above characteristics are generally more effective in penetrating soft body armor than larger bullets (for example, .45 caliber) with the same characteristics.

BULLETS

Types

There are many ways to classify the various types of bullets that have been or are in use.[1] For purposes of this analysis, bullets will be discussed according to the following characteristics:

For use mainly in handguns, rifles, or machine guns, or in more than one type of weapon;

Velocity (low, for example, 730 feet per second, to high, for example, 1800 feet per second);

Caliber (small, for example, .22 caliber, to large for example, .45 caliber);

"Hardness" (soft nosed lead bullet, or partially jacketed, to full metal jacketed (with copper or steel) to hard metal alloy bullet); and

Shape (round or hollow point to pointed nose).

Sometimes bullets are classified according to either their "stopping power"—their ability to knock down or disable a human being—or their "armor- or metal-piercing" ability. These two types of characteristics, however, may be somewhat mutually exclusive. For example, one bullet designed for high "stopping power" is the .357 caliber magnum hollow point bullet. Upon impact, this bullet expands (because of its hollow point) and converts a large percentage of its (high) velocity to kinetic energy within the wounded body—thus knocking down, stopping, or disabling the person. This type of bullet, however, may be effectively stopped by soft body armor without body penetration and hence without wounding, except for "blunt trauma".[2] On the other hand, an armor-piercing bullet which will penetrate soft body armor may, because it is hard and retains its shape, pass through a body with relatively little damage if it does not hit a bone, other hard substance, or vital organ. Obviously, bullet wounding capabilities are not completely predictable because of the exceedingly complex structure of the human body, and even the relatively less devastating bullets can and often do kill. In fact, more law enforcement officers were killed with .38 caliber weapons in, for example, 1978[3] than with any other weapon, mainly because these weapons are in more common use than other, more devastating bullets like the various magnum and armor-piercing bullets.

Purposes

It can be seen from the above discussion that many, if not most, bullet characteristics derive from the purpose or purposes which the ammunition designers had in mind. Thus, expanding bullets particularly hollow point bullets, were designed for the purpose of more effectively transmitting kinetic energy to the wounded body than do ordinary bullets. Protective body armor, including the soft or lightweight variety, has been and is being designed to defeat many types of bullets, including many of the relatively more devastating (high velocity, hollow point) bullets. However, certain types of high velocity bullets made entirely of hard metal alloys, or which are fully covered with steel jackets, can defeat the current available soft body armor. Thus, certain bullets of the armor- or metal-piercing variety, whether or not designated as such by bullet manufacturers, pose a threat to existing body armor which can effectively defeat most "ordinary" bullet threats.

LAW ENFORCEMENT OFFICER FATALITIES

Current statistics

A number of law enforcement officers are killed and wounded each year by handguns, rifles, shotguns, and other weapons. Recent statistics from the Federal Bureau of Investigation (FBI) indicate that this number, while still large, has decreased rather significantly from 1974 and 1975 to 1978. The following table shows statistics for law enforcement officers killed by firearms and other weapons for this period:

LAW ENFORCEMENT OFFICERS KILLED, BY TYPE OF WEAPON

	1974	1975	1976	1977	1978	Total
Handgun	95	93	66	59	66	379

Source: U.S. Department of Justice, Law Enforcement Officers Killed 1978. Washington, U.S., Department of Justice, 1978. p. 12.

In 1978, there reportedly was a consensus of representatives of the soft body armor apparel manufacturers that about 250 law enforcement officers had been protected from death or injury through the use of bulletproof vests over the 1975 through 1978 period.[4] Although such a consensus cannot be confirmed with existing data, it is interesting that the approximately 28 percent decrease in firearm-related deaths indicated in the above table could be accounted for partially by increased use of soft body armor by law enforcement officers.

The following table shows the size of bullets and types of firearms which caused the

[1] There may be as many as 10,000 different bullets that have been manufactured since the development of the bullet cartridge around the time of the U.S. Civil War.

[2] Blunt trauma is injury caused by bullets which do not penetrate armor. It is injury caused by the force of the blow itself, as when a person is hit in the chest by a hard swung baseball bat.

[3] U.S. Department of Justice, Law Enforcement Officers Killed 1978. Washington, U.S. Department of Justice, 1978, p. 13.

deaths of the 91 law enforcement officers in 1978. The handgun bullets shown in that table are all of a class which can be defeated by existing soft body armor unless they are of the hard metal alloy or steel-jacketed, armor-piercing variety. Soft body armor cannot defeat high velocity, metal jacketed armor-piercing rifle bullets either, some of which may be represented in the "rifle" column of the table.

Officer fatalities while wearing armor

In 1978, five law enforcement officers in the United States were killed in the line of duty while wearing soft body armor.[5] In all cases, the officers were apparently killed because they were wounded in places not protected by the soft body armor, as summarized below:

Shot with a .357 magnum bullet "which entered his chest through the side opening of his vest."

Shot with a .380 caliber weapon "three times in the chest, fell to the ground, and was subsequently fatally shot in the head."

Shot with a .357 magnum bullet "in the chest, back, and head."

Shot with a .38 weapon, three of the six shots "entered his side and one his head, inflicting fatal wounds."

Shot with a .38 bullet "when apparently he entered a crouched position and a bullet passed directly into the chest area at a place not protected by the vest."

During another shooting in 1978 in which a police officer was killed.[6]

A second officer on the scene of the shooting was "spared serious harm by his bulletproof vest, suffer[ing] only minor injury."

The remaining 35 officers who received their fatal wounds in the torso in 1978 apparently were not wearing protective vests.

BODY ARMOR

Recent developments

Since at least the early 1970s, there has been considerable interest among law enforcement support agencies in developing effective soft body armor that would be comfortable and unobtrusive enough to be worn continuously by law enforcement officers while on duty. Organizations like the National Institute of Law Enforcement and Criminal Justice (NILECJ) of the Law Enforcement Assistance Administration (LEAA) of the U.S. Department of Justice, and the International Association of Chiefs of Police, have sponsored several studies of soft body armor.[1] Research programs on soft body armor and weapons threats have been administered and carried out by the Law Enforcement Standards Laboratory of the National Bureau of Standards, Department of Commerce; Edgewood Arsenal, Aberdeen Proving Grounds, Department of the Army; the FBI Quantico Test Base; and several private weapons testing laboratories. About 17 or so manufacturers of soft body armor are now producing units commercially for sale to an increasing number of U.S. law enforcement organizations.

Commercially available soft body armor

Most, if not all, soft body armor commercially available today is made of differing numbers of layers of Kevlar, a synthetic (aramid) fiber produced by the Du Pont Company. In addition to the number of layers of Kevlar used, the weaving and other processes used in the production of the final protective vest affects the strength of the product.

In the early 1970s, protective body armor generally was classified as to whether it was made of 7, 12, 16, 24, or other numbers of layers of Kevlar. Currently, manufacturers and police departments often designate certain threats (types of bullets) that the vests are to protect against, regardless of the numbers of layers of Kevlar involved.

The state of the art of protective body armor, which today is largely based upon the use of Kevlar, involves a trade off between the thickness of the protective vest versus the types of bullets which the vest can defeat. Certain commercially available bullets, like .357 caliber magnum hard metal alloy bullets, and some foreign-made nine millimeter steel jacketed bullets, can defeat commercially available soft body armor.

Protection available

A side-by-side comparison of the handgun weapons used to fatally injure law enforcement officers in 1978 (shown above and repeated for convenience here) and handgun bullets required to be defeated by soft body armor in the equipment purchase specifications of a number of U.S. cities indicates that currently available soft body armor apparently can protect against the large majority of bullets threats facing law enforcement officers today.

[2] Includes .22 magnum.

[3] Does not indicate magnum.

While most commonly used bullets apparently can be defeated by existing soft body armor, there is a class of bullets which can defeat it. This subject is discussed in the following paragraphs.

Possible remaining threats

Bullet characteristics

Although a number of bullets can be defeated by currently available soft body armor, a number of threats remain. Most, if not all, types of metal- or armor-piercing bullets will apparently defeat existing soft body armor, whether these bullets are hard, metal alloy bullets, or lead bullets which are steel jacketed. Other types of non-armor- or metal-piercing bullets which might defeat soft body armor are bullets which are small caliber (for example, .22 caliber) or high velocity (particularly magnum) bullets. Bullets which combine these latter two characteristics (small caliber plus high velocity) are more likely to defeat some types of soft body armor (depending upon its thickness and construction) even if these bullets are not of hard metal alloy or steel jacketed construction. Thus, there currently exist several specific bullets, and a class of bullets having certain characteristics, that can, or could be designed to, defeat currently available soft body armor.

Blunt trauma

Even if bullets do not penetrate soft body armor, lethal wounds could be caused by "blunt trauma." This type of wounding effect can be described as being similar to being hit on the body by a hard swung baseball bat. Because this phenomenon currently does not appear to be a major wounding cause, it is not discussed further here. However, it is conceivable that, were higher powered bullets used or developed to defeat soft body armor, blunt trauma effects might be a major cause of concern to body armor researchers, developers, and manufacturers, as well as medical practitioners.

BODY-ARMOR DEFEATING BULLETS: THREAT CHARACTERISTICS

This section describes some bullet characteristics that are important to a consideration of what types of bullets can defeat, or can be designed to defeat, existing soft body armor.

[5] These cases are taken from U.S. Department of Justice. Law Enforcement Officers Killed 1978. Washington, U.S. Department of Justice, 1978. pp. 26, 30, 33, and 49.

[6] Id. at p. 28.

[1] For example, Montanarelli, Nicholas, Clarence E. Hawkins, and Lester D. Snubin. Body Armor: Lightweight Body Armor for Law Enforcement Officers. Washington, U.S. Department of Justice, LEAA, NILECJ, May 1976. p. 113; Goldfarb. Michael A. et al. Body Armor: Medical Assessment. Washington, U.S. Department of Justice, LEAA, NILECJ, May 1976, p. 30; National Institute of Law Enformement and Criminal Justice. NILECJ Standard for the Ballistic Resistance of Policy Body Armor. Washington, U.S. Department of Justice, LEAA, NILECJ, December 1978. p. 10; and International Association of Chiefs of Police. Policy Armor Testing and Summary of Performance Testing Data. Gaithersburg, Maryland, International Association of Chiefs of Police, December 1978. p. 23.

Velocity

Handgun bullets typically range in muzzle velocities from about 730 feet per second (fps) (low velocity) to over 1,800 fps (high velocity), depending upon the powder charge of the cartridge and the length of the handgun barrel. Eleven hundred fps (roughly the speed of sound in air) may be a convenient point to differentiate between low and high velocity bullets, although it is unlikely that a consensus could be obtained that significantly different wounding effects occur above and below this velocity for a given type of bullet.

It is clear, however, that high velocity bullets are more likely to defeat soft body armor than low velocity bullets, all other characteristics remaining constant.

Caliber and weight

Caliber measures the diameter of bullets, that is, a .45 caliber bullet has a diameter of .45 inch. Caliber is thus a measure of size. A .45 caliber bullet is considerably larger than a .22 caliber bullet. The most common police bullet, and the most common bullet causing police fatalities, is the .38 caliber, intermediate in size between the .22 caliber and the .45 caliber.

Weights of bullets are measured in grains. The larger the caliber, the more a bullet weighs, given a constant shape.

The smaller caliber bullets, for example, the .22 caliber, are more likely to penetrate the commercially available body armor than larger caliber bullets, other bullet characteristics remaining constant.

Shape and hardness

Bullets are produced in several shapes—including round or ball nosed, flat-nosed, pointed, and hollow pointed. Round, flat-nosed (some of which are called wadcutters or semi-wadcutters), and hollow point bullets are often constructed as lead or semi-jacketed bullets which expand upon contact. The hollow point bullets are generally the most effective of these "expanding" bullets. Pointed bullets generally are constructed of lead with metal jackets, which are usually copper. If such bullets are jacketed with steel, they generally have armor- or metal-piercing capabilities. Another class of bullets is constructed of hard metal alloys and are also armor- or metal-piercing bullets.

Thus, the harder and more pointed a bullet is, the more likely it is to penetrate commercially available body armor, other bullet characteristics remaining constant.

Summary of bullet threat characteristics

Given the characteristics of the most successful, currently available soft body armor, bullet threat characteristics can be summarized in the following way:

Bullet characteristics	Lowest level of threat	Highest level of threat
Velocity	Low velocity	High velocity.
Caliber weight	Large caliber heavy	Small caliber, light.
Shape	Round or flat nose, hollow point.	Pointed.
"Hardness"	Lead, or copper semi-jacketed lead.	Full steel jacketed lead, or hard metal alloy bullet.

Thus, the bullet type with the highest probability of penetrating soft body armor, and with a proven capability of penetrating many layers of existing soft body armor, is a high velocity, small caliber, pointed, steel jacketed lead or metal alloy bullet. Such bullets may be handgun bullets, rifle bullets, or bullets which can be used in either handguns or rifles.

Possible ramifications of "perfect" body armor

Commerically available soft body armor is not perfect, that is, it can be defeated by certain bullets of the hard metal alloy or steel-jacketed armor- or metal-piercing types. Assuming that "perfect" body armor could be developed to meet current threat conditions, there is at least one positive and one negative ramification of such a development:

Possible positive ramification

Decreased wounding and death of law enforcement officers under current conditions, that is, continued use by criminals of existing types of bullets which, to a considerable extent, can be defeated by existing soft, light-weight body armor.

Possible negative ramifications

An "arms and ammunition race" by the criminal segment of society for even more powerful bullets and other weapons to defeat existing armor. This possible negative ramification could be precluded to some extent by controlling, by law and enforcement, the manufacture, distribution, sale, and international trade of all bullets of the armor- or metal-piercing type.

Mr. ROYBAL. Mr. Chairman, I yield 1 minute to the gentleman from Kansas (Mr. GLICKMAN).

Mr. GLICKMAN. Mr. Chairman, as the chairman knows, during consideration of the Treasury-Postal Service appropriations bills for the last 2 fiscal years, I have offered amendments aimed at blocking the use of funds for special third-class bulk rate mailing rates for political party use. And I have indicated my intention to offer an amendment to achieve that purpose during consideration of this bill. However, Mr. Chairman, one of the issues at question during the budget reconciliation conference relating to the Postal Service is the level of subsidy to be available to nonprofit third-class bulk mailers. Both in light of that bill and the fact that the funding included in the appropriations bill you have brought before us is down considerably from last year, it seems evident that the subsidy that will be available to political parties for these mailings will be significantly reduced beginning October 1. Is that not correct?

Mr. ROYBAL. You are correct. Given the funds included in this bill, the rate that must be paid by the user will increase in 1982. That could reduce the amount of subsidy paid from the Treasury for these mailings.

Mr. GLICKMAN. Quite frankly, Mr. Chairman, I am concerned not only about the use of the subsidy by our political parties, but also about the use of that subsidy by a whole range of groups who, though they technically meet the legislated definition of nonprofit mailer, are not what most Americans would expect. They are not the American Cancer Society, the Heart Fund, and the Salvation Army; instead, we are seeing this subsidy used by groups with entirely different motives, in many instances, political motives. I, myself, have received mailings from Howard Jarvis, the father of Proposition 13, and from William Simon, the former Treasury Secretary. They were arguing for "causes," not trying to help out some charitable organizations. This troubles me. After all, particularly at a time when we are having to cut back on the funds available for postal subsidies by way of the revenue foregone appropriation, too many groups being eligible means, in effect, that the amount of subsidy we are able to give to those charitable organizations is lessened.

Mr. Chairman, I understand that the information as to what organizations are using the subsidy for nonprofit third-class bulk rate mailers is scattered around the country. I personally feel that the Congress needs to take a careful look at this entire question, and I would appreciate your cooperation, as chairman of the Treasury-Postal Service Appropriations Subcommittee, in requesting the Postal Service to provide the Congress information summarizing what organizations have been determined to be eligible for the third-class nonprofit bulk rate, to what extent that have used the subsidized rate, and what their use of the subsidy has cost. In the summary of organizations, I think it would be helpful to know under what classification the various groups have qualified for the nonprofit rate.

Mr. ROYBAL. I appreciate the gentleman's concerns and would be happy to ask the Postal Service to provide that information to the gentleman from Kansas, to the subcommittee, and to the Post Office and Civil Service Committee of the House which has jurisdiction over legislation governing eligibility for these rates.

Mr. GLICKMAN. I thank the chairman for willingness to cooperate in my request, and, in the interest of seeking a more comprehensive answer to the question of what groups should benefit from Government postal subsidies, I have decided not to offer my amendment today.

Mr. ROYBAL. Mr. Chairman, I yield 1 minute to the gentleman from Michigan (Mr. FORD).

Mr. FORD of Michigan. Mr. Chairman, I rise in support of the bill. I want to compliment the chairman and his committee for a very fine job.

Mr. Chairman, I rise to clarify what I presume to be the House's intent with regard to the fiscal year 1982 Postal Service appropriation contained in this bill, H.R. 4121.

The conference agreement which the House has reached with the Senate concerning the fiscal year 1982 authorization for Postal Service appropriations sets a level of $946 million, to be distributed in the following way: $250 million for the public service appropriation; $696 million for revenue

forgone; and zero for the transitional appropriation.

H.R. 4121, in its present form, reflects the allocation for the Postal Service contained in the first concurrent resolution on the budget: $869 million. That allocation will be superceded by the conference agreement authorization of $946 million as soon as the conference agreement is adopted.

If the $869 million figure were to remain in the final Fiscal Year 1982 Appropriations Act, it would be distributed in the following manner pursuant to the reconciliation bill's authorizations; $250 million for the public service appropriation: $619 million for revenue forgone; and zero for the transitional appropriation. Providing this low level of funding for revenue forgone will result in severe postal rate increases for libraries, nonprofit organizations, rural newspapers, and other already hard-pressed groups. However, when—as it should be and as I presume it will be—the final fiscal year 1982 Postal Service appropriation is later adjusted to $946 million to reflect the conference agreement, the severity of these rate increases will be mitigated.

I support the Postal Service section of H.R. 4121 with the explicit understanding that the ultimate fiscal year 1982 appropriation will reflect the agreement of the House and Senate conferees on reconciliation: $946 million.

● Mr. GOLDWATER, Mr. Chairman, I rise in general support of H.R. 4121, the Treasury, Postal Service, and General Government appropriations for fiscal year 1982.

Insofar as title I is concerned, I am in general support of most provisions. I am particularly glad to see the Customs Service budget for next year. Although I understand administration reservations about personnel floors in general, given the need to reduce Federal employment rolls, I am personally glad to see that these important Customs Service jobs will be retained next year. These inspectors are an important "first line" defense against the growing influx of controlled substances and unwanted pests, such as the Mediterranean fruit fly which we have all been hearing so much about.

Additionally, I am pleased to see the overtime cap increased from $20,000 to $25,000 annually. This is an important improvement, as it hasn't been changed in some years.

Customs agents perform heroic service and bring in far, far more in revenue each year then we pay out to run the Service. Anything we can do for these folks is money well spent. Now, if we can get a Commissioner of Customs named, Customs will be set.

I do, though, have a real problem with the increase for IRS with most of that increase going to enforcement and auditing. My problem stems from the fact that the American people—rightly or wrongly—have a very bad impression of the IRS and its enforcement methods. I know I am not unusual in that I have received numerous letters over the years outlining complaints against IRS enforcement methods. These complaints include everything from being given erroneous information, to tagging files for yearly audits, to outright and unnecessary rudeness and aggressiveness and threats. Common to these complaints is an ongoing theme that IRS made the taxpayer feel like a criminal—even when the taxpayer was in the right. There is a growing perception of IRS agents as virtual jackbooted brownshirts, and the average taxpayer has a real problem accepting the idea that they are guilty before proven innocent. The average taxpayer simply does not understand the subtleties in the law which seems to allow the IRS to work outside the safeguards of the due process clause.

The problem, of course, is that individual Members of Congress cannot check out individual complaints without asking the taxpayer for power of attorney. For many reasons that is neither possible nor desirable. The result is it is difficult to render an informed judgment about particular complaints. However, there is no reason we cannot render a judgment about public perception, and in this area, the IRS stands condemned. I do not believe there is a place in a free society for a Government agency to even be perceived as a gestapo-type operation. I believe this sort of perception is reason enough for congressional action, and in my judgment, it is inappropriate to increase the power of this agency until Congress addresses the issue of exactly how IRS conducts its business.

What the committee so delicately calls "taxpayer noncompliance" is enough to make the average taxpayer break out in a cold sweat—and believe me, he or she does not have to have larceny in their heart to have this sort of reaction.

Congress gave IRS substantial power and it is about time the Congress did something about overseeing and placing some checks on the use of that power. Until we exercise our oversight responsibility, let us at least slow down the growth in personnel.

Regarding title II, the U.S. Postal Service, I am deeply concerned, and I believe the taxpayers are too, by the large appropriation of $869,240,000 to subsidize the Postal Service. Although I realize this is a decrease of roughly $450 million below fiscal year 1981, an almost $1 billion subsidy—to defray the cost of non-cost-effective post offices and to subsidize certain classes of reduced or free mailing rates—is outrageous.

There is no sound reason why we must continually drain the taxpayers' pockets, especially since there is a viable alternative. I have proposed a way whereby Congress can eliminate such subsidies to the Postal Service and lower postage rates while maintaining adequate revenue. My proposal, which would allow advertising on postage stamps, could generate over $1 billion annually—easily enough to offset this coming fiscal year's subsidy.

Mr. Chairman, the costs for the privilege of mailing a letter are getting out of hand. Postage rates have skyrocketed in price by over 500 percent since 1960, and the Board of Governors has recently requested a second review of the 18-cent first-class stamp in the hopes of raising the cost to 20 cents. Even with such price increases, the Postal Service has not shown a surplus since World War II, and last year, had a $306 million deficit.

Beset with financial woes no private corporation could withstand, the Postal Service then decides it can give billions more of the taxpayers' money to its workers. A recent agreement between the Postal Service and the postal unions has granted a new 3-year contract granting almost $5 billion in wage and fringe benefits for postal workers, including an uncapped cost-of-living-adjustment provision tied to the inflation rate. This means that a postal worker could earn over $25,000 just 2 years from now. The tenative agreement even provides a $150 cash bonus to each postal worker if the contract is ratified within 45 days. That provision alone will cost the American taxpayer $85 million.

Of course, all this means the taxpayer will almost certainly be subjected to still more rate increases.

I am pleased, Mr. Chairman, that the fiscal year 1982 appropriations for this bill is $98.9 million under the President's request, and I therefore commend my colleagues from California and Ohio on their work.●

● Mr. FRENZEL. Mr. Chairman, this marks the first time in 3 years that the House has not debated an amendment to prohibit our political party committees from utilizing the subsidized mail rate of 3.6 cents. Each previous year, the amendment has been soundly defeated and I believe it would have been this time too.

I want to take a moment, Mr. Chairman, to put this issue in perspective. There are nine categories of groups eligible to utilize the lower mail rate. They are: religious organizations, educational, philanthropic, agriculture, labor unions, veterans, fraternal, and qualified political committees. Currently, there are approximately 300,000 permit holders. The party committees have about 130 of those permits.

I do not believe it is at all unreasonable to grant our party committees the same advantages as we have granted the National Right To Work Legal Defense Foundation, Inc., the Moral Majority, Committee for the Survival of a Free Congress, Ralph Nadar's Public Citizen, American Tax Reduction Movement, National Taxpayers Legal Fund, Inc., National Coalition To Ban Handguns, Zero Population Growth, Ford Foundation, PTA's, Common Cause, State Agriculture Extension groups, all the labor unions, and college fraternities and sororities.

Mr. Chairman, for the last decade, editorial writers, academicians, election law specialists, leaders of our parties, Democrats and Republicans have been distressed over the weakening of our two-party system. When the Congress passed the legislations allowing party committees access to the lower mail rate, we took a small step to slow down the decline of our parties. I am pleased that the amendment to deny our political parties the right to compete fairly with other special interest political groups will not be offered this year.●

● Mr. STARK. Mr. Chairman, I rise in opposition to this amendment. This is a flagrant attempt by the Reagan administration to cater to those who oppose gun control. The NRA continues to lobby against the Bureau of Alcohol, Tobacco and Firearms. But at issue here is not gun control; it is crime control. We are discussing the possibility of inadequate staffing of two of our most vital Federal law enforcement and revenue collection agencies—the BATF and the Customs Service. I strongly object to this sneaky attempt to cripple them at a time of increasing need for law enforcement.

Criminal misuse of explosives and firearms is reported daily by the news media across the country. Reductions in personnel in BATF, the agency responsible for investigating criminal activities involving firearms, may result in losses in life, property, and revenue, the cost of which may be far higher than any savings from the proposed reductions. We must provide the Bureau with as many law enforcement personnel as needed to function at current levels. To do less would imperil its mission.

Customs is a revenue-producing agency. Every dollar spent for enforcement of our customs laws returns $18 to the U.S. Treasury.

Customs has an essentially uncontrollable workload. International trade and travel continue to grow, and the Customs Service must cope with this rising workload.

A cut may mean short-term savings—but long-term costlier effects. There is invariably social cost for reduced enforcement, especially in a reduction in customs' efforts to stem the tide of drugs being smuggled into this country. The short-term savings quickly bound back as long-term costs in other parts of the Federal, State, or local government budgets.

There is growing concern over the rise in violent crime in this country. Congress should see that levels of employment in law enforcement agencies are maintained.

This amendment would permit reductions in personnel. While it is recognized that there is extreme pressure on Congress to reduce spending, these cuts should be rejected. It would cripple the ability of these law enforcement and revenue-collecting agencies to control crime and maintain compliance with our Nation's revenue collection system.●

Mr. MILLER of Ohio. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. ROYBAL. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The Clerk will read.

PARLIAMENTARY INQUIRY

Mr. DANNEMEYER. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. DANNEMEYER. Mr. Chairman, I have a point of order that I would like to assert at page 22, the paragraph beginning there. My question is: At what point would it be appropriate to raise the point of order?

The CHAIRMAN. The Chair will advise the gentleman that it would be appropriate to raise a point of order at the time the Clerk reads that paragraph.

Mr. DANNEMEYER. I thank the Chairman.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

BUREAU OF ALCOHOL, TOBACCO AND FIREARMS

SALARIES AND EXPENSES

For necessary expenses of the Bureau of Alcohol, Tobacco and Firearms, including purchase (not to exceed three hundred for replacement only, for police-type use) and hire of passenger motor vehicles; hire of aircraft; and services of expert witnesses at such rates as may be determined by the Director; $155,591,000: *Provided,* That no funds appropriated herein shall be available for administrative expenses in connection with consolidating or centralizing within the Department of the Treasury the records of receipt and disposition of firearms maintained by Federal firearms licensees or for issuing or carrying out any provisions of the proposed rules of the Department of the Treasury, Bureau of Alcohol, Tobacco and Firearms, on Firearms Regulations, as published in the Federal Register, volume 43, number 55, of March 21, 1978: *Provided further,* That none of the funds made available by this Act shall be available for administrative expenses in connection with effecting the reduction of employment in the Bureau of Alcohol, Tobacco and Firearms below the level on April 30, 1981: *Provided further,* That none of the funds appropriated herein shall be available for explosive identification or detection tagging research, development, or implementation: *Provided further,* That not to exceed $300,000 shall be available for research and development of an explosives identification and detection device.

□ 1630

AMENDMENT OFFERED BY MR. LATTA

Mr. LATTA. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LATTA: On page 3, line 23, strike "$155,591,000" and insert in lieu "$150,591,000".

Further, on page 4, lines 7-11, strike the words beginning with "Provided further" and ending with "1981."

Mr. LATTA. Mr. Chairman, I rise to offer a two-part amendment to reduce the budget of the Bureau of Alcohol, Tobacco and Firearms to the President's request and remove the mandated employment level from the bill.

On page 3, line 23, strike out "$155,591,000", and insert in lieu thereof "$150,591,000".

On page 4, line 7, strike: *"Provided further,* That none of the funds made available by this Act shall be available for administrative expenses in connection with the affecting the reduction of employment in the Bureau of Alcohol, Tobacco and Firearms below the level on April 30, 1981.".

Mr. Chairman, it seems clear from the testimony of many groups and individuals that there is no need to add this amendment to the BATF, which is $5 million above that which the President requested. The administration has carefully reviewed the programs of this agency. Certain programs have been reduced and emphasis shifted from lower priority activities to those of the higher payoff. Nowhere has anybody found any evidence that an added $5 million for BATF is needed or will produce any significant added gains in the fight against violent crime.

In the absence of any compelling argument to the contrary, I believe that the administration's judgment on the funds needed for BATF to function effectively should be sustained.

The second part of the amendment is to remove the mandated, and I stress that, mandated employment floor from the Bureau's budget. I believe this amendment is worthy even if the BATF amount is not even reduced.

Mandatory minimum employment levels are bad per se in any case. Such restrictions make it impossible to meet the President's goal of restraining the size of the Federal Government. But here we find in this bill a mandated employment level as of April 30, 1981. These restrictions strike at the heart of the distinction between the executive and legislative branches.

Since the administration has carefully reviewed the program and reduced or eliminated low-priority programs and instituted management effi-

ciencies, they must have the flexibility to carry out these changes. They cannot do so if their hands are tied with an artificial, and I stress that, artificial constraint which bears little relation to the agency's real needs.

Therefore, Mr. Chairman, I urge adoption of this amendment.

Mr. ADDABBO. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

Mr. Chairman, to my colleague from Ohio, and I respect him fully, and as the coauthor of the Latta-Gramm amendment, I would imagine he would have to support the administration's lower figure in this instance but I think this is one of the wrong places to make a reduction or to try to make savings.

The gentleman from Ohio said that BATF has done nothing, whereas if we review their action over the past 18 months, they have recommended over 2,000 cases for investigation. They have recommended actually over 3,000 defendants for presecution and 79 percent of those have been accepted for prosecution. They have obtained a 90-percent conviction rate, 67 percent with prior criminal records and 45 percent convicted felons.

Of all these cases 25 percent of them involve narcotics traffickers; 9.2 percent, organized crime figures; 19 percent, international traffickers; 10 percent, outlaw motocycle gangs and hate groups; 43 percent, interstate firearms trafficking; 31 percent, gangster style weapons; and only a small percentage were gun collectors.

Mr. Chairman, ATF is our only mainline fighter against the creeping cancer of arson throughout this country. We are trying to protect our Nation and the only way we can do it is through this type of law enforcement. This is a law enforcement arm of our Government which is needed.

If we are going to win the battle against violence, violence in our cities, violence in our Nation, we must have a force such as this.

A reduction will be a violation of our promise to our people to cut down violence in the streets.

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. ADDABBO. I yield to the gentleman from Illinois.

Mr. McCLORY. I thank the gentleman for yielding and I want to concur with the statements made by my colleague from New York and express my opposition to the amendment offered by the gentleman from Ohio.

In doing so, and wishing to support the committee's position, I want to emphasize that all that we are doing here is maintaining the Bureau of Alcohol, Tobacco and Firearms at its present level and it is important with regard to the proliferation of firearms that they should maintain the numbers that they have, and likewise, as the gentleman states, the crime of arson is the fastest growing crime in this country and if we want to respect the announcements of the Attorney General, we will want to provide this kind of Federal action, this kind of Federal involvement in the fight against crime, and I am hopeful that we will have an overwhelming rejection of this amendment.

Mr. LATTA. Mr. Chairman, will the gentleman yield?

Mr. ADDABBO. I yield to the gentleman from Ohio.

Mr. LATTA. I thank the gentleman for yielding.

I think at the outset of the gentleman's statement the gentleman mentioned that I said they had done nothing. I did not make such a statement. The gentleman must have misunderstood me.

Mr. ADDABBO. I will strike that.

Mr. LATTA. Let me say to my friend from New York that what we are proposing to do is to reduce the amount that the gentleman put in this bill to what the administration requested. That is all we are asking. And the administration supports the amendment, particularly the Department of Treasury, it is their amendment. They do not need the money. They say so. They do not need the money. But the gentleman is saying give them the money anyway.

Now where is the testimony that they need $5 million more and thaw out the freeze, get that, freeze the employment levels as of April 30, 1981?

Now the administration says you should not do that. We should not freeze in employees when we are looking for ways to reduce this bureaucracy. That is what we are trying to do. Here the gentleman is trying to put in language that says we have got to keep x number of employees as of April 30, 1981.

Mr. ADDABBO. I reclaim my time, Mr. Chairman.

The gentleman from Ohio (Mr. LATTA) knows that what we are doing here with the $5 million is just maintaining presents levels. I would not expect any representative of the administration to come before our committee and not support their budget. They would not be there unless they were supporting that budget. They would not be there unless they were supporting the administration, and this is one of the cuts recommended by the administration in law enforcement. This is not just bureaucracy, this is law enforcement.

□ 1640

The administration seeks to cut back on the level of law enforcement.

Mr. McCLORY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Ohio.

Mr. Chairman, recent events should impress upon us the need to maintain our firearms efforts at current levels. Frankly, a strengthening of those efforts would be more appropriate. However, in recognition of our fiscal responsibilities, I realize that the Bureau of Alcohol, Tobacco and Firearms must, "bite the bullet," just as other Federal agencies have been forced to do.

Let us examine precisely what personnel cuts would be mandated by this amendment. To begin with, 70 positions will be lost in the alcohol and tobacco areas, which would eradicate enforcement of the Cigarette Bootlegging Act that this Congress enacted in 1978.

Even more disturbing are the cuts which would come in the firearms and explosives areas, despite urgent need for strong enforcement efforts. Fifty-nine positions would be lost in firearms regulatory efforts alone—a 68-percent decrease. This important division of the BATF has the crucial responsibility of examining almost 200,000 applications that are received each year for licenses and renewals. This insures that persons licensed to deal in, manufacture, and import firearms are not "prohibited persons," such as drug addicts and convicted felons.

In addition, this division performs inspections of licensees to encourage and insure compliance with record-keeping requirements. This is the backbone of the tracing system that proved so valuable last March 31 when President Reagan was shot. At that time, a trace was accomplished in 16 minutes. Unfortunately, the cuts proposed in this amendment would make similar successes in the future much less likely because BATF will be forced to concentrate its inspection on large volume and poor compliance licenses. As the committee's report points out, the greatest offenders, low-volume dealers such as pawnbrokers, would be ignored with this shift in priorities.

The unkindest cut of all, Mr. Chairman—96 positions—would come in the explosives area, which is responsible for the highly successful arson program. Property losses from arson each year are staggering and the damage to life and limb is incalculable. By dismantling this program, we are sending a strong signal to those who would engage in arson for profit that the Congress does not care about the incredible danger they pose to life and property.

Mr. Chairman, the BATF is one of the primary participants in the war against violent crime in this country. As recent polls indicate, that problem is one of the utmost concerns of our

citizens. Let us make clear our intention to fight violent crime with every available weapon by rejecting the amendment which would cut 229 personnel positions from the BATF.

Mr. ADDABBO. Mr. Chairman, will the gentleman yield?

Mr. McCLORY. I yield to the gentleman from New York.

Mr. ADDABBO. Mr. Chairman, I thank the gentleman for yielding. I also wish to point out, besides being a law enforcement agency, this is also a tax-collecting agency. For every dollar we spend we actually get back almost $4 to $5 in excise taxes which they help us to collect. If we reduce them, we lose revenue and are being penny-wise and dollar-foolish.

Mr. McCLORY. The gentleman is entirely right. Of course, the bootlegging of cigarettes is another area that is enforced by the Bureau of Alcohol, Tobacco and Firearms. Without retaining personnel at current levels, we would not be able to control the bootlegging of cigarettes to the extent that we are able to control it now.

Mr. LATTA. Mr. Chairman, will the gentleman yield?

Mr. McCLORY. I yield to the gentleman from Ohio.

Mr. LATTA. Well, is the gentleman in the well aware of the fact that the Senate bill provides $6.7 million less than what was reported by this committee, and it is even $1.7 million less than my amendment? So, the U.S. Senate has taken a position of less money than is being proposed here.

Mr. McCLORY. I was not aware of that until recently. I hope, nevertheless, that the House will adopt the figure recommended by the Appropriations Committee and that the conferees will subsequently maintain the House position

Mr. ROYBAL. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, this is a very important agency, and one that is both a revenue-collecting agency and also a law enforcement agency. Its criminal jurisdiction is one the cutting edge of the assault on violent crime involving the use of explosives as well as the criminal use of firearms. One of the things that concerns the committee more than anything else is the fact that there is an epidemic proportion reached insofar as drugs are concerned in the United States. This agency is directly involved in doing something about that particular problem.

The question was asked a little while ago about the number of personnel; why is it that we increase the appropriation? Well, had we adopted the recommendation, it would have been necessary for the agency to reduce its personnel by 229 officers. This means that that agency would have been weakened. It also means that less revenue would be collected into the Treasury of the United States. But above all, it means that crime itself would continue to go rampant in this Nation.

I do not mean to imply that 229 men will make that much difference, but what I do want to say is that, being a law enforcement agency, one that is fighting crime in the United States, now is not the time to make reduction. Now is the time to increase it if possible. In this instance we are not increasing the personnel. What we are doing is leaving it the same as it was on April 30, 1981. So, the personnel level is not being increased. The strength is the same. It is not possible for the committee to be agreeing that such a reduction be made in view of the fact that the need is so great.

Mr. MILLER of Ohio. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr Chairman, members of the committee, we hear about a reduction. Let us look at what we are talking about. The amount in the bill is $155,591,000. The gentleman from Ohio is attempting to reduce that $5 million. Now, that $155,591,000 is $5,741,000 over last year. What we would be doing is still increasing $741,000. We would not be reducing. So that $741,000 is still available over and above last year.

I think we should point that out, that we would not be reducing, not even going down to last year level.

Mr LATTA. Mr. Chairman, will the gentleman yield?

Mr. MILLER of Ohio. I yield to my colleague from Ohio.

Mr. LATTA. Mr. Chairman, I think we ought to take a look at the record. You know, we have heard something about law enforcement here, the record of arrests of this group.

Information given to me indicates that the BATF Firearms Criminal Enforcement Agency makes appreciably less than one-one arrest per agent per year. On the average, 18 months between arrests. Agency funding for criminal enforcement in this area works out to approximately $60,000 per arrest made in agency cost alone. That is considerably above State and local prosecution costs of approximately $5,000. And yet, we are saying that if we cut this agency $5 million the heavens are going to fall down when they make one arrest a year. Who are we trying to kid? Given the BATF's own productivity figures, at any given moment during fiscal year 1980 only 79 firearms agents out of a 1,463-man work force were actually working on cases that would end in arrest.

My friends, I think we ought to take a look at the costs of making one arrest. They ought to be able to do better than that. They come before this Congress and say, "My, look what we are doing. We need more manpower. We are working ourselves to the bone. We are making a lot of arrests."

But, when they have a record like that, it indicates that someplace there is someting wrong, and when you come in here and say that we need $5 million over and above what the President of the United States says you need, there is something wrong with that when you have no testimony before the committee to indicate the need other than the fact that you want to freeze, you want to freeze these bureaucrats in place as of April 30, 1981, so you need $5 million so you cannot get rid of them.

I do not think that is paying much attention to the needs of taxpayers. In the next couple of days we are going to hear more about the taxpayers' needs. We are going to do something about them, so if we cannot do something about an agency where we only have one arrest per agent in a year, I think we are falling down in our responsibility.

Mr. ADDABBO. Mr. Chairman, will the gentleman yield?

Mr. MILLER of Ohio. I yield

Mr. ADDABBO. Those are astonishing figures except that we must take into consideration one thing, that every individual in this Department is not a law enforcement person.

□ 1650

This is also a local excise tax division. Ninety-seven percent of their cases are investigative cases which they turn over to the Justice Department for arrest and prosecution; so, therefore, if they are making that 1 percent, they are doing a great job in law enforcement.

Mr. ASHBROOK. Mr. Chairman, will the gentleman yield?

Mr. MILLER of Ohio. I yield to the gentleman from Ohio.

Mr. ASHBROOK. Mr. Chairman, I thank my colleague for yielding.

I certainly rise in strong support of the very fine amendment offered by my colleague, the gentleman from Ohio (Mr. LATTA).

I think the Reagan administration's figure was at least adequate and may be a little more than BATF deserves. I certainly hope that we will support the gentleman's amendment.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. MILLER) has expired.

(On request of Mr. PETRI, and by unanimous consent, Mr. MILLER of Ohio was allowed to proceed for 3 additional minutes.)

Mr. PETRI. Mr. Chairman, will the gentleman yield?

Mr. MILLER. of Ohio. I yield to the gentleman from Wisconsin.

Mr. PETRI. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Ohio (Mr. LATTA).

It seems to me that the gentleman's amendment makes good sense. The $5 million the gentleman's amendments seeks to strike is money which was added without any justification to the money requested by the Treasury Department.

Treasury officials came to Congress last spring and they told us of the budget amount they needed to fulfill their law enforcement priorities and needs.

They did not ask for this additional money for the BATF, and I see no good reason why we should add on to the administration's budget request.

I urge my colleagues to support the gentleman's amendment and I commend my colleague from Ohio for his continuing diligence in the cause of fiscal austerity.

Mr. HUGHES. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the provisions of H.R. 4121 which relate to the appropriations for the Bureau of Alcohol, Tobacco and Firearms. The Subcommittee on Crime, which I chair, has oversight responsibilities for BATF with respect to the implementation of the Gun Control Act of 1968 and related measures. As part of the subcommittee's oversight responsibilities, the subcommittee held hearings on the law enforcement activities of the Bureau of Alcohol, Tobacco and Firearms. My strongly held conclusion is that the Appropriations Committee is totally justified in exceeding the recommended level of expenditure with respect to this important law enforcement function.

The Reagan administration proposals of a funding level of $150 million is seriously deficient. The Reagan budget request of some $150 million assumes a reduction in force of 22 persons in 1981 and 81 persons in 1982 in the area of regulatory enforcement of the firearms laws. The Reagan budget also assumes that some 37 people in 1981 and some 133 people in 1982 would be eliminated from the BATF arson program.

The Appropriations Committee under the wise and able leadership of subcommittee Chairman ROYBAL and my distinguished colleague CLARENCE MILLER reversed the suggested budget cuts.

Crime—America's plague—is the dominant psychic concern of most Americans. These concerns are legitimate. To address these concerns we must, however, be responsive and responsible. One of the clearest Federal responsibilities is to provide sufficient funds for the operation of Federal law enforcement agencies. In this regard it is appropriate for us to recognize that the primary law enforcement activities aimed at violent crime at the Federal level are the operations of the Drug Enforcement Administration, the FBI and Bureau of Alcohol, Tobacco and Firearms.

Despite some rhetorical flourishes, however, the current administration has chosen to cut the budget in the area of law enforcement. This direction must be reversed. Cuts to law enforcement budgets are penny wise and pound foolish.

The growing rate of gun abuse in the United States alone is sufficient reason to enhance our abilities at combating gun-related offenses. In the past year, 92 percent of the BATF enforcement efforts were directed at violent crime. BATF alone was responsible for some 2,300 recommended prosecutions. Yet the current administration seeks to cut $9.5 million or 16.5 percent from the budget of the one Federal agency which can assist State and local law enforcement officials in solving gun-related crimes. It is sadly ironic that almost the very day that President Reagan was the target of an assailant's bullet his administration was proposing budget cuts which would have gutted the ability of the Federal Government to trace the sources of a weapon used in that and similar crimes.

For example, the weapon used in the attempted assassination of our President was traced by BATF, without the benefit of computer technology, within 16 minutes of the shooting. This tracing capability is based on the existence of a recordkeeping program required under the current law. Under the initial Reagan administration proposals the budget cuts to BATF would have reduced the compliance checks on gun dealers so as to effectively eliminate the ability to perform these traces.

The second major area targeted for extinction under the Reagan budget figures was the BATF arson program. This proposed cut was even more poorly conceived than the others. First, the BATF arson program has won the support of State and local law enforcement officials. It is supported by the business community, especially the insurance industry. There have been no complaints about the program, only praise.

BATF, under the able leadership of Bob Dickerson, has implemented a national response team strategy for arson cases. This approach which focuses Federal expertise in particularly complex cases has produced phenomenal results. On a national average only 3 to 9 percent of the arson cases are solved. The BATF national response teams have an arson solution rate of 69 percent. The BATF arson program has also been primarily responsible for saving nearly $54 million in false insurance claims.

Thus, it seems to me that the budget cuts of the current administration are headed in the wrong direction. We need to be spending more money on law enforcement—not less. We should be sending positive signals to members of the law enforcement community. We should let law enforcement know that reinforcements are on the way. The proposed Reagan budget for BATF and law enforcement agencies in general is woefully inadequate. This year alone, for example, the administration suggested cutting the task force operations of the DEA, a proven and effective program. It is this kind of callous insensitivity to the concerns Americans have about their Government's ability to respond to social problems which brings Government into disrepute.

In closing, I wish to commend the fine work of my distinguished colleague on the relevant Appropriations Subcommittee, Chairman ROYBAL and ranking minority member CLARENCE MILLER. Their work in this area of vital concern to the law enforcement community is consistent with the need to prevent and detect criminal conduct, and at the same time their bill responds to the demands of efficiency and accountability which these times of austerity demand.

The CHAIRMAN. The time of the gentleman from New Jersey (Mr. HUGHES) has expired.

(By unanimous consent, Mr. HUGHES was allowed to proceed for 3 additional minutes.)

Mr. HUGHES. Mr. Chairman, I hope the Members reject this amendment.

Mr. Chairman, let me just say in closing that task force operations of both DEA and BATF, the Bureau of Alcohol, Tobacco and Firearms, are the most successful programs in the country. Most communities do not have the capability of providing the indepth arson type of investigations that BATF has developed and has expertise in.

Their handgun tracing capability is extremely important to law enforcement agencies. They have 50,000 to 60,000 requests a year. We do not have right now sufficient personnel in BATF to get around to the gun dealers—there are some 160,000 of them—once in 10 years, and here we are cutting back once again in a program that relies on good recordkeeping. That just does not make sense.

Mr. LATTA. Mr. Chairman, will the gentleman yield?

Mr. HUGHES. I am happy to yield to my friend, the gentleman from Ohio.

Mr. LATTA. Mr. Chairman, I was a little bit amazed at the statement the gentleman made that this is the most effective law enforcement agency in the country. Is that what the gentleman said?

Mr. HUGHES. Mr. Chairman, my statement was that the task force operations of BATF and DEA are among the most successful task force oper-

ations in the country. I think if the gentleman will check the record, he will find that is what I said.

Mr. LATTA. But their record of arrests, as I pointed out earlier, is less that one per agent per year. That is not too impressive.

Mr. HUGHES. Mr. Chairman, I say to the gentleman that if he wants to reduce it to the number of arrests, even with the FBI, he will come up with a very unimpressive record. They are involved in laboratory work and in other types of operations, and we cannot reduce it to just arrests. We cannot have it both ways. We cannot say to the States: "We will send our problems back to you, but we are not going to help solve the problems." that is what we are doing.

BATF is one of the most successful agencies in arson-related investigations. I say to my colleague, the gentleman from Ohio, that if he will check with any law enforcement agency, they will tell him the same thing.

Mr. SAWYER. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I currently serve on the Subcommittee on Crime as the ranking Republican member along with the gentleman from New Jersey, the chairman of the subcommittee, who just spoke. We conducted rather extensive oversight hearings on the BATF and its budget. Based on the testimony we heard, I second what the gentleman from New Jersey (Mr. HUGHES) said: "They are perhaps the most effective in their arson operations of virtually any law enforcement agency."

Let us bear in mind that the discussion involving the number of arrests is a lot of hocus-pocus.

□ 1700

The BATF works in conjunction with State operations because arson is basically a State crime. It has jurisdiction over arson when certain explosives are used. Arson assumes interstate overtones when you have interstate rings operating and you can establish that they are, in fact, operating across State lines. Most frequently, the arrest is made in connection with a specific act of arson. These programs have been run in the States by BATF. They have had a fantastic solution ratio approximately 70 percent in an area where something down in the single digits is par for the course for the State. They have developed techniques that the States do not have.

Arson is perhaps the fastest growing crime in the United States. Pursuant to an amendment I successfully offered to a Justice Department authorization bill in a previous fiscal year, it now has been designated as a part I index crime by the FBI. It costs more in property damage than virtually any other crime and is very high in the cost in lives. If BATF did nothing else but this operation, they are more than paying their way.

Now, as the gentleman from New Jersey is wont to say and I agree with him because I have had the same experience in my district, we have yet to lose our first citizen to the Soviet Union; but we are losing them to arsonists and we are losing them to drug peddlers all around the country.

I have strongly supported the administration budget, but I do disagree in the area of law enforcement resources. I think that the internal war against crime equally as important, if not more important, than external defense.

I think to cut 96 people out of one of the most highly successful law enforcement programs that saved $54 million last year in claims alone to save $5 million of Federal money is not very smart.

With respect to gun dealer surveillance, there are approximately 180,000 license applications and renewals in the United States each year. There are thousands of dealers that the BATF must keep honest so we will have the kind of records that enabled the BATF to trace down the retail sale and identify the purchaser of the gun that shot President Reagan. Those records have to be maintained at each level of distribution. Many of them are operated in questionable areas, by pawnshop dealers, rather than high-class sporting goods dealers.

I am afraid, as in most other areas, including my profession, the legal profession, the medical profession, and many others, that if there is not some kind of policing, there will always be people who fail to do what they are supposed to do or do what they are not supposed to do.

This agency does not have enough personnel to check on their licensed dealers an average of once every 10 years to keep them honest and to make sure those kind of records are being kept.

You recall that we castigated the BATF very severely for trying to get computerization of their gun records. They have the records and they have to keep them in a shoebox style. If those records are not kept at every level from manufacturer to distributor to retailer to the pawnshop in the inner cities, or wherever they might be, and those people are not kept honest, we are not going to have the ability to trace which we have now and which, on occasion, as was the case with the President's shooting, proved very helpful. We will lose that.

So, this is just not the place to cut. Those who are offering these cuts did not participate in the hearings, did not hear the evidence, and did not review what this agency is doing and what it is using its money for.

I personally strongly object and say this is exactly not the place to cut.

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. SAWYER. I yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Chairman, I thank the gentleman for yielding. I applaud the gentleman especially for his statement with regard to the manner in which the BATF supports local law enforcement.

For us to cut the personnel from BATF at this time would be entirely inconsistent with the statements that the Attorney General of the United States is making to local law enforcement people all over the country.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

(At the request of Mr. HUGHES, and by unanimous consent, Mr. SAWYER was allowed to proceed for 3 additional minutes.)

Mr. SAWYER. I may just add to the gentleman that most of their actions by their nature are supportive.

For example, they participated in what amounted to the apprehension and hopefully the ultimate conviction, if he is guilty, of Mr. Hinckley. They did not make the arrest, but they were immediately on the job and within 60 minutes had traced the gun to its pawnshop salesman, and to Mr. Hinckley as its purchaser. This can be a very valuable piece of evidence, particularly when used in conjunction with other evidence.

They do not make the arrests in the arson cases. They work with and teach the techniques of arson investigation to the local law enforcement people. Arson is primarily a local crime, and the locals make the arrest. They are involved in investigating, assisting, and in keeping a surveillance agency. I dare say that they are not primarily in the arson business even to the extent that the DEA or the FBI is in making arrests.

Mr. HUGHES. Mr. Chairman, will the gentleman yield?

Mr. SAWYER. I yield to the gentleman from New Jersey.

Mr. HUGHES. Mr. Chairman, first, I commend the gentleman on an outstanding statement.

During my statement, the question was posed to me by the gentleman from Ohio about productivity. I indicated that it compared with the FBI. I do have some figures on that comparison, I might suggest to my colleague, the gentleman from Ohio.

The FBI's productivity is 1.13 arrests per agent; so the productivity of the FBI compares very favorably to BATF; but that is really comparing bananas and apples.

Listen to their conviction rate. They had 2,017 cases, recommending some

3,824 defendants for prosecution. They received 79.2 percent that were accepted for prosecution. They had a 90-percent conviction rate. Sixty-seven percent of that 90 percent had prior criminal records; so I would say to my colleague, that is a pretty good record.

I thank my colleague for yielding.

Mr. SAWYER. I may also say that, like the gentleman from New Jersey, I was an urban prosecutor. One thing you have got to be very careful about is this arrest rate.

All police stations, all police captains and organizations, whether they be city, State, or Federal, operate on felony arrests per hour. That is how they carry it out.

In Michigan, we in effect reduced single possession of marihuana some years ago from a felony to a misdemeanor. All of a sudden, all of the police disappeared from policing marihuana because they were not getting felony arrests for it.

We have a 300-man police force in Grand Rapids in the city police department alone. One man is assigned to organized crime. Why? Because arrests are very difficult to come by in organized crime. They build strawmen. They have interlocking corporations. You can spend hours with no arrests.

Mr. MOAKLEY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise to voice my strong opposition to this amendment, which threatens to reduce the Bureau of Alcohol, Tobacco and Firearms' operating capacity.

We all know, Mr. Chairman, indeed we can all feel how gravely the frightening specter of violent crime haunts our Nation. Perhaps more than any other event in our recent experience the senseless and tragic attempt on the life of our own President this past March brought that threat of violence into sharp focus.

Apart from the President's recovery the one ray of hope I found amidst that tragedy was the responsiveness and professionalism of our Government agencies involved. Within one-half hour of the shooting the handgun used by the President's assailant was traced to its retail sale with the assistance of those licensing records the Bureau of Alcohol, Tobacco and Firearms and other related agencies administer. Such effective licensing and monitoring capacity must be maintained. I echo the conclusion reached by Represenative ROYBAL and Senator ABDNOR chairmen of the House and Senate Subcommittees appropriating the Bureau's funds, in light of mounting crime statistics, it would appear that there is a need for perhaps more, certainly not less, personnel to oversee firearm and explosive concerns.

The Bureau has other vital responsibilities besides its work to prevent firearm and explosive misuse. Under its alcohol and tobacco jurisdiction, it insures that all revenue due under the alcohol and tobacco tax statutes is collected. It suppresses illicit manufacture and sale of untaxed alcohol beverages. It suppresses commercial bribery, consumer deception and other improper trade practices in these industries, and it works toward the elimination of contraband trafficking. To cut back our society's capacity to collect the taxes due, and to reduce its capacity to guard against illegal and uncompetitive trade practices is a costly proposition. This is the second reason why I urge my colleagues to support the funding necessary to maintain the Bureau of Alcohol, Tobacco and Firearms' operations at their present level.

In short, Mr. Chairman, we must realize, a public policy that advocates budget cuts today, which may well incur far larger social and government costs tomorrow, is more than misdirected or misinformed. It is dangerous and destructive. Thank you.

□ 1710

Mr. ROYBAL. Mr. Chairman, I ask unanimous consent that all debate on this amendment and all amendments thereto cease in 5 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

Mr. ASHBROOK. I object.

The CHAIRMAN. Objection is heard.

Mr. ROYBAL. Mr. Chairman, I ask unanimous consent that all debate on this amendment and all amendments thereto cease in 10 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

Mr. ASHBROOK. I object.

The CHAIRMAN. Objection is heard.

Mr. ASHBROOK. Mr. Chairman, I move to strike the requisite number of words and rise in support of the amendment.

Mr. Chairman, first I would like to reply to the statement of my good friend from Michigan when he was saying the sponsors and those who support this amendment did not know that much about the BATF, I hope the gentleman was not referring to me because I predate my colleague a little bit on that committee. I have had about 5 or 6 more years of experience on the Subcommittee on Crime and looking into the BATF. Mr. Speaker, I note that all of the opponents of this amendment come back to the same thing, arson.

All we are talking about is an allocation of agency priorities. If the Latta amendment passes BATF can allocate their priorities more on arson and less on intimidation and harassment of the average American, so cutting the amendment in no way will reduce their ability to attack crime.

What it will do is to serve as a clear message to BATF to stop the intimidation of the average American, something any honest study will show to be too much a pattern of their operation.

Mr. Chairman, I can say with absolute honesty, because if challenged I will do it, that if I were to put into the RECORD the abuses of the Bureau of Alcohol, Tobacco and Firearms I would have to ask leave to insert it at a cost of more than $500,000 because I could fill 500 pages of this RECORD with the reckless abuses.

I could give my colleagues the court decisions. I could cite Federal Judge Chapman in South Carolina, judge after judge after judge who has rebuked the BATF for intimidating the law-abiding American gun owner. It would be a sordid record, indeed.

The record of the BATF in intimidating law-abiding citizens is well-known. So if we cut on the amount that the Latta amendment would offer, all we are doing is saying allocate your priorities where they should be. Stop the intimidation, get into arson, get into these areas where you have been successful. We in no way are trying to cut back in the proper areas that the BATF could exercise their proper jurisdiction.

Just last year or 2 years ago they wanted to shift $4.3 million. They had so much money that they did not need that they wanted to shift it in a first step to get us into national gun registration. If my colleagues remember, the Congress went on record and said, "If you have $4.3 million you do not need, first, we are not going to let you spend it to promote gun registration and, second and more to the point, we will just cut it right out of your budget." That is what we did 2 years ago. We told them that and we should tell them again.

So let us allocate the priorities properly. Let us tell them to stay in the areas where they are successful and let us cut their budget and keep them from intimidating the law-abiding citizens.

Mr. LATTA. Mr. Chairman, will the gentleman yield?

Mr. ASHBROOK. I yield to the gentleman from Ohio.

Mr. LATTA, The gentleman has referred a couple of different times to intimidation of law-abiding citizens. To whom does the gentleman refer? Is he referring to the sportsmen of this country?

Mr. ASHBROOK. To the sportsmen, gun owners, gun collectors. And I might say those fine Americans who sell firearms.

We all forget that there is one fallacy in the 1968 Gun Act, in an era of very liberal treatment of crime, we forget every violation of the 1968 Gun Act is a felony. There is no such thing as a misdemeanor. A mere reporting

mistake is considered a felony. Any trivial mistake is treated as a felony.

Do my colleagues think that is not used to intimidate the average law-abiding citizen? As I say, I can fill this RECORD with 500 pages of credible testimony, of cases, of decisions of judges on the overreach and the intimidation of the BATF.

The gentleman's amendment would allow us to cut that part that in my opinion they have misused and would, in fact, encourage or maybe even mandate that they prioritize the remaining money into arson, the area where my friend from Michigan and my subcommittee chairman, Mr. HUGHES, have said BATF is so successful. Let them be successful in those areas where they do well, and let us cut back some of their money so that they cannot harass the American citizen.

Mr. RUDD. Mr. Chairman, will the gentleman yield?

Mr. ASHBROOK. I yield to the gentleman from Arizona.

Mr. RUDD. I thank the gentleman for yielding and also for a very knowledgeable statement because of his background, of course, into this matter.

But let me ask the gentleman one question, if I may. What reasons have law enforcement agencies such as this given for the need for Federal gun control laws?

Mr. ASHBROOK. They always use the case of Mr. Hinckley, or when some crime comes up they say, "Yes, we can trace the firearm." But what they do not tell about is the times that they go in and take a collector's valuable firearms, drop them in a bag like they were junk. The record is full of examples of seizing a law-abiding citizen's gun collection, throwing the guns into a bag, scratching and damaging them, dropping them on concrete, keeping them for years—even after the owners were told that they were not acting illegally. The man has to go to court and get a judge to get his gun back. We have abuse after abuse after abuse and yet we say we cannot cut this agency's funds.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

(At the request of Mr. ADDABBO and by unanimous consent, Mr. ASHBROOK was allowed to proceed for 1 additional minute.)

Mr. ADDABBO. Mr. Chairman, will the gentleman yield?

Mr. ASHBROOK. I am happy to yield to the gentleman.

Mr. ADDABBO. The gentleman talked about abuses. In the 2,000 cases recommended for prosecution by the BATF, the defense of entrapment was claimed 58 times and it was upheld zero. The violation of civil rights was claimed 23 times and was upheld zero.

So the question of harassment does not stand.

Mr. ASHBROOK. I would say to my colleague I think BATF is getting better. I think this administration has indicated they certainly do not want to have continued the abuses of the past. But the abuses are there; they have been there; they have been documented. They have been spread before our committee. The court records of this country, are replete with the abuses. If my colleague wants to peruse them, I will be glad to spread them in the RECORD. But they are there.

Mr. ADDABBO. Will the gentleman yield further?

Mr. ASHBROOK. I am glad to yield.

Mr. ADDABBO. I fully agree that we have heard the cases before, in prior years, and this subcommittee has put limiting language in the bill and report in prior years and has made sure those abuses would not occur. In fact, I have just quoted proof that they have listened to our committee and taken action to correct any problems they had.

The CHAIRMAN. The time of the gentleman from Ohio has again expired.

(By unanimous consent Mr. ASHBROOK was allowed to proceed for 1 additional minute.)

Mr. ASHBROOK. But the gentleman knows the hearings to which I referred, and so does my colleague from Michigan. As recently as a couple of months ago we still had to ask the BATF why they were not returning firearms that had been seized and were properly due back in the hands of the owners. We had to ask them why they were still conducting these practices. BATF sent a letter to the committee and said "We are now expediting these cases" but there are cases still known where they would sit on the firearms, legally owned firearms, improperly confiscated firearms, year after year after year. So the abuses are still there.

I think this amendment would help send them a message they still need to hear.

Mr. WEAVER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the wasteful fiscal year 1982 appropriations request for the Bureau of Alcohol, Tobacco and Firearms.

In these times of national belt tightening, I can think of no better place to cut than this onerous bureaucracy. Given its long history of abusing individual liberties, political featherbedding, and the innate intrusiveness of its bureaucratic structure, one thing it does not need is more money.

The original objective of the BATF was to provide assistance to State and local law enforcement units. Though seemingly a laudable goal, a national police force of this type is completely unnecessary and duplicative of other Federal agencies. In addition, because of Justice Department rulings, the BATF must charge only those persons who have no past history of murder, rape, robbery, assault, or similar criminal acts. In other words, they must find a person who meets our common definition of a law-abiding citizen, but who can be shown to have violated some obscure gun law. The BATF has drawn in these people by enticing them into inadvertent, technical violations of any of the myriad gun laws. Since most sections of those laws do not require proof of criminal intent, it is only too easy to entrap an honest person. Lure a gun collector into selling four or six of his own guns—and charge him with selling without a license. Lure a person in a small town into selling a gun to a person from out of State—and charge him with sale to a nonresident.

At times it is even worse as agents, desperate for cases to justify their existence and future promotion, turn to anyone available. One case which was written up in the Washingtonian magazine a few years ago told the story of Richard Boulin, a veteran and retired policeman. The article related that besides having a private gun collection, he also had a commercial dealer's license. The article went on to say he had been told by BATF agents that he must record all sales from his dealership inventory, but that he did not have to record sales from his private collection. Further, a BATF informant then lured him into sales from his private collection, subsequently charging him with felony counts of dealer sales without proper recording. He was convicted.

After the conviction, it was discovered that BATF's acting director had stated—in writing—that a dealer could sell from his personal collection without recording. BATF had convicted a man of acts which its own director stated were completely legal. I can think of no more extraordinary case than this—a man ruined by an agency for conduct of which its own head approves. Apparently the agents in that office in Baltimore had time to waste on that retired policeman—time they therefore did not devote to the gun-wielding street criminals of Baltimore.

Let us take a look at BATF's budget figures, looking only in the firearms criminal enforcement area, for a moment. For fiscal 1982, they list 1,140 persons enforcing the gun laws, which they estimate will yield a mere 865 gun law arrests. That is appreciably fewer arrests than enforcement agents. I cannot believe many police departments would hire detectives who averaged less than one arrest per year of work. And we are paying them for that year of work at Federal scale. With over $53 million devoted to gun law enforcement, that means an aver-

age cost per arrest of $61,982. That is an incredible sum, even if the persons being prosecuted were genuine criminals, and not the likes of Richard Boulin.

Of course, the odds of genuine criminals being among those 865 is not high. By BATF's own admission, over half its current arrests are persons with no felony conviction record. Nearly half of those arrested have had no prior police contact at all. Even prosecuting those cases, in a time when we ought to be concentrating on genuine street criminals, is fiscally unjustifiable. Litigating them at a cost of $61,982 each is absurd.

Many States are even now releasing violent offenders because, at $15,000 a year, they can no longer afford to keep them behind bars. In other words, for the sums expended pursuing someone like Richard Boulin, four offenders with records of violence could have been kept out of circulation this year. To prosecute a man like that, for an act that the Bureau Director himself says is legal, makes absolutely no sense. To prosecute him at an equivalent cost of releasing four street thugs, who in 1 year could commit well over 1,000 robberies, is a betrayal of the Nation the Bureau supposedly serves.

Have not we had enough of this waste and irrationality? I urge my colleagues to vote against the BATF appropriations bill.

□ 1720

Mr. LATTA. Mr. Chairman, will the gentleman yield?

Mr. WEAVER. I yield to the gentleman from Oregon.

Mr. LATTA. Mr. Chairman, I want to thank the gentleman for his statement and point out once again that we are really not asking for a reduction below 1981. Actually, with the figures I proposed, we are going to be over what 1981 was. All we are asking is that the administration's figures be adhered to; and second, we are saying that it is absolutely ridiculous to set a figure of employees below which one cannot reduce, and they are saying in this legislation that one cannot reduce the number of people in this agency below the number that they have on April 30, 1981, whether they need it or whether they do not.

If this amendment passes, they have to keep them. So that is ridiculous when one is trying to get rid of some of this bureaucracy.

Mr. BIAGGI. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to this amendment. Frankly, I find it somewhat incredulous in light of the conditions that exist in the world today. There is statistic after statistic, study after study, newspaper article after newspaper article that reports the meteoric rise in crime. We find the law enforcement family seeking more assistance and the people of our country are screaming for more assistance, more people in the law enforcement agencies to go out and work. The Members know that as well as I.

In the various communities throughout the country, the people say, "Where are the police officers? What is happening to crime? What is happening to the safety of our people in this country?"

One of the most important issues in our Nation is the question of the safety of the people. I am flabbergasted with the notion that somebody is trying to cut moneys in this direction. In a sense, it is equivalent to national defense, and perhaps with more justification than the wide-open pockets we provide in that area.

Let me talk about the cost effectiveness. I hear people say the arrest ratio is poor. The arrest ratio would be poor if that was all they did was arrest. I can tell the Members it is better than that of the FBI, and I know nobody here has moved to cut the FBI appropriations. I can tell the Members more: If what the member want from this agency is arrests dictated here, let that sentiment be known and they will forget the other assignments they have and go out and make arrests. I can tell the Members that as a former police officer when the commanding officer said, "Go out and make arrests," one went out and made arrests.

It does not necessarily reflect the quality of those arrests, but one had statistics to meet. There are many important dimensions here. One of the more important ones, frankly, is this question of arson. This is the first Federal agency to respond to the burning of America. That is what is happening. It may not be happening in the small towns, and be grateful for it. But in the urban areas of this Nation, the cities are burning, crime is being committed for a host of reasons. They are burning and I condemn each of them. They should be prosecuted, investigated, and committed. They are the most heinous of offenders.

This agency has affected 350 arrests by itself. How about the assistance it has given to the local and State agencies? I know about that assistance. I have seen it work in my area. I represent part of the South Bronx, and bona fide businesses are burning down for various reasons. Some arson for profit, some for vengeance, some for protection.

We call upon the agency, together with the local police, together with the local fireman and the marshals and the State agencies, just to try and effect some arrests to break through, and we have. That is not recorded in their arrest record because the arrest credit goes to the local agencies.

Again, put aside that consideration, you simply do not measure effectiveness by arrest ratios. True, they have a 1.01 ratio as contrasted to the FBI, 1.13. It is an argument that should be dispelled immediately.

Let me tell the Members another thing they just did, and it is something that is creeping up in America. The desecration and burning of temples of worship across the country. The incidence of those rates has skyrocketed in the last year. They effectively infiltrated the Ku Klux Klan in Nashville and prevented a bombing of a synagogue in that area.

And more, they have infiltrated organized crime in the antitrust activities to prevent them from taking over the liquor industry. If they do not effect arrests in those places, they obtain information, a critical factor in the fight against crime.

There is another important factor most people do not understand. The police officers of this country would be at a loss in their inability if this ability to trace guns was not provided by this agency.

The CHAIRMAN. The time of the gentleman from New York has expired.

(By unanimous consent, Mr. BIAGGI was allowed to proceed for 2 additional minutes.)

Mr. BIAGGI. The Federal Government has responded. This agency responded: 60,000 traces in 1 year. It is the most effective agency in the Nation in combating crime; 60,000 traces of firearms, critical in the pursuit and investigation of local crime, the crime that touches us and ours and the people that we represent.

Here we are talking about $5 million. It is ludicrous even to consider reducing such an important agency at this point. If we want to make it cost effective, why do we not talk about the revenues it produces: $8 billion regulatory revenues: $8 billion, $5 for every $1 spent. If every agency in this country, in this Government, produced as much, we would not have a problem with taxes, we would not have a problem with the Reconciliation Act, or any of these other fiscal situations we have been discussing.

I respect my friend, the gentleman from Ohio (Mr. LATTA) and his concerns for hewing to the fiscal line. The gentleman has been most successful in the past, but I am certain even if this question was posed to the President of the United States, he would be the last to tell us to cut $5 million from this agency or any comparable agency in this constant fight that we wage against crime in our Nation.

In the end, what it will do, it will cost jobs. Irrespective of the floor, it will cost jobs when, in fact, we should be putting people on, not taking them off.

□ 1730

Mr. CHAIRMAN. The time of the gentleman from New York (Mr. BIAGGI) has expired.

(By unanimous consent, Mr. BIAGGI was allowed to proceed for 1 additional minute.)

Mr. BIAGGI. Just think of it. Is it not better that you go home and say, "Well, we have done a little bit more for law enforcement"? Is it not better when you go home to tell your people, when they read about an arson case, where people are burned to death and driven out of their homes, "Well, this is what I did in Washington. Be thankful it did not touch you, but it touched someone else. And perhaps because we defeated this amendment, we may have saved someone else's life."

If for not other reason than just their arson, it would justify the retention of these funds. Yes; if for no other reason, and there are a litany of reasons, some of which I have spelled out to the Members, to justify the retention of those $5 million and to establish that floor.

I urge my friends to vote against this amendment.

Mr. DYSON. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment offered by the gentleman from Ohio.

We have talked about abuses today. I think probably none brings back some of the glaring examples, unforgivable instances of brutality, other than the one that happened in Maryland in 1969.

A detachment of BATF agents broke into the house of a young Marylander named Kenyon Ballou, shot him in the head, threw his wife out the door, removed every piece of property in their house. The agents claimed they were searching for hand grenades. What they found were grenade casings without any explosives which had been openly sold as Army surplus.

This kind of abuse, Mr. Chairman, is abuse my constituents in Maryland have seen and therefore cannot justify an increased expenditure for this agency.

Mr. Chairman, I urge the House to support the amendment offered by the gentleman from Ohio.

The Department of the Treasury has recommended that the fiscal year 1982 appropriation for BATF be retained at the level requested by the President.

With regard to the suggestion that we grant BATF several additional millions of dollars for further enforcement of the Federal gun law, I pose one obvious question: Are we getting our money's worth? What has BATF done so far to merit the hundreds of millions which have already been poured into their enforcement programs? I believe that a simple look at the facts would show this to be one of the most unproductive programs now being advanced.

The Gun Control Act was aimed at—or so its preamble proclaims—obstructing the flow of guns to criminals. Unfortunately, the Gun Control Act has been largely ineffective toward meeting that worthy goal. Quite simply, Federal judges and U.S. attorneys have always looked with disfavor upon "felon in possession of gun" cases which are covered under the Federal Gun Control Act. Crime in the streets is apparently beneath the dignity of the Federal court, yet crime in the street was the sole justification for the Gun Control Act. Federal judges obviously feel that this type of crime should be under the jurisdiction of local government. The result is that the BATF program is virtually useless.

It is hard to believe, but statistics show that BATF agents enforcing gun laws make fewer than one arrest per year per agent. I cannot think of any police agency which would not terminate a department which made only one arrest per policeman per year. In 1982 that cost per arrest will be about $62,000. That is enough to put 3 policemen on the street in any given city for a year, which would probably result in 100 or 200 arrests, not just 1. And those would be legitimate, enforceable arrests of street criminals, rather than of persons who ran afoul of an overly technical Federal statute.

The Gun Control Act, incidentally, is exactly that—a technical statute. There is not a single section in it which punishes murder, robbery, rape, or other acts of evil in themselves. Rather, it punishes a number of acts whose punishment may or may not have an effect on the prevention of crime. No one would suggest that some of the activities punishable under the act should be legal—possession of firearms by the convicted felon, or sale of firearms to a felon. However, the remainder of the act is highly technical and questionable as to whether it combats real crime. For example, it is a felony to give a firearm to a person who resides in a different State—whether or not either of you would break or evade any local laws by doing so. Some courts have held that a gun collector who sells three or four guns from his collection over a 6-month to 1-year period has "engaged in the business of dealing in firearms" without a license, which is a felony. Under the law as written, these acts are felonies regardless of the person's intent, regardless of whether that person realized a court might find that four sales of collector's items in a year might be construed as engaging in the business.

Agents who make but one arrest per year cannot afford to let their averages fall still farther. At the same time, Federal prosecutors and courts are reticent to try most "felon in possession" cases. So, the practical effect is that gun law enforcement centers largely upon generating technical cases against persons who are neither street criminals nor those who deal with them. In fact, only 10 percent of BATF gun arrests are of felons or those selling guns to them. During Senate oversight hearings in 1979, one expert witness—himself a 40-year veteran of Federal law enforcement—estimated that 75 percent of BATF gun cases were against persons who had no criminal intent. BATF has been hard put to deny these estimates. The best its leadership has been able to argue is that barely half its arrests are of people with "police records"—which apparently includes arrest on charges that were later dropped.

Mr. Chairman, in my opinion BATF is expending too many tax dollars going after ordinary citizens rather than real criminals. I strongly support the amendment to reduce BATF funding to the level requested by the President.

Mr. ROYBAL. Mr. Chairman, will the gentleman yield?

Mr. DYSON. I yield to the gentleman from California.

Mr. ROYBAL. Mr. Chairman, did I understand the gentleman correctly when he said it was 1969?

MR. DYSON. Yes.

Mr. ROYBAL. It was in 1969 when this incident took place?

Mr. DYSON. Yes.

Mr. ROYBAL. I thank the gentleman.

Mr. SCHUMER. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, over the past several weeks, Members of this body have voiced increasing concern over the seemingly uncontrollable rise of violent crimes in this country, many involving the dangerous use of firearms and explosives and many directly related to the equally serious flow of illegal drugs into this country. Our constituents have echoed this concern, and we now have an opportunity to address this critical issue by strengthening rather than weakening law enforcement activities.

The Bureau of Alcohol, Tobacco and Firearms through the effective enforcement of firearms and explosives laws strives to protect American citizens from violent crimes involving such weapons, crimes that have reached epidemic proportions. Can we hope to further protect our citizens by undermining this already critically understaffed agency? Recognizing that this is the time to maintain and increase rather than decrease, law enforcement activities, the Appropriations Committee has recommended that the current employment level of the Bureau of Alcohol, Tobacco and Firearms not be reduced, as the ad-

ministration requested. At a time when citizens fear to walk the streets, or ride our subways, and are even afraid in the privacy of their own homes, it is our responsibilty to enforce the agencies designed to protect them. Who among us would like to rightly claim responsibility for the large losses in lives and property that are sure to occur if we fail to support the Bureau?

Of equal concern is the rising level of drug abuse and related crime. The U.S. Customs Service plays a crucial role in protecting our citizens from the wholesale entry of narcotics into this country. Any reduction in the enforcement of customs laws would have a severe and disturbing impact for the entire Nation. Surely the influx of drugs would increase, surely more and more Americans would become victims of drug-related crime.

The Customs Service also provides protection against hazardous and toxic substances, against the smuggling of illegal weapons, against terrorist activity, and the mounting problem of illegal aliens. The Appropriations Committee has rightly directed that the Customs Service employment level must be maintained and that the overtime cap be increased so that we will be assured of qualified personnel to cover overtime assignments.

In a fiscally sound move, the Appropriations Committee recommended $38 million in additional sums for the Internal Revenue Service to fund approximately 1,500 new staff positions—a move that will mean increases in revenue collections of an estimated $275 million. The general decline in voluntary compliance with our tax laws has meant that billions of dollars that should be in the U.S. Treasury have evaded it, and the many citizens who do comply have been unfairly burdened by the few who do not. There could not be a more appropriate time to vote to make our tax system both efficient and equitable. If we do not approve the committee's recommendation, we will go on record as supporting the evader rather than the honest taxpayer.

● Mr. DINGELL. Mr. Chairman, I rise in support of the amendment to H.R. 4121 offered by the distinguished colleague from Ohio (Mr. LATTA).

For many years, I have followed with great interest the growth and conduct of the Bureau of Alcohol, Tobacco and Firearms. Some of my colleagues may remember its origins, back in 1969, when it was a subdivision of the Internal Revenue Service employing only a couple of hundred agents. By 1972, it was a full Bureau within the U.S. Department of the Treasury, and today it employs several thousand persons, the majority of whom are involved in an aggressive and oftentimes zealous enforcement of the Gun Control Act of 1968.

Despite claims that BATF is effective in its role in enforcing the Gun Control Act of 1968, the Bureau's statistics contradict its success by revealing an average last year of only registering less than one arrest per agent.

What BATF has become effective at is the systematic badgering and pursuit of numerous law-abiding citizens who have not been, and, in most cases, would not be, involved in criminal activity.

Let me cite but a few examples of this abuse: Back in 1969, BATF agents committed one of the most shocking and unforgiveable instances of brutality which has ever been attributed to Federal agents. A detachment of BATF agents broke into the house of a young Maryland man named Kenyon Ballou, shot him in the head, threw his wife out the door, and removed every piece of property in their house. The agents claimed they were searching for hand grenades. What they found were grenade casing, without any explosives, which had been openly sold as Army surplus.

In hearings before the Senate Subcommittee on the Constitution of the House Judiciary Committee last year, it was establishing in this case that the agents were not only guilty of brutality and the unnecessary shooting of Mr. Ballou, but that the agents had obtained the search warrant through perjury, and had subsequently destroyed this search warrant in order to absolve themselves from wrongdoing. Ballou, a Vietnam veteran, was totally paralyzed as a result of the incident. The BATF agents who participated in the raid received promotions.

Another incident, which illustrates the extent of BATF abuse occurred in 1975 when agents made a wide sweep of firearms-related arrests in Massachusetts and New Hampshire. In the process of making these numerous arrests, BATF issued press releases, slandering the persons arrested and describing the raids as the "biggest in New England since the Gun Control Act was enacted." When the cases came to trial, over one-half of the New Hampshire arrests were overturned in court.

One case was dismissed after it was established that an informant for the BATF, responsible for leading the agents to the arrest, had persuaded the victim that the agents were mobsters who would murder him unless they received illegally acquired firearms.

Another case involving the unwarranted arrest of a disabled veteran for violating firearms laws resulted in the judge not only dismissing the case but also having to publicly apologize to the disabled veteran on behalf of the Nation for the irresponsible actions of BATF agents. It seems when the informant approached the subject in this case, he took down his license number, phoned other BATF agents long distance and urged that the "the criminal" be arrested for intending to acquire guns illegally. Instead of recognizing this disabled veteran had no intentions of securing illegal firearms, the BATF claimed that one of the rifles he owned could have been converted to an automatic weapon and proceeded to arrest him on felony charges. But as a result of the court action and the temporary suspension of his license to sell firearms from his small gunshop, he was not out of business. The agent who arrested him is now living comfortably on a BATF retirement pension.

Another example. In its aggressive, and sometimes irresponsible enforcement of the 1968 Gun Control Act, BATF agents, through the use of strawman tactics of entrapment, initially put 37 legitimate gun dealerships out of business in South Carolina. BATF dropped this tactic in that State after a Federal judge indicated that the Bureau was clearly setting up persons who had no criminal intent to break the law. The judge subsequently ordered BATF to inform dealers of their actions. Once the dealers were informed of BATF entrapment techniques, BATF was no longer able to continue making trumped-up arrests on that basis. However, most of 37 dealers originally arrested through the use of BATF entrapment are now convicted felons, and ruined as citizens. The agent responsible for the raids was recently transferred to BATF headquarters and put in charge of the firearms enforcement branch.

The BATF abuses which I have illustrated are only a small portion of the multitude of abuses cases which have been brought to the attention of House and Senate investigating committees as well as the public. These abuses will continue to persist unless Congress sends this Bureau a clear message that such abusive actions will not be tolerated.

The amendment before us today merely eliminates from the bill $5 million—$2.5 million of which was designated for BATF's firearms enforcement division—which was added to the legislation during consideration by the Subcommittee on Treasury, Postal Service, General Government. What we will do by adopting this amendment is to return to what the administration had originally requested as an appropriate budget level for BATF.

If we fail to adopt this amendment, we are giving BATF a message from Congress that its actions are permissible, its orientation acceptable. If we reward corruption, mismanagement, and downright viciousness, we can expect more corruption, mismanagement, and downright viciousness.

It is time that we stopped granting more money and started asking some serious questions:

What impact have the hundreds of millions of dollars already sent to the Bureau had on crime?

Why are Bureau gun enforcement agents making less than one arrest per year per agent?

What other police unit would tolerate this waste?

How many of these arrests involved real criminals, and how many involved law-abiding citizens entrapped to fill a local BATF office's quota?

Why have not the agents involved in even the worst of BATF's abuses been disciplined?

Why have so many been promoted?

Our colleagues in the Senate have already held three oversight hearings into BATF abuse and have uncovered some rather shocking data:

Memorandums confessing that innocent persons are being convicted;

Proof that BATF is confiscating collector-grade firearms to be taken into its own museum;

Documentation of perjured search warrant affidavits; and

Deliberate vandalism.

There are too many instances of BATF abuse, too many instances of unanswered questions.

On this basis, I ask my colleagues to support the pending amendment.●

Mr. FOLEY. Mr. Chairman, I rise in support of Mr. LATTA's amendment to achieve the administration-recommended funding level for the Bureau of Alcohol, Tobacco and Firearms for fiscal year 1982.

H.R. 4121 contains a $5 million increase in the appropriations for the Bureau of Alcohol, Tobacco and Firearms in order to maintain the Bureau's employment level at the April 30, 1981, personnel level.

Given the Bureau of Alcohol, Tobacco and Firearms rather lackluster performance record, I see no reason to reject the administration's funding request and to freeze unnecessarily the BATF personnel at the April 30, 1981, level. In fact, the Senate Appropriation Subcommittee on the Treasury not only declined to increase the Bureau's employment levels by 229 positions over the administration's request, but cut approximately $2 million from the Bureau's budget.

I fully support Mr. LATTA's efforts to trim back this appropriation and urge my colleagues to support the amendment.●

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. LATTA).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. ASHBROOK. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 279, noes 141, not voting 14, as follows:

[Roll No. 171]

NOT VOTING—14

Burton, John	Fountain	Santini
Cotter	Frost	Stenholm
Crockett	Horton	Volkmer
Duncan	Minish	Waxman
Fascell	Rosenthal	

□ 1740

Mr. FRANK changed his vote from "aye" to "no."

Messrs. WHITEHURST, LEE, SWIFT, LUKEN, FITHIAN, BLANCHARD, CHAPPELL, CONTE, YATRON, RALPH M. HALL, SMITH of Pennsylvania, HYDE, HATCHER, and SMITH of Iowa changed their votes from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

□ 1750

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

UNITED STATES CUSTOMS SERVICE

SALARIES AND EXPENSES

For necessary expenses of the United States Customs Service, including purchase of two hundred passenger motor vehicles for replacement only, including one hundred and ninety for police-type use; operation and maintenance of aircraft; hire of

passenger motor vehicles and aircraft; and awards of compensation to informers, as authorized by the Act of August 13, 1954 (22 U.S.C. 401); $498,468,000, of which not to exceed $150,000 shall be available for payment for rental space in connection with preclearance operations, and not to exceed $1,000,000 to remain available until expended for research and studies: *Provided*, That none of the funds made available by this Act shall be available for administrative expenses to pay any employee overtime pay in an amount in excess of $25,000: *Provided further*, That none of the funds made available by this Act shall be available for administrative expenses in connection with effecting the reduction of employment in the U.S. Customs Service below the level on April 30, 1981.

AMENDMENT OFFERED BY MR. KAZEN

Mr. KAZEN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. KAZEN: Amend H.R. 4121 on page 4, line 25 and page 5, line 1 by striking out the figure $498,468,000 and inserting in lieu thereof the following: "$499,743,000 of which $1,275,000 shall be used for employment of 50 additional Customs Inspectors and of which not to exceed $150,000 shall be available for payment".

Mr. KAZEN. Mr. Chairman, this amendment, very simply adds $1,275,000 for the purpose of employing 50 additional customs inspectors. Under the bill, they keep the same amount that we had on board in April 1981.

Mr. Chairman, I do not have to tell you how much business has increased as far as international commerce is concerned, how international travel has increased. All one has to do is look at the airports in our major metropolitan areas in this country and see the tremendous amount of international commerce and personnel traffic. Look at the situation along the Canadian border, along the Mexican border. We have come to the point where Mexico is our third-best customer in the world. Canada, of course, is way up there also.

We need this additional revenue which will be generated by the additional personnel. We are not wasting this money. We have to get this additional money in the Treasury and the only people who can do it are customs inspectors at the bridges and at the airports. We must also continue to check for contraband. We are talking about drugs and other contraband. These people are our frontline when it comes to interdicting contraband coming across the borders of this country.

□ 1800

Mr. Chairman, we can be penny wise and pound foolish by not appropriating this money. We do need these people. We can reduce expenditures and we have cut appropriations and we are fighting waste, fraud, and abuse. But we cannot do without this type of service that actually puts money in our Treasury.

We must do this, and I beg the Members to give us these 50 additional people all over this country so that we can man the bridges and our airports. I have in my hometown of Loredo, a brand new international bridge that cannot function 24 hours a day. We have lines running up to 2 miles trying to get across the bridge when it is open, in 100° weather, with engines burning, simply because we do not have those lanes open because we do not have the personnel to man it.

Mr. Chairman, I beg of the Members to do the right thing by this country. Let us help eradicate drugs, help interdict contraband, and help put money in the Treasury.

Mr. ROYBAL. Mr. Chairman, will the gentleman yield?

Mr. KAZEN. I am delighted to yield to the subcommittee chairman.

Mr. ROYBAL. Mr. Chairman, I take the floor to agree with the gentleman from Texas (Mr. KAZEN). I think this is very much needed.

However, we are running into some complications with regard to the language that is being used in the gentleman's amendment. I was ready to accept the amendment, but I see that in the amendment the gentleman uses the words, "shall be used."

If the word, "shall," remains, I will be compelled to oppose the amendment. If the word is changed to "may," then I will accept the amendment.

Mr. KAZEN. Mr. Chairman, I do not understand the gentleman's reasoning.

Mr. ROYBAL. "Shall" is mandatory, and "may" is not.

Mr. KAZEN. But we have to have 50 additional people.

Mr. ROYBAL. In this instance, then, it should be legislation in an appropriation bill.

Mr. KAZEN. Mr. Chairman, I ask unanimous consent to change the word "shall" to "may" in my amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. GILMAN. Mr. Chairman, will the gentleman yield?

Mr. KAZEN. I am delighted to yield to my colleague, the gentleman from New York.

Mr. GILMAN. Mr. Chairman, I thank the gentleman for yielding, and I want to commend him for introducing this amendment.

Mr. Chairman, I rise in support of this amendment increasing the personnel levels for the U.S. Customs Service.

As a member of the Subcommittee on Human Resources of the Committee on Post Office and Civil Service, I joined with several of my colleagues recently in a hearing at John F. Kennedy International Airport to assess the effects there of limited customs personnel.

Witnesses representing the airline industry, the office of the mayor of New York, the chairman of the Select Committee on Narcotics, and various employee associations testified that they are working with much too thinly stretched Customs personnel, just at that airport alone. Current levels of employment have no adverse effect on processing times of air travelers and freight, and on efforts to apprehend individuals and dangerous substances entering the United States illegally and to assess properly duties on imported articles.

Mr. Chairman, I believe the additional personnel contemplated by this amendment are needed to resolve these costly and adverse problems. Accordingly, I urge my colleagues to vote in support of this amendment.

Mr. KAZEN. Mr. Chairman, I thank the gentleman from New York (Mr. GILMAN) for his contribution.

Mr. BURGENER. Mr. Chairman, will the gentleman yield?

Mr. KAZEN. I yield to the gentleman from California.

Mr. BURGENER. Mr. Chairman, I thank the gentleman for yielding, and I wish to commend him on his amendment. As one who represents a border district, I know how essential this is.

The CHAIRMAN. The time of the gentleman from Texas (Mr. KAZEN) has expired.

(By unanimous consent, Mr. KAZEN was allowed to proceed for 3 additional minutes.)

Mr. GONZALEZ. Mr. Chairman, will the gentleman yield?

Mr. KAZEN. I yield to the gentleman from Texas.

Mr. GONZALEZ. Mr. Chairman, I thank my colleague for yielding.

Mr. Chairman, I merely rise in support of this amendment and compliment my friend, the gentleman from Texas (Mr. KAZEN) for offering it.

I wish to affirm the need for this amendment. Even in my district, at the San Antonio International Airport, we have a need for this, and we have spoken out very insistently about the existing and true need for this.

Mr. ADDABBO. Mr. Chairman, will the gentleman yield?

Mr. KAZEN. I yield to the gentleman from New York.

Mr. ADDABBO. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Texas (Mr. KAZEN).

As I said in our earlier colloquy, the committee could not go over the original figure because of the budgetary constraints, but in view of the fact that we have cut $5 million with a previous amendment, we do see a justification for this figure, and I do support the gentleman's amendment.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. KAZEN. I yield to the gentleman from Texas.

Mr. DE LA GARZA. Mr. Chairman, I appreciate my colleague's yielding, and I rise in support of the amendment.

In my district I have two airports which have international flights, and there is the possibility of a third one. I have 6 international bridges, and I dare say that we need 50 more customs people right in my congressional district. We are speaking here of the entire border between the United States and Mexico and Canada.

So this is a very, very small step, but I appreciate the gentleman's taking the lead in this effort.

Mr. KAZEN. Mr. Chairman, I thank the gentleman from Texas (Mr. DE LA GARZA) for his contribution.

In the past this House has authorized additional personnel, but for some reason or other OMB downtown has never seen fit to use the money that we have authorized and appropriated. I think that the time has come when they should understand that this is for the benefit of the country, for the protection of the safety of the people of this country, and for the addition of much needed revenues in our Treasury.

Mr. FRENZEL. Mr. Speaker, I move to strike the requisite number of words.

Mr. Chairman, this is an amendment that every Member of the House would like to have for his or her own district. I would, however, like to invite the Members' attention to the fact that the appropriation is already $18 million over the amount authorized by the authorizing committee and $18 million over what the President asked for.

Now, if we are going to simply award more Customs employees to every Member who asks for them on the floor of the House, I am sure that the line will be a long one. I think the House would be well advised to vote this amendment down and try to get along on a reasonable amount of money, since the amount has already been raised by $18 million by the Appropriations Committee.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. KAZEN), as modified.

The amendment, as modified, was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

BUREAU OF THE PUBLIC DEBT

ADMINISTERING THE PUBLIC DEBT

For necessary expenses connected with any public-debt issues of the United States, $206,625,000.

AMENDMENT OFFERED BY MRS. SCHROEDER

Mrs. SCHROEDER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mrs. SCHROEDER: Page 5, line 24, strike "$206,625,000" and insert in lieu thereof "$193,050,000".

Mrs. SCHROEDER. Mr. Chairman, imagine an enterpeneur opening an ice plant in Nome, Alaska. He packs bags of ice and goes out to sell them to the local residents. At each door he is turned away. People say, "Why should we buy ice from you? All we have to do is go outside and we can find all the ice we'll ever need." Our businessman is not dissuaded, however, and he spends lots of money hiring a staff of salespersons. He mounts a huge promotional campaign. But, alas, it does no good. Eventually, he learns the lesson obvious to all but him: You can not sell ice to Eskimos.

Unfortunately, the U.S. Government has not learned that lesson and will today spend over $60,000 selling the equivalent of ice to Eskimos. Indeed, during the course of this year, the Government will have spent $16 million just promoting the sale of savings bonds. This despite the fact that during 1980, redemptions exceeded sales by $11 billion. That sales dropped 44 percent last year. This despite the fact that other Government-insured investments, such as Treasury notes and money market certificates, are returning 17 and 18 percent, while series EE bonds only return 8 percent if you hold them for 9 years. This despite the fact that we are soon to pass a tax bill which contains a huge tax exemption for people who put their money in savings and loan institutions.

Now, I am not saying that savings bonds are a bad investment for all people. For very small savers, savings bonds can be a worthwhile purchase. Yet, the class of investors for whom bonds are desirable is becoming smaller and smaller. If market rates drop, the attractiveness of bonds may again increase. Nevertheless, bonds are today about as attractive to most Americans as is ice in Alaska.

I have, therefore, offered an amendment to eliminate the $14.6 million budgeted in this bill for the promotion of savings bonds. My amendment would not eliminate bonds, would not touch the operation which actually sells and redeems bonds, and would not affect the public service advertising for bonds. All it would do is eliminate the Savings Bond Division, which has over 400 people who go around promoting bonds. The Division does not sell bonds, it does not process bonds, it does not redeem bonds. All it does is promote the purchase of bonds. Staff members go around and meet with business executives to encourage them to encourage their employees to use payroll deduction to buy bonds.

Indeed, one of the top officials of the Savings Bond Division told my staff that they do not measure the productivity of their personnel by the number of bonds sold because their personnel do not sell bonds. The Division counts number of phone calls, number of meetings, and number of letters written because these items are the output of the Division. In other words, the Savings Bond Division counts bureaucratic paperwork and calls it a productivity measure because all the Division does is produce bureaucratic paperwork.

I have introduced H.R. 3116, the Government Cost Reduction Act, to require that productivity be assessed based on the mission of the agency. There is no surer way to identify agencies deserving extinction than to look at their measures of productivity. If all an agency feels comfortable counting is bureaucratic paperwork, that agency should be abolished. The Savings Bond Division has to top any list of candidates for extinction.

Adoption of this amendment will have no effect, I believe, on the number of bonds sold. Most bonds are sold through payroll deduction plans. These plans will continue to operate without any involvement by the Savings Bond Division. As long as employees want to save this way, companies will continue to allow them to do so. Once employees decide that there are better ways to save, no activity of the Federal Government will convince companies to go through the expense of payroll deduction.

Mr. Chairman, today we can cut the budget by eliminating a program which deserves to be abolished. If you are committed to the war on waste, vote for the amendment.

□ 1810

Mr. ROYBAL. Mr. Chairman, will the gentlewoman yield?

Mrs. SCHROEDER. I yield to the chairman of the committee, because we have talked about this.

Mr. ROYBAL. I thank the gentlewoman for yielding to me. I would like to get some clarification now.

The original request of the gentlewoman was for a reduction of $14.6 million. The reduction has now been reduced to $13.6 million, which leaves then $1 million for bond promotion, is that correct?

Mrs. SCHROEDER. That is correct.

Mr. ROYBAL. Then the thrust of the amendment of the gentlewoman is directed to those individuals who are out promoting the sale of these bonds?

Mrs. SCHROEDER. That is correct. They cannot sell. They cannot do anything themselves. They are just promoting, talking to different companies, trying to promote verbally, traveling around.

Mr. ROYBAL. But there are then individuals who actually do the promotion from their office here in Washington, D.C. Are these people affected?

Mrs. SCHROEDER. The ones who will be doing the promotions here, anyone who is doing promotions would be affected. It does not affect salesmen, the actual people who do the selling or people who would do redemption or those types of things

We are just talking about how very difficult it is to promote at the time. We go with the advertising money, which the Council is donating so much more and doing as a public service, so we leave that in.

Basically, all I am trying to do is cut out the promotion slots, because we know how desperately we are going to need these slots in many other areas.

Now, I realize that we did not have a lot of time to talk about this amendment, because it kind of came in from looking at things under the productivity bill that I am carrying; but I think what we could do is start with that and see if we can work something out. My intent is just to get the people who are doing nothing but promotion.

Mr. ROYBAL. All right. Then it is my understanding, again to review the argument of the gentlewoman with regard to this matter, this is directed only to those people who go out and do the actual promotion?

Mrs. SCHROEDER. That is right, or make some phone calls or write letters.

Mr. ROYBAL. The number of people that would be affected, as I understand it, is 432 individuals; is that correct?

Mrs. SCHROEDER. That is the number that we have, somewhere in that vicinity. We know it is over 400 and we had heard 432, whether all those slots are filled.

Mr. ROYBAL. It is also true that of those 432, there are individuals who are actually doing work here in Washington, D.C.

The CHAIRMAN. The time of the gentlewoman has expired.

(At the request of Mr. ROYBAL, and by unaimous consent, Mrs. SCHROEDER was allowed to proceed for 2 additional minutes.)

Mr. ROYBAL. Mr. Chairman, will the gentlewoman continue to yield?

Mrs. SCHROEDER. I will continue to yield.

Mr. ROYBAL. It is quite possible then that of the 432 people that are involved, there are some who are not actually going out meeting with these top executives doing the promotion. Will these people be affected also?

Mrs. SCHROEDER. Yes, because one of the things we were concerned about during our productivity hearings, some of the things we learned, as the people in this office were rated on their productivity, not by how many bonds were actually sold, but rather how many letters they wrote, so if they sat in the office and wrote lots and lots of letters, that was considered being productive, or how many phone calls they made, how many visits they made, how many meetings they set up.

Now, my response to that is that is not a very good measure of productivity. Sales have dropped off 37 percent.

What we are saying is that it is just a time where no matter how many letters they write or how many calls they make, I do not think there is any way they can sell savings bonds at the incredible low rate they are.

Mr. ROYBAL. But in the opinion of the gentlewoman, the actual sales of bonds will not be hampered by this amendment?

Mrs. SCHROEDER. That is right. The people who are actually selling the bonds, no; they are in another department. If private companies continue—and many private companies run this through their personnel departments where they do the employee checkoff and what have you—obviously that is not affected because they are doing it, and the advertising is not affected.

So what we are trying to do in essence, as the gentleman knows, we have seen all sorts of new supergrades added. We just did some today in the tourist bill. We lifted the ceiling on supergrades in the Department of Defense so it can go above $55,000. Every day somebody is trying to get more slots and there are many, many things that are needed.

It seems to me here is an area where these 432 people probably cannot do what we are asking them to do with the interest rates, so it may be a way to free up slots.

Mr. ROYBAL. With that explanation, I think the committee can accept the amendment.

Mrs. SCHROEDER. I thank the gentleman very much.

Mr. GILMAN. Mr. Chairman, I rise in opposition to the amendment offered by the gentlewoman from Colorado.

Mr. Chairman, while I am certainly in favor of eliminating needless Government expenditure, the amendment offered by the gentlewoman will not accomplish such a purpose. The savings bond program is on the whole a cost-effective one. It brings into our Treasury billions of dollars annually at a relatively modest cost to our Government.

Moreover, the savings bond program is one which encourages thrift, a goal which I submit is so important to our Nation at this time and something we should be paying a lot more attention to.

I have been advised that 80 percent of the current purchases of savings bonds are made through the payroll investment plan. The $16 million fund which the gentlewoman seeks to strike pays for the promotion of that payroll savings program. Should the amendment of the gentlewoman succeed, it would most likely result in the discontinuance of a substantial number of individual savings accounts through the plan, with a subsequent increase in the Government's cost of borrowing and the reduction in savings activity by millions of working Americans.

Accordingly, I urge my colleagues to reject the Schroeder amendment, to give some careful attention to what this amendment seeks to do and that is to cut out the entire savings bond division, a division that promotes the payroll savings plan amongst the larger companies in our Nation.

Mrs. SCHROEDER. Mr. Chairman, will the gentleman yield?

Mr. GILMAN. I am pleased to yield to the gentlewoman.

Mrs. SCHROEDER. Well, I understand what the gentleman is saying, but I just wanted to read, and this comes from the savings bond division, these figures, that in 1980 while they sold $4.3 billion in bonds, they redeemed $15.6 billion in bonds; so almost for every one they sold, they were redeeming three of four.

I am saying that we have 435 slots dealing with this and we are giving them an impossible task.

The other thing that I think we should point out to the gentleman is that we are seeing a trend where people are now just asking to have 25 cents a month maybe withheld to buy a bond, just so they look like they are participating, but they do not want to buy more than they have to, all sorts of funny games are going on.

I hear what the gentleman is saying. I wish these could be sold. If we could get this kind of money, it would be terrific; but I think we are wasting a lot of people's time and a lot of money in a budget that is already over the ceiling.

The gentleman serves with me on the Post Office Committee. The gentleman knows how important every one of these slots are in a time when we are cutting back on Federal employment; so I would hope that the gentleman would help us here. We need the slots for Immigration, for Customs, for any number of other agencies that are really under the gun and needing help.

I think here is a way we can do it. We have had many whistle blowers talk about this and I know the gentleman has been very concerned about whistle blowers and what they are telling us.

I know the gentleman sat in on many of our productivity hearings in which we heard about this and the impossible task; we are asking them to be productive when they cannot; but I think that 1-to-4 ratio is devastating.

for every bond they sell they are redeeming four, we are not really getting very much for that $16 million.

Mr. GILMAN. Well, in response to what the gentlewoman is saying with regard to the redemption, of course, I think the gentlewoman recognizes that the redemption is not so much due to the effectiveness of the savings bond division as it is to the internal problems of our economy. The redemption certainly has nothing to do with the promotional aspects of this division.

I would like to point out that savings bonds when compared with alternative means of financing are highly cost effective to the Treasury.

The average interest rate cost equivalent of savings bonds programs compares favorably with the current average alternative cost of financing with Treasury marketable notes.

□ 1820

It is a program that we want to continue. I think the gentlewoman agrees with that.

Mr. ASHBROOK. Mr. Chairman, will the gentleman yield?

Mr. GILMAN. I am pleased to yield to the gentleman from Ohio.

Mr. ASHBROOK. I thank my colleague for yielding. I certainly have a record of trying to cut wherever we can.

But one of the things I think we ought to remember is our savings rate in this country is something approaching the national disgrace. To say we have failed, yes, we have failed, and that is one of the problems of our debt. Most of our debt does not come out of savings, it comes out of the printing press money.

I think we ought to do everything we can to encourage savings. Almost every other advanced, industrialized country in the world has savings rates that run far ahead of ours.

Maybe this agency has not succeeded. I really do not know. To throw in the towel right now, at a time when we want to get back to savings, and we are going to give a tax cut on the idea that Americans will go to savings, maybe some of them will come to the U.S. Government through the efforts of this agency.

Mr. GILMAN. I thank the gentleman from Ohio for his supportive remarks.

Mr. MILLER of Ohio. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

I certainly am not one to oppose reductions in spending, but this would be a false reduction in spending.

We have savings bonds bringing in some $7 billion per year. If we want to calculate what we pay in interest on the savings bonds compared to the Treasury bills, we will have a differential of around 6 percent. We would find if we did not have the savings bonds we would be paying in the neighborhood of $420 million additional interest. That certainly is false economy when we speak of wiping out $14 million and then have to pay almost $420 million additional interest.

Mrs. SCHROEDER. Mr. Chairman, will the gentleman yield?

Mr. MILLER of Ohio. I am glad to yield to the gentlewoman.

Mrs. SCHROEDER. I know the gentleman is one who is very interested in individual rights and freedoms and all of that type of thing. I totally understand what the gentleman is saying.

For the U.S. Government, 8-percent money is a bloody bargain. Let us face it, people would much prefer to have their money in, say, money market funds or some other area where they can get a much higher return, or even Treasury notes.

I think the issue here, though, is whether the taxpayer should be asked to fund 432 people who are coming around to their offices convincing the personnel department that everybody ought to contribute 8-percent money. I want to try and make people save, but is it not a whole lot better to have them save where they are going to get more return on their money? Then there would be more incentive to save. If they get some return that at least helps them to keep up with inflation.

I think when we are caught in a bind that it is really unfair. What happens is that this affects the very poorest of the poor people who are at the lower end of the wage scale, and they are the ones who get coerced the most into doing this. Then just when we see people saying that, well, we will go to 25 cents a month, it is just to get the personnel department off their backs, and so on and so forth, and I think that is really rather obnoxious. We are using their money to help put them in that bind. Then they put it in and they get so much less than they would if they bought other Government funds.

Mr. MILLER of Ohio. I would like to claim my time because at one time a few years ago I had an opportunity to head up here on Capitol Hill a saving funds group, attempting to sell savings bonds. What I found out at that time was that the people did not have $10,000 to buy the Treasury bill. They did not have $100,000 to get in the money market. But they could have a deduction from their paycheck of $25 or $50 or $100 a month. They were saving something because of that. They could cash them in the future if necessary. But at least they would save. This is a method for them to save.

Mr. CAMPBELL. Mr. Chairman, will the gentleman yield?

Mr. MILLER of Ohio. I am happy to yield to the gentleman.

Mr. CAMPBELL. I thank the gentleman for yielding.

I certainly agree with the points the gentleman has made. But there is one additional point I wonder if the gentleman has considered. There are people in this country who think that savings bonds, and I happen to be one of them—to put part of your money into a savings bond is a patriotic gesture. There are people who still believe in the country. There are people who think they have a real obligation to try to help support some of the funding of the Federal Government in the debt.

This is much like a bond for a church. Many of us have been on a canvassing committee where we tried to sell bonds for a church or call on people; we did not sell them necessarily because they were the greatest investment in the world, even though they were a good form of savings for people. We also appealed to some civic pride and some support of the church and duty.

I would say if we, in fact, would like to do away with the U.S. savings bonds, are we, in fact, then also saying that we would turn our backs on the efforts of those who would go out and promote the bonds? Are we turning our back on giving people information who might want to include with their savings some patriotic gesture? Are we not just cutting them off if we walk away from this?

Mr. MILLER of Ohio. I feel that we are, and I thank the gentleman for his contribution. I feel it would be false economy or I would support the amendment.

Mrs. SCHROEDER. Mr. Chairman, will the gentleman yield?

Mr. MILLER of Ohio. I yield to the gentlewoman from Colorado.

Mrs. SCHROEDER. I just want to say certainly we are not stopping savings bonds and we are not stopping people who want to do it. But I think when we have so much pressure on us—and I chair the Civil Service Committee, so I see it every day—so much pressure to allocate these very precious Federal slots, I think it is a time where we have a way to save the money and the slots.

The CHAIRMAN. The question is on the amendment offered by the gentlewoman from Colorado (Mrs. SCHROEDER).

The question was taken; and the Chairman being in doubt, the Committee divided, and there were—ayes 29, noes 26.

Mr. MILLER of Ohio. Mr. Chairman, I object to the vote on the ground that a quorum is not present and make a point of order that a quorum is not present.

POINT OF ORDER

Mr. WEAVER. Mr. Chairman, I make a point of order. The gentleman

was not timely. I make the point of order that it was not timely.

The CHAIRMAN. The gentleman is in order. The gentleman makes a point of order that a quorum is not present.

The Chair will count for a quorum.

Does the gentleman insist on his point of order?

Mr. MILLER of Ohio. Mr. Chairman, I withdraw my point of no quorum.

RECORDED VOTE

Mr. MILLER of Ohio. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device and there were—ayes 223, noes 190, not voting 21, as follows:

[Roll No. 172]

□ 1840

Mr. HILER, Mrs. FENWICK, Messrs. RUSSO, TAUZIN, SCHUMER, and McEWEN changed their votes from "aye" to "no."

Mr. SMITH of Oregon changed his vote from "no" to "aye."

So the amendment was agreed to.

The result of the votes was announced as above recorded.

Mr. ROYBAL. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. STUDDS, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 4121) making appropriations for the Treasury, the U.S. Postal Service, the Executive Office of the President, and certain independent agencies, for the fiscal year ending September 30, 1982, and for other purposes, had come to no resolution thereon.

PERSONAL EXPLANATION

(Mr. VOLKMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VOLKMER. Mr. Speaker, on Monday, July 27, the House passed H.R. 4119, making appropriations for Agriculture, rural development, and related agencies for fiscal 1982, on a vote of 343 to 33. I was unavoidably absent, having been called away to my district which is experiencing extensive rainfall and flash flooding and extensive damage to the Cannon Dam coffer dam and to Cannon Dam and to the farms, crops, and homes along the Salt River. Had I been present I would have voted "yea."

On Tuesday, July 28, the House passed H.R. 1311, Tourism Policy Act, by a vote of 321 to 98. Had I been present I would have voted "nay." The House passed House Concurrent Resolution 160, monetary policy, inflation and high interest rates resolution by a vote of 403 to 17. Had I been present I would have voted "yea." The House passed H.R. 4053, Mineral Leasing Act amendments by a vote of 408 to 5. Had I been present I would have voted "yea." The House also passed H.R. 2120, Product Liability Risk Retention Act of 1981, by voice vote. Had I been present I would have voted "yea."

SUPPORT BIPARTISAN TAX BILL

(Mrs. SMITH of Nebraska asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SMITH of Nebraska. Mr Speaker, last night on national television the President artfully exposed the inadequacies of the Ways and Means tax bill. He showed that the tax cut that the American people have a right to expect will not materialize under the Ways and Means plan.

Not only is the Ways and Means tax cut inadequate, but also its reductions are just temporary. By 1983, the committee tax cut is finished. Taxes will start to rise again due to inflation and the resulting bracket creep. Under the

President's bipartisan bill, taxes go down and stay down. This is the real, evenhanded, and lasting tax cut the American people want.

Mr. Speaker, by supporting the Conable-Hance bipartisan substitute tomorrow, we can allow the American people to keep 28 billion of their hard-earned dollars next year instead of paying it to the Federal Government. Our bill will allow them to make firm plans to save and invest with the assurance that inflation and interest rates will drop.

Last August, I testified before the Committee on Ways and Means in support of many provisions that are a part of the Conable-Hance bipartisan bill we will consider tomorrow. In fact, the bill contains many provisions that are good for America.

At that time, the growing tax burden on the American people was being felt with full force. In the first quarter of 1980, the gross national product dropped at a 9-percent annual rate, while unemployment neared 8 percent. Despite this economic decline, the inflation rate remained around 13 percent in 1980.

Earlier that year, Presidential candidate Ronald Reagan proposed immediate congressional action on a 10-percent individual tax cut and the 10-5-3 system of accelerated depreciation for business plant and equipment. The Reagan proposal was made in recognition of the urgency of our economic ills and the key role of our tax policy in curing these ills.

The need for tax reduction remains urgent. In an economic environment where taxes are increasing 80 percent faster than inflation and 20 percent faster than personal income, the economic growth necessary to lift all Americans to greater prosperity will not be forthcoming.

Now President Reagan has asked the House to continue the process begun during his compaign and help him fulfill the promise which helped him gain the Nation's highest office—a promise of across-the-board rate reductions for all individuals and accelerated cost recovery for businesses. The bipartisan substitute contains both.

One of the points I stressed nearly a year ago in my testimony was the need for reduction of Federal estate and gift taxes. I introduced legislation in January of this year to reduce estate and gift taxes. That bill now has over 100 cosponsors—and more than any other estate tax reduction bill in Congress—attesting to the strong support for these changes.

I am gratified that the committee bill and the bipartisan substitute both contain identical provisions for estate and gift tax reduction such as I have been urging. The bill being considered by the other body also contains provisions to soften the impact of these insidious taxes. The fact that all three tax cut proposals under consideration in the Congress contain language reducing estate and gift taxes almost certainly assures relief for the thousands of farms, ranches, and small businesses subject to "death taxes."

The bipartisan substitute bill would raise the unified credit to correspond to an exclusion of $600,000 by 1987, exempting 99.7 percent of all estates from the estate tax. The maximum estate tax rate would be reduced from 70 to 50 percent over 4 years.

The infamous "widows' tax" would also be eliminated under this legislation by making the marital deduction unlimited.

Further, the gift tax exclusion would be increased from $3,000 to $10,000 per donee, effective January 1, 1982. Certain gifts for medical care and tuition would receive an unlimited exclusion.

Also, the bill would make numerous changes in the current use-valuation provision to expand the availability of the provision to estates that are not eligible under present law and reduce the postdeath restrictions on qualified heirs inheriting specially valued property.

These changes are welcome and are among improvements that I have been working toward for a long time.

There are other provisions in the bipartisan bill that are of great help to my constituents. The increase in the windfall profit tax credit for royalty owners from $1,000 to $2,500 for 1981 will partially lift an unfair burden from those taxpayers who have allowed their land to be used by companies for oil production. Further, for 1982, 1983, and 1984, royalty owners will be exempt from the tax on up to 2 barrels per day, increasing to 4 barrels per day in 1985 and thereafter.

There are many other provisions in the bill that I have advocated, such as reduction of the marriage penalty and indexing of the tax rates to inflation, which cause me to support the bipartisan bill.

This bill will do more to restore incentives to work, save, and invest than any other tax reduction bill in our history. It will do more to promote job creation, productivity growth, and rising real wages for years to come.

PERSONAL EXPLANATION

(Mr. FRENZEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FRENZEL. Mr. Speaker, today on rollcall No. 170, I voted "no" in error. It was my intention to vote "yes."

□ 1850

PERSONAL EXPLANATION

Mr. O'BRIEN. Mr. Speaker, earlier today I was called off the floor and missed rollcall No. 170. Had I been here I would have voted "aye."

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair announces at this time that on tomorrow the House will meet at 9 a.m. There will be no 1-minute speeches. The House will immediately consider a resolution that will come from the Senate concerning adjournment, and then the House will take up the tax bill. So there will be no 1-minute speeches.

VOTING RIGHTS ACT

(Mr. DORNAN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORNAN of California. Mr. Speaker, the most precious building block of our society is the right to vote. People all across our world are dying for freedom. Boat people, refugees, and those in gulags, may flee or be imprisoned for religious freedom, for freedom of speech, but also many, many for that precious franchise—to cast a free ballot for the leadership of their society.

That is why this Member of Congress firmly declares today that he will vote for an extension of the Voting Rights Act of 1965. In 1964 and 1965 I traveled to Alabama and Mississippi to help register black voters. I did it proudly as a conservative and as a Republican. It was Abraham Lincoln, our first Republican President, who freed the slaves. It was the heritage of my party. In 1965 only 29.3 percent of southern blacks were registered to vote. Now that percentage is 56.8—an increase of 27.5 percent. The Voting Rights Act has helped black citizens and other minorities in my own State of California.

I know that all the States have been trying very hard to insure equal protection, including my State but the extension of the Voting Rights Act is more than just a symbolic act. It still brings the franchise to a great many Americans who yearn to fully exercise their citizenship.

The symbolism is also critically important and the reality of results is irrefutable.

Mr. McDONALD. Mr. Speaker, will the gentleman yield?

Mr. DORNAN of California. I yield to the distinguished doctor from Georgia.

Mr. McDONALD. I was wondering if California is one of the States covered by the Voting Rights Act?

Mr. DORNAN of California. Interestingly enough, most Members in the very dynamic area of our country called the South are not aware that the Voting Rights Act has had, as the Supreme Court would say, a penumbra

effect upon California and has helped many minorities there.

Mr. McDONALD. Is California one of the States covered under the Voting Rights Act?

Mr. DORNAN of California. Not totally.

Mr. McDONALD. Would the gentleman in the well be anxious to be sure that California is brought under the Voting Rights Act, or in fact all 50 States be brought directly under the Voting Rights Act?

Mr. DORNAN of California. I would be glad to look at any amendment to that effect. There are several counties in California that fall within the coverage of the Voting Rights Act now.

I would be glad to support an amendment covering our whole State.

Mr. McDONALD. Well, I would certainly be fascinated by an amendment that would indeed bring in all 50 States, because it seems like it is a strange concept of justice that only applies to certain States but does not apply to other States, where if you are illiterate you may vote in the State of Georgia, but if you move to, say, California, you may not vote because you are illiterate.

Mr. DORNAN of California. I believe it would thrill the Speaker if the gentleman from Georgia and I would work together to insure the voting rights of all Americans.

ADMINISTRATION COMPLACENCY OVER THE INEQUITABLE DISTRIBUTION OF CREDIT

(Mr. ST GERMAIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ST GERMAIN. Mr. Speaker, I have consistently expressed my concern over the administration's approach to monetary restraint which starves small businesses with a lack of credit and places heavy burdens on the auto, farming, and housing industries. This concern was heightened due to the $40 billion of credit recently obtained by major oil companies bidding to take over Conoco. The Chairman of the Federal Reserve Board, during last week's overview hearings on the conduct of monetary policy, expressed concern that these billion dollar lines of credit might have a dramatic effect on the interest rates that small businesses and consumers have to pay. Business Week stated on the editorial page of its August 3 edition that these "merger loans crowd out other borrowers and make the Fed's anti-inflation policy more painful than necessary."

Indeed, it seems as if the majority of this country is bearing the costs of restrictive monetary policy while a few behemoths are conducting business as usual. However, the administration has repeatedly stated that its policies do not favor the rich and the powerful; they say that everyone will share the burden of the fight against inflation equally. The current situation is certainly not reflective of the administration's stated aims.

Thus, during the monetary policy hearings I expressed my concerns about the banking practices that led to the existing inequities in the credit market. However, when I asked the Undersecretary of the Treasury for Monetary Affairs, Beryl Sprinkel, if he had any concerns, as Chairman Volcker does, about banking practices which foment what Business Week terms "'unproductive' loans," he replied, "No, sir." Mr. Sprinkel feels that these unproductive loans and their associated effects on the ability of small businesses to survive represent "a very efficient credit allocation system."

These statements raise serious questions as to the administration's resolve to cut the economic pie fairly. Indeed, these events show that the words and the deeds of the administration are not always the same. Hence, we cannot rely on the administration's promise that the rich will not benefit more and suffer less than the poor under their programs; that is a task we must assume ourselves.

A copy of the Business Week editorial is attached for the record.

PRIORITIES ON LOANS

The massive bank loans that the great corporations are using to finance the current wave of mergers create a special problem for the money managers of the Federal Reserve. With money tight and interest rates at record levels, the merger loans crowd out other borrowers and make the Fed's anti-inflation policy more painful than it needs to be. Unless the Fed can find a way to give priority to legitimate borrowers, the demand for easier money may become irresistible.

The Fed has always disliked selective credit controls—on the grounds that money managers should not play favorites. Unlike fiscal policy, which targets taxes and spending at particular groups, monetary policy has been framed in terms of aggregates. In theory at least, the Fed should determine the amount of money, but the market should determine who gets it.

The trouble is that when top-drawer borrowers, such as Du Pont, Seagram, and Mobil, hit the banks for multibillion-dollar loans to finance merger bids, there is less left for small business, would-be homeowners, or other borrowers. The merger programs of the big corporations may be justified—and so may the efforts of the target companies to fight them off—but clearly they increase the demand for money and create hardships for ordinary borrowers.

To take some of the pressures off the market without resorting to formal controls, the Fed could go back to a device that once was considered its most effective weapon. The textbooks call it "moral suasion." It is, in fact, a quiet use of financial muscle. The Fed simply reminds the banks, which may at any time need to borrow at the discount window, that they should avoid "nonproductive" loans. All bankers know what this means, and most of them will undertake an informal credit rationing program if the Fed asks for it.

At the May meeting of the Open Market Committee, the money managers noted "the importance of conveying a clear sense of restraint at a critical time." They should also find a way to convey a clear sense of "first things first" to the banks that serve the U.S.

SQUEEZING A STONE

(Mr. WYDEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WYDEN. Mr. Speaker, I rise in support of this resolution. I would like to give two examples of how interest rates and tight money policies are hurting this Nation and its people.

Recently I was talking to a representative for food processors in the Northwest. He told me that pear canners, who must hold on to large inventories of their product which are financed on credit, are facing an additional cost of up to 10 cents per can because of high interest rates. That is right, almost 10 cents per can. It is not difficult to see who is paying that cost.

Another constituent, who is a realtor, wrote contrasting the situation of a teacher buying a home in 1953 with now. He noted that the first year's interest payment for this teacher went from $337 in 1953 to $7,483 this year—an increase of 22 times.

The teacher's salary only increased about 4.5 times. The price of the home increased six times.

In 1953, interest on this home was 11.7 percent of the teacher's gross salary. Today, it is 57.1 percent of his salary.

In 1953, the teacher by himself could handle the service on this debt. By 1968, he needed help from his spouse to make the monthly payment. If this trend continues, it will take four teachers' salaries to make do.

In 1953, the first year interest on the monthly payment was close to 44.6 percent of what the house was renting for. Today, it is close to 139 percent.

In 1953, at the end of 1 year's payments, the borrower had accumulated $239 on the principal of the loan. Today, he has accumulated only $144.

These two examples show how tight money policies and resulting high interest rates are ripping at the very fabric of our society. They are sapping the vitality of our people, they are discouraging our productive impluse and they are demoralizing our will to get ahead by making it ever more difficult to gain an inch, let alone a mile.

This resolution places the issue squarely in focus. We must reduce Federal deficit spending first, getting the Federal Government out of the borrowing business, if we are to halt inflation's ravages.

Cutting deficit spending will reduce demand for capital as the Federal Government borrows money to pay its debts, sucking away capital from private enterprise—capital that is needed for new companies to get started and for existing companies to expand and modernize; capital that is needed for individuals to buy homes and cars.

Over time, with less competition for credit, interest rates can be lowered. That is because the Federal Government will not be at the front of the line bidding interest rates up for that credit. But also because more capital in circulation means more private investment will spur productivity, creating new jobs and economic activity.

Increased productivity and economic growth will justify expansion of the money supply, which will help keep interest rates down and put us on the road toward economic revitalization.

High interest rates are not mandatory to halting inflation. Indeed, I contend high interest rates laminate into our economy a new permanent layer of inflation.

The solution to the woes of inflation are straightforward enough—balance the Federal budget, stop deficit spending, get the Federal Government out of the borrowing business and spur productivity to achieve growth.

Our votes on the Federal budget and a tax cut should be viewed with this test in mind. A tax cut that raises the deficit and forces more Government borrowing is a step toward insuring a continuation of high interest rates—and more inflation. And whether they buy a house or a can of pears, Americans will feel the pinch.

Sooner or later, we will realize you cannot squeeze water out of stone.

BAIL REFORM

(Mr. HUGHES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUGHES. Mr. Speaker, on Friday of last week I introduced a bill to substantially incorporate into title 18 of the United States Code the District of Columbia's statute authorizing the pretrial detention of persons who pose a danger to the community. This statute has been in existence for approximately 10 years, and it has allowed the Government, in appropriate cases, to detain those persons charged with crimes who are dangerous to other people or to the community.

The constitutionality of the District of Columbia's statute has recently been upheld by the Court of Appeals for the District of Columbia in United States against Edwards. I have every reason to believe that this bill, which substantially incorporates that statute, similarly comports with the Constitution.

This amendment to the Bail Reform Act of 1966 is long overdue. In the Subcommittee on Crime, which I chair, we have heard over and over again that the Bail Reform Act must be amended to permit courts to consider the issue of danger as well as the issue of flight risk, which present law already permits. I have personally spoken with a number of judges, including the Chief Justice of the U.S. Supreme Court, who decry their lack of authority to consider whether the defendant is dangerous, and who have quite candidly told me that, in various indirect ways, they do so any way. The present system is hypocritical and unrealistic. This bill will eliminate the inequities in the present system and make it consistent with present day realities.

This bill would therefore provide that a court can consider whether a particular defendant is dangerous, and if so, the court may detain that defendant. As in the District of Columbia it sets forth stringent procedures with which the Government and the courts must comply before the defendant can be detained. We must and do recognize that any restraint on the defendant's liberty is a great hardship, and that such restraint may not be imposed except when it is clearly appropriate and when the procedures to do so are fair.

There are a number of things we as Members of Congress can do to stem the soaring crime rate in this country. My subcommittee in the past several months has been taking a close look at a number of options, including expanding the very successful Pretrial Services Agencies to all judicial districts, granting limited forms of assistance to State and local criminal justice programs that have a proven track record of success, and requiring urinalysis testing of defendants who are suspected of being narcotics addicts.

In future months, the Subcommittee on Crime will continue to explore solutions to the crime problem. This bill is one step in the fight against crime, and I think that the Members of this body and the public as a whole will consider it a major one.

WHAT THE MONETARIST TEXTBOOKS DON'T TEACH

(Mr. VENTO asked and was given permission to address the House for 1 minute, to revise and extend his remarks, and to include extraneous material.)

Mr. VENTO. Mr. Speaker, the issue of tax cuts versus inflation is highlighted in the simplistic tax program advanced by the Republican Reagan administration.

I think that the results of this economic policy are clear, a devastating collision between reprioritized spending, unrealistic tax promises with questionable economic theory, which will result in higher deficits or unrealitic cuts of important Federal programs all on a base of restrictive monetary policy and high interest rates. The end result will be fuel for the continued high-interest policy and restrictive monetary policy. The lack of discipline for defense spending and tax revenue cuts will surely contradict the goal of reducing inflation.

The impact of this Reagan high-interest policy was evident when the Federal Reserve Chairman, Paul Volcker, appeared last week before the House and Senate Banking Committees to give us his biannual report on monetary policy.

The news Mr. Volcker gave us was not good. He informed us that the Fed intends to maintain the restrictive monetary policy that has been choking and starving important sectors of our economy like small business, agriculture, housing, and automobiles. With local papers throughout the country filled with stories each week about new business bankruptcies, failing farmers, and growing unemployment, I can only wonder how much longer the Fed can ignore the growing crisis. Credit relief must be targeted to the depressed sectors of our economy if we are to prevent the total collapse of certain credit sensitive industries and stem the rising unemployment rate.

The administration spokesman Mr. Sprinkel, appeared before the committee the following day and indorsed this monetary policy.

A restrictive monetary policy works by restricting bank and other lending and by rationing the credit so allowed by high interest rates. What most people do not realize is that this policy affects the economy in a very uneven and inequitable way. While small businessmen, farmers, and consumers cannot afford to use credit when interest rates hit high levels, our largest corporations do not seem unduly affected. Over the last 2 weeks, the papers have reported that cash rich companies such as Mobil, Gulf, Seagram, Du Pont, and Conoco have secured large below prime lines of credit which together total over $35 billion. And for what purpose have these large multinational giants arranged these large credit lines? Mergers and acquisitions; a purely financial, unproductive use of our limited credit resources that creates no new jobs, enables no young family to get an affordable mortgage on a new home, and enables no new plant or inventory expansions by our Nation's small businesses.

Mr. Speaker, I believe that the time has come for the Fed to end the monetarist experiment which it began in October 1979 and begin to forge a new policy that promotes constructive and efficient use of the money and credit that is available. The issue of credit equity must also be addressed. Mergers, takeovers, and conglomerations

should have the lowest priority, if any, when it comes to determining to whom available credit should be extended.

At this time, I would like to enter into the RECORD an article from last Monday's Washington Post by John Kenneth Galbraith entitled "What the Monetarist Textbooks Do Not Teach." Mr. Galbraith's article clearly points out the lessons we should draw from Britain's experiment with monetarism and outlines well the inherently inequitable theory on which a tight monetary policy operates. I would urge all Members to review this useful and revealing article:

[From the Washington Post, July 20, 1981]

WHAT THE MONETARIST TEXTBOOKS DO NOT TEACH

(By John Kenneth Galbraith)

The lessons from the civil disorder in the British cities will not be lost in this country. It is something on which, more than Englishmen, we have the experience. Where people have jobs, reasonably good housing, other urban amenities, and find life, if not perfect, at least benign, these outbreaks do not occur. Where there is despair and especially among the young, there is risk. This we know, but there is one aspect of the British experience that, to our sorrow, we are less likely to notice. That is the relationship between economic policy and urban distress and disturbance. It is a relationship that all, liberal or conservative should recognize, and the British experience is a powerful signal as to its importance.

In most discussion and in much university and textbook teaching, monetary policy is pictured as socially neutral. It is a technical arbitration between the central bank, the bankers, and the business community; it may work or not work, but there is no remarked difference in its impact on different income groups or otherwise on the social structure. Decisions in the calm boardrooms of the Federal Reserve System or the Bank of England are safely distant from such concerns. This is sadly, serious and dangerously wrong, and the British reliance on monetary policy in these last years, the most committed in the industry world, makes it a matter not of theory but of harshly realized experience.

Monetary policy works, and on this there is general agreement, by restricting bank and other lending and by rationing the credit so allowed by high interest rates. It will occur to most that those who receive the high interest rates—banks and individuals with loanable cash—do not suffer from such rates. On the contrary. And neither do affluent citizens who do not need to borrow money. Or cash-rich corporations that are similarly situated. Or those that, though they borrow, have the market power and position that allow then to pass the higher costs of money along to the public.

But, as one passes down the income scale, there comes the deprivation and restraint that it is the purpose of monetary policy to induce. Those who must borrow money for their business, to find housing, to replace an automobile are subject to its effects. Again, this is a matter of experience. In this country the effect of high interest rates on the housing industry, other small business and automobile purchases has been evident to all. In Britain, it has produced the largest failure rate among small businesses in half a century. But the really disastrous effect is yet farther down the income scale.

For monetary policy works against endemic inflation not through some technically neutral nexus that relates the money supply to prices. It works against inflation in a highly organized society such as ours or that of Britain only as it creates enough unemployment so that this restrains trade union claims and enough idle plant capacity so that price increases are forgone, discounts initiated and the unions resisted. Or, a notable recent feature, it forces the removal of production to less unionized, lower-wage areas. Again there is the experience. This is how the claims of the United Auto Workers on Chrysler were contained, how discounts were forced upon the automobile companies and how this became a pattern of restraint in rubber, machinery and other industries. And this is how the policy was worked against the rather more stubbornly resistant unions of Britain.

But long before the UAW and its counterparts succumb to monetary policy, there is the terrible social tragedy for those who have never had a job, are in the wrong place, are of the wrong sex or have the special disadvantage of being of the wrong color or race. A policy sufficiently strong to act against the organized sector of the economy—the world of the unions and the big corporations—comes down with exponential force on the young, unorganized, black and central-city workers or would-be workers. Their unemployment rate, as we and the British have learned, can run to 30, 40 or 50 percent of such workers in the cities. Many do not have unemployment compensation entitlement; and none has supplementary unemployment benefits. This has been the effect of monetary policy in the British cities. It is the way it works or will work everywhere.

I do not believe the monetarists see their policy as a deliberate design for rewarding the rich at the cost of the very poor, although the sources of some of their applause should make them very uneasy. There is, rather, the tendency already mentioned to see the policy as a technical exercise, to ignore its social consequences as somehow unworthy of practical thought. Or the proponents move directly from the money supply to the effect on inflation without consideration of the intervening process and the pain associated therewith. One can even be slightly mystical about the relationship. Responding to British critics last year, Professor Milton Friedman, the supreme protagonist in both countries, said: "We can know that a bird flies and have some insights into how it is able to do so without having a complete understanding of the aerodynamic theory involved." Most important of all, we are made uneasy about anything that suggests an opposition of interest between rich and poor. That is not the way a society is supposed to work. So we suppress mention of it.

Well, we now know what makes monetary policy fly, and we know that—unlike strong fiscal and incomes policies, these being the required alternatives and supplements—its flight does reward the fortunate, penalize the poor. Better the truth. The British are now paying the price for their heavy reliance on monetarism. It is a price no American, whatever his or her income bracket or political faith, can ignore. Social tranquility is just as important for the affluent as for others and for conservatives as for liberals

COMDR. RONALD DODGE

The SPEAKER. Under a previous order of the House the gentleman from California (Mr. DORNAN) is recognized for 10 minutes.

Mr. DORNAN of California. Mr. Speaker, last Friday, July 24, I was honored beyond words to be invited by the family of U.S. Navy Comdr. Ronald Dodge to attend ceremonies at Arlington National Cemetery, when the mortal remains of this young Naval aviator were finally laid to rest in the soil of his native land.

That was not the first time I had gone to that beautiful site to pray by the graveside of an American hero. Truly what Abraham Lincoln said at the Gettysburg Cemetery, "hollowed ground," applies to Arlington. To watch the remains of an American serviceman, who gave the full measure of devotion in the Vietnam war, lowered into the soil of his beloved Nation is a deeply moving experience. Especially when that hero has been missing for 14 years. Especially when all Americans knew he had been alive in enemy captivity.

The eulogy for Commander Dodge was delivered by a former squadronmate, retired Navy Comdr. Wilson F. Flagg. It was beautiful beyond description, so I would like to read it to my colleagues.

Enthusiasm and joy in living.

Perfectionism and satisfaction in a job well done.

Patriotism and courage in serving his country.

Ron Dodge symbolized each of these and more. His merry heart and zestful spirit brought a spark to any room or crowd he entered. His quick smile and seriousness of purpose pervaded the usual circle of his presence whether it be in the squadron readyroom, with his men, at a party, on the ballfield, with his friends, or with his dovoted family, he loved them all.

He was a profound influence on many whose paths he crossed, and was an inspiration in achieving the highest of goals. In a difficult situation, it was Ron who would seek solutions calmly and methodically. His professionalism and devotion to duty were readily apparent to all who knew him. Very few can be called great among mankind, but such was the role of his life that we can say he achieved greatness.

No pilot could have loved flying more than he did. His dedication and love for flying was exceeded only by his love for life. He was warm and caring for his wife and family, delighting in his children's achievements, and sharing these thoughts with friends. These simple jobs of living and enjoying each infinite moment were important to Ron.

An anonymous author once wrote:

Do not stand at my grave and weep for
I am not there. I do not sleep.

I am a thousand winds that blow.
I am the diamond glints on snow.
I am the sunlight on ripened grain.
I am the gentle autumn rain.
When you awaken in the morning's hush.
I am the swift uplifting rush of quiet birds in circled flight.
I am the soft stars that shine at night.
Do not stand at my grave and cry;
For I am not there: I did not die.

Ron's spirit and zeal for life remain alive in our minds and memories. In life he was a leader and a symbol for achievement, even in death he remains a guiding light and symbol for all his countrymen who are still unaccounted for in Southeast Asia.

The world may forget what we say here today, but we must never forget the ultimate sacrifice that Ron gave for his country—be it not in vain. We salute his great example and the greatest tribute we can personally give is to strive for those ideals he so honored. He was a man of peace who experienced war. Ron Dodge, we have all shared a part in your life. We have been waiting for you as a family and friends. No longer will we ask, "Where is he?" For now you have finally come home. Welcome home Ron—you and your family are free at last.

This was the perfect eulogy for Commander Dodge, given by a lifelong friend. His courageous wife, Jan, his tall handsome son, Mark, the beautiful daughter, Wendy, his wonderful mom, his devoted only sister, his stepdad, they were all there, their hearts still aching after 14 long, long years, remembering, remembering their very special hero.

□ 1900

Ron Dodge is remembered by almost all Americans who although they may not associate the name with the famous photograph can never forget that face. Back in 1972, at one of the meetings of the League of Families of American Prisoners and Missing in Action in Southeast Asia, I was waiting outside the main ballroom of the Capital Hilton. The President was in talking to the family members at a closed session. A reporter, an excellent journalist for Life magazine named Loudon Wainwright, waiting in the hallways approached me and said. "If you were I, what would you do for these families?"

I took him into one of the anterooms that was dark and turned on the light. There was a very large picture of Ron Dodge, about 4 feet by 3 feet prepared by a fighting POW brother named Joe McCain. In the picture Ron was standing, full front, after having been beaten and spit upon and dragged through the streets of the village, near where he had bailed out over North Vietnam. His face was set—determined, worried but bravely defiant. His fists clenched in resolution. I said, "Mr. Wainwright, if I were you I would put Ron Dodge's picture on the cover of Life magazine. Look at his torn flight suit. Look at the loose bandage around his head. Look at his hands. Look at his eyes. Look at them. That's not just fear in his eyes, but determination that somehow or someway he will try to survive and will never, never disgrace the country that he loves and serves."

I told Loudon Wainwright that this heroic very real scene reminded me of the young navy flyer at the end of the only movie I had seen in my lifetime about Americans in combat that was flawless. "The Bridges of Toko-Ri". I saw it when I was 21 years of age of pilot training at an Air Force base theater. You could have heard a pin drop when the final screen credits came up. The final scene involved an admiral in that film played compellingly by Frederic March. Tarrant was the admiral's name in this great story by James Michener, one of America's finest writers.

At the end of the film when the lead character, Lieutenant Brubaker, played by William Holden had been shot down and killed on the ground by the Communists somewhere in North Korea, the admiral sat on the bridge of his attack carrier stunned by the news he had lost another young pilot. He had more or less mentally adopted Lieutenant Brubaker to replace the young son he had lost in the Battle of Midway in World War II. After he was told Brubaker had been shot on the ground by enemy troops, the admiral said slowly, very deliberately:

Why is America lucky enough to have such men? They leave this tiny ship and fly against the enemy. Then they must seek the ship, lost somewhere on the sea. And when they find it, they have to land upon its pitching deck. Where did we get such men?

I thought of those words by that symbolic admiral of Michener's creation at Ron Dodge's graveside. Yes, where do we get such men in this big, soft country of ours? Why are we lucky enough to have men like this? And women like Jan?

The Vietnamese conquerors of Indochina, knew Ron's fate, when he died and where. Where his remains were over these last 14 years. They knew when they saw him on the cover of Life magazine displayed in every major capital across this globe in 1972 that they were caught red handed violating the Geneva Convention. They knew when his picture appeared on the front page of Pravda, in Moscow when it was a full-page spreadout in the Life magazine of France called "Paris Match." They have known over these long years exactly where he was resting in the soil of his Vietnam. And to send him home 14 years later to finally ease the psychological suffering of his young son, his young daughter, and his loyal wife was not a final act of mercy. It was merely a response to the pressure finally building up in this country of ours, from coast to coast, demanding a final honorable resolution to this horrendous nightmare of our missing in action in Indochina.

Phan Van Dong the other night on a CBS special documentary said the United States is "excessively burdened by the past," that we should "establish relations of peace." If the ruling Government in Hanoi wants this they had better give us back immediately more than the heroic remains of three men. They had better give us back something besides the treasured bones of Ron Dodge, Steve Musselman, and Richard VanDyke.

There are 450 or more boxes in a warehouse in Hanoi that is hallowed ground to Americans because it is a U.S. cemetery that we want returned en mass to this country.

The North Vietnamese, who carefully read every word we put in the CONGRESSIONAL RECORD of this great legislative body, who clip and read carefully every single magazine and paper in the free world better listen. We know they hear every word I am saying at this moment . . . and clearly. They will read my words within the next 48 hours, so I am telling them "move, and fast," on the live Americans that many of us believe you still hold. And move, and fast on those 450 remains that we know are in Hanoi at this very moment. Comdr. Ron Dodge's funeral was an inspiration. His wife is an inspiration. His mom, his sister, his children are inspiring to all of us Americans. The 14 years that they have suffered for all of us cannot be in vain. I think that Ron may be the trigger to finally resolving this unparalleled tragedy in American history.

Mr. Speaker, I close paraphrasing again James Michener's words:

"Where did we get such men?"

Where do we get such wives and such children? Why is our country lucky enough to have them? Only God can answer that.

PETROLEUM DISRUPTION MANAGEMENT ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. TAUKE) is recognized for 10 minutes.

● Mr. TAUKE. Mr. Speaker, today, along with seven of my colleagues, I am introducing the Petroleum Disruption Management Act, legislation designed to prevent or lessen varying degrees of petroleum disruptions. There is an essential need for this legislation. The expiration of the Emergency Petroleum Allocation Act of 1973, on September 30 of this year, will leave a gaping hole in our ability to respond to emergency petroleum shortages. Unless a new and better national program is substituted for the EPAA—one that eliminates many of the former

statute's shortcomings—we will be faced with a multitude of State emergency plans, which could, in fact, work to our disadvantage and actually exacerbate a potential regional or national petroleum disruption.

Currently, all is well on the petroleum supply front. Crude oil and petroleum products are plentiful. However, the glut of crude oil and products has given us a false sense of security. The vast majority of energy experts view the glut as only a temporary phenomenon. We will undoubtedly have another petroleum crisis.

It behooves us, therefore, to address the issue of emergency energy contingency planning, particularly now that the political environment is calmer and the opportunity for a more thoughtful and effective approach is available. If we wait until we are in the midst of another energy crisis to develop an emergency petroleum policy, the result will be quite the opposite of what we want. A crisis atmosphere may lead to the development of bad legislation—legislation that could likely result in stricter Federal measures than perhaps are necessary.

Instead, we need to develop legislation now that will help minimize regional shortages before they become national crises while, at the same time, providing the President with authorities to deal with a national energy emergency.

The intent of the legislation is to give the President the flexibility and the necessary management tools to deal with petroleum disruptions in a timely and effective manner. The options outlined in this bill would allow the marketplace to work to the maximum extent possible so that we do not have to depend on massive regulatory action by the Federal Government to find solutions to energy disruption problems. The bill would require the President, for instance, to submit a report on the advisability of using tax incentives to encourage refiners to stockpile crude oil and products during periods of surplus.

More importantly, it would require the President to develop four management programs, which, when approved by Congress, would be placed on the shelf for selection at a later time. They would be removed for implementation only upon approval by Congress. The programs would be designed to address particular kinds of disruptions, ranging from substantial regional shortages to severe national emergencies.

The four programs are based on the following: First, use of the strategic petroleum reserve; second, use of private dedicated reserves; third, implementation of national crude oil sharing; and fourth, use of petroleum product management techniques.

The first management tool would be used to deal with either regional shortages of a lesser magnitude or full-blown national emergencies. To address either kind of situation, the Department of Energy would be authorized to sell oil from the strategic petroleum reserve, upon determination by the President of the need to respond to an imminent or existing disruption.

The second tool—use of private dedicated reserves—would serve as a transition program to deal with regional problems until the strategic petroleum reserve was filled to a desirable level. The PDR would give regional refiners access to crude oil. It would be operated as a limited exchange program between "designated refiners" with adequate supplies and "qualified refiners," who, because of the disruption, would be forced to operate below the national utilization rate. To be eligible to receive crude oil from designated refiners, those qualified refiners would be required to meet specified standards such as retrofitting their refineries, have the capability to process heavy or sour crude oil, and maintaining specified inventories. As a result, inefficient refiners would be prevented from gaining access to crude oil. An exceptions procedure would allow other refiners to qualify for crude oil on a case-by-case basis.

The third technique—a national crude-oil-sharing program—is designed to meet a severe national shortage. Refiners operating above the national average would be required to share crude oil with those refiners operating below the average.

The final technique—the petroleum product management program—would only be used as a last resort, in the event that all other management tools failed to produce an acceptable result. The President would have the flexibility to deal with an extreme emergency as he saw fit—either by using price and allocation controls, a national rebate program, or any other plan he found acceptable at the time. To the maximum extent possible, the plan would be designed to protect the following: public health, safety, and welfare; national defense; the maintenance of public services; and the maintenance of agricultural operations, related to the production, processing, and distribution of food.

A strong point of the legislation is its avoidance of a statistical trigger for the implementation of any of the management plans. Anyone who has studied the issue of contingency planning has found that it is virtually impossible to develop such a trigger, given the vast array of potential regional and national shortage situations. The most realistic and effective trigger is a political one. Key language in the bill would require the President and Congress to act in concert in implementing one of the management programs. At the same time, the bill would automatically sunset the activating resolutions within 120 days, unless reauthorized by Congress, thereby avoiding long-term Government involvement.

In developing his contingency plans and in responding to petroleum disruptions, the President would benefit from the advice of a Cabinet-level Emergency Energy Council and Energy Advisory Committee, composed of industry representatives, consumers, and petroleum users. The Energy Advisory Committee, in particular, could be used to persuade industry to manage regional shortages, thereby preventing the implementation of any of the four standby management plans.

This bill, with its focus on sequential management, sends the right signals to the country. It asks Government to develop a feasible plan during a noncrisis situation. It asks the private sector to depend on self-help measures to meet its basic energy needs, warning private industry not to expect a massive bailout by Uncle Sam. In particular, it tells small and independent refiners to retrofit and "sour up" if they want to become eligible for crude oil sharing during a disruption.

It builds tension into the system to prevent escalation to the final stage of sequential management by giving the advisory councils an opportunity to use "jaw-boning" and other measures short of Federal intervention to solve disruption problems.

It only supplements the marketplace to protect national security, public safety and health, and our agricultural community.

And finally, while it does give the President discretionary authorities to act during an emergency, the authorities can be used only with the cooperation of Congress.

Mr. Speaker, during the spring of 1979, my home State of Iowa, and most of the Midwest, for that matter, experienced severe shortages of diesel fuel. Yet, the Nation as a whole did not, since fuel was in generally plentiful supply. This is the kind of problem that I believe will be more typical of the energy problems that we will experience in the future. While the diesel fuel shortages of 1979 gave the appearance of being a national problem, they were, in fact, only characteristic of a regional disruption.

The 1979 experience highlights the fact that rural America is particularly vulnerable to supply disruptions. When supplies get tight, those refiners serving rural markets tend to be the first ones to feel the pinch because they are the ones who are crude deficient. Had we had a Petroleum Disruption Management Act on the books during the spring of 1979, I feel confident the high spot market prices and the shortages we experienced would

have been prevented. And they would have been prevented without massive Government intervention.

I believe the concept of sequential management is an innovative and a realistic approach to a very tough issue. I believe this bill can serve as a starting point as we study contingency planning issues and reach agreement on a suitable replacement for the Emergency Petroleum Allocation Act. I urge my colleagues to join with me by cosponsoring this legislation. A fact sheet on the bill follows:

PETROLEUM DISRUPTION MANAGEMENT ACT OF 1981

Purpose: Provide President with flexibility and management tools to deal with varying degrees of potential regional and national petroleum disruptions. Allows for selection from those tools to best respond to given circumstances in a disruption.

Substitute for Emergency Petroleum Allocation Act.

Preempt multitude of conflicting state emergency plans.

Develop legislation in non-crisis environment. Designs set of tools before disruption occurs.

Procedure: Require President to develop 4 management plans, to be approved by Congress, and placed on standby to deal with disruptions.

Disruption management plans:

(1) Strategic Petroleum Reserve (SPR): DOE reports to Congress on analysis of minimum volumes of reserves to be maintained as necessary for national defense needs. SPR plan to be modified to allow use of SPR oil during substantial regional and national crude oil disruption once adequate volume is available.

(2) Private dedicated reserve (PDR): Provide crude access to deal with regional shortages.

Designated refiner (major seller) operating in excess of national average would sell to qualified refiner (small and independent), (a) whose runs fall a specified percentage below average, and (b) who cannot replace lost supplies through own efforts except by paying price, in excess of weighted average price, considering economically-based quality differentials.

Additional requirements may be placed on refiner to maintain qualified status (reconfigure; heavy/sour-up; storage):

Exceptions procedure would allow other refiners to apply for qualified status on a case-by-case basis.

Program Operation: Price paid would not exceed weighted average price during prior 60 days for domestic and imported oil, including adjustments for transportation, gravity, sulfur, and handling or service charge. Reimbursement mechanism provided for designated refiners (seller equalization).

PDR function could be replaced by SPR once adequate fill levels had been reached for dealing with substantial disruption.

(3) National Crude Oil Sharing Program: Provides for sharing of crude oil among all regions and areas during national shortage.

Any refiner operating above national average would sell to those operating below average.

Weighted average price plus adjustements would apply.

(4) Petroleum Product Authorities: In the event of a national emergency, President would have authority to implement price and allocation controls, or an emergency use fee (with/without rebate), or any other program specified in regulation.

Would only be implemented as measure of last resort.

Priorities same as those in current EPAA legislation.

Measures used prior to activation of plans:

Dependence on private stocks and marketplace.

Energy Advisory Committee, composed of all segments of petroleum industry, consumers, and users to help persuade industry to manage regional shortages.

Presidential study to determine advisability of providing tax incentives to encourage stockpiling during the surplus and drawdown during shortage.

President can utilize 300,000 barrels of SPR oil per day for 90 days without approval of Congress to mitigate regional shortages.

Implementation Process (Trigger):

President determines, with consent of Congress, that particular management plan should be pulled off shelf.

President may utilize SPR or PDR to distribute and allocate crude oil if a substantial crude oil supply disruption exists or is imminent. Substantial disruption encompasses regional shortages, whether due to price anomalies or supply restrictions.

President may implement SPR, national crude sharing, or standby product authorities if severe petroleum supply interruption exists or is imminent, or to comply with IEA obligations. Such action also requires passage of a Joint Resolution by Congress. Severe interruption covers national shortfalls.

Congress may initiate and require any of the above actions through passage of a Joint Resolution. Presidential veto rights apply, with Congressional override of two-thirds.

Joint Resolution: Minimum number of cosponsors for initiation, and priority treatment for vote within a short period of time.

Any program activated cannot exceed 120 days, without reauthorization.

Key features and advantages of this legislation:

No government intervention in the marketplace if no disruption.

Gives President discretionary, but not unlimited, authorities.

Keeps Congress involved, both as a potential initiator, and as a check on excessive action.

Allows for flexible and timely response to disruptions, without specifying a mandatory, numeric trigger.

Deals with variety of disruptions, thus minimizing adverse price and supply effects or agriculture and other sectors.

Encourages self-help measures from private industry.

Minimizes regional shortages before they become national crises.

Sunsets any management program with 120 days.●

REQUESTING THE WHEREABOUTS OF RAISA RUDENKO

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LENT) is recognized for 5 minutes.

● Mr. LENT. Mr. Speaker, I would like to take this time to bring to the attention of my colleagues, another sad chapter in the story of the Rudenko family. Raisa Rudenko, the wife of the first chairman of the Ukrainian Helsinki group, Mykola Rudenko, has mysteriously disappeared from her apartment in Kiev. Since April 14, 1981, she has not appeared at prearranged meetings with friends and relatives.

Mr. Speaker, this situation gives me just cause to be concerned as to the whereabouts of Raisa Rudenko especially in view of the murders of artists Alla Horska, Rostyslav Palecky, Victor Kindratyshyn and composer Volodymyer Ivasiuk along with many other Ukrainian activists. I pray that we do not have to add Mrs. Rudenko's name to a list of those who have fallen victim to the programed internal terrorism in the U.S.S.R. This sudden and mysterious disppearance is just one of many that have gone unexplained.

I demand that the Soviet Union account for the whereabouts of Mrs. Rudenko and other Ukrainians who have mysteriously disappeared, been thrown into prison on trumped-up charges or have been killed. These blatant violations of the Helsinki accords on human rights must cease.

Mr. Speaker, it is my hope that my fellow colleagues join with me in demanding the Soviet Union end the cruel and brutal persecution of the Ukrainian Helsinki group, and reveal the fate of Raisa Rudenko and others who have vanished into the unknown.●

ARGUMENTS IN FAVOR OF THE DEMOCRATIC TAX BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Missouri (Mr. VOLKMER) is recognized for 20 minutes.

Mr. VOLKMER. Mr. Speaker, Members of the House, I have just returned this evening from my district where I was attending to flash flooding and excess rainfall in my district.

However, while returning by way of automobile to the St. Louis Airport I listened to a radio broadcast of a very human interest program in progress over one of the St. Louis radio stations as I was traveling to St. Louis. On it, they were espousing through one of what I call the "Disciples of the President" on the President's economic recovery program and on the tax proposals that we will vote on tomorrow.

During the conversation of the person with the radio station and the guest, who is a very intelligent person whom I have spoken to myself previously, there were two phrases that were used by this gentleman that made me think a great deal about where this country is going and the philosophy behind the Reagan proposal. One of the phrases that the gentleman used in espousing the President's

Recovery Act and espousing the President's tax program was that in this great country each of us can use our God-given talents to better ourselves. I thought of that, and it did not take a lot of thought to realize that this is a philosophy behind the President, behind those who believe in his tax proposal.

What does it tell me? It tells me that those people, including the President, believe that I am to use my talents that I, as a Christian, believe that God gave to me for the purpose of bettering myself, for accumulating wealth. I disagree with that philosophy, strongly disagree, and have always disagreed with that. I firmly believe I should use those God-given talents that have been given to me as a good Christian for not only myself and my family, but for my fellow man. I believe strongly that some of us who are given those talents over and above others, that God firmly gave me those talents to use not only for the betterment of myself, but for the betterment of mankind.

□ 1910

And those talents are not to be used solely for the accumulation of wealth but used, as I said before, for the betterment of others, whether it be through the legislative process or through personal endeavors.

I think that that is what is seen as a difference between the Democratic tax proposal and the President's tax proposal, because the President's tax proposal is mostly based on the idea that those who will benefit from it are those basically with the talents. And those are, following the Judeo-Christian belief, God-given talents. Those are the people who have those talents, and if they are to accumulate the wealth, the philosophy then of the President is that that wealth is to be used for the benefit of those people who receive it.

There was another phrase that bothered me. One person called in and used a phrase that is commonly heard and has been in the past, and that is "the redistribution of wealth." The person who was there as a guest of the program was asked, "What does redistribution of wealth really mean?"

"That is a Communist philosophy or socialist philosophy, to redistribute the wealth by taking it away from the wealthy and giving it to those who do not have it."

But I say to the Members that redistribution of wealth works both ways. We can redistribute the wealth through taxation upon the poor and the middle-income people and permit those who have the talents and those who are wealthy to continue to accumulate more. There are two sides to the idea of redistribution of wealth, and in my opinion, through the President's economic recovery program, we will see a redistribution of the wealth, should it pass; we will see more of a redistribution of the wealth than we have ever seen before in the history of this country, and that redistribution will not be from the wealthy to the middle-income people or the poor, but it will be just in the opposite direction. It will be from the middle-income people and the poor to the wealthy. And as a result we would have fewer people on the middle-income level, we would have more people who would be on a poverty level, and we would have more people who are wealthy. Supposedly in this society and under this philosophy, those who are wealthy will then decide what they want to do and how they want to use that wealth to benefit those who are among the poor. If they desire not to benefit them, that is their right not to do so.

We have seen this in the past, whether it be under other Presidents, whether it be under President Grant, President Harding, or President Coolidge, or whether it was under former kings of other countries. We have seen the redistribution of wealth from the poor and the middle-income people to the wealthy, but I do not believe it would last very long in this country.

I personally feel that the Democratic tax proposal which we will vote on tomorrow is not as slanted, even though it, too, is slanted to some extent, toward that same redistribution. It is not nearly as slanted to the redistribution of wealth from the poor and the middle-income people to the wealthy.

Mr. Speaker, I plan, therefore, to vote for the Democratic tax proposal and not for the President's tax proposal. I feel that the economic conditions of this country warrant the Democratic tax proposal and not that of the President.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kentucky (Mr. MAZZOLI) is recognized for 5 minutes.

● Mr. MAZZOLI. Mr. Speaker, I was unavoidably absent on Thursday, July 23, 1981. Had I been present, I would have voted:

"Yea" on rollcall No. 156, an amendment to the energy and water development appropriations bill for fiscal year 1982 to reduce by $198 million the funds for general construction, including $189 million in funding for the Tennessee-Tombigbee Waterway project;

"No" on rollcall No. 158, an amendment to the energy and water development appropriations bill to delete $17.8 million in construction funds for the Stonewall Dam in West Virginia; and

"Yea" on rollcall No. 159, an amendment to the energy and water development appropriations bill to delete $4 million in construction funds for the Garrison diversion unit, in North Dakota.●

BUDGET COMMITTEE EARLY WARNING REPORTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma (Mr. JONES) is recognized for 15 minutes.

● Mr. JONES of Oklahoma. Mr Speaker, this week the House of Representatives is scheduled to vote on six bills that provide spending for fiscal year 1982—the Agriculture, legislative, Treasury, Commerce-State-Justice, Transportation, and military construction appropriation bills. Also scheduled is a fiscal year 1981 spending bill, the ADAP authorization. The tax bill, recently reported by the Ways and Means Committee, will be considered. I have asked the staff of the Budget Committee to prepare early warning reports to the House. These materials compare the total amount of spending, credit, or revenues provided in these bills with the targets for such spending, credit, or revenues that result from congressional approval of the first budget resolution for fiscal year 1982. I intended to insert into the CONGRESSIONAL RECORD these staff analyses, and analyses of all other appropriations, entitlement, or revenue bills as they are scheduled for floor action. I believe that it is very important for the House to have information that compares such bills to the budget resolution—achievement of the resolution spending and revenue targets is not likely to occur unless the Members are clearly ware of the budget impact of their votes.

EARLY WARNING REPORT HOUSE BUDGET COMMITTEE

H.R. 4182, A BILL TO PROVIDE FUNDS FOR AIRPORT DEVELOPMENT AND PLANNING GRANTS (ADAP) FOR FISCAL YEAR 1981

This bill is consistent with the fiscal year 1981 budget resolution.

Staff analysis

Committee: Public Works and Transportation.

Subcommittee: Aviation.

Chairman: Mr. Mineta (California).

Ranking minority member: Mr. Clausen (California).

Scheduled: Monday, July 29, 1981 (Suspension Calendar).

I. Description of bill

The bill provides $450 million in fiscal year 1981 budget authority and $45 million in outlays for airport development and planning grants (ADAP grants), with funds provided from the Airport and Airways Trust Funds.

II. Comparison with revised second budget resolution

The bill funds ADAP at a level totally consistent with the $450 million assumed in the Revised Second Budget Resolution for Fiscal Year 1981.

III. Summary table

[In millions of dollars]

	Budget authority	Outlays
1. Amounts in bill	450	[1] 45
2. Prior action	715,195	660,962
3. Total action to date	715,645	661,007
4. Revised Second Budget Resolution	717,500	661,350
5. Over (+)/Under (−)	−1,855	−343
6. Amounts assumed but not yet considered		
7. Over (+)/Under (−)	−1,855	−343

[1] The outlays are scored against the Appropriations Transportation Subcommittee and are shown here only as a comparison to the Revised Second Budget Resolution ceilings.

IV. Explanation of over/under

The level of spending for fiscal year 1981, including this bill, is lower than the Revised Second Budget Resolution ceilings because the fiscal year 1981 Supplemental/Rescission bill appropriated less than the amount allocated for it in the Revised Second Budget Resolution.

V. Comparison with the President

The President's budget assumes $450 million in budget authority for the ADAP program as provided in this bill.

VI. Amendments

No amendments are permitted under suspension of the rules.

VII. Definitions of terms in summary table, section III

Line 1. Amount in bill: the amount of direct spending in fiscal year 1981 that would result from enactment of this bill.

Line 2. Prior action: the fiscal year 1981 total budget level based on all enacted spending legislation and H.J. Res. 308, HHS urgent supplemental appropriations.

Line 3. Total action to date: line 1 plus line 2.

Line 4. Revised Second Budget Resolution: the fiscal year 1981 ceilings agreed to as part of this spring's Budget Resolution.

Line 5. Over (+)/Under (−): line 3 minus line 4.

Line 6. Amounts assumed but not yet considered: these are amounts for fiscal year 1981 that are assumed in the Revised Second Budget Resolution but have not yet been reported.

Line 7. Over (+)/Under (−): line 5 plus line 6.

EARLY WARNING HOUSE BUDGET COMMITTEE

H.R. 4119, FISCAL YEAR 1982 AGRICULTURE, RURAL DEVELOPMENT, AND RELATED AGENCIES APPROPRIATIONS

The bill is under its targets for discretionary spending.

Staff analysis

Committee: Appropriations.
Subcommittee: Agriculture.
Chairman: Mr. Whitten (Mississippi).
Ranking minority member: Mrs. Smith (Nebraska).
Scheduled: Monday, July 27, 1981.

I. Description of bill

This bill provides funds for the Department of Agriculture for fiscal year 1982, and for related independent agencies.

The bill as a whole is *under* the 302(b) targets for this subcommittee by $1,448 million in budget authority and $1,201 million in outlays (the sum of lines 5 and 12 below). If amounts assumed in the Budget Resolution but not yet considered are added, and mandatory programs are fully funded, the subcommittee could be under its targets by $389 million in budget authority and $222 million in outlays (the sum of lines 7 and 14).

II. Comparison with target for discretionary appropriations action

Pursuant to the Budget Act and HBC scorekeeping, the subcommittee has *two* targets: one for discretionary programs and one for mandatory programs. Since the Appropriations Committee is bound by existing entitlement law, it generally cannot effectively change the amounts required for the funding of mandatory programs. Its target for discretionary programs is therefore the main focus for this Early Warning report. Further, if the conference report on this appropriation bill exceeds the target for discretionary budget authority, the bill will be subject to the "delayed enrollment" provision of Section 305 of the fiscal year 1982 First Budget Resolution. As shown on line 7 below, the bill plus discretionary amounts not yet considered is *under* the 302(b) target for discretionary action by $540 million in budget authority and $455 million in outlays.

III. Summary table

[In millions of dollars]

	Budget authority	Outlays
The amount shown below are only for discretionary 1982 spending in this bill:		
1. Discretionary amounts in bill	20,039	14,777
2. Prior Action	−6	
3. Total action to date	20,033	14,777
4. 302(b) target	21,481	16,148
5. Over (+)/Under (−)	−1,448	−1,371
6. Amount assumed but not yet considered	908	916
7. Over (+)/Under (−)	−540	−455
The amounts shown below are only for mandatory appropriations included in this bill:		
8. Mandatory amounts in bill	990	2,338
9. Prior action	2,152	1,992
10. Total	3,142	4,330
11. 302(b) target	3,142	4,160
12. Over (+)/Under (−)		+170
13. Supplemental amounts needed	151	63
14. Over (+)/Under (−)	+151	+233

IV. Explanation of over/under

This bill is under the discretionary targets. The total of the 302(b) subdivisions made by the Appropriations Committee must equal the total amounts of 302(a) allocation, but the assumptions which make up the subcommittee target need not be the same as the program assumptions that underlie the Budget Resolution. The specific assumptions behind the 302(b) targets are not known—as a result, the specific programmatic reasons that the bill is under the subcommittee targets cannot be precisely identified.

The amounts assumed but not yet considered reflects the difference between the Budget Resolution and the amount appropriated by the Appropriations Committee for food stamps. The Appropriations Committee recommended appropriations for food stamps only for the period September 1, 1981, through August 15, 1982. The Appropriations Committee recommended $9,765 million in budget authority for food stamps. This is the full amount requested in the President's budget for fiscal year 1982. The time period restriction imposed by the Appropriations Committee is intended to allow the President time to carefully review the new food stamps law and to analyze the new funding requirement, particularly with regard to the operation of the food stamps program in Puerto Rico.

For mandatory items, the bill plus assumed "full funding" of mandatory items would be over its targets primarily because the targets seem not to make an allowance for the civilian agencies pay raise that will become effective this October.

V. Comparison with the President (discretionary amounts only)

This bill is over the President's requests for items in the bill by $232 million in budget authority and $254 million in outlays.

VI. Credit

The Budget Resolution contains *nonbinding* targets for credit program amounts. This is the first year that there has been a credit scorekeeping system. There is no 302(a) and 302(b) allocation for credit program annual limits. For comparative purposes only, the table below shows the bill and First Budget Resolution assumptions.

[In millions of dollars]

	Direct loan obligations	Primary guarantee commitments	Secondary guarantee commitments
1. Credit program limits in bill	8,080	731	
2. Credit limits assumed in resolution but not acted on in the bill		5,145	
3. Credit programs not subject to limit	6,736	5,474	
4. Total in bill	14,816	402	
5. Budget resolution assumption	13,747	−148	
6. Over (+)/Under (−)	+1,069	+550	

The main increases in direct loans are for disaster loans and water and sewer facility loans. The Budget Resolution reflected only $1.35 billion for direct disaster loans. The President's request reflected $1.6 billion for disaster loans of which $250 million were to be guaranteed loans. However, numerous fact sheets by the Administration indicated the Administration had intended the full $1.6 billion be allocated to direct loans. The bill also sets a limit of $450 in direct loans for water and sewer facility loans. The Budget Resolution assumes a zero level.

The main increases in guaranteed loans result from the bill allowing for $300 million in Industrial Development loans and $250 million for alcohol fuel production facilities loans. The Budget Resolution assumes zero levels of funding for both programs. The bill also does not place a limit on Rural Electrification and Telephone Revolving Fund guaranteed loans. The Budget Resolution assumes a limit.

VII. Amendments.

None known at this time.

VIII. Definitions of terms in summary table, section III

Line 1. Discretionary amounts in bill: discretionary FY 1982 appropriations in H.R. 4119.

Line 2. Prior action: the FY 1982 budget authority and outlays for this subcommittee that were appropriate in prior bills.

Line 3. Total action to date: line 1 plus line 2.

Line 4. 302(b) target: the target for discretionary appropriations for this subcommittee set by the Appropriations Committee pursuant to the Budget Act.

Line 5. Over (+)/Under (−): line 3 minus line 4.

Line 6. Amounts assumed but not yet considered: these are amounts assumed in the fiscal year 1982 Budget Resolution for

which funding has been deferred by the Appropriations Committee, probably until next Spring's supplemental appropriation bill.

Line 7. Over (+)/Under (−): line 5 plus line 6.

Line 8. Mandatory amounts in bill: funding for mandatory programs (entitlements).

Line 9. Prior action: outlays from budget authority enacted for years prior to fiscal year 1982, plus any permanents assigned to the Appropriations Committee.

Line 10. Total: line 8 plus line 9.

Line 11. 302(b) target: the target for mandatory amounts for this subcommittee set by the Appropriations Committee. The target set by the Appropriations Committee includes the effect of assumed authorizing legislation that would change the level of mandatory programs.

Line 12. Over (+)/Under (−): line 10 minus line 11.

Line 13. Supplemental amounts needed: amounts for any new entitlement legislation assumed in the Budget Resolution, for the October 1 pay raise, and to fund mandatory items in the bill at the level estimated in the Budget Resolution.

Line 14. Over (+)/Under (−): line 12 plus line 13.

H.R. 4121, FISCAL YEAR 1982 TREASURY-POSTAL APPROPRIATIONS

This bill is under its targets for discretionary spending.

Staff analysis

Committee: Appropriations.

Subcommittee: Treasury, Postal Service, General Government.

Chairman: Mr. Roybal (California).

Ranking Minority Member: Mr. Miller (Ohio).

Scheduled: Tuesday, July 28, 1981.

I. Description of bill

This bill provides funding for the Department of the Treasury, the U.S. Postal Service, the Executive Office of the President and certain independent agencies for fiscal year 1982.

The bill as a whole is under the 302(b) target in budget authority by $454 million in budget authority and $226 million in outlays (the sum of lines 5 and 12 below). If amounts assumed in the Budget Resolution but not yet considered are added, and mandatory programs are "fully funded", the subcommittee could be $228 million under its 302(b) target in budget authority and $114 million in outlays (the sum of lines 7 and 14).

II. Comparison with target for discretionary appropriations action

Pursuant to the budget act and HBC scorekeeping, the subcommittee has *two* targets: one for discretionary programs and one for mandatory programs. Since the Appropriations Committee is bound by existing entitlement law, it generally cannot effectively change the amounts required for the funding of mandatory programs. Its target for discretionary programs is therefore the main focus for this Early Warning report. Further, if the conference report on this appropriation bill exceeds the target for discretionary budget authority, the bill will be subject to the "delayed enrollment" provision of Section 305 of the fiscal year 1982. First Budget Resolution. As shown on line 7 below, the bill plus discretionary amounts not yet considered is *below* the 302(b) target for discretionary action by $331 million in budget authority and $235 million in outlays.

III. Summary table

[In millions of dollars]

	Budget authority	Outlays
The amounts shown below are only for discretionary 1982 spending in this bill:		
1. Discretionary amounts in bill	5,675	5,265
2. Prior action	.....	.....
3. Total action to date	5,675	5,265
4. 302(b) target	6,129	5,512
5. Over (+)/Under (−)	−454	−247
6. Amounts assumed but not yet considered	123	12
7. Over (+)/Under (−)	−331	−235
The amounts shown below are only for mandatory appropriations included in this bill:		
8. Mandatory amounts in bill	4,091	4,091
9. Prior action	.....	420
10. Total	4,091	4,511
11. 302(b) target	4,091	4,490
12. Over (+)/Under (−)	.....	−21
13. Supplemental amounts needed	+103	100
14. Over (+)/Under (−)	+103	+121

IV. Explanation of over/under

The total of the 302(b) subdivisions made by the Appropriations Committee must equal the total amounts of the 302(a) allocation, but the assumptions which make up the subcommittee targets need not be the same as the program assumptions that underlie the Budget Resolution. The specific assumptions behind the 302(b) targets are not known—as a result, the specific programmatic reasons that the bill is under the subcommittee targets cannot be precisely identified.

Amounts assumed in the Budget Resolution but not yet considered (line 6) consists of contributions to the international buffer stocks ($120 million in budget authority, $10 million in outlays) and the Domestic Policy staff ($3 million in budget authority and $2 million in outlays).

For mandatory items, the bill plus assumed "full funding" of mandatory items would be over its budget authority target only because the target seems not to make an allowance for the civilian agencies pay raise that will become effective this October.

V. Comparison with the President

This bill is below the President's requests for items in the bill by $220 million in budget authority but is $10 million above the President's requests in outlays.

VI. Credit

None.

VII. Amendments

None known at this time.

VIII. Definitions of terms in summary table, section III

Line 1. Discretionary amounts in bill: discretionary fiscal year 1982 appropriations in H.R. 4121.

Line 2. Prior action: the fiscal year 1982 budget authority and outlays for this subcommittee that were appropriated in prior bills.

Line 3. Total action to date: line 1 plus line 2.

Line 4. 302(b) target: the target for discretionary appropriations for this subcommittee set by the Appropriations Committee pursuant to the Budget Act.

Line 5. Over (+)/Under (−): line 3 minus line 4.

Line 6. Amounts assumed but not yet considered: these are amounts assumed in the fiscal year 1982 Budget Resolution for which funding has been deferred by the Appropriations Committee, probably until next Spring's supplemental appropriation bill.

Line 7. Over (+)/Under (−): line 5 plus line 6.

Line 8. Mandatory amounts in bill: funding for mandatory programs (entitlements).

Line 9. Prior action: outlays from budget authority enacted for years prior to fiscal year 1982, plus any permanents assigned to the Appropriations Committee.

Line 10. Total: line 8 plus line 9.

Line 11. 302(b) target: the target for mandatory amounts for this subcommittee set by the Appropriations Committee. The target set by the Appropriations Committee includes the effect of assumed authorizing legislation that would change the level of mandatory programs.

Line 12. Over (+)/Under (−): line 10 minus line 11.

Line 13. Supplemental amounts needed: amounts for any new entitlement legislation assumed in the Budget Resolution, for the October 1 pay raise, and to fund mandatory items in the bill at the level estimated in the Budget Resolution. For this bill, the only assumed supplemental is for the pay raise.

Line 14. Over (+)/Under (−): line 12 plus line 13.

H.R. 4120, FISCAL YEAR 1982 LEGISLATIVE BRANCH

This bill is under its targets for discretionary spending.

Staff analysis

Committee: Appropriations.

Subcommittee: Legislative branch.

Chairman: Mr. Fazio (California).

Ranking Minority Member: Mr. Burgener (California).

Scheduled: Tuesday, July 28, 1981.

I. Description of bill

This bill provides funds for the Legislative Branch for fiscal year 1982.

The bill as a whole is *under* the 302(b) targets for this subcommittee by $333 million in budget authority and $285 million in outlays (the sum of lines 5 and 12 below). If amounts assumed in the Budget Resolution but not yet considered are added, and mandatory programs are "fully funded", the subcommittee could be under its targets by $53 million in budget authority and $38 million in outlays (the sum of lines 7 and 14).

II. Comparison with target for discretionary appropriations action

Pursuant to the Budget Act and HBC scorekeeping, the subcommittee has *two* targets: one for discretionary programs and one for mandatory programs. Since the appropriations Committee is bound by existing entitlement law, it generally cannot effectively change the amounts required for the funding of mandatory programs. Its target for discretionary programs is therefore the main focus for this Early Warning report. Further, if the conference report on this appropriation bill exceeds the target for discretionary budget authority, the bill will be subject to the "delayed enrollment" provision of Section 305 of the fiscal year 1982 First Budget Resolution. As shown on line 7 below, the bill plus discretionary amounts not yet considered is *below* its 302(b) target for discretionary action by $83 million in budget authority and $63 in outlays.

III. Summary table

[In millions of dollars]

	Budget authority	Outlays
The amounts shown below are only for discretionary 1982 spending in the bill:		
1. Discretionary amounts in bill	529	461
2. Prior action		
3. Total action to date	529	461
4. 302(b) target	612	524
5. Over (+)/Under (−)	−83	−63
6. Amounts assumed but not yet considered		
7. Over (+)/Under (−)	−83	−63
The amounts shown below are only for mandatory appropriations included in the bill:		
8. Mandatory amounts in bill	572	499
9. Prior action		126
10. Total	572	625
11. 302(b) target	822	847
12. Over (+)/Under (−)	−250	−222
13. Supplemental amounts needed	280	247
14. Over (+)/Under (−)	+30	+25

IV. Explanation of over/under

Despite the fact that the House Budget Committee is unable to give a definitive answer to the question of *where a* particular bill is over or under its 302(b) allocation, it does compare the items in a bill to the assumptions contained in the Budget Resolution. It is important to note that the line item assumptions in the Budget Resolution are *not binding* on a committee. A list of the major areas where this bill differs from the Budget Resolution follows:

−$304 million in budget authority and −$3.1 million in outlays for the Library of Congress, −$14.0 million in budget authority and −$3.3 million in outlays for the Library's buildings and grounds, −$1.4 million in budget authority and −$1.1 million for GPO and, finally, −$3.2 million in budget authority and −$12.2 million in outlays for congressional printing and binding.

Amounts assumed in the Budget Resolution but not yet considered (line 13) consists entirely of funding for the Senate which is consistent with traditional practice, and funding for the October 1 pay raise. It is this latter item which causes the mandatory total to be exceeded; the target seems not to make an allowance for this pay raise.

V. Comparison with the President

This bill is below the President's requests for discretionary items in the bill by $61.0 million in budget authority and $11 million in discretionary outlays.

VI. Credit

There are not credit items in the bill.

VII. Amendments

None known at this time.

VIII. Definitions of terms in summary table, section III

Line 1. Discretionary amounts in bill; discretionary FY 1982 appropriations in H.R. 4120.

Line 2. Prior action: the FY 1982 budget authority and outlays for this subcommittee that were appropriated in prior bills.

Line 3. Total action to date: line 1 plus line 2.

Line 4. 302(b) target: the target for discretionary appropriations for this subcommittee set by the Appropriations Committee pursuant to the Budget Act.

Line 5. Over (+)/Under (−): line 3 minus line 4.

Line 6. Amounts assumed but not yet considered: these are amounts assumed in the fiscal year 1982 Budget Resolution for which funding has been deferred by the Appropriations Committee, probably until next Spring's supplemental appropriations bill.

Line 7. Over (+)/Under (−): line 5 plus line 6.

Line 8. Mandatory amounts in bill: funding for mandatory programs (entitlements).

Line 9. Prior action: outlays from budget authority enacted for years prior to fiscal year 1982, plus any permanents assigned to the Appropriations Committee.

Line 10. Total: line 8 plus line 9.

Line 11. 302(b) target: the target for mandatory amounts for this subcommittee set by the Appropriations Committee. The target set by the Appropriations Committee includes the effect of assumed authorizing legislation that would change the level of mandatory programs.

Line 12. Over (+)/Under (−): line 10 minus line 11.

Line 13. Supplemental amounts needed: amounts for any new entitlement legislation assumed in the Budget Resolution, for the October 1 pay raise, and to fund mandatory items in the bill at the level estimated in the Budget Resolution.

Line 14. Over (+)/Under (−): line 12 plus line 13.

H.R. 4242, THE TAX INCENTIVE ACT OF 1981

Staff analysis

Committee: Ways and Means.

Chairman: Dan Rostenkowski (Illinois).

Ranking minority member: Barber Conable (New York).

Scheduled: Wednesday, July 29, 1981.

I. Description of bill

This bill provides for multi-year personal and business tax reductions, incentives for savings and investment, relief for special industries, revised penalties and improved tax enforcement procedures, as well as tax reform and cash management initiatives.

The individual tax cuts would be reduced by an average of approximately 1 percent for calendar year 1981, 10 percent for 1982, 16 percent for 1983 and if certain economic conditions specified by the President are met the reductions will average 22 percent in fiscal year 1984. Further tax reductions are made through increases in the Zero Bracket Amount, Earned Income Credit, and Child Care Benefits. The capital gains tax is reduced and the distinction between earned and unearned income is eliminated. Married couples will be allowed a deduction for the lesser-earning spouse's wages.

The business tax cuts provide for a phased-in expensing of tangible personal property by 1990 and a shorter depreciation period for real property. The top corporate rates would be reduced and small business corporate brackets would be expanded and the rates reduced.

Some of the other tax cut provisions in the bill would expand savings and investment incentives, add research and development incentives, liberalize estate and gift taxes, reduce windfall profits taxes on oil, increase investment tax credits for rehabilitation of old buildings, and liberalize the tax exclusion on the sale of residences by older citizens.

II. Comparison with target for tax action

The amount of the tax cut in the Committee bill is less than the tax reduction assumed in the First Budget Resolution for fiscal year 1982. The First Resolution assumed a tax cut of $51.3 billion and the preliminary estimate for the Committee bill is $37.8 billion. The only other tax change assumed in the First Resolution was a total of $100 million for miscellaneous tax and tariff legislation which has not been acted upon to date. For 1983 and 1984 the First Resolution assumed net revenue reductions of $97.1 billion and $144.8 billion respectively. The preliminary estimates of reductions in the Committee bill are $98.4 billion in 1983 and $128.9 billion in 1984 if a third-year tax cut is not triggered and $148.6 billion if the third-year tax cut is triggered.

III. Summary table

[In millions of dollars]

1. Amounts in bill	−37,848
2. Prior action	
3. Total action to date	−37,848
4. First budget resolution assumption	−51,300
5. Over (+)/under (−) target	+13,452
6. Amounts assumed but not yet considered	−100
7. Over (+)/under (−) target	+13,352

IV. Explanation of over/under

The $13,352 million remains as unused tax reductions because the Ways and Means Committee felt that a smaller tax cut was more appropriate than the amounts assumed earlier when the Budget Resolution was adopted. This difference is approximately consistent with the changes in the administration's revised tax proposal.

V. Amendments

Conable-Hance-Administration Amendment: Mr. Conable and Mr. Hance will offer the administration-supported substitute. This subsitute would result in a net revenue reduction of $36.3 billion in 1982, $95.2 billion in 1983, and $152.9 billion in 1984.

When the First Budget Resolution was adopted the $51.3 billion allowance for tax cuts was the amount recommended by the President. Since that time the administration has twice revised that recommendation. The first revision (June 4) changed from a 10 percent to a 5 percent across-the-board personal income tax reduction in the first year, revised the business incentive provisions, and added savings incentives and other provisions. As a result of that revision the President recommended a $36.9 billion net receipts reduction for fiscal year 1982 in his July 1981 mid-year review.

On July 24 the administration indicated its support for a House substitute proposal which further revises the administration's program. The new proposal would, in addition to the June 4 proposals, index the individual income tax starting January 1, 1985, liberalize estate and gift tax provisions, extend savings incentives, reduce tax liability for Americans abroad, reduce capital gains taxes, extend energy tax credits, and provide for other individual tax reductions and reforms. In addition, new business provisions would liberalize the accelerated cost recovery provisions in 1985 and thereafter, reduce corporate tax votes for small business, liberalize the investment tax credit for used equipment, reduce energy taxes, provide tax credits for incremental R & D, exclude from tax dividend reinvestment for public utilities, and provide for other business tax reductions and reforms.

Udall-Obey-Reuss Amendment: A substitute amendment will be offered by Messrs. Udall, Obey, and Reuss to limit the tax reduction to one year with the individual cuts effective July 1, 1982 and business tax cuts similar to the Ways and Means expensing proposal. The amendment would include a number of revenue-increasing tax reforms in the Ways and Means Committee bill as

well as repeal of the percentage depletion allowance for oil and gas. Revenue reductions resulting from this amendment are estimated at $12.7 billion in Fiscal Year 1982, $50.0 billion in Fiscal Year 1983, and $66.4 billion in Fiscal Year 1984.

VI. Definition of terms

Line 1. Amounts in Bill: Revenue reductions for Fiscal Year 1982 in H.R. 4242.

Line 2. Prior Action: Revenues legislation is reported by the Ways and Means Committee in prior bills.

Line 3. Total action to date: line 1 plus line 2.

Line 4. Resolution Assumption: the target for revenue reductions in the First Budget Resolution.

Line 5. Over (+)/Under (−): line 3 minus line 4.

Line 6. Amounts assumed but not yet considered: these are amounts assumed in the Fiscal Year 1982 Budget Resolution on which action has not yet been taken by the Ways and Means Committee.

Line 7. Over (+)/Under (−): line 5 plus line 6.

H.R. 4169, FISCAL YEAR 1982 DEPARTMENT OF COMMERCE, JUSTICE, AND STATE, THE JUDICIARY AND RELATED AGENCIES

This bill is on target for discretionary spending.

Staff analysis

Committee: Appropriations.

Subcommittee: Commerce, Justice, State, Judiciary.

Chairman: Mr. Smith (Iowa).

Ranking minority member: Mr. O'Brien (Illinois).

Scheduled: Wednesday, July 29, 1981.

I. Description of bill

This bill provides funds for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for fiscal year 1982.

The bill as a whole is equal to the 302(b) target for this subcommittee in budget authority and $18 million below in outlays (the sum of lines 5 and 12 below). If amounts assumed in the Budget Resolution but not yet considered are added, and mandatory programs are "fully funded", the subcommittee could be over its targets by $129 million in budget authority and $101 million in outlays (the sum of lines 7 and 14).

II. Comparison with target for discretionary appropriations action

Pursuant to the Budget Act and HBC scorekeeping, the subcommittee has two targets: one for discretionary programs and one for mandatory programs. Since the Appropriations Committee is bound by existing entitlement law, it generally cannot effectively change the amounts required for the funding of mandatory programs. Its target for discretionary programs is therefore the main focus for this Early Warning report. Further, if the conference report on this appropriation bill exceeds the target for discretionary budget authority, the bill will be subject to the "delayed enrollment" provision of Section 305 of the fiscal year 1982 First Budget Resolution. As shown on line 7 below, the bill plus discretionary amounts now yet considered is equal to its 302(b) target for discretionary budget authority and under its outlay target by $253 million in outlays.

III. Summary table

[In millions of dollars]

	Budget authority	Outlays
The amounts shown below are only for discretionary 1982 spending in this bill:		
1. Discretionary amounts in bill	8,592	6,600
2. Prior action		
3. Total action to date	8,592	6,604
4. 302(b) target	8,592	6,853
5. Over (+)/Under (−)		−253
6. Amounts assumed but not yet considered		
7. Over (+)/Under (−)		−253
The amounts shown below are only for mandatory appropriations included in this bill:		
8. Mandatory amounts in bill	163	156
9. Prior action		3,157
10. Total	163	3,313
11. 302(b) target	163	3,078
12. Over (+)/Under (−)		+235
13. Supplemental amounts needed	129	124
14. Over (+)/Under (−)	+129	+359

IV. Explanation of over/under

Despite the fact that the House Budget Committee is unable to give a definitive answer to the question of *where* a particular bill is over or under its 302(b) allocation, it does compare the items in a bill to the assumptions contained in the Budget Resolution. It is important to note that the line item assumptions in the Budget Resolution are *not binding* on a committee. A list of the major areas where this bill differs from the Budget Resolution follows:

Department of State's conduct of foreign affairs is below Resolution assumptions by $64 million in budget authority and $29 million in outlays.

International Communications Agency radio facilities is below Resolution assumptions by $56 million in budget authority.

Economic Development Administration (EDA) assistance program is above Resolution assumptions by $157 million in budget authority and $3 million in outlays.

Small Business Administration (SBA) disaster relief fund is above Resolution assumptions by $87 million in budget authority and $25 million in outlays.

Payment to the Legal Services Corporation is above Resolution assumptions by $141 million in budget authority and $107 million in outlays.

Office of Justice Assistance Research and Statistics is above Resolution assumptions by $74 million in budget authority and $14 million in outlays.

Amounts assumed in the Budget Resolution but not yet considered (line 13) consists entirely of funding for the October 1 pay raise. It is this item which causes the mandatory total to be exceeded; the target seems not to make an allowance for this pay raise.

V. Comparison with the President

This bill is below the President's requests for discretionary items in the bill by $5 million in budget authority and $251 million in outlays.

VI. Credit

The Budget Resolution contains non-binding targets for credit program amounts. This is the first year that there has been a credit scorekeeping system. There is no 302(a) and 302(b) allocation for credit program limitations. For comparative purposes only, the table below shows the bill and First Budget Resolution assumptions.

	Direct load obligations	Primairy guarantee commitments	Secondary guarantee commitments
1. Credit program in the bill			
2. Limits assumed in the Budget Resolution not acted upon in the bill	985	7,464	
3. Credit programs not subject to limit	[1] 588	[1] −1,996	
4. Total in bill	1,573	5,468	
5. Budget Resolution assumptions	1,280	7,169	
6. Over (+)/ Under (−)	+293	−1,701	

[1] Committee report language provided a rationale for increasing or decreasing estimates of credit programs not subject to limit.

The Commerce-Justice-State Subcommittee included no credit limitations in this bill. All of the differences in this subcommittee allocation from the Budget Resolution involve SBA programs. Comments on the differences included in the report are summarized below:

Disaster loan fund is estimated to support $734 million in new direct loans from $87 million in new capital appropriated, repayments, carryover and sale of assets. The resolution included a proposed limitation of $440 million for disaster loans.

Pollution control equipment contract guarantees were increased by the Omnibus Budget Reconciliation Act of 1981 to $250 million, an amount above both the President's budget and the amount currently authorized for the program.

Business loan and investment fund guarantees are assumed in the report language to be at the level requested by the President. The report states that limitation "language is not necessary since these levels are consistent with the revised authorization for SBA for fiscal year 1982 contained in the Omnibus Budget Reconciliation Act of 1981 as passed by the House."

Surety bond guarantees are assumed in the report to be at $1.2 billion. Again, the Committee did not include a limitation since the program level was consistent with the revised authorization in the Omnibus Reconciliation Act of 1981.

VII. Amendments

None known at this time.

VIII. Definitions of terms in summary table, section III

Line 1. Discretionary amounts in bill: discretionary fiscal year 1982 appropriations in H.R. 4169.

Line 2. Prior action: the fiscal year 1982 budget authority and outlays for this subcommittee that were appropriated in prior bills.

Line 3. Total action to date: line 1 plus line 2.

Line 4. 302(b) target: the target for discretionary appropriations for this subcommittee set by the Appropriations Committee pursuant to the Budget Act.

Line 5. Over (+)/Under (−): line 3 minus line 4.

Line 6. Amounts assumed but not yet considered: these are amounts assumed in the fiscal year 1982 Budget Resolution for which funding has been deferred by the Appropriations Committee, probably until next Spring's supplemental appropriation bill.

Line 7. Over (+)/Under (−): line 5 plus line 6.

Line 8. Mandatory amounts in bill: funding for mandatory programs (entitlements).

Line 9. Prior action: outlays from budget authority enacted for years prior to fiscal year 1982, plus any permanents assigned to the Appropriations Committee.

Line 10. Total: line 8 plus line 9.

Line 11. 302(b) target: the target for mandatory amounts for this subcommittee set by the Appropriations Committee. The target set by the Appropriations Committee includes the effect of assumed authorizing legislation that would change the level of mandatory programs.

Line 12. Over (+)/Under (−): line 10 minus line 11.

Line 13. Supplemental amounts needed: amounts for any new entitlement legislation assumed in the Budget Resolution, for the October 1 pay raise, and to fund mandatory items in the bill at the level estimated in the Budget Resolution.

Line 14. Over (+)/Under (−): line 12 minus line 13.

H.R. 4209, FISCAL YEAR 1982 DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES

This bill is under its targets for discretionary spending.

Staff analysis

Committee: Appropriations.
Subcommittee: Transportation.
Chairman: Mr. Benjamin (Indiana).
Ranking minority member: Mr. Coughlin (Pennsylvania).
Scheduled: Wednesday, July 29, 1981.

I. Description of bill

This bill provides funds for the Department of Transportation and related agencies for fiscal year 1982.

This bill as a whole is *under* the 302(b) targets for this subcommittee by $734 million in budget authority and $42 million in outlays (the sum of lines 5 and 12 below). If amounts assumed in the Budget Resolution but not yet considered are added, and mandatory programs are fully funded, the subcommittee could be under its targets by $675 million in budget authority and $15 million in outlays (the sum of lines 7 and 14).

II. Comparison with target for discretionary appropriations action

Pursuant to the Budget Act and HBC scorekeeping, the subcommittee has *two* targets: one for discretionary programs and one for mandatory programs. Since the Appropriations Committee is bound by existing entitlement law, it generally cannot effectively change the amounts required for the funding of mandatory programs. Their target for discretionary programs is therefore the main focus for this Early Warning report. Further, if the conference report on this appropriation bill exceeds the target for discretionary budget authority, the bill will be subject to the "delayed enrollment" provision of Section 305 of the fiscal year 1982 First Budget Resolution. As shown on line 7 below, the bill plus discretionary amounts not yet considered is *below* its 302(b) target for discretionary action by $734 million in budget authority and $149 million in outlays.

III. Summary table

[In millions of dollars]

	Budget authority	Outlays
The amounts shown below are only for discretionary 1982 spending in this bill:		
1. Discretionary amounts in bill	10,598	6,561
2. Prior action	.....	.....
3. Total action to date	10,598	6,561
4. 302(b) target	11,332	6,710
5. Over (+)/Under (−)	−734	−149

The amounts shown below are only for mandatory appropriations included in this bill:		
8. Mandatory amounts in bill	337	332
9. Prior action	166	13,200
10. Total	503	13,532
11. 302(b) target	503	13,425
12. Over (+)/Under (−)	.....	+107
13. Supplemental amounts needed	59	57
14. Over (+)/Under (−)	+59	+164

IV. Explanation of over/under

Despite the fact that the House Budget Committee is unable to give a definitive answer to the question of *where* a particular bill is over or under its 302(b) allocation, it does compare the items in a bill to the assumptions contained in the Budget Resolution. It is important to note that the line-item assumptions in the Budget Resolution are *not binding* on a committee. Although within the totals requested by the Administration and assumed in the Budget Resolution for this bill, the bill makes several changes among funding priorities including:

Reduction of $119 million in budget authority and an increase of $40 million in outlays for Federal Railroad Administration rail service assistance program.

A reduction of $420 million in budget authority and $320 million in outlays for the purchase of Consolidated Rail Corporation (ConRail) securities. The Committee has not received a budget request nor does it recommend additional funding to support the operation of ConRail; the Committee anticipates that $242 million of the $485 million appropriated for operating expenses in fiscal year 1981 will be sufficient to finance operations through fiscal year 1982.

An increase of $97 million in budget authority and $152 million in outlays for AMTRAK.

An increase of $36 million in budget authority and $385 million in outlays for Urban Mass Transportation Administration (UMTA).

An increase of $200 million in budget authority and $33 million in outlays for interstate highway transfer grants.

A decrease of $215 million in budget authority and $32 million in outlays for the Appalachian highway system which is maintained in the Energy and Water Appropriation bill.

A decrease of $96 million in budget authority and $21 million in outlays for the facilities and equipment aviation account.

For mandatory items, the bill plus assumed "full funding" of mandatory items would be over its budget authority target only because the target seems not to make an allowance for the civilian agencies pay raise that will become effective this October.

V. Comparison with the President (discretion amounts only)

This bill is below the President's requests for discretionary items in the bill by $7 million in budget authority and over by $12 million in outlays.

VI. Credit

The Budget Resolution contains only *nonbinding targets* for credit program amounts. This is the first year that there has been a credit scorekeeping system. There is no 302(a) and 302(b) allocation for credit program annual limits. For comparative purposes only, the table below shows the bill and the First Budget Resolution assumptions.

[In millions of dollars]

	Direct loan obligations	Primary guarantee commitments	Secondary guarantee commitments
1. Credit progam limits in the bill	.....	445	3
2. Limits assumed in the Budget Resolution not acted on in the bill	.....	.....	.....
3. Credit programs not subject to limit	291	−291	.....
4. Total in bill	291	154	3
5. Budget Resolution assumptions	291	129	3
6. Over (+)/Under (−)	.....	+25	.....

The Transportation Subcommittee total limitations proposed for guarantee programs (in the bill) exceed the Budget Resolution by $25 million. The Transportation Subcommittee set limitations for guarantee programs that differed from the resolution as follows:

Aircraft purchase loan guarantees are limited to $125 million, $75 million above the resolution, but a 50 percent cut from the 1981 level. The Committee expressed concern that an abrupt termination of the programs would adversely affect carriers which had made investments based on the availability of guarantees.

Railroad rehabilitation and improvement financing fund guarantees are limited to $270 million, $50 million below the resolution. The Committee noted that the largest pending loan guarantee application had been withdrawn.

VII. Amendments

None are certain to be offered.

VIII. Definitions of terms in summary table, section III

Line 1. Discretionary amounts in bill: discretionary fiscal year 1982 appropriations in H.R. 4209.

Line 2. Prior action: the fiscal year 1982 budget authority and outlays for this subcommittee that were appropriated in prior bills.

Line 3. Total action to date: line 1 plus line 2.

Line 4. 302(b) target: the target for discretionary appropriations for this subcommittee set by the Appropriations Committee pursuant to the Budget Act.

Line 5. Over (+)/Under (−): line 3 minus line 4.

Line 6. Amounts assumed but not yet considered: these are amounts assumed in the fiscal year 1982 Budget Resolution for which funding has been deferred by the Appropriations Committee, probably until next Spring's supplemental appropriation bill.

Line 7. Over (+)/Under (−): line 5 plus line 6.

Line 8. Mandatory amounts in bill: funding for mandatory programs (entitlements).

Line 9. Prior action: outlays from budget authority enacted for years prior to fiscal year 1982, plus any permanents assigned to the Appropriations Committee.

Line 10. Total: line 8 plus line 9.

Line 11. 302(b) target: the target for mandatory amounts for this subcommittee set by the Appropriations Committee. The target set by the Appropriations Committee includes the effect of assumed authorizing

legislation that would change the level of mandatory programs.

Line 12. Over (+)/Under (−): line 10 minus line 11.

Line 13. Supplemental amounts needed: amounts for any new entitlement legislation assumed in the Budget Resolution, for the October 1 pay raise, and to fund mandatory items in the bill at the level estimated in the Budget Resolution.

Line 14. Over (+)/Under (−): line 12 plus 13.

H.R. 4241, FISCAL YEAR 1982 MILITARY CONSTRUCTION APPROPRIATIONS

This bill is under its targets for discretionary spending.

Staff analysis

Committee: Appropriations.
Subcommittee: Military Construction.
Chairman: Mr. Ginn (Georgia).
Ranking minority member: Mr. Regula (Ohio).
Scheduled: Wednesday, July 29, 1981.

I. Description of bill

This bill provides funds for military construction for fiscal year 1982.

The bill as a whole is *under* the 302(b) targets for this subcommittee by $1,114 million in budget authority and $396 million in outlays (the sum of lines 5 and 12 below).

II. Comparison with target for discretionary appropriations action

Pursuant to the Budget Act and HBC scorekeeping, the subcommittee has two targets: one for discretionary programs and one for mandatory programs. Since the Appropriations Committee is bound by existing entitlement law, it generally cannot effectively change the amounts required for the funding of mandatory programs. Its target for discretionary programs is therefore the main focus for this Early Warning report. Further, if the conference report on this appropriation bill exceeds the target for discretionary budget authority, the bill will be subject to the "delayed enrollment" provision of Section 305 of the fiscal year 1982 First Budget Resolution. As shown on line 7 below, the bill is under its targets for discretionary action by $1,114 million in budget authority and $196 million in outlays.

III. Summary table

[in millions of dollars]

	Budget authority	Outlays
The amounts shown below are only for dicretionary 1982 spending in this bill:		
1. Discretionary amounts in bill	6,900	1,642
2. Prior action	.....	.....
3. Total action to date	6,900	1,642
4. 302(b) target	8,014	1,838
5. Over (+)/Under (−)	−1,114	−196
6. Amounts assumed but not yet considered	.....	.....
7. Over (+)/Under (−)	−1,114	−196
The amounts shown below are only for mandatory appropriations included in this bill:		
8. Mandatory amounts in bill	2	2
9. Prior action	.....	2,500
10. Total	2	2,502
11. 302(b) target	2	2,702
12. Over (+) /Under (−)	.....	−200
13. Supplemental amounts needed	.....	.....
14. Over(+) /Under (−)	.....	−200

IV. Explanation of over/under

Despite the fact that the House Budget Committee is unable to give a definitive answer to the question of where a particular bill is over or under its 302(b) allocation, it does compare the items in a bill to the assumptions contained in the Budget Resolution. It is important to note that the line item assumptions in the Budget Resolution are not binding on a committee. A list of the major areas where this bill differs from the Budget Resolution follows:

$522.3 million requested for the MX missile program in fiscal year 1982 for design, construction, land acquisition, and headquarters facilities has been deferred based on the fact that the Administration has not made a decision on the MX system;

$206.3 million has been deleted for Persian Gulf/Indian Ocean construction support operation;

$69.2 million is deleted based on revised regulations implementing the Davis-Bacon Act which are anticipated to reduce construction costs.

V. Comparison with the President

This bill is below the President's requests for discretionary items in the bill by $1,114 million in budget authority and $196 million in discretionary outlays.

VI. Credit

There are no credit items in the bill.

VII. Amendments

None known at this time.

VIII. Definitions of terms in summary table, section III

Line 1. Discretionary amounts in bill: discretionary FY 1982 appropriations in H.R. 4241.

Line 2. Prior action: the FY 1982 budget authority and outlays for this subcommittee that were appropriated in prior bills.

Line 3. Total action to date: line 1 plus line 2.

Line 4. 302(b) target: the target for discretionary appropriations for this subcommittee set by the Appropriations Committee pursuant to the Budget Act.

Line 5. Over (+)/Under (−): line 3 minus line 4.

Line 6. Amounts assumed but not yet considered: these are amounts assumed in the fiscal year 1982 Budget Resolution for which funding has been deferred by the Appropriations Committee, probably until next Spring's supplemental appropriation bill.

Line 7. Over (+)/ Under (−): line 5 minus line 6.

Line 8. Mandatory amounts in bill: funding for mandatory programs (entitlements).

Line 9. Prior action: outlays from budget authority enacted for years prior to fiscal year 1982, plus any permanents assigned to the Appropriations Committee.

Line 10. Total: line 8 plus line 9.

Line 11. 302(b) target: the target for mandatory amounts for this subcommittee set by the Appropriations Committee. The target set by the Appropriations Committee includes the effect of assumed authorizing legislation that would change the level of mandatory programs.

Line 12. Over (+)/Under (−): line 10 minus line 11.

Line 13. Supplemental amounts needed: amounts for any new entitlement legislation assumed in the Budget Resolution, for the October 1 pay raise, and to fund mandatory items in the bill at the level estimated in the Budget Resolution.

Line 14. Over (+)/Under (−): line 12 minus line 13.●

THE REPUBLICAN AND DEMOCRATIC TAX PROPOSALS—A COMPARISON

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. CARMAN) is recognized for 30 minutes.

Mr. CARMAN. Mr. Speaker, last night President Reagan spoke to the Nation and explained the details of his tax proposals. Six months ago his economic plan for recovery was outlined. He said that we needed substantial budget cuts, substantial tax relief, and substantial relief from overregulation.

The President's bipartisan tax proposal provides for a 25-percent, across-the-board reduction in individual income tax rates over a 3-year period. The O'Neill Democratic plan provides for individual tax rate reductions at 15 percent over a 2-year period.

There can be little argument that a 25-percent reduction is superior to a 15-percent reduction.

After the speech of the President last night, the Speaker of the House of Representatives indicated that only those who earn over $50,000 would benefit in any substantial way from the President's bipartisan tax bill. Clearly this is not so.

A taxpayer who earns $15,000 will save $2,093 under the President's bill; he will save $1,755 under the Democratic O'Neill bill. This runs between 1982 and 1986. There is a $388 difference which will accrue to the benefit of the $15,000 taxpayer.

The $20,000 taxpayer will save $3,286 under the President's proposal and $2,803 under the proposal of the Democratic O'Neill legislation, for a total amount of $478 which would be saved.

Insofar as a $25,000 taxpayer is concerned, $4,729 would be saved for that taxpayer under the President's legislation and $4,222 would be saved under the O'Neill legislation, for a difference of $507.

For the $30,000 taxpayer, there will be a saving of $6,633 under the President's proposal and a saving of $5,717 under the O'Neill proposal, for a net saving of $916.

Where we have a $40,000 taxpayer, under the President's program, $10,982 would be saved by the taxpayer, and under the O'Neill Democratic program it would be $7,123 that would be saved, for a net of $3,859 that would be saved by the taxpayer.

Insofar as the $50,000 taxpayer is concerned, he would save $15,770 under the President's program and $7,928 under the O'Neill Democratic program, for a $7,842 difference in the savings.

It is respectfully pointed out to every Member of this House that the President's program will reach every

one of the middle American taxpayers who so desperately need to have tax relief.

There is another irony, it seems to me, in regard to the Democratic proposal, and that is this: The Democratic proposal seems to favor big business, and by that I mean the large corporate entities in this country. Its ultimate impact will provide that for taxpayer income between $200,000 and $1 million, those corporate taxpayers will receive a $30,000 benefit, and for every single increment in taxpayer income above that, for every single additional $200,000 to $1 million, there is an additional $30,000 for those people in tax savings. And we all know who earns that kind of money.

Under the President's proposal, the reductions will be for the smaller business people on a corporate level at 1 percent in 1982, if my recollection serves me properly, and it will be 1 percent thereafter.

I would also like to point out that the President's program provides for substantial relief for the middle American taxpayer, the individual who is really paying the rates, because it is not just 25 percent across the board but it also is tied in with indexing, which means it is a permanent tax relief, a measure which I think is very, very important to every single individual in this country.

□ 1920

All of those savings that I have described just a few moments ago will provide additional income for our taxpayers, additional income that I believe is sorely needed by everyone who was recited in those various brackets.

I would also like to point out that the President's tax package gives relief for the marriage penalty. It takes care of very, very significant problems with the foreign earned income difficulties, that is to say it provides for an exemption for the first $95,000 of income that is earned overseas and excludes for excess housing costs a maximum exclusion up to $75,000 in 1982 and will be phased up to $95,000 thereafter in $5,000 increments. This certainly has to help our ability to compete overseas.

The President's program, in addition, provides on the sale of a taxpayer's principal residence that the rollover provision up to 24 months, that is to say how long a homeowner must hold on to his property, will be increased for a maximum exclusion for taxpayers aged 55 or over up to $125,000.

The last part that I think I would like to make mention of is this, that insofar as the holding period is concerned for long-term capital gains, the holding period is reduced under the President's program from 12 months to 6 months. Clearly, the impact of this allowance has to be remarkably stimulative for business.

The President's program is one of hope, one that offers productivity and incentive, one that offers us the opportunity to make sure that the economic recovery program works.

I sincerely hope that no Member of this House will do anything to scuttle this program, which is so vital for our domestic policy and which is so vital to make our foreign policy effective by keeping America strong at home.

Mr. LUNGREN. Mr. Speaker, will the gentleman yield?

Mr. CARMAN. I yield to the gentleman from California.

Mr. LUNGREN. Mr. Speaker, I congratulate the gentleman for his special order and pointing out some of the differences between the bipartisan Conable-Hance bill and that presented to us by the Ways and Means Committee.

I think it is instructive to note that contrary to a "Dear Colleague" letter that was going around today, authored by one of the members of the Ways and Means Committee on the other side of the asile claiming that the study done, actually two studies done by the Congressional Reference Service, support the Ways and Means Committee bill. Actually, those reports do not support the Ways and Means Committee bill. The conclusions of those two reports are very much along the lines suggested by the gentleman, that is, if you take a 2-year analysis of the two bills, you will find that everyone over $35,000 does better under the President's bipartisan proposal and they are under the Ways and Means Committee proposal, not $50,000 as suggested by the Speaker of the House yesterday; but more importantly, if you take the third year which, of course, is in fact what we will be voting on tomorrow, which is, in fact, the President's proposal, if you take the full force of the President's 3-year proposal versus the actual 2-year proposal of the Ways and Means Committee, every single wage category, every single earnings category above $10,000 does better under the President's proposal than they do under the proposal by the Ways and Means Committee. Those people who earn $10,000 or less do only slightly better under the Ways and Means Committee bill. As a matter of fact, it is only in the nature of $35.

As you go out from the years beyond that, the margins are even far greater, because as the gentleman has suggested, we have indexing which means these are permanent tax cuts not temporary illusory tax cuts as presented to us by the Ways and Means Committee bill.

So I think the gentleman has done a service to those us in the House in making a record of the fact that it is not a question of a rich man's tax cut, but it is a question of whether the average man and woman in America are going to get any tax cut at all, or whether they are going to be denied a tax cut and, in fact, be given an effective tax increase as presented to them by the Ways and Means Committee bill.

I think we ought to cite the Congressional Reference Service, which is not a part of the Republican party or the Democratic party or a part of the administration, as a source of information and analysis in looking at the two bills and their impact on the average working man and woman in America, because the criticism leveled yesterday by certain leaders on the other side of the aisle against the President's proposal were, in fact, misleading, whether intentional or not and, in fact, they gave the American people a misimpression that somehow those making between $10,000 a year and $50,000 a year would be better off under the Ways and Means Committee bill. That simply is nonsense. It is not true and we had better make it very clear, so that the debate tomorrow is not cluttered up with misinformation; not cluttererd up with some sort of attempt to cloud the issue.

Let us make the issue very, very clear. Do you want to give every working man and woman in America a tax cut that they deserve or do you not?

It really should not surprise us that the Ways and Means Committee leadership, the handpicked leadership of the Speaker of the House, should not want or be in favor of a tax cut for the American people, since they fought us on it during the election period, since they criticized the President for presenting it when he was a candidate, since they suggested it was highly inflationary and impossible for us to accept, since they originally said, "Fine, we will give you a real small 1-year tax cut," then begrudgingly said, "We will give you a 2-year cut," then begrudgingly said, "We will give you a 2-year cut with a trigger for a third year."

And it is a trigger on a gun that will never be fired; so it really should not surprise us that the real essence of the debate tomorrow should be and in actuality is, do the American people in fact deserve a tax cut and, if so, are we going to give it to them?

The last thing I would say on that is, it seems rather strange that the Ways and Means Committee bill says that we can give business tax cuts for the next 7 years, but we cannot afford to give the American taxpayer, the individual taxpayer, a 3-year tax cut, because somehow we cannot afford to allow that to be done so far in the future.

So the gentleman is absolutely correct in pointing out that what we are going to deal with tomorrow is a very fair tax cut bill presented by the Presi-

dent of the United States that deals with the tremendous problem of bracket creep and the tremendous problem of a sluggish economy brought on by a number of factors, one of which, and most importantly, is overtaxation and oppressive taxation by the Federal Government.

I think the gentleman has made that case very, very well, and I thank him for the time.

Mr. CARMAN. I thank the gentleman for his comments. I think he has put it very, very well.

This country does not want a tax cut. It needs a tax cut. We must have the tax cut in order to make the economic policy of the President of the United States and, indeed, the Federal Government work. Without that kind of tax cut this country simply will not be able to have the kind of economic recovery that it needs to insure domestic stability, as well as a sound foreign policy abroad.

STROM THURMOND: A LEGEND IN HIS OWN TIME

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from South Carolina (Mr. NAPIER) is recognized for 10 minutes.

Mr. NAPIER. Mr. Speaker, on May 19, 1981, I attended a reception-dinner at the Sheraton-Washington Hotel, honoring Senator STROM THURMOND, chair and scholarships in law at the University of South Carolina School of Law.

Sponsored by the leadership of the U.S. Senate from both sides of the aisle, it was an evening to remember. Well over 500 friends of Senator THURMOND contributed more than a quarter of a million dollars to the law school, and, together with funds previously raised by friends in South Carolina and elsewhere, the overall goal of a half million was realized and exceeded.

Political parties were forgotten. It was a special night when friends from both parties in the Senate paid tribute to their STROM THURMOND.

Having known and admired Senator THURMOND for many years, I have observed his leadership firsthand. An uncommon man of the people who elected him for so many years, he is a man of principle, a man of honor, and a man of integrity. Several of his friends spoke glowingly of Senator THURMOND on his night. They spoke of many of his achievements. There are many reasons this man was honored by the leadership of the U.S. Senate, the University of South Carolina, and his friends. Those of us from South Carolina, in sharing him with the Nation, can point with pride to still other honors, not mentioned that evening, he has brought to our State. Senator THURMOND is only the fourth South Carolinian in the history of our Republic to be elected as President pro tempore of the U.S. Senate. When he was elected earlier this year, it had been over 160 years since the last South Carolinian, John Gaillard, relinquished his duties as President pro tempore in 1818. Senator STROM THURMOND is the third South Carolinian in the history of our Republic to be elected by his colleagues in the Senate as chairman of the Committee on the Judiciary. It has been over 120 years since a South Carolinian had chaired this very important committee, when Senator THURMOND became Chairman THURMOND, at the beginning of the 97th Congress. Looking at the distinguished career and service of this humble, yet great man, it is not surprising that STROM THURMOND has become a legend in his own time.

I wish to insert into the RECORD the remarks of Senator HOWARD BAKER, JR.; Senator ROBERT C. BYRD; Senator PAUL LAXALT; Senator ERNEST F. HOLLINGS; President James B. Holderman of the University of South Carolina; Mr. Mark Wilhelmi, president of the Student Bar Association, School of Law, University of South Carolina, and the response of Senator THURMOND:

REMARKS BY SENATOR HOWARD BAKER, JR.

I would like to take just a moment to tell you something of my impressions and knowledge of Strom Thurmond. Strom is not only a fixture on the American political scene, he is not only an innovator of the politics in the 20th century, he has not only contributed perhaps more than any other living American to the evolution and development of two party competition in the South and Southeastern United States, but he is also a man of courage and integrity. He has served his State well. He has contributed much in the past and has yet to contribute to the future development of the American Republic. He has never done so with greater eagerness, dedication, determination as he does as the Senior Senator of the Senate of the United States as the President Pro Tempore. He is a man of great distinction, but perhaps more importantly, he is a man of great compassion and understanding. He treats every Senator as his equal—as his colleague, his friend, and his companion. He discharges his obligations with clarity. His singleness of purpose, and of equity, apply to all. My friends, it is a great honor for me to participate in this program this evening, when we assure that the political tradition of Strom Thurmond will be perpetuated in the instruction of our young men and women at a great institution of learning, the Law School at the University of South Carolina.

The Thurmond Chair will be a reminder to generations yet unborn that no politicial challenge is beyond the scope of a man of dedication. It will be a reminder, I am sure, that a man who has convictions and principles can aspire to accomplish not only his own electoral success, but also can change the fundamental way the political course in the mainstream events in the whole region occur. By his service and example, he can indeed contribute in the enfoldment and development of this nation for the years ahead, more so perhaps than any other person that I know or any other member of the Senate. I am sure historians of the future will look back on Strom Thurmond's public service and say here is a man who has contributed not only himself, not only his experience, his vision, his dedication, but most of all his confidence that the American Republic has her time of greatness before it and not behind it.

My friends would you join me in paying our respects to a great American, the man to who we do honor tonight at this celebration, Strom Thurmond.

REMARKS BY SENATOR ROBERT C. BYRD

Howard is serving truly with great distinction—he is a fine Majority Leader and he is also a gentleman, which makes serving with him a joy.

Aristotle said, "Law is order and good law is good order." From that viewpoint the law stands against chaos. It possesses a being and a will of its own. It is objective, it is eternal. A man who would know the blessings of the law must serve it persistently, faithfully, and obediently. Strom Thurmond is such a man.

For more than a half a century, he has spent most of his public and professional career in some phase of law. As a judge, he interpreted the law. As governor, he applied the law. As a lawyer, he served it. And for more than a quarter of a century in the Senate, he has served as a legislator, and he has helped to inscribe it. Honoring Strom Thurmond by establishing a law professorship and scholarships in legal study is therefore an appropriate means for remembering his contributions to society.

As few men have in our time, Strom Thurmond has been an advocate of the law—a bulwark of civilization and sanity against many modern forms of barbarism, license and violence. At times his insistence on the objective nature of the law was not appreciated by some. Instead of allowing sound legal principles to shape society, some have attempted to bend the law to fit the whims of a few. As a result, sentimentality has sometimes thwarted justice, and carelessness has masqueraded as compassion. In a society as diverse as our own, our liberties largely depend on self-discipline. Men who demand rights must also accept responsibilities. Men who want freedom must likewise learn restraint. Certainly, we are all unique individuals with different potentials and interests, but we only enjoy individual fulfillment in cooperative and respectful community with other people. Throughout his career, Strom Thurmond has never forgotten these principles. While he has continually voiced opinions favored by South Carolinians, in the process he has echoed many national sentiments as well. Moreover, while he has consistently grown with the times, he has never outgrown the constitutional values that first brought him to national prominence. He has certainly influenced our era.

I have enjoyed Senator Thurmond's friendship since 1959. In the time, he has given me many reasons to admire him. I especially envy his apparently endless youth combined with his sage maturity.

Tonight, therefore, I join all of you in paying tribute to this legendary statesman, distinguished colleague, and good friend, and I thank you for honoring him as you have with special gifts to the University of South Carolina Law School. Above all, I thank the people of South Carolina for sharing with the rest of us for so many

years the talents and abilities of one of its most outstanding citizens.

REMARKS BY SENATOR FRITZ HOLLINGS

Thank you Mr. Leader, Mr. Chief Justice, Mr. Attorney General, Senator Thurmond and Nancy, my distinguished colleagues from the Senate and House. In fact, I know Strom will be thanking you, but I would like to say categorically for South Carolina we are in high cotton here tonight.

This is quite a crowd. I never knew there were this many people interested in voting rights and busing in my life. I thought when I stayed off the Judiciary Committee that I had done the right thing, but I better take a better look and see what you've got going, because I have never seen such a distinguished group.

In addition to our friends in the Congress and executives of industry, we have our good friend, Secretary Edwards from South Carolina, and our Governor wanted to be here. I was asked to read this telegram:

"I wish I could be with you this evening in establishing the Storm Thurmond Chair and Scholarships in Law at the University of South Carolina. It is certainly a deserving recognition. Please accept my best wishes for a delightful evening."—Richard W. Riley, Governor of South Carolina.

Strom, I want to be first—because of all of the things which have been said much more eloquently—but even George Washington, first in law, and first in peace, married a widow. The other day I must say that Strom called me and I had just become a grandfather and he said, "Fritz, I want to congratulate you. I never knew you were that old." I said, "Strom, I've been waiting 30 years to do something you couldn't do." Now I am first.

The other night we had a party at the Organization of American States and this very stern dowager came up to one of the Latin American ambassadors and said, "Mr. Ambassador, bullfighting is the number one sport in your country. I think that's revolting." The Ambassador turned right quickly and said, "Madame, you're wrong on two scores. First, bullfighting is our number two sport and it's not revolting—that's our number one." I thought that was very fitting for the evening since Strom Thurmond's been revolting all these years since 1948. (Turning to Sen. Baker) You said he started the two party system. This fellow started the four party system and you better watch your mob too, because he'll start a fifth party if you don't do right.

In 1948, as George Wallace, said later, "there wasn't a dime's worth of difference" and Senator Thurmond ran as a presidential nominee in that third party winning four states—39 electoral votes. And therefore in 1954, he revolted against committee selection for the nominee for the United States Senate and set history by winning on a write-in, which had never happened in this country before, and he was written in as a United States Senator from South Carolina. Then in 1964, he saw that the Republican party was the party of the future and he revolted and he's been dead right. He's had the majority in the White House since that time and now he sits as President Pro Tempore of the Republican Senate. In each of these occasions and every other occasion, Strom has done it with tremendous courage and tremendous conviction—and as a leader.

We hear now so much about leadership and people not trusting politicians any more. I think people who say they do not trust politicians any more are waiting for politicians who will behave like they trust the people. I guess that has been a cardinal principle of Strom throughout his 52 years of public service. Many of the critics would say that if he makes up his mind you will never change it. You might as well leave him alone. He is blind and you cannot change him. But for 52 years in that "crucible of political fire" that John Kennedy talked about Strom was steeled and tried, and the people found that it was his critics who were blind and that Strom could see very well.

I remember once in presenting President Hoover to the Corps of Cadets that he started off addressing the corps by saying, "My fellow students, as long as you continue to be a student and continue to learn, you will continue to live." I noticed in the front of the program that it says Strom is forever young and forever a student. He has learned that secret, and that is why he stays young. And that is why he has dedicated himself to the education of our youth. As Diogenes said, "The foundation of any nation rests upon the education of its youth." Strom over the last dozen years has given our youth numerous scholarships to colleagues, to young and deserving students throughout the State of South Carolina. He now comes to the School of Law and honors it. It was Holmes who said, "the Labor of law is not logic, but experience is learning." We in this Club—and we are a family, Howard—have learned just that secret. Every time a pay bill comes up we sort of smile to ourselves, because the real pay is in being in this family, in this greatest of all post-graduate courses in the world, the United States Senate. It is a learning process, Strom, to honor the Chair in the School of Law and continue the great contribution you have made here tonight with this magnificent group of friends. You have really contributed to education, which is really more than to be honored. When you educate children, it is a greater honor than those who produce them, because they only give life. For those who educate, give the art of living.

We in South Carolina are extremely proud of our leading citizen who for so many years has had the courage to take a stance as he has and end up young, end up learning and end up leading.

REMARKS BY SENATOR PAUL LAXALT

I have the distinct honor and pleasure tonight to bring to you two communications from two rather distinguished Americans. Firstly:

"DEAR MR. PRESIDENT PRO TEMPORE, MR. CHAIRMAN, SENATOR, GENERAL, JUDGE, COUNSELOR, AND MY FRIEND STROM: I am so sorry that I cannot be with you and your distinguished friends this evening. As you know, I have had a commitment for some time which I could simply not reschedule. There's no reason for me to go on about why you are so deserving of this honor. Your record of service to South Carolina and the nation surely speaks for itself. As lawyer, judge, Governor, and United States Senator, you have consistently distinguished yourself as a good man and a great leader. I heartedly commend the University of South Carolina for honoring you in this most worthwhile manner.

"Congratulations, Strom. I look forward to working with you in the weeks and months ahead.

Sincerely,

GEORGE BUSH."

Lastly, from the White House, Washington, May 18, 1981:

"DEAR STROM: Nancy and I are very proud to extend our congratulations on the great honor which the University of South Carolina pays you with the Strom Thurmond Chair of Law. We know how proud this honor makes you and are delighted to join your family, friends and colleagues in this tribute.

"With warm personal regards and again congratulations, my friend.

Sincerely,

RONALD REAGAN."

REMARKS BY DR. JAMES B. HOLDERMAN

Please allow me to bring this evening the great gratitude and heartfelt warmth of the people of the University of South Carolina to you. By honoring our distinguished Senator as you do, you honor—and substantially aid, I might say—our University. Your assistance to the Strom Thurmond Chair and Scholarship Fund at our College of Law will help us make the strides to assure the continuing excellence of our program. There is absolutely no challenge, no question to the assertion that we are the best law school in South Carolina—we are the only law school in South Carolina. We take that role and mission very seriously. Because we are singular, the only place in our State where the probing intellects of those who aspire to the law can be served, we have a special obligation to be in competition with ourselves. We cannot permit mediocrity nor afford only to be good. Our corner on the market requires us to assure high quality, excellence, superior faculty, extraordinary facilities, outstanding students. Your contributions generously given make all that possible. I thank you.

I thank you for helping us, too, in honoring one of the greatest friends Carolina has known, Despite his early transgression of attending Clemson as an undergraduate, he has, and I can so say by a vote of our Board of Trustees officially, more than redeemed himself. He is our great and personal friend and the University is also determined to name the auditorium in the College of Law the "Storm Thurmond Auditorium."

His life, vibrant and dynamic as it continues to be, is so intertwined with the history of his State, present and future, that the two are virtually indistinguishable. Emerson has observed with his own special eloquence that "there's properly no history, only biography." Senator Thurmond is a living manifestation of that axiom. His life, his tremendous contributions, reflect the story of South Carolina: Its growth, its progress, its readiness for the 80's, its constant sense of renewal, its determination. In so many ways South Carolina and Strom Thurmond are one and the same. It is a personal privilege to witness this phenomenon up close and as a recent arrival on the scene—and understand four years is only a millisecond in South Carolina history—it holds a special significance.

Tonight, too, is historic for another reason. A venerable institution—members of the United States Senate founded in 1789, honoring an institution in his own right—Strom Thurmond—founded in 1902, for the benefit of an institution—the University of South Carolina—founded in 1801. Senator Thurmond finds himself on perhaps this rare occasion as the youngster in the group. As a student of the first of these institutions, and a friend and admirer of the second, and a servant of the third, I thank you for the privilege of being here and for your tremendous support and generosity,

and offer our sincerest congratulations to you, Senator Thurmond.

REMARKS BY MARK WILHELMI

As Senator Baker said, I am Mark Wilhelmi, a student of the University of South Carolina School of Law. I am what you might say the final product of where all your generosities and Senator Thurmond's generosity goes tonight.

We are awfully proud of our Law School and of our University. I must say that through the efforts of Dr. Holderman, who as the President of our University in the past few years, has literally put South Carolina on the map as a leading institution and as a great university. I would also like to say that our new Dean, Dean Harry Lightsey, Jr., who has become our Dean in the past year, has by far accomplished more in one year being Dean than previous deans have done in ten years. The students appreciate that. I would like to introduce Dean Lightsey, if he would please stand up.

Obviously, all the money that is given tonight at this dinner goes to students at the University of South Carolina. I thought it would be appropriate if I read a dedication written by a student of the University of South Carolina who is a recipient of one of the scholarships of the Strom Thurmond Scholarship Fund. If I may, I would like to read that right now:

"Words are unequal to the task of expressing our appreciation for a lifetime of public service, contribution, and dedication to the aid of fellow citizens. Through this modest medium, however, we attempt to convey some semblance of the esteem in which you are held. As a soldier, attorney, judge, distinguished statesman, and the President Pro Tempore, you exemplify the epitome of success. Your generosity in contributing to and supporting the cause of higher education in South Carolina—and particularly the University of South Carolina School of Law—has never waivered in the face of your many accomplishments. Indeed it parallels the achievements you have attained as our Senior Statesman. We, as recipients of much of your support, find the opportunity at hand appropriate for expressing our thanks. A simple thank you for the past and continued support seems insufficent to convey the depth of our gratitude in the face of all you have done. Your support has literally spanned generations, and countless students have received direct and indirect aid at your bequest. Yet "thank you" conveys as simply as possible the sum total of all of our feelings. Its eloquence is conveyed by its plainness and it loses nothing in this translation. We thank you then, Senator J. Strom Thurmond, for your past generosity, dedication of time and effort, and support of our commitment to quality legal education. Perhaps, though, these words were doomed to fail in achieving the task to which they are set. We may never be able to thank you enough. We can and do, through joining in honoring you, by helping to perpetuate through the J. Strom Thurmond endowment the memory of your achievements and service."

This was written by a second year student at the University of South Carolina School of Law, John Sowards.

Now on behalf of all the students of the University of South Carolina, I would like to present a plaque which was made to honor Senator Thurmond. If you would stand, Senator Thurmond, I will read it to the audience:

"We the law students of the University of South Carolina wish to express our deep appreciation to Senator Strom Thurmond for his many generous contributions and assistance to us in pursuit of our legal studies. As a distinguished educator, soldier, attorney, judge, statesman, and President Pro Tempore of the United States Senate, he exemplifies the epitome of dedicated public service by his constant and unwavering concern for his fellow citizens. Our respect and esteem for him are immeasurable. Our gratitude and praise are unequal. We take pride in honoring him for his numerous achievements.—The students of the University of South Carolina School of Law."

RESPONSE BY SENATOR STROM THURMOND

I am indeed honored on this occasion. I feel very humbled by what has been said this evening. I only wish my parents could have been living and been here tonight. My father would have been amused, and my mother would have believed every word of it.

Please permit me to thank you, Senator Baker, for acting as the presiding officer here in such an eloquent style. I have frequently said that Howard Baker is the most articulate man in America, and I am sure you agree after tonight. He may be President yet.

Senator Byrd, I appreciate your kind words. Coming from the Minority Leader, I especially appreciate it. Senator Byrd was born and bred in poverty, and I do not know of a man in America who deserves more credit for making of himself the man he is today than Senator Byrd. I have served with Lyndon Johnson, Mansfield, and all of those fellows, and there sits the greatest "parliamentarian" I have seen in the Senate—Senator Robert Byrd.

I wish to thank Senator Stevens and Senator McClure also for joining in this occasion. The entire Democratic leadership, the entire Republican leadership, and the Vice President joined in inviting us here tonight. I feel deeply honored and appreciate it more than you will ever know.

I especially wish to thank my colleague Senator Hollings. Senator Hollings served in the House in South Carolina, he served as Lieutenant Governor, he served as Governor, and then he came to the Senate. I have frequently told people that he is the best debater in the United States Senate. He is an able man, and it has been a pleasure to serve with him. We do not always vote alike on everything—sometimes he is wrong—but I admire him as a friend, and as a colleague; and Fritz, I appreciate you and hold you in high esteem.

I wish that the other Senators here could have been called on this evening but time, of course, did not permit. I did not arrange the program anyway. Senator Stevens is here, the assistant Majority Leader. I appreciate him as a great Senator who married a lovely woman just a few months ago and Mrs. Stevens is with him tonight.

Mr. Chief Justice, you honor us with your presence. I had the privilege of seeing Charles Evans Hughes preside over the Supreme Court when I was admitted to practice before the Court in 1938. I thought he was the most distinguished man I had ever seen, until you came along. We appreciate you and the great work you are doing.

Mr. Attorney General, I did not know you before you came to Washington, but it has been a great pleasure to work with you. You have proved to be not only an able lawyer but also a keen student of human nature and a true patriot. I am looking forward to great things with you as Attorney General of the United States. We are highly pleased that you are now here in that position.

Now, my friends, I want to first express my appreciation to all of you contributors who are here this evening. You were so kind to take this evening out of your lives and be with us. I know the demands upon you. Anybody who lives in Washington, who is somebody, really has to undergo great sacrifices. We appreciate your presence and your assistance.

I see a great many Senators and House members here, and I would like for them to stand for a minute, unless some of them have gotten tired and gone home. (Pause) If I could have had my way, I would have invited every one of them to speak. After all, these tickets were $500 apiece. However, different companies invited some of these colleagues, and I am delighted they did. I just want you to know that I deeply appreciate the friendship of the Senators and House members present.

We have a distinguished Cabinet member here from my State. He was an able Governor and a strong espouser of atomic energy. He, like I, has not been a favorite of the liberal wing of the press. He is a man with a lot of common sense, made South Carolina a fine Governor and is now making President Reagan a valuable man in his cabinet. You are all going to be proud of him. I refer to my good friend Dr. James B. Edwards, Secretary of the Department of Energy.

I want to express my appreciation to Dr. James B. Holderman, President of the University of South Carolina, for his kind words this evening and also for the great job he has done at the University. He came to us from Illinois—a Yankee. But these Yankees come South and make the best Southerners you ever saw. I am extremely proud of him and what he is doing. When I first met his wife, who is so young and pretty, down on the campus, I thought she was a co-ed.

The Dean of the Law School is a well-educated man. He went to Clemson first, where he got a good start. He later enrolled in law school at the University of South Carolina and made the highest marks of any student who ever attended there. He made the top mark on every subject, in every class, and you have already stood up once, Dean Lightsey, but we will let you stand again and take a bow.

I want to again thank all of you good people here tonight who bought tickets to this event and tell you that every dollar you gave can be taken off your income tax. I bet you that the University of South Carolina Law School will put it to just as good or better use than if it had been paid to the Federal Government.

Now, ladies and gentlemen, we set out to raise half a million dollars, and we are going over the mark tonight, with what we have previously raised. All the funds raised will be invested at interest. The principal will never be disturbed—Dr. Holderman and Dean Lightsey, please do not forget this—and the income from the fund will be used as follows: one-half of it to bring in distinguished professors; the other half to assist needy, worthy law students—they have to be both needy and worthy. Now what could you do with your money that is more important than these noble purposes.

It has been my pleasure—and I have gotten more pleasure out of this than anything else—to contribute honorariums and other funds and induce other people to contribute funds, to the Strom Thurmond Foundation, which helps educate 40 to 60

young people a year and to establish 30 scholarships in 25 different institutions for needy, worthy students. What could a person do that is more important than to assist a young person to improve his education and develop his talent in order to render greater service to humanity and raise his standard of living?

I think God gave everyone a talent. It is a matter of finding that talent and developing it, and eventually the way to develop it will be to continue to study. Education is the hope of the world. The reason we are ahead of the rest of the world in so many ways is because we are living in an atmosphere of freedom and have splendid educational institutions. With such educational opportunities, we are bound to go forward.

I want to tell you contributors, that the University of South Carolina, at this great institution, you have made a good investment. I am sure that it will bring you pleasure in years to come to be able to pass the University of South Carolina Law School and stop and see what they are doing, and to know that you had a big part in it.

The one person who did more in this whole matter, who has not been mentioned tonight, is the Chief Counsel of the Judiciary Committee, who is going to leave to go back to South Carolina to be Associate Dean of the Law School at the University—and I want him to stand—Emory Sneeden.

I am not going to make any long speech, but I am just so happy that you are here. I am grateful that you bought tickets to this event. I am appreciative to the University authorities, to my colleagues and friends here tonight, who said things about me that I do not deserve, but at any rate, I am very thankful for the opportunity to be the honored guest on this occasion. This is just really something for a country boy. I cannot believe it. Well here I am on one side with the Majority Leader of the United States Senate and just two over, the great Attorney General of the United States; and on the other side next to me sits the distinguished Chief Justice and all these other great people. I wonder if I'm dreaming? In closing, I thank you from the bottom of my heart and God bless you.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. VOLKMER (at the request of Mr. WRIGHT), for July 27 and 28, on account of extensive flood damage in the congressional district.

Mr. FROST (at the request of Mr. WRIGHT), for today, on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. WEBER of Minnesota) to revise and extend his remarks and include extraneous material:)

Mr. DORNAN of California, for 10 minutes, today.

Mr. MCCLOSKEY, for 60 minutes, today.

Mr. TAUKE, for 10 minutes, today.

Mr. LENT, for 5 minutes, today.

Mr. DORNAN of California, for 5 minutes, on July 29.

Mr. HARTNETT, for 10 minutes, on July 30.

(The following Members (at the request of Mr. DORGAN of North Dakota) to revise and extend their remarks and include extraneous material:)

Mr. ST GERMAIN, for 60 minutes, today.

Mr. VOLKMER, for 20 minutes, today.

Mr. GONZALEZ, for 15 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. MAZZOLI, for 5 minutes, today.

Mr. JONES of Oklahoma, for 15 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. DASCHLE, on House Concurrent Resolution 160.

Mr. CHAPPELL, to revise and extend his remarks to be placed in body of the RECORD immediately preceding Mr. SANTINI's closing remarks on H.R. 1311.

Mr. FOLEY, immediately preceding the vote of the Latta amendment to H.R. 4121 in the Committee of the Whole today.

(The following Members (at the request of Mr. WEBER of Minnesota) and to include extraneous matter:)

Mr. DORNAN of California in three instances.

Mr. LEBOUTILLIER.

Mr. BEREUTER.

Mr. PARRIS in two instances.

Mr. LEE.

Mr. GILMAN.

Mr. HANSEN of Utah in two instances.

Mr. MCCLOSKEY.

Mr. FIELDS in two instances.

Mr. SMITH of New Jersey.

Mr. NAPIER.

Mr. YOUNG of Alaska.

Mr. DERWINSKI in two instances.

Mr. GUNDERSON.

Mr. PAUL.

Mr. SOLOMON.

Ms. FIEDLER in two instances.

Mr. EMERY.

Mr. SAWYER.

Mr. KEMP.

Mr. RITTER.

(The following Members (at the request of Mr. DORNAN of North Dakota) and to include extraneous matter:)

Mr. PEPPER.

Mr. BRODHEAD in two instances.

Mr. RODINO.

Mr. STOKES in three instances.

Mr. GEJDENSON in two instances.

Mr. STARK.

Mr. GEPHARDT.

Mr. LEHMAN.

Mr. CLAY.

Mr. SIMON.

Mr. APPLEGATE in two instances.

Mr. BREAUX.

Mrs. COLLINS of Illinois.

Mr. LANTOS.

Mr. PEASE.

Mr. BLANCHARD in two instances.

Mrs. BOUQUARD.

Mr. FORD of Tennessee.

Mr. VENTO in two instances.

Mr. FAUNTROY.

Mr. MAZZOLI.

Mr. DYSON.

Mr. SOLARZ.

Mr. MARKEY.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 736. An act to provide for the control of illegally taken fish and wildlife; to the Committee on Merchant Marine and Fisheries.

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 1040. An act to amend the District of Columbia Self-Government and Governmental Reorganization Act to increase the amount authorized to be appropriated as the annual Federal payment to the District of Columbia; and

S. 1104. An act to amend the International Investment Survey Act to provide an authorization for further appropriations, to avoid unnecessary duplication of certain surveys, and for other purposes.

ENROLLED JOINT RESOLUTIONS SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled joint resolutions of the House of the following titles, which were thereupon signed by the Speaker:

H.J. Res. 84. Joint resolution designating the week of October 4 through October 10, 1981, as "National Diabetes Week"; and

H.J. Res. 191. Joint resolution designating August 8, 1982, as "National Children's Day."

JOINT RESOLUTION PRESENTED TO THE PRESIDENT

Mr. HAWKINS, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, a joint resolution of the House of the following title:

H.J. Res. 308. Joint resolution making an urgent supplemental appropriation for the Department of Health and Human Services for the fiscal year ending September 30, 1981.

ADJOURNMENT

Mr. VOLKMER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 7 o'clock and 30 minutes p.m.) under its previous order, the House adjourned until tomorrow, Wednesday, July 29, 1981, at 9 a.m.

EXPENDITURE REPORTS CONCERNING OFFICIAL FOREIGN TRAVEL

Reports of various House committees, and a delegation traveling under an authorization from the Speaker, concerning the foreign currencies and U.S. dollars utilized by them during the fourth quarter of calendar year 1980 and the first and second quarters of calendar year 1981 in connection with foreign travel pursuant to Public Law 95-384 are as follows:

REPORT OF EXPENDITURES FOR OFFICIAL FOREIGN TRAVEL, COMMITTEE ON ARMED SERVICES, U.S. HOUSE OF REPRESENTATIVES, EXPENDED BETWEEN APR. 1 AND JUNE 30, 1981

Name of member or employee	Date		Country	Per diem[1]		Transportation		Other purposes		Total	
	Arrival	Departure		Foreign currency	U.S. dollar equivalent or U.S. currency[2]	Foreign currency	U.S. dollar equivalent or U.S. currency[2]	Foreign currency	U.S. dollar equivalent or U.S. currency[2]	Foreign currency	U.S. dollar equivalent or U.S. currency[2]

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1916. A letter from the General Counsel, Department of Energy, transmitting a draft of proposed legislation to extend the expiration date of section 252 of the Energy Policy and Conservation Act; to the Committee on Energy and Commerce.

1917. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a draft of proposed legislation to amend the Immigration and Nationality Act, and for other purposes; to the Committee on the Judiciary.

1918. A letter from the Acting Comptroller General of the United States, transmitting a report on Defense Department losses to bad debts of former service members (AFMD-81-64, July 28, 1981); jointly, to the Committees on Government Operations, and Armed Services.

1919. A letter from the Acting Comptroller General of the United States, transmitting a report on employment trends and grade controls in the Defense Department General Schedule work force (FPCD-81-52, July 28, 1981); jointly, to the Committees on Government Operations, Armed Services, and Post Office and Civil Service.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. BOLLING: Committee on Rules. House Resolution 198. Resolution providing for the consideration of H.R. 4242, a bill to amend the Internal Revenue Code of 1954 to encourage economic growth through reductions in individual income tax rates, the expensing of depreciable property, incentives for small business, and incentives for savings, and for other purposes (Rept. No. 97-205). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BLILEY (for himself, Mr. MCKINNEY, Mr. PARRIS, Mrs. Holt, Mr. DELLUMS, Mr. FAUNTROY, Mr. DYMALLY, Mr. BARNES, Mr. GRAY, and Mr. LELAND):

H.R. 4283. A bill to amend the District of Columbia Self-Government and Governmental Reorganization Act to allow the payment of revenue bonds issued by the District of Columbia from any funds or property owned by the entity for which the bonds were issued, and to make other changes to the law controlling the issuance of revenue bonds; to the Committee on the District of Columbia.

By Mr. BREAUX:

H.R. 4284. A bill to name the lock authorized as a replacement for Vermilion Lock, Louisiana, as "Leland Bowman Lock"; to the Committee on Public Works and Transportation.

By Mr. DYSON:

H.R. 4285. A bill to provide the same annuity benefits to the surviving spouses of military retirees who died before September 21, 1972, but after their discharge or release from active duty, as are provided to the surviving spouses of former members who died before such date while serving on active duty after becoming eligible to retire; to the Committee on Armed Services.

By Mr. GINGRICH (for himself, Mr. EMERY, Mr. DORNAN of California, Mr. WIRTH, Mr. DERWINSKI, Mr. MURPHY, Mr. MADDOX, Mr. WHITEHURST, Mr. YATRON, Mr. FORSYTHE, Mr. ROE, Mr. JEFFRIES, Mr. DOUGHERTY, and Mr. WILSON):

H.R. 4286. A bill to establish a National space and aeronautics policy, and for other purposes; to the Committee on Science and Technology.

By Mr. HAGEDORN:

H.R. 4287. A bill to amend title 5 of the United States Code to permit the Secretary of Defense to reimburse Department of Defense civilian recruiters for certain recruiting expenses; jointly, to the Committees on Post Office and Civil Service and Armed Services.

By Mr. HAMMERSCHMIDT:

H.R. 4288. A bill to amend chapter 55 of title 10, United States Code, to include chiropractic care in the health care which may be provided members and certain former members of the uniformed services and their dependents in facilities of the uniformed services and under CHAMPUS, and for other purposes; to the Committee on Armed Services.

H.R. 4289. A bill to provide for the establishment of a National Agricultural Cost of Production Board; to the Committee on Agriculture.

H.R. 4290. A bill to amend the Federal Mine and Health Amendments Act of 1977 to provide that the provisions of such act shall not apply to stone mining operations or to sand and gravel mining operations; to the Committee on Education and Labor.

H.R. 4291. A bill to repeal the Davis-Bacon Act, and for other purposes; to the Committee on Education and Labor.

H.R. 4292. A bill to permit the review of regulatory rules and regulations by the Congress; to the Committee on Government Operations.

H.R. 4293. A bill to amend the Communications Act of 1934 in order to prohibit the television broadcasting of programs portraying nudity, obscenity, or explicit sexual activity which is offensive to the public taste and morals; to the Committee on Energy and Commerce.

H.R. 4294. A bill to expand the medical freedom of choice of consumers by amending the Federal Food, Drug, and Cosmetic Act to provide that drugs will be regulated under that act solely to assure their safety; to the Committee on Energy and Commerce.

H.R. 4295. A bill to provide for congressional review of all regulations relating to costs and expenditures for health care, reimbursements to individuals or providers of health care, and for other purposes; jointly, to the Committees on Energy and Commerce, Ways and Means, and Rules.

H.R. 4296. A bill to amend chapter 44 of title 18 of the United States Code (respecting firearms) to penalize the use of firearms in the commission of any felony and to increase the penalties in certain relating provisions; to the Committee on the Judiciary.

H.R. 4297. A bill to amend title XVIII of the Social Security Act to authorize payment under the medicare program for certain services performed by chiropractors; jointly, to the Committees on Ways and Means, and Energy and Commerce.

H.R. 4298. A bill to repeal the earnings limitation of the Social Security Act; to the Committee on Ways and Means.

H.R. 4299. A bill to provide opportunity to individuals to make financial contributions, in connection with the payment of their Federal income tax, for the advancement of the arts and the humanities; to the Committee on Ways and Means.

H.R. 4300. A bill to amend the Internal Revenue Code of 1954 to encourage the employment of handicapped individuals by providing a tax credit for a certain portion of the wages paid to such individuals; to the Committee on Ways and Means.

H.R. 4301. A bill to amend the Internal Revenue Code of 1954 to exempt nonprofit volunteer firefighting or rescue organizations from the Federal excise taxes on gasoline, diesel fuel, and certain other articles and services; to the Committee on Ways and Means.

H.R. 4302. A bill to amend the Internal Revenue Code of 1954 to encourage higher education, and particularly the private funding thereof, by authorizing a deduction from gross income of reasonable amounts contributed to a qualified higher education fund established by the taxpayer for the purpose of funding the higher education of his dependents; to the Committee on Ways and Means.

H.R. 4303. A bill to amend the Internal Revenue Code of 1954 to allow a credit against income tax to individuals for certain expenses incurred in higher education; to the Committee on Ways and Means.

H.R. 4304. A bill to extend to all unmarried individuals the full tax benefits of income splitting now enjoyed by married individuals filing joint returns; and to remove rate inequities for married persons where both are employed; to the Committee on Ways and Means.

H.R. 4305. A bill to amend title XVIII of the Social Security Act to include, as a home health service, nutritional counseling provided by or under the supervision of a registered dietitian; jointly, to the Committees on Ways and Means and Energy and Commerce.

H.R. 4306. A bill to amend title II of the Social Security Act to provide that the waiting period for disability benefits shall not be applicable in the case of a disabled individual suffering from a terminal illness; to the Committees on Ways and Means.

H.R. 4307. A bill to preserve and protect the free choice of individual employees to form, join, or assist labor organizations, or to refrain from such activities; to the Committee on Education and Labor.

H.R. 4308. A bill to amend title 38 of the United States Code to provide that progressive muscular atrophy or amyotrophic lateral scerosis developing a 10-percent or more degree of disability within 7 years after separation from active service during a period of war shall be presumed to be service connected; to the Committee on Veterans' Affairs.

H.R. 4309. A bill to provide chiropractic treatment when requested for veterans eligible for outpatient medical care; to the Committee on Veterans' Affairs.

H.R. 4310. A bill to amend titles II, VII, XI, XVI, XVIII, and XIX of the Social Security Act to provide for the improved administration of the old-age, survivors, and disability insurance program, the supplementary security income program, and the medicare program by a newly established independent Social Security Administration, to separate social security trust fund items from the general Federal budget, to prohibit the mailing of certain notices with social security and supplemental security income benefit checks, and for other purposes; jointly, to the Committees on Ways and Means, and Energy and Commerce.

By Mr. MITCHELL of Maryland:

H.R. 4311. A bill to amend title VII of the Civil Rights Act of 1964 to prohibit employment discrimination within the legislative branch of the Government on the basis of an individual's race, color, religion, sex, or national origin; to the Committee on Education and Labor.

By Mr. SAWYER (for himself, Mr. MCCLORY, Mr. FISH, Mr. SAM B. HALL, JR., Mr. BULTER, Mr. MOORHEAD, Mr. HYDE, Mr. EVANS of Georgia, and Mr. MCCOLLUM):

H.R. 4312. A bill to amend chapter 207 of title 18, United States Code, relating to pretrial services and release; to the Committee on the Judiciary.

By Mr. TAUKE (for himself, Mr. FOLEY, Mr. WHITTAKER, Mr. STANGELAND, MR. BEREUTER, Mr. EVANS of Iowa, Mrs. SMITH of Nebraska, and Mr. ROBERTS of Kansas):

H.R. 4313. A bill to provide standby authority to deal with petroleum supply disruptions, and for other purposes; jointly, to the Committees on Energy and Commerce and Rules.

By Mr. HAMMERSCHMIDT:

H.J. Res. 310. Joint resolution proposing an amendment to the Constitution of the United States to provide that appropriations made by the United States shall not exceed its revenues, except in time of war or national emergency; to the Committee on the Judiciary.

H.J. Res. 311. Joint resolution proposing an amendment to the Constitution of the United States with respect to the offering of prayer in public buildings; to the Committee on the Judiciary.

H.J. Res. 312. Joint resolution proposing an amendment to the Constitution of the United States to prohibit compelling the attendance of a student in a public school other than the public school nearest the residence of such student; to the Committee on the Judiciary.

By Mr. YOUNG of Alaska:

H.J. Res. 313. Joint resolution to authorize and request the President to issue a proclamation designating Haines, Alaska, the official home of the American bald eagle; to the Committee on Post Office and Civil Service.

By Mr. STRATTON (for himself, Mr. MICHEL, Mr. DAN DANIEL, Mr. KEMP, Mr. WHITE, Mr. BEARD, Mr. CHAPPELL, Mr. ANDREWS, Mr. ANTHONY, Mr. APPLEGATE, Mr. ARCHER, Mr. ASHBROOK, Mr. ATKINSON, Mr. BADHAM, Mr. BAFALIS, Mr. BAILEY of Pennsylvania, Mr. BARNARD, Mr. BETHUNE, Mr. BENEDICT, Mr. BENNETT, Mr. BEREUTER, Mr. BEVILL, Mr. BLILEY, Mrs. BOGGS, Mr. BONER of Tennessee, Mrs. BOUQUARD, Mr. BOWEN, Mr. BREAUX, Mr. BRINKLEY, Mr. BROOMFIELD, Mr. BROWN of Ohio, Mr. BROWN of Colorado, Mr. BROYHILL, Mr. BURGENER, Mr. BUTLER, Mrs. BYRON, Mr. CAMPBELL, Mr. CARMAN, Mr. CARNEY, Mr. CLAUSEN, Mr. CLINGER, Mr. COLLINS of Texas, Mr. CONABLE, Mr. CORCORAN, Mr. COUGHLIN, Mr. COURTER, Mr. JAMES K. COYNE, Mr. CRAIG, MR. DANIEL B. CRANE, Mr. PHILIP M. CRANE, Mr. ROBERT W. DANIEL, Jr., Mr. DANNEMEYER, Mr. DAUB, Mr. DAVIS, Mr. DECKARD, Mr. DE LA GARZA, Mr. DERWINSKI, Mr. DICKINSON, Mr. DORNAN of California, Mr. DOUGHERTY, Mr. DREIER, Mr. DUNCAN, Mr. DUNN, Mr. EDWARDS of Alabama, Mr. EMERSON, Mr. EMERY, Mr. ENGLISH, Mr. ERLENBORN, Mr. EVANS of Georgia, Mr. EVANS of Iowa, Mr. EVANS of Indiana, Mr. EVANS of Delaware, Mr. FIELDS, MR. FINDLEY, Mr. FISH, Mr. FLIPPO, Mr. FOUNTAIN, Mr. FROST, Mr. FUQUA, Mr. GILMAN, Mr. GINGRICH, Mr. GINN, Mr. GOLDWATER, Mr. GOODLING, Mr. GRADISON, Mr. GRAMM, Mr. GREGG, Mr. GRISHAM, Mr. GUNDERSON, Mr. HAGEDORN, Mr. RALPH M. HALL, Mr. SAM B. HALL, Jr., Mr. HAMMERSCHMIDT, Mr. HANCE, Mr. HANSEN of Idaho, Mr. HANSEN of Utah, Mr. HARTNETT, Mr. HATCHER, Mr. HEFNER, Mr. HENDON, Mr. HILER, Mr. HILLIS, Mr. HOLLAND, Mrs. HOLT, Mr. HOPKINS, Mr. HORTON, Mr. HUBBARD, Mr. HUCKABY, Mr. HUNTER, Mr. HUTTO, Mr. HYDE, Mr. IRELAND, Mr. JEFFRIES, Mr. JENKINS, Mr. JOHNSTON, Mr. JONES of North Carolina, Mr. KAZEN, Mr. KINDNESS, Mr. KRAMER, Mr. LAGOMARSINO, Mr. LATTA, Mr. LEATH of Texas, Mr. LEBOUTILLIER, Mr. LEE, Mr. LENT, Mr. LEVITAS, Mr. LEWIS, Mr. LIVINGSTON, Mr. LOEFFLER, Mr. LOTT, Mr. LOWERY of California, Mr. LUJAN, Mr. LUNGREN, Mr. MADIGAN, Mr. MARKS, Mr. MARLENEE, Mr. MARRIOTT, Mr. MARTIN of New York, Mrs. MARTIN of Illinois, Mr. MCCLORY, Mr. MCCOLLUM, Mr. MCCURDY, Mr. MCDADE, Mr. MCDONALD, Mr. MCEWEN, Mr. MCGRATH, Mr. MICA, Mr. MILLER of Ohio, Mr. MITCHELL of New York, Mr. MOLINARI, Mr. MOLLOHAN, Mr. MONTGOMERY, Mr. BAILEY of Missouri, Mr. CHAPPIE, Mr. CHENEY, Mr. EDWARDS of Oklahoma, Mr. MOORE, Mr, MOORHEAD, Mr. MOTTL, Mr. MURPHY, Mr. MURTHA, Mr. MYERS, Mr. NAPIER, Mr. NELLIGAN, Mr. NELSON, Mr. NICHOLS, Mr. PARRIS, Mr. PASHAYAN, Mr. PAUL, Mr. PETRI, Mr. PICKLE, Mr. QUILLEN, Mr. REGULA, Mr. RINALDO, Mr. RITTER, Mr. ROBERTS of South Dakota, Mr. ROBERTS of Kansas, Mr. ROBINSON, Mr. ROEMER, Mr. ROGERS, Mr. ROTH, Mr. ROUSSELOT, Mr. RUDD, Mr. SANTINI, Mr. SAWYER, Mr. SCHULZE, Mr. SHAW, Mr. SHELBY, Mr. SHUMWAY, Mr. SHUSTER, Mr. SKEEN, Mr. SKELTON, Mr. SMITH of Alabama, Mr. SMITH of New Jersey, Mr. SMITH of Oregon, Mrs. SMITH of Nebraska, Mrs. SNOWE, Mr. SNYDER, Mr. SOLOMON, Mr. SPENCE, Mr. STANGELAND, Mr. STANTON of Ohio, Mr. STATON of West Virginia, Mr. STENHOLM, Mr. STUMP, Mr. TAUZIN, Mr. TAYLOR, Mr. TRIBLE, Mr. VANDER JAGT, Mr. WALKER, Mr. WAMPLER, Mr. WATKINS, Mr. WEBER of Ohio, Mr. WEBER of Minnesota, Mr. WHITEHURST, Mr. WHITTAKER, Mr. WHITTEN, Mr. WILLIAMS of Ohio, Mr. WILSON, Mr. WINN, Mr. WOLF, Mr. WON PAT, Mr. WORTLEY, Mr. YATRON, Mr. YOUNG of Florida, Mr. YOUNG of Alaska, Mr. YOUNG of Missouri, and Mr. ZEFERETTI):

H. Con. Res. 163. Concurrent resolution to express the sense of the Congress that the foreign policy of the United States should reflect a national strategy of peace through strength; to the Committee on Foreign Affairs.

By Mr. PHILIP M. CRANE:

H. Res. 199. Resolution relating to the capital of Israel; to the Committee on Foreign Affairs.

By Mr. DOUGHERTY (for himself, Mr. DONNELLY, Mrs. COLLINS of Illinois, Mrs. FENWICK, AND MR. ROE):

H. Res. 200. Resolution expressing the sense of the House of Representatives with respect to the unjust imprisonment of Benedict Scott (Vytautas Skuodis) by the Government of the Soviet Union; to the Committee on Foreign Affairs.

By Mr. HAMMERSCHMIDT:

H. Res. 201. Resolution to amend the Rules of the House of Representatives to establish the Committee on Internal Security, and for other purposes; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under the clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. FORD of Tennessee:

H.R. 4314. A bill for the relief of Patrick P. W. Tso; to the Committee on the Judiciary.

By Mr. HAGEDORN:

H.R. 4315. A bill for the relief of Meng Lim; to the Committee on the Judiciary.

H.R. 4316. A bill for the relief of Barbara Malewicz; to the Committee on the Judiciary.

By Mr. HAMMERSCHMIDT:

H.R. 4317. A bill for the relief of Alicia Miranda Arnold; to the Committee on the Judiciary.

H.R. 4318. A bill for the relief of Raul Arriaza, his wife, Maria Marquart Schubert, Arriaza, and their children, Andres Arriaza and Daniel Aivouich Arriaza; to the Committee on the Judiciary.

By Mr. RAHALL:

H.R. 4319. A bill for the relief of Dr. Olivia A. N. Dizon; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 741: Mr. HOYER.

H.R. 761: Mr. SOLOMON.

H.R. 1353: Mr. FOGLIETTA.

H.R. 1767: Mr. ERLENBORN, Mr. DAUB, Mr. CRAIG, Mr. ROBERT W. DANIEL, Jr., Mr. PHILIP M. CRANE, Mr. CORCORAN, Mr. DORNAN of California, Mr. SPENCE, Mr. JEFFRIES, Mr. BADHAM, Mr. BAFALIS, and Mr. EMERSON.

H.R. 1918: Mr. FORSYTHE, Mr. ERDAHL, Mr. KAZEN, Mr. FIELDS, Mr. WHITTEN, Mr. MITCHELL of Maryland, Mr. ZEFERETTI, Mr. MITCHELL of New York, Mr. GRAY, Mr. LANTOS, and Mr. BROWN of California.

H.R. 2103: Mr. ROE.

H.R. 2322: Mr. DE LA GARZA, Mr. ROUSSELOT, Mr. DANIEL B. CRANE, Mr. EDWARDS of Oklahoma, Mr. JEFFRIES, Mr. PHILIP M. CRANE, Mr. GONZALEZ, and Mr. JAMES K. COYNE.

H.R. 2488: Mr. FITHIAN.

H.R. 2533: Mr. WHITTAKER, Mr. FORSYTHE, and Mr. CLAUSEN.

H.R. 2640: Mr. FISH.

H.R. 2883: Mr. LUNDINE.

H.R. 3227: Mr. MCEWEN, Mr. STANGELAND, Mr. OTTINGER, and Mr. GREEN.

H.R. 3269: Mr. LIVINGSTON, Mr. DANNEMEYER, Mrs. SCHROEDER, Mr. MCCOLLUM, and Mr. GEPHARDT.

H.R. 3721: Mrs. ROUKEMA.

H.R. 3879: Mr. KOGOVSEK.

H.R. 3930: Mr. RANGEL, Mr. LAFALCE, Mr. NOWAK, Mr. BOWEN, Mr. CLAY, Mrs. COLLINS of Illinois, Mr. EDGAR, Mr. GEJDENSON, Mrs. HOLT, Mr. NEAL, Mr. PEPPER, Mr. RODINO, and Mr. ROE.

H.R. 4110: Mr. ENGLISH, Mr. DUNCAN, Mr. RICHMOND, Mr. HYDE, Mr. FASCELL, Mr. COLLINS of Texas, Mr. SMITH of New Jersey, Mr. WOLF, Mr. FORSYTHE, Mr. BAILEY of Pennsylvania, Mr. MARTIN of North Carolina, Mr. IRELAND, Mr. SUNIA, Mr. BAFALIS, Mr. GILMAN, Mr. BEARD, Mr. SCHEUER, Mr. PEPPER, Mr. FRENZEL, Mr. DORNAN of California, Mr. ADDABBO, Mr. GUARINI, Mr. JONES of North Carolina, Mr. STARK, and Mr. DENARDIS.

H.R. 4147: Mr. SANTINI, Mr. BADHAM, Mr. MADIGAN, Mr. FLORIO, Mr. LEE, Mrs. HECKLER, Mr. SOLARZ, Mr. PASHAYAN, and Mr. DWYER.

H.R. 4269: Mr. BENNETT, Mr. MITCHELL of Maryland, Mr. BINGHAM, and Mr. BROWN of California.

H.J. Res. 260: Mr. COATS, Mr. SHAW, Mrs. MARTIN of Illinois, Mr. SOLOMON, Mr. DENARDIS, Mr. ROGERS, Mr. BADHAM, and Mr. LOEFFLER.

H. Con. Res. 100: Mr. NICHOLS, Mr. RAILSBACK, Mr. SOLOMON, and Mr. CAMPBELL.

H. Res. 48: Mr. ASHBROOK, Mr. BADHAM, Mr. BARNARD, Mr. BEARD, Mr. BEVILL, Mr. BOWEN, Mr. BRINKLEY, Mr. BURGENER, Mr. BUTLER, Mrs. BYRON, Mr. CAMPBELL, Mr. CARNEY, Mr. CHAPPIE, Mr. COURTER, Mr. DAN DANIEL, Mr. DORNAN of California, Mr. DOWDY, Mr. DREIER, Mr. DUNCAN, Mr. DYSON, Mr. ENGLISH, Mr, EVANS of Georgia, Mr. EVANS of Delaware, Mr. FIELDS, Mr. FLIPPO, Mr. FUQUA, Mr. GAYDOS, Mr. GOODLING, Mr. GRISHAM, Mr. HAGEDORN, Mr. RALPH M. HALL, Mr. HAMMERSCHMIDT, Mr. HANCE, Mr. HANSEN of Idaho, Mr. HANSEN of Utah, Mr. HARTNETT, Mr. HEFNER, Mr. HENDON, Mr. HIGHTOWER, Mr. HILLIS, Mr. HOLLAND, Mr. HOLLENBECK, Mrs. HOLT, Mr. HOPKINS, Mr. HUCKABY, Mr. HUNTER, Mr. HYDE, Mr. IRELAND, Mr. JENKINS, Mr. JONES of Tennessee, Mr. JONES of North Carolina, Mr. JOHNSTON, Mr. KEMP, Mr. LATTA, Mr. LEACH of Iowa, Mr. LEBOUTILLIER, Mr. LENT, Mr. LEWIS, Mr. LUJAN, Mr. MCCOLLUM, Mr. MCEWEN, Mr. MARKS, Mr. MARLENEE, Mr. MARRIOTT, Mr. MARTIN of North Carolina, Mr. MITCHELL of New York, Mr. MOLLOHAN, Mr. MURTHA, Mr. NAPIER, Mr. NELSON, Mr. NICHOLS, Ms. OAKAR, Mr. O'BRIEN, Mr. PARRIS, Mr. QUILLEN, Mr. REGULA, Mr. RHODES, Mr. ROEMER, Mr. SCHULZE, Mr. SHUSTER, Mr. SILJANDER, Mr. SKEEN, Mr. SMITH of Oregon, Mrs. SMITH of Nebraska, Mr. SNYDER, Mr. STANTON of Ohio, Mr. TAUZIN, Mr. TAYLOR, Mr. TRIBLE, Mr. WAMPLER, Mr. WHITE, Mr. WHITLEY, Mr. WORTLEY, and Mr. VOLKMER.

H. Res. 176: Mr. PORTER.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

150. By the SPEAKER: Petition of District Two, National Alliance of Postal and Federal Employees, Baltimore, Md., relative to voting representation for the District of Columbia in Congress; to the Committee on the Judiciary.

151. Also, petition of District Two, National Alliance of Postal and Federal Employees, Baltimore, Md., relative to the Ku Klux Klan; to the Committee on the Judiciary.

152. Also, petition of District Two, National Alliance of Postal and Federal Employees, Baltimore, Md., relative to cost-of-living adjustments for retired Federal employees; to the Committee on Post Office and Civil Service.

153. Also, petition of District Two, National Alliance of Postal and Federal Employees, Baltimore, Md., relative to the proposal to merge the civil service retirement program with social security; jointly, to the Committees on Post Office and Civil Service, and Ways and Means.

AMENDMENTS

Under clause 6 of rule XXII, proposed amendments were submitted as follows:

H.R. 4120

By Mr. ERTEL:

—Page 31, immediately after line 7, insert the following new sections:

SEC. 307. Except for services provided for the Speaker, majority floor leaders, and minority floor leaders none of the funds provided in this Act to any department or agency shall be obligated or expended to provide a personal cook, chauffeur, or other personal servants to any officer or employee of such department or agency.

SEC. 308. Except for vehicles provided to Speaker, majority floor leaders and minority floor leaders none of the funds provided in this Act to any department or agency shall be obligated or expended to procure passenger automobiles as defined in 15 U.S.C. 2001 with an EPA estimated miles per gallon average of less than 22 miles per gallon.

SENATE—*Tuesday, July 28, 1981*

(Legislative day of Wednesday, July 8, 1981)

The Senate met at 8:15 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Let us pray in the profound and familiar words of St. Francis of Assisi.

"Lord, make me an instrument of Thy peace. Where there is hatred, let me sow love; where there is injury, pardon; where there is doubt, faith; where there is despair, hope; where there is darkness, light; and where there is sadness, joy.

"O Divine Master, grant that we may not so much seek to be consoled as to console; to be understood as to understand; to be loved as to love; for it is in giving that we receive; it is in pardoning that we are pardoned; and it is in dying that we are born to eternal life." Amen.

RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The acting majority leader is recognized.

Mr. STEVENS. I thank the Chair.

Mr. President, it is my understanding that the regular time for the two leaders has been reserved under the order that applies for this morning; is that correct?

The PRESIDENT pro tempore. The Senator is correct.

THE JOURNAL

Mr. STEVENS. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

THE IRS IN ALASKA

Mr. STEVENS. Mr. President, assuming that we can terminate this portion of our session and go into recess in August, I plan to return to my State of Alaska to conduct hearings with other Members of the Senate on an issue that I think is alarming.

In recent months I have become increasingly of the opinion that the law enforcement activities of the Internal Revenue Service are overzealous. It is my hope to explore in detail the rules followed by the Internal Revenue Service concerning seizure practices.

The hearings that we shall hold in Alaska will be before the Subcommittee on Treasury Appropriations, whose chairman is our good friend Senator JAMES ABDNOR. The dates for those hearings will be August 4 in Anchorage and August 6 in Fairbanks. It is my hope they will be well attended for I am quite disturbed with the statistics which indicate that Alaskans suffer among the highest incidence of forced collection and tax arrest in the country by the Internal Revenue Service.

The purpose of these hearings is to establish why such unequal treatment is being administered to Alaska, why the Internal Revenue Service practices such energetic enforcement in Alaska as compared to elsewhere, and to identify solutions to these problems. It may be that we will be touching just the tip of an iceberg when we address the questionable practices of the IRS in Alaska.

It is my understanding that the IRS is the only Government agency that has seizure powers without a court review. The impact of such power in the hands of the IRS means that each and every American—not just Alaskans—are subject to the exercise of these broad powers by a single agency that, to me, seems to be questionable in view of our rights and protections guaranteed by the Constitution of the United States.

It is my hope that our subcommittee will look closely into these matters and particularly into the seizure powers of the IRS during these hearings in August. Therefore, I am hopeful the Senate will complete its legislative responsibilities and that the August recess will commence on time.

SECRETARY OF THE INTERIOR JAMES WATT

Mr. STEVENS. Mr. President, I have been very concerned about the criticism that has been levied against the Secretary of Interior, James Watt. If there are voices of extremism in the country today, they are the extreme voices that are criticizing Secretary Watt before his policies have had a fair chance.

The policies he has promoted, in my opinion, will help restore the balance and reason to the programs administered by the Department of the Interior.

During the last few years, I have been intimately involved in the legislative battle over a very important issue to Alaska, which the Senate knows well from the long days that we spent on it last year. I am referring to the legislative battle on the Alaska lands bill.

During that battle, the former Secretary of the Interior, Cecil Andrus, who I believe is a good man, held viewpoints that were definitely contrary to those that I hold.

We had many battles as we tried to convince Federal officials of the needs of Alaska's Native communities, Alaska's hunters, Alaska's fishermen, miners, businessmen, hikers, and both the rural and urban dwellers of our State.

In the past, the Federal Government showed great antipathy toward Alaska and Alaskans concerning the rights and needs of Alaskans.

Now, that policy has changed. It is my opinion that Secretary Watt has brought a fresh viewpoint to the Department of the Interior, and although we are certainly not winning all of the battles, today there is a great deal more understanding of the problems relating to Alaska and the West in the Department of the Interior. Secretary Watt has surrounded himself with experts in land policy and management and he remains sensitive to concerns made known to the Department of the Interior by States and communities on controversial issues. I am pleased with his leadership at the Department.

Mr. President, an editorial was recently published in the Fairbanks Daily News-Miner describing the viewpoint of Alaskans toward the policy of Secretary James Watt. I ask unanimous consent that the full text of the editorial be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

BACK SECRETARY WATT

The political wolves are snapping at the heels of Interior Secretary James Watt. Alaskan leaders, both here and in Washington, D.C., would do well not to join the pack because many of his policies are heading in a direction that will make him one of the best friends our state has had in the federal government for quite some time.

The focus of the criticism is Secretary Watt's plan to increase and speed up offshore leases for oil prospecting. Some of the California leases are controversial from an environmental standpoint and so are some of the ones in fish-rich Alaskan waters. He also is being criticized for letting out too much lease acreage at one time.

One aspect of the attack on Mr. Watt is outlined in an article elsewhere on this page. The thrust seems to be that the new administration should forget about what the voters seemed to be saying last November and continue with the tired policies that were rejected in that election.

Much is being made of the fact that the supposedly moderate National Wildlife Federation has joined more militant environmentalist groups in calling for Mr. Watt's resignation. It seems to us, however, that a very real question exists about just how moderate the NWF is. Alaskans will recall, for example, that federation members from our state broke with the national organization several years ago when it was bent on supporting overly restrictive Alaska lands legislation.

Another aspect of the attack takes a viciously personal approach. We saw it this week when Rep. James Weaver of Oregon tried to drag Secreatry Watt's fundamentalist religious beliefs into a House Interior subcommittee hearing. We Americans laid that sort of religious bigotry in our politics to rest with John Kennedy's campaign for the presidency in 1960 and those who are now trying to revive the corpse two decades later are ill-serving our Nation.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

We also saw this personal approach in the attack this week from Cecil Andrus, Interior Secretary until the voters turned his boss out of office last fall. Secretary Watt has, Mr. Andrus said, "a developmental zeal I've never seen the like of before in public life."

And the former Secretary didn't stop there. "I had hoped that this was just bombastic rhetoric early on and I've remained silent for six months," Mr. Andrus said. "But it becomes apparent that he plans to dump extra acreage out, more than they can use."

That's laughable; doubly so coming from Mr. Andrus, who recently allowed that he might have tended just a wee bit to hyperbole a few years back when he characterized Alaskans who were opposing him on the lands bill as the "rape, ruin and run boys." Certainly Mr. Andrus knows whereof he speaks when he talks of bombastic rhetoric. Remember the bulldozers he said were poised to rip through Alaska? He certainly does know how to turn a phrase. By comparison, Mr. Watt seems almost tongue-tied.

It's true that many Alaskans, most of our political leaders among them, oppose some of the off-shore oil leases the Secretary has proposed for our state. Some are in areas that produce major amounts of fish for the world market and an oil spill there could have disastrous consequences. And it's also hard for Alaskans to understand why we need to explore some of these environmentally risky areas right now when there are so many good oil prospects on the land in our state.

Our leaders should continue to press those questions, working in Congress, which must approve the lease offerings before they can be made, and even going to court if we must.

But despite this disagreement, we must keep in mind the fact that Secretary Watt is generally treating our state better than we've been treated for a long time. One such indication is his rules for the new federal holdings set up under the lands bill; they generally seem to take Alaska's special conditions into account.

Certainly we Alaskans are not going to like everything Mr. Watt proposes and we're going to fight him on some issues. But on the many things he's doing right, our leaders ought to be backing him strongly. The voices that call for his resignation need to be countered if our country is to move away from its debilitating dependence on foreign resources.

Mr. STEVENS. Mr. President, I am hopeful that others will come forward and defend his right to attempt to change the policies of the Department of the Interior in the future.

APPOINTMENT OF FRED THOMPSON AS SPECIAL COUNSEL

Mr. BAKER. Mr. President, I wish to commend the Senate Select Committee on Intelligence for their appointment of Fred Thompson as special counsel.

I had the pleasure of working with Fred during the Watergate hearings, when he served as minority counsel. His knowledge of legal affairs coupled with his professional manner brought praise from both parties, and reaffirmed his status as one of the brightest and most able lawyers in Washington.

Fred recently served as Republican counsel for the confirmation hearings of Secretary of State Alexander Haig. He is a partner of the law firm of Thompson & Crawford of Nashville, Tenn., and Washington, D.C., and a member of the Nashville, Tenn., and American Bar Associations, the District of Columbia Bar Association, the Tennessee Trial Lawyers Association, and the National Association of Criminal Defense Lawyers.

I am confident that Fred will lead the investigation concerning CIA Director William Casey in an expeditious and honorable fashion.

RECOGNITION OF MINORITY LEADER

The PRESIDENT pro tempore. The minority leader is recognized.

THE ADMINISTRATION'S INCONSISTENCY REGARDING SOCIAL SECURITY

Mr. ROBERT C. BYRD. Mr. President, in a letter to me July 18, 1981, President Reagan indicated he would ask for time on television to address the Nation "as soon as possible" on the issue of social security.

He said he would ask for the time "to tell the American people the facts," and to let them know that he would "fight to preserve the social security system * * *"

On July 27, the President did address the Nation on national television. However, most of the speech was devoted to his fight for the Republican tax proposal.

In the President's brief remarks on social security, though, there were various inconsistencies in regard to previous statements and actions by his administration.

Because of this, I am inserting in the RECORD a copy of the President's letter to me of July 18, my letter to the President July 27, the text of his speech to the Nation July 27, and my brief statement at a news conference July 28.

I asked unanimous consent that these items be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD as follows:

THE WHITE HOUSE,
Washington, D.C., July 18, 1981.

Hon. ROBERT C. BYRD,
Minority Leader, U.S. Senate,
Washington, D.C.

DEAR SENATOR BYRD: The highest priority of my Administration is restoring the integrity of the Social Security System. Those 35 million Americans who depend on Social Security expect and are entitled to prompt bipartisan action to resolve the current financial problem.

At the same time, I deplore the opportunistic political maneuvering, cynically designed to play on the fears of many Americans, that some in the Congress are initiating at this time. These efforts appear designed to exploit an issue rather than find a solution to the urgent Social Security problem. They would also have the unfortunate effect of disrupting the budget conference and reversing the actions of a majority of both Houses of the Congress. Such a result would jeopardize our economic recovery program so vital to the well-being of the Nation.

In order to tell the American people the facts, and to let them know that I shall fight to preserve the Social Security System and protect their benefits, I will ask for time on television to address the Nation as soon as possible.

During this address, I will call on the Congress to lay aside partisan politics, and join me in a constructive effort to put Social Security on a permanently sound financial basis as soon as the 97th Congress returns in September.

Sincerely,

RONALD REAGAN.

U.S. SENATE,
OFFICE OF THE DEMOCRATIC LEADER,
Washington, D.C., July 27, 1981.

THE PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: Tax cuts, spending cuts, and the Social Security System are all part of the intricate fabric of the Federal budget. One element of the budget cannot be changed without having a direct affect on another.

During the campaign for the presidency you promised the American people that you would balance the budget in fiscal year 1983. The Administration's current budget projects a balance by fiscal year 1984, and assumes additional Social Security cuts as well as $44 billion in "unidentified" cuts.

Your economic recovery plan calls for an enormous reduction in the revenue collected by the Federal government, on the order of $730 billion over the next five years. In order to avoid large deficits, spending cuts much larger than those the Congress is about to enact will be necessary to offset the loss of revenue from the proposed tax cut.

On May 12, you recommended a severe reduction in Social Security benefits. Under your plan, Social Security benefits would be cut by $88 billion over the next five years, including a 40 percent reduction in benefits for people retiring at age 62.

Most objective analysts, including the non-partisan Congressional Budget Office, believe that your massive cuts in Social Security benefits are unnecessary to preserve the solvency of the System. Cuts in benefits which the Congress is about to enact as part of your budget-cutting program, when combined with authority for the three Social Security funds to borrow among themselves, would meet any foreseeable need to shore up the System well into the next century.

It appears that the Administration has abandoned its promise not to cut Social Security retirement benefits. It appears that Office of Management and Budget Director David Stockman discovered that the budget cannot be balanced, in light of the enormous tax cuts, unless Social Security benefits are reduced.

In a letter to me dated July 18, you promised to "ask for time on television . . . to tell the American people the facts . . ." about Social Security.

Since the tax cuts apparently are directly linked to your proposed Social Security benefit reductions, I was very disappointed to learn that your television address this evening will be directed primarily, if not exclusively, to promoting the revised tax-cutting plan.

It is my sincere hope that your speech tonight will allay the concerns of the American people by abandoning your commitment to immediately and drastically cut basic Social Security retirement benefits.

It is my further hope that your speech tonight will answer this basic question: How can we explain an economic plan to the American people which inordinately rewards the already-rich with huge tax cuts which are partially financed by cutting the Social Security benefits of the Nation's elderly?

Sincerely,

ROBERT C. BYRD.

THE PRESIDENT'S SPEECH

Good evening. I had intended to make some remarks about the problem of Social Security tonight—but the immediacy of Congressional action on the tax program, a key component of our economic package, has to take priority. Let me just say, however, I've been deeply disturbed by the way those of you who are dependent on Social Security have been needlessly frightened by some of the inaccuracies which have been given wide circulation.

It is true that the Social Security system has financial problems. It is also true that these financial problems have been building for more than 20 years—and nothing has been done.

I hope to address you on this entire subject in the near future. In the meantime, let me just say this:

I stated during the campaign and I repeat now I will not stand by and see those of you who are dependent on Social Security deprived of your benefits. I make that pledge to you as your President. You have no reason to be frightened. You will continue to receive your checks in the full amount due you. In any plan to restore fiscal integrity of Social Security I personally will see that (no part) of the plan will be at the expense of you who are now dependent on your monthly Social Security checks.

Now, let us turn to the business at hand. It's been nearly 6 months since I first reported to you on the state of the Nation's economy. I'm afraid my message that night was grim and disturbing. I remember telling you we were in the worst economic mess since the Great Depression. Prices were continuing to spiral upward and unemployment was reaching intolerable levels and all because Government was too big and spent too much of our money.

We're still not out of the woods, but we've made a start. And we've certainly surprised those long-time and somewhat cynical observers of the Washington scene who looked, listened and said, "It can never be done. Washington will never change its spending habits."

Well, something very exciting has been happening here in Washington and you are responsible. Your voices have been heard. Millions of you, Democrats, Republicans and Independents, from every profession, trade and line of work, and from every part of this land; you sent a messag: that you wanted a new beginning. You wanted to change one little two-letter word. It doesn't sound like much, but it sure can make a difference changing "control by Government" to "control of Government."

In that earlier broadcast you'll recall I proposed a program to drastically cut back Government spending in the 1982 budget which begins October 1st and to continue cutting in '83 and '84. Along with this I suggested an across-the-board tax cut spread over those same 3 years and the elimination of unnecessary regulations which were adding billions to the cost of things we buy.

All the lobbying, the organized demonstrations and the cries of protest by those whose way of life depends on maintaining Government's wasteful ways were no match for your voices which were heard loud and clear in these marble halls of Government.

And you made history with your telegrams, your letters, your phone calls and, yes, personal visits to talk to your elected representatives. You reaffirmed the mandate you delivered in the election last November. A mandate that called for an end to Government policies that sent prices and mortgage rates skyrocketing, while millions of Americans went jobless.

Because of what you did, Republicans and Democrats in the Congress came together and passed the most sweeping cutbacks in the history of the Federal budget. Right now Members of the House and Senate are meeting in a conference committee to reconcile the differences between the two budget cutting bills passed by the House from savings of approximately $140 billion in reduced Government costs over the next 3 years. And that doesn't include the additional savings from the hundreds of burdensome regulations already cancelled or facing cancellation.

For 19 out of the last 20 years the Federal Government has spent more than it took in. There will be another large deficit in this present year which ends September 30th. But with our program in place it won't be quite as big as it might have been and starting next year the deficits will get smaller until in just a few years the budget can be balanced. And we hope we can begin whittling at that almost $1 trillion debt that hangs over the future of our children.

Now so far I've been talking about only one part of our program for economic recovery—the budget cutting part. I don't minimize its importance. Just the fact that Democrats and Republicans could work together as they have, proving the strength of our system, has created an optimism in our land. The rate of inflation is no longer in double-digit figures, the dollar has regained strength in the international money markets and businessmen and investors are making decisions with regard to industrial development, modernization and expansion. All of this based on anticipation of our program being adopted and put into operation.

A recent poll shows that where a year-and-a-half ago only 25 percent of our people believed things would get better, today 46 percent believe they will. To justify their faith we must deliver the other part of our program. Our economic package is a closely knit, carefully constructed plan to restore America's economic strength and put our Nation back on the road to prosperity. Each part of this package is vital. It cannot be considered piecemeal. It was proposed as a package and it has been supported as such by the American people. Only if the Congress passes all of its major components does it have any real chance of success. This is absolutely essential if we are to provide incentives and make capital available for the increased productivity required to provide real, permanent jobs for our people.

And let us not forget that the rest of the world is watching America carefully to see how we will act at this critical moment. I have recently returned from a summit meeting with world leaders in Ottawa, Canada and the message I heard from them was quite clear—our allies depend on a strong and economically sound America and they are watching events in this country, particularly those surrounding our program for economic recovery, with close attention and great hopes. In short, the best way to have a strong foreign policy abroad is to have a strong economy at home.

The day after tomorrow—Wednesday—the House of Representatives will begin debates on two tax bills and once again they need to hear from you. I know that doesn't give you much time, but a great deal is at stake.

A few days ago I was visited here in the Office by a Democratic Congressman from one of our Southern States. He'd been back in his district and one day one of his constituents asked him where he stood on the economic recovery program I'd outlined in that earlier broadcast, particularly the tax cut. Well, the Congressman, who happens to be a strong leader in support of our program, replied at some length with a discussion of the technical points involved, but also mentioning a few reservations he had on certain points. The constituent, a farmer, listened politely until he'd finished and then said, "Don't give me an essay. What I want to know is are you for 'em or agin 'em?"

I appreciate the gentleman's support and suggest his question is a message your own Representatives should hear. Let me add those Representatives honestly and sincerely want to know your feelings. They get plenty of input from the special interest groups, they'd like to hear from their homefolks.

Let me explain what the situation is and what is at issue. With our budget cuts we presented a complete program of reduction in tax rates. Again, our purpose was to provide incentive for the individual, incentives for business to encourage production and hiring of the unemployed and to free up money for investment.

Our bill calls for a 5 percent reduction in the income tax rates by October 1st, a 10 percent reduction beginning July 1, 1982 and another 10 percent cut a year later—a 25 percent total reduction over 3 years. But then to ensure the tax cut is permanent we call for indexing the tax rates in 1985, which means adjusting them for inflation. As it is now, if you get a cost of living raise intended to keep you even with inflation, you find that the increase in the number of dollars you get may very likely move you into a higher tax bracket and you wind up poorer than you were. This is called bracket creep.

Bracket creep is an insidious tax. Let me give an example. If you earned $10,000 a year in 1972, by 1980 you had to earn $19,700 just to stay even with inflation. But that's before taxes. Come April 15th, you find your tax rates have increased 30 percent. If you've been wondering why you don't seem as well off as you were a few years back, it's because Government makes a profit on inflation. It gets an automatic tax increase without having to vote on it. We intend to stop that.

Time won't allow me to explain every detail, but our bill includes just about everything to help the economy. We reduce the marriage penalty, that unfair tax that has a working husband and wife pay more tax than if they were single. We increase the exemption on the inheritance (or estate) tax to $600,000 so that farmers and family-owned businesses don't have to sell the farm or store in the event of death just to pay the taxes. Most important we wipe out the tax entirely for a surviving spouse. No longer, for example, will a widow have to sell the family source of income to pay a tax on her husband's death. There are deductions to encourage investment and savings. Business gets realistic depreciation on equipment and machinery. And there are tax breaks for small and independent businesses which create 80 percent of all new jobs. This bill also provides major credits to the research and development industry—these credits will help spark the high technology breakthrough that are so critical to America's economic leadership in the world. There are also added incentives for small businesses including a provision that will lift much of the burden of costly paperwork that Government has imposed on small business.

In addition, there is short-term but substantial assistance for the hard-pressed thrift industry as well as reductions in oil taxes that will benefit new or independent oil producers and move our Nation a step closer to energy self-sufficiency.

Our bill is, in short, the first real tax cut for everyone in almost 20 years.

Now when I first proposed this—and incidentally it has now become a bipartisan measure co-authored by Republican Barber Conable and Democrat Kent Hance—the Democratic leadership said a tax cut was out of the question. It would be wildly inflationary. That was before my inauguration.

Then your voices began to be heard and suddenly in February the leadership discovered a 1 year tax cut was feasible. We kept on pushing our 3 year tax cut and by June the opposition found that a 2 year cut might work. Now it's July and they find they could

go for a third year cut provided there was a trigger arrangement that would only allow it to go into effect if certain economic goals had been met by 1983.

But by holding the people's tax reduction hostage to future economic events, they will eliminate people's ability to plan ahead. Shopkeepers, farmers and individuals will be denied the certainty they must have to begin saving or investing more of their money. And encouraging more savings and investment is precisely what we need most to rebuild our economy.

And there is a little sleight of hand in that trigger mechanism. The committee bill ensures that the 1983 deficit will be $6.5 billion greater than their own trigger requires. As it stands now the design of their own bill will not meet the trigger they have put in. Therefore, the third year tax cut will automatically never take place.

If I could paraphrase a well-known statement by Will Rogers that he had never met a man he didn't like—I'm afraid we have some people around who never met a tax they didn't hike.

Their tax proposal, similar in a number of ways to ours, but differing in some very vital parts, was passed out of the House Ways and Means Committee, and from now on I'll refer to it as the committee bill and ours as the bipartisan bill. They will be the bills taken up Wednesday.

The majority leadership claims theirs gives a greater break to the worker than ours and it does—that is, if you're only planning to live 2 more years. The plain truth is our choice is not between two plans to reduce taxes, it is between a tax cut or a tax increase. There is built into our present system, including payroll Social Security taxes and the bracket creep I've mentioned, a 22 percent tax increase over the next 3 years. The committee bill offers a 15 percent cut over 2 years; our bipartisan bill gives a 25 percent reduction over 3 years. As you can see by this chart—here is the 22 percent increase line and here is their cut below that line and ours wiping out the increase with a little to spare.

Incidentally, their claim that cutting taxes for individuals for as much as 3 years ahead is risky rings a little hollow when you realize that their bill calls for business tax cuts each year for 7 years ahead.

It rings even more hollow when you consider the fact the majority leadership routinely endorses Federal spending bills that project years into the future, but objects to a tax bill that will return your money over a 3 year period.

Here is another chart which illustrates what I said about their giving a better break if you only intend to live for 2 more years. Theirs is the dotted line, ours the solid. As you can see, in an earning bracket of $20,000 their tax cut is slightly more generous than ours—for the first 2 years—then taxes in that earning level start going up. On the other hand, in our bipartisan bill, the tax keeps going down and then stays down permanently. This is true of all earning brackets.

This red space between the 2 lines is the tax money that will remain in your pockets if our bill passes and it's the amount that will leave your pockets if their tax bill is passed.

I take no pleasure in saying this, but those who will seek to defeat our Conable-Hance bipartisan bill as debate begins Wednesday are the ones who have given us five "tax cuts" in the last 10 years, but our taxes went up $400 billion in those same 10 years.

The lines on these charts say a lot about who's really fighting for whom. On the one hand, you see a genuine and lasting commitment to the future of working Americans. On the other, just another empty promise. Those of us in the bipartisan coalition want to give this economy and the future of this Nation back to the people, because putting people first has always been America's secret weapon. The House majority leadership seems less concerned with protecting your family budget, than with spending more on the Federal budget.

Our bipartisan tax bill targets three-quarters of its tax relief to middle-income wage earners, who presently pay almost three-quarters of the total income tax. It also then indexes the tax brackets to ensure that you can keep that tax reduction in the years ahead. There also is, as I said, estate tax relief that will keep family farms and family-owned businesses in the family. And there are provisions for personal retirement plans and individual savings accounts.

Because our bipartisan bill is so clearly drawn and broadly based it provides the kind of predictability and certainty that the financial segments of our society need to make investment decisions that stimulate productivity and make our economy grow.

Even more important—if the tax cut goes to you the American people in the third year—that money returned to you won't be available to the Congress to spend. And that in my view is what this whole controversy comes down to: Are you entitled to the fruits of your own labor or does Government have some presumptive right to spend and spend and spend?

I'm also convinced our business tax cut is superior to theirs, because it is more equitable, and it will do a much better job promoting the surge in investment we so badly need to rebuild our industrial base.

There is something else I want to tell you. Our bipartisan coalition worked out a tax bill we felt would provide incentive and stimulate productivity, thus reducing inflation and providing jobs for the unemployed. That was our goal.

Our opponents in the beginning didn't want a tax bill at all. What is the purpose behind their change of heart? They've put a tax program together for one reason only, to provide a political victory for themselves. Never mind that it won't solve the economic problems confronting our country. Never mind that it won't get the wheels of industry turning again or eliminate the inflation which is eating us alive. This is not the time for political fun and games. This is the time for a New Beginning.

I ask you now to put aside any feelings of frustration or helplessness about our political institutions and join me in this dramatic but responsible plan to reduce the enormous burden of Federal taxation on you and your family.

During recent months, many of you have asked what can you do to help make America strong again. I urge you again to contact your Senators and Congressmen, tell them of your support for this bipartisan proposal, tell them you believe this is an unequalled opportunity to help return America to prosperity and make Government again the servant of the people.

In a few days, the Congress will stand at the fork of two roads.

One road is all too familiar to us. It leads—ultimately—to higher taxes. It merely brings us full circle back to the source of our economic problems—where the Government decides that it knows better than you what should be done with your earnings, and, in fact, how you should conduct your life.

The other road promises to renew the American spirit. It's a road of hope and opportunity. It places the direction of your life back in your hands—where it belongs.

I have not taken your time this evening merely to ask you to trust me. Instead, I ask you to trust yourselves. That's what America is all about. Our struggle for nationhood, our unrelenting fight for freedom, our very existence—these have all rested on the assurance that you must be free to shape your life as you are best able to—that no one can stop you from reaching higher or take from you the creativity that has made America the envy of mankind.

One road is timid and fearful.

The other bold and hopeful.

In these 6 months, we have done so much and have come so far. It has been the power of millions of people like you who have determined that we will make America great again. You have made the difference up to now. You will make the difference again.

Let us not stop now.

Thank you.

Mr. ROBERT C. BYRD. On May 12 President Reagan submitted a plan to cut $88 billion in social security benefits over the next 5 years.

Yet, last night the President said:

I stated during the campaign and I repeat now I will not stand by and see those of you who are dependent on Social Security deprived of your benefits.

How could he say this?

The President's plan to cut social security benefits includes the elimination of the minimum retirement benefit currently received by 3 million elderly Americans. In a few days, this cut will become law.

Last night in his nationally televised speech, the President said: "You will continue to receive your checks in the full amount due you." How could be say this?

The President's plan to cut social security benefits includes the elimination of the minimum retirement benefit currently received by 3 million elderly Americans. In a few days, this cut will become law.

In October, 1980, during the Presidential campaign Mr. Reagan said:

Any reform of the social security system must have one overriding goal: that the benefits of those now receiving—or looking forward to receiving—social security must be protected, and that payments keep pace with the cost-of-living.

Yet, in stark contrast, President Reagan's plan to cut social security would reduce the benefits of those "looking forward to receiving social security" at age 62 by 40 percent. It would also delay the date on which benefits are adjusted for inflation.

Last night the President said: "You have no reason to be frightened."

But in recent congressional testimony OMB Director Stockman said that the social security system would be bankrupt "on or about November 3, 1982."

In his letter to the congressional leadership of July 18, the President promised to tell the American people the facts about social security.

After last night's speech, we are still waiting to hear the facts.

This brings us back to what I call the $88 billion question. This is the amount the administration has said it would cut from social security retirement over the next 5 years.

Has the President abandoned his plan to slice $88 billion in social security benefits?

Or, was his statement to the Nation last night meant merely to calm the fears which have been flamed by David Stockman and others in the administration.

The American people—the elderly of the Nation, especially—deserve an

answer. The President has a responsibility to clarify these inconsistencies.

Mr. STEVENS. Mr. President, I yield to my good friend from South Carolina whatever time remains under the leadership time on this side.

The PRESIDING OFFICER (Mr. WARNER). The Senator from South Carolina is recognized.

Mr. THURMOND. I thank the Senator for yielding.

THE DAVIS-BACON ACT, PART VII, DAVIS-BACON AND THE PRESS

Mr. THURMOND. Mr. President, during the past several days, I have presented a series of discussions on the Davis-Bacon Act. I have endeavored to make these discussions factual and unbiased. But the more research I do on Davis-Bacon, the more I discuss the issue with colleagues and constituents alike, the more I become convinced that the Davis-Bacon Act must be repealed.

Regulatory reform is not the answer. No matter how the Davis-Bacon rules are rewritten, a large Federal bureaucracy will remain to set wages that will apply to Federal construction contracts.

Notwithstanding the virtual assurance that labor will delay these revised regulations for months through court action, these artifically set wage rates will continue to be an insult to the American free enterprise system of doing business.

PART VII—DAVIS-BACON AND THE PRESS

Mr. President, let me conclude my Davis-Bacon series—not with my own findings—but with the feelings of the American people, as expressed through the media of the press. I have selected the following quotations at random, but my colleagues should note that Davis-Bacon repeal is supported by the press from coast-to-coast, from border-to border, and by newspapers ranging from conservative to liberal. There are very few issues before the Congress today where there exists such widespread consensus as the call to repeal the Davis-Bacon Act.

U.S. News & World Report, July 27, 1981:

Sometimes a law that was useful for a time outlives its usefulness. This is true of the Davis-Bacon Act . . . The American taxpayers deserve some relief.

The New York Times, May 4, 1981:

The better remedy, requiring no day-to-day decisions by unmonitored Government officials; is to repeal the Davis-Bacon Act. The idea of using tax dollars to raise construction wages was dubious enough during the Depression. Carrying on with such a policy when the economy is wrestling with a disastrous inflation is mad.

The Wall Street Journal, April 22, 1981:

The case for repeal (of the Davis-Bacon Act) is so overwhelming that it's hard to see how arguing it would be distracting. Indeed arguing for repeal seems the simplest course to take; goodness knows, its the most sensible one.

The Pittsburgh Press, March 26, 1981:

Whether the Davis-Bacon Act ever did any good is debatable. Certainly it has outlived whatever usefulness it may have had.

The Chicago Tribune, June 1, 1981:

Revising the regulations would save money for as long as this administration is in power, but repealing Davis-Bacon would save money for years to come.

Rocky Mountain News, Denver, Colo., March 30, 1981:

Additional evidence has come to light supporting the proposition that the Federal Davis-Bacon Act should be repealed.

The News, Pensacola, Fla., March 24, 1981:

Rescission of the (Davis-Bacon) act should be high on President Reagan's priority list. Eliminating $20 billion a year from construction costs would be a mighty blow against inflation.

Mr. President, I could go on and on with similar editorial comments from newspapers across the Nation. Let me list just a few of the other newspapers that have called for repeal or at least major revision of Davis-Bacon since President Reagan was inaugurated:

The Portland Press Herald, Maine;
The Denton Chronicle, Texas;
The Daily News, Lebanon, Pa.;
The Washington Post;
The Star-Journal, Pueblo, Colo.;
The Baltimore Sun, Maryland;
The Mississippi Press, Pascagoula, Miss.;
The Mobile Register, Alabama;
The Tulsa World, Oklahoma;
The Richmond Times-Dispatch, Virginia;
The Indianapolis News, Indiana;
The Southwest Times-Record, Fort Smith, Ark.;
The Sentinel, Milwaukee, Wis.;
The Republican, Waterbury, Conn.;
The Press Tribune, Caldwell, Idaho;
The Advocate, Baton Rouge, La.;
The Kentucky Post, Covington, Ky.;
The Alexandria Gazette, Virginia;
The Times, Shreveport, La.;
The Houston Chronicle, Texas;
The Times and Democrat, Orangeburg, S.C.;
The Journal, Martinsburg, W. Va.;
The Cincinnati Post, Ohio;
The Republic, Phoenix, Ariz.;
The Herald News, Joliet, Ill.

Mr. President, how can we continue this blatant waste of the taxpayer's money? It is time to act now to repeal the Davis-Bacon Act.

RECOGNITION OF SENATOR DODD

The PRESIDING OFFICER. The Senator from Connecticut is recognized under the previous order for a period not to exceed 15 minutes.

Mr. DODD. Mr. President, I thank the Chair.

WANTED: A MIDDLE EAST POLICY

Mr. DODD. Mr. President, today, as over the past several weeks, the attention of the world is focused on the Middle East, and, once again, we learn from the morning news that an uncertain peace hangs precariously over the region. The ceasefire announced over the weekend is obviously an improvement over the violence that preceded it. But, let us not kid ourselves, a ceasefire is no substitute for a Middle East policy. And, given the problems that must be overcome in that ancient region—a region tortured by its past, tormented by its present, and troubled by its future—the hope for peace seems all but illusory.

In the latest round of tragic events, the illusion of peace was shattered initially by the Israeli raid on the Iraqi nuclear facility near Baghdad and, more recently, by the renewed Arab-Israeli conflict in Lebanon. The PLO arms buildup in southern Lebanon eventually gave way to Israeli air strikes on PLO positions in that country, accentuated by the attack on the organization's headquarters in Beirut. This, in turn, produced the expected response from Palestinian rocket and artillery batteries located a short distance from Israel's northern settlements. The cycle of violence and counter-violence had begun anew; much as Secretary Haig had warned during his confirmation hearings before the Foreign Relations Committee. He cautioned:

In the Middle East, an uneasy peace continues to be punctuated by raid and reprisal, with each such sequence threatening renewed and wider conflict.

Mr. President, some may look back on the Secretary's assessment and view it as prophetic. Some may be satisfied with that. But, quite frankly, Mr. President, I am not. I am not because I am more concerned about Secretary Haig the policymaker than I am about Secretry Haig the prophet. One is no substitute for the other, as this administration's lack of Middle East policy so clearly demonstrates.

Plain and simple, this administration has no Middle East policy worthy of the name. Or, if it does, it is the best kept secret in Washington. Secretary Haig obviously does not know what it is. His deputy, Mr. Clark, does not know what it is. Secretary of Defense Weinberger does not know what it is. And if President Reagan knows what it is, he is not saying, other than to make it clear that the others do not know and are not speaking for the administration.

Yes, Mr. President, some 7 months into this administration—and counting—we are still waiting for a Middle East policy. A statement from this administration that will serve as a guide to Arabs and Israelis alike, a statement—a policy—that will indicate to them and to the rest of us how this administration intends to use American power and prestige in that part of the world.

To put it mildly, such a policy has been too long in coming. As a result, I believe a good argument can be made that the United States bears a large measure of responsibility for the recent events in the Middle East. Neither friend nor foe there knows what to expect from this administration—despite the fact that the United States is the dominant outside force. This uncertainty, if not confusion, only serves to add, as it has already, to the volatility and instability of a part of the world that daily comes closer and closer to a regional nervous breakdown—with the ever-present danger that the victims of

it will employ some of the most sophisticated weaponry available to the world today.

Indeed, Mr. President, to the extent there is a madness in the Middle East, we are as much a part of it as the Israelis, the Arabs, the Palestinians or the Russians. In pointing the finger—in assessing the blame—we would do well to begin with ourselves.

Our role in that turbulent region is as real as the corpses in Beirut or the bodies in Kiryat Shemona. And to those who say that it is just a matter of degree—I say it is only a matter of degree. I further say that the Reagan administration, because of its inability to develop a consistent, reliable, and balanced foreign policy—as Secretary Haig pledged it would—must now accept a large share of the responsibility for the most recent turmoil and bloodshed in the Middle East.

This is a great responsibility for the Reagan administration to carry. It is a very heavy burden. But of this, President Reagan and company can be sure: The longer this administration delays developing a realistic, forthright, and specific policy for the Middle East, the larger the responsibility and the heavier the burden will be.

One final point, Mr. President. Thus far, the Reagan administration's foreign policy has concentrated on the Soviet Union and on the transfer of arms and other military equipment for the expressed purpose of containing Soviet expansionism. If it persists in this direction—to the exclusion of other foreign policy considerations, as it has done so far—it will record one failure after another on the international scene. The events of the past several weeks in the Middle East are a good example of one such failure, and it has come primarily as a result of this administration's fundamental misreading of the situation.

In the Middle East, as elsewhere around the globe, the emphasis has been on stopping Soviet penetration and on arming anyone who will take the pledge, seemingly regardless of the consequences. But the Middle East has its own dynamic, its own history, its own culture, its own social and political forces—which are not to be denied and which are quite apart from the activities of the Soviet Union. Until the administration recognizes these factors and recognizes the situation for what it is, rather than for what it wishes it to be—in short, until the administration develops a coherent policy toward the Middle East—there will be more and more setbacks in that part of the world. In the long run, this will only redound to the benefit of the Soviet Union—an irony to be sure, but one that we must obviously strive to prevent.

I thank the Chair and I yield back the remainder of my time, Mr. President.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business not to extend beyond the hour of 9 a.m.

THE CAMBODIAN CONFERENCE

Mr. PROXMIRE. Mr. President, the United Nations has convened a special conference on the status of Cambodia. That conference is now going on in New York. The conference is trying to shed an international light on the terrible problems of a nation wracked by warfare and campaigns of mass murder.

Speaking before the conference, Secretary of State Haig denounced the genocide that has occurred so often in Cambodia and declared our support for the Cambodian people. I am glad that the administration has taken this opportunity to recognize that campaigns of genocide are not a specter out of the past but, rather, a problem that we still confront today.

Despite the absence of the Soviet Union, Laos, and Vietnam, this conference carries significance as a symbol of the concern and involvement of the international community. Through its discussion, it may help to generate new approaches to resolving the country's long-term problems.

The Genocide Convention is another such symbol, one worthy of acceptance by the United States. Just as we have respected the role of the international conference on Cambodia, so should we respect the consensus of international opinion represented by the 87 nations who have thus far chosen to ratify the Convention.

Tragedies like the one in Cambodia are unfortunately far from unique. We have a clear moral obligation to oppose such crimes of genocide wherever and whenever they occur.

We certainly have a clear moral obligation to ratify the Genocide Convention, which this country was able to persuade the United Nations to adopt 32 years ago, and which has been pending in the Foreign Relations Committee simply because this body, the Senate of the United States, refuses to act.

Mr. President, the time certainly has come for us to act, as every President we have had since 1949 has urged us to do.

So I plead with my colleagues, once again, to ratify the Genocide Convention as an important part of our opposition to genocide, which has occurred not just in Hitler's Germany but also is occurring today, in Cambodia.

AN OWNERSHIP APPROACH TO PRODUCTIVITY

Mr. LONG. Mr. President, this past Friday the Senate, by a vote of 93 to 1, went on record in support of the employee stock ownership provisions of the Economic Recovery Act of 1981. Those provisions offer a promising new approach to increasing America's productivity.

Expanded ownership is an issue that cuts across party lines in an attempt to bring out the best in our free enterprise system. As the 1980 Republican platform reminds us:

> The widespread distribution of private property ownership is the cornerstone of American liberty. Without it, neither our free enterprise system nor our Republican form of Government could long endure.

Mr. President, let me say that I think most Democrats will agree. I certainly agree with that suggestion of the Republican platform. The Republican platform pledges the Reagan administration "to help millions of Americans * * * to share in the ownership of the wealth of their Nation."

President Nixon included a similar pledge in his 1970 state of the Union address in which he suggested:

> We must adopt reforms which will expand the range of opportunities for all Americans. . . . This means . . . new opportunities for expanded ownership, because in order to be secure in their human rights people need access to property rights.

In a similar vein, Senator Hubert Humphrey explained his support of expanded ownership in a letter to the editor of the Washington Post not long before his death:

> Throughout my career as a public servant, I have viewed full employment as a top priority goal for this country. And I continue to do so. But I recognize that capital, and the question of who owns it and therefore reaps the benefit of its productiveness, is an extremely important issue that is complementary to the issue of full employment.
>
> I see these as twin pillars of our economy: Full employment of our labor resources and widespread ownership of our capital resources. Such twin pillars would go a long way in providing a firm underlying support for future economic growth that would be equitably shared.

The benefits of Government-stimulated economic growth have traditionally trickled down through higher wages, expansion in the number of jobs, and the availability of increased tax revenues to fund expanded social programs.

That approach has produced strains on the economy as the benefits of such growth have resulted in the accumulation of massive amounts of productive capital by a relatively few households while the vast majority have been left with only a meager net worth.

For example, during our bicentennial year, the Joint Economic Committee studied capital ownership in the United States and found that 50 percent of the total value of outstanding stock held by individuals is owned by just 0.5 percent of the U.S. population. Two-thirds, according to a 1976 IRS report, is held by 5.2 percent of the population age 20 and over. Similarly, 1 percent of the population received 47 percent of all dividends.

At the other end of the ownership spectrum, the committee cited a 1972 study indicating that 55 percent of American households have a net worth of less than $10,000; and 12 percent, or 1 in every 8, have a net worth of $1,000 or less.

Perhaps the most disturbing analysis of the present state of our private property system, however, is provided by the National Bureau of Economic Research which reports that for the majority of American families their most important "wealth" is now their entitlements under our social security system.

Thus, for most Americans their most important asset is an assurance that

someone else will be taxed on their behalf. Clearly that is a long way down the wrong road if we intend to have a private property economy to leave to subsequent generations of Americans. Incentives for economic growth need to be combined with incentives that will distribute the long-term benefits of such growth more widely.

CAPITAL OWNERSHIP OPPORTUNITIES

Most of us share President Reagan's concern for incentive economics, for supply-side measures designed to stimulate new capital investment. We are generally in agreement that this package of tax cuts will provide a strong private sector foundation for a revitalized economy.

With that in mind, we are considering legislation that will target an estimated $147.5 billion through 1986 for increased business writeoffs of equipment and facilities—all of which will be owned by someone. The financial press estimates that by the close of this century productive wealth in the United States will increase by $2 to $5 trillion. The bulk of that new wealth will be owned by private individuals.

Within a healthy and growing economy, there will be opportunities not only to work but also to own. The distribution of job opportunities as an outgrowth of Government-stimulated economic growth is a factor that will be evaluated in great detail. Unfortunately, we are unlikely to have an analysis of the distribution of ownership opportunities as well.

In large part, corporate finance will determine who will be owners of these badly needed new capital investments. Corporations finance their growth from three primary sources: Retained earnings, debt, and various tax benefits—primarily equipment writeoffs, such as those which form the bulk of the business tax relief in this bill.

New stock plays only a minor role in the financing of new capital. For example, Federal Reserve Board figures show that corporate equities accounted for only 0.89 percent of the total funds raised in the United States during 1979. For the entire 1970's, stock sales accounted for a mere 3.7 percent of new capital raised in the nonfinancial sector. Even during the rapid growth of the 1960's, new equity issues were the source of only 7 percent of total financing for nonfinancial companies.

Because of the way in which new investments are financed, capital ownership has historically been an opportunity reserved for a relative few. The ownership of new capital wealth is largely a function of existing capital wealth.

After studying the self-perpetuating wealth concentration that the most widely used financial techniques imply, the Joint Economic Committee concluded in its 1976 annual report:

> To provide a realistic opportunity for more U.S. citizens to become owners of capital, and to provide an expanded source of equity financing for corporations, it should be made national policy to pursue the goal of broadened capital ownership.

For the most part, the American people cannot afford capital ownership. Daily economy survival, not savings and investment, is their main concern. And the less our technologically advanced economy needs their labor, the less able they are to save their way to capital ownership. Inflation, of course, penalizes what little savings they are able to set aside.

After passage of this bill, the bulk of America's new productive capital will, I expect, continue to be financed as before—except that more accelerated write-offs will then be available with which to do that financing. It is my hope that the Employee Stock Ownership Plan (ESOP) provisions of this bill will provide an incentive for at least some portion of this new capital to be financed in such a way that more Americans will begin to accumulate a capital estate.

A MODEL OF WORKABILITY

Free enterprise capitalism is losing ground all over the world. We need to be able to demonstrate to other nations how our increasing prosperity spreads out and reaches Americans in all walks of life.

Unless we offer such a model, other nations will continue to see the socialist model as a more attractive alternative. Secretary of State Haig was on target when he recently commented that our economic contradictions here at home make it more difficult for us to lead abroad.

As Ronald Reagan explained in 1975:

> Capitalism hasn't used the best tool of all in its struggle against socialism—and that's capitalism itself.

In a July 1974 speech to the Young Americans for Freedom, Governor Reagan explained the historical precedent for a policy of expanded ownership and endorsed the uniquely American opportunity that such a policy would represent:

> Over one hundred years ago, Abraham Lincoln signed the Homestead Act. There was a wide distribution of land and they didn't confiscate anyone's already owned land. They did not take from those who owned and give to others who did not own. It set the pattern for the American capitalist system. We need an Industrial Homestead Act . . . I know that plans have been suggested in the past and they all had one flaw.
>
> They were based on making present owners give up some of their ownership to the nonowners. Now this isn't true of the ideas that are being talked about today.
>
> Very simply, these business leaders have come to the realization that it is time to formulate a plan to accelerate economic growth and production and at the same time broaden the ownership of productive capital. The American dream has always been to have a piece of the action.

The theme of the employee stockownership provisions of this bill is a theme of widespread participation—participation not only through jobs but through ownership as well. To encourage expanded ownership does not mean to take from those who own in order to give to those who do not. Rather, the intent is to provide incentives for newly created capital to be more broadly owned.

As the private sector expands and the economic pie begins to grow, these ESOP incentives will provide those who make that pie with an opportunity to own a piece of it. Instead of simply sharing in the pie by taking a larger slice, ESOP will provide a chance for more working Americans to own a piece of the pie-making machinery.

Thirty-two Members of the Senate have joined me in cosponsoring the bipartisan measure which I introduced some months ago. About half of those provisions appear in this bill and they have been unanimously recommended by the Committee on Finance.

In addition, it is encouraging to see that just this past month the State of Delaware joined the States of Maryland, Michigan, Minnesota, and New Jersey in establishing as official State policy the encouragement of ESOP's as a means to broaden ownership. Similar legislation is pending in several other States.

As the President reminded us last night in his address to the Nation:

> The best way to have a strong foreign policy abroad is to have a strong economy at home.

As we enact these incentives to restore strength to the American economy, I hope that we will keep in mind the crucial role that private ownership plays in the functioning of a free enterprise system.

TOWARD A POLICY OF ECONOMIC SELF-SUFFICIENCY

If we are to have a self-sustaining economic system, and one in which Government plays only a minor role—as the voting public seems to be telling us it should—then the private sector must itself be encouraged to play a greater role in the functioning of our private enterprise economy.

By producing the economic pie, we necessarily create the problem of how it is to be distributed. Wages and salaries are one way. Under our present system, however, pay tends to outpace productivity.

When an upward drift in income is not matched by a real growth in output, income gains are, of course, largely illusory. It would be shortsighted for us to continue to leave the vast majority of Americans with nothing other than their labor, as the capital with which they provide input into—and derive income from—our capital-intensive economy.

Redistributive taxation is another way to distribute income, although for this purpose it is strictly a hindsight, remedial approach. In addition, the fiscal strains created by this approach are increasing at an alarming rate. For example, over the past 20 years, direct Federal transfer payments to individuals have grown from 26.4 percent of total budget outlays to more than 50 percent; $27 billion was paid out in 1960—by 1980 that had risen to $284 billion, including a growth of more than $200 billion just since 1970. And of course Government can never return as much as it takes, so its costs insure a net loss in the transfer.

We need to bring our outtake system more "in synch" with the realities of our input system. A market economy is based on the premise that each person's outtake from the economy is directly related to that person's productive input—whether that input be through a job or through the ownership of productive capital. Both can generate income.

Rather than break the relationship between effort and reward, the expanded ownership concept suggests that we recognize the increasingly dominant role that nonhuman capital now plays in the productive process, and begin to provide a way for more Americans to economically participate by means more consistent with the existing state of technology.

When capital owners are few, the private property conduits of a market economy reward those few. If there were many owners, the earnings of that productive capital could begin to broadly irrigate the economy with purchasing power.

How efficiently our free enterprise system works in solving our income distribution problem is partly a function of how well our structure of property laws matches the underlying technological and economic realities. If those realities change and our property arrangements fail to keep pace, a conflict is inevitable.

Of the even leading industrial democracies—France, West Germany, Canada, Sweden, the United Kingdom, and Japan the United States now ranks second only to France in its degree of income inequality. In addition, our poorest 20 percent have a lower share of total pretax income than any country, including France. A broader distribution of capital ownership would help to improve our poor ranking internationally.

In some nations, the private ownership of productive capital is forbidden—on the grounds that private property is at the heart of the problem. The solution, however, lies not in destroying the institution of private property, but in making it possible for all to become owners of some of it.

Expanded ownership could help reduce the role that Government plays in redirecting income. But to do that requires that we work to build economic self-sufficiency into the American population at large.

Over the long term, the best way to cut back Government programs is to cut back the need for such programs. If we are to be successful in our attempt to create a self-sustaining economic system, however, we must first begin to share the ability to succeed. The encouragement of expanded ownership would be a step in that direction.

A NONINFLATIONARY BENEFIT

In addition, if we are to win in our battle against inflation, we need incentives for working Americans not only to save but also to moderate their wage demands. The current situation at Continental Airlines provides a good example of the potential that employee stock ownership plans have for moderating wage-push inflation.

The Continental employees are proposing that they forgo a portion of future pay raises and, instead, apply those funds to invest in company stock (through an ESOP). This inflation-fighting approach to compensation should be encouraged.

According to pollster Louis Harris, the American public is generally receptive (that is, 63 percent) to the idea of having their salaries linked to higher productivity—at least if they are convinced that their sacrifices will provide funds for needed investment. Thus the encouragement of employee stock ownership plans may help restrain inflation by helping to channel wage demands into capital investment.

When combined with the labor productivity gains that generally accompany employee stock ownership, widespread ESOP-type financing has the potential to significantly improve our economic situation. Just as the company with employee stock ownership will have a productive advantage over a conventionally owned competitor, so too should the U.S. economy enjoy a competitive edge with a tax policy supportive of expanded ownership.

Employee stock ownership could also serve as a new stabilizing element in labor-management relations—an element that may encourage these traditional foes to act more in the national interest by beginning to operate more in a spirit of cooperation and compromise. Unions must find new, noninflationary ways to deliver victories to their members, and management needs to find new ways to deal with union demands.

A recent Harris poll found that 53 percent of American employees and 61 percent of American business leaders feel that there is too little cooperation between business and labor. Employee stock ownership provides a fruitful new area in which these traditional adversaries can resolve their differences.

INCENTIVE ECONOMICS

What would be the effect of transforming this troubled economy of ours into one in which working Americans have the interest and incentive of ownership? Even a modest stake in the system would bring with it a better understanding of how our free enterprise system works, and a greater awareness of the costs and the tradeoffs of Government programs.

Our tax code should encourage a broad distribution of productive input and a substantial payout of the earnings generated by that input. If we are to have a more equitable and a more workable income distribution—without Government redistribution—we must have incentives for the widespread ownership of productive capital.

Our tax system is a key to linking equity and efficiency. As presently structured, that system not only aggravates the bias toward concentrated ownership and governmental redistribution, in the process it also jams the market's pricing system and its ability to allocate resources in the most productive, market-responsive fashion.

We must begin to strike a better balance between the energy and efficiency of the market and the equity, compassion and equality of democracy. Expanded ownership would bring a democratic new dimension to the investment process, and open new possibilities for economic system we mean to have in the icans.

DEMOCRATIC CAPITALISM

Since 1973, the Congress has approved, and three separate administrations have signed into law, 14 bills promoting the use of employee stock ownership plans as a means to expand the ownership of productive capital. In addition, in the Tax Reduction Act of 1976, Congress made clear its policy of "* * * encouraging employee stock ownership plans (ESOP's) as a bold and innovative method of strengthening the free private enterprise system which will solve the dual problems of securing capital funds for necessary capital growth and of bringing about stock ownership by all corporate employees."

However, the provisions of current law—even when improved by the very modest ESOP-related provisions of this bill—will do very little to expand the base of capital ownership in the United States. Due to the nature of the most commonly used techniques of finance found in the private sector, the great bulk of the new productive capital created due to the investment incentives in this bill will likely flow to that same small group of Americans who are already quite wealthy.

That would show a failure of foresight on our part, and I hope that we will take steps to correct such a trend if we find that is the direction in which we are headed.

Both sides of the aisle are on record in support of expanded capital ownership. Both sides are also on record as opposed to a socialist approach to economic policy, such as is now being considered in France.

This is the richest and the most comprehensive capital formation bill ever considered by the U.S. Congress. By the end of this century we would be well advised to insure that a significant amount of this yet-to-be-created productive capital flows into the hands of a steadily expanding number of American households.

If there is to be an expansion of capital ownership in the United States, certainly these next two decades are an opportune time to make that bipartisan desire a reality. Tax policy alone may not be adequate if expanded ownership is to become a reality. Thus, we should also consider how monetary policy can operate in support of a national policy of expanded capital ownership.

Capitalism's market mechanisms of incentive and reward have brought more and better goods and services to more people here and throughout the world than any other system in history. Yet those mechanisms are not indestructible. If they are to be preserved, we need an institutional framework that operates in their support. That support lies in the direction of a more democratic form of private property capitalism—a type of capitalism that is true to its democratic roots, and true to the American tradition of widespread participation.

The issues raised by this legislation go to the very heart of just what sort of economic participation by more Amer- United States, and just what sort of Nation we intend to leave for succeeding generations of Americans. The ESOP provisions of this bill offer us a blueprint—a guide for future legislation de-

signed to include more Americans as partners in our economic progress.

CLARIFICATION OF ESOP AMENDMENTS

Mr. President, the Economic Recovery Act of 1981 makes a number of changes in the law relating to employee stock ownership plans (ESOP's). Many of these changes are highly technical in nature. Thus, it may prove useful to provide some additional clarification regarding several of the provisions.

An ESOP is a technique of corporate finance. It is also a tax-qualified plan under which employer stock is held for the benefit of employees. The stock, which is held by a tax-exempt trust under the plan, may be acquired through direct employer contributions or with the proceeds of a loan to the trust.

In order to qualify, a plan must, for example, satisfy rules prohibiting discrimination in favor of highly-paid employees, and it must meet standards relating to employee participation, vesting, benefit and contribution levels, the form of the benefits, and the security of the benefits. If a plan meets these requirements, in addition to deferral of employee tax on employer contributions, the income earned on assets held under the plan is generally not taxed until it is distributed or made available. In addition, special 10-year income averaging rules or tax-free rollover treatment apply to distributions made in a lump sum. Also, the Internal Revenue Code provides for deferral of tax on the appreciated value of employer securities and for exclusions from estate and gift tax.

An employee stock ownership plan which borrows to acquire employer stock is referred to as a leveraged ESOP. A leveraged ESOP is a technique of corporate finance designed to build beneficial equity ownership of shares in an employer corporation into its employees.

Under such an ESOP, an employee stock ownership trust generally acquires stock of the employer with the proceeds of a loan made to it by a financial institution. Typically, the loan is guaranteed by the employer. Employer contributions to the trust are applied to retire the loan. Within limitations (based on a percentage of payroll), those contributions are deductible by the employer.

The provisions of this bill raise the deductibility limits for employer contributions applied to the repayment of the principal of an ESOP loan. In addition, employer contributions to repay the interest expense of an ESOP loan will be deductible without regard to the deduction limitations otherwise applicable to contributions to tax-qualified employee benefit plans.

Subject to meeting a nondiscrimination test, a corresponding amendment provides that the limitation on annual additions to employee benefit plans will no longer apply to employer contributions applied by an ESOP to repay interest on an ESOP loan. In addition, those limitations will no longer apply to amounts forfeited under an ESOP loan.

Although the effective date of the Act applying to these revised limitations is generally effective for years after 1981, it is intended that employer contributions applied to pay a loan incurred prior to 1982 will also qualify under the new provisions.

Many of the rules governing the new payroll-based tax credit ESOP are the same as those applicable to the current additional investment tax credit for ESOP contributions. As under present law, for example, a payroll-based tax credit ESOP may be treated as a tax-qualified plan from its effective date even though the plan is not actually established until the date for filing the employer's tax return for its taxable year—including extensions.

As under present law, the allocation of employer contributions to a tax credit ESOP for a year must be made in proportion to the total compensation of all participants sharing in the allocation for the plan year, taking into account only the first $100,000 of compensation for an employee. Integration with benefits provided under social security continues to be prohibited. In addition, amounts allocated must be immediately 100 percent vested, for example, nonforfeitable.

Limited amounts of administrative expenses for establishing a tax credit ESOP may be charged to the plan. The maximum amount which may be charged is 10 percent of the first $100,000 of the amount required to be transferred to the plan for the taxable year in which the plan is established, and 5 percent of any additional amount for such year. In addition, ongoing costs of administration—up to 10 percent of the first $100,000 of the trust's dividend income plus 5 percent of the remaining dividend income—may also be charged to the plan.

This bill also introduces a new nondiscrimination test applicable to leveraged ESOP's and to tax credit ESOP's. The purpose of the test is to insure that rank and file employees are the primary beneficiaries of the additional incentives provided under this bill.

The nondiscrimination test places limitations on the amount of employer contributions that may be allocated to officers, 10 percent shareholders, and the highly compensated. For purposes of this requirement, the term "officers" includes only those persons, regardless of title, who perform substantive duties in the nature of top management. Highly compensated employees are those earning twice the annual addition limitation under section 415—$83,000 for 1981.

THE ALLIED PLYWOOD ESOP

Mr. President, I ask unanimous consent that a profile of an ESOP company that appeared in the current newsletter of the Employee Stock Ownership Association be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE ALLIED PLYWOOD CORPORATION OF ALEXANDRIA, VIRGINIA

Allied Plywood's ESOP is working—for the company, its owners, and its employees.

Allied Plywood Corporation is a plywood distributing firm founded by Ed and Phyllis Sanders in 1951. Spurred by the Washington-area building boom and sound, conservative management practices, the company enjoyed steady growth for 25 years. But like most small business owners, the Sanders' faced enormous obstacles from the Internal Revenue Service when they tried to convert some of the hard-won fruits of their labors to cash for their own enjoyment.

They considered selling some of their stock back to the corporation, but IRS regulations deny capital gains treatment when a family owns more than 50 percent of the common stock. Any such sale is treated as a dividend instead. The result: a confiscatory 70 percent personal tax on proceeds, and no corporate-level deduction for the amounts paid for the stock.

Then, in 1976, Ed Sanders read a Washington Post letter to the editor describing the merits of the Employee Stock Ownership Plan. After studying the plan carefully, Ed concluded that he could use it to solve his tax problems and provide an entirely new system of incentive for his employees at the same time.

THE SOLUTION

Allied Plywood then adopted a non-leveraged ESOP, combining a stock bonus plan with a money-purchase plan to take advantage of the higher contribution levels available when this type of combination is used. Under the money-purchase plan, the firm is required to contribute 10 percent of its covered payroll to the plan each year; the level of contributions under the stock bonus plan is entirely discretionary. Each year since its inception, the ESOP has used cash contributed by the company to purchase shares from Ed and Phyllis Sanders.

From a tax standpoint, the results of the plan have been right on target. The cash that Ed and Phyllis receive for their stock is taxed at capital gains rates, rather than at the much higher dividend rates, because they have taken care to abide by the rules of Revenue Procedure 77-30. The company's contributions to the ESOP have been fully tax-deductible, another big advantage over the stock-redemption alternative.

The ESOP has also solved a problem that had been troubling Ed Sanders for years: how to get the employees more involved with the company, how to get them to identify their own fortunes with the company's fortunes. Previously, he had tried to sell shares directly to the employees, but that approach met with little success. Most workers had no after-tax money to spare for "luxury" items like stock. The ESOP, by providing employees with stock at no out-of-pocket to them, gives each worker a substantial capital stake in the company.

Allied Plywood's ESOP, after last year's contribution and stock purchase, owns just under 50 percent of the total equity outstanding. Next year, the amount will surely surpass the 50 percent level, and in a few years, as Ed and Phyllis continue to sell their equity, it will own substantially all of the stock of Allied Plywood.

COMMUNICATING THE BENEFITS

Like most ESOP companies, Allied Plywood has had to make special efforts to communicate to its employees exactly what the rights and responsibilities of stock ownership are. Each year, the employees' annual ESOP reports are printed by a computer on to a form resembling a stock certificate.

The report lists the value of the individual's accounts in the ESOP, broken down so that he can see the importance of a steady increase in the value of his Allied Plywood stock. Along with the certificate comes a report on company operations written by Ed Sanders, bringing the employee-owners up to date on the "big picture" most workers never see. Once a month there is a meeting of all the employees, to share information with them and to pick their brains about how different aspects of the company's operations might be improved.

Sanders believes, however, that formal meetings are not really the best places for productivity-improving ideas to be worked out. Rather, participation occurs in a more unstructured way: as problems develop in day-to-day operations, or as a new idea pops up, things are discussed right away rather than waiting for a formal meeting.

CASH BONUSES

Sanders firmly believes that the ESOP has made a difference in his employees' productivity, although he says it is difficult to put an exact dollar figure on the productivity value of the ESOP. In the employees' minds, the ESOP benefits are closely intertwined with Allied's outstanding cash bonus program.

Each month, the firm contributes an amount of cash to a bonus pool, the size of the contribution based strictly on the profits accumulated by the firm during the month. The pool is then divided equally among all the employees. For the month preceding the ESOP Association's interview with Ed Sanders, each employee received about $1,200 from the monthly bonus pool.

That's in addition to the employee's take home salary. Admittedly, this was a higher than average month; but the combined effect of the ESOP and the productivity-tied cash bonuses of this magnitude ought to be self-evident. At the end of the year, employees receive an additional bonus, based on a complex formula involving the number of days worked, importance of the job, years of service, and the quality of the individual's performance.

To top it all off, the employees receive a dividend on the stock held in their ESOP accounts. The dividend is "passed through" the ESOP to the employees, providing them with a cash return on their stock. The size of the dividends is very small because dividends are not deductible to the corporation as bonuses are. This combination of long-range ownership benefits and short-range cash benefits has resulted in extraordinarily low rates of absenteeism and turnover for Allied Plywood, and have contributed to the remarkable productivity rates the firm enjoys.

Of course, the "proof of the pudding" as far as the employees are concerned is the stock distribution when they terminate employment. Because Allied Plywood is a small company with dedicated employees, there has only been one such termination since the plan was started in 1976.

Naturally, there was quite a bit of interest from the other employees about the details of this distribution. Sanders took the opportunity at one of the monthly meetings to discuss this payment to the employee, who chose to sell his stock back to the ESOP immediately for a full payment in cash.

The sale was made using a book value formula for pricing the stock. Allied Plywood has used this formula since the inception of the ESOP, without any complaints from the IRS. (That doesn't mean, however, that the IRS would permit a book value formula to be used in other circumstances. See Revenue Ruling 59–60 for the IRS preferred valuation approach.)

THE BASICS

Name: Allied Plywood Employee Stock Ownership Plan.

Year established: 1976.

Type of plan: Stock bonus plan combined with money-purchase plan. Non-leveraged, non-contributory.

Participants: 19.

Vesting schedule: 0 percent for first three years, 30 percent after three years, 40 percent after 4 years, etc. up to 100 percent after 10 years.

Plan investments: 90 percent in Allied Plywood; 10 percent in certificates of deposit.

Percent of employer owned by plan: Just under 50 percent.

Other benefit programs: Monthly and yearly cash bonuses.

ED SANDERS' VIEWPOINT

Ed Sanders is satisfied with his ESOP, and he thinks that Congress ought to encourage more companies to adopt the program. "ESOPs are great for the continuity of corporations," says Sanders. "They enable them to roll along as new owners come in and the old ones go out."

He is particularly irked by what he regards as a tax-code bias in favor of conglomerate takeovers of small companies that could otherwise be purchased by ESOPs similar to Allied Plywood's. The solution, he has argued repeatedly in Congressional testimony and elsewhere, is to provide a "tax-free rollover" for sales of small business stock to ESOPs.

In other words, a person who sold small business stock to an ESOP and reinvested the proceeds in other small business stock within 18 months would not have to pay a tax on his gain—at least until he sold the stock acquired with the proceeds, at which time his tax would be based on the entire gain from the time he acquired the original stock sold to the ESOP. This would put the seller in the same position he would be in had he engaged in a tax-free merger into a conglomerate.

Sanders also opposes mandatory pass-through of voting rights to ESOP participants. "I've invested half a lifetime in building this company," he argues, "so why should I just turn over control to somebody else? I'm not really afraid of doing that, but why should I? Most of them haven't put in a penny of their after-tax dollars as I have, and I don't think it is fair for the government to force a vote pass-through."

SUPPORT FOR SMALL BUSINESS

Mr. STEVENS. Mr. President, recently an editorial appeared in the July 15, 1981 edition of the Washington Star endorsing the Small Business Innovation Research Act of 1981 introduced by the distinguished Senator from New Hampshire, Mr. RUDMAN.

Senator RUDMAN has addressed a very important issue regarding support for small business in this country. If the United States is to remain on the path to economic recovery, it is essential that small businesses throughout the land become healthy and viable. There is no doubt that the strength and stability of the U.S. economy is directly correlated to the survival of small businesses.

The measure sponsored by my able friend from New Hampshire, directs Federal agencies with research and development budgets over $100 million to set aside 1 percent for small businesses. As a result, small businesses would be eligible to submit proposals relating to the research and development objectives of the agency from which the seed money will come. In this way, the efforts of an agency research and development would be complemented by the efforts of small businesses with promising ideas. It must be clear, however, that any commercial application would be resulting from the research and development financed by private capital, not public funds.

I am pleased to join Senator RUDMAN as a cosponsor of the Small Business Innovation Research Act of 1981 and I ask unanimous consent that the text of the editorial referenced above be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

INVENTION IN THE SENATE

It remains something of a historic scandal that the Wright Brothers waited five years to get federal support, which came grudgingly at that. But the problems facing small innovative businesses haven't changed much. Their contribution to American life and invention far exceeds their size, yet federal support remains minuscule—3 or 4 percent of the federal research and development budget. That could be changed by one of the most ingenious bills of the 97th Congress introduced by freshman Sen. Warren B. Rudman, R-N.H.

Mr. Rudman's "invention" could give small R&D firms as much as $400 million more a year—without adding a cent to the federal budget. His Small Business Innovation Research Act of 1981 simply requires that federal agencies with an R&D budget in excess of $100 million set aside 1 percent for small business. Thus it would counter the federal temptation to turn always to one or two "safe" contractors and open the market to more spirited competition. The government may spend as much as $40 billion on R&D in 1982.

The importance of small business cannot be overstated. An MIT study, for instance found that between 1953 and 1974 some 50 percent of all major innovations came from firms with fewer than 1,000 employees. A National Science Foundation survey showed that small businesses produce up to 24 times more innovation per R&D dollar than larger ones. An MIT Development Foundation Study said that "young" technology companies, with sales equaling only 2 per cent of those in "mature" industry, created 34 percent more jobs than those created by the mature companies. Yet federal R&D grants persistently favor large firms.

Mr. Rudman's bill, introduced jointly with Sen. Lowell Weicker Jr., R-Conn., is simplicity itself. Small businesses would be invited to submit proposals touching on an agency's R&D objectives. Those judged to be more promising could get "seed money"—and more money if the research appears fruitful. Any commercial application would be financed entirely by private capital.

One can anticipate objections. A National Science Foundation program, after which Mr. Rudman's bill is modeled, was widely judged to be successful, but there were some complaints about implementation. There are bound to be difficulties in following through on any program in which more companies participate and more ideas emerge.

Nevertheless, the case for the proposal is powerful indeed, as Mr. Rudman observed when he said that "almost 50 per cent of American economic growth stems from innovation." Similarly, a 1977 Office of Management and Budget study found that small firms have inadequate access to federal R&D money and that "our country will lose significant high technology capabilities" without such support. Mr. Rudman's bill would increase that resource by redistributing a tiny portion of federal money already being spent on R&D.

When final hearings on the bill begin today it should also be noted that it admirably complements President Reagan's wish to stimulate the economy and enhance productivity. For such reasons it has attracted 79 cosponsors, including such traditionally opposing voices as Howard Metzenbaum, Edward Kennedy, Jake Garn and Jesse Helms.

But there have been other attempts to awaken Washington to the importance of American R&D—and most have gotten no-

where. Mr. Rudman's exceptional bill could be an exception to that sorry history, and it ought to be.

THREE MILE ISLAND: NUCLEAR POWER'S TET

Mr. SYMMS. Mr. President, in the wake of the nuclear accident at Three Mile Island, my guess is that if you asked the average American how many people would die in the event of a nuclear melt-down, the answer would be thousands. I suppose that the average American, who depends for his information about nuclear power on the evening television news and an occasional headline in the local paper, would tell you that nuclear power is terribly risky. And that is truly unfortunate, Mr. President, since the truth is just about exactly the opposite.

In order for nuclear power to be as dangerous to the health of Americans as burning coal, for example, we would have to have a melt-down someplace in the country about every 6 months. Actually, this estimate is based on the kind of worst-case figures generated by the Union of Concerned Scientists, not widely thought to be strong supporters of nuclear power. Using official Government figures the frequency of meltdowns would have to be one every 2 weeks to make nuclear power as dangerous as coal.

These facts are provided by Dr. Bernard Cohen, a professor of physics at the University of Pittsburgh, and chairman-elect of the American Nuclear Society's Division of Environmental Sciences. Dr. Cohen notes that in almost no cases would there be any immediate deaths from a meltdown, though such deaths are not impossible. The usual effect would be a very, very modest rise in the number of cancer-related deaths spread over decades. Taking all deaths together, they work out to about 400 for each melt-down. For comparison purposes, Dr. Cohen points out that burning and mining coal is killing about that many people every 2 weeks.

That is not to say that coal burning is particularly dangerous either. I am not against the burning of coal. Nor am I making excuses for any deaths which can be related to one form of energy production over another. Nor am I oblivious to the importance of strong nuclear safety procedures. I merely think it is important to put things in perspective. The public perception of coal burning and nuclear power production are just very much at variance with reality.

Why is the fact so different from the reality, Mr. President? This is an important question, and one that we ought to focus some attention on. Dr. Cohen suggests that it is because nuclear power is the first energy source which has developed in the modern age, when we have had the foresight and capacity to evaluate all the risks up front, ahead of time. Thus we have learned a great deal about the risks of nuclear power.

Coal, and other fossil fuels, by contrast, came into use hundreds of years ago, before we developed our penchant for long-range planning. The risks of burning coal were unknown at the time. We are now able to go back and evaluate those risks, but to the average person, coal is an old friend. We all know it and are comfortable with it. Dr. Cohen suggests that this unequal treatment is damaging to our long-term security and well-being.

He suggests one other explanation for the disparity between image and fact: the news media. To quote him:

> A reporter's job is to get an interesting story, something that will attract the attention of the public. . . . A reporter trying to make an interesting story . . . naturally picks the worst possible accident—45,000 cancers, $15 billion cost—to discuss. His story says that nuclear accident could have these consequences, but readers and those reporting a story seldom make a sharp distinction between could and would. Since media people get most of their information from other media productions, powerful media figures ranging from Dan Rather to Johnny Carson have been convinced that a reactor melt-down is the ultimate disaster. With them preaching the gospel, the public is soon convinced.

Mr. President, Dr. Cohen is right on target with this point, and I found his other insights into the safety of nuclear power equally illuminating. I ask unanimous consent that Dr. Cohen's article, from the June 12 issue of National Review, be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

KING COAL AND THE MELT-DOWN MYTH

(By Bernard L. Cohen)

Melt-down has become a household word synonymous with the ultimate disaster. That word, referring to a complete melting of the fuel in a nuclear power reactor, was brought to public attention in the movie The China Syndrome, and its implications were underlined by the accident at Three Mile Island. Fear of a melt-down has led several commentators to say that we should depend on coal rather than nuclear power for electricity.

How rational is this? According to estimates by government scientists, for nuclear power to be as dangerous as coal we would have to experience a reactor melt-down every two weeks somewhere in the United States. If one rejects the credibility of government-sponsored studies and goes to the other extreme of accepting the estimates of the Union of Concerned Scientists (UCS), nuclear risks become equal to those of coal if we have a melt-down only every six months.

An average melt-down, according to the government estimates, would result in about four hundred eventual cancers. The UCS estimate is ten times higher. But air pollution from coal-burning is generally estimated to be causing about ten thousand fatalities per year in the United States, a rate of four hundred every two weeks (some estimates of the effects of coal-burning are many times higher).

Since there seems to be a credibility problem with government statements, it should be explained that what we refer to as "government estimates" is actually work by scientists whose research is supported by the Federal Government, which includes well over 90 percent of the involved scientific community. Their scientific work is not subject to political pressure or review, although the official summaries of their documents and the press releases on them are in the political arena. Since science is international, and its findings can be readily checked, incorrect scientific information is ordinarily rapidly exposed in the scientific community, and those responsible pay a heavy price professionally. There is of course some room for honest disagreement in interpretation of data, and that is why UCS can obtain results differing from the government estimates.

The "government estimates" referred to are from the Nuclear Regulatory Commission (NRC) document WASH–1400, better known as the Rasmussen Report. According to some press reports, WASH–1400 was "repudiated" by NRC, but that is an overstatement. Actually NRC accepted the report of a committee headed by H. W. Lewis which said that the uncertainties in WASH–1400 are larger than stated; it did not say that the dangers were greater than estimated in WASH–1400, and, in fact, Lewis himself told a congressional committee that he believed that they were smaller. Moreover, the principal criticisms referred to the WASH–1400 estimate of the probability of a melt-down, and we are not using that estimate here. We consider only a melt-down's consequences.

The report by the Union of Concerned Scientists does not contain as much detail as WASH–1400, but its viewpoint can be roughly represented if all consequences given below are multiplied by ten. The UCS also contends that the probability of a melt-down is ten times larger than the WASH–1400 estimate, but that is not at issue in our discussion.

For nuclear power to be as dangerous as coal-burning we would have to have a melt-down every two weeks. If that statement is shocking, it is because the dangers in a melt-down have been grossly over-sold by the media. A reactor is enclosed in a very powerfully built structure called the "containment" with walls several feet thick made of very heavily reinforced concrete. This gives protection against a wide variety of external threats—the containment would not be breached by an automobile or tree hurled at it by a tornado, by the explosion of a large quantity of TNT placed against its walls, by an airplane flying into it, or by an aerial bomb. In a melt-down, its function is to contain the radioactive dust and gases for as long as possible. Inside the containment there is equipment for removing the airborne radioactive dust by sucking the air through filters as in a vacuum cleaner and by scrubbing it with chemical sprays. Most of the dust would simply settle on the walls, so if the containment maintained its integrity for a few days, the consequences of a melt-down would be minimal. This is what is expected to happen in the majority of melt-downs.

That is definitely what would have been expected in the Three Mile Island accident if the necessary measures had not been taken to prevent a melt-down. According to the Kemeny Commission Report, page 14, "even if a melt-down occurred, there is a high probability that the containment building . . . would have been able to prevent the escape of a large amount of radioactivity." Similarly the Rogovin Report states on page 20: "even with a core melt-down . . . the most likely probability is that the reactor building would have survived . . . and the vast majority of the radioactive material would have been retained within the building, not released to the surrounding environment." Actually, none of the systems designed to preserve the containment integrity in such an accident were out of operation or would have been jeopardized by a melt-down, so there is no reason to have expected containment failure at Three Mile Island.

Great harm will result only if the containment is breached shortly after the fuel melts. This is highly improbable, and expected in only 1 per cent of all melt-downs.

but this low probability factor is somehow ignored in nearly all public discussion. In The China Syndrome, the fear is that when the molten fuel comes in contact with water, a steam explosion can occur that would be powerful enough to blow open the containment. To create enough steam in a short enough time to cause such a powerful explosion, the hundred tons of molten fuel would have to be effectively divided into pieces the size of small necklace beads, and all would have to strike the water within less than half a second—a highly unlikely situation. Even then, there would have to be a heavy object on which all this force is focused to act as a missile. It is much more likely for the fuel to drop into water (if it ever does) in rather large chunks, and over a period of many seconds.

It is implied in the movie that even interaction with ground water could cause such an explosion, but the molten fuel would come into contact with ground water only very gradually. If it did so, the steam formed would exert a pressure keeping the rest of the ground water away, so there would be very little contact until the molten fuel cooled and solidified, many days later. Then it would form a glassy solid mass which could not be easily dissolved in water, so that little or no ground water contamination could be expected. If there were a problem of this type, there would be plenty of time—many months or years—to take action to prevent harm to the public.

In accounts of the Harrisburg accident the impression given was that a hydrogen explosion could have ruptured the containment. This is almost certainly not the case. Even if all the hydrogen that could have been produced in that type of accident had exploded in the worst possible way, the containment probably would not have been broken. Since this hydrogen is produced rather gradually and there are many sources of sparks available (e.g., from motors) one would expect the hydrogen to be consumed in many small fires and explosions, which would be much less forceful. In fact, it is believed that there was a hydrogen explosion in the containment. It increased the pressure briefly to almost double the outside pressure but this is only one-seventh of the pressure rise needed to break the containment. After the first few hours, the hydrogen level in the containment never rose much above 2 per cent, whereas hydrogen is flammable only at concentrations over 4 per cent, and becomes explosive only after reaching 15 per cent.

In most melt-downs the containment is expected to maintain its integrity for a long time, and the expected number of fatalities is zero. That is, most melt-downs would not kill a single person, immediately or eventually. However, as the molten fuel reacts with the concrete floor of the containment, gases would evolve which would slowly build up the pressure inside to the point where gaseous releases may be necessary to avoid cracking the containment. In such cases it is probable that some cancers would be induced. In one out of five melt-downs there would be perhaps a thousand eventual cancer fatalities; in one out of a hundred melt-downs there would be ten thousand—the number of fatalities we now get each year from burning coal; and in one out of 100,000 melt-downs there would be 45,000—the number of fatalities each year on our highways.

In addition to cancers, in one out of a hundred melt-downs there would be a few early fatalities, people dying within a month or two from direct effects of radiation. In one of five hundred melt-downs the number of such fatalities would exceed one hundred; in one out of five thusand melt-downs it would exceed one thousand; and in one out of 100,000 melt-downs it would reach thirty-five hundred.

When all of these various kinds of consequences, the cancers and the early fatalities, are added, it works out to an average of four hundred fatalities per melt-down. the number we get every two weeks from burning coal.

Some people say that it's not the average that counts, but the catastrophic nature of a single event. They point out that the deaths from air pollution go unnoticed and are therefore less frightening. However, the same would be true of the cancers from a nuclear melt-down. Even the 45,000 cancers caused by the worst accident—expected once in 100,000 melt-downs—would be distributed among ten millions people and over a fifty-year time span, with the risk to each individual increased by less than half of 1 percent. The average American's risk of death from cancer is now 17 percent, so an increase to 17.5 percent (for those affected) would not be noticeable. In fact the risk varies in different states, from 19 percent in New England to 14 percent in Kentucky and Tennessee, and nobody seems to notice that. The average loss of life expectancy for those exposed would be about one month, which is equal to the risk incurred by an overweight person who gains one additional pound, or a man who smokes one pack of cigarettes every three months. Don't forget that this is the worst accident, but it is the only one the news media and The China Syndrome elect to discuss.

Let's compare these figures with the worst accidents that could result from using other energy sources that are considered acceptable. There are hydroelectric dams in this country whose failure could kill over 200,000 people. There are potential gas explosions that could kill many hundreds of thousands, and perhaps even wipe out a whole city. There are oil fires possible which could create enough air pollution to kill hundreds of thousands. There have already been air pollution episodes from coal-burning that have killed 3,500 people in a week.

Up to this point we have not mentioned genetic damage, the much publicized effect on future generations. The total number of genetic defects eventually expected from a reactor melt-down is about two-thirds of the number of cancers—the most probable number in a melt-down is zero, but the average number is close to three hundreds. These would occur over a period of 150 years, and would be difficult to pinpoint—about 200,000 U.S. babies are born annually with these types of genetic defects.

Coal-burning, meanwhile, produces a large variety of chemicals called mutagens that induce genetic defects. There is not enough information available to make quantitative estimates, but there is no reason to believe that these effects are less than those from the amount of nuclear radiation we are considering.

And then there is land contamination. We hear repeatedly that a melt-down could contaminate an area the size of Pennsylvania, 45,000 square miles. Of course this depends on one's definition of "contaminate"; it could be said that the whole earth is contaminated, since naturally radioactive elements like uranium, thorium, potasisum, and radon are found everywhere, in all rock and soil, in our bodies, and in the air we breathe. But if one uses the definition adopted by the International Commission on Radiological Protection, or by official national organizations that have ruled on the issue, the worst reactor accident would contaminate an area of 3,300 square miles—a circle with a thirty-mile radius—90 per cent of which could be readily decontaminated by such measures as washing hard surfaces with hoses and deep plowing of open fields. Of course any area can be decontaminated at a cost but it would probably be more practical to evacuate some areas for a period of time. In the worst accident, the evacuated area would probably be about three hundred square miles, equivalent to a circle with a ten-mile radius.

In most melt-downs the cost of such an evacuation—including decontamination costs and lost pay—would be less than $50 million, and in nine out of ten it would be less than $300 million. In 1 per cent of all melt-downs the cost would be over $2 billion, and once in ten thousand melt-downs it would reach $15 billion. Averaging over all situations gives a cost of less than $100 million per melt-down. By comparison, the property damage from coal-burning is estimated to be about $13 billion per year, so for the monetary cost to the public to be as large from nuclear power as it now is from coal-burning we would have to have a melt-down every three days.

Why then have the media given such a different impression of the costs and risks of a nuclear power accident?

For the first time in the history of our civilization, an industry has exerted an intense effort to determine its environmental effects in advance. Thousands of man-years of effort have been expended in dreaming up all the things that could go wrong in nuclear plants and in estimating the possible consequences. (In addition, $2 billion has been spent for research on health effects of radiation, many times more than has been spent studying air pollution, food additives, and other environmental hazards that are generally recognized in the scientific community as being far more dangerous.) With all of this effort, some very damaging scenarios can be developed, although they would have very small probabilities.

A reporter's job is to get an interesting story, something that will attract the attention of the public. If public interest in a nuclear reactor melt-down had not been aroused by the China Syndrome and the Harrisburg accident, the facts recited in this article would have been dull—most people don't understand probabilities. A reporter trying to make an interesting story out of it naturally picks the worst possible accident—45,000 cancers, $15 billion cost—to discuss. His story says that a nuclear accident could have these consequences, but readers and those reporting a story seldom make a sharp distinction between could and would. Since media people get most of their information from other media productions, powerful media figures ranging from Dan Rather to Johnny Carson have been convinced that a reactor melt-down is the ultimate disaster. With them preaching this gospel, the public is soon convinced.

Unfortunately, the consequences are tragic. Surely no one believes that we will have a melt-down every two weeks, or even every six months. There have already been over a thousand reactor-years of experience operating nuclear plants around the world, and there have been twice that in experience with naval reactors; and we have not yet had a single melt-down. There has never been an evacuation, although that would be the first action if there appeared to be even a reasonable chance of a melt-down. The Union of Concerned Scientists estimates that if all our electric power were nuclear we would have a melt-down on an average of once in five years: if that were accurate, we probably should have had one by now.

Nonetheless, as a result of the fear spread by the media, the U.S. is abandoning nuclear power. We are thus being deprived of our cheapest and safest form of energy at a time when we desperately need it. Utilities will build coal-fired rather than nuclear plants. Every time this is done, many hundreds of Americans will be condemned to premature death, and close to a billion dollars in extra property damage will be incurred. That is the price we are paying for the media's exciting story.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is now closed.

ECONOMIC RECOVERY TAX ACT OF 1981

The PRESIDING OFFICER. The clerk will report the pending business by title.

The legislative clerk read as follows:

A joint resolution (H.J. Res. 266) to provide for a temporary increase in the public debt limit.

The Senate resumed consideration of the joint resolution.

UP AMENDMENTS NOS. 296 AND 297
DEPENDENT CARE TAX CREDIT

Mr. HEINZ. Mr. President, I am pleased to be a cosponsor of the amendments offered by my distinguished colleagues from Ohio (Mr. METZENBAUM), Florida (Mrs. HAWKINS), Minnesota (Mr. DURENBERGER), and Oregon (Mr. PACKWOOD), to increase the existing child care tax credit, make it refundable, and provide increased incentives for employers to become involved in providing child care assistance for their employees.

Mr. President, these amendments are both necessary and timely. More mothers are entering the work force today than ever before. Ten years ago, 39 percent of our Nation's children had mothers in the work force. Today, the children of working mothers comprise one-half of all children under the age of 18. And projections show that this trend will continue through the end of this century.

This dramatic growth is taking place for two primary reasons. First, many women are breaking down the barriers that have traditionally kept them from pursuing successful professional careers. The second, and probably most common reason, is that difficult economic circumstances are compelling many women to enter the work force.

For example, one-fourth of all working mothers are single parents, and their incomes are much lower than those of other working families. Even in families with two parents working, if the mother's income were subtracted from the total family income, most of these families would fall below the poverty level.

Mr. President, increases in wages for these lower income families have not kept pace with the increases in inflation. As a result, many working families cannot afford to provide the basic necessities such as food and housing as well as the day care which is necessary for them to work. Today, the greatest single cost for most single parents and for many who are married is day care.

Millions of low-income women face the choice of leaving children without supervision for hours each day, or of dropping out of the work force to join the welfare ranks. In my judgment, neither of these choices are acceptable.

These amendments are designed to assist those who are working to help themselves and their families. They expand and improve the dependent care tax credit available under current law for low-income families.

While the present dependent care tax credit was designed for the dual purposes of recognizing child care as a business expense necessary for earning income and helping lower income working parents afford the day care expenses they incur while trying to maintain a minimal standard of living for their families, it has, in large part, been ineffective.

The current tax credit suffers from three major flaws. First, the tax benefits have favored those families using the credit as a business credit over those using it as a means of affording dependent care. Second, the allotted percentage of costs credited under the current tax credit is not adequate to meet child care costs for many low-income families. And third, the tax credit is meaningless to low-income families who have little or no income tax liability against which the credit can be claimed.

The amendments before us redesign the dependent care tax credit so that the poorest families gain the greatest benefit. The most important provisions in these amendments are that the credit would be refundable; that the amount of credit available to each family would be determined by a sliding scale, and that the total amount of credit available is increased to reflect the true costs of day care.

To summarize these important amendments:

First, the dependent care tax credit is increased to 30 percent for families with incomes of up to $10,000, decreasing by 1 percent for each additional $2,000 in income. For those with incomes above $30,000 the credit remains at 20 percent, the same as present law.

Second, the amount of day care expenses for which the credit may be taken is increased from $2,000 for one dependent and $4,000 for two or more dependents in present law to $2,400 for one dependent and $4,800 for two or more dependents in our amendments.

Third, for those with little or no tax liability, the credit is refundable.

Fourth, dependent care provided by an employer is not taxed as income to the employee; and

Fifth, employers who contract with day care providers receive a credit of 50 percent of the employer's expenses.

This means that, to a family with $10,000 of income and $2,400 of dependent care expenses, the credit increases from $400 in present law to $720 under our amendments. And if that family has little or no income-tax liability, they would receive up to $720 in refund from the Government. A family with $20,000 of income and $2,400 in expenses receives $200 more than under present law.

Mr. President, for thousands of American families, credit proposed by the amendments could mean the difference between work and welfare. It will assist families with the greatest need to compensate for budget reductions and to make ends meet during this time of high inflation and economic uncertainty. The amendments will help working mothers provide their children with the necessary supervision and care so vital to their development. And by targeting lower-income families through a sliding credit scale, we will enable women to participate in meaningful employment and help to raise their families above the poverty line.

I urge my colleagues to adopt these important amendments by supporting the motion before us.

CHILD CARE TAX CREDIT

● Mr. D'AMATO. Mr. President, every time an individual stays out of the labor force because adequate day care is unavailable or unaffordable, valuable productivity is lost. We must make it possible for people to work if we are to restore our economy to economic health. Providing tax credits for dependent care is an important step in this process.

Current law already allows working individuals to take a tax credit for day care costs up to $2,000 a year for a single dependent in day care or $4,000 if two or more dependents are in a day care. Thus, the maximum tax credit is $400 for one dependent and $800 for two or more. This is helpful, but it is simply not enough, especially for workers in low-paying jobs.

The present amendments have several provisions, but I believe that three of these are important enough to be addressed here. The first of these raises the allowable expenses against which the tax credit may be taken to $2,400 for one dependent and $4,800 for two or more. This 20 percent increase is necessary to compensate for recent inflation in day care costs. Anyone who believes that $200 a month for one child or $400 a month for two or more children is an overly generous allowance for day care expenses today has not recently had to secure day care for a child. If we let this credit lag behind day care costs, more and more working parents will decide that it simply is not worth it to work and their valuable contributions to our economy will be lost. It has been 5 years since the allowable expenses for credit were set at their current levels. They are no longer reflective of actual expenses. They must be increased.

The second provision would increase the current 20 percent credit on a sliding scale designed to primarily benefit middle and lower income working parents who need this assistance the most. No family would receive a smaller credit percentage than they do now, but most American families would see their credit percentage increase.

For families with annual incomes of $30,000 or more the credit would remain 20 percent as it is now. However, for every $1,000 less the family earned, their credit would be increased by half of 1 percent. Thus, families with $29,000 would receive a 20.59-percent credit; and so on. This gradual increase in the credit percentage as family income declined would continue down to families with incomes of $10,000 or less. Their credit percentage would be 30 percent.

Thus, the maximum credit for families with $10,000 in income would increase from its current $400 ($800 for two or more dependents in day care) to $720 ($1,400 for two or more dependents in

day care). However, for families with $30,000 in income the increase would only be from $400/$800 to $480/$960. This is as it should be. The Government must make it possible for all Americans to work through inducements such as this tax credit, rather than by becoming the employer of last resort itself.

The final provision of these amendments to which I would like to address myself at this time is the one that would make this tax credit refundable. This credit would be useless to those at the low end of the income scale unless this provision is included. If your income is too low to pay taxes, a tax credit such as this is of no help at all unless it is made refundable. If we want all Americans to work, and that must be our highest priority, we must find a way to get this relief to everyone, and refundability is the best way to do this. It would insure equity in the dependent care tax credit to all Americans, regardless of their income class.

Low- and middle-income families need this tax relief now. So, however, does the American economy as a whole which will benefit from the availability of more people made able to assume productive work upon being relieved of some of the financial burden of providing day care to their dependents. These are bipartisan amendments important to every working American family. I am pleased to be a cosponsor of both of these amendments. I urge their immediate adoption.●

Mr. STEVENS. Mr. President, I move to reconsider the voice vote by which the Metzenbaum-Durenberger-Hawkins-D'Amato day care center amendment was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the motion.

Mr. LONG. Mr. President, in order that the vote might reflect an "aye" vote being for the amendment, I move that the motion be laid on the table and I ask for the yeas and nays.

The PRESIDING OFFICER. The yeas and nays have been requested.

The Chair requests the Senator from Louisiana to once again restate his motion.

Mr. LONG. Mr. President, I move that the motion to reconsider be laid on the table.

The PRESIDING OFFICER. The Senator from Louisiana is asking for the yeas and nays on the motion?

Mr. LONG. I ask for the yeas and nays.

The PRESIDING OFFICER. The yeas have been requested.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. LONG. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the motion to reconsider the vote by which the amendments were agreed to. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from New Hampshire (Mr. HUMPHREY) and the Senator from Idaho (Mr. MCCLURE) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Arkansas (Mr. BUMPERS), the Senator from Florida (Mr. CHILES), and the Senator from Massachusetts (Mr. KENNEDY) are necessarily absent.

The PRESIDING OFFICER (Mr. ARMSTRONG). Are there other Senators in the Chamber who wish to record their vote?

The result was announced—yeas 94, nays 1, as follows:

[Rollcall Vote No. 227 Leg.]

YEAS—94

Abdnor	Glenn	Murkowski
Andrews	Goldwater	Nickles
Armstrong	Gorton	Nunn
Baker	Grassley	Packwood
Baucus	Hart	Pell
Bentsen	Hatch	Percy
Boren	Hatfield	Pressler
Boschwitz	Hawkins	Proxmire
Bradley	Hayakawa	Pryor
Burdick	Heflin	Quayle
Byrd, Harry F., Jr.	Heinz	Randolph
	Helms	Riegle
Byrd, Robert C.	Hollings	Roth
Cannon	Huddleston	Rudman
Chafee	Inouye	Sarbanes
Cochran	Jackson	Sasser
Cohen	Jepsen	Schmitt
Cranston	Johnston	Simpson
D'Amato	Kassebaum	Specter
Danforth	Kasten	Stafford
DeConcini	Laxalt	Stennis
Denton	Leahy	Stevens
Dixon	Levin	Symms
Dodd	Long	Thurmond
Dole	Lugar	Tower
Domenici	Mathias	Tsongas
Durenberger	Matsunaga	Wallop
Eagleton	Mattingly	Warner
East	Melcher	Weicker
Exon	Metzenbaum	Williams
Ford	Mitchell	Zorinsky
Garn	Moynihan	

NAYS—1

Biden

NOT VOTING—5

Bumpers	Humphrey	McClure
Chiles	Kennedy	

So the motion to lay on the table the motion to reconsider was agreed to.

● Mr. CHILES. Mr. President, I was unable to be in the Chamber during the vote on the motion to table the motion to reconsider the Metzenbaum amendment on child care. I wish the record to show that had I been here, I would have voted "aye."●

The PRESIDING OFFICER. Under the previous order, the Senator from Montana is recognized to call up an amendment dealing with regulations on imputed interest rates.

Mr. DOLE. Mr. President, the distinguished Senator from Montana has agreed that his amendment might come at about 10:30 a.m. He will be meeting with the Treasury Secretary at 10 o'clock on this amendment. He has agreed to withhold offering the amendment contingent on what may happen at that meeting. Therefore, I ask unanimous consent that that amendment be temporarily set aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, as I understand it, the next amendment will be that of the Senator from Hawaii (Mr. MATSUNAGA).

The PRESIDING OFFICER. The Senator is correct.

Mr. DOLE. I advise the Chair that he is on his way to the floor. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MATSUNAGA. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 308 (MODIFIED AMENDMENT NO. 495)

(Purpose: Providing that the at-risk rules not apply to certain energy property)

Mr. MATSUNAGA. Mr. President, I call up amendment No. 495 which has been modified and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Hawaii (Mr. MATSUNAGA), for himself and others, proposes a modified version of printed amendment 495, which is unprinted amendment numbered 308.

Mr. MATSUNAGA. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 102, between lines 2 and 3, insert the following:

"(E) SPECIAL RULE FOR CERTAIN ENERGY PROPERTY.—

"(i) IN GENERAL.—The provisions of subparagraph (A) shall not apply to amounts borrowed with respect to qualified energy property (other than amounts described in subparagraph (B)).

"(ii) QUALIFIED ENERGY PROPERTY.—The term 'qualified energy property' means energy property to which (but for this subparagraph) subparagraph (A) applies and—

"(I) which is described in clause (iii),

"(II) with respect to which the energy percentage determined under section 46(a)(2)(C) at the time such property is placed in service is greater than zero,

"(III) with respect to which the taxpayer, as of the close of the taxable year in which the property is placed in service, is at risk (within the meaning of section 465(b) without regard to paragraph (5) thereof) in an amount equal to at least 25 percent of the basis of the property, and

"(IV) with respect to which any nonrecourse financing (other than financing described in section 46(c)(8)(B)(ii)) in connection with such property consists of a level payment loan.

For purposes of subclause (II), the energy percentage for property described in clause (iii)(V) shall be treated as being greater than zero during any period the energy percentage for property described in section 48(1)(14) is greater than zero.

"(iii) PROPERTY TO WHICH THIS SUBPARAGRAPH APPLIES.—Energy property is described in this clause if such property is—

"(I) described in clause (ii), (iv), or (vii) of section 48(1)(2),

"(II) described in section 48(1)(15),

"(III) described in section 48(1)(3)(A)(iii) (but only to the extent such property is

used for converting an alternate substance into alcohol for fuel purposes),

"(IV) described in clause (i) of section 48(l)(2)(A) (but only to the extent such property is also described in section 48(l)(3)(A) (viii) or (ix)), or

"(V) property comprising a system for using the same energy source for the sequential generation of electrical power, mechanical shaft power, or both, in combination with steam, heat, or other forms of useful energy.

"(iv) LEVEL PAYMENT LOAN DEFINED.—The term 'level payment loan' means a loan in which each installment is substantially equal, a portion of each installment is attributable to the repayment of principal, and that portion is increased commensurate with decreases in the portion of the payment attributable to interest.

On page 104, line 15, strike out the end quotation marks and the end period.

On page 104, between lines 15 and 16, insert the following:

"(3) SPECIAL RULES FOR CERTAIN ENERGY PROPERTY.—

"(A) IN GENERAL.—In the case of the 2nd taxable year following the taxable year in which any qualified energy property (within the meaning of section 46(c)(8)(E)) is placed in service by the taxpayer and any succeeding taxable year, the taxpayer, for purposes of paragraph (1), shall be treated as ceasing to be at risk with respect to such property for such taxable year in an amount equal to the credit recapture amount (if any);

"(B) CREDIT RECAPTURE AMOUNT.—The term 'credit recapture amount' means an amount equal to the excess (if any) of—

"(i) the toal amount of principal to be paid as of the close of any taxable year under a nonrecourse level payment loan (other than a loan described in section 46(c)(8)(B)(ii)) with respect to such property, over

"(ii) the sum of—

"(I) the amount of principal actually paid as of the close of such taxable year, plus

"(II) the sum of the credit recapture amounts with respect to such property for all preceding taxable years.

"(C) SPECIAL RULES FOR DETERMINING PRINCIPAL TO BE PAID.—For purposes of subparagraph (B)(i), in determining the amount of the principal to be paid under a level payment loan, such determination shall be made as if such loan was to be fully repaid by the end of a period equal to the earlier of—

"(i) the present class life (as defined in section 168(g)(2)) of the property or, if the property has no present class life, a similar period determined by the Secretary, or

"(ii) the period at the end of which full repayment is to occur under the terms of the loan.

"(D) SPECIAL RULE FOR CERTAIN CUMULATIVE DEFICIENCIES.—If the excess of—

"(i) the amount of the total scheduled principal payments under a loan described in subparagraph (B)(i) as of the close of the taxable year, over

"(ii) the total principal actually paid under such loan as of the close of such taxable year,

is equal to or greater than the amount of such total scheduled payments for the 5-taxable year period ending with such taxable year, then, notwithstanding subparagraph (B), the credit recapture amount for such taxable year shall be equal to the principal remaining to be paid as of the close of such taxable year over the sum of the credit recapture amounts with respect to such property for all preceding taxable years.

"(E) SPECIAL RULE FOR CERTAIN DISPOSITIONS.—

"(i) IN GENERAL.—If any property which is held by the taxpayer and to which this paragraph applies is disposed of by the taxpayer, then, for purposes of paragraph (1) and notwithstanding subparagraph (B), the credit recapture amount for the taxpayer shall be an amount equal to the unpaid principal on the loan described in subparagraph (B)(i) as of the date of disposition.

"(ii) ASSUMPTIONS.—Any amount of the loan described in subparagraph (B)(i) which is assumed by any person shall be treated for purposes of clause (i) as not reducing unpaid principal with respect to such loan.

"(F) APPLICATION WITH SUBSECTION (a).—The amount of any increase in tax under subsection (a) with respect to any property to which this paragraph applies shall be determined by reducing the qualified investment with respect to such property by the aggregate credit recapture amounts for all taxable years under this paragraph.

"(G) ADDITIONAL INTEREST.—In the case of any increase in tax under paragraph (1) by reason of the application of this paragraph, there shall be added to such tax interest on such tax (determined under section 6621 as if the increase in tax under paragraph (1) was for the taxable year in which the property was placed in service).

Mr. MATSUNAGA. Mr. President, the amendment is a modified amendment and it is not in printed form, but it is the amendment which has been agreed to by all concerned, including the majority and minority staffs and the Treasury.

Mr. President, the amendment which I am offering is cosponsored by 59 Senators from both sides of the political aisle. In alphabetical order, they are as follows: Senators ARMSTRONG, BAUCUS, BENTSEN, BOREN, BRADLEY, BUMPERS, BURDICK, ROBERT C. BYRD, HARRY F. BYRD, JR., COHEN, CRANSTON, DANFORTH, DECONCINI, DENTON, DIXON, DODD, DURENBERGER, EAGLETON, EXON, FORD, GARN, GLENN, GORTON, GRASSLEY, HART, HATFIELD, HAYAKAWA, HEFLIN, HEINZ, HOLLINGS, HUDDLESTON, INOUYE, JACKSON, JEPSEN, JOHNSTON, KENNEDY, LEAHY, LEVIN, LONG, MELCHER, MITCHELL, MOYNIHAN, MURKOWSKI, PACKWOOD, PELL, PERCY, PRESSLER, PRYOR, RANDOLPH, RIEGLE, RUDMAN, SARBANES, SASSER, TSONGAS, WARNER, WEICKER, WILLIAMS, and ZORINSKY.

Mr. President, the tax bill, House Joint Resolution 266, as reported by the Finance Committee, contains a little-known provision that would deal a devastating blow to the development of alternative energy. In this respect, I wish to remind my colleagues that in 1978 and 1979, the Senate overwhelmingly supported alternative energy production. On the Senate floor most of us here today voted for the amendments that established the present energy tax credits.

These tax credits have encouraged farmers to support gasohol production, southern food processors and textile mills to utilize solar process heating, irrigation districts and towns to develop hydroelectric facilities, and industries throughout the country to develop wind energy and cogeneration. These tax credits have become increasingly vital, because the administration's budget has slashed Federal assistance for renewable fuel projects.

But now, the bill, as drafted, would even remove incentives to commercialization of alternative energy by cutting back on investment and energy tax credits. The Treasury Department does not seek to repeal the energy tax credits directly, but would effectively curtail the energy credits indirectly through its at-risk rule. Under this rule, if equipment is bought with a nonrecourse loan from anyone other than an established financial institution, insurance company or government agency, the tax credit would be denied to the extent of that nonrecourse loan. In effect, the tax incentives available to the private sector under existing law would be repealed by this complex at-risk provision, quietly stuck into this bill, without the benefit of any hearings, without giving those who would be affected the opportunity to be heard.

In all fairness to the Treasury Department which drafted this at-risk rule, I want to explain that its intention is laudable, for it is seeking to strike at a recognized abuse of tax shelters in the lithograph plate and master recording business. In these businesses, sellers have been known to set an artificial, inflated value on the plates or master recording to escalate the buyers' investment tax credit. Under this scheme the buyer would actually pay only a fraction of the price, and the unpaid balance would be covered by a nonrecourse loan from the seller to the buyer. The buyer would thus be allowed to recover his investment in 2 or 3 years from the tax benefits alone. The total inflated investment itself would never pay off economically, because the agreed price would be inflated beyond reality. After 7 years, when the investment-credit recapture period would lapse, the buyer could walk away from the scheme without liability on the unpaid balance of the loan; and the seller would simply foreclose on the master recording or the lithograph plate and discharge the loan.

The at-risk provision in the bill would completely wipe out these nefarious schemes by disallowing any investment tax credit to the extent of the nonrecourse loan, and I would have no quarrel with the Treasury Department, if the proposal were limited to doing away with these abusive practices. But what the provision, as drafted in the bill, would do is to throw out the baby with the dirty bath water. My amendment would throw out the dirty wash but save the baby.

Treasury officials have admitted that their at-risk rule is a bludgeon. It does not differentiate between valid nonrecourse financing and sham nonrecourse financing. Under the Treasury's proposal, legitimate transactions will be shut off with the sham, but the Treasury is willing to close down legitimate deals to reach the bogus tax shelters, until we finally convince them that our position is the right one.

The Treasury's proposal is an in terrorem rule, designed to scare individuals away from artificial tax shelters. To this general rule the Treasury has provided a very narrow exception, under which the investment tax credits would be allowed if the buyer obtains his nonrecourse loan from a regulated financial institution, insurance company, or Gov-

ernment agency. These institutions, the Treasury reasons, exercise sufficient care and review for their own protection to prevent artificially high valuation of the property in question. Nonrecourse financing, from any other source, however, would lose the tax credit to the extent of the loan.

What puzzles me and bothers me is that Treasury officials have taken this narrow position, knowing full well that most alternative energy projects are unable to obtain conventional financing. Banks and insurance companies simply will not lend money for innovative, unproven technology. Developers themselves are not willing to undertake risky alternative energy projects if it means making themselves personally liable beyond the redeemable value of the equipment. Consequently, these projects are funded chiefly through nonrecourse borrowing from the equipment manufacturer or the seller who has an interest and stake in the full development of the new technology and not the regulated loan institutions.

Businessmen realize that the commercial viability of many alternative energy projects is unknown, but the energy tax credits provided by Congress make the risk worth the taking. It is the energy tax credits which prompt Americans to invest in the development and commercialization of alternative energy. Congress, in its wisdom, saw the need for providing such incentives in 1978 and 1979 in the national effort to attain energy independence. The Treasury's at-risk provision, if left unamended, would frustrate this national effort.

Moreover, the at-risk proposal is much more draconian than it appears on its surface. It will, in fact, deny the investment tax credit to a businessman who finances the purchase of a Chevy delivery truck with a nonrecourse loan from the General Motors Acceptance Corp., or to a tool shop operator who buys his electrical generator with a nonrecourse loan from the General Electric Finance Corp. General Electric, General Motors, Ford Motors Acceptance Corp., and Household Finance, provide billions of dollars in loans to businesses. But under the Treasury's proposal, these lenders are not qualified sources. A businessman who buys equipment with nonrecourse loans from any of these sources would lose the investment tax credit to the extent of the loan. The Treasury's provision is so broad that it will not only close off the bogus nonrecourse loan from the lithograph peddler, but it will also close off legitimate nonrecourse loans from General Motors Acceptance Corp. and other well accepted sources.

Be that as it may, our amendment has the simple objective of preserving legitimate transactions in several alternative energy areas—solar, wind, hydroelectric, cogeneration, biomass, geothermal, and ocean thermal energy. Projects in these fields, although financed with nonrecourse loans, would continue to benefit from the full, undiminished energy tax credit and investment tax credit, as they are under present law. To insure that these energy projects involve genuine loans with a real economic value, and are not sham projects, our amendment will establish a financial test. Under this test, the nonrecourse loan must be repaid on a pro rata basis over the midpoint ADR (asset depreciation range) life of the equipment. In other words, the loan must have the indicia of a true repayable loan; otherwise, the buyer must forfeit all investment and energy tax credits, and reimburse the Federal Government for any credits wrongfully taken, with interest.

This special rule provided in our amendment would apply to alternative energy projects so long as the energy tax credit is in effect. When the energy tax credit expires, this special rule would also expire. This sunset provision would insure that the Energy Tax Credit Act is given a fair chance to achieve its objectives and not be surreptitiously foiled by any new at-risk rule.

I believe our amendment provides adequate safeguards to meet the Treasury Department's concern. It presents a fair and most sensible compromise for the implementation of the policy we established in 1978 and 1979 to foster alternative energy development through tax credits. Our amendment would simply retain present law and would not mean any loss in revenues.

I repeat, our amendment would simply retain present law and would not mean any loss in revenues.

Mr. President, I urge the adoption of the amendment which, I repeat, is cosponsored by a bipartisan group of 59 Senators from both sides of the aisle.

The names of the following Senators were added as cosponsors of the amendment: Mr. BRADLEY, Mr. DENTON, Mr. GORTON, Mr. HEINZ, Mr. JOHNSTON, and Mr. MURKOWSKI.

Mr. RANDOLPH. Mr. President, will my able colleague from Hawaii yield?

Mr. MATSUNAGA. I am more than happy to yield to the senior Senator from West Virginia, a cosponsor of the amendment.

Mr. RANDOLPH. Mr. President, with 53 cosponsors, the able Senator from Hawaii, as the sponsor of the amendment, cannot lose. It is not difficult to add the names and note more than one-half of the Senate membership endorses your worthwhile proposal.

The substance of the amendment is well documented. He is very energetic as he offers this energy tax credit.

Mr. MATSUNAGA. The name is "Sparkie."

Mr. RANDOLPH. You do spark good legislation.

Mr. MATSUNAGA. I thank my colleague.

Mr. RANDOLPH. "Sparkie" rather than "energetic"?

Mr. MATSUNAGA. Spark is energetic.

Mr. RANDOLPH. I have listened very carefully to the explanation of the provisions of the amendment. It reflects in a very genuine degree the need, when we can do it, and we can do it, we must foster and assist alternate forms of energy.

The PRESIDING OFFICER (Mr. COCHRAN). The time of the Senator from Hawaii has expired.

The Senator from Kansas has 15 minutes.

Mr. DOLE. Mr. President, I am happy to yield additional time to the Senator from West Virginia.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. RANDOLPH. I thank our affable floor manager. Many of us in this body have worked in the past on synthetic fuels and other alternatives to the imported petroleum coming from OPEC countries overseas. In this amendment there is the opportunity to give incentives to those forms of energy which sometimes are not mentioned in the discussion of energy alternatives available to us.

Fostering agricultural products to produce ethanol can help to alleviate possible transportation fuel shortages if needed. Biomass fuels can be burned directly to produce heat or converted to gaseous or liquid fuels by a variety of processes, which can serve as gasoline extenders or octane boosters.

It is constructive for the Senate, good for the Congress, and for the country to provide incentives for development of organic fuels, other than fossil, wind power, and direct generation of electricity from the Sun through photovoltaics.

We discussed yesterday, Senator HART, especially, that the so-called glut in petroleum today can be a mirage, it can vanish. We must not turn away from giving incentives to private commercial development of hydroelectric, geothermal and ocean thermal energy at the same time we cut research funds for this program. This is what the Senator is doing here today—seeing that what we do in the alternate energy programs of this country are continued, fostered and encouraged. This amendment does that very well.

Mr. MATSUNAGA. I thank the Senator from West Virginia.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Under the committee bill, the amount of basis taken into account in computing the investment tax credit is limited to the amount the taxpayer is at risk.

Under the amendment, the investment tax credit is allowed to certain energy property placed in service by the taxpayer if the taxpayer is at risk at least 25 percent of the basis of the property and if the property is financed with a nonrecourse level payment loan over not longer than the class life of the property. If in any year after the first year after the year the property is placed in service, any principal on the loan is not paid, the investment credit attributable to that amount of principal is recaptured, with interest. If the taxpayer falls substantially in arrears over a 5-year period or if the taxpayer disposes of the property, the entire credit attributable to the unpaid balance of the loan is likewise recaptured. This credit recapture is computed separately from any recapture arising from a disposition during the first 7 years of the life of property, but in no event is any double recapture required.

Mr. President, as always, I appreciate the comments of the distinguished Senator from West Virginia, and also the splendid remarks of the Senator from Hawaii.

He is correct. This is an amendment which does have widespread bipartisan, across-the-board support. There were some minor modifications suggested by the Treasury, and they have been made.

We are willing to accept the amendment.

I understand the Senator from Hawaii would like the yeas and nays on the amendment. I ask unanimous consent—and this has been cleared with both the minority and majority leaders—that the vote on this amendment occur, in addition to any other votes ordered, not before the hour of 2 o'clock.

The PRESIDING OFFICER. Is there objection?

Mr. MATSUNAGA. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. The Senator from Montana. Is there objection?

Mr. BAUCUS. Mr. President, reserving the right to object, I understand the request is not yet cleared on this side. Apparently it is not yet cleared, and for the time being I will have to object until the request is made at a later time.

The PRESIDING OFFICER. Objection is heard.

Is there a sufficient second on the request for the yeas and nays of the Senator from Hawaii? Apparently there is a sufficient second.

The yeas and nays were ordered.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the yeas and nays having beeen ordered on the amendment of the Senator from Hawaii, the question is on agreeing to the amendment of the Senator from Hawaii. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from New Mexico (Mr. DOMENICI), the Senator from Idaho (Mr. MCCLURE), and the Senator from Texas (Mr. TOWER) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 97, nays 0, as follows:

[Rollcall Vote No. 228 Leg.]

YEAS—97

Abdnor	Byrd, Robert C.	Durenberger
Andrews	Cannon	Eagleton
Armstrong	Chafee	East
Baker	Chiles	Exon
Baucus	Cochran	Ford

NOT VOTING—3

Domenici	McClure	Tower

So Mr. MATSUNAGA's amendment (UP No. 308) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table is agreed to.

The PRESIDING OFFICER. Under the previous order, the Senator from Montana (Mr. MELCHER) is recognized to call up an amendment dealing with regulations on the imputed interest rate.

Mr. DOLE. Mr. President, at this moment the distinguished Senator from Montana (Mr. MELCHER), Senator JEPSEN, Senator DURENBERGER, and Senator BOSCHWITZ are in conference with the Secretary of the Treasury trying to work out some agreement on that proposal.

I suggest the absence of a quorum and ask that the time be charged equally to both sides.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MOTION TO TABLE MOTION TO RECONSIDER VOTE ON UP AMENDMENT NO. 300

Mr. DOLE. Mr. President, yesterday, there was accepted an amendment on withholding of tax on sales of real estate by foreign-owned interests. A motion to reconsider that vote was not made. At the suggestion of the distinguished Senator from Louisiana. and I know of no one who has objection to that amendment, I now move to reconsider the vote on that amendment.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

WITHHOLDING OF TAX ON DISPOSITIONS OF U.S. REAL ESTATE OWNED BY FOREIGNERS

Mr. DOLE. Mr. President, last year, the Congress adopted legislation requiring that foreign persons who dispose of U.S. real property interests pay tax on any gain realized on the disposition. The intent of the legislation was not to discriminate against foreign investors, but to treat them the same as U.S. persons by removing certain preferential tax treatment previously accorded them. The net result is that, like Americans, foreign sellers of U.S. real estate now must pay U.S. tax on their gain.

WITHHOLDING

A major problem with this legislation is that it can often be easily evaded. Since the tax is not due until a tax return is filed after the end of the year, a foreign person can sell his U.S. real estate, take the proceeds out of the United States and, since he is beyond the legal jurisdiction of the United States, not pay any tax to the United States on the sale. Moreover, through nominees and foreign corporations established in tax havens, he can reinvest these untaxed proceeds back in the United States with impunity.

The Senate version of this legislation sought to deal with this problem by requiring that the purchaser of the U.S. real estate withhold the tax that would be due on the sale. This is the method used to insure collection of tax on other payments of income to foreign persons, and in fact is used by almost all countries.

The conference dropped the withholding provision. The conferees were concerned about protecting withholding agents who might not know that a seller is really a foreign person. The conferees agreed that it would be neecssary to structure withholding provisions carefully to insure that they would not inadvertently disrupt the U.S. real estate market or expose U.S. buyers or U.S. agents of foreign sellers of U.S. real estate to liability where such liability is not appropriate.

Since last year, significant attention has been given to insuring that those entitled to protection are protected. The provision that I am introducing today meets the dual objectives of insuring the collection of U.S. tax due when foreign investors sell U.S. real estate, and protecting U.S. purchasers and their agents.

In lieu of withholding, the provisions of the real estate bill are currently being enforced through information reporting. This reporting can place a significant burden on those who are willing to pay the U.S. tax but who are afraid to identify themselves because of possible prosecutions in their home country. Furthermore, this will eliminate the problem of identifying owners of bearer shares. It will also relieve U.S. persons of significant paperwork. Adoption of withholding will enable some of these reporting requirements to be relaxed or eliminated.

The provision requires withholding by a purchaser, purchaser's agents, or any settlement officer or seller's agent where U.S. real estate is acquired from a foreign person.

The amount to be withheld is the smallest of: first, 20 percent of the sales price; second, the seller's maximum tax liability, discussed below; or third, the fair market value of that portion of the sale proceeds which is within the withholder's control. The seller's maximum tax liability is the maximum amount which the Treasury determines that the seller could owe on his gain on the sale plus any unsatisfied prior withholding tax liabilities of prior foreign owners with respect to that property

that, under the provisions of the amendment, the seller was required to withhold when he bought the property but failed to do so.

The withholding requirement would apply only if the purchaser knows or has received a notice that the seller is a foreign person. The seller is required to notify the purchaser, the purchaser's agent, and settlement officer that the seller is a foreign person. The seller's agent is also required to notify the purchaser that the seller is a foreign person if the agent has reason to believe that the seller may be a foreign person.

The withholding is thus required only if the purchaser has actual knowledge that the seller is foreign or has received notice that the seller is foreign. However, the seller's agent is relieved of any responsibility to give notice to a purchaser if he relies in good faith on a written statement of the seller—or, in the case of a seller's agent retained by another agent of the seller a written statement by that other seller's agent—that the seller is a U.S. person.

No withholding is required if the purchaser is to use the real property as his principal residence and the purchase price is $200,000 or less. Also, withholding is not required if the seller obtains a qualifying statement from the Treasury that he is exempt from tax or has provided adequate security for payment of the tax, or has otherwise made arrangements with Treasury for the payment of the tax. Furthermore, withholding is not required if the property being sold is stock of a corporation and the sale takes place on an established U.S. securities market.

The provision provides that a seller agent who does not carry out his obligation to provide notice will be required to withhold any of the purchaser's consideration he has within his control, including any compensation received by him in connection with the transaction.

Provision is made for the Treasury, upon request of the seller or any withholding agent, to reduce the amount of withholding otherwise required. Any request, as well as a request for a qualifying statement, must be acted upon within 30 days of receipt of the request.

The provision sets forth special rules for withholding by a domestic partnership, a trustee of a domestic trust, or an executor of a domestic estate. These persons will be required to withhold from amounts which such entities have in their custody and which are attributable to the disposition of a U.S. real property interest, but only if the amounts are income of a nonresident alien individual or foreign corporation, partnership, trust, or estate.

Special rules are also provided requiring withholding where a U.S. real property interest is distributed by a foreign corporation or is disposed of in a transaction which, under the general rules in the Code, would be a nonrecognition transaction. For example, it is intended that, where a foreign corporation distributes U.S. real property interest to its shareholders, it would be required to withhold a tax equal to 20 percent of the fair market value of the property reduced by the adjusted basis of the property.

TECHNICAL AMENDMENTS

Certain problems with the legislation have come to our attention. Due to the complexity of the legislation and its interaction with the nonrecognition provisions of the Code, and with U.S. income tax treaties, it can be argued that there are certain loopholes. While most, if not all, of the transactions are already covered by the present statute because of the great latitude given to the Secretary of the Treasury to prescribe regulations to prevent tax avoidance, clarification will help avoid any misunderstandings.

VIRGIN ISLANDS CORPORATIONS

Under present law, gains realized by foreign investors on the sale of U.S. real property are subject to U.S. tax unless the property is held by a Virgin Islands corporation. This arises because section 28(a) of the Revised Organic Act of the Virgin Islands provides that Virgin Islands corporations satisfy their U.S. income tax obligations by paying their tax on worldwide income to the Virgin Islands under the so-called mirror system. The mirror system means that the name "Virgin Islands" is substituted for the name "United States," and vice versa, wherever such names appear in the U.S. income tax laws.

For purposes of the Virgin Islands mirror tax, a Virgin Islands corporation is a domestic corporation and arguably may avoid tax on its capital gains if it sells its U.S. real estate and liquidates under the rules prescribed by section 337. It can be argued that gains realized by the foreign shareholders will also escape Virgin Islands tax, since section 897, as mirrored, can be read to impose a tax on gain from a disposition of a Virgin Islands real property interest, but not from a U.S. real property interest.

This problem does not exist for the other possessions of the United States.

The amendment would provide that a U.S. real property interest includes an interest in real property located in the United States or the Virgin Islands. Under this definition, a foreign shareholder of a Virgin Islands corporation would be subject to tax on gain on the disposition of property under the mirrored section 897.

To prevent double taxation, the amendment provides that a person subject to tax because of section 897 shall pay such tax and file the necessary returns with the United States with respect to real property interests in the United States, and with the Virgin Islands with respect to a real property interest located in the Virgin Islands. Sale of an interest, other than solely as a creditor, in a U.S. real property holding corporation shall be subject to tax in the United States while the tax on the sale of an interest in a Virgin Islands real property holding corporation will be paid to the Virgin Islands.

The source rules are amended to provide that gain on an interest in real property located in the United States is U.S. source income; gain on an interest located in real property in the Virgin Islands is foreign source income. This insures that the gain will be taxed as income that is effectively connected with the conduct of a trade or business in the United States or the Virgin Islands, as the case may be. This amendment will insure that a U.S. person subject to Virgin Island tax on the disposition of Virgin Island property can take a foreign tax credit against his U.S. liability for such tax.

PARTNERSHIP ASSETS

Current taxation applies to the disposition of an interest in a U.S. real property holding corporation, which is a U.S. corporation 50 percent or more of the fair market value of the assets of which consists of U.S. real property. If a corporation is a partner, only the U.S. real property of the partnership is taken into account for purposes of determining whether a corporation is a U.S. real property holding corporation.

The amendment provides that for purposes of determining whether a corporation is a U.S. real property holding corporation, the corporate partner takes into account its proportionate share of all assets of the partnership. Thus, for example, the corporate partner would count its proportionate share of the foreign real estate of the partnership. The same rules apply to trusts and estates in which a corporation has an interest. The amendment also makes clear that the same rules apply to a chain of successive partnerships, trusts or estates.

TAXATION IN CARRYOVER BASIS CASES

Under present law, the Treasury has the authority to override the nonrecognition provisions of the Code in the case of certain transfers of a U.S. real property interest. Some taxpayers have apparently questioned the Treasury's authority to do this where the basis of the property carries over to the new holder. The amendment makes clear the Treasury's authority to provide for recognition of gain where a carryover basis transaction is entered into for the purpose of avoiding Federal income tax on the transaction. Taxation is specifically provided for if, at the time of receipt of the property, the distribution would not be subject to tax on a later disposition of the property by the recipient.

NONDISCRIMINATION

U.S. income tax treaties generally contain a provision that provides for nondiscriminatory tax treatment by the treaty partners of U.S. residents and residents of the treaty partner. A similar provision is contained in some friendship, commerce and navigation treaties. Some taxpayers are of the view that these provisions override the foreign investment in U.S. real estate rules. Present law avoids any possible claim that a foreign corporation is discriminated against by allowing a foreign corporation that has a permanent establishment in the United States to elect to be treated as a domestic corporation, but only if, under a treaty, the permanent establishment may not be treated less favorably than domestic corporations carrying on the same activities. The treaties are overridden by the legislation, but not until 1985.

Despite this provision and the intent of Congress, we understand that some taxpayers may be taking the position that because of technical problems under old treaties, they cannot make the election and therefore are being discriminated against. This enables taxpayers to plan around the provision.

The amendment makes clear that under section 897(i), any foreign corporation may make an election to be treated as a domestic corporation for purposes of section 897 of the Code and the related reporting requirements if the corporation owns a U.S. real property interest, and, under any treaty obligation of the United States, the foreign corporation is entitled to nondiscriminatory treatment with respect to that interest.

The election may be revoked only with consent of the Secretary. The election can be made only if all shareholders of the corporation at the time of the election consent to the election and specifically agree that any gain from the disposition of the interest after June 18, 1980, the effective date of the original legislation, which would be taken into account under the legislation will be taxable even if such taxation would not be allowed under a treaty to which the United States is a party. If a class of interest is traded on an established securities market, then the consent need only be made by a person who held more than 5 percent of that class of interest.

The amendment also makes clear that the election provided by this provision is the exclusive remedy for any person claiming discriminatory treatment because of sections 897 or 6039(C) or both of them.

INDIRECT HOLDINGS

The amendment would make clear that for purposes of determining whether a corporation has substantial U.S. real property investors, and therefore must report, the foreign corporation must look through to the assets of any U.S. corporations in which the foreign corporation has an interest.

CONTRIBUTIONS TO CAPITAL

Under present law, an argument has been made that a foreign investor can avoid paying U.S. tax on their gain from the disposition of a U.S. real property interest through the device of contributing that interest to the capital of a foreign corporation in which he is a shareholder. The amendment clarifies present law by specifically providing that gain will be recognized on such a transaction to the extent of the fair market value of the property transferred over the adjusted bases and any other gain recognized by the transferor.

LIQUIDATION OF FOREIGN CORPORATIONS

Under present law, a foreign corporation is taxed when it sells or exchanges a U.S. real property interest. Taxation applies even if the sale would otherwise be tax-free under the nonrecognition liquidation provisions of the Code. Under the legislation as reported by the Senate Finance Committee on December 15, 1979, and the House Ways and Means Committee on June 18, 1980, a foreign corporation could have taken advantage of the tax-free liquidation provisions, but the foreign shareholders would have been taxed on the exchange of their stock, which was a real property interest, for the property distributed.

In the case of a U.S. person acquiring the stock of a foreign corporation from a foreign person between December 15, 1979, and November 26, 1980, it would have been reasonable to assume that the tax, if any, due with respect to the unrealized appreciation of the U.S. real estate would have been borne by the foreign seller of the corporation's stock. The conference action shifted that burden to the liquidating corporation—effectively the acquiring shareholders. Thus, in the case of an acquiring U.S. corporation, it now owns the stock of a foreign corporation that has a substantial tax liability due on its U.S. real estate. In contrast, if the U.S. corporation had acquired the stock of a U.S. corporation, it could have liquidated the corporation without a tax liability and received a step-up in basis of the U.S. real estate to its fair market value.

The amendment would allow foreign corporations that were acquired during the period that began before November 26, 1980, to elect to be treated as a U.S. corporation for purposes of liquidating under section 334(b)(2) of the Code. This will enable those corporations to liquidate tax-free with a corresponding step-in basis of the U.S. real estate in the hands of the U.S. purchaser corporation. As a corollary, a selling foreign shareholder would be taxable on the sale of stock of an electing foreign corporation if the sale occurs after June 18, 1980. This is the treatment they anticipated before the conference.

A separate problem arises in situations where a U.S. individual has held stock of a foreign corporation which holds U.S. real estate. Under present law, upon a 12-month liquidation of the foreign corporation, there would be a tax at the corporate level on the U.S. real property interest, as well as a tax at the shareholder level. If the acquired corporation had been a U.S. corporation, the liquidation could have been accomplished tax-free at the corporate level with a tax remaining at the shareholder level. The double tax in the case of U.S. shareholders of foreign corporations was not intended.

The amendment relieves this burden by giving U.S. shareholders who acquired their interests prior to the effective date of this legislation a credit against any tax imposed on them on the surrender of their stock in the liquidating foreign corporation. The credit is equal to the tax imposed on the liquidating foreign corporation on the sale of the U.S. real property. This rule would apply only if the U.S. persons continuously held the stock since June 18, 1980, the effective date of the legislation.

APPLICATION OF TREATIES

Public Law 96-499 provided that existing treaties will take precedence over the real estate legislation until January 1, 1985. However, if a new treaty is negotiated to resolve conflicts with this legislation, the provisions of the old treaty will apply for 2 years after the new treaty is signed. The effect of this effective date provision on treaties with countries with which we already signed a treaty is unclear.

The amendment would make clear that, in order for a new treaty to begin the 2-year period, it must have been signed on or after January 1, 1981, and before January 1, 1985. It also makes clear that the old treaty with that country will take precedence over the legislation for 2 years after the new treaty is signed, even if that 2-year period ends after December 31, 1984. If a new treaty was signed before January 1, 1981, the old treaty will continue to apply until December 31, 1984, or, if earlier, until the new treaty is ratified.

EFFECTIVE DATE

These provisions apply to dispositions after June 18, 1980.

REVENUE EFFECT

This provision increases revenue by $73 million in fiscal year 1982, $6 million in 1983, and $9 million in 1984 and thereafter.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BENTSEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BENTSEN. Mr. President, I ask unanimous consent that such amendments now being considered be temporarily laid aside so that I may propose an amendment which I believe has been agreed to by the manager of the joint resolution and I believe will be acceptable to all Members involved.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 309

(Purpose: To provide for a 1 percent limit on the percentage limitation on additions to loan loss revenues by banks for 1982)

Mr. BENTSEN. Mr. President, I have an amendment at the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Texas (Mr. BENTSEN) for himself, Mr. CRANSTON, Mr. PROXMIRE, Mr. BOREN, Mr. SYMMS, Mr. DANFORTH, Mr. D'AMATO, and Mr. ZORINSKY, proposes an unprinted amendment numbered 309.

Mr. BENTSEN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, insert the following new section:

SEC. . LIMITATION ON ADDITIONS TO BANK LOAN LOSS RESERVES.

(a) IN GENERAL.—Subsection (b) of section 585 (relating to addition to reserves for bad debts) is amended—

(1) by striking out "but before 1982; and 0.6 percent for taxable years beginning after 1981" in the first sentence after subparagraph (b) of paragraph (2) and inserting in lieu

thereof "but before 1982; 1.0 percent for taxable years beginning in 1982; and 0.6 percent for taxable years beginning after 1982", and

(2) by striking out "but before 1982, the last taxable year beginning before 1976, and for taxable years beginning after 1981, the last taxable year beginning before 1982" in the last sentence of such subsection and inserting in lieu thereof the following: "but before 1983, the last taxable year beginning before 1976, and for taxable years beginning after 1982, the last taxable year beginning before 1983"

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply with respect to taxable years beginning after 1981.

Mr. BENTSEN. Mr. President, this is an amendment to deal with the question of the reserve for loan losses. We have a type of monetary policy that we have not experienced before in the country, and we are treading some water that can be quite deep.

We are seeing an increase in bankruptcies in the country. I frankly do not think it is appropriate at a time like that to reduce the reserve for loan losses. As to the reserve for loan losses, the present procedure for the diminishing of that percentage was started in 1969. It is now at 1.2 percent and at the beginning of next year will go to six-tenths of 1 percent.

We have seen some of the problems with the thrift institutions in this country. I do not want to see in any way their being duplicated by any of the other financial institutions such as banks.

At the present time, the banks have no such problems, but obviously bankruptcies on their loans are going up and I think we are going to see their losses on loans escalate substantially.

I have discussed this matter with the manager of the joint resolution. I have discussed it with Treasury as he has, I believe. There is agreement by all the parties that I have mentioned that we modify the original amendment that I had introduced that would have sustained it at 1.2 percent and that for the next year starting January 1982, instead of going from 1.2 percent it will go to 1 percent. And during that period of time we will see what happens concerning the bankruptcy rate in the country and what effect the monetary policy might have and, of course, if hearings were called during that period of time that also would be of interest, I should think.

I yield to the manager of the joint resolution.

Mr. DANFORTH. Mr. President, under the Tax Reform Act of 1969, the percentage limitation on the amount of the deduction allowable to banks for additions to their reserve for loan losses will drop at the end of 1981 from 1.2 percent to 0.6 percent. In addition. this 0.6-percent limit is scheduled to drop to zero in 1988 at which time the bank loan loss reserve deduction must be computed by the experience method.

Several of my constituents have expressed concern over these scheduled changes. Some have said that they believe the experience method does not accurately reflect bank loan reserve requirements because it is designed to predict only the next year's losses, not losses inherent in a loan portfolio which will occur in subsequent years. Others have pointed out that bank loan losses have been increasing dramatically during the years since the 1969 act was passed.

During the 1970's, Mr. President, the total for the banking system as a whole averaged $2.07 billion per year, compared with an average of about $300 million during 1960–69. In the worst years, 1975 and 1976, net loan losses were well over $3 billion as compared with less than $450 million in 1967, the worst year for loan losses during the three decades preceding the passage of the Tax Reform Act of 1968. Arthur D. Little, Inc., has determined in a March 1981 study that a reserve of 1.3 percent would be necessary to provide an adequate reserve for loan losses.

Mr. President, I believe that the tax law should encourage banks to maintain their reserves for loan losses at adequate levels. I am concerned that the scheduled changes in this area may actually discourage retention of loan loss reserves at prudent levels. I am pleased to join in cosponsoring this amendment which will provide Congress a period of time to examine this question while encouraging banks to maintain their reserves for loan losses at adequate and prudent levels.

Mr. BENTSEN. Mr. President, I ask unanimous consent that the Senator from Nebraska (Mr. ZORINSKY) be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I wonder if the Senator from Texas would mind if the Senator from Missouri (Senator DANFORTH) joins him in this amendment?

Mr. BENTSEN. I am delighted.

Mr. DOLE. And the Senator from New York, Senator D'AMATO.

Mr. BENTSEN. Of course. I am very pleased to have them as cosponsors.

Mr. DOLE. Mr. President, I so ask unanimous consent.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, the Senator from Texas is correct in his statement, and we have no objection to the amendment.

He has discussed this, I might add, with Treasury officials a number of times. They have come to an agreement which I think is a good agreement. I think it is needed.

I commend the distinguished Senator from Texas for his efforts on this amendment.

We are willing to accept the amendment.

I assume it has been discussed with the distinguished Senator from Louisiana.

Mr. BENTSEN. I have discussed it with the Senator earlier. He was in one of the meetings where we discussed it.

Mr. President, I yield back the remainder of my time if that is agreeable.

Mr. DOLE. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Texas.

The amendment (UP No. 309) was agreed to.

Mr. BENTSEN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LONG. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, while the Senator is in the Chamber, I think there are two other amendments. Does the Senator plan to call up any other amendments? We wish to complete action today. There is one on stock options, which I understand is contingent upon with respect to what happens to the pending amendment. We are trying to reach some agreement on that. And the other one is on qualified progress.

Mr. BENTSEN. I have no plans to bring up the one on qualified progress payments.

Mr. DOLE. And the other one depends on the disposition of this amendment?

Mr. BENTSEN. The other one depends on what happens to the Senator's amendment.

Mr. DOLE. Does the Senator mind if we remove the other one from our list?

Mr. BENTSEN. I have no objections to that.

Mr. DOLE. I thank the distinguished Senator.

Mr. BENTSEN. Mr. President, I thank the distinguished manager of the bill.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CHILES. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 310

Mr. CHILES. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Florida (Mr. CHILES), for himself, Mr. NUNN, and Mr. BOREN, proposes an unprinted amendment numbered 310.

Mr. CHILES. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, add a new section, as follows:

"SEC. . Resolution Regarding the Protection of Small Businesses, Financial Institutions and Farms and the Housing Industry.

Since the intent of Congress in passing this Tax Reduction Act is to promote capital formation and economic growth; and

Since these persistent high interest rates are threatening the continued existence and financial viability of American small thrift institutions, small banks, small businesses and farms, the residential construction industry and not-for-profit institutions which depend on the availability of credit; and

Since there appears to be a substantial threat of small thrift institutions and banks being absorbed into large institutions; and

Since the Congress believes that there

should not be a weakening of anti-trust procedures, which in combination with high interest rates is further promoting the current trend of large firms taking control of small ones, even where there may be no economic benefits; and

Since a massive amount of credit has recently been diverted from use as the source of capital for expanded production to use as the medium for such corporate takeovers, which further concentrates economic power in large firms and further restricts the availability of credit for small concerns;

It is therefore the sense of the Senate that:

(a) the President should adopt policies so as to ensure the continued financial health, independence and availability of credit to small businesses, thrift institutions, small banks, small farms, residential construction and not-for-profit institutions; and that

(b) the Board of Governors of the Federal Reserve System should exercise its regulatory powers to require that loans be made for productive economic purposes, rather than to enable large firms to acquire smaller firms, and to assure that sufficient credit is available to protect the viability of thrift institutions without wholesale mergers or takeovers; and that

(c) the President of the United States, the Board of Governors of the Federal Reserve System and the Congressional Budget Office shall each report to Congress on the actions taken to implement the above policies, and their success or failure, no later than January 1, 1982 and no later than January of each succeeding year."

The PRESIDING OFFICER. The pending business is the amendment of the Senator from Kansas.

Mr. DOLE. Mr. President, I ask unanimous consent that my amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHILES. On behalf of myself, Senator NUNN and Senator BOREN, I present this amendment expressing the sense of the Senate regarding the disastrous effects of high interest rates, and the necessity of providing adequate credit to small businesses, financial institutions and farmers, and to the housing industry.

Mr. President, we have been concerning ourselves for a number of days now with a part of the President's economic program, the tax cut bill. The theory of that tax cut is that it will stimulate economic recovery by promoting capital formation and investment, the so-called supply-side approach.

Right now we are near completion of the conference on the reconciliation bill.

I think that when the conference committee comes back we are going to find that our spending cuts are going to be in excess of the requests that were actually made by the President, approximately $38 billion to $39 billion a year will be cut in the reconciliation process. Even with those cuts we are still operating the budget at a deficit. It means that the tax cut is all going to be written in red ink.

The only rationale for having a tax cut at a time when you are not taking in enough money to pay your bills, it appears to me, is if the tax cut, is designed to generate further industrial capacity, further productivity; that we are going to create additional jobs; that we are going to stimulate the manufacture of additional products; that we are going to further improve the profitmaking potential of industry and help our foreign trade picture. For these reasons, we are talking about a supply-side tax cut that will take care of these problems. But that tax cut is not going to help if high interest costs keep businesses from earning a profit.

There has been much debate as to how this tax cut should be shaped to get these kinds of supply-side investment results. I think we are seeing that there are other factors that are acting in our economy, policies that tend to work against the success of the very theory of the supply-side tax cut that we are talking about. To wit, we are seeing a monetary policy which is restrictive. That is at the direction of the chairman of the Federal Reserve Board, at the direction of the President of the United States, and at the urging, I think, of many in the Congress who have talked about not having a loose monetary policy.

The reason we were talking about restricting that monetary policy was to hold down inflation and thereby do something about interest rates.

But while we are having that tightening of the overall supply of money, we see that we are having a dual system develop in the country as to who is going to get the money that is available—small business, farmers, medium-size business people, couples trying to build their first house who find that the availability of credit is too tight for them. If credit is available, it is available at a very, very high interest rate, 18, 19, 20 percent.

Small businesses that have to finance their inventories and finance the equipment that they are buying have to pay these tremendous interest rates. Therefore, of course, they have to raise their prices if they are able to pay such tremendous interest. That, in turn, goes completely against what we are trying to do to stabilize the economy.

But at the same time that we are having this kind of a credit squeeze for small business we see that there is readily available credit in huge, enormous sums for the largest of the corporations that are now engaged in a program of conglomerate mergers, a program of takeovers, a program of the giants deciding to eat anything that is smaller than they are.

We see that capital is readily made available for them.

We are looking at the proposed takeover of Conoco, the ninth largest oil company in this country, a company that is certainly sound, that has a lot of cash in the bank. Now we are seeing a bidding war going on with a number of our other corporations and even the corporations of Canada entering into that war of who is going to eat Conoco, who is going to buy up Conoco. Each one of the giants engaging in this merger operation are able to have the large banks set aside $5 billion to $10 billion in a line of credit for their takeover. That money, Mr. President, comes out of the flow of funds that should be available for the rest of business borrowing, for small business and the farmer and the housing industry. That further tightens up the monetary supplies.

I cannot find anyone who can tell me that that merger is going to create a single new job; is going to create any new research and development, any new technology, any new productivity, even, when companies of that size are beginning to merge.

At the same time that the administration and Federal Reserve are saying we are going to have a restrictive monetary policy, that we are going to tighten up on the money supply, then we have the giants borrowing this kind of money. We know that any time times get a little tight, the banker is going to lend money to his best customer, he is going to make the surest or safest loan. To anyone else who gets that money, we know that the interest rate is going to be considerably higher. That is exactly what is happening today.

So, Mr. President, at the very time that we are trying to pass a tax bill that we hope is going to add to our economy, we see this other phenomenon taking place.

Mr. President, I frankly think the wrong signals have been sent. I think when the Attorney General has said big is not bad, when he has said that we are going to look at horizontal mergers but we are not going to spend as much time looking at vertical or conglomerate mergers, that, together with some other remarks that have been made, has helped trigger the merger race. The race is on now. So we see Conoco as just the first of what we are seeing as one of many potential merger operations that are going on. We have had these merger waves before and they do not add anything worth while to the economy.

The question is, should we have this kind of concentration of economic power into a few large firms as a national policy? Should we say we are throwing out our antitrust policy and just going to allow the big to take over? Should we say, as again, I am afraid the signal has been sent, if the thrift institutions are in trouble, that is too bad; they can be merged with other healthy thrift institutions and if there are not enough healthy thrift institutions, the banks will come in and merge the rest. Then we will see that the local savings and loan associations as we have known them, as they were created by Congress, to make money available for housing, will simply disappear. And we will have bigger and larger banks, more centralized control.

What do those bigger banks do? They make more money available for bigger corporations. What do the bigger corporations do? They take that money that is available and go buy smaller corporations. So what we are seeing triggered here is a tremendous amalgamation of giant and giant, at the expense of what I think is the base of our overall economy. That is, a healthy, small- and medium-sized business sector.

It is certainly the basis of the economy in my State and, I think, of many States. But we see those people starving for capital, dying at the high interest rates. At the same time, we are seeing the mergers go on.

Mr. President, last week, Mr. Beryl Sprinkel, the Under Secretary of the Treasury for Monetary Affairs, testified before Congress. He said Federal deficits do not affect inflation. Mr. President, Mr. Sprinkel may well believe that, but I do not believe that statement and I do not think the American people believe it, and I do not believe the investors believe it. It seems to me that Federal deficits do affect inflation. If they do, then we have to be concerned where we have our deficits and what that money is going for; and, of course, we have to try to see that we do something about that.

We were told, Mr. President, when we set out on this new economic direction of spending and tax cuts, that if we would make these cuts, we would see both inflation and interest rates go down; and the minute that inflation went down, interest rates would go down. Well, a curious thing has happened, Mr. President. Inflation has gone down. However, Mr. President, it probably occurred not because of any action we have taken to date, although we would like to think that it has, but primarily because of the oil glut and favorable food prices. In spite of the fact that inflation has gone down, and gone down quite appreciably, interest rates have not followed them down. The spread between inflation and interest rates is at an alltime high.

Why has that happened, Mr. President? I think it has happened because of this kind of policy that we see taking shape. The tax cut being enacted are much larger than the cuts in overall Federal spending. When tightened monetary supply is left to offset the inflationary effects of continued deficits, then interest rates have to go up.

The sense-of-the-Senate resolution that we have presented is to state that as these high interest rates are threatening the continued existence and financial viability of American small thrift institutions, small banks, small businesses and farms, the residential construction industry, and not-for-profit institutions which depend on the availability of credit; and since there appears to be a substantial threat that many of these small thrift institutions and banks will be absorbed into large institutions; and since the Congress believes that there should not be a weakening of antitrust procedures—which, if there were, and there appears to be now, in combination with high-interest rates—would be further promoting the current trend of large firms taking control of small ones, even where there may be no economic benefits.

Since a massive amount of credit has recently been diverted from use as the source of capital for expanded production to use as the medium for such corporate takeovers, which further concentrates economic power in large firms, the Senate should therefore go on record as saying that the President should adopt policies to insure the continuation of the financial health, independence, and availability of credit to small businesses, thrift institutions, small banks, small farms, residential construction, and not-for-profit institutions; and that the Board of Governors of the Federal Reserve System should exercise its regulatory powers to require that loans be made for productive economic purposes—I stress productive economic purposes, Mr. President—rather than to enable large firms to acquire smaller firms, and to assure that sufficient credit is available to protect the viability of thrift institutions without wholesale mergers or takeovers; and that the President of the United States, the Board of Governors of the Federal Reserve System, and the Congressional Budget Office shall each report to Congress on the actions taken to implement the above policies, and their success or failure, no later than January 1, 1982 and no later than January of each succeeding year.

Mr. President, what we are saying is that it is time that the President, the Chairman of the Federal Reserve System, and the leadership of Congress should get their heads together and sit down at some kind of domestic economic summit meeting and come to some agreement as to the course and direction they are taking; that we should not have monetary policy going one way and fiscal policy going another; that we should not have a dual monetary policy, with tight money for small businesses, tight money for farmers, tight money for homebuilders and people trying to borrow money, and readily available money for the largest corporations for great big takeovers.

We have written to the President and Chairman of the Federal Reserve Board requesting such a summit, and I ask unanimous consent that a copy of our letter appear in the RECORD.

The PRESIDING OFFICER. Without objection it is so ordered.

(See exhibit 1.)

Mr. CHILES. Mr. President, I think it is important to remember that President Reagan asked us to enact this tax cut bill as part of an overall program for economic recovery, as part of a supply-side recovery that would create jobs by promoting capital formation and productivity. I support that kind of new direction in economic policy. And I support the key elements necessary to bring it about: cutting Federal spending, lowering taxes, and reducing the burden of Federal regulation. But that tax cut is not going to help investment and productivity if high interest rates keep businesses from making a profit. You cannot have good supply side economic effects with a 20-percent prime rate.

As I have watched the economy respond over the last 6 months and compared it to what has happened in past years. I continually reminded how complex the American free enterprise system is. We can never anticipate all the effects of Federal policy, and we have to keep ourselves ready to respond when the expected occurs. I am concerned that the reactions of the administration to changing economic events have moved us away from a policy of fostering free competition and innovation in the economy. It looks to me like the administration is moving us to a dual economic policy, where the giant corporations get big tax breaks and access to bank credit, while small business borrowers and consumers get squeezed out.

When we set out on this new direction last March, we had both high inflation—11 percent—and high interest rates—19-percent prime. We know that we needed tight fiscal and monetary policies to bring down inflation and strengthen the U.S. dollar. We then expected to go in with a tax cut that would stimulate private economic activity to take the place of the public spending which was eliminated. The administration told us that inflation would go down, productivity would go up, and interest rates would fall. Unfortunately, that has not happened. While inflation has gone down, largely due to slack oil prices, interest rates have stayed high. Disastrously high.

The administration's economic experts have publicly stated that they are puzzled by the persistence of high interest rates. The economic experts I have consulted tell me there are several factors involved. For one thing, the Federal Reserve has kept up a tight monetary policy, which is consistent with the administration's announced policy. Second, there remains tremendous uncertainty in the markets. No one knows whether this tax cut will produce a balanced budget or an $80 billion deficit. The money markets are acting like it is the latter. They are led to that conclusion both by the numbers they see, and by the statements of the administration. Last week Mr. Beryl Sprinkel, the Undersecretary of the Treasury for Monetary Affairs, testified that Federal deficits do not affect inflation.

Mr. President, I do not believe that statement, the American public does not believe it, and the Nation's investors do not believe it. If the Federal Reserve accommodates the extra Federal borrowing by printing more money, we will have more inflation. If the Fed does not monetize the deficit when we have a continued high level of private loan demand, then the Federal borrowing has to compete with private demand and interest rates will go up. Undersecretary Sprinkel seems to be forgetting that the laws of supply and demand apply to money in the same way they apply to goods. If the Federal deficit adds to demand for money, and the Federal Reserve does not increase the supply of money, the price has to go up.

This administration also seems to be ignoring the fact that in our fast moving economy, commercial borrowing is an ordinary cost of doing business. With 10-percent inflation and 20-percent interest rates, no one can afford to keep piles of cash on hand to pay for inventory and operating expenses. Every business needs access to credit. When high interest rates drive up the cost of credit, it gets passed on as higher prices. So that is the other way in which the combination of large Federal deficits and tight monetary policy add to inflation.

No one knows how long the oil glut will last, and when OPEC will be able to get another shot at raising oil prices; or whether turmoil in the Middle East will interrupt our supply of oil. No one knows how the U.S. economy will respond to all the different changes it has to go through all at once, finally, the markets have learned that Americans will borrow at

high rates, and they are charging what the market will bear.

The result is a prime rate that is staying around 20 percent, mortgage interest rates over 16 percent and short-term Treasury bill rates that just last week went up from 14 percent to almost 16 percent.

The administration does not seem particularly disturbed by these high interest rates. When the Secretary of the Treasury sees the Nation's thrift institutions running losses because of their high cost of attracting savings, he says that the thrifts should be absorbed into mergers with large banks and other financial institutions. He does not want the Federal guarantee agencies to offer any kind of assistance while we wait for interest rates to all.

Well, Mr. President, I am disturbed when I see the threat of losing our local banks and thrift institutions in a large scale wave of mergers. But I am even more disturbed when I see this threat as part of an overall pattern which threatens the continuation of small businesses in America.

I am all for competition in the free market; that is the core of the American economy. But if interest rates stay artificially high, then small firms are denied the credit they need to stay afloat, to cover their inventory costs as well as expansion. When money is tight, banks want to lend only to their largest, safest customers. Who gets squeezed out? The new small business that is taking a risk by trying a new product or new manufacturing process is the one who gets squeezed.

We all want to see a rebirth of industrial innovation, but that cannot occur without assuring a supply of credit to small firms.

No one suffers more from high interest rates than the housing industry. Housing starts are down to a little more than a million a year, which is only half of the 1978 level, and only half of what we need to keep up with the demand created by the formation of new households each year. Even as short-term interest rates have fluctuated, the mortgage interest rate has climbed steadily to over 16 percent. The average American just can't afford to buy a home at that cost.

Mr. President, the National Association of Home Builders, certainly a representative group of a viable sector of our economy that is drastically affected by this—as are automobile dealers, all of housing is vitally affected, all of our service industries—has written a letter expressing support for this sense of the Senate resolution.

Mr. President, I ask unanimous consent to have printed in the RECORD that letter supporting my amendment.

The letter points out that in addition to hitting the homebuyer, high interest rates are causing a severe rate of failures in the construction industry. This is just one more example of how high interest rates are eliminating small businesses, and only letting the large ones survive.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2.)

Mr. CHILES. Mr. President, I see the administration announcing that it is going to revise the anti-trust guidelines that have been in place since 1968. They want to make conglomerate mergers easier. This comes at the same time that we see the banks making billions of dollars of scarce credit available to huge companies like DuPont to acquire unrelated firms. Yet the administration and the Federal Reserve Board are doing nothing about this diversion of capital away from productive enterprise and into acquisitions.

Attorney General William French Smith announced the administration's intentions to revise antitrust laws in an address to the District of Columbia bar on June 24. While I agree with his statement that big is not necessarily bad, I must add that big is not necessarily good. I also agree with his statement that we must adopt a dual approach to antitrust policies and modify those antitrust provisions that unfairly handicap American firms when they deal in world markets. But I am not convinced that the Attorney General's formulation adequately protects competition in the domestic economy.

Two things disturb me in his formulation. First, he speaks only of enforcing the provisions that limit anticompetitive horizontal mergers, or those mergers designed to acquire a larger share of the market. He rejects the anticompetitive nature of any vertical merger, or merger to assure certain sources of supply at certain prices. Vertical integration is not always anticompetitive, but it often may be, such as where a supplier may discriminate between the parent firm and all others in pricing its products. Even worse, the Attorney General makes no commitment to limit conglomerate mergers, which is what the tens of billions of dollars in bank credit is now being diverted to.

The economics literature seems generally agreed that conglomerate mergers do not add anything of real value. Concluding the evidence from a review of the literature, Dennis C. Mueller quotes T. F. Hogarty, as follows:

> What can fifty years of research tell us about the profitability of mergers? Undoubtedly the most significant result of this research is that no one who has undertaken a major empirical study of mergers has concluded that mergers are profitable. A host of researchers . . . have but one major difference: whether mergers have a neutral or negative impact on profitability.

If mergers do not yield higher profits, then who pays for them? The literature also shows that acquiring firms pay a substantial premium to the stockholders of the firms they buy up. Right now, they are paying 20-percent interest rates to finance their acquisitions. Who pays? The consumer and the taxpayer.

Since interest costs are tax deductible, the taxpayer bears a substantial cost of such borrowing. The remaining cost has got to be passed on as higher prices to the customers of the merged firms. Instead of getting higher productivity and lower inflation out of capital investments, all we get is higher prices. Yet the administration is not concerned.

The second aspect of the Attorney General's speech which concerns me, Mr. President, is that he made his commitment to antitrust enforcement strictly in the simple terms of the Sherman Act of 1890. The Sherman Act is only effective in reaching mergers which would create an undisputed monopoly. By 1914 Congress realized that you could raise prices by reducing competition short of total monopoly, and enacted the Clayton Act. The Clayton Act says that mergers should be prevented if they "substantially lessen competition." I certainly hope the Attorney General intends to enforce the Clayton Act, and not just the Sherman Act, or we are going to find ourselves with a few large firms raising prices in each industry.

Surely, Mr. President, economic revitalization means that we are going to have some shaking out of competing firms, with only the more efficient ones remaining. And I agree that big is not necessarily bad; we need huge corporations to compete in tough world markets. But big is not necessarily good either. We cannot foster a set of conditions where only big businesses have access to the economic lifeblood of credit. Big businesses are not always the most efficient or most innovative. Yet they always have the greatest access to credit.

In summary, Mr. President, I believe that we must recognize that the American economy is going through a difficult transition. We must take whatever steps are necessary to see that our competitive structure of small business and small farms, local banks and small thrift institutions have a fair chance to survive.

I, therefore, hope the Senate will adopt this amendment and put us on record for a truly productive economic policy.

EXHIBIT 1

U.S. SENATE,
COMMITTEE ON GOVERNMENTAL AFFAIRS,
Washington, D.C., July 24, 1981

THE PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: We have given support to the general direction of the Administration's economic program here in the Senate. We share your belief that a reduction of federal spending, federal taxes, and the federal regulatory burden is essential for increased productivity, reduced inflation, and economic revitalization.

We are vitally concerned, however, with the apparent absence of coordination between the fiscal and monetary policies of our government. The current fiscal and monetary policies of our nation appear to be on a path where significant conflict, if not a head-on collision, is imminent.

The continuation of the high interest rate pattern of the past few months, if allowed to persist, will cause irreparable damage to our economy. We are beginning to have a dual economic policy—a boom to those with available capital—a depression for those who must borrow and for businesses depending on long-term credit.

When giant corporations borrow tens of billions of dollars for corporate takeover purposes that make no contribution to job creation and productivity, and potential home buyers cannot find affordable mortgage money, it is time for a reexamination of national economic and anti-trust policy. We also think it would be appropriate in this context for the Administration to re-examine

recent policy statements which may have encouraged massive borrowing for merger purposes.

Officials of the Administration and the Federal Reserve have repeatedly said that once inflation abates and the public is shown that federal spending will be cut, interest rates would begin to decline. Just recently on May 8, Federal Reserve Board Chairman Paul Volcker said, "interest rates will come down and stay down as we make progress on inflation."

Today inflation is declining but mortgage interest rates are not. While consumer price increases declined from 9.6 percent in the first three months of this year to 7.4 percent in the most recent three months, the mortgage interest rates remain entrenched at 16 percent. Historically the spread between mortgage interest rates and the rate of inflation has been about 2 percent. Now, however, the interest rate/inflation rate spread has ballooned to 6 to 7 percentage points which implies to many that this is a planned and deliberate policy.

The Administration's economic advisers, according to Mr. William Niskanen, a member of the Council of Economic Advisers, are currently both "confused" and "puzzled" by continuing high interest rates. Yet reports from the recent Ottawa summit indicated you endorsed and vigorously defended the high interest rate policy of the Federal Reserve.

Just today the Washington Post reported that Treasury Undersecretary for Monetary affairs Beryl Sprinkel told the House Committee on Banking, Finance and Urban Affairs that there is no technical, and no necessary, connection between budget deficits and money growth, or between deficits and inflation.

We could not disagree more. Either the government finances a deficit by printing money or by competing with and crowding business out of the credit markets. Printing money to finance deficits results directly in more inflation. Increasing federal borrowing affects inflation by forcing up interest rates, and increasing business costs. Eliminating federal deficits and reducing federal borrowing requirements are necessary for both psychological and substantive economic reasons, and must be accomplished at the earliest possible time.

If the high interest rates continue, the Administration's supply side economics cannot work. The survival of our small business and farming community is threatened, many thrift institutions are in serious financial trouble, and the housing industry is near collapse. The majority of businesses, particularly small businesses, will not be able to finance inventories, let alone capital improvements. A tax cut will mean little to small businessmen and farmers who make no profit to be taxed because of exorbitant interest rates.

In summary, Mr. President We urge you to address these serious problems before it is too late to moderate the Administration's fiscal program. As we see it, the question is whether the anticipated stimulative effect of the Administration's fiscal program has so overloaded the system that continued long-term high interest rates are the inevitable result. If your Administration does not advocate a continued high interest rate policy, we hope that it will let its views be known to the financial community and persuade them to take action to moderate interest rates.

In this regard, we respectfully suggest a "domestic economic summit" meeting with a full dialogue between you as President, Chairman Volcker of the Federal Reserve and Congressional leadership. We would hope out of that meeting there would emerge a coordinated cohesive fiscal-monetary policy which can be clearly understood by the American people.

We do not expect an instant cure, but we do believe it is possible to achieve a moderation of interest rates and avoid major credit shortages if our Nation's fiscal and monetary policies are coordinated.

We offer you our bipartisan support in this effort.

Sincerely,

SAM NUNN,
LAWTON CHILES,
DAVID L. BOREN,
J. JAMES EXON,
J. BENNETT JOHNSTON.

EXHIBIT 2

NATIONAL ASSOCIATION OF HOME BUILDERS,
Washington, D.C., July 27, 1981.

Hon. LAWTON CHILES,
United States Senate,
Washington, D.C.

DEAR SENATOR CHILES: On behalf of the more than 123,000 members of the National Association of Home Builders, I am writing to express our support for your amendment to H.J. Res. 266, the Economic Recovery Act of 1981, a resolution regarding the protection of small business, troubled financial institutions, the depressed housing industry and farms.

As you are aware, record high mortgage interest rates are having a devastating impact on the housing industry. Housing starts last month were down to an annual rate of 1.03 million, almost 50 percent below the peak level of 2.02 million in 1978. We are currently in the midst of the longest housing recession since World War II. The NAHB forecast for 1981, which assumes some moderation in interest rates by the end of the year, estimates that fewer than 1.2 million housing units will be started this year. Housing starts in the 1.2 million range are dangerously below the projected need of up to 2 million units a year during this decade. And pent-up demand will only build up inflationary pressures on housing prices in the future.

High interest rates have dramatically increased the failure rate in the construction industry. In February 1981, failures among general building contractors were up 11 percent over the February 1980 rate. Subcontractor failures were more severe, with the number of failures up by 94 percent. This is particularly significant since the comparisons for 1981 are being made with 1980—the worst year for construction failures on record. If interest rates do not fall in the near future, the unfortunate result will be that many more businesses will fail.

The precipitous drop in housing starts has had a significant impact on the overall economy by raising the unemployment rate in the construction trades. The official construction unemployment rate is 16.6 percent and over 835,000 wage and salary workers are out of jobs.

First-time homebuyers in particular have been priced out of the housing market by high interest rates. Each one percent increase in interest rates puts a median-priced home out of the reach of over 800,000 families. At the current mortgage interest rate of 17 percent, a $60,000 mortgage carries a principal and interest payment of $855 per month. Other housing-related expenses bring the monthly housing expenditure to $1,070. This requires an annual income of $38,520 and fewer than 10 percent of all first-time buyers could qualify for this median-priced home.

The Federal Reserve Board policies of almost the last two years, along with the rapid deregulation of financial institutions, have led to near chaos in the financial markets, and in credit-sensitive industries such as homebuilding. We believe that action to lower interest rates would reduce inflation by restoring business and consumer confidence in the economy and by increasing production, employment and competition in the market place. We believe that the Administration and Congress should pursue economic policies that the reward increased productivity, encourage business investment and consumer savings, and reduce unnecessary and costly government regulations.

For those reasons, we support the Chiles amendment which would promote the availability of credit for productive enterprises and would ensure the financial health of small business and financial institutions as well as the housing industry. We urge your colleagues to vote for this amendment when it is considered on the Senate floor this week.

Sincerely yours,

HERMAN J. SMITH,
President.

The PRESIDING OFFICER. The time of the Senator from Florida has expired.

Mr. CHILES. Mr. President, I ask unanimous consent that the names of Mr. SASSER, Mr. MITCHELL, Mr. RIEGLE, Mr. BENTSEN, and Mr. ZORINSKY, be added as cosponsors of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BOREN. Mr. President, I rise in support of this amendment calling on the President to change current administration policies so as to insure the continued financial health of small businesses, thrift institutions, small banks, small farms, residential construction, and not-for-profit institutions.

Mr. President, I have pointed out before that supply-side economics will be undermined if we do not reduce the current high interest rates. We simply cannot have a policy stimulating investment and at the same time deliberately pursue a monetary policy that makes that investment too expensive to undertake.

This amendment calls on the Board of Governors of the Federal Reserve System to exercise their regulatory power in a specific area of wholesale mergers or takeovers. We cannot continue a policy which enables large firms to acquire smaller firms in takeovers that are unproductive.

The capital market must be kept available for productive economic purposes and to insure that firms seeking to increase productivity have the opportunity to do so. The administration and the Federal Reserve must abandon their markup of interest rates.

This tax cut bill will do no good if thousands are already bankrupt and millions are unemployed. That is exactly what will happen unless high interest rates come down. The first step toward that end is a change now, in administration policy.

Mr. DOLE. Mr. President, the Senator from Kansas and the Senator from Louisiana have discussed this amendment. We have suggested some modifications which were acceptable to the principal sponsor of the amendment, the distinguished Senator from Florida (Mr. CHILES).

There is no doubt that interest rates, as stated in the amendment, are threatening the existence and the financial viability of farms and small business.

In fact, last night, after President Reagan spoke, I was in my office and picked up the phone a couple of times, and two of my constituents, calling from

Kansas, said, "Vote with the President." But while they were saying that, they were also expressing their concern about high interest rates. So it is not limited to one part of the country. It is all over the country.

I believe that most people believe and have confidence in the policies of the President, but they should understand that those policies have not been implemented as yet. Congress can pass the budget reduction proposals and the President's tax reduction proposals. Then we will see the tax reduction proposal take effect in October, and some spending proposals will take effect almost immediately. We hope that then we will have the change the Senator from Florida wants—and all of us want—in interest rates, and we will be on the road to economic recovery.

I also share the Senator's concern about some of the actual takeovers and some of the rumored takeovers. Where does it stop? The thing that concerns me is that, if large concerns are out borrowing $3 billion or $4 billion in the marketplace, that is going to drive up the interest rates. The Government may get out of the borrowing business because of the spending reductions, but when a giant corporation that wants to take over another corporation borrows $3 billion, it can affect interest rates.

In my view, the President has adopted policies that will help us insure financial health. The amendment states "should adopt policies." I believe that can be interpreted in any way. I am certain that he will continue to adopt policies that, it is hoped, will insure the availability of credit to small business, to thrift institutions, banks, and farms, as well as for residential construction and nonprofit institutions.

So, considering the basic thrust of the amendment before us, the Senator from Kansas is willing to accept the amendment.

I understand that the Senator wants a rollcall vote.

Mr. CHILES. Yes.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DOLE. Is the Senator from Montana prepared to offer his amendment? Would the Senator from Florida object if we had a vote on his amendment at 12:15?

Mr. CHILES. I have no objection, if the Senator wants to stack them. I want to make sure that is cleared with our side.

Mr. DOLE. Mr. President, I suggest the absence of a quorum, while we are checking.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, as I understand there is no objection if we have the vote on the amendment of the Senator from Florida at 12:10 p.m., and it is the hope that between now and 12:10 p.m. we might dispose of the Melcher amendment, and if he wanted a rollcall vote it could follow immediately the vote on this amendment and still make it possible for both sides to attend their 12:30 p.m. policy luncheon, or we could postpone that until 2 p.m.

Mr. President, I ask unanimous consent that the vote on the Chiles amendment occur at 12:10 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I am prepared to yield back my time.

The PRESIDING OFFICER. All time is yielded back.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I yield 2 minutes off the bill to the Senator from Georgia.

Mr. NUNN. Mr. President, I congratulate the Senator from Florida for taking the lead in presenting this sense of the Senate resolution, which I am proud to join in with Senator BOREN, the Senator from Oklahoma. It expresses a great concern on the part of Congress as to what is happening with interest rates. It expresses a concern as to the apparent lack of coordination between fiscal and monetary policy.

I am becoming increasingly apprehensive as to whether supply-side economics can work with the kind of interest rates that we have now.

I just do not see how small and medium-sized businesses, and for that matter even some large businesses that do not have a huge amount of capital, are going to be able to go out in financial markets that exist today and borrow the kind of capital that is necessary to really revitalize the economy by investing in new plant and equipment, and by increasing productivity.

I hope that that is an overpessimistic viewpoint, and certainly I plan to support final passage of this tax legislation. Yet I also hope that this sense of the Senate resolution, the statements that are being increasingly made on Wall Street and in Washington, but more importantly throughout the country, by many struggling small business owners and farmers, will bring to the attention of the White House and the Federal Reserve Board, the increasing possibility of a head-on collision between our fiscal policy and our monetary policy. I believe it is important for the American people, for Congress, and for all of us to feel confident that both the Federal Reserve and the administration are moving in the same direction with a cohesive, sensible, and coordinated policy.

Mr. President, I have supported the general direction of the administration's economic program. I believe that reducing Federal spending, Federal taxes, and the Federal regulatory burden is essential for increased productivity, reduced inflation and renewed economic prosperity.

Yet a tax cut will mean little to the small business owners and farmers who make no profit to be taxed because of exceedingly high interest rates.

What is beginning to emerge is a dual economic policy—a boom to those with available capital—a depression for those who must borrow and for business depending on long-term credit.

When giant corporations borrow tens of billions of dollars for takeover purposes that make no contribution to productivity growth, to fighting inflation, and to job creation, and potential homebuyers cannot find affordable mortgage money, it is time for a re-examination of national economic policy.

One has to start asking questions whether last November's mandate for a change, for a balanced budget, and for reduced Government borrowing is really going to be carried out and heeded when we read statements as I read in the Washington Post earlier this week, stating that the Under Secretary of Treasury for Monetary Affairs, told a congressional committee that there is no necessary relationship between the budget deficits and money growth or between deficits and inflation.

I just simply do not agree with that statement. I do not think the American people do.

I hope that this particular high official in the Treasury Department was not speaking for the administration.

Mr. President, many of the concerns we are expressing now were expressed to the President in a letter dated July 24, 1981, signed by Senator CHILES, Senator BOREN, Senator EXON, Senator JOHNSTON, and myself, with a copy to Paul Volcker. That letter points out to the President that there are high officials in this administration making statements which I see as directly contradicting many of the voiced policies of this administration.

Mr. President, I ask unanimous consent to have that letter printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

COMMITTEE ON
GOVERNMENTAL AFFAIRS,
Washington, D.C., July 24, 1981.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: We have given support to the general direction of the Administration's economic program here in the Senate. We share your belief that a reduction of federal spending, federal taxes, and the federal regulatory burden is essential for increased productivity, reduced inflation, and economic revitalization.

We are vitally concerned, however, with the apparent absence of coordination between the fiscal and monetary policies of our government. The current fiscal and monetary policies of our nation appear to be on a path where significant conflict, if not a head-on collision, is imminent.

The continuation of the high interest rate pattern of the past few months, if allowed to

persist, will cause irreparable damage to our economy. We are beginning to have a dual economic policy—a boom to those with available capital—a depression for those who must borrow and for businesses depending on long-term credit.

When giant corporations borrow tens of billions of dollars for corporate takeover purposes that make no contribution to job creation and productivity, and potential home buyers cannot find affordable mortgage money, it is time for a reexamination of national economic and anti-trust policy. We also think it would be appropriate in this context for the Administration to re-examine recent policy statements which may have encouraged massive borrowing for merger purposes.

Officials of the Administration and the Federal Reserve have repeatedly said that once inflation abates and the public is shown that federal spending will be cut, interest rates would begin to decline. Just recently on May 8, Federal Reserve Board Chairman Paul Volcker said, "interest rates will come down and stay down as we make progress on inflation."

Today inflation is declining but mortgage interest rates are not. While consumer price increases declined from 9.6 percent in the first three months of this year to 7.4 percent in the most recent three months, the mortgage interest rates remain enrenched at 16 percent. Historically the spread between mortgage interest rates and the rate of inflation has been about 2 percent. Now, however, the interest rate/inflation rate spread has ballooned to 6 to 7 percentage points which implies to many that this is a planned and deliberate policy.

The Administration's economic advisers, according to Mr. William Niskanen, a member of the Council of Economic Advisers, are currently both "confused" and "puzzled" by continuing high interest rates. Yet reports from the recent Ottawa summit indicated you endorsed and vigorously defended the high interest rate policy of the Federal Reserve.

Just today the "Washington Post" reported that Treasury Undersecretary for Monetary Affairs Beryl Sprinkel told the House Committee on Banking, Finance and Urban Affairs that there is no technical, and no necessary, connection between budget deficits and money growth, or between deficits and inflation.

We could not disagree more. Either the government finances a deficit by printing money or by competing with and crowding business out of the credit markets. Printing money to finance deficits results directly in more inflation. Increasing federal borrowing affects inflation by forcing up interest rates, and increasing business costs. Eliminating federal deficits and reducing federal borrowing requirements are necessary for both psychological and substantive economic reasons, and must be accomplished at the earliest possible time.

If the high interest rates continue, the Administration's supply side economics cannot work. The survival of our small business and farming community is threatened, many thrift institutions are in serious financial trouble, and the housing industry is near collapse. The majority of businesses, particularly small businesses, will not be able to finance inventories, let alone capital improvements. A tax cut will mean little to small businessmen and farmers who make no profit to be taxed because of exorbitant interest rates.

In summary, Mr. President, we urge you to address these serious problems before it is too late to moderate the Administration's fiscal program. As we see it, the question is whether the anticipated stimulative effect of the Administration's fiscal program has so overloaded the system that continued long-term high interest rates are the inevitable result. If your Administration does not advocate a continued high interest rate policy, we hope that it will let its views be known to the financial community and persuade them to take action to moderate interest rates.

In this regard, we respectfully suggest a "domestic economic summit" meeting with a full dialogue between you as President, Chairman Volcker of the Federal Reserve and Congressional leadership. We would hope out of that meeting there would emerge a coordinated cohesive fiscal-monetary policy which can be clearly understood by the American people.

We do not expect an instant cure, but we do believe it is possible to achieve a moderation of interest rates and avoid major credit shortages if our Nation's fiscal and monetary policies are coordinated.

We offer you our bipartisan support in this effort.

Sincerely,

SAM NUNN,
LAWTON CHILES,
DAVID L. BOREN,
J. JAMES EXON,
J. BENNETT JOHNSTON.

Mr. NUNN. Mr. President, Federal deficits, whether caused by excessive spending or reduced Federal revenues, are inflationary. Eliminating Federal deficits and reducing Federal borrowing requirements are necessary for both psychological and substantive economic reasons. The budget must be balanced as soon as possible.

Mr. President, officials of the administration and the Federal Reserve have repeatedly said that once inflation abates and the public is shown that Federal spending will be cut, interest rates would begin to decline. Just recently on May 8, Federal Reserve Board Chairman Paul Volcker said, "interest rates will come down and stay down as we make progress on inflation."

Today, inflation is declining and we are all grateful for that but mortgage interest rates are not. While consumer price increases declined from 9.6 percent in the first 3 months of this year to 7.4 percent in the most recent 3 months, the mortgage interest rates remain entrenched at 16 percent.

Historically, the spread between mortgage interest rates and the rate of inflation has been about 2 percent.

Now, however, the interest rate/inflation rate spread has ballooned to 6 to 7 percentage points which implies to many that this is a planned and deliberate policy.

Yet, an important economic adviser to the President, Mr. William Niskanen of the Council of Economic Advisers, says the administration is puzzled by continuing high interest rates but will continue to support current fiscal and monetary policies out of conviction.

Today, Senators CHILES, BOREN, and I offer this resolution to help assure consistent economic policies. Through urging the President and the Federal Reserve to develop mutually reinforcing economic policies, it seeks to reduce confusion and uncertainty in the financial markets, achieve a moderation of interest rates and avoid a credit crunch.

I believe it puts spotlight on the growing apprehension by many of us as to the seeming conflict between fiscal and monetary policy.

I hope that because of this resolution, because of expressions of opinion throughout Congress, because of the cries of anguish from people who have to borrow money—businessmen, homebuyers, farmers, and consumers—that we will begin to see a much more carefully coordinated policy between the Federal Reserve and the administration.

Mr. CHILES. Mr. President, I thank the Senator from Georgia for his statement and his work on this resolution and the letter that was sent to the President.

I know of his long concern, building and growing concern as to what he sees happening with these high interest rates and how they affect the farmers and businessmen in his State. I certainly associate myself with his remarks and with the thrust of what we are trying to do. In that letter we call for an economic summit among the President of the United States, the Chairman of the Federal Reserve System, and leadership in this Congress, which is essential if we are going to have an economic policy that can work. So I certainly join in support of that thrust.

I thank the Senator for his help and his work in this area.

Mr. NUNN. Mr. President, I congratulate the Senator from Florida and the Senator from Oklahoma for taking this lead, and I hope out of it we will see a dedicated effort to coordinate these policies.

The Federal Reserve System is a mystery to most Americans, but high interest rates are not a mystery. People understand high interest rates very well. They understand what is happening. It is the high interest rates that today are literally strangling our economy.

I simply cannot see how supply-side economics can work when we have a 20-percent prime rate. Something has to give.

I hope that we will see interest rates come down so that we can see a revitalization of the American economy.

Mr. RANDOLPH. Mr. President, does the Senator from Florida have the floor?

The PRESIDING OFFICER. Who yields time?

Mr. DOLE. Mr. President, will the Senator from Louisiana yield some time to the Senator from West Virginia as I am about out of time on the bill?

Mr. LONG. Mr. President, I yield to the Senator how much time he requires? How much time does the Senator require?

Mr. RANDOLPH. Two minutes.

Mr. LONG. Mr. President, I yield 2 minutes to the Senator from West Virginia.

Mr. RANDOLPH. Mr. President, the leadership of the Senator from Florida (Mr. CHILES) on economic matters is recognized in this body. The expertise of the Senator from Georgia (Mr. NUNN) is also a matter of record.

The activity of the Senator from Oklahoma (Mr. BOREN) and many others, following his stewardship, in an earlier period—when numerous Democratic Senators—I was privileged to be in the

group—called attention to the damage being wrought in this country and to our economy by the high interest rates.

I recall that last year I had a colloquy on that subject with the Senator from Wisconsin (Mr. PROXMIRE). I was critical of the Federal Reserve then as I have been in statements issued in West Virginia and also comments made in the Senate.

I firmly believe that it will take an all-out effort, an all-out frontal attack by the administration and Congress, backed by the American people, to shake loose the apparently unshakable Federal Reserve policy in reference to high interest rates.

I am not a carping critic. I believe, however, that the economy of America is deteriorating, breaking up. This should not be a partisan or political issue. Those people who wish to borrow cannot borrow. Cars are not being purchased. Houses are not being built. This country is suffering in a way it need not suffer. The Federal Reserve, I believe, is much at fault.

High interest rates impact citizens in all walks of American life. These extreme rates continue to fuel inflation. We are being battered in the economic extreme.

Mr. CHILES. I just wonder if the distinguished Senator from West Virginia happened to see this latest report of the Federal Home Loan Bank Board reported in this morning's papers, which said American savers withdrew $5.6 billion more than they deposited in federally insured savings and loan institutions in June. It also said that the savings loss for the first 6 months of the year was $10.9 billion compared with a gain of $2.4 billion for the same period last year. That is a 6-month period to lose $10.9 billion where a year ago they gained $2.4 billion for the same period last year.

I know the Senator has many savings and loan institutions that have been beneficial in his State to cause houses to be built. It just goes along the line of the Senator saying what the results of these terribly high interest rates are.

We know of his great interest in this subject and the efforts he has made over all the years he has been here to try to see that interest rates were at a level where people could afford to borrow money, small businesses could afford to borrow money, small farmers, and that you did not have to be a giant corporation. I know the Senator has long fought for that.

Mr. RANDOLPH. The further information given by the Senator from Florida, the statistics he has just provided, are ample evidence of a need to help, not only in the State of West Virginia. I know in our State the savings and loan institutions have been very helpful in providing funds for the construction of needed housing. Across America the evil winds of unwarranted high interest rates continue to cause havoc—indeed great havoc.

They are long suffering at times, but now I think they expect some action. It is time for leadership from within the White House in cooperation with Capitol Hill to halt the extreme rates. I am grateful for the leadership again of the two Senators who have spoken today.

Mr. NUNN. I thank my friend and colleague from West Virginia. I have heard him speak on this subject many times. He has expressed his concern, and I want the Senator to know that I am in complete agreement with that concern.

Mr. President, I ask unanimous consent that a letter dated July 27, 1981 from the National Association of Home Builders be printed in the RECORD, wherein they expressed their great concern about these high interest rates.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NATIONAL ASSOCIATION OF
HOME BUILDERS,
Washington, D.C., July 27, 1981.

Hon. LAWTON CHILES,
U.S. Senator,
Washington, D.C.

DEAR SENATOR CHILES: On behalf of the more than 123,000 members of the National Association of Home Builders, I am writing to express our support for your amendment to H.J. Res. 266, the Economic Recovery Act of 1981, a resolution regarding the protection of small business, troubled financial institutions, the depressed housing industry and farms.

As you are aware, record high mortgage interest rates are having a devastating impact on the housing industry. Housing starts last month were down to an annual rate of 1.03 million, almost 50% below the peak level of 2.02 million in 1978. We are currently in the midst of the longest housing recession since World War II. The NAHB forecast for 1981, which assumes some moderation in interest rates by the end of the year, estimates that fewer than 1.2 million housing units will be started this year. Housing starts in the 1.2 million range are dangerously below the projected need of up to 2 million units a year during this decade. And pent-up demand will only build up inflationary pressures on housing prices in the future.

High interest rates have dramatically increased the failure rate in the construction industry. In February 1981, failures among general building contractors were up 11% over the February 1980 rate. Subcontractor failures, were more severe, with the number of failures up by 94%. This is particularly significant since the comparison for 1981 are being made with 1980—the worst year for construction failures on record. If interest rates do not fall in the near future, the unfortunate result will be that many more businesses will fail.

The precipitious drop in housing starts has had a significant impact on the overall economy by raising the unemployment rate in the construction trades. The official construction unemployment rate is 16.6%, and over 835,000 wage and salary workers are out of jobs.

First-time homebuyers in particular have been priced out of the housing market by high interest rates. Each one percent increase in interest rates puts a median-priced home out of the reach of over 800,000 families. At the current mortgage interest rate of 17%, a $60,000 mortgage carries a principal and interest payment of $855 per month. Other housing-related expenses bring the monthly housing expenditure to $1,070. This requires an annual income of $38,520 and fewer than 10% of all first-time buyers could qualify for this median-priced home.

The Federal Reserve Board policies of almost the last two years, along with the rapid deregulation of financial institutions, have led to near chaos in the financial markets, and in credit-sensitive industries such as homebuilding. We believe that action to lower interest rates would reduce inflation by restoring business and consumer confidence in the economy and by increasing production, employment and competition in the market place. We believe that the Administration and Congress should pursue economic policies that reward increased productivity, encourage business investment and consumer savings, and reduce unnecessary and costly government regulations.

For those reasons, we support the Chiles amendment which would promote the availability of credit for productive enterprises and would ensure the financial health of small business and financial institutions as well as the housing industry. We urge your colleagues to vote for this amendment when it is considered on the Senate floor this week.

Sincerely yours,

HERMAN J. SMITH,
President.

The PRESIDING OFFICER. Who yields time?

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATUS OF AMENDMENTS

Mr. DOLE. Mr. President, I might take just a moment to sort of update the Members who are present and staff members and those Senators who may be listening in their offices or in committee sessions that we are, the Senator from Kansas believes we are, near a point where we can probably finish this bill without too much difficulty before midnight tonight, and I believe that is the intent of the distinguished majority leader to finish the bill today.

If those who have amendments would now tell us that they are not going to call those amendments up, it would be most helpful. There are a number of amendments in negotiation, and I might suggest we have been fairly successful in negotiations. Most of the amendments that have gone that route—maybe half the amendments that have gone that route—have been worked out. Others could not be worked out on this particular bill, but that does not mean they are not without merit and that there will not be another opportunity later on.

But there are still a number of amendments that we hope by 4 or 5 o'clock this afternoon we would be down to the bare minimum of a half dozen that are going to take any time at all.

So if someone has an amendment—I think Senator JEPSEN and Senator LEVIN have an amendment on adoption credits we believe that can be negotiated; Senator LEAHY has an amendment which I believe has been negotiated; Senator MELCHER, Senator DURENBERGER, Senator JEPSEN, Senator GRASSLEY, and Senator BOSCHWITZ, have amendments which I believe we can negotiate.

The Senator from New York (Mr. MOYNIHAN) has an amendment which we cannot accept. I promised the Senator

from New York that I would do the very best I could to get it on the next tax bill. I am not certain the Senator wants to call it up or not.

Mr. MOYNIHAN. Would the distinguished chairman be agreeable to calling up the amendment and having it briefly discussed?

Mr. DOLE. Yes; would the Senator like to do it now?

Mr. MOYNIHAN. Like now?

Mr. DOLE. That is an indication that really there are not that many amendments left that should take a great deal of time, and with the Members' cooperation—and we have had splendid cooperation in the past 11 days, hopefully this will be the last day we will have to ask for such cooperation.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment of the Senator from Florida. All time has been yielded back, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

The result was announced—yeas 100, nays 0, as follows:

[Rollcall Vote No. 229 Leg.]

YEAS—100

Abdnor	Garn	Mitchell
Andrews	Glenn	Moynihan
Armstrong	Goldwater	Murkowski
Baker	Gorton	Nickles
Baucus	Grassley	Nunn
Bentsen	Hart	Packwood
Biden	Hatch	Pell
Boren	Hatfield	Percy
Boschwitz	Hawkins	Pressler
Bradley	Hayakawa	Proxmire
Bumpers	Heflin	Pryor
Burdick	Heinz	Quayle
Byrd, Harry F., Jr.	Helms	Randolph
	Hollings	Riegle
Byrd, Robert C.	Huddleston	Roth
Cannon	Humphrey	Rudman
Chafee	Inouye	Sarbanes
Chiles	Jackson	Sasser
Cochran	Jepsen	Schmitt
Cohen	Johnston	Simpson
Cranston	Kassebaum	Specter
D'Amato	Kasten	Stafford
Danforth	Kennedy	Stennis
DeConcini	Laxalt	Stevens
Denton	Leahy	Symms
Dixon	Levin	Thurmond
Dodd	Long	Tower
Dole	Lugar	Tsongas
Domenici	Mathias	Wallop
Durenberger	Matsunaga	Warner
Eagleton	Mattingly	Weicker
East	McClure	Williams
Exon	Melcher	Zorinsky
Ford	Metzenbaum	

So Mr. CHILES' amendment (UP No. 310) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MOYNIHAN. Mr. President, may we have order? The majority leader has a right to be heard.

The PRESIDING OFFICER (Mr. WEICKER). The Senator will suspend until there is order.

The majority leader is recognized.

Mr. BAKER. Mr. President, I thank the Chair. I thank my good friend from New York for very properly making the point that the Senate was not in order.

ORDER OF PROCEDURE

The purpose for seeking recognition, Mr. President, is to say that it is my hope that the Senate will continue from this hour for the remainder of the afternoon to take up and dispose of amendments, notwithstanding that there are conferences and caucuses on both sides of the aisle, beginning at 12:30 and running until approximately 2 p.m.

In the past, we have not infrequently recessed during that period, but I do not propose now to ask that the Senate recess, because we have a great volume of work yet to do. I urge Members to consider offering their amendments during this period from 12:30 to 2, when the two parties are in caucus. I understand that that is an imposition on Members, but it is necessary, I believe, under the circumstances.

I urge, however, that the distinguished chairman of the committee and the ranking member consider stacking any votes that may be ordered during that period until 2 p.m. I do not make that request at this time, but in the event there is a request for the yeas and nays, if the managers of the bill would go forward with that request, I hope there will be no objection to it.

Mr. President, it is still my hope that we can finish this bill today. I think we can. It will require a high level of dedication and diligence and a willingness on the part of Senators either to offer their amendments or declare that they will not offer their amendments. I believe it is essential that we finish this bill today. I do not propose to ask the Senate to recess early today as long as there is any hope that we can finish. On the contrary, I expect that we may be in late in order to accomplish that purpose.

I thank the Chair.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that the pending matter be temporarily laid aside.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

AMENDMENT NO. 513

(Purpose: To amend the Internal Revenue Code to change certain accounting rules related to inventory)

Mr. MOYNIHAN. Mr. President, I call up printed amendment No. 513.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New York (Mr. MOYNIHAN) proposes an amendment numbered 513.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of subtitle D of title II, add the following:

SEC. 234. EXCESS INVENTORY ITEMS MAY BE WRITTEN DOWN TO SCRAP VALUE.

(a) IN GENERAL.—Section 471 (relating to the general rule for inventories) is amended by adding at the end thereof the following new sentences: "A taxpayer may value his excess inventory at its net realizable value. For purposes of this section, the term 'excess inventory' means that portion of the taxpayer's inventory which the taxpayer reasonably expects will be disposed of at less than full realization of its cost. Such portion shall be determined with respect to each group of articles by age by referring to the taxpayer's most recent 5-year experience with inventories.".

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to taxable years ending on or after December 25, 1979.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that the names of the Senator from New York (Mr. D'AMATO), the Senator from New Jersey (Mr. WILLIAMS), and the Senator from Montana (Mr. BAUCUS) be added as cosponsors of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, this is the amendment concerning the so-called Thor Power Tool ruling which has caused great concern in a wide range of industries in the Nation, but none more than the publishing industry.

As the distinguished chairman of the committee knows, the wholly unanticipated effect of the ruling, which on its face is an equitable one—deductions from earnings should not be made unless there is an actual loss that can be demonstrated, and that was the effect of the ruling—has been to make it extremely difficult for book publishers to carry back lists, as they are called, of books which sell slowly over time and frequently not at all, in terms of the entire printing, but which are essential to any literate and scientific culture such as ours at least once was.

The effect of this ruling is to make it extremely costly for publishers to keep in their warehouses books that have not sold, in the expectation that over time they will do so. This has been for generations. this has been for centuries, the honorable practice of publishers.

As an author, I can think of more than one warehouse where my works are stored, in the increasingly vain expectation that someone might come along and assign them to a reading list. But this is not nearly as important as the medical texts, scientific texts, books of poetry, the encyclopedias. the technical manuals which a vibrant and rich publishing tradition needs, which this Nation needs.

The effect of the Thor Power ruling is already upon us. Books are literally being turned into pulp. I do not want to exaggerate. We are not talking about anyone's ill intent. But it is a fact.

Mr. President, I ask unanimous consent to have printed in the RECORD a brilliant editorial published in the Washington Star on October 8 of last year—on the editorial page superbly edited by Edward M. Yoder, Jr.—entitled "Books Into Pulp," and an editorial published in the New York Times of September 4,

1980, entitled "Taxing Books to Extinction."

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Washington Star, Oct. 8, 1980]

BOOKS INTO PULP

It is not uncommon for a law to affect human life and commerce far beyond what its sponsors intended. So it may be with the case of the *Thor Power Tool Company vs. Commissioner of Internal Revenue*, decided last year by the U.S. Supreme Court.

The case seemed unexceptional. The Court decided that the valuation of warehouse inventories could not be reduced for tax reasons—unless the stock itself was sold at reduced prices. The logic seems indisputable.

But what are the likely effects?

One is that the cost of doing business will go up—which means higher prices for everyone. Another is that basic inventories may be reduced. It could, for instance, be harder to get the spare parts one may need for a car or refrigerator.

The Internal Revenue Service subsequently made the *Thor Power* decision retroactive to 1979—a ruling now opposed by bills in Congress. And with what appears to be some glee, the IRS applied the ruling to all kinds of companies—including book publishers.

Publishing houses accordingly plan to destroy or "remainder" millions of books in the next few months because they can no longer depreciate their inventories for tax purposes. They are expected to print fewer books in the future, to avoid the chance of overstocking, and to permit titles to go out of print sooner. They are likely to offer fewer contracts for "non-commercial" books.

Some publishers, it has been reported, have already increased their sales to remainder houses (where the wholesale price is often 10 cents on the dollar). A great many books—some estimate millions—will be ground into pulp. Backlists—titles which sell steadily and yield profits over a long period—are in danger.

Yet backlists are vital to publishers who don't rely upon best sellers for profits. For every *Princess Daisy*, which may sell thousands of copies a week, there are hundreds of slower-selling histories and biographies from which the IRS wishes to extract the full tax dollar.

Paradoxically, the tax dollars may not be there. If publishers cannot afford to pay higher taxes on non-depreciated stock, they will get rid of it. There is not much of a tax—at least not yet—on pulp and shredded paper. Yet pulp is what the IRS will encourage if its ruling remains in force.

One must be grateful that such broad rulings were not being made by IRS in the days of Melville, Thoreau and Hawthorne; or Faulkner, Hemingway and Fitzgerald. One must also be grateful that the IRS does not have the final say.

Sen. Daniel P. Moynihan, a writer of note (whose books do not, alas, rival those of Irving Wallace on the best-seller lists) plans to introduce a bill exempting publishers from the *Thor Power* decision when the new Congress convenes in January. He has said it will be the first item on his agenda. We hope he succeeds.

Others may wish to re-examine the original ruling, but Mr. Moynihan recognizes that the immediate danger is to the printed page and the life of the mind in modern America.

[From the New York Times, Sept. 7, 1980]

TAXING BOOKS TO EXTINCTION

Anyone who has looked for a special book lately knows the probable outcome: it is out of print. The changing economics of the book business have sharply raised the cost of holding inventories, and publishers are reluctant to maintain extensive "backlists." As a result, people who want (or need) to read older books must increasingly depend on libraries—which have financial troubles of their own.

There is not a great deal that can be done to reverse this unfortunate publishing reality. But it is certainly possible to decelerate the trend by offering modest tax incentives to publishers who would rather sell books than shred them.

Federal law says that profits should be taxed only when they are realized. An investor, for example, need not pay taxes on the increased value of securities until they are sold. This principle also works in reverse, to the detriment of the book industry. When a book fails to sell as well as expected, its publisher would like to write off the remaining inventory by deducting the loss from current taxable income. But Internal Revenue argues that, to be consistent, such anticipated business losses should not be deductible until the losses are actually realized—that is, when the books are either dumped below cost or destroyed.

This quarrel has been fought in the courts for years. In 1979 the Supreme Court ruled that the Thor Power Tool Company could not carry inventories of its products at a loss. And last February the IRS informed publishers that, for tax purposes, unsold novels were no different from unsold drills.

It is hard to quarrel with the Government's logic or, for that matter, its forbearance in this case. And there may be more than a touch of hyperbole in the comment of George Brockway, the chairman of W. W. Norton, that the IRS ruling "could blow the business apart." But there is little doubt that, uncushioned, the ruling will make it harder to find that special volume of art criticism or monograph on cell biology.

What cushion is possible? Publishers seem to be banking on a bill sponsored by Senator Nelson of Wisconsin and Representative Conable of New York, which would provide a one-year delay in the imposition of the Thor ruling for all affected businesses. That is an unfortunate wagon to which to hitch the future of book industry taxes. There is no good reason to give a costly tax reduction to, say, the auto spare parts business. In any case, such a one-shot delay would in no way improve the long-term incentive to keep good but slow-selling books available.

What publishers really need is legislation that provides special treatment for a truly special situation, allowing them to write off inventories after three or four years without having to dump books. Such legislation, just for publishing, would cost the taxpayers only a few million dollars a year. It would be money well spent.

Mr. MOYNIHAN. Mr. President, I am aware that the Treasury Department feels that they cannot at this point accept this amendment. I have discussed the matter off the floor during the last hour with Mr. Chapoton, who is entirely sympathetic to our concerns. He is not certain whether we have the best remedy.

The remedy we propose is to provide a third method of proving loss of inventory, which is basically a 5-year experience, to be proved out, but statistically valid, and it would not be something that would trouble any firm trying to make judgments. You do samples and you work from experience.

This, of course, applies not only to the book publishing industry but also to industries throughout the country and has to have large consequences in the willingness and capacity to carry inventory of finished products, such as books, or parts that go into an assemblage—in the classic spare parts inventory that goes with machinery.

The judgment of management consultants we have dealt with is that this will be a blow to the creative complexity of American industry, firms that make complex machines and expect them to last a long time and keep parts on hand that allow the machines to be repaired over a long time.

However, given the opposition of the Treasury Department—the cost of this measure running from 1983 out is a not inconsiderable but neither overwhelming $259 million, $276 million, and so forth—I understand that the chairman is willing to take up this matter in detail when the first opportunity appears of a new tax bill, a second tax bill, or the next tax bill. Rather than have it voted on in a body where there may be a feeling that the full facts are not known and the widest range of judgments has not come in, I believe it would be prudent, in the interests of the industries involved, to accept the generous offer, as I understand it, of the distinguished chairman.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. MOYNIHAN. I yield.

Mr. DOLE. The Senator is correct. We have discussed this matter. It also has been discussed with the distinguished Senator from Louisiana (Mr. LONG). The Senator from Kansas discussed it with the Treasury Department, to see if they could come up with some other concept that would satisfy and accommodate the serious and just concerns raised by the Senator from New York.

I do pledge that we will address this matter at the earliest possible time in the Senate Finance Committee. It is my understanding, and I believe it is accurate, that another tax bill will be discussed and voted on in the Senate Finance Committee. Although it is not certain to be discussed on the floor this year, we are moving ahead, and it is hoped that by that time we can find some approach that will satisfy the Senator.

Mr. MOYNIHAN. I thank the chairman. If we can leave it with the next bill, whenever that time comes, it will be considered. I appreciate the generosity of the chairman in this matter. I know that at this point in this measure there are things he cannot accept without the support of the Treasury Department. The Treasury Department is not hostile; it is unconvinced.

Mr. DOLE. That is right.

Mr. MOYNIHAN. With that note, and with an expression of appreciation to the chairman, I ask to withdraw the amendment I have at the desk.

The PRESIDING OFFICER. The amendment is withdrawn.

Mr. DOLE. I thank the distinguished Senator from New York.

Mr. MELCHER. Mr. President, is the pending amendment that of the Senator from Kansas?

The PRESIDING OFFICER. The Senator is correct.

Mr. DOLE. Mr. President, I ask unanimous consent that the amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 311

Mr. MELCHER. Mr. President, I have an amendment at the desk, and I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Montana (Mr. MELCHER), for himself, Mr. ABDNOR, Mr. ANDREWS, Mr. KASTEN, Mr. LUGAR, Mr. ZORINSKY, Mr. EXON, Mr. BAUCUS, Mr. BOSCHWITZ, Mr. JEPSEN, Mr. GRASSLEY, and Mr. SASSER proposes an unprinted amendment numbered 311.

Mr. MELCHER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of subtitle F of title II, insert the following new section:

SEC. . MAXIMUM RATE OF IMPUTED INTEREST.

(a) IN GENERAL.—Section 483 is amended by adding at the end thereof the following new subsection:

"(g) MAXIMUM RATE OF INTEREST ON CERTAIN TRANSFERS BETWEEN RELATED PARTIES.—

"(1) IN GENERAL.—In the case of a sale or exchange of qualified non-depreciable property to a U.S. person, the maximum interest rate used in determining the total unstated interest under the regulations under subsection (b) shall not exceed 7 percent, compounded semiannually.

"(2) QUALIFIED NON-DEPRECIABLE PROPERTY.—For purposes of this subsection, the term 'qualified nondepreciable property' means any property which is not subject to an allowance for depreciation or amortization in the hands of the person holding the property after the sale or exchange.

"(3) $2,000,000 LIMITATION ON QUALIFIED NON-DEPRECIABLE PROPERTY.—Property shall not be considered qualified non-depreciable property to the extent the sales price of all property sold or exchanged by the parties during a 12-month period exceeds $2,000,000.

"(4) SPECIAL RULE FOR LIQUIDATIONS.—In the case of a sale or exchange of stock in a corporation which is liquidated (in a transaction to which part II of subchapter C applies) within 2 years of the sale or exchange, paragraph (1) shall be applied, by treating the sale or exchange as a sale or exchange of the assets of the corporation. The Secretary shall prescribe regulations for the application of this paragraph."

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to payments made after June 30, 1981 pursuant to sales or exchanges occurring after such date.

Mr. MELCHER. Mr. President, this amendment deals with imputed interest rates, which is a term that the Internal Revenue Service uses when they wish to make certain, under section 483 of the Codes, that there will be a proper interest rate on the sale of real property. By "proper" I mean an interest rate that they think is realistic.

Prior to July 1 of this year, the cap on that would be 7 percent. That would be as high as the IRS could impute an interest on the contract for deed. The amendment freezes at that level, at 7 percent, the rate which was in force prior to July 1 of this year on sales of nondepreciable property of $2 million or less.

This, for the most part, involves farms, ranches, and small businesses; and, for the most part, these properties are sold on a contract-for-deed basis. That is, a seller says to the purchaser: "Here are the terms on which I will sell the property. Here is the interest rate. Here is the structure of the whole sale and when I want to be paid off, and so forth." That is the usual form for most of the sales of farms, ranches, and small businesses.

What does that involve in the imputed interest rate? We have been working to put a cap on the imputed interest rate at this level since the increase to 10 percent was first proposed by the Internal Revenue Service last August. Many of us felt that it was none of the Internal Revenue Service's business to be determining what interest rates should apply on the sales of property between individuals and businesses.

Personally, I believe that the Internal Revenue Service gets into too much of the ordinary daily lives of people. There is no reason I can justify in my own mind for the Internal Revenue Service to be involved in every contract for deed of sale of real property.

However, section 483 of the Code adopted in the 1960's directs them to impute an interest rate at a certain level on a contract for deed.

Prior to July 1, it was 7 percent. What we are doing in the amendment is saying that is where it is going to stay, but put a cap on it of $2 million and have it only apply at that rate, 7 percent or up to 7 percent, on those transactions of less than $2 million and apply to sales of nondepreciable property.

Our efforts to cap the rate in this bill are supported by the National Association of Realtors, the National Homebuilders Association, the American Farm Bureau, the National Farmers Organization, the National Farmers Union, the National Cattlemen's Association, the Grange, the National Milk Producers Federation, and the American Agricultural Movement.

At the request of the distinguished chairman of the Finance Committee, I and the other cosponsors of my amendment agreed to meet with the Secretary of the Treasury, Mr. Regan, to decide if we could work out an agreeable solution to this amendment because they first objected to it and we wanted this amendment to become part of this final bill. As a result of these meetings we agreed to limit the size of the transaction to $2 million, and anything below that would qualify for the lower rate and agreed that this should apply only to nondepreciable property.

This keeps the Internal Revenue Service out of a great number of transactions. However, because it is vitally important that we hold these rates down, particularly in the sale of family farms, family ranches, and small businesses, my cosponsors and I agreed to the limitations in order to gain Treasury support for the amendment.

It is my understanding, and I wish to have the chairman of the Finance Committee affirm this, that every effort will be made by the committee members to retain this amendment in conference with the House of Representatives and see that it is part of the final bill.

Before we get done I hope the distinguished chairman of the Finance Committee is back on the floor and maybe we can have a little colloquy on that.

Mr. President, I now yield to the Senator from Minnesota, one of the cosponsors, Senator BOSCHWITZ.

Mr. BOSCHWITZ. Mr. President, I join my colleague from Montana, Senator MELCHER, in speaking about this amendment and I ask unanimous consent to add the following Senators as cosponsors: Senators QUAYLE, COCHRAN, PRESSLER, DANFORTH, ARMSTRONG, SIMPSON, GORTON, DURENBERGER, MCCLURE, and SYMMS.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BOSCHWITZ. Mr. President, I rise to join my distinguished colleague from Montana in sponsoring this amendment and urging its acceptance by the full Senate, and also I will join him in talking to the chairman of the committee to see that this will survive the conference inasmuch as we have sought to achieve these ends over some period of time, and it is my understanding that it is not in the companion bill being considered in the House of Representatives.

We are all familiar with this issue. Over a year ago, the IRS proposed regulations which would have increased the rate of interest which is imputed in contract sales between buyers and sellers. Last Congress, the IRS agreed to delay issuing these regulations until July 1 of this year, so that Congress would have time to act. Within that time period, hearings were held last spring at which the IRS testified. In that testimony, the IRS admitted that the regulations had no revenue-raising effect. Furthermore, the IRS stated that they were merely enforcing the law, and would continue with "business as usual" until Congress acted.

As we all know, the Finance Committee has been concentrating its efforts on the Economic Recovery Tax Act, which we are currently considering. As a result, this is the first time the full Senate has the opportunity to address this important issue. Notwithstanding the short time period, the IRS did issue regulations on July 1.

The regulations issued by the IRS require certain interest rates to be charged in sales between commonly controlled businesses and in sales between individuals. If a contract for sale between individuals calls for an interest rate of less than 9 percent, the IRS will impute a rate of 10 percent. This amendment will keep the maximum imputed interest rate at 7 percent, the rate in effect before the IRS issued the new regulations. I want to emphasize that this amendment only helps individuals—it does not affect the new regulations on sales between commonly controlled businesses.

The IRS is quick to point out that these regulations do not change the amount of payments in a sales contract. Rather, the regulations merely adjust the portion of the payments which is treated as in-

terest income to the seller and as interest deduction to the buyer. The practical effect of the regulations, however, is that sellers and buyers will not have as much room to bargain in the sale. The sellers will no doubt raise the price, forcing buyers to make larger payments, possibly over a longer period of time. As a result, many young buyers of homes, farms, and businesses may very well be priced out of the market. Surely these results are not intended by the economic recovery program. If anything, this amendment will further the goal of our economic recovery program by eliminating the involvement of the IRS in private contractual arrangements.

This amendment is a reasonable compromise to relieve the burdens the regulations impose on family farms and small businesses. This amendment will keep the maximum interest rate that the IRS can impute at 7 percent. For sales of nondepreciable property of up to $2 million in any 12-month period. It will make no difference whether the sale is between family members or neighbors. Thus, the small businessman will be able to sell the stock of his company, and the farmer can sell his land, without undue meddling by the IRS.

Mr. President, I urge the Senate to adopt this amendment.

Mr. GRASSLEY. Mr. President, will the Senator yield?

Mr. MELCHER. Mr. President, I yield to the Senator from Iowa, the distinguished subcommittee chairman of the Finance Committee, Senator GRASSLEY.

Mr. GRASSLEY. I thank the Senator from Montana for yielding.

I compliment him for his leadership in this area and I also suggest that he showed early leadership by appearing before our subcommittee when we had hearings on this subject. I am particularly appreciative of the fact that he was willing to work this compromise out so that we could get bipartisan support for this issue of importance to rural America and hopefully get this in a final tax package out of conference.

There is probably not any one issue dealing with survival of the family farm except the estate tax that has had more attention in recent months in the Midwest than the issue of imputed interest. I think we should consider the environment in which this concern is expressed. It is expressed in terms of the ability to pass on from one generation to the next the family farm or small business. One of the tools for assessability of younger generations to continue the family farming operation has been the lower rate of interest that mothers or fathers have been willing to give to their sons and daughters in helping to start this family farm operation or small business.

This intergenerational loan or gift is not ever in the vein of trying to avoid taxes or ever in the vein of trying to pull something fast on the Government. This is a very open approach of one generation willing to forgo some income just because of the desire to see the family farm continue within the family from one generation to the other.

This will eliminate one impediment to this transfer of property from one generation to the other. As I said before, next to the estate tax reform that is probably the most important thing we can do, and one that is going to eliminate a lot of anxiety for people in their sixties and seventies involved in family farms and businesses who worry whether or not their sons and daughters will be able to continue the operation.

I support this amendment and have cosponsored it. I want to thank the Senator from Montana for working out this compromise and express my appreciation for his fine work.

Mr. JEPSEN. Mr. President, will the Senator yield?

Mr. MELCHER. I yield to the Senator from Iowa who has been most active in the amendment over the past several months.

Mr. JEPSEN. Mr. President, I rise in support of the amendment proposed by my distinguished colleague from Montana (Mr. MELCHER). I commend him for pursuing this issue so diligently during the present session and for bringing it now before the Senate for a vote.

For well over a year, Members from both Chambers of the Congress have been urging the Department of the Treasury to reconsider their decision to raise imputed interest rates under section 483. An hour ago we reached a compromise with the Secretary of the Treasury. That compromise is reflected in this amendment. Although it does not go as far as many of us would like, it is a step in the right direction. The arguments in favor of it are overwhelming.

The imputed tax regulations target the most critical sectors of the American economy: Agriculture and small business. Statistics from the Department of Agriculture and the Small Business Administration indicate that these two groups, by themselves, produce almost half of national income, 53 percent of national employment, and as much as 65 percent of all new jobs created in the United States. The new regulations do not just hurt a small group, indirectly, they hurt all Americans.

But, the most important reasons against raising imputed interest rates are not the law or statistics but people. I am talking about the corn grower from Conrad, Iowa, and the grocer from Centerville and millions of other self-employed Americans in Iowa and across the Nation. They work the same land or the same business as their parents did, and their parents' parents before them.

I am talking about people working 16-hour days, 7-day weeks, and 52-week years. I am talking about men and women with calloused hands and sore backs—the individuals who produce our food and the entrepreneurs who take a dream and through years of hard work turn that dream into a business. I am talking about those sectors most responsible for the unparalleled economic growth in America over the past 200 years.

Why do these men and women from Denison, Iowa, New Ulm, Minn., and tens of thousands of other towns in our 50 States labor so hard? In my State I hear the same answer again and again: They do so in order to give their offspring a better life than they had and to leave them something which they in turn will pass on to their children.

The new regulations issued by the Treasury strike at the very heart of this venerable tradition. When the time comes for a child to get started in business or farming, he or she cannot afford 20-percent interest rates and the enormous initial capital expenditures. So, a father and mother give the child a break: A low-interest loan and a deferred payment schedule. This does two things: It helps the young person when such help is critical and allows parents to pass on their property to their offspring without incurring the confiscatory rates of present estate taxation. Raising the imputed interest rates will effectively close off that option to many farmers and small businessmen.

The IRS is venturing where they have absolutely no business to be. This is Government at its worst. While this amendment does not answer all the problems of retaining family farms and family business, it is a major step in the right direction. I support it and urge all Senators to do likewise.

Mr. HARRY F. BYRD, JR. Mr. President, will the Senator from Montana yield?

Mr. MELCHER. I am delighted to yield to the distinguished Senator from Virginia.

Mr. HARRY F. BYRD, JR. Mr. President, is the understanding of the Senator from Virginia correct that the Treasury Department does not oppose this amendment and the Treasury Department in fact worked with the Senator from Montana to develop it and approves the amendment?

Mr. MELCHER. The Senator is correct. We met several times with representatives of the Treasury Department. We met this morning with Secretary of the Treasury Regan to make the final agreement on the terms of the amendment.

Mr. HARRY F. BYRD, JR. If the amendment is not adopted, what would the imputed interest rate be?

Mr. MELCHER. The imputed interest rate would be 10 percent if the amendment is not adopted. The imputed interest rate still will be 10 percent on sales of depreciable property and those sales that involve more than $2 million, $2 million or more.

Mr. HARRY F. BYRD, JR. And the present ceiling on imputed interest rates is 7 percent, and the Senator from Montana would keep that ceiling insofar as nondepreciable property is concerned?

Mr. MELCHER. Up to $2 million. We would roll back the imputed interest rate to 7 percent, what it was on July 1 of this year, just a couple weeks ago, and on nondepreciable property.

Mr. HARRY F. BYRD, JR. On July 1 it went from 7 percent to 10 percent?

Mr. MELCHER. That is correct.

Mr. HARRY F. BYRD, JR. This is on nondepreciable property up to $2 million would be rolled back to 7 percent?

Mr. MELCHER. That is correct.

Mr. HARRY F. BYRD, JR. I thank the Senator.

Mr. MELCHER. Mr. President, the chairman of the Finance Committee is

here now and I wonder if he could engage in a colloquy to the effect that the agreement that has been arrived with the Secretary of the Treasury and the amendment now pending before us is acceptable to the chairman of the Finance Committee.

Mr. DOLE. Mr. President, let me say to the distinguished Senator from Montana it is acceptable. In fact, I commend the Senator from Montana and the others who were in the series of discussions over the past several days trying to work out something that would be acceptable to the administration and the Treasury.

I believe this amendment is acceptable. I do not know of any problem with it. There are some who have indicated some reservations about whether this might drive up the price of farmland, but certainly that is not the intent of the amendment. This Senator is satisfied with the amendment.

Under present law, interest may be imputed on installment sales where no interest or low interest is provided for. Before July 1, 1981, the rate for imputing interest was 7 percent. On July 1, 1981, this rate was increased to 10 percent.

The amendment would keep the rate on sale of nondepreciable property at 7 percent—subject to a $2 million limit on sales.

The amendment by the Senator from Montana has been carefully negotiated with the Treasury Department over the past several days. The amendment will freeze imputed interest rates under section 483 for sales of land and other nondepreciable property in transactions of less than $2 million at the 7-percent level that existed before July 1, 1981.

This amendment appears to solve the problems pointed out by the Senator without opening significant avenues for abuse.

I think we will have success in conference. I know of no opposition to the amendment on the Senate side.

There will be a rollcall vote, I assume, to indicate how strong that support is.

Mr. MELCHER. I say to my friend, the distinguished chairman of the Finance Committee, the able Senator from Kansas, I hope we can, I hope the Senate conferees can, hold it in conference, because I think it works well for thousands upon thousands, scores of thousands, of people who are going to enter into contracts for deeds of farms, ranches, or small businesses.

We are dealing with really a lot in this tax bill that affects every individual and every corporation in this country, every company, every partnership, every venture of any kind. So it is only appropriate that we make some correction here as to how much authority IRS is going to exercise in looking at all contracts for deeds to real property, nondepreciable property.

The fact is that if we are going to do a good job in helping family farmers and family ranchers and family small businesses to survive, this is the one way we can help them.

I point out that during the 7 or 8 months we have been considering this subject we have continually asked the Treasury Department, we have continually asked the joint committee on what revenue would be gained or lost if the imputed interest rates were held at 7 percent, a cap at 7 percent. The only figure in that regard is a figure that was presented to us by the Joint Committee on Taxation, that it would be $10 million or less in loss of revenue.

It would seem to me that the principle is much greater than those few millions of dollars that might be lost to the Treasury, and that principle is this: Is it possible for people in this country to write a contract for deed, to set an interest rate that is agreeable between a willing buyer and a willing seller without too much interference from the Internal Revenue Service?

I think our amendment strives to answer that question in the affirmative with a positive "Yes," and I think we are giving up for that right for individual citizens in this country very little as far as the Treasury is concerned.

Mr. President, I know of no other requests for time and I yield back the remainder of my time.

I do ask for the yeas and nays on the amendment.

The PRESIDING OFFICER (Mr. LAXALT). Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DOLE. Mr. President, I ask unanimous consent that the vote on this amendment occur at 2 o'clock. I might say that has been cleared with the minority and majority leaders.

The PRESIDING OFFICER. Without objection, it is so ordered.

SIXTY ADDITIONAL MINUTES ON THE BILL

Mr. DOLE. Mr. President, I also ask unanimous consent—and this has been cleared with the majority and minority leaders—that the Senator from Kansas be allowed 60 minutes additional time on the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. I want to commend the distinguished Senator from Montana again. We will, I think, have success in conference. I know the Senator is going to be working with some of the House conferees.

I yield back the remainder of my time.

Mr. MELCHER. I thank the distinguished Senator from Kansas and the chairman of the Finance Committee.

Mr. President, I ask unanimous consent that Senator BENTSEN be added as a cosponsor to the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I think the distinguished Senator from Idaho (Mr. SYMMS) is now prepared to call up two amendments. I would again urge anyone who may be listening, I think we are in the home stretch, so if you have any amendment you would like to bring over now and discuss it I would appreciate it.

The PRESIDING OFFICER. Without objection, amendment 508 will be temporarily set aside.

UP AMENDMENT NO. 312

(Purpose: To eliminate the acceleration of the estate tax in the death of subsequent transferees)

Mr. SYMMS. Mr. President, I call up an unprinted amendment dealing with estate tax acceleration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Idaho (Mr. SYMMS) proposes an unprinted amendment numbered 312.

Mr. SYMMS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 253, between lines 22 and 23, insert the following:

NO DISQUALIFICATION IN CASE OF SUBSEQUENT DEATHS.—Subparagraph (D) of section 6166(g)(1) is amended by adding at the end thereof the following new sentence: "A similar rule shall apply in the case of subsequent transfers of the property by reason of the death of such person or of a subsequent transferee.".

On page 255, strike out lines 20 through 22, and insert in lieu thereof the following:

(g) EFFECTIVE DATE.—

(1) Except as provided in paragraph (2), the amendments made by this section shall apply to the estates of decedents dying after December 31, 1981.

(2) The amendment made by subsection (c)(3) shall apply with respect to transfers of property after December 31, 1981.

Mr. SYMMS. Mr. President, I am offering an amendment today which is both noncontroversial, technical, and an amendment which will clarify the estate tax law. The chairman of the Finance Committee will be pleased that this amendment does not have a revenue loss and there was no objection presented by the Department of the Treasury when the clarification was considered in the House Ways and Means Committee markup. The Treasury just approved it here. Also it has been approved by the ranking minority member of the Finance Committee and by Senator METZENBAUM.

The amendment would achieve one objective. Originally I had offered an amendment which would contain two objectives, but I have dropped one of the objectives. The other objective I still favor. It is in the version in the other body, and I hope we can achieve both of these objectives when we finally come to a conference.

The part we are discussing today will eliminate the acceleration on the death of subsequent transferees.

Section 6166(g)(1) accelerates the payment of estate taxes deferred under section 6166 if one-third or more of an interest in a closely held business is distributed, sold, exchanged, or otherwise disposed of. Section 6166(g)(1)(D) provides that there is no acceleration when a closely held business interest is transferred from the decedent's estate to a person entitled to receive such interest by reason of the decedent's death.

However, this exception for death-related transfers ceases to apply when the person who received his interest from

the decedent dies and the interest is transferred to such person's heirs. For example, where a spouse dies and leaves an interest in a closely held business to the surviving spouse, there is no acceleration of deferred estate taxes. But when the surviving spouse dies and leaves such interest to the children, there is acceleration of the original decedent's deferred estate taxes when the children receive their interest.

Another example would be if the wife died and left a farm to the son. The son worked out an agreement with the IRS to pay the estate tax over a 15-year period. The son then suddenly died and left the farm to his brother. The brother would then be subject to paying the estate tax on the mother's estate immediately. Quite obviously, the brother might have to sell the farm or a portion of the farm to meet the estate tax liability.

There is no justification for requiring acceleration on the death of a subsequent transferee. The rationale underlying the exception for death-related transfers—death does not add to the liquidity of the estate—should apply with equal force at the time of the second death. Accordingly 6166(g)(1)(D) should be expanded to include all subsequent transferees.

I would like to again stress that this amendment is noncontroversial, technical, and does not incur a revenue loss, and in its present form is supported by Treasury. The Department of the Treasury agreed that the second part of my original amendment would be thoroughly reviewed before the conference so that the issue of judicial forum might be included in this tax bill since it is in both the Ways and Means Committee tax bill and the Conable-Hance substitute. Judicial forum is essential if the integrity of our Tax Code is to be maintained.

I am prepared to yield to the chairman.

Mr. DOLE. Mr. President, I understand this has been cleared with the distinguished Senator from Louisiana and with Senator METZENBAUM from Ohio; is that correct?

Mr. SYMMS. That is correct.

Mr. DOLE. I know the staff of the distinguished minority leader are checking that now. I know that to be a fact. In any event we will wait until that word comes back.

It is also accurate, as the Senator from Idaho has pointed out, that this amendment has the approval of Treasury. It is contained, I might say, on the House side in both the Ways and Means Committee bill and the Hance-Conable bill.

Mr. SYMMS. That is correct.

Mr. DOLE. So it is an amendment that has great merit. The Senator from Kansas is prepared to accept it. I do not know of any objection from the Senator from Virginia.

Mr. HARRY F. BYRD, JR. I have no objection. I do not know about Senator LONG.

Mr. SYMMS. I would submit to the Senator from Kansas that this is the amendment I discussed with Senator LONG the other day. As a matter of fact, Senator LONG approved the amendment in its entire form, and I have dropped half of it.

Mr. LONG. I have no objection.

Mr. SYMMS. I yield back the remainder of my time.

Mr. DOLE. I yield back the remainder of my time.

The PRESIDING OFFICER. All right. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Idaho. (Putting the question.)

Mr. Symms' amendment (UP No. 312) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HARRY F. BYRD, JR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

COST RECOVERY ELECTIONS

Mr. BOSCHWITZ. I would like to ask the distinguished chairman of the Finance Committee to clarify the intent of the committee concerning one aspect of the cost recovery provisions of the bill. Under the bill, taxpayers are given some degree of flexibility by permitting certain elections to recover costs under the straight-line method and for extended periods rather than using the tables prescribing recovery percentages based on accelerated methods. My question is whether the bill would permit each company in an affiliated group of corporations to exercise an election or must the election be made for all depreciable assets placed in service during a taxable year by the affiliated group.

Mr. DOLE. In general, the elections provided under the bill are to be made on an entity-by-entity basis in a manner similar to the present law rules for the asset depreciation range system. Thus, in the case of an affiliated group of corporations, a separate election could be made with respect to each corporation within the group. For example, the parent company of an affiliated group could, for a taxable year, determine its cost recovery allowance for assets in the 5-year class under the prescribed accelerated recovery table although an election is made with respect to a subsidiary company to recover cost for its assets in the same class under a straight-line method over one of the prescribed periods of 5, 12, or 25 years.

Mr. BENTSEN. If the Senator would yield, I would like to know if the separate entity-by-entity elections would be available for component members of an affiliated group if a consolidated income tax return is filed.

Mr. DOLE. As under the present asset depreciation range system and consolidated return regulations, separate elections would be permitted. However, future availability of separate elections for component members during a taxable year would depend upon the applicable consolidated return regulations prescribed by the Treasury Department. As you know, the rules for filing consolidated returns are largely prescribed under Treasury regulations. The provisions of the bill would not in any way curtail Treasury authority to prescribe consolidated return rules, including those relating to cost recovery elections.

Further, appropriate restrictions will be imposed on the cost recovery options available in the case of asset transfers between members of an affiliated corporate group. Thus, intercompany asset transfers cannot be used as a mechanism to freely change the recovery period and method which was chosen when an asset was first placed in service by a member of an affiliated group. For example, if the original purchaser chooses to recover the cost of equipment under the straight-line method, an affiliated company cannot later purchase or acquire that equipment and choose to compute its cost recovery allowance under an accelerated method.

Mr. BENTSEN. I thank my distinguished colleague for clarifying these points.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SYMMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 313

(Purpose: Extend for one year the transitional rule to the generation-skipping provisions for wills and revocable trusts executed before June 11, 1976)

Mr. SYMMS. Mr. President, I send an unprinted amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Idaho (Mr. SYMMS) proposes an unprinted amendment numbered 313.

Mr. SYMMS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 256, after line 25, insert the following new section:

"SEC. 408. POSTPONEMENT OF GENERATION-SKIPPING TAX EFFECTIVE DATE.—Section 2003(c) of the Tax Reform Act of 1976 (Pub. L. 94-455) (relating to the effective dates of generation-skipping provisions), as amended by section 702(n)(1) of the Revenue Act of 1978 (Pub. L. 95-600), is amended by striking out 'January 1, 1982' in paragraph (2)(b) of such section and inserting in lieu thereof 'January 1, 1983'."

Mr. SYMMS. Mr. President, the amendment I am offering will extend the grandfather clause on the generation-skipping transfer tax until January 1, 1983.

The generation-skipping transfer tax is extremely complex and costly to administer. It is, in fact, so complex that even the most knowledgeable individual or corporate fiduciaries, insurance people, accountants and attorneys, all of whom are affected by this tax, are finding it extremely difficult to interpret or apply.

The generation-skipping transfer tax

can never be defended on revenue grounds. According to the Joint Tax Committee, this tax is projected to have no revenue effect in its early years and they hope to generate $400 million of revenue to the Treasury in its 20th year. However, the private sector has spent hundreds of thousands of dollars in attempting to understand and implement the law and to no avail. Two volumes, each the size of the yellow pages, have been published in an attempt to comprehend the law. Clearly, the tax is regressive since it does not collect any revenue but is costing the private sector significant sums of money to try and comply with the law.

While the generation-skipping transfer tax cannot be defended on revenue grounds, neither can it be defended on the ground that the statute can be made to work. There are numerous, complicated analytical steps that must be followed in order to determine whether any amounts are held in trust that will be subject the the generation skipping transfer tax. This analytical process often results in an unexpected and inequitable application of the tax. There are at least 14 key defined terms to master under chapter 13, as well as a handful of other terms not actually defined, but, nevertheless, essential to the operation of the statute. As if this were not enough, the generation-skipping tax has no antecedent in prior law, meaning that an estate planner's comprehension of Federal estate and gift tax concepts is of little value when grapping with chapter 13.

Furthermore, significant portions of the relating to generation-skipping transfer taxation are not in the statute and remain to be written. In particular, there are eight places on the face of chapter 13 where important rulemaking authority is delegated to the Secretary and, for good measure, there is a ninth resort to the Secretary, this one for information as opposed to rulemaking. None of these nine delegations has been discharged by issuance of final regulations, even though the first date upon which a taxable generation-skipping transfer may have occurred was June 12, 1976.

There are many complex provisions in the Internal Revenue Code, but perhaps none of such wideranging application as those relating to the generation-skipping transfer tax. Even to the few attorneys who enjoy the status of "expert" in estate planning affairs, chapter 13 presents difficulties which are insurmountable. As an example, according to a survey done recently at an American Bar Association nationwide meeting, only one attorney thought he comprehended most of the statute.

It is important to note that the question of complexity extends far beyond wills and trusts and those who prepare and sign them. Chapter 13 applies also to a broad range of so-called trust equivalents, arrangements which, while not "generation-skipping trusts," are deemed to have "substantially the same effect as a generation-skipping trust." (IRC S2611(d)(1)).

Practitioners were surprised to learn that in recently issued proposed regulations both estates and custodianships under Uniform Gifts to Minors Acts are considered by the Treasury Department to be among the "trust equivalent" arrangements to which chapter 13 applies. These arrangements are so commonplace, so fixed in character, so finite in duration and so far removed from the sort of conduct to which chapter 13 is directed that extension of the generation-skipping transfer tax rules to these devices is sure to result in the uninformed failure to comply with chapter 13 on a grand scale.

The foregoing indicates to many a clear and present danger to this country's voluntary compliance tax system. On the one hand, many will fail to comply with the requirements of chapter 13 out of simple ignorance. On the other hand, some will be encouraged to ignore chapter 13 in the belief that it is impossible for the Government to effectively enforce the tax and that, even in the event that a failure to comply is discovered, a plea of ignorance may appear to have sufficient validity to forestall the application of the penalty provisions.

If the Federal Government is to police the tax effectively, it must devise a system to keep track on all trust beneficiaries and all trustees under the hundreds of thousands of generation-skipping trusts in existence. It must know when each interest or power under each such trust terminates and when each trustee dies or leaves office. It must know when and how much property is added to all pre-existing trusts in order to determine the extent to which existing trusts have become subject to chapter 13. It must know when and in what fashion powers of appointment are exercised under generation-skipping trusts, and when interests or powers under such trusts are disclaimed or assigned.

In addition, the Federal Government must stockpile similar information as to the multiple of "trust equivalent" arrangements subject to the tax. Moreover, the Federal Government must acquire and store gift and estate tax information as to every person classified as a "deemed transferor" with respect to any "generation-skipping transfer" and must be prepared to supply that information to each form 706-B tax return preparer upon request.

The incredible amount of information that is required would seem to be beyond the storage capacity of any known computer. Even with active help from the taxpaying community, the collection and constant updating of the required data is an exercise the magnitude of which boggles the mind. Proper staffing to administer and collect the generation-skipping tax would have to be immense. Given the complexity of chapter 13, the training process alone seems overwhelming, and the number of civil servants needed to receive, analyze, store, sort, and respond to the required chapter 13 information would have to be staggering.

I urge all of my colleagues to support my amendment to simply defer the application of the tax with respect to pre-1976 wills until January 1983 so that the Congress can have time to examine this tax. During that period time, as chairman of the Estate and Gift Tax Subcommittee. I will continue to hold hearings and work out a solution to this problem. My subcommittee has already held 2 days of hearings on this and my conclusion is that this law is unworkable.

I will say that if it is the policy of this administration and this Congress to have an estate and gift tax then it would probably be equitable to have a generation-skipping transfer tax as well. However, the present tax is clearly not the tax to impose.

It clearly represents an idea that the Government wants not only to collect taxes, but to punish the taxpayers in the process. And, in this case no revenues have been collected. The only time that the tax might work is if everyone in the estate plan dies in order. If an individual dies out of order, then the wrong generations might be taxed, et cetera. I know in the years that I have served as a Member of Congress, that the Congress has been able to do many things but there is one thing I am sure of and that is that Congress will never be able to make individuals understand or comply with this law, and more important, I do not believe that we will ever be able to make them die in order.

Mr. President, if the distinguished chairman will voice his approval of this amendment, I will be happy to yield back the remainder of my time.

Mr. DOLE. Mr. President, I know that the distinguished Senator from Idaho has discussed this amendment with Treasury officials and with the Secretary of the Treasury. It is my understanding that it is supported by Treasury.

I also know that the Senator has discussed it with the Senator from Ohio (Mr. METZENBAUM) and with the Senator from Louisiana.

The amendment is acceptable to this Senator. I suggest that we withhold adopting it until we have a chance to check with Senator LONG and Senator METZENBAUM.

Mr. HARRY F. BYRD, JR. Mr. President, will the Senator yield?

Mr. SYMMS. I yield.

Mr. HARRY F. BYRD, JR. As I understand it, this has been worked out with the approval of the Treasury Department.

Mr. SYMMS. That is correct.

This amendment does not go as far as I would wish, but we are going to extend the grandfather clause for 1 year. The Treasury has agreed that they will take a very careful look at the total concept of the law to see what can be done to correct the law that was passed in 1976.

Mr. HARRY F. BYRD, JR. It is satisfactory to the Senator from Virginia. It is satisfactory to this side of the aisle to have the vote now.

Mr. SYMMS. In that case, I yield back the remainder of my time.

Mr. DOLE. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 313) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HARRY F. BYRD, JR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 314

(Purpose: To extend the same one time capital gains tax exclusion granted to elderly homeowners in 1978 to households in which at least one member is severely handicapped)

Mr. LEAHY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Vermont (Mr. LEAHY) proposes an unprinted amendment numbered 314.

Mr. LEAHY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the Resolution, insert the following section:

(a) section 121(a) (relating to one-time exclusion of gain from sale of principal residence by individual who has attained age 55) is amended to read as follows:

"(a) GENERAL RULE.—At the election of the taxpayer, gross income does not include gain from the sole or exchange of property if—

"(1) with respect to such property—

"(A) the taxpayer has attained the age of 55 before the date of such sale or exchange, or

"(B) the taxpayer or a dependent (as defined in section 152(a)(9)) is handicapped at the time of the sale or exchange of such property, and the principal purpose that such property is sold or exchanged was the handicap of the taxpayer or dependent, and

"(2) during the 5 year period ending on the date of the sale or exchange, such property has been owned and used by the taxpayer as his principal residence for periods aggregating 3 years or more."

(b) Section 121(d) of such Code is amended—

(1) by striking out "age, holding and use" each place it appears in paragraph (1), and

(2) by adding at the end of paragraph (8) the following new paragraph:

"(9) Handicapped defined. For the purposes of this section, a person is handicapped if he is unable to engage in any substantial gainful activity by reason of any medically determinable physical or mental impairment that can be expected to result in death or to last for a continuous period of not less than twelve months, as defined in title II, section 223(d) of the Social Security Act of 1935," as amended and the regulations under that section. An individual shall not be considered to be handicapped unless he furnishes proof of the existence thereof in such form and manner as the Secretary may require.

SEC. 2. (a) The heading for section 121 of the Internal Revenue Code of 1954 is amended to read as follows:

"SEC. 121. EXCLUSION OF GAIN FROM CERTAIN SALES OF A PRINCIPLE RESIDENCE.".

(b) The item relating to section 121 of such Code in the table of sections for part III of subchapter B of chapter 1 of such Code is amended to read as follows:

"SEC. 121. Exclusion of gain from certain sales of a principal resident.".

SEC. 3. (1) Section 1033(h)(3) and 1034 (1) of the Internal Revenue Code of 1954 are each amended to read as follows: "For the exclusion of gain from certain sales of a principal residence, see section 121.".

(b) Sections 1038(e)(1)(A), 1250(d)(7)(B), and 6012(c) of such Code are amended by striking out "One-time exclusion of gain from sale of principal residence by individual who has attained age 55" and insert in lieu thereof the following: "exclusion of gain from certain sales of a principal residence".

(c) Section 1250(d)(7)(B) of such Code is amended by striking out "age and ownership".

SEC. 4. The amendment made by this Act shall apply to sales or exchanges made on or after the date of enactment.

Mr. LEAHY. Mr. President, I ask unanimous consent that the names of Senator WEICKER, Senator RANDOLPH, Senator KENNEDY, Senator WILLIAMS, and Senator RIEGLE be added as cosponsors of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Mr. President, I am offering today an amendment to the Economic Recovery Act of 1981, House Joint Resolution 266. Senators WEICKER, RANDOLPH, KENNEDY, WILLIAMS, and RIEGLE join me in proposing an amendment to extend to severely handicapped Americans the same opportunity that was granted to elderly Americans under the Tax Reform Act of 1978. Under that act, individuals 55 years of age and older were granted a one-time exclusion from taxation of up to $100,000 in capital gains realized from the sale of their homes. The amendment I am proposing would offer this same exclusion of capital gains to homeowners who must sell their homes because either they or a dependent are handicapped.

This legislation would greatly benefit homeowners who, because of the many problems associated with being handicapped, sell their homes. At the same time its cost is quite low. The Department of the Treasury has estimated this amendment's cost, with expected personal rate reductions, at $12 million in fiscal year 1982, and at comparable figures for fiscal years 1983, 1984, 1985, and 1986. Over 30,000 Americans with severe mental or physical handicaps would benefit from this legislation during these years.

Mr. President, the obstacles that confront handicapped individuals are numerous and often insurmountable. Many are unemployed or underemployed. As a result, the average income for the disabled individual is substantially lower than that of the average American. Another hardship faced by the handicapped is the problem of accessibility. Many find that because of their disability they can no longer move with ease around their own homes. Often the hardships of inaccessibility and a severe reduction in income combine to force handicapped homeowners to sell their homes.

This amendment will not alleviate the harsh conditions which lead handicapped Americans to sell their homes. However, it will lighten the costly burden of relocation after the home has been sold.

A handicapped individual who must sell his or her home faces a bleak future. Most often, these people must relocate in housing specially adapted to the needs of the handicapped. Unfortunately, there is is a 2- to 3-year waiting list for federally subsidized handicapped housing. If, in addition, a handicapped individual must pay capital gains tax, the financial burden is intolerable.

Many organizations familiar with the plight of the handicapped homeowner have endorsed this proposal. They include the National Spinal Cord Injury Foundation, the National Association of Retarded Citizens, the National Multiple Sclerosis Society, the Arthritis Foundation, the Paralyzed Veterans of America, the American Coalition for Citizens With Disabilities, the American Physical Therapy Association, the American Occupational Therapy Association and the Association for the Severely Handicapped.

On behalf of the severely disabled homeowners, I urge my colleagues to adopt this amendment.

Mr. President, I have discussed this amendment with the distinguished chairman of the Finance Committee. I hope it is acceptable to the committee.

Mr. DOLE. Mr. President, I say to the Senator from Vermont that I am very sympathetic to the amendment. I agree with the amendment, and I am willing to accept it. Has the Senator discussed it with the distinguished Senator from Louisiana and the Senator from Ohio? So far as I know, there is no objection to the amendment. I think it is a good amendment. It is directed to a group of people that I believe deserve consideration from time to time, and I am pleased to have the Senator offer this amendment.

Mr. LEAHY. I thank the distinguished Senator from Kansas and his staff for the help they have given me and my staff in working out this matter. I would also like to thank Mike Choukas, Leslie Hayes and Linda Schurman of my staff for their work.

I believe the cost will be minimal to the Treasury, but the benefit to those for whom it is intended will be tremendous.

I am willing to yield back the remainder of my time.

Mr. HARRY F. BYRD, JR. Mr. President, I have no objection to the amendment. I am wondering about the same question put by Senator DOLE: Has this been cleared with Senator METZENBAUM and Senator LONG?

Mr. LEAHY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. LEAHY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr LEAHY. Mr. President, I yield back the remainder of my time.

Mr. DOLE. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 314) was agreed to.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. HUMPHREY). Without objection, it is so ordered.

Mr. DOLE. Mr. President, is there a vote set for 2 p.m.?

The PRESIDING OFFICER. That is correct.

Mr. DOLE. It has been the hope of the Senator from Kansas to squeeze in one more amendment that we could agree on before that time. It is now 2 p.m. So if it is all right with the Senator from Iowa, we will have the vote and then call up his amendment. Senator LEVIN is on the floor and he has an interest in that amendment. So we will take that up following the rollcall.

UP AMENDMENT NO. 311

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Montana.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

The result was announced—yeas 100, nays 0, as follows:

[Rollcall Vote No. 230 Leg.]

YEAS—100

Abdnor	Garn	Mitchell
Andrews	Glenn	Moynihan
Armstrong	Goldwater	Murkowski
Baker	Gorton	Nickles
Baucus	Grassley	Nunn
Bentsen	Hart	Packwood
Biden	Hatch	Pell
Boren	Hatfield	Percy
Boschwitz	Hawkins	Pressler
Bradley	Hayakawa	Proxmire
Bumpers	Heflin	Pryor
Burdick	Heinz	Quayle
Byrd, Harry F., Jr.	Helms	Randolph
Byrd, Robert C.	Hollings	Riegle
Cannon	Huddleston	Roth

Eagleton	Matsunaga	Warner
East	Mattingly	Weicker
Exon	McClure	Williams
Ford	Melcher	Zorinsky
	Metzenbaum	

So Mr. MELCHER's amendment (UP No. 311) was agreed to.

The PRESIDING OFFICER (Mr. ANDREWS). The Senator from Kansas is recognized.

Mr. DOLE. Mr. President, it is my understanding that the Senator from Iowa, the Senator from Michigan, and the Senator from Ohio have an amendment that we might be able to accept.

Mr. METZENBAUM. Mr. President, I call up my amendment at the desk.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Kansas?

Mr. METZENBAUM. I have no objection. I assume it is for the purpose of the Senator from Iowa calling up the amendment.

The PRESIDING OFFICER. The Senator from Iowa is recognized.

UP AMENDMENT NO. 315

(Purpose: To provide a deduction for the adoption of a qualified child by the taxpayer)

Mr. JEPSEN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Iowa (Mr. JEPSEN), for himself, Mr. HATFIELD, Mr. DURENBERGER, Mrs. HAWKINS, Mr. METZENBAUM, and Mr. LEVIN, proposes an unprinted amendment numbered 315.

Mr. JEPSEN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the joint resolution, insert the following:

SEC. . DEDUCTION FOR ADOPTION EXPENSES PAID BY AN INDIVIDUAL.

(a) IN GENERAL.—Part VII of subchapter B of chapter 1 (relating to additional itemized deductions for individuals) is amended by redesignating section 222 (as redesignated by section 103 of this Act) as section 223 and by inserting after section 221 the following new section:

"SEC. 222. ADOPTION EXPENSES.

"(a) ALLOWANCE OF DEDUCTION.—In the case of an individual, there shall be allowed as a deduction for the taxable year the amount of the qualified adoption expenses paid or incurred by the taxpayer during such taxable year.

"(b) LIMITATION.—

"(1) MAXIMUM DOLLAR AMOUNT.—The aggregate amount of adoption expenses which may be taken into account under subsection (a) with respect to the adoption of a child shall not exceed $.

"(2) DENIAL OF DOUBLE BENEFIT.—

"(A) IN GENERAL.—No deduction shall be allowable under subsection (a) for any expense for which a deduction or credit is allowable under any other provision of this chapter.

"(B) GRANTS.—No deduction shall be allowable under subsection (a) for any expense paid from any funds received under any Federal, State, or local program.

"(3) INTERNATIONAL ADOPTION.—No deduction shall be allowed under subsection (a) if the adoption of the child is an international adoption.

"(c) DEFINITIONS.—For purposes of this section—

"(1) QUALIFIED ADOPTION EXPENSES.—The term 'qualified adoption expenses' means reasonable and necessary adoption fees, court costs, attorney fees, and other expenses which are directly related to the legal adoption of a qualified child by the taxpayer and which are not incurred in violation of State or Federal law.

"(2) INTERNATIONAL ADOPTION.—The term 'international adoption' means an adoption—

"(A) occurring under the laws of a foreign country, or

"(B) involving a child who was a citizen of a foreign country who—

"(i) was brought to the United States for the purpose of adoption, or

"(ii) came to the United States under circumstances with respect to which the necessity for the child's placement in adoption proceedings was reasonably foreseeable.

"(3) QUALIFIED CHILD.—The term 'qualified child' means a child who—

"(A) is a member of a minority race or ethnic group, or

"(B) attained the age of 6 before the beginning of the taxable year for which a deduction is claimed under subsection (a), or

"(C) is handicapped (within the meaning of section 190(b)(3)).

"(4) MINORITY RACE OR ETHNIC GROUP.—The term 'minority race or ethnic group' includes Negroes, Hispanics, Mexicans, Puerto Ricans, Chicanos, or Native Americans.

(b) ADJUSTED GROSS INCOME.—Section 62 (defining adjusted gross income) is amended by inserting after paragraph (16) the following new paragraph:

"(17) ADOPTION EXPENSES.—The deduction allowed by section 222.".

(c) CONFORMING AMENDMENT.—The table of sections for such part VII, as amended by section 103, is amended by striking out the item relating to section 222 and inserting in lieu thereof the following:

"Sec. 222. Adoption expenses.
"Sec. 223. Cross references.".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years ending after the date which is 18 months before the date of enactment of this joint resolution.

Mr. JEPSEN. Mr. President, the amendment which I and my distinguished colleagues offer today is designed to provide a one-time, $1,500 maximum deduction during the taxable year for expenses incurred by the taxpayer for the adoption of a qualified child, which under this amendment means a child who is handicapped, or over the age of 6, or who is a member of a minority race or ethnic group.

The amendment is the product of several conferences between myself and the distinguished Senator from Michigan, Mr. LEVIN.

I wish the Senator to know that I appreciate greatly his effort and the effort of his staff in working out the amendment we now have before this body.

Mr. President, I have been informed that the Senator from Oregon (Mr. HATFIELD) will be speaking on this amendment and, therefore, I respectfully inform the Chair so as to protect his interest in this matter.

Mr. President, as I suggested a moment ago, this amendment is part of a more detailed effort by myself and other Senators to address what we believe to be the greatest burden and disincentive to the adoption process; namely, the cost of adoptions.

The facts on the number of adoptions annually in America are at best sketchy. Due to the fact that States are not required to report adoption statistics, precise national figures on the number of children either adopted or available for adoption are unavailable. Therefore, we

can only speculate and make assumptions based on outdated records or generally agreed upon information from the States.

What we do know and all agree upon is that a great deal of money is spent on America's children. The Government alone spends millions on the health, education, and general welfare of children, both at home and abroad.

According to the Senate Finance Committee report to H.R. 3434, the Child Welfare Amendments of 1979, the cost of foster care under aid to families with dependent children (AFDC) was approximately $351,171,877 in 1977. I emphasize again, this figure only represents foster care under AFDC. Unfortunately, figures for 1979–80 are not available on the cost of foster care. Nevertheless, it is expected that foster care in America has exceeded $400 million today.

It is estimated in a study prepared for the Children's Bureau within the Department of Health and Human Services that there are approximately 502,000 children in foster care which includes children in an institutional setting.

Of the estimated 502,000 children in foster care, approximately 102,000 were available for adoption. However, according to the 1977 national study of social services to children and their families, only 50,000 of the 102,000 children free for adoption through public agencies were placed in private homes.

If children are taken out of the foster care setting and placed in homes as adopted children, the cost to State and local governments and the Federal match for foster care will be greatly reduced, and as such, represents a very attractive offset of expenditures to the Federal Treasury.

I would like to note for the RECORD that I am not advocating the elimination or reduction of foster care institutions. It is my strong belief that there is a continued need for foster care institutions for those children and minors who unfortunately are never finally placed.

Mr. President, I emphasized again that precise adoption figures are not readily available. It is believed that there are at least 102,000 children available. It is further estimated that there are not more than 150,000 children available for adoptions.

Within the range of available adoptions, particularly if the low figure of 102,000 is utilized, it is estimated that 62 percent are white, 20 percent are black, 3 percent Hispanic, and 7 percent other. Of that entire total, it is further estimated that nearly 40 percent are nonwhite, 14 percent are mentally retarded, and nearly 50 percent are over age 7.

Mr. President, this amendment is specifically designed to assist hard to place children. It is these children, who are members of a minority race or ethnic group, or over the age of 6, or who are handicapped, which need the support of this amendment.

It is in the child's interest, the prospective parents' interest, and the national interest to help curb the dramatic impact in the initial cost of an adoption. To let the prohibitive initial costs of adoption deny a child an adoptive home and family is an injustice.

Mr. President, I want to make special note of the amendment's reference to the definition of handicapped within the meaning of section 190(B)(3) of the Tax Code. This section reads as follows:

(3) HANDICAPPED INDIVIDUAL.—The term "handicapped individual" means any individual who has a physical or mental disability (including, but not limited to, blindness or deafness) which for such individual constitutes or results in a functional limitation to employment, or who has any physical or mental impairment (including, but not limited to, a sight or hearing impairment) which substantially limits one or more major life activities of such individual.

One of the criticisms of this definition is that it is too broad and not conducive to situations affecting handicapped adoptions pertaining to tax deductions. The handicapped individuals which this amendment seeks to address are those individuals who are severely handicapped with illnesses such as spina bifida, cerebral palsy, cystic fibrosis, mental retardation, sight and hearing loss, Downs syndrome and severe heart defects.

There are many hidden costs associated with a handicapped child which are not covered as a medical expense, such as special toys, special equipment, such as a braille typewriter, babysitters, structural alterations, et cetera.

In regard to the $1,500 deduction of expenses incurred for each qualified child adopted by the taxpayer during the taxable year, the estimated cost is as follows:

[In millions]

Fiscal year 1982	$2
Fiscal year 1983	11
Fiscal year 1984	12
Fiscal year 1985	13
Fiscal year 1986	14

Finally, Mr. President, I have been greatly concerned about human life and the great and disparate need to protect human life.

The adoption of children, especially children with special needs as described in this amendment is a mere humane and practical alternative to a life of foster care or more tragically, no life at all because of the abortion alternative.

There is no question, that Americans from all walks of life and economic status have adopted special-needs children. I believe they will continue to do so. What we must do here is to help these families, once these children come together. I believe this amendment is a strong beginning. I believe it both enhances the quality of life and gives great incentive to preserve the integrity of human life in future years through the adoption process.

Mr. President, although I have spent a great deal of time explaining this amendment, the amendment speaks for itself. It is straightforward and the issue before us now is whether the Senate is willing and prepared to respond to this issue.

The chairman of the Committee on Finance has further agreed that we will hold hearings on the bills that I have proposed with regard to adoption generally. In this specific amendment, it is in the child's interest, the prospective parents' interest and the national interest, I think, to help curb the dramatic impact of the initial cost of adoption. I make note of this with particular reference to handicapped children.

Mr. President, I have been assisted quite ably in working on this amendment by the Senator from Michigan (Mr. LEVIN), who has had a longstanding interest in this. We have worked together in past months—in fact, in the last session—on this particular subject.

Before concluding my remarks so we may move on, I ask if Senator DOLE will yield for a question with regard to this particular amendment. With regard to holding hearings before his committee on the subject of deductions for adoption generally, the Senator has assured me and others that there will be provision for hearings and he will indeed hold them on adoption, deductions, and exemptions.

Mr. DOLE. The Senator is correct. I had indicated to the Senator in earlier conversations that we would have additional hearings in September. I have said a number of times on this floor, and I mean what I say, that we hope to report a second tax bill from the Finance Committee this year. A number of Members have had hearings on their amendments in subcommittees. They are concerned about whether or not their amendment might be considered at a later time. We believe there are some tax reforms in other areas that could pick up enough revenue to enable us to come to the floor later this year with another tax proposal.

I do pledge to the Senator from Iowa, the Senator from Michigan (Mr. LEVIN), and the Senator from Ohio (Mr. METZENBAUM), who may have an interest in expanding this proposal, that we shall proceed at that time to have hearings. We shall give the matter very careful consideration and I hope that the Senators who have an interest will be testifying before the committee.

Mr. JEPSEN. I thank the Senator from Kansas.

Mr. LEVIN. Mr. President.

The PRESIDING OFFICER. Does the Senator from Michigan seek recognition?

Mr. LEVIN. Yes, Mr. President, I do seek recognition.

The PRESIDING OFFICER. The Senator is recognized.

Mr. LEVIN. Mr. President, I thank my friend from Iowa. I commend him on his sponsorship. It is a pleasure to cosponsor this amendment with him and to note that Senator METZENBAUM has been actively involved in this area and will be a cosponsor of this amendment, as are a number of our colleagues. It is a reform which has been a long time coming. I thank our friend from Kansas for his willingness to work with us on this amendment. It shows the kind of progressive flexibility that is characteristic of the Senator from Kansas. I personally thank him for it.

Mr. President, I noticed that, in the middle of a tax bill, it is sometimes difficult to cope with 43 balls in the air at

one time. This is a particularly significant ball, because it involves the lives of children who are in foster care homes, who have difficulty in getting out of those homes and being adopted because of the expense of adopting them. This amendment will permit the deduction of expenses incurred in the adoption of those special-needs children and, therefore, will result in an increased number of adoptions of those special-needs children.

The amendment defines special needs as qualified children who are members of ethnic groups, minority races, children who have attained the age of 6 before the beginning of the taxable year for which the deduction is claimed—in other words, the older children—and handicapped children. It is the kind of children who have special needs and because of those special needs, are frequently overlooked when it comes to adoption.

Mr. President, we have literally tens of thousands of those children in foster care homes, wherein they cost society about $7,000 per year to maintain. This amendment will provide an incentive for the adoption of these special-needs children.

Mr. President, I am wondering if I could ask a question of the chairman of the Committee on Finance. I understand that there has been a bit of confusion on the form of the amendment. My understanding was that it was acceptable to the chairman, and it was intended to be in this amendment, if I can find my friend from Iowa, that the siblings also be listed as a special-needs situation.

Mr. DOLE. Mr. President, I think the only question the chairman has is whether if siblings are included, we would not be duplicating the $1,500 deduction for three or four children. If that matter could be resolved, I think that would answer the question we posed to the Senator from Iowa. I do not think there would be an intent to pyramid the deductions.

Mr. LEVIN. The Senator is correct. It is not the intent to duplicate that. I wonder if we could have a brief quorum call so we can straighten out that addition.

I suggest the absence of a quorum, Mr. President.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. JEPSEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JEPSEN. Mr. President, I have sent to the desk a revised amendment that I ask unanimous consent to be substituted for the initial amendment. The reason for this is that we inadvertently had submitted an amendment that was incomplete, in that some figures and words were inadvertently omitted. Those changes have been made, and all parties have agreed to it.

The PRESIDING OFFICER. Without objection, the revised amendment is substituted for the Senator's original amendment.

The revised amendment is as follows:

At the appropriate place in the joint resolution, insert the following:

SEC. —. DEDUCTION FOR ADOPTION EXPENSES PAID BY AN INDIVIDUAL.

(a) IN GENERAL.—Part VII of subchapter B of chapter 1 (relating to additional itemized deductions for individuals) is amended by redesignating section 222 (as redesignated by section 103 of this Act) as section 223 and by inserting after section 221 the following new section:

"SEC. 222. ADOPTION EXPENSES.

"(a) ALLOWANCE OF DEDUCTION.—In the case of an individual, there shall be allowed as a deduction for the taxable year the amount of the qualified adoption expenses paid or incurred by the taxpayer during such taxable year.

"(b) LIMITATION.—

"(1) MAXIMUM DOLLAR AMOUNT.—The aggregate amount of adoption expenses which may be taken into account under subsection (a) with respect to the adoption of a child shall not exceed $1,500.

"(2) DENIAL OF DOUBLE BENEFIT.—

"(A) IN GENERAL.—No deduction shall be allowable under subsection (a) for any expense for which a deduction or credit is allowable under any other provision of this chapter.

"(B) GRANTS.—No deduction shall be allowable under subsection (a) for any expense paid from any funds received under any Federal, State, or local program.

"(3) INTERNATIONAL ADOPTION.—No deduction shall be allowed under subsection (a) if the adoption of the child is an international adoption.

"(c) DEFINITIONS.—For purposes of this section—

"(1) QUALIFIED ADOPTION EXPENSES.—The term 'qualified adoption expenses' means reasonable and necessary adoption fees, court costs, attorney fees, and other expenses which are directly related to the legal adoption of a qualified child by the taxpayer and which are not incurred in violation of State or Federal law.

"(2) INTERNATIONAL ADOPTION.—The term 'international adoption' means an adoption—

"(A) occurring under the laws of a foreign country, or

"(B) involving a child who was a citizen of a foreign country who—

"(i) was brought to the United States for the purpose of adoption, or

"(ii) came to the United States under circumstances with respect to which the necessity for the child's placement in adoption proceedings was reasonably foreseeable.

"(3) QUALIFIED CHILD.—The term 'qualified child' means a child who—

"(A) is a member of a minority race or ethnic group, or

"(B) attained the age of 6 before the beginning of the taxable year for which a deduction is claimed under subsection (a), or

"(C) each member of a sibling group if the sibling group is adopted.

"(D) is handicapped (within the meaning of section 190(b)(3)).

"(4) MINORITY RACE OR ETHNIC GROUP.—The term 'minority race or ethnic group' includes Blacks, Hispanics, Mexicans, Puerto Ricans, Chicanos, or Native Americans."

(b) ADJUSTED GROSS INCOME.—Section 62 (defining adjusted gross income) is amended by inserting after paragraph (16) the following new paragraph:

"(17) ADOPTION EXPENSES.—The deduction allowed by section 222.".

(c) CONFORMING AMENDMENT.—The table of sections for such part VII, as amended by section 103, is amended by striking out the item relating to section 222 and inserting in lieu thereof the following:

"Sec. 222. Adoption expenses.
"Sec. 223. Cross references.".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years ending after the date which is 18 months before the date of enactment of this joint resolution.

Mr. JEPSEN. Mr. President, I yield to the distinguished Senator from Michigan, who has been helpful in drafting this amendment.

Mr. LEVIN. I thank the Senator from Iowa for his leadership in this matter.

Mr. President, the part of the amendment that was inadvertently omitted has been incorporated into it.

This amendment is a strong beginning down a road which I hope will lead to the adoption of tens of thousands of children who now needlessly are in foster care facilities.

I wish to say for the record, because I noted that the Senator from Kansas is not in the Chamber and that the Senator from Louisiana is, that there is no intention here to permit the duplication of any expense. Even though there was no ready place to write that into the amendment, as I indicated to the Senator from Kansas we would, nonetheless, in terms of legislative history, the intention is that there not be a duplicate deduction allowed here.

Mr. President, for every child adopted, we will be saving about $7,000 a year, which is the cost of maintaining one of these children in a special care or in a foster care facility. This is not only wise, therefore, in terms of encouraging adoptions, a cause in which the Senator from Iowa has been active, but also, it is going to result in some savings to the Treasury, even though at first blush it may appear that there is a price tax of perhaps $20 million a year on the cost of this amendment.

Now that the Senator from Kansas, the chairman, is in the Chamber, I assure him that there is no intent to permit a duplicate deduction by adding the language we added to this amendment.

Mr. DOLE. Mr. President, if the Senator will yield, I believe we can also make that point at the conference—the history we are making now and the history in the conference report.

Mr. LEVIN. I thank the Senator.

I thank the Senator from Louisiana for his cooperation.

I yield to the Senator from Ohio (Mr. METZENBAUM).

Mr. METZENBAUM. Mr. President, this is a major step forward, not as far as I would like to go, but I do join Senators LEVIN and JEPSEN in offering an amendment designed to aid families who will provide homes for children through adoption.

The Senator from Ohio has a pending amendment along the same line that actually goes further, but I recognize that at this point it is a welcome sign to be opening the door somewhat in this area.

There are approximately 120,000 American children who are today in need of families. Although I believe there is virtually universal agreement

as to the need to place these children, the fact remains that the tax laws as currently written actively discourage families who are willing to open their homes and their hearts to these desperately needy children.

Consider, for example, the fact that adopting families, whose median income is $20,400 per year, must pay an average of between $4,000 and $6,000, sometimes as much as $7,000, in various adoption fees. That comes to 20 percent or more of a family's gross annual income—and without 1 penny being spent for feeding, clothing, and raising the child, with all the attendant expenses.

Today, these costs, which include legal bills, adoption fees, and medical expenses for the natural mother, are not deductible.

Adopting families get no help whatsoever. That should not be. As a matter of fact, in many instances, the adopting family does so much more for the total community by taking that child off the public welfare rolls, off the public expense, that we should be doing far more for the adopting family, who not only is cutting back on the expense the community would otherwise have but also, in many instances, is making it possible for that child to grow up in an appropriate home.

Our amendment would give adopting families the encouragement they deserve by allowing them limited tax deductions for the reasonable and necessary expenses which are directly related to adopting a child.

I point out that this amendment does not go as far as it should. This amendment is constrained with some specific limitations as to which kind of child can be adopted and for which you can obtain a tax benefit. I would prefer to go much further. As a matter of fact, in The Stronger American Families Act, which I introduced earlier this year, we would have gone further.

I also have some reservations with respect to the part of this amendment which excludes the adoption of international children. I share that concern with the able Senator from Iowa, and I pointed out to him my reservations along that line, as to why the parents who adopt that child should be entitled to equal consideration. He very appropriately poined out to me that there are so many American children who are crying out to be adopted that it probably does provide an appropriate kind of exclusion not to provide this tax incentive for international children as well as for those who are native born.

This is a good amendment. It is not nearly as good an amendment as I would like it to be. It does have very strict limitations. But I believe it is a major step forward, and I am happy to join my friend from Iowa and my friend from Michigan. I believe this amendment is better than nothing, and I commend them for their efforts in this situation.

Mr. JEPSEN. Mr. President, although I spent a great deal of time explaining this amendment, this amendment speaks for itself. It is straightforward, and the issue before us now is whether the Senate is willing to respond to this issue.

Mr. President, if the Chair will ask the Senator from Kansas, this Senator is ready to yield back any remaining time and move on.

Mr. DOLE. Mr. President, it is also my understanding that the addition of "sibling groups" to this amendment will not create a double deduction of $1,500 for the expenses incurred in adopting the same child. There will be a maximum deduction of $1,500 for expenses incurred in the adoption of each "special needs" child, as defined in the amendment, even though the child is a member of a sibling group and is also handicapped. Furthermore, it is my understanding that if a child falls within two or more of the "special needs" children categories, there will only be one deduction of up to $1,500 for the expenses incurred in the adoption of the child. For instance, if a child is handicapped and also a member of a minority group, there will only be one deduction of up to $1,500 for expenses incurred in adopting the child.

● Mr. HATFIELD. Mr. President, I strongly support Senator JEPSEN's amendment which provides a tax deduction for adoption expenses and commend him for bringing this issue to the Senate's attention. This amendment focuses upon "hard to place" children—those who are handicapped, members of a minority race, or over the age of 6, and will greatly aid both prospective adoptive families and 100,000 available youngsters to cement a permanent and loving home.

Somewhere, I suspect it began in the 1930's and 1940's, we began to get the idea that it was the Government's job to take care of children and, when the churches and private citizens failed to take up the slack, Government stepped in with the best of intentions to provide institutions to care for these children. Today we have an elaborate institutional network that the Federal Government provides for AFDC foster children that costs approximately $400 million a year. It seems that foster care develops an inertia of its own that is expensive and insensitive to the child's right to a permanent and loving home.

Mr. President, the costs of adopting a child are astronomical and generally are not covered by employer health plans. The agency fees, placement costs, post placement studies, medical and legal fees, court costs, travel and assorted fees make a blue ribbon baby adoption cost several thousand dollars. Unfortunately, a "special needs" child's adoptive costs can make it impossible for the average American family to adopt.

Senator JEPSEN's amendment is an important step that we can take to encourage families to adopt these 100,000 available children.

Mr. President, even though I strongly support this amendment I am concerned that international adoptions were excluded from the amendment. For many families, an international adoption is the only alternative, and it is fraught with the risk of significant medical expenses, travel costs, additional agency and legal fees. These costs were estimated by Holt International, a pioneering agency located in Eugene, Oreg., to range from $4,000–$8,000.

Since only 5,000 international adoptions occur each year the revenue loss would not exceed $3 million a year. I fail to see the difference between a needy child in India that is sent to an American family by Mother Teresa and a child that happens to be born in America. While I agree that we have a special responsibility to American-born children, we must remember that existing law, agency practices, and a typical 3-year waiting list for U.S. children make international adoption a last resort for most families. The motto of Holt International puts it very well:

> Every child of whatever nation or race, has the right to grow up with parents of his own. The silent call of homeless children is to all men of good will to see that neither apathy nor prejudice, neither custom nor geographic boundary shall prevent these children from receiving this God-given right.

Mr. President, I strongly endorse the pending amendment but I urge my colleagues to consider including international adoptions in any legislation that is finally adopted.●

Mr. CRANSTON. Mr. President, I am pleased to support the amendment offered by the Senator from Michigan (Mr. LEVIN) and the Senator from Iowa (Mr. JEPSEN) to provide for a tax deduction for families who adopt children with special needs. This amendment will help offset the costs incurred by these families in adopting children with special needs—children who might otherwise linger in foster care at a tremendous cost to the taxpayers and be denied the warmth and stability of an adoptive home.

Mr. President, I have been actively involved for many years in efforts to help free the thousands and thousands of children caught in the foster care system. We have made tremendous progress in the past few years, first with the passage of title II of Public Law 95–266, the Adoption Reform Act, which established various mechanisms for bringing together potential adoptive parents and foster children with special needs, and then last year with the passage of Public Law 96–272, the Adoption Assistance and Child Welfare Act of 1980, which provided for an adoption assistance program to facilitate the adoption of children with special needs. This amendment follows the same direction—eliminating the barriers which inhibit the removal of these children from foster care and their placement into adoptive homes. The Senator from Michigan has been actively involved in these earlier efforts and I applaud his dedication and initiative in bringing this amendment before the Senate today.

Mr. President, during hearings I held during the 95th and 96th Congresses as chairman of the former Child and Human Development Subcommittee, I heard from many parents seeking to

adopt children with special needs. They described over and over the tremendous difficulties they faced in trying to remove a child from the foster care system and bring such a child into their homes. One enormous obstacle was often simply initiating and following the sometimes arduous task of legally freeing a child for adoption and completing the adoption. The legal and other costs such as home studies often mount into thousands of dollars. Since most of the families adopting children with special needs have other children, these costs can be overwhelming. This amendment would provide some relief for these families and would operate to encourage, rather than discourage, the adoption of children with special needs. I am delighted to support this amendment as one more step toward our goal of freeing thousands of children from foster care and facilitating their adoptive placement in loving adoptive families.

Mr. DOLE. Mr. President, I am prepared to yield back the remainder of my time.

The PRESIDING OFFICER. All time is yielded back.

The question is on agreeing to the amendment of the Senator from Iowa.

The amendment (UP No. 315) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I suggest the absence of a quorum, and I might say before doing that there are a couple of other amendments. I understand the Senator from New Jersey, Senator BRADLEY, is prepared to call up his amendment and at 3:15 p.m. the Senator from Pennsylvania, Senator HEINZ, will be prepared to call up his amendment.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATUS OF AMENDMENTS

Mr. DOLE. Mr. President, I might give a little report for those Senators who have an interest in trying to get this bill finished today, either early evening or late evening or during the middle of the night.

There are now only three Republican amendments pending, three plus one that is now pending, plus the cash management amendment of the Senator from Kansas which he will offer to balance the books at the appropriate time because we have adopted some amendments which have somewhat distorted the numbers.

I understand the distinguished Senator from New Jersey (Mr. BRADLEY) has an amendment that he will call up. We have a number of colloquies that could be taken care of.

We are working on a couple of amendments that the Senator from Montana (Mr. BAUCUS) has an interest in.

It is my understanding that the Senator from Delaware (Mr. BIDEN) has an amendment that he wishes to offer.

Senator EAGLETON has an amendment we are prepared to accept. We are working on horse depreciation with Senator HUDDLESTON that is in the process of negotiation.

Aside from that, the Senator from Kansas does not know of any amendments, unless everybody starts calling up every amendment on the list for some reason unknown to this Senator, that will be offered.

So it would seem to me we are in striking distance of completing action on this proposal.

I would again say to the staffs or Members who may be listening that we hope you will come to the floor with your amendment so that we might proceed to its early consideration, either early evening or early morning.

I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. ABDNOR). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, it has been now 30 or 40 minutes since anybody has come to the floor with an amendment. I do not know whether we are slowing down or there are no more amendments. Certainly, after 11 days, the Senator from Kansas would be willing to go to a vote.

I see the Senator from New Jersey.

Mr. President, I am advised by the Senator from New Jersey that he will be available at 4:30 to introduce an amendment. I understand that Senator BAUCUS and Senator ROTH are trying to work out an agreement on an amendment on structures and that another one by Senator ROTH will not be offered. That leaves the Heinz amendment. I understand he was to offer it at 3:15. I hope we defeat that amendment.

That would leave two amendments by the chairman and the chairman cannot offer one of those amendments until he determines near the end just how much money we need to make up what we have spent in the last several days. Therefore, I again urge my colleagues to find their way to the Senate floor and offer their amendments. There are a number under negotiation. The distinguished Senator from West Virginia, Senator ROBERT C. BYRD, is making progress on that amendment. Senator DECONCINI has an amendment, along with Senator ARMSTRONG on ESOP. That is under discussion. There are amendments by Senator EAGLETON and Senator STENNIS; Senator RIEGLE has an amendment listed, and Senator SASSER. I understand he will not call up that amendment. Senator KENNEDY has eight or nine amendments. I am not certain whether he intends to call all those amendments up.

Mr. President, before suggesting the absence of a quorum, I again urge my colleagues to help us dispose of this bill, either early this evening or early tomorrow morning.

Mr. President, I suggest the absence of a quorum and ask unanimous consent that the time not be charged against either the Senator from Kansas or the Senator from Louisiana.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HEINZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 316

(Purpose: To amend section 103 of the Internal Revenue Code of 1954 with respect to the tax treatment of industrial development bonds issued to finance pollution control or waste disposal facilities)

Mr. HEINZ. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Pennsylvania (Mr. HEINZ), for himself, Mr. PACKWOOD, Mr. HART, Mr. BENTSEN, and Mr. RANDOLPH, proposes an unprinted amendment numbered 316.

Mr. HEINZ. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

SEC. . INDUSTRIAL DEVELOPMENT BONDS ISSUED TO FINANCE POLLUTION CONTROL OR WASTE DISPOSAL FACILITIES

(a) IN GENERAL.—Section 103 (relating to interest on certain governmental obligations) is amended by redesignating subsection (i) as subsection (k), and by inserting after subsection (h) the following new subsections:

"(i) AIR OR WATER POLLUTION CONTROL FACILITES.—For purposes of this section—

"(1) IN GENERAL.—The term 'air or water pollution control facility' means land or property of a character subject to depreciation under section 167—

"(A) which is acquired, constructed, reconstructed, or erected to abate or control water or atmospheric pollution or contamination by removing, altering, disposing, storing, or preventing the creation or emission of pollutants, contaminants, wastes, or heat,

"(B) which is certified by the Federal certifying authority (as defined in section 169(d)(2)) or the State certifying authority (as defined in section 169(d)(3)) as meeting or furthering Federal or State requirements for abatement or control of water or atmospheric pollution or contamination, and

"(C) all or a portion of the expenditures for the acquisition, construction, reconstruction, or erection of which would not be made except for the purpose of abating, controlling, or preventing pollution.

"(2) Exempt financing to be unavailable for expenditures for purposes other than pollution control.—

"(A) IN GENERAL.—Subsection (b)(4)(F) of this section shall not apply with respect to any issue of obligations (otherwise qualifying under subsection (b)(4)(F)) if the portion of the proceeds of such issue which is used to provide air or water pollution control facilities exceeds (by more than an insubstantial amount) the amount by which—

"(i) the cost of acquiring, constructing, reconstructing, or erecting the facility, exceeds

"(ii) the net profit which may reasonably be expected to be derived through the recovery of wastes or otherwise in the operation of the facility over its actual useful life.

"(B) NET PROFIT.—For purposes of this paragraph, the term 'net profit' means the present value of benefits (using a discount rate of 12½ percent) to be derived from that portion of such cost properly attributable to the purpose of increasing the output or capacity, or extending the useful life, or reducing the total operating costs of the plant or other property (or any unit thereof) in connection with which such facility is to be operated, reduced by the sum of—

"(i) the total cost incurred to acquire, construct, reconstruct, or erect the property (reduced by its estimated salvage value), and

"(ii) the present value (using a discount rate of 12½ percent of) all expenses reasonably expected to be incurred in the operation and maintenance of the property, including utility and labor costs, Federal, State, and local income taxes, the cost of insurance, and interest expense.

"(C) LIMITATION ON EXPENDITURES UNDER SUBSECTION (b)(4)(f)—

"(i) IN GENERAL.—For purposes of subsection (b)(4)(F), the face amount of obligations issued for facilities preventing the creation or emission of pollutants, contaminants, waste, or heat to be installed at any new manufacturing or processing plant shall not exceed the amounts described in clause (ii) of this subparagraph after application of subparagraphs (A) and (B) of this paragraph.

"(ii) INSTALLATIONS AT NEW PLANTS, ETC.—In the case of such facilities described in subsection (b)(4)(F) to be installed at new plants (as defined in clause (iii) of this subparagraph), the aggregate authorized face amount of obligations to be issued therefore shall not exceed the sum of 30 percent of the first $100,000,000 of capital expenditures paid or incurred in connection with such plants, 25 percent of the second $100,000,000 of such capital expenditures, 20 percent of the third $100,000,000 of such capital expenditures and 15 percent of such capital expenditures in excess of $300,000,000 plus the costs and expenses incurred in issuing such obligations.

"(iii) NEW PLANT.—For purposes of this subparagraph the term 'new plant' means any plant or identifiable part thereof, or other location that is or could be a source of pollution, placed in service within the 6-year period beginning 3 years before the date of any issue for the facility and ending 3 years after such date of issuance of the obligations described in clause (i). For purposes of clause (ii), all the capital expenditures during the 6-year period shall be aggregated. A major expansion of the capacity of any plant or identifiable part thereof or a major conversion in the use to which any plant (or identifiable part thereof) is devoted, shall be treated as a new plant. For purposes of this paragraph a major expansion of capacity shall mean an increase in capacity of 35 percent, and a major conversion in use shall mean a change affecting 35 percent of the output of the plant. Any plant or identifiable part thereof not described in the preceding three sentences shall be deemed an existing plant.

"(iv) CAPITAL EXPENDITURES TAKEN INTO ACCOUNT.—The capital expenditures taken into account with respect to any new plant or other source of pollution for purposes of this subparagraph are the expenditures which are properly chargeable to capital account and which are either made within 3 years before the date of the issuance of the issue or can reasonably be expected (at the time of the issuance of the issue) to be made within 3 years after the date of such issuance.

"(j) SOLID WASTE DISPOSAL FACILITIES.—For purposes of this section, the term 'hazardous waste or solid waste disposal facilities' includes land and property of a character subject to depreciation under section 167 which is acquired, constructed, reconstructed, or erected for no significant purpose other than to comply with hazardous or solid waste management requirements imposed by the Solid Waste Disposal Act.".

(b) CONFORMING AMENDMENT.—Subparagraph (E) of section 103(b)(4) is amended by inserting ", hazardous waste," after "sewage".

(c) CLARIFICATION OF REFERENCE.—For purposes of section 103(j) any reference to the Solid Waste Disposal Act means the Solid Waste Disposal Act as amended by the Resource Conservation and Recovery Act of 1976 and as it is, or may be, amended from time to time by other Acts. No inference shall be drawn from the preceding sentence with respect to the presence of absence of the words "as amended", by themselves or in combination with a reference to another Act, whenever reference is made in any other provision of law to an Act by its short title.

(d) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to obligations issued after the date of enactment of this Act and with respect to taxable years ending after such date.

SEC. . EXTENSION OF TELEPHONE EXCISE TAX.

(a) IN GENERAL.—The table contained in paragraph (2) of section 4251(a) relating to imposition of tax on communication services is amended by striking out the last 2 lines of such table and inserting in lieu thereof the following:

"During 1980 or 1981 ---------- 2
"During 1982, 1983, 1984, 1985, and 1936 ---------- 1.25"

(b) CONFORMING AMENDMENT.—Subsection (b) of section 4251 is amended by striking out "January 1, 1983" and inserting in lieu thereof "January 1, 1987.".

Mr. HEINZ. Mr. President, I am today proposing an amendment to the Economic Recovery Tax Act that might well be called the Pollution Control Bond Regulatory Reform Act of 1981.

The adoption of this amendment is not merely justified; it is long overdue. It is overdue because, for years, the Internal Revenue Service, through regulations issued pursuant to section 103 of the code, quite simply, has thwarted the intent of Congress by precluding arbitrarily the use of tax-exempt pollution control bonds for what Congress intended their purposes to be.

Therefore, the adoption of this amendment, in my judgment, is essential if the Economic Recovery Tax Act is to live up to its stated purpose of achieving economic recovery and if we are to rein in the regulatory excesses perpetrated by the bureaucracy at the Internal Revenue Service, which threatens to jeopardize the economic growth we would like to see.

Mr. President, the case for the adoption of my amendment can be summarized as follows:

First, this amendment is not exactly new to this body. It was agreed to for adoption by this body, by unanimous consent, when we were taking up the superfund bill last fall which, as Senators will recall, was passed overwhelmingly by this body, and it was part of the bill.

All parties in the Finance Committee, Senator DOLE and Senator LONG; all parties in the Environment and Public Works Committee, Senator RANDOLPH and Senator STAFFORD; all the people who were going to be conferees on S. 1480 had signed off on this proposal.

It is the identical proposal that was in S. 1480, which I asked the Senate to strike by unanimous request for the sole reason that we wanted to get S. 1480 passed in the House without it having to be referred to the Ways and Means Committee, where it would have been removed because of this particular provision.

Since then, what have we done? In addition to nearly passing it, we have had an additional day of hearings on the bill. We had the hearings the day after we marked up the Tax Reduction Act which is before the Senate. The fact that we did it on the very day after we marked up this bill, I believe, is an indication of the urgency, that we really need to enact these pollution control bond regulatory reforms that are contained in this amendment.

Second, Mr. President, the fact is that the compliance costs that Federal and State pollution control mandates are so high and so burdensome that they do jeopardize the success of the economic recovery program with respect to many of this Nation's basic industries, and that will continue to be the case unless this amendment is adopted.

Third—I referred to this a moment ago—I suspect that for anybody who cares about the integrity of the legislative process, the fact is, quite simply, that the Internal Revenue Service, through regulations that are not all consistent with the legislative record or with the legislative words in the underlying legislation, has thwarted the intent of Congress as reflected in section 103 of the Internal Revenue Code and in the passage of various environmental control laws.

Fourth, my amendment would allow section 103 pollution control bonds to be used for the legislated, intended purposes—namely, compliance with air and water pollution control and solid and hazardous waste management requirements; and we would do so with minimizing the loss to the Treasury.

When I say "minimizing the loss to the Treasury," what I am saying is that if we simply enacted the section 103 proposal as it would have passed the Senate last year, the revenue loss would have been $100 million each in 1983 and 1984 fiscal years and $200 million revenue loss each in fiscal years 1985 and 1986.

However, this amendment pays for itself, and then something more, because we have an offset in this amendment

that will cause it to raise money. The amendment, as a whole, will raise $94 million in fiscal 1982, an additional $67 million in 1983, an additional $91 million in 1984, and an additional $15 million in 1985. It is not until 1986 that it goes into the red.

In sum, through 1986, it picks up $154 million for the Treasury. So this amendment is better than revenue neutral; it is a responsible amendment; and we achieve this simply by phasing out the telephone excise tax a little more slowly.

Let me briefly expand on each of those points.

FINANCE HEARINGS HELD AFTER TAX BILL MARK-UP DEMONSTRATED URGENCY OF POLLUTION CONTROL BOND REGULATORY REFORMS

For the benefit of my distinguished colleagues who do not serve on the Finance Committee, let me explain that hearings on this proposal were not held until June 26, the day after markup of the tax reduction bill had been completed.

But the expert witnesses who testified that day presented compelling arguments for immediate passage of the legislation on which this amendment is based—S. 169, cosponsored by Senators RANDOLPH, GLENN, LUGAR, GARN, DIXON, and ANDREWS.

To recap the testimony presented to the Finance Committee:

Wayne Nichols, director of the Ohio Environmental Protection Agency, said, that this proposal—

Would do more to help eliminate sulfur dioxide and other forms of air pollution than any other measure. It would enable Ohio to assist its utilities and industries, which are now heavily burdened by the cost of complying with pollution control laws, by increasing the availability of the single most important weapon in the fight against pollution—financing at reasonable rates.

In its testimony, the National Association of Manufacturers cited the report of the National Commission on Air Quality issued in March 1981, which cited as obstacles to improved air quality the very IRS regulations my amendment would reform. The NAM observed that in view of the combination of advanced implementation of pollution control laws and the current IRS restrictions it is difficult to see how many small companies will be able to weather increasing environmental regulation.

Observing the strategic importance of minerals, the American Mining Congress cited a House Committee on Interior and Insular Affairs report, "U.S. Minerals Vulnerability: National Policy Implications," which concluded:

The very nature of mineral operations requires large capital and operating expenditures for pollution control, health and safety equipment, and mined land reclamation. Funding for achieving these worthwhile objectives has placed a heavy burden upon the already strained mining industry. McGraw-Hill studies have found that pollution control expenditures during the last nine years by the entire mining industry averaged 8 percent of their total capital expenditures (and a staggering 19 percent for the nonferrous metal industry) compared to only 6 percent for all industries.

William B. Holmberg, vice president, Kidder, Peabody & Co., Inc., said:

Kidder, Peabody strongly endorse S. 169. . . . As the Committee knows from prior testimony, Kidder does not customarily take the role of an advocate but prefers to note factors Congress should consider when considering legislation. Our reversal is due to the fact that Kidder belives that it is inappropriate for the IRS to override the statute through regulations.

On behalf of the Council of Pollution Control Financing Agencies, its president, Ronald Bean, executive director of the Illinois Environmental Facilities Financing Authority, noted:

The Council's member agencies operate at the intersection of environmental goals and economic development goals.

The Council has endorsed this amendment because the proposal—

Would make it clear that the Congress did not and does not intend to have this inequitable implementation of Section 103 by the Treasury.

The Institute of Chemical Waste Management, National Solid Wates Management Association, testified—

We hope that you will speed approval of S. 169 to direct the Secretary of the Treasury to extend IDB financing eligibility to hazardous waste management projects and, thus, accelerate the pace of bringing these new projects into existence so that existing facilities receiving hazardous industrial wastes can be measured strictly against the yardstock of the new Federal hazardous waste management regulations.

COSTS OF POLLUTION CONTROL COMPLIANCE JEOPARDIZE SUCCESS OF ECONOMIC RECOVERY PROGRAM

Without dwelling further on the testimony the Finance Committee heard on June 25, let me summarize the case for swift adoption of the regulatory reforms contained in my amendment: Unless section 103 regulations are revised, the massive capital expenditures mandated by Federal and State pollution control laws threaten the ability of American industry to make the job-creating investments that would otherwise be encouraged by the Economic Recovery Tax Act.

As socially desirable and necessary as many Federal and State pollution control mandates may be, the investments required for compliance generally are not productive investments in the sense of improving efficiency of operations or increasing output. In 1978, pollution abatement expenditures accounted for the following percentage of all investment in the following basic industries: steelmaking—16.6 percent; chemicals—7.1 percent; petroleum—8.3 percent; and utilities—10 percent. As we approach the compliance deadlines for many environmental control acts, these costs can be expected to increase.

In fact, in the case of the steel industry, a report completed by Arthur D. Little, Inc., for the American Iron and Steel Institute, concluded that environmental control expenditures for the next decade may reach $7 billion. Similarly, the chemical industry and related industries face the "double whammy" of complying with the 600-plus pages of hazardous waste control regulations promulgated by the Environmental Protection Agency under the Resource Conservation and Recovery Act—and paying a billion-plus dollars in additional taxes into the "Superfund" over the next 5 years. Other industries face similar mounting cost burdens for compliance.

IRS SECTION 103 REGULATIONS THWART CONGRESSIONAL INTENT

In adopting sections 103 and 169 of the Internal Revenue Code, Congress recognized that mandated pollution control investments warrant tax treatment different from that provided most other capital investments. Both of these provisions—section 103, dealing with tax-exempt industrial development bonds used for pollution control and waste disposal, and section 169, dealing with amortization of certified pollution control equipment—reflect a recognition that investment in pollution control and waste disposal facilities is necessary to attain desirable social goals and fulfill the mandates of environmental laws.

If faithfully implemented, these provisions of the tax code would provide industry with powerful economic incentives to reduce pollution in the most cost-effective way technically feasible—rather than to delay compliance, oppose standards, and litigate Federal and State requirements.

But in July 1975, the Treasury Department issued proposed regulations—which have since been employed by the IRS as if final—that do not reflect the intent of Congress as represented by section 103 of the Internal Revenue Code, the Clean Air Act, the Clean Water Act, and the Resource Conservation and Recovery Act. The deficiencies and inconsistencies in these regulations have repeatedly been brought to the attention of the IRS by the Environmental Protection Agency, by the industries affected, and by many of us in the Congress. The IRS has not responded to these concerns.

Instead, the IRS has persisted in employing section 103 regulations that thwart the intent of Congress with respect to pollution control bond financing. It has done so in the following ways:

First, the IRS through its "realized pollution" test has limited eligible financing for air and water pollution control expenditures to end-of-the-pipe, "black box" technologies, ignoring the fact that current environmental law recognizes and indeed encourages the use of process changes in abating pollution.

Second, the IRS has ignored the fact that Congress has amended the Solid Waste Disposal Act with the Resource Conservation and Recovery Act to regulate hazardous waste; instead, the IRS has kept the definition of solid waste contained in the original 1965 act.

Third, the IRS has adopted a "gross savings" test by which the amount of eligible tax-exempt financing is reduced by the extent to which pollution control expenditures result in economic benefit—but measuring economic benefit in gross rather than net terms.

AMENDMENT ALLOWS USE OF POLLUTION CONTROL BONDS FOR INTENDED PURPOSES WHILE MINIMIZING LOSS TO FEDERAL TREASURY

So that IRS regulations with respect to section 103 pollution control bonds do

not continue to thwart congressional intent, my amendment would make by statute the following changes to section 103.

First, it would state explicitly that process changes that reduce air or water pollution—and that have been adopted as a result of Federal or State pollution control mandates—qualify for pollution control bond financing.

Second, it would make clear that in amending the Solid Waste Disposal Act with the Resource Conservation and Recovery Act, Congress intended that nonnuclear hazardous waste management facilities should also qualify for section 103 financing.

Third, it would provide safeguards insuring that tax-exempt pollution control bond financing is used only for legitimate pollution control expenditures.

Because of concern expressed in the past by Treasury Department officials about the revenue loss associated with the changes proposed to allow process changes and hazardous waste management expenditures to qualify, I want to spend a few minutes emphasizing the safeguards contained in the legislation.

The first safeguard is a list of the types of process changes and facilities that would be expected to qualify for pollution control bond financing under the provisions of this amendment. I ask unanimous consent that this list be printed in the RECORD.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

Facilities and process changes to be included as report language to accompany legislation proposed by Senator John Heinz dealing with IRS definitions of pollution control facilities eligible for tax-exempt industrial development bond financing pursuant to section 103(b) of the Internal Revenue Code.

Eligible facilities and process changes shall include, but not be limited to, the following:

COAL MINING AND COMBUSTION

Coal washing and preparation to reduce sulphur emissions;

Fluidized bed boilers;

In mining operations, water diversion ditches that prevent natural water run-off from mingling with mining operations, becoming contaminated, and exiting as run-off pollution;

Cooling equipment, pipes, and pumps to recycle cooled flue gas in coal-fired boilers to reduce nitrogen oxide.

METALS

In metal "pickling" processes, equipment to convert sulphuric acid to hydrochloric acid, permitting acid regeneration and avoidance of waste treatment and sludge disposal expenses.

INDUSTRIAL PRINTING

Equipment to convert water-based paints, thereby avoiding air pollution that occurs from dried solvents dispersing through stacks.

PAPER INDUSTRY

Recovery boilers and their associated precipitators, black liquor oxidation systems, and black liquor evaporation systems.

BREWING INDUSTRY

Dust control equipment;

Spent grain liquor evaporators.

SOLID WASTE MANAGEMENT

Landfills;

Landfarms;

Transfer stations;

Incinerators without heat or energy recovery facilities;

Incinerators with heat or energy recovery facilities;

Compaction equipment (shredders, balers, and compaction equipment);

Transportation vehicles used to implement the collection and disposal functions.

HAZARDOUS WASTE MANAGEMENT

Same list as solid waste management, but also:

Deep injection wells;

Storage facilities;

Treatment facilities;

Limestone flue gas desulphurization systems using feeders, storage bins, conveyors, dryers, and grinding and briquetting machines to produce gypsum.

PETROLEUM INDUSTRY

Facilities to strip sulphur from gas streams to be combusted at the refinery;

Facilities to transport waste water to regional waste control facilities;

Floating roof storage tanks.

Mr. HEINZ. Mr. President, although this list is by no means exhaustive—we must avoid locking in potentially obsolete technologies by statute—it is illustrative of the intent of Congress and should provide needed guidance for the IRS.

The second safeguard is a requirement that tax-exempt financing be available only for expenditures that the Environmental Protection Agency or its State equivalent has certified would not have been made, but for Federal or State pollution control requirements.

The third safeguard is a formula for reducing the amount of pollution control expenditures eligible for tax-exempt financing by the extent to which a portion of the cost of a certified pollution control facility is recoverable in the form of net economic benefit. This formula is set forth in the statutory language of the amendment.

The fourth and final safeguard is a limitation on the amount of expenditures for process changes that can qualify for section 103 financing in the case of new plant construction or major expansion of existing facilities, defined as a 35-percent increase in capacity or output. Specifically, the amount of tax-exempt financing for certified pollution control expenditures—reduced to the extent that a net economic benefit results—would be further limited to: 30 percent of the first $100 million of capital expenditures for the entire plant or site; 25 percent of the second $100 million; 20 percent of the third $100 million; and 15 percent thereafter; capital expenditures subject to the limitation would include those made 3 years before and 3 years after the date on which the bonds were issued.

Taken together, these four safeguards address concerns raised in the past that allocating the portion of process changes attributable to pollution control is not feasible and that allowing process changes to qualify would allow the entire cost of new plant construction to be financed using section 103 pollution control bonds.

Because of the safeguards contained in my amendment, the Joint Committee on Taxation estimates the revenue loss to the Treasury of this proposal as indicated in the table which I ask unanimous consent to have printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Fiscal year:	Millions
1981	
1982	
1983	$10
1984	10
1985	20
1986	20
	0

Mr. HEINZ. However, Mr. President, during the June 26 hearings, a number of witnesses suggested that even this modest estimate may be too much.

For example, Ron Bean, president of the Council of Pollution Control Financing Agencies, testified:

I want to caution the committee about what is not included in estimates of revenue loss. The Congressional Budget Office and the Treasury have consistently refused to recognize that a company which is able to finance a pollution control facility on a tax-exempt basis is therefore relieved of interest expenditures amounting to some 3 percent of the cost of financing, or $30,000 per $1,000,000 for each year for the life of financing. This money is, of course, subject to taxation, and at current rates, the Treasury would increase its revenues by 46 percent of that $30,000, or nearly $14,000 per million, each year, for the life of financing. The remainder of that $30,000 is put to work by the industry, and presumably generates a profit in later years, which is also taxed. If it is distributed to shareholders, it is also taxed. These are all revenues which do not find their way into calculations of tax expenditures to the Treasury from tax-exempt pollution control financing.

Also, we are distressed to see the assumptions of Treasury revenues on the other side of the equation, from taxable bonds. This ignores the fact that most holdings of taxable bonds are by entities which themselves are tax-exempt or which manage to effectively shield taxable bond holdings from taxation.

In addition, several witnesses agreed that the revenue loss estimates should be revised downward to reflect the marginal tax rate reductions contained in the Economic Recovery Tax Act.

To summarize, Mr. President, the overwhelming body of evidence suggests that the regulatory changes made by my amendment are essential for the overall success of the Economic Recovery Tax Act. We need not make an either-or choice between economic growth and environmental quality—we can have both.

In short, Mr. President, the only people who are not in favor of this bill insofar as we can determine it are some bureaucrats down at the Internal Revenue Service, who a few years ago having decided to take the law into their own hands recast the law in their own image or as they would wish it and have been thwarting the intent of Congress ever since, and that is to the best of my understanding why the administration does not at this point support this amendment.

I thank my distinguished colleagues for their time and strongly urge their support.

Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from Pennsylvania has 13½ minutes remaining.

Mr. HEINZ. Mr. President, I reserve

the remainder of my time but simply ask my colleagues to support this amendment. It is a good amendment. It is a responsible amendment, and I do believe that we would serve our constituents well by passing it today.

The PRESIDING OFFICER. Who yields time?

Mr. SYMMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HEINZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HEINZ. Mr. President, how much time does the Senator from West Virginia wish?

Mr. RANDOLPH. Approximately 5, not more than 7 minutes.

Mr. HEINZ. I yield 7 minutes to my good friend and colleague from West Virginia.

Mr. RANDOLPH. Thank you very much.

Mr. President, I am appreciative of the cooperation of the able Senator from Pennsylvania (Mr. HEINZ) and also I am appreciative to the minority manager, Senator HARRY F. BYRD, JR., of Virginia. Their understanding of my desire to speak on this amendment and their help in arranging a comfortable atmosphere for me to convince those who will perhaps listen attentively to what I have to say.

I support the amendment of the Senator from the Commonwealth of Pennsylvania.

I am a cosponsor of this amendment.

The adoption of this proposal will be helpful to many of the industries throughout America as they strive to comply with the air and water pollution and hazardous waste control requirements enacted over the past 10 years.

I want to stress today another reason, and that is that the value of this amendment goes to something that is often overlooked, and that is to the solid and hazardous waste management industry in this country.

Among other effects, this amendment makes it clear that solid waste management facilities include all hazardous wastes and recoverable resources as defined in the most recent amendment to the Solid Waste Disposal Act, with which I was associated in handling.

Mr. President, I have worked on solid waste legislation since the first Federal efforts in this area of national concern, and that was in 1965. In 1970 I authored the Resource Recovery Act establishing a major Federal role in promoting the recycling and the proper handling of solid wastes. Recycling is something very important, recycling not only of waste materials of one type or another, but I think now of the recycling of paper throughout this country, and the recycling of aluminum.

The 1976 amendments to the Solid Waste Disposal Act, which I also sponsored and helped to shape, with the help of others in the Committee on Environment and Public Works, has recognized hazardous wastes as a large part of our solid waste management problem.

The 1976 act, I think—I must stress it—enhances our ability to recover and conserve our resources, and the definitions of the act were expanded and they were modernized.

The Internal Revenue Service, however, I think, has mistakenly continued to use the old 1970 definition of solid waste and that, of course, is the position of the Senator from Pennsylvania, because we believe it is an incorrect interpretation of the provisions of section 103. This has meant that many worthy solid waste facilities involving hazardous waste or resource recovery could not make use of that section on financing which we designate as 103.

Adoption of the pending amendment, I say to my colleagues, will clarify that solid waste and hazardous materials facilities of all types qualify for this necessary financing.

I think the amendment is a good amendment. It is a necessary amendment.

Mr. HEINZ. Mr. President, I thank my most respected colleague for his remarks. He is a man who has been time and again in the forefront of the efforts to clean up our air, our water, our land. I can think of few others in the Senate whose record exceeds, let alone matches, his outstanding understanding and record in this area. So to have him speak on behalf of this amendment is very welcome, and I thank my friend most sincerely.

Mr. President, I reserve the remainder of our time.

The PRESIDING OFFICER (Mr. SIMPSON). Who yields time?

Mr. SYMMS. I yield the Senator from Virginia 5 minutes.

The PRESIDING OFFICER. The Senator from Virginia is recognized.

Mr. HARRY F. BYRD, JR. Mr. President, this would extend the use of tax-exempt industrial development bonds. My understanding is that the administration and the Treasury Department oppose the expansion of such tax-exempt bonds.

I have felt for some time that the use of these tax-exempt issues has gotten out of hand, and it would be unwise to further expand the use of these bonds.

I know it is a good purpose involved in the amendment offered by the distinguished Senator from Pennsylvania. But, as one who for some time has been concerned about the tax-exempt status of bonds, I shall oppose the amendment.

Mr. METZENBAUM. Mr. President, will the Senator from Virginia be good enough to yield me time?

Mr. HARRY F. BYRD, JR. What time do I have remaining?

The PRESIDING OFFICER. I believe Senator SYMMS, the Senator from Idaho——

Mr. HARRY F. BYRD, JR. He yielded me 5 minutes. How much time do I have remaining?

The PRESIDING OFFICER. The Senator from Virginia has 2½ minutes.

Mr. HARRY F. BYRD, JR. I yield 2½ minutes to the Senator from Ohio.

Mr. METZENBAUM. Mr. President, will the Senator from Pennsylvania answer a question? Is the Senator a prime sponsor of the amendment?

Mr. HEINZ. The Senator is correct.

Mr. METZENBAUM. Would he be good enough to advise what the cost of this amendment will be?

Mr. HEINZ. I have already made that statement for the RECORD. I will be happy to do so again.

The cost of this amendment would be, it would gain $94 million of revenue in 1981; it would gain $67 million in revenue—I am sorry, I was mistaken. It will gain $94 million in revenue in 1982. It would gain $67 million in revenue in fiscal year 1983; it will gain $91 million in fiscal 1984; and again $15 million in fiscal year 1985.

Mr. METZENBAUM. Mr. President, will the Senator from Pennsylvania be good enough to explain how by having industrial revenue bonds in an area in which they were not previously used, will help the Treasury?

Mr. HEINZ. Yes; as I also explained in my opening remarks, the actual revenue losses that are incurred by the change in the section 103 definition, which is $100 million each in fiscal 1983 and 1984, and $200 million in fiscal 1985 are offset to yield the net gains that I just described by phasing out the telephone excise tax somewhat more slowly.

Mr. METZENBAUM. Phasing out what?

Mr. HEINZ. Phasing out the telephone excise tax somewhat more slowly than in contemplated by law.

Mr. METZENBAUM. Is the phasing out of the telephone excise tax contemplated, is that provided for, in this tax bill?

Mr. HEINZ. Yes.

Mr. METZENBAUM. What the Senator is doing is he is extending——

Mr. HEINZ. No; this Senator is not extending the tax. That was already done in an earlier amendment.

Mr. METZENBAUM. So that we do not mix apples and oranges, how much will the Treasury lose by reason of the industrial revenue bond part of this legislation itself?

Mr. HEINZ. Exactly the number I gave the Senator a moment ago.

Mr. METZENBAUM. The Senator from Pennsylvania will have to agree that he is only saying that we are going to pick up that additional money by reason of a longer phaseout of the telephone excise tax.

Mr. HEINZ. The Senator gave you the revenue phaseout of section 103, which is what the Senator did, and I quoted numbers of revenue losses of $100 million a year in 1983 and 1984, and $200 million in 1985.

Mr. METZENBAUM. Did the Senator say $100 million, $200 million, and——

Mr. HEINZ. $100 million, $100 million, and $200 million in fiscal years 1983, 1984, and 1985, which is more than offset by the telephone excise tax slow phaseout.

Mr. METZENBAUM. And the total amount between now and 1986 would be

something in the area of $600 million, $700 million?

Mr. HEINZ. For the fiscal years 1983, 1984, and 1985 $400 million which is offset by a much more substantial amount of revenue gained.

Mr. METZENBAUM. Is the telephone excise tax a tax paid by the individual users of telephones throughout the country?

The PRESIDING OFFICER. The time yielded to the Senator from Ohio has expired.

Mr. METZENBAUM. Mr. President, who has control of the time?

The PRESIDING OFFICER. The Senator from Kansas has control of the time.

Mr. METZENBAUM. Will the Senator from Kansas yield me an additional 3 minutes, please?

Mr. DOLE. I yield 3 minutes.

Mr. METZENBAUM. I thank the Senator from Kansas.

Mr. HEINZ. The Senator is correct.

Mr. METZENBAUM. Let me then say to the Members of this body that what we are really talking about here is another instance of where we are shifting the tax burden from some of the major corporations in this country that will be issuing industrial revenue bonds for the purpose of pollution control, and in order to pick up the revenue we are putting it on the backs of the people who use telephones or businesses that use telephones.

This is the kind of inequity we have been running into in this legislation. In instance after instance, we find that the average individual in this country is going to pay the bill. The corporations are going to find more and more ways to keep from paying taxes.

Industrial revenue bonds started off as a worthwhile objective, but they have been changed and they have been used for everything under the Sun to the point where there has been an abuse.

I cannot say for certainty that using industrial revenue bonds for the purpose of pollution controls is an abuse. But as I understand this amendment, and I looked at it only briefly, I gather that if the pollution control portion of a company is a part of the total expenditure, and that is the way I seem to read that which is found in installations and new plants, then talking about not exceeding 30 percent of the first $100 million of capital expenditures paid or incurred in connection with such plants, 25 percent of the second $100 million, 20 percent of the third, and 15 percent of everything—as I understand that, does that mean that you have an industrial revenue bond for a part of the facility, or that you could have an industrial revenue bond for the total facility? Why have the second provision?

Mr. HEINZ. There is a series of provisions in the amendment to limit that which will be obtained from the use of industrial development bonds for the very reason that the Senator suggests. We do not want to see industrial development bonds used for a questionable purpose. One of the key provisions of the legislation is that we offset the use of the bond through a savings test. You cannot use the bond to finance an entire factory. You can only use the bond for a process change, for example, which was mandated by a State pollution control agency, and you can only use it to the extent that there is a net cost to the installer.

If I may, Mr. President, if the Senator——

The PRESIDING OFFICER. The time yielded to the Senator from Ohio has expired.

Mr. DOLE. I yield 3 additional minutes.

Mr. HEINZ. I think the Senator has made some good points as to what is the purpose of this legislation.

What we are trying to do is to bring about the most cost effective means of overcoming pollution. The problem is that right now we have an IRS regulation that Congress never passed. The IRS has never actually finalized this proposed regulation. It has been a proposed regulation since 1975.

There are two problems. Problem No. 1 is that it treats hazardous waste differently from air and water pollution. It should not, but it treats it differently.

Problem No. 2 is that it forces black box technology on every single industry, end of the pipe technology, in many instances the wrong way to go about it.

The director of the Ohio Protection Agency, who is a professional—he has been in the field for a long time and I suspect the Senator knows him, Mike Nichols—very respected throughout the United States—said he believed this proposal would do more to eliminate sulfur dioxide and other forms of pollution than any other measure. It would still enable Ohio to assist its utilities and industries now heavily burdened by the cost of the pollution control laws.

I choose that not because the man, Mike Nichols, is from Ohio, but because he mentions it will lower the cost of installing in utilities. If there is one thing that people across the country are mad about, it is their high utility bills. This will bring them down. I thank the Senator for yielding.

Mr. METZENBAUM. I did not intend for the Senator from Pennsylvania to use my entire 3 minutes. I will ask for an additional 3 minutes. I did not even open my mouth.

Mr. HEINZ. I thank the Senator for being so understanding.

Mr. METZENBAUM. What is this about exempt financing to be unavailable for expenditures or purposes other than pollution control? Then it gets into the whole question of net profit and how you determine net profit.

Without taking too long, can the Senator give me a 30-second answer on what that is about?

Mr. HEINZ. In 30 seconds? I will try.

What we are talking about is that we are not going to permit these pollution control laws to be used for any other purpose than pollution control. That is answer No. 1.

Mr. METZENBAUM. Why do we need a definition of net profit for that?

Mr. HEINZ. Because since we are talking about permitting process changes and process changes can be more efficient, we want to make sure that a manufacturer or a utility that is putting in a process change does not slip into the tax exempt bond some of the other reasons, the capital costs, that he is applying for this bond for. What we are trying to do is to limit the industrial development bond just to that portion that is involved with pollution control.

Mr. METZENBAUM. Let me ask one last question. Would this amendment result in the telephone users of this country paying additional excise taxes on their telephone use which otherwise would have been phased out in the approximate amount of $100 million—no. I guess more than that. I guess it would be $160 million a year and going up to about $350 million, if my recollection of the Senator's mathematics is correct. Will the consumers end up paying those additional amounts by reason of this amendment?

Mr. HEINZ. I do not want to quarrel with the fact that there is one-quarter of a percent——

The PRESIDING OFFICER. The time yielded to the Senator has expired.

Mr. METZENBAUM. Who else has time?

Mr. DOLE. I will be happy to yield. Since the Senator is against the amendment I am happy to yield.

Mr. METZENBAUM. There will be an additional one-quarter percent tax on telephone users over and above that which it presently is?

Mr. HEINZ. I am certainly not going to quarrel with that. The Senator is correct, and it is this Senator's belief that this will be more than offset, several times over, by lower utility bills. Let me add further that setting the tax at 1¼ percent will still save consumers $175 million a year more than the tax at the current level, which is 2 percent.

Mr. METZENBAUM. I have been so persuaded by the President's emphasis on cutting taxes that I certainly could not find myself voting for increased taxes. I am a little bit surprised that my good friend from Pennsylvania wants to increase the taxes on the people of this country. Is it anticipated that there will be a rollcall vote on this amendment?

Mr. HEINZ. I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, let me say first of all I do not take pleasure in opposing amendments from colleagues on either side, particularly on my own side. I have discussed this matter with the Treasury and the Senator from Pennsylvania has discussed it, I assume, with the Treasury. We have been able to accommodate the Senator on a number of amendments, two that I think of offhand. The Treasury is flatly opposed to this amendment. I think they would also be flatly opposed to raising the excise tax on all telephone users to pay for this amendment.

The other day we did that in an effort to pay for the so-called targeted jobs credit. That may impact on a lot of people who are out of work.

We are doing enough for the steel industry in the country now under ACRS.

There has to be a limit on how much we can do for big business in this tax bill, and this is a big business amendment. It is going to cost some money.

It just seems to me that if it has merit, and I am certain it has or the Senator from Pennsylvania would not be offering it here, we are going to have another tax bill and we do not have to load this bill up with everything. It is almost ready to drop now from the weight of amendments that we have been able to work out and negotiate. Some of those the Senator from Pennsylvania had a deep interest in and they were accommodated.

But on this amendment the Treasury says no and I feel some obligation to support the Treasury and the President. They have sent us an extremely attractive tax package.

I do not quarrel with anybody who offers amendments but I would hope that by early evening we will be ready to vote on final passage.

I would promise the Senator from Pennsylvania we are going to have other tax bills, at least one I know of this year. There will be a second tax bill. It was my intent that this amendment, if defeated, and other amendments that have not been offered by Senators who have restrained themselves, would be looked at, considered, and, in some cases, end up in the second tax proposal.

It is one thing to say it does not cost anything, but it does cost something. It costs $100 million in 1982, $100 million in 1983, $200 million in 1984, $200 million in 1985, and $300 million in 1986. You can lower that cost if you go on a fiscal year basis.

Again, I am not an IRS expert, but we are told it would add a lot of complexity to the law. For example, there would be the definitional problem of determining what would qualify as a pollution control facility and how such a facility could be differentiated from a manufacturing facility. It is going to result in increased administrative burdens on the IRS.

I just think the administration made it rather clear that it is firmly committed to reducing the Federal interference with business decisions as well as to reduce the burden of needlessly costly Federal regulations on business. To the extent that pollution control regulations and rules concerning hazardous materials imposes costs on businesses beyond those commensurate with benefits they can confer on society, these regulations should be corrected or, where possible, repealed or terminated.

I hope that we can defeat this amendment and get on with the final few amendments we have in this entire package—it has taken 11 days—so that we can let the President know and, more importantly, the country know that we have a good tax package.

There is the imprint of the Senator from Pennsylvania all through the package. He has done some outstanding work.

In this case, Mr. President, I cannot support the Senator's amendment.

Mr. HEINZ. Will the Senator from Kansas yield for a question?

Mr. DOLE. Yes.

Mr. HEINZ. Would the Senator from Kansas agree that big business could borrow below the prime rate by selling commercial paper, but small business cannot?

Mr. DOLE. I agree to that.

Mr. HEINZ. Would the Senator not agree that this amendment is really more likely to benefit the small businessman, who cannot go to the commercial paper market, particularly in these tough times, or does he really feel to the contrary?

Mr. DOLE. I would agree with that, but I am not certain that is precisely what the amendment does.

Mr. HEINZ. No, what the amendment does—the Senator is correct—it does lower the cost of making these investments.

Will the Senator yield for one more question?

Mr. DOLE. Yes.

Mr. HEINZ. Is it correct that the Senator is principally opposing this amendment to this tax bill at this time and that he is not necessarily opposed to the amendment per se? Is that correct?

Mr. DOLE. That is correct, Mr. President.

Mr. HEINZ. I thought that was correct, because, as I recall, the Senator was extremely supportive of this amendment last year, when we took up S. 1480.

If I may make just one additional observation, Mr. President, I did discuss this amendment with the Under Secretary of the Treasury for Tax Policy, Norman Ture, about 2 weeks ago. What he said was that they had looked very closely at this amendment, they had decided that they could not support it, as the Senator from Kansas has made quite clear, but—and these are his very words—that they had a split decision on it and they felt that it was probably the kind of decision that Congress ought to make.

Of course, that is all the Senator from Pennsylvania is trying to do, get us to make a decision. We do offset the cost of this amendment, as the Senator from Kansas knows, so we are trying to make it a no-cost decision.

Nonetheless, Mr. President, I respect the views of the Senator from Kansas in the matter. I appreciate his yielding.

Mr. DOLE. Mr. President, I just want to say we are paying for this amendment by raising the telephone tax on everybody in the country. I also want to say that I appreciate the Senator from Pennsylvania at least bringing it to us in that form. He is at least willing to pay for it. We have had a lot of amendments that are just dumped on us, saying, take it out of something else. The Senator has had the courtesy of coming to us with an amendment that he pays for by increasing the excise tax, or getting it back up to——

Mr. HEINZ. One-quarter of 1 percent.

Mr. DOLE. One-quarter of 1 percent.

Mr. President, I hope we can persuade the Senator—I know he feels strongly about the amendment—that we could reserve judgment on this amendment and how we finance it in the second tax bill. The Senator is a member of the Committee on Finance. He has had a great deal of input in this bill. We have had amendments—the Heinz amendment on the targeted jobs credit, the Heinz-Dodd amendment on section 189,

We have had a lot of amendments that we have been able to work out, not only on the floor but in the committee. I hope that the Senator might understand the problem—I know he does—of those of us who want to complete this proposal within the numbers of the administration without raising taxes. We did it the other day on the targeted jobs credit. Perhaps he will reconsider offering the amendment at this time. I hope, if that is not the case, we can defeat the amendment.

Mr. HARRY F. BYRD, JR. Mr. President.

The PRESIDING OFFICER. Who yields time?

Mr. HEINZ. Mr. President, I am prepared to yield back the remainder of my time.

Mr. HARRY F. BYRD, JR. I yield myself 1 minute on the bill.

The PRESIDING OFFICER. The Senator from Virginia is recognized.

Mr. HARRY F. BYRD, JR. Mr. President, I join the Senator from Kansas in opposition to this amendment. What it does is transfer the tax from a business to the consumers. I think that that is not what we want to do in this tax bill. I think the Senator from Kansas has made a good suggestion, that this amendment be held to a later date and be considered by the Committee on Finance on some subsequent tax bill.

The PRESIDING OFFICER. Who yields time?

Mr. HEINZ. Mr. President, I am prepared to yield back the remainder of my time.

Mr. DOLE. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from New Jersey (Mr. WILLIAMS) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 15, nays 84, as follows:

[Rollcall Vote No. 231 Leg.]

YEAS—15

Bentsen	Durenberger	Moynihan
Boschwitz	Ford	Randolph
Bradley	Hart	Simpson
Chafee	Heinz	Specter
D'Amato	Mathias	Tower

NAYS—84

Abdnor	Byrd, Robert C.	Dole
Andrews	Cannon	Domenici
Armstrong	Chiles	Eagleton
Baker	Cochran	East
Baucus	Cohen	Exon
Biden	Cranston	Garn
Boren	Danforth	Glenn
Bumpers	DeConcini	Goldwater
Burdick	Denton	Gorton
Byrd, Harry F., Jr.	Dixon	Grassley
	Dodd	Hatch

Hatfield	Long	Riegle
Hawkins	Lugar	Roth
Hayakawa	Matsunaga	Rudman
Heflin	Mattingly	Sarbanes
Helms	McClure	Sasser
Hollings	Melcher	Schmitt
Huddleston	Metzenbaum	Stafford
Humphrey	Mitchell	Stennis
Inouye	Murkowski	Stevens
Jackson	Nickles	Symms
Jepsen	Nunn	Thurmond
Johnston	Packwood	Tsongas
Kassebaum	Pell	Wallop
Kasten	Percy	Warner
Kennedy	Pressler	Weicker
Laxalt	Proxmire	Zorinsky
Leahy	Pryor	
Levin	Quayle	

NOT VOTING—1

Williams

So the amendment (UP No. 316) was rejected.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Kansas is recognized.

Mr. DOLE. Mr. President, my understanding is that the distinguished Senator from New York (Mr. D'AMATO) wishes to engage in a colloquy and then the Senator from New Jersey (Mr. BRADLEY) will have an amendment.

Mr. RANDOLPH. Mr. President, a point of order. We are trying to hear what the manager of the bill is saying.

The PRESIDING OFFICER. The point is well taken. The Chamber will be in order. Senators conversing please retire to the cloakroom so the Senator from Kansas may be heard.

Mr. DOLE. Mr. President, may we have order?

The PRESIDING OFFICER. We appreciate the courtesy of the Members present in the Chamber. The Senator from Kansas has the floor. Senators conversing please retire to the cloakroom.

Mr. BAKER. Mr. President, I suggest the asbsence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I yield to the distinguished Senator from Maine (Mr. COHEN).

THE ECONOMIC RECOVERY TAX ACT OF 1981

Mr. COHEN. Mr. President, I wish to express my support for the Economic Recovery Tax Act of 1981. I believe that the bill is an effective combination of individual and business tax reforms, which will encourage greater investment and productivity and provide significant tax relief to working Americans.

The tax reforms included in this bill will provide significant relief to all Americans who have had to bear the burden of rising taxes. The proportion of household income that goes to individual income taxes is greater now than at any other time in the last two decades. Inflation alone has continued to push individuals into higher and higher tax brackets. For example, a family of four which earned $16,000 in 1971 had to pay 19 percent of its income in taxes. Today that same family would have to pay over 27 percent of its income to taxes. Such large tax bills prohibit individuals and families from saving or improving their everyday standard of living.

The 25-percent tax cut is designed to alleviate this tax burden for all Americans. It cannot be dismissed as a tax cut for the rich. Instead, this tax cut provides relief to taxpayers at all levels of income. Further, the tax cut provides a greater percentage of relief to those taxpayers in the lower- and middle-income levels who have found the steady increases in taxes over the past years most difficult to bear.

There are those voices which oppose the individual tax cut as providing fuel for inflation. This argument basically charges that if consumption is proportionate to the amount of disposable income which a person has, then by keeping more money in the taxpayer's pocket, the taxpayer will spend more, thus aggravating inflation. These critics, however, have been unable to adequately explain why it would be inflationary for people to spend their own money, but not inflationary for the Government to take a person's money and spend it for him. If there is such a choice as to who should decide how to spend this money, I believe that the individual taxpayer, who has worked long and hard for his earnings, should be able to retain more of his or her earnings and he or she should be able to choose where the money will go.

The fact is, however, that a tax cut will not fuel inflation. Rather, the primary objective of this tax cut is not to stimulate demand, but to increase incentives to earn more taxable income. I believe that lower marginal tax rates will encourage work and increase savings and investment. In addition, the reduction in tax rates on investment income will encourage more productive types of investment, and make the use of tax shelters and loopholes less attractive in the long run.

There are also many opponents of the bill who argue that a 3-year tax cut is unwise based on the uncertainty over what the budget, interest rates, and inflation will be in 1983. I think that this is precisely one of the reasons why we should have a multiyear tax cut at this time. Over the past decade, our economy has experienced many setbacks from unexpected fluctuations in oil prices and in agricultural prices, adverse exchange rate adjustments, and political factors. With such uncertainty, it is difficult to plan effectively. Such uncertainty affects planning at all levels of the economy: Families do not know what they will be able to afford next year, small businesses do not know whether they should expand, and Government policies have no fixed direction.

A multiyear tax cut will restore certainty so that individuals, businesses, and the Government will be able to once again engage in long-range fiscal planning. It is only with such predictability that taxpayers will be able to increase investment and productivity.

The bill contains many individual tax reforms which I have supported for some time. The deduction for two-earner couples will effectively reduce the so-called marriage tax penalty which was inadvertently created by the tax changes made in 1969. Indeed, this is an inequity which exists in the current Tax Code, and, thus, is properly a problem which should be remedied immediately.

The bill, as amended, will allow all individuals to deduct a portion of their contributions to charities, regardless of whether or not they itemize their deductions. I believe that this reform will insure that all taxpayers, regardless of their income, will have their contributions treated equally. It will also provide immeasurable benefit to nonprofit organizations whose work is even more important in light of the budget reductions in some social services.

The bill will expand individual retirement accounts to increase maximum deductible contributions, and to make these retirement accounts available to many more persons. For example, under the bill, nonearning spouses can continue making payments to an IRA if his or her spouse dies or decides to stop contributing, or if there is a divorce. It will also allow persons who are now covered by employer-sponsored plans to deduct qualified contributions to an IRA or to their employer-sponsored plan. I view these provisions as welcome reforms which will stimulate savings for retirement.

There are many other reforms which will aid the overall economy and my State of Maine in particular. For example, small businesses will benefit from the reduction of corporate tax rates on the first $50,000 of taxable income, the reduction in the accumulated earnings tax, and the accelerated depreciation reforms included in the bill. By making fewer estates subject to estate and gift taxes and eliminating taxes imposed on transfers between spouses, many family-owned farms and businesses will no longer have to sell out simply to pay burdensome estate taxes.

Moreover, indexing the tax code, beginning in 1985, will prevent automatic increases in taxes caused by inflation alone. I was an early supporter of indexing, and I am very pleased that it finally has been approved by the Senate as an amendment to this tax bill. I wholeheartedly endorse all of these reforms.

There are, of course, some provisions in the bill with which I disagree. And there are many additional measures which "in the best of all possible worlds" I would embrace as welcome reforms. Unfortunately, our present economic state is not "the best of all possible worlds." Many additional targeted tax reforms will have to wait until we have a more favorable economic climate.

I believe that the Economic Recovery Tax Act of 1981 will, in conjunction with the budget reductions passed by the Congress, put us on the road to economic recovery. The road is not an easy one to travel, and it is more difficult for some to travel than for others. Nevertheless, I believe that, overall, this tax reduction package is necessary at the present time,

and is an effective element in reaching our goal of economic revival.

The PRESIDING OFFICER. The Senator from New York is recognized.

ALL-SAVERS CERTIFICATES

Mr. D'AMATO. Mr. President, I have a statement in regard to the present tax bill, House Joint Resolution 266.

President Reagan and the Members of this Chamber have promised the American people that we will produce a tax reduction bill fair and equitable to taxpayers of all income classes. I believe very strongly that we must keep this commitment. Therefore, I support most of the provisions of House Joint Resolution 266, the tax bill reported by the Finance Committee.

There is one glaring exception, however. Perhaps it is a mistake; or perhaps an oversight. I refer, of course, to sections 301 and 302 which comprise subtitle A of title III of the bill, the provisions relating to the exclusion of interest from taxpayers' income. Section 301 creates a new savings instrument—the all-savers certificate—and allows taxpayers who purchase these certificates to exclude up to $1,000 ($2,000 for a joint return) of interest on them from their taxable income. Anyone can buy these certificates, but they only make financial sense for those with marginal tax rates greater than 30 percent—a very small proportion of the American public. The vast majority could invest their money more wisely elsewhere. They would be downright silly to purchase an all-savers certificate. Single taxpayers making less than $21,500 and families of four making less than $27,600 receive no more benefits from the all-savers certificates than they are entitled to under current law.

At the same time, however, we are allowing the 21 percent of the taxpayers in the upper income brackets to exclude $1,000 or $2,000 of their income from taxation that was not previously excludable. This entails a revenue loss to the Federal Treasury of over $2.1 billion in just 1 year.

So what are we doing for the little guy—the middle and lower income families struggling to make ends meet in an inflationary economy and the retired forced to survive on social security and what little they have managed to put away in savings during their many hard years of work? Well, I will tell you what section 302, as currently written, does in 1982 and 1983. In order to allow the new tax break created in section 301, the present interest exclusion of $200/$400 is dropped starting in 1982. Every single dollar of interest earned by the little guy will be taxed while section 301 allows the well-to-do to avoid taxes on the first $1,000 or $2,000 of their interest income only if they invest in all-savers certificates.

Admittedly, beginning in 1984, section 302 allows the small saver to exclude 15 percent of his or her interest income from taxation. But this means that a family of four with $400 in interest income, all of which could be excluded from taxes under current law, would receive no exclusion in 1982 or 1983 and would be able to exclude only a paltry $60 in 1984. In other words, this family with an income too low to justify the purchase of an all savers certificate would be taxed at full ordinary income tax rates on $340 of interest income in 1984 that would be totally exempt from taxation today.

This is simply not acceptable. It is diametrically opposed to the spirit of this whole tax package. We are supposed to be cutting taxes across the board, not just for one favored income class. The little guy must be protected.

Current law allows every American taxpayer to earn $200 (or $400 on a joint return) in interest and dividends and pay no Federal taxes on that amount. This is a necessary encouragement to foster savings by Americans. However, the bill we are now considering repeals this provision and replaces it with three new provisions: A $100/$200 exclusion on dividends alone to apply to every taxpayer, a $1,000/$2,000 exclusion on interest on all savers certificates which will benefit only one-fifth of all taxpayers, that is, those with marginal tax rates greater than 30 percent; and a 15-percent exclusion on interest income up to $3,000/$6,000 which will not begin until 1984. We have literally robbed the little guy in order to finance a new tax break for the rich.

Last Thursday I came before you and urged reconsideration of this misguided decision. My proposal was modest. I asked merely that we restore provisions of current law which would allow all taxpayers to exclude $200 or $400 of their dividends and interest from their taxable income. I did not propose elimination of all-savers certificates. I did not even request simple parity between those above and below the 30-percent marginal tax bracket. I proposed only that we do not increase the taxes on savings for the little guy.

The distinguished chairman of the Senate Finance Committee, however, has informed me that he agrees that this inequity must be examined. I was prepared to bring before the Senate today a new and even less generous proposal than my original amendment.

This proposal would keep the exclusion at $100/$200 as it is in the Finance Committee bill. The only difference is that this tax-exempt amount would apply to either dividends or interest or to some combination of the two. This still represents a cut by 50 percent of the 1982 tax exclusion already existent in current law. In 1984 the exclusion would change to $100/$200 plus 15 percent of interest or dividends earned over this amount up to a maximum exclusion of $450 for a single taxpayer or $900 for a joint return. This incorporates the excellent amendment previously proposed by my colleague, the distinguished Senator from New Mexico, and adopted by this body. The 15-percent exclusion above the $100/$200 base amount would provide an excellent incentive for increased savings by American taxpayers.

In the spirit of cooperation and to assist the passage of the Reagan program, I have withdrawn this amendment, since my colleague from Kansas, Mr. DOLE, chairman of the Senate Finance Committee has indicated to me that he will examine my proposal before the expiration of the present interest exclusion, with a view toward eliminating the inequity in the current bill.

Mr. President, I am wondering if I might ask the Senator from Kansas what his intentions are in regard to attempting to deal with what I consider to be an exclusion that it is necessary to bring back, that is, equalizing the tax rate and encouraging savings and not penalizing the small taxpayers?

Mr. DOLE. Mr. President, the Senator from New York is to be applauded for his persistent efforts on behalf of small savers. We had that demonstrated on the Senate floor in a very close vote. The thrift industry and the mutual savings banks, I know, were a bit dismayed when we sacrificed the $200/$400 exclusion to pay for the all-savers provision. I know they like all-savers better but, as I am sure the Senator from New York is aware, they would prefer to have both, one to get them over their hopefully short-term, present troubles and the other to give a benefit to the small-saver customers who have for so long been the backbone of the thrift and mutual savings industries. I just suggest that we were not able to do both because of the budget constraints.

The majority of the members of the Finance Committee, from both sides of the aisle, were willing to repeal the $200/$400 exclusion, however, because we were told by a variety of witnesses that this provision did little or nothing to create new savings or new investment. In fact, we had experts, I might add expert economists, nonpartisan, academicians, who told us that this was not a way to encourage Americans to save. Since new or increased savings is an essential element of our economic recovery program we chose to abandon the $200/$400 provision. By the time the bill reached the floor I, and other members of the Finance Committee, had decided to back Senator SCHMITT's 15 percent net interest exclusion as the best incentive for new savings.

As a matter of equity, however, and as a benefit for the small saver who has no more than a few hundred dollars in savings, the $200/$400 provision, or the more modest $100/$200 interest exclusion that the Senator from New York argues so earnestly for, may make sense. I am certain it does or the Senator from New York would not be advocating it.

I will just suggest to the Senator from New York that there will be another bill before the Senate, I hope this year or early next year, another tax bill. The Senator from Kansas is still convinced we have not found the best savings incentive.

This Senator has asked everyone he can find to give us the right recipe to encourage savings in America, whether it is $100/$200, $200/$400 or the provision we adopted or the all-savers certificate, all seem to have a number of drawbacks. But I am just going to assure the Senator from New York, because of his persistence, his leadership and his continued interest in this particular provision, when we have the hearings, I would hope in September–October, I will be asking the Senator from New York

to come before our committee with his friends and supporters and those who can, in effect, give us advice on how to proceed. I am willing to make that pledge, if that is satisfactory to the Senator from New York.

Mr. D'AMATO. I believe under the leadership of the Senator from Kansas and with so many colleagues who feel similarly disposed, we can indeed restore this provision before 1982, at least the $100/$200 in interest income so that people will not be penalized for saving.

I believe we can have pass it in time so that the American people will not be penalized for saving.

If I might, I would like to yield to the Senator from Florida (Mrs. HAWKINS) who would like to comment on this matter.

The PRESIDING OFFICER (Mr. NICKLES). The Senator from Florida is recognized.

Mrs. HAWKINS. Mr. President, I want to associate myself with the remarks of the Senator from New York and pledge to work with him and with the Senator from Kansas to encourage reward for the thrift of the small savers.

America is filled with senior citizens who have been raised to save their money, balance their own budgets and live within their means. I think it is the wrong signal to be sending today when we are supposed to be rewarding incentive, rewarding savings, no matter how small. Some of the press that I read and that others are reading in this country today, claim that this is a tax bill for the rich. I know that to be incorrect. But, at the same time, I do not want to penalize those small savers who have a history of being very prudent with their money.

I will work with the Senators present here today, especially with the Senator from New York and the Senator from Kansas to restore those incentives that we had in the previous bill.

Mr. D'AMATO. Mr. President, I would like to thank the Senator from Florida who has worked with me and also to thank the distinguished Senator from Kansas for his understanding and his patience.

I pledge to him that we will work together, and I predict that our senior citizens will be proud of the package we will fashion later on in this session of the Congress.

Mr. DOLE. Mr. President, I understand the Senator from Michigan, Senator LEVIN, has the same interest expressed by the Senator from New York and would like to participate in this colloquy. I think it would be a good idea if he would.

Mr. LEVIN. I thank the Senator.

Mr. President, first, let me commend the Senators from New York, Florida, and Kansas, and other Senators who participated in this colloquy.

The Finance Committee bill as amended provides a 15-percent exclusion of net interest income up to a maximum of $3,000 for a single taxpayer, while it eliminates the current $200 exclusion of joint dividend-interest income. For many savers, the net result of this change will mean higher taxes on interest income.

The all-savers certificate adopted by the Senate presents similar problems for small savers. Many small savers will discover no advantage in investing in these certificates, given the rate of return being only 70 percent of the Treasury bill rate; indeed, they may not be able to meet the minimum investment for the certificates. It is also a fact that in 1984, when the 15-percent net exclusion is in effect, more interest income will be subject to taxes than under current law for those taxpayers with less than $13,000 in an account yielding 10 percent.

In other words, many taxpayers are going to be worse off in 1984 in terms of the handling of interest income than they are now, despite this bill.

It bothers me that this tax bill increases taxes on interest income for many individuals in spite of the savings incentives generated by the all-savers certificate and the 15-percent exclusion.

Mr. President, at this point I ask unanimous consent to have a table printed in the RECORD which explains what I have said.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

INTEREST EXCLUSION PROPOSAL

	1982 current law exempt 1st $200/$400	1984 Finance Committee bill as amended to date	1984 proposed interest exclusion
Single person with $10,000 in savings at 12 percent:			
Interest income	$1,200	$1,200	$1,200
Exclusion	200	180	[1] 265

[1] 1st $100 excluded plus 15 percent of $1,100.

Mr. LEVIN. I understand that the chairman of the Finance Committee has expressed some concern about this also to the Senator from New York. I commend the actions of the Senator from Kansas and the Senator from Louisiana with whom I have also spoken. I do hope that promptly they will take up this matter, because I do not think anybody in this Senate wants to adopt a bill that is going to result in small savers actually being worse off in 1984 than they are now. Yet, that is exactly the effect of this bill.

I thank my friend from Kansas. Again I commend the Senator from New York and the Senator from Florida for their leadership in this matter.

The PRESIDING OFFICER. Who yields time?

Mr. DOLE. Mr. President, is there any time remaining on the amendment?

The PRESIDING OFFICER. No matter is now pending. The time is being charged to the bill.

Mr. DOLE. Is the pending amendment the amendment of the Senator from Kansas?

The PRESIDING OFFICER. The Senator is correct.

Mr. DOLE. I ask unanimous consent that that be temporarily laid aside so the Senator from New Jersey may bring up an amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from New Jersey.

UP AMENDMENT NO. 317

Mr. BRADLEY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from New Jersey (Mr. BRADLEY) proposes an unprinted amendment numbered 317.

Mr. BRADLEY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Add at the end of the bill the following amendment:

SECTION 1. The Internal Revenue Code of 1954 is amended by adding at the appropriate place the following new section:

§ 44F. Credit for Increased Saving

(a) GENERAL RULE.—In the case of an individual there shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to 20% of the net increase in savings (as defined in subsection (c)(1)) by such individual during the taxable year.

(b) APPLICATION WITH OTHER CREDITS.—The credit allowed by subsection (a) shall not exceed the amount of the tax imposed by this chapter for the taxable year reduced by the sum of the credits allowable under a section of this subpart having a lower number or letter designation than this section other than credits allowable by sections 31, 39, and 43.

(c) DEFINITIONS AND SPECIAL RULES.—For purposes of this section—

(1) NET INCREASE IN SAVINGS.—The term "net increase in savings" means the excess of the amount determined in subparagraph (A) over the amount determined in subparagraph (B).

(A) The sum of

(i) the excess of the taxpayer's adjusted basis of investment in qualifying assets at the close of the taxpayer year over the adjusted basis of such investment at the close of the preceeding taxable year and

(ii) the decrease in indebtedness for the taxable year.

(B) The sum of

(i) the amount determined under paragraph (4) (relating to carryover from the prior taxable year) and

(ii) The increase in indebtedness for the taxable year.

(2) QUALIFYING ASSETS.—Qualifying assets means—

(A) Assets used by the taxpayer in a trade or business

(B) Real property and

(C) Intangible personal property held for investment.

(3) INCREASES IN INDEBTEDNESS FOR THE TAXABLE YEAR.—

(A) The term "increase in indebtedness" means the excess of all indebtedness of the taxpayer at the close of the taxable year over the amount of such indebtedness at the close of the preceding year.

(B) The term "decrease in indebtedness" means the excess of all indebtedness of the taxpayer at the close of the preceeding year over the amount of such indebtedness at the close of the taxable year.

(4) CARRYOVER FOR NET DECREASE IN SAVINGS.—If for any taxable year beginning after December 31, 1980, the amount determined under subparagraph (B) of subsection (c)

(1) exceeds the amount determined under subparagraph (A), such amount shall be carried forward and taken into account under clause (i) of such subparagraph (B) in the succeeding taxable year.

(d) DOLLAR LIMIT ON AMOUNT CREDITABLE.—The amount of the qualifying increase in net savings for the taxable year which may be taken into account under subsection (a) shall not exceed $2,000 ($4,000 in the case of a joint return under section 6013).

(e) SPECIAL RULES FOR GIFTS AND BEQUESTS.—

(1) In the case of the transferor—

(A) for purposes of subparagraph (c)(1)(A)(i) of the section the adjusted basis of investments in qualifying assets at the close of the preceeding taxable year shall be reduced by the adjusted basis of assets transferred by gift or bequest.

(B) For purposes of paragraph (c)(3) the amount of indebtedness at the close of the preceeding year shall be reduced by indebtedness assumed by the transferee of assets transferred by a gift or bequest or which such assets are subject to.

(2) In the case of the transferee—

(A) For purposes of subparagraph (c)(1)(A)(i) of this section the adjusted basis of investment in qualifying assets at the close of the taxable year shall be reduced by the adjusted basis (as determined under section 1014 or 1015) of assets received by gift or bequest during the taxable year.

(B) For purposes of paragraph (c)(3) the amount of indebtedness at the close of the taxable year shall not include any indebtedness assumed by the taxpayer in connection with assets received by gift or bequest or which such assets are subject to.

SEC. 2. EFFECTIVE DATE.—The amendment made by Section 1 shall be effective for taxable years beginning after December 31, 1981.

Mr. BRADLEY. Mr. President, this amendment is intended to stimulate saving and investment. It achieves its purpose by providing a 20-percent tax credit for net savings up to $2,000 for single taxpayers and $4,000 for joint returns.

A major goal of the current tax policy is to use tax cuts to stimulate individual savings. The administration asserts that a 25-percent across-the-board cut in marginal tax rates will raise savings sharply. But there is no hard evidence to suggest that taxpayers would, except perhaps temporarily, save much more than 5 to 8 percent of their disposable income. Indeed, since this is the proportion of their income that Americans have saved since 1950, the evidence strongly suugests that they will not increase savings above this level.

The problem with the so-called savings incentives we have adopted so far in the bill is that they reward people who borrow money or switch prior savings into tax-favored assets without doing any new saving.

If we are serious about increasing total national saving, not merely private saving, we must move toward a surplus in the Federal budget. The reason is that for each extra dollar the Government reduces its borrowing, a dollar more of lendable funds is available for private investment. In contrast, each extra dollar of Federal deficit drains a dollar from the private lending sector, while only a small part of the tax cut dollar received by individuals will be saved.

Mr. President, if we decide that we also want to use tax cuts to get people to save more, the best approach would be to give them a tax credit for their savings and let them decide how to invest it. This approach neither promotes consumption, as the across-the-board tax cuts do, nor distorts savings patterns by encouraging borrowing or substitution of one type of savings for another.

The savings amendment that I am proposing today is both fair and simple. It provides a credit for net savings, calculated on a cashflow method. It works as follows. Taxpayers would list on a separate schedule all their purchases of financial and business assets, their payments on the principal of a home mortgage, and their increases in bank and savings deposits during a year. All of those assets would be listed on one side of the ledger.

On the other side, they would deduct sales of financial or business assets, reductions in bank and savings deposits, and increases in borrowing. The difference between these two sets of figures is net savings.

Let me repeat that, Mr. President. Taxpayers would compute two schedules. One schedule would be a list of their purchases of financial and business assets, bonds, equipment, whatever. They would add to that their payments on the principal of a home mortgage, and increases in bank and savings deposits during the taxable year.

From that list of assets, the taxpayer would subtract sales of financial or business assets, such as bonds, equipment, and such like, reductions in bank and savings deposits and increases in borrowing. The difference between these two sets of figures is net savings.

Mr. President, as I said earlier in my remarks, the real fear is that across-the-board tax cuts will not stimulate savings, and the kind of savings incentives that we have in the bill will simply take one form of savings and convert it into another. Yet what we need to do is create new savings.

Under my amendment, taxpayers would get a 20-percent credit on this net saving. The credit is presently limited to $2,000, or $4,000 for joint returns. But I would hope to see this amount substantially increased in future years.

Although this provision's precise effect on savings cannot be estimated, it is likely to be significant.

For example, if 10 million people in the United States saved $1,000 more than they otherwise would, total saving would rise by $10 billion, an 11-percent increase in personal savings.

Today, total personal saving, as I have defined it, is about $95 billion. If you increased it by $10 billion simply by having 10 million people save $1,000 more, you would then have $105 billion of personal saving.

Mr. President, without the radical change my amendment embodies, I think we will be hard pressed to get investment to the level we need to rival our international competitors. At the same time, we must not let our zeal to promote savings distort investment decisions or interfere with the efficient working of the capital markets.

My amendment avoids these pitfalls. By rewarding only net saving, it is more likely to generate new investment than the other tax provisions that we have considered in this bill.

By not favoring one type of saving institution over another it does not interfere with the market allocation of capital nor does it shift investment out of productive activities into tax favored assets. Because increased capital formation is so important for our economic well being, I would urge my colleagues to support the amendment.

Again, I would draw my colleagues attention to the experience of our international competitors.

Let us make an assumption: That is, to the extent that income from investment is taxed, the incentive to invest will be somewhat eroded. Thus, it seems plausible to assume that different tax burdens on dividends, interest, and capital gains income have an effect on the decision to save.

I would call the Senate's attention to the relative personal saving and individual tax rates in the countries of our competitors in the international markets. For the period 1975–79 the French personal saving rate was about 17.2 percent of disposable income. The French individual tax burden on a dollar of investment income was about 7 cents.

For West Germany the saving rate was about 15 percent and the tax was roughly 11.8 cents on the dollar.

During this period, the Japanese had a personal savings rate of 21.5 percent, while the tax on $1 worth of investment income was a little over 14 cents.

Mr. President compare those figures with the United States where we have a personal savings rate of roughly 6 percent of disposable income and a tax of 33.5 cents on each $1 of investment. It is no wonder that savings are much lower in this country than in other countries in the world, particularly our competitors.

What this amendment says in summary is let us stimulate saving, but let us stimulate new saving. Let us not simply take money out of the commercial banks and put it into the savings and loans, or take it out of the savings and loans and put it into money markets, or take it out of investment in equities and put it in antiques. Let us create new savings and let us reward people who genuinely save.

Mr. President, this is a very important point. It is from new savings that the bulk of our investment will come to rebuild America. We do not now have the personal savings to finance the huge amount of investment in plant and equipment we are supposed to get from 10–5–3.

If we do not have the savings, it is possible the investment will not be made or if it is, that it will push up interest rates as investors compete for limited capital. There is no reason to continue tinkering around with savings incentives. We have to put a big carrot out there if we are serious about getting the American public to save more.

I happen to believe that it might take even more than carrots. Any time you can turn a television set on and see a $30,000 camper advertised for sale with nothing down, you have to pause and say, "Well, maybe this incentive will not be enough to transform U.S. 6-percent savers into Japanese 20- and 22-percent savers."

But at least it is a beginning, Mr. President. At least it recognizes that if you save, if you create new savings, that you get a 20-percent tax credit up to $2.000.

The concept of this amendment is not significantly different from the concept of the amendment offered by Senator SCHMITT in the debate on the all-savers certificate. What he said was he would provide a 15-percent credit for net interest.

Mr. President, what this says is that we provide a 20-percent credit for net savings, which is more inclusive than interest.

So, Mr. President, I offer the amendment in the belief that increased saving is important for America. I offer the amendment in the belief that you cannot give just a small incentive, as this bill does, nor can you give incentives to simply shift from one asset to another. You have to give a big incentive and it has to be for net saving.

That is what we have attempted to do in this amendment. I think it is completely consistent with the theory behind the administration bill. It is completely consistent with the amendment offered by Senator SCHMITT on the all-savers certificate. It argues strongly, and I argue strongly, that it is time we got serious about saving and about savings incentives; it is time we assured that there is capital out there for investment to rebuild America.

Mr. MATSUNAGA. Will the Senator yield for a question?

Mr. BRADLEY. I yield.

Mr. MATSUNAGA. Is the Senator proposing to supplement or amend the all-savers certificate provision?

Mr. BRADLEY. I am not seeking to amend the all-savers certificate. I am simply saying that in the Senate we should go on record approving a significant carrot for new savings. Let the conference decide—which, both, or if only one prevails.

I am not striking out anything we have done in the bill. I am simply adding to the bill another amendment that provides a significant incentive to stimulate saving.

Mr. MATSUNAGA. What revenue loss, if any, will there be by the adoption of the amendment of the Senator?

Mr. BRADLEY. We estimate that there would be a revenue loss of $3 billion if there is no new savings.

On the across-the-board cuts, the theory is that you will have an increase in investment and work activity and you will then have an increase in reveneue. I would argue that this would have a positive revenue effect. I would argue that if you get, as I suggested, 10 million Americans saving $1,000 more a year, you would have a significant revenue increase.

Mr. MATSUNAGA. I thank the Senator for his responses.

The PRESIDING OFFICER. Who yields time?

Mr. ROTH. Does the Senator yield the floor?

Mr. BRADLEY. I reserve the remainder of my time. How much time have I remaining?

The PRESIDING OFFICER. The Senator has 1 minute, 26 seconds.

Mr. ROTH. Mr. President, I think we can all agree on the importance of saving to our economy.

I think we can all agree that it is important to provide incentives to the American people to save.

I can say what the Senator from New Jersey proposes is, at least in theory, a good idea. One of the problems is that there have been no hearings, no review of the proposal, and, for that reason, as well as for the others I will enumerate, I must oppose this proposal.

I have long supported the expanded use of IRA's for housing and education. In a sense, what we have here is an idea that is like a universal IRA, but it is a monumental expansion of the IRA idea, even though, essentially, it is the same concept.

As I said, this proposal has not been considered in committee. There have been no hearings upon it. Technically, it represents a critically difficult and complex provision. For example, a taxpayer would have to keep precise accounting of all—I emphasize the word "all"—of his investments, savings, purchases, debts, and sales, from his stocks and bonds to his car loan, then let the IRS audit this accounting. Every aspect—and I think this should be emphasized—of a taxpayer's financial life would have to be documented, exposed to the IRS, and defended. I believe that this is an impossible burden for the taxpayer as well as for the IRS. Rather than auditing a single form 1040, the IRS would, under this provision, have to audit—and, I might point out, the taxpayer compile—a complex account of all transactions during the year.

What is being proposed here is a credit for all increases in bases of all real property, including personal residence. I might point out that all principal payments on mortgages would qualify for the credit. As a matter of fact, home improvements not financed by borrowing would qualify for the credit. So we would find ourselves in the incongruous position that the building of a swimming pool or a recreation room would qualify for this credit. I do not think many of us seeking incentives to promote personal savings have this kind of improvement in mind.

In any event, Mr. President, as I said, this whole proposal is extraordinarily complex and it would be difficult, both for the individual taxpayer as well as the IRS, to administer the provision.

In closing, Mr. President, let me say I must oppose this amendment. I share in and agree with the goal and the objective, but I point out that we have a number of incentives built into this bill. While none of them goes as far as we would like, the Senate has passed a sense-of-the-Senate resolution limiting the revenue loss. According to the Joint Committee on Taxation, Mr. President, the revenue loss on this proposal would be very significant, as much as $5 billion to $10 billion a year. So, if we are going to keep within the limitations adopted by the Senate, it would mean that there would have to be an elimination or reduction in other proposals on which the Senate has already acted.

For these reasons, Mr. President—the complexity of the proposal and the potential revenue loss—I oppose this amendment. I yield back the floor.

Mr. BRADLEY. Will the Senator yield for one question?

Mr. ROTH. I would be happy to yield on the Senator's time.

Mr. BRADLEY. I only have 1 minute, Mr. President.

Mr. ROTH. I yield for a question, yes.

Mr. BRADLEY. Mr. President, the Senator has stood on the floor a number of times while I have been here and argued very strongly for the feedback effect of individual income tax cuts. I think he has argued in other forums as well for the feedback effect of reduction of taxes on investment income. Would not, in effect, this provide a real carrot for savings and if we increased savings, would we really have a revenue loss that the Joint Taxation Committee has suggested might be as high as $5 billion?

Mr. ROTH. The Senator is correct that I have come to the floor on many occasions to promote the concept of a reduction in the marginal rate of taxes. I am happy to see that the Senate has strongly endorsed that concept by approving a 25-percent, 3-year across-the-board tax cut.

As far as additional incentives for savings, I would say that I can think of a great number of ideas and concepts that I would like to propose or support. My problem here, Mr. President, is that we can only do so much and that we have a major tax bill that was developed in the Finance Committee and on the Senate floor. but unfortunately, we cannot keep adding to it.

Mr. President, I feel very strongly that the first step as far as individuals are concerned is to permit the working people to retain more of their hard earnings. That is the reason for the 25 percent across-the-board tax cut, plus indexing. We have added, as the Senator knows, a number of savings incentives which I think will have a beneficial impact.

Very frankly, Mr. President, if I thought we could afford to do more at this stage, I would be happy to add additional savings. But even if I were of the school of thought that we could do that today, I think, in adopting additional incentives to save, a principal goal must be simplification, both in understanding as far as the taxpayer is concerned and in its administration. As I said, one of my concerns about the proposal of the distinguished Senator from New Jersey is its complexity. I think the concept is worth exploring, worth investigating, Mr. President, but I think in doing so, we ought to do it in committee.

As I said, I find it, from the standpoint

of revenue loss and from the standpoint of complexity, unsatisfactory and for that reason, would oppose it.

I yield the floor, Mr. President.

Mr. BRADLEY. Mr. President, I appreciate the comments of the Senator from Delaware. I hope if this amendment does not prevail today, we can, in the committee process in the coming year, take a look at this proposal in greater depth. I urge my colleagues to act now and support this amendment, Mr. President, because in the bill as constituted, we have no certainty that we will be creating new savings. All we have is a reasonable probability that we shall be shifting savings from one kind of asset to another. The result will be not to increase the percent of every dollar that the American public saves.

I believe that the argument that this is too complex is somewhat ironic, given the fact that in the past 48 hours we have adopted at least five or six tax shelter amendments that clearly complicate the tax code infinitely more.

So I argue, finally, with respect to the fact that there have not been hearings on this matter, that there were no hearings on many of the other amendments we have added to this bill, not on the amendment by Senator SCHMITT which established the principle of net interest. This simply establishes the principle of net savings, of net new savings, from which we will get the investment to rebuild America.

So I argue that this amendment is the only amendment we will consider that guarantees any significant increase in personal saving. It is the only amendment we will consider that simply does not transfer savings from one asset to another. It is the only amendment we will consider that will give the American people a sufficient carrot to save more of their income.

Mr. President, I yield back the remainder of my time, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Does the Senator from Delaware yield back the remainder of his time?

Mr. ROTH. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from New Jersey. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from New Jersey (Mr. WILLIAMS) is necessarily absent.

The PRESIDING OFFICER (Mr. HAYAKAWA). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 15, nays 84, as follows:

[Rollcall Vote No. 232 Leg.]

YEAS—15

Biden	Hart	Matsunaga
Bradley	Hollings	Melcher
Cranston	Huddleston	Moynihan
DeConcini	Kennedy	Sarbanes
Dodd	Levin	Tsongas

NAYS—84

Abdnor	Garn	Nickles
Andrews	Glenn	Nunn
Armstrong	Goldwater	Packwood
Baker	Gorton	Pell
Baucus	Grassley	Percy
Bentsen	Hatch	Pressler
Boren	Hatfield	Proxmire
Boschwitz	Hawkins	Pryor
Bumpers	Hayakawa	Quayle
Burdick	Heflin	Randolph
Byrd, Harry F., Jr.	Heinz	Riegle
Byrd, Robert C.	Helms	Roth
Cannon	Humphrey	Rudman

Chiles	Jackson	Schmitt
Cochran	Jepsen	Simpson
Cohen	Johnston	Specter
D'Amato	Kassebaum	Stafford
Danforth	Kasten	Stennis
Denton	Laxalt	Stevens
Dixon	Leahy	Symms
Dole	Long	Thurmond
Domenici	Lugar	Tower
Durenberger	Mathias	Wallop
Eagleton	Mattingly	Warner
East	McClure	Weicker
Exon	Metzenbaum	Zorinsky
Ford	Mitchell	
	Murkowski	

NOT VOTING—1

Williams

So Mr. BRADLEY's amendment (UP No. 317) was rejected.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE addressed the Chair.

Mr. BAKER. Mr. President, will the Senator yield to me?

Mr. DOLE. I yield to the distinguished majority leader.

ORDER OF PROCEDURE THIS EVENING

Mr. BAKER. Mr. President, I thank the Senator for yielding to me. If we could have order in the Senate, I would like to try to describe the situation as I see it at this moment.

It looks like we are not going to be able to go out at an early hour tonight. I had thought for a while it might be possible to run to a fairly reasonable hour and then set a time certain tomorrow earlier than we originally planned to try to finish this bill. But, you know, even given a willingness to do that, and I believe both the majority and minority leaders were willing to consider that, if you take a look at the list of amendments, it simply is impractical.

There are five amendments remaining on this side of the aisle, there probably will be only three offered, maybe just two. But on the other side of the aisle, Mr. President, we have 22 amendments, according to my list. So even if we go until the 3 o'clock hour tomorrow, we are going to probably end up with what I called on the first day the final passage stampede because we will be hard put to dispose of 27 amendments in the time we have remaining.

So, Mr. President, I think we are going to have to remain in session tonight. I do not know how late we will go, I will consult with the distinguished minority leader and, of course, with the managers of the bill on both sides.

But I would urge Senators to consider that we will be in for some little while yet working our way through amendments. I have not totally abandoned the idea that we will finish tonight. But, based on what I have just told you, with 27 amendments remaining, it would appear more likely that we will work fairly late tonight and still not be able to finish it.

I felt constrained to advise Senators so that they can make appropriate plans.

Mr. DOLE. Mr. President, I hope, as one who has been here for some time, that we would get all these dogs out of the way tonight, and the horses, too. But we will just keep working our way down the list. I think most of them will fall by the wayside. We have got two coming up right now we have have an agreement on. We are still working with the distinguished minority leader on an amendment. I think we have worked one out for the Senator from Kentucky (Mr. HUDDLESTON). I have just been advised by the Senator from Delaware that he is willing to bring up an amendment any time we wish, so we are really making good progress.

I should think in a couple of hours we will have disposed of a number of amendments, if they have been cleared all the way around. We have one, as I say, now pending involving Senators BAUCUS and ROTH. We have one involving Senator DECONCINI and Senator ARMSTRONG, and they are prepared to take 5 minutes. So how many amendments are left?

Mr. BAKER. Twenty-seven.

Mr. DOLE. I have just taken care of seven.

Mr. METZENBAUM. May I point out to the Senator from Kansas that the horse amendment of Senator HUDDLESTON is still a matter of just how much it is going to cost, the way it is going.

Mr. DOLE. They are at the gate, in any event.

[Laughter.]

Mr. BAKER. Mr. President, in view of the remarks by the distinguished chairman of the committee and others, it is clear we are going to be in for a good while tonight just working our way through amendments. We will take another look at 8 o'clock and see how it is then. But I would advise Senators that we are here for a while tonight.

The PRESIDING OFFICER. The Senator from Kansas is recognized.

UP AMENDMENT NO. 318

Mr. DOLE. Mr. President, I send a number of technical amendments to the desk and ask for their immediate consideration. I ask unanimous consent that I may do so.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE) proposes an unprinted amendment numbered 318.

Mr. DOLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 16, beginning with line 23, strike out all through page 17, line 2, and insert in lieu thereof the following:

(B) Paragraph (1) of section 3(a) (relating to imposition of tax table tax) is amended by inserting before the last sentence thereof the following new sentence: "The tables so prescribed may be based on tax table income or taxable income.".

On page 22, line 24, after "regulations" insert "prescribed".

On page 31, line 3, strike out "appropriate" and insert in lieu thereof "applicable".

On page 32, line 16, insert "applicable" before "period".

On page 34, line 2, insert "applicable" before "period".

Section 168(b)(2)(C) of the Internal Revenue Code of 1954, as added by section 201(a), is amended by striking out "low-income rental housing (within the meaning of section 167(k)(3)(B))" and inserting in lieu thereof "property described in clause (i), (ii), (iii), or (iv) of section 1250(a)(1)(B)".

On page 49, line 3, strike out "paragraph (1)" and insert in lieu thereof "subparagraph (A)".

On page 58, beginning with line 22, strike out all through page 59, line 4, and insert in lieu thereof the following:

"(E) CERTAIN LIQUIDATIONS.—For purposes of this paragraph, a person is not a related person to the taxpayer if such person is a distributing corporation in a complete or partial liquidation to which section 331 applies and the stock of such corporation with respect to which the distribution described in section 331 is being made was acquired by purchase by the taxpayer (or a person related to the taxpayer) after December 31, 1980.

On page 60, line 6, beginning with "the deduction", strike out all through page 60, line 9, and insert in lieu thereof the following: "the deduction allowable under subsection (a) shall be computed—

"(I) in the case of a transaction described in subparagraph (C), under rules similar to the rules described in section 381(c)(6); and

"(II) in the case of a transaction otherwise described in this paragraph, under the recovery period and method (including rates prescribed under subsection (b)(1)) used by the person from whom the taxpayer acquired such property (or, where such person had no recovery method and period for such property, under the recovery period and method (including rates prescribed under subsection (b)(1)) used by the person which transferred such property to such person).

On page 63, lines 9 through 11, strike out "(taking into account the last sentence of subsection (b)(2)(A))" and insert in lieu thereof "(taking into account the half-year convention)".

On page 64, strike out lines 9 through 14, and insert in lieu thereof the following:

"(II) assign percentages (taking into account the last sentence of subsection (b)(2)(A)) determined in accordance with use of the method of depreciation described in section 167(j)(1)(B), switching to the method described in section 167(b)(1) at a time to maximize the deduction allowable under subsection (a).

On page 65, in the matter following line 2, insert "present" before "class" each place it appears.

On page 65, beginning with line 4, strike out all through page 66, line 7, and insert in lieu thereof the following:

"(I) PERIOD ELECTED BY TAXPAYER.—Except as provided in subclause (II), the taxpayer may elect under clause (i) for any taxable year only a single recovery period (not less than the present class life) for recovery property described in this paragraph which is placed in service during such taxable year, which has the same present class life, and which is in the same class under subsection (c)(2).

"(II) REAL PROPERTY.—In the case of 15-year real property, the election under clause (i) shall be made on a property-by-property basis.

On page 67, lines 15 and 16, strike out "with regard to" and insert "taking into account".

On page 69, line 12, insert "the" after "amount of".

On page 70, strike out lines 4 through 9, and insert in lieu thereof the following:

"(7) SPECIAL RULE FOR ACQUISITIONS AND DISPOSITIONS IN NONRECOGNITION TRANSACTIONS.—Notwithstanding any other provision of this section, the deduction allowed under this section in the taxable year in which recovery property is acquired or disposed of in a transaction in which gain or loss is not recognized in whole or in part shall be determined in accordance with regulations prescribed by the Secretary.

On page 70, strike out lines 19 through 24, and insert in lieu thereof the following:

"(i) such agreement shall be treated as a lease entered into by the parties in the course of carrying on a trade or business, and

"(ii) the lessor shall be treated as the owner of the property."

On page 71, strike out lines 5 through 7, and insert in lieu thereof the following:

"(I) a corporation (other than an electing small business corporation within the meaning of section 1371 (b) or a personal holding company within the meaning of section 542 (a)),

On page 71, line 10, insert "or" after the end comma.

On page 71, between lines 10 and 11, insert the following:

"(III) a grantor trust with respect to which the grantor and all beneficiaries of the trust are described in subclause (I) or (II),

On page 71, strike out lines 20 through 22, and insert in lieu thereof the following:

"(iii) the term of the lease (including any extensions) does not exceed—

"(I) 90 percent of the useful life of such property for purposes of section 167, or

"(II) 150 percent of the present class life of such property."

On page 72, line 8, insert "or lessee" after "lessor".

On page 72, line 9, strike out "of ownership".

On page 72, line 17, strike out "or".

On page 72, line 19, strike out the end period and insert ", or".

On page 72, between lines 19 and 20, insert the following:

"(vi) subject to the provisions of subparagraph (G), the obligation of any person is subject to a contingency or an offset agreement."

On page 72, line 23, insert "(other than a qualified rehabilitated building within the meaning of section 48 (g) (1))" after "property".

On page 72, line 25, strike out "taxpayer" and insert "lessor".

On page 73, line 9, strike out "of the time the" and insert in lieu thereof "after such".

On page 73, between lines 16 and 17, insert the following new sentence flush with the margin of subparagraph (D):

In the case of property placed in service after December 31, 1980, and before the date of the enactment of this subparagraph, this subparagraph shall be applied by substituting 'the date of the enactment of this subparagraph' for 'such property was placed in service'.

On page 74, line 10, insert "or lessee" after "lessor".

On page 74, between lines 13 and 14, insert the following:

"(G) SPECIAL RULES FOR CONTINGENT PAYMENTS AND OFFSETS.—

"(i) IN GENERAL.—In the case of an agreement under subparagraph (A) which provides that the parties are obligated to make payments to each other, such agreement may provide that a party's obligation under the agreement is contingent upon, or may be satisfied by being offset (to the extent of the same amount) by, the payment by another party of such party's obligation.

"(ii) INCOME AND BASIS ADJUSTMENTS.—In the case of an agreement described in clause (i) to which this paragraph applies, for purposes of this subtitle—

"(I) the basis of the lessor in the qualified leased property shall include the amount of any obligation of the lessor which is contingent or offset, and

"(II) there shall be included in the gross income of the lessor (and allowed as a deduction to the other party) the amount, regardless of whether or not paid or received, the lessor is to receive under a schedule of payments under the agreement under subparagraph (A) under the obligation of another party which offsets the lessor's obligation."

On page 74, line 14, strike out "(G)" and insert in lieu thereof "(H)".

On page 74, in the matter between lines 14 and 15, strike out "47(e)" and insert in lieu thereof "47(d)".

On page 75, between lines 9 and 10, insert the following:

"(11) TRANSFEREE BOUND BY TRANSFEROR'S PERIOD AND METHOD IN CERTAIN CASES.—

"(A) IN GENERAL.—In the case of recovery property transferred in a transaction described in subparagraph (B), the transferee shall be treated as the transferor for purposes of computing the deduction allowable under subsection (a) with respect to so much of the basis in the hands of the transferee as does not exceed the adjusted basis in the hands of the transferor.

"(B) TRANSFERS COVERED.—The transactions described in this subpargraph are—

"(i) a transaction described in section 332 (other than a transaction with respect to which the basis is determined under section 334(b)(2), 351, 361, 371(a), 374(a), 721, or 731);

"(ii) an acquisition (other than described in clause (i)) from a related person (as defined in subparagraph (D) of subsection (e)(4)); and

"(iii) an acquisition followed by a leaseback to the person from whom the property is acquired.

"(C) PROPERTY REACQUIRED BY THE TAXPAYER.—Under regulations prescribed by the Secretary, recovery property which is disposed of and then reacquired by the taxpayer shall be treated for purposes of computing the deduction allowable under subsection (a) as if such property had not been disposed of.

"(D) EXCEPTION.—This paragraph shall not apply to any transaction to which subsection (e)(4) applies.

"(12) SPECIAL RULES FOR COOPERATIVES.—In the case of a cooperative organization described in section 1381(a), the Secretary may by regulations provide—

"(A) for allowing allocation units to make separate elections under this section with respect to recovery property, and

"(B) for the allocation of the deduction allowable under subsection (a) among allocation units."

On page 84, line 7, strike out "in lieu of the deduction" and insert in lieu thereof "be deemed to constitute the reasonable allowance".

On page 85, line 5, strike out "code" and insert in lieu thereof "Code".

On page 85, between lines 16 and 17, insert the following:

(e) CERTAIN DEPRECIATION CALCULATIONS.—Notwithstanding any other provision of law, the Secretary of Health and Human Services is not required (unless specifically required by law) to apply any provision of the Internal Revenue Code of 1954 in calculating deprecia-

tion for the purpose of determining any cost under a program administered by the Secretary.

On page 87, line 20, strike out "(5)" and insert in lieu thereof "(6)".

On page 90, beginning with line 11, strike out all through line 18 and the matter between lines 18 and 19 and insert in lieu thereof the following:

"(3) EXCEPTION FOR RECOVERY AND SECTION 179 PROPERTY.—

"(A) RECOVERY PROPERTY.—In the case of recovery property (within the meaning of section 168), the adjustment to earnings and profits for depreciation for any taxable year shall be the amount determined under the straight-line method (using a half year convention in the case of property other than the 15-year real property and without regard to salvage value) and using a recovery period determined in accordance with the following table:

"In the case of:	The applicable recovery period is:
3-year property	5 years.
5-year property	12 years.
10-year property	25 years.
15-year real property	35 years.
15-year public utility property	35 years.

For purposes of this subparagraph, no adjustment shall be allowed in the year of disposition (except with respect to 15-year real property), and rules similar to the rules under the last sentence of section 168(b)(2)(A) and section 168(b)(2)(B) shall apply.

"(B) Treatment of amounts deductible under 168 of such Code if—

(1) the applicable rate order expires by its terms without extension, and

(2) by the terms of its first rate order that becomes effective after the date of enactment of this joint resolution, such regulated public utility uses a normalization method of accounting with respect to the recovery deduction allowed by this section.

This provision shall not apply to any rate order which, under the rules in effect before the date of the enactment of section 168 of such Code, required a regulated public utility to use a method of accounting with respect to the deduction allowable by section 167 of such Code which under section 167(1) of such Code it was not permitted to use.

On page 100, line 2, strike out "to which section 465 applies" and insert "with respect to which any loss is subject to limitation under section 465".

On page 101, line 13, strike out "subparagraph (A), (B), or (C)" and insert in lieu thereof "clause (i), (ii), or (iii) of subparagraph (A) or subparagraph (B)".

On page 101, line 15, strike out the end period and insert in lieu thereof a comma.

On page 101, line 21, strike out "and".

On page 102, line 2, strike out the end period and insert ", and".

On page 102, between lines 2 and 3, insert the following:

"(v) which is not a person from which the taxpayer acquired the property described in subparagraph (A) or a related person to such person.

On page 104, line 5, after "transfers" insert "not".

On page 107, between lines 19 and 20, insert the following:

(3) CONFORMING AMENDMENT.—Section 48(o) (defining certain credits) is amended by adding at the end thereof the following new paragraph:

"(8) REHABILITATION INVESTMENT CREDIT.—The term 'rehabilitation investment credit' means that portion of the credit allowable by section 38 which is attributable to the rehabilitation percentage.".

On page 127, line 17, insert "any" before "Federal".

On page 130, lines 22 and 23, strike out "with the taxpayer".

On page 136, line 14, "beginning with and after the first taxable year" after "taxable years".

On page 141, lines 4 and 5, strike out "of the Internal Revenue Code of 1954".

On page 146, line 13, insert "of paragraph (1)" after "(A)".

On page 146, line 16, insert "of paragraph (1)" after "(B)".

On page 146, line 19, insert "of paragraph (1)" after "(C)".

On page 146, line 22, insert "of paragraph (1)" after "(D)".

On page 149, between lines 20 and 21, insert the following:

Subtitle E—Windfall Profit Tax

On page 153, line 10, insert "(c)" before "(6)".

Paragraph (2) of section 128(b) of the Internal Revenue Code of 1954, as added by section 301(a), is amended by inserting "by each spouse" after "received".

Subparagraph (A) of section 128(d)(1) and section 128(e)(2) of the Internal Revenue Code of 1954, as added by section 301(a), are each amended by inserting "savings" after "tax-exempt".

Subparagraph (B) of section 128(b)(1) of the Internal Revenue Code of 1954, as amended by section 302, is amended by inserting "(less the amount of any deduction under section 62(12))" after "such taxable year".

Subparagraph (B) of section 128(c)(1) of the Internal Revenue Code of 1954, as amended by section 302(a), is amended to read as follows:

"(B) amounts (whether or not designated as interest) paid, in respect to deposits, investment certificates, or withdrawable or repurchasable shares, by—

"(i) an institution which is—

"(I) a mutual savings banks, cooperative bank, domestic building and loan association, or credit union, or

"(II) any other savings or thrift institution which is chartered and supervised under Federal or State law,

the deposits or accounts in which are insured under Federal or State law or which are protected and guaranteed under State law, or

"(ii) an industrial loan association or bank chartered and supervised under Federal or State law in a manner similar to a savings and loan institution,

Subsection (b) of section 302 of the joint resolution is amended to read as follows:

(b) REPEAL OF PARTIAL EXCLUSION OF INTEREST.—

(1) IN GENERAL.—Subsection (c) of section 404 of the Crude Oil Windfall Profit Tax Act of 1980 is amended by striking out "1983" and inserting in lieu thereof "1982".

(2) CONFORMING AMENDMENT.—Section 116(a) (relating to partial exclusion of dividends) is amended to read as follows:

"(a) EXCLUSION FROM INCOME.—

"(1) IN GENERAL.—Gross income does not include amounts received by an individual as dividends from domestic corporations.

"(2) MAXIMUM DOLLAR AMOUNT.—The aggregate amount excluded under subsection (a) for any taxable year shall not exceed $100 ($200 in the case of a joint return under section 6013).

Section 302 of the joint resolution is amended by redesignating subsection (c) as subsection (d) and by inserting after subsection (b) the following new subsection:

(c) CONFORMING AMENDMENTS.—

(1) The table of sections for part III of subchapter B of chapter 1, as amended by section 301(b)(1), is amended by striking out the item relating to section 128 and inserting in lieu thereof the following new item:

"Sec. 128. Partial exclusion of interest.".

(2) Section 265 (relating to expenses and interest relating to tax-exempt income), as amended by section 301(b), is amended by striking out "or to purchase or carry any certificate to the extent the interest on such certificate is excludable under section 128" and insert in lieu thereof "or to purchase or carry obligations or shares, or to make other deposits of investments, the interest on which is described in section 128(c)(1) to the extent such interest is excludable from gross income under section 128".

(3) Section 46(c)(8) (relating to limitation to amount at risk) is amended by striking out "clause (i), (ii), or (iii) of subparagraph (A) of subparagraph (B) of section 128(c)(2)" and inserting in lieu thereof "subparagraph (A) or (B) of section 128(c)(1)".

Section 302(d) of the joint resolution, as redesignated by the preceding amendment, is amended to read as follows:

(d) EFFECTIVE DATES.—

(1) IN GENERAL.—The amendments made by subsections (a) and (c) shall apply to taxable years beginning after December 31, 1983.

(2) DIVIDEND EXCLUSION.—The amendment made by subsection (b)(2) shall apply to taxable years beginning after December 31, 1981.

On page 180, line 9, strike out "any" and insert "a".

On page 180, line 18, insert "lesser of $2,000 or the" after "the".

On page 182, line 23, after "plan" insert "which elects to allow an employee to make contributions which may be treated as qualified voluntary employee contributions under this section".

On page 184, strike out line 1 and insert in lieu thereof "after the last date on which such designation or notification may be made, shall".

On page 184, line 12, strike out "any" and insert in lieu thereof "a".

On page 185, lines 23 and 24, strike out "retirement" and insert in lieu thereof "voluntary".

On page 186, line 20, strike out "after the application of subsection (b), (c), or (d)"

On page 190, line 6, after "is" insert "not".

On page 190, strike out lines 13 through 16, and insert in lieu thereof "includible in gross income. For purposes of this title, any tax imposed by this".

On page 190, line 25, strike out "a plan" and insert in lieu thereof "an employee".

On page 191, line 10, strike out "the" and insert in lieu thereof "such accumulated".

On page 191, strike out lines 20 and 21, and insert in lieu thereof "made after December 31, 1981, in a taxable year beginning after such date and allowable as a deduction under section 219(a) for such taxable year.".

On page 192, lines 1 and 2, strike out "taken into account under section 219".

On page 192, line 3, strike out "net" and insert in lieu thereof "income and".

On page 192, line 6, strike out "net loss" and insert in lieu thereof "loss and expense".

On page 192, line 14, strike out the end quotation marks and the end period.

On page 192, between lines 14 and 15, insert the following:

"(6) ORDERING RULES.—Unless the plan specifies otherwise, any distribution from such plan shall not be treated as being made from the accumulated deductible employee contributions until all other amounts to the credit of the employee have been distributed.".

On page 192, beginning with line 15, strike out all through page 193, line 2, and insert in lieu thereof the following:

(2) 10-YEAR AVERAGING AND CAPITAL GAINS NOT TO APPLY.—Subparagraph (A) of section

402(e)(4) (defining lump sum distribution) is amended by adding at the end thereof the following new sentence: "For purposes of this section and section 403, the balance to the credit of the employee does not include the accumulated deductible employee contributions under the plan (within the meaning of section 72 (o) (5))."

On page 193, lines 18 and 19, strike out "distributions" and insert in lieu thereof "a distribution".

On page 194, strike out lines 13 through 19, and insert in lieu thereof the following:

(2) UNREALIZED APPRECIATION OF EMPLOYER SECURITIES.—

(A) Paragraph (1) of section 402(a) (relating to taxability of beneficiary of exempt trust) is amended by striking out in the second sentence thereof "by the employee" and inserting in lieu thereof "by the employee (other than deductible employee contributions within the meaning of section 72 (o)(5))."

(9) Subparagraph (J) of section 402(e) (relating to tax on lump sum distributions) is amended by adding at the end thereof the following new sentence: "This subparagraph shall not apply to distributions of accumulated deductible employee contributions (within the meaning of section 72(o)(5))."

On page 194, line 25, and page 195, line 1, strike out "as determined under" and insert in lieu thereof "within the meaning of".

On page 195, lines 1 and 2, strike out "as of the date of the decedent's death".

On page 195, lines 8 and 9, strike out "as determined under" and insert in lieu thereof "within the meaning of".

On page 195, lines 9 and 10, strike out "as of the date of the transfer".

On page 197, line 3, strike out "distribution" and insert "contribution".

On page 197, line 14 insert "described in section 408 (k)" after "pension".

On page 197, line 16, strike out "account,".

On page 198, line 12, insert "allowable as a deduction under section 219(a)" after "pension,".

On page 198, line 13, insert "(within the meaning of section 72(o)(5))" after "contributions".

On page 200, between lines 24 and 25, insert the following:

(i) ROLLOVERS UNDER BOND PURCHASE PLANS.—

(1) GENERAL RULE.—Subsection (d) of section 405 (relating to taxability of beneficiary of qualified bond purchase plan) is amended by adding at the end thereof the following new paragraph:

"(3) ROLLOVER INTO AN INDIVIDUAL RETIREMENT ACCOUNT OR ANNUITY.—

"(A) IN GENERAL.—If—

"(i) any qualified bond is redeemed,

"(ii) any portion of the excess of the proceeds from such redemption over the basis of such bond is transferred to an individual retirement plan which is maintained for the benefit of the individual redeeming such bond, and

"(iii) such transfer is made on or before the 60th day after the day on which the individual received the proceeds of such redemption,

then, gross income shall not include the proceeds to the extent so transferred and the transfer shall be treated as a rollover contribution described in section 408(d)(3).

"(B) QUALIFIED BOND.—For purposes of this paragraph, the term 'qualified bond' means any bond described in subsection (b) which is distributed under a qualified bond purchase plan or from a trust described in section 401(a) which is exempt from tax under section 501(a)."

(2) TECHNICAL AMENDMENTS.—

(A) The second sentence of paragraph (1) of section 405(d) is amended by striking out "the proceeds" and inserting "except as provided in paragraph (3), the proceeds".

(B) Sections 219(d)(1), 408(a)(1), and 4973(b)(1)(A) are each amended by inserting "405(d)(3)," after "403(b)(8),".

(C) Subsection (e) of section 2039 is amended by inserting "405(d)(3)," after "a contract described in subsection (c)(3)),".

On page 200, line 25, strike out "(i)" and insert in lieu theerof "(j)".

On page 201, between lines 21 and 22, insert the following:

(6) BOND PURCHASE PLANS.—The amendments made by subsection (i) shall apply to redemptions after the date of the enactment of this joint resolution in taxable years ending after such date.

On page 201, line 22, strike out "OWNER-EMPLOYEE" and insert in lieu thereof "SELF-EMPLOYED INDIVIDUAL'S".

On page 203, lines 11 and 12, strike out "the plan" and insert in lieu thereof "a simplified employee pension".

On page 203, line 12, strike out "such plan" and insert in lieu thereof "the simplified employee pension".

On page 204, strike out lines 20 through 24, and insert in lieu thereof the following:

(1) by adding at the end of paragraph (6) the following new sentence: "For purposes of this subsection (other than paragraph (5)), the term 'owner-employee' includes an employee described in section 401(c)(1).", and

On page 208, line 6, insert "of corporations" after "controlled group".

On page 208, line 12, insert "of corporations" after "controlled group".

On page 216, line 22, strike out "claim" and insert in lieu thereof "claimed".

On page 223, line 24, strike out "either".

On page 233, line 13, strike out the comma.

On page 233, line 20, strike out "such gift" and insert in lieu thereof "a gift resulting from the exercise of such power of appointment".

On page 236, strike out lines 13 through 23, and insert in lieu thereof the following:

"(A) within the period beginning on the date of the decedent's death and ending on the later of the date which is 10 years after—

"(i) the date of the decedent's death, or

"(ii) the date occurring within 1 year of the decedent's death on which the qualified heir commences using the qualified real property which was acquired (or passed) from the decedent for the qualified use,

On page 238, line 1, strike out "the 10-year period under" and insert in lieu thereof ", the period described in".

On page 243, line 22, insert "annual" after "average".

On page 244, line 8, insert "cash" after "gross".

On page 244, line 9, insert "annual" after "average".

On page 244, line 12, insert "annual" after "average" both places it appears.

Section 409 of the joint resolution is amended to read as follows:

SEC. 409. INCREASE IN SPECIAL USE VALUATION LIMIT TO $600,000.

(a) INCREASE.—Paragraph (2) of section 2032A(a) (relating to limitation) is amended by striking out "$500,000" and inserting in lieu thereof "$600,000".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to estates of decedents dying after December 31, 1981.

On page 261, between lines 22 and 23, insert the following:

"(C) SPECIAL RULE FOR IDENTIFIED STRADDLES.—In the case of any position which is not part of an identified straddle (within the meaning of subsection (a)(3)(B)), such position shall not be treated as offsetting with respect to any position which is part of an identified straddle.

On page 265, line 14, strike out "not elected" and insert in lieu thereof "elected not".

On page 271, strike out lines 3 through 10, and insert in lieu thereof the following:

"(1) ELECTION.—The taxpayer may elect to have this section not to apply to all regulated futures contracts which are part of all mixed straddles.

On page 273, line 6, insert "or for" after "by".

On page 273, beginning with line 8, strike out all through page 274, line 14, and insert in lieu thereof the following:

"(B) SYNDICATE DEFINED.—For purposes of subparagraph (A), the term 'syndicate' means any partnership or other entity (other than a corporation which is not an electing small business corporation within the meaning of section 1371(b)) if more than 35 percent of the losses of such entity during the taxable year are allocable to limited partners or limited entrepreneurs (within the meaning of section 464(e)(2)).

"(C) HOLDINGS ATTRIBUTABLE TO ACTIVE MANAGEMENT.—For purposes of subparagraph (B), an interest in an entity shall not be treated as held by a limited partner or a limited entrepreneur (within the meaning of section 464(e)(2))—

"(i) for any period if during such period such interest is held by an individual who actively participates at all times during such period in the management of such entity,

"(ii) for any period if during such period such interest is held by the spouse, children, grandchildren, and parents of an individual who actively participates at all times during such period in the management of such entity,

"(iii) if such interest is held by an individual who actively participated in the management of such entity for a period of not less than 5 years,

"(iv) if such interest is held by the estate of an individual who actively participated in the management of such entity or is held by the estate of an individual if with respect to such individual such interest was at any time described in clause (ii), and

"(v) if the Secretary determines that such interest should be treated as held by an individual who actively participates in the management of such entity, and that such entity and such interest are not used (or to be used) for tax-avoidance purposes.

For purposes of this subparagraph, a legally adopted child of an individual shall be treated as a child of such individual by blood.

On page 274, between lines 14 and 15, insert the following:

"(4) SPECIAL RULE FOR BANKS.—In the case of a bank (as defined in section 581), subparagraph (A) of paragraph (2) shall be applied without regard to clause (i) or (ii) thereof.

On page 274, line 21, after "time" insert "personal property (as defined in section 1092 (d)(1))".

On page 279, line 11 through 13, strike out "Such term includes any position treated as a regulated futures contract under section 1256(d)(1).".

Section 509(a)(4) of the joint resolution is amended by adding at the end thereof the following new subparagraph:

(C) If an election is made under this subsection, interest shall be imposed under rules similar to the rules under section 6601(h) of the Internal Revenue Code of 1954.

Section 706 of the joint resolution is amended to read as follows:

SEC. 706. INDIVIDUALS ELIGIBLE FOR EARNED INCOME CREDIT.—

(a) IN GENERAL.—Paragraph (1) of section 43(c) (defining eligible individual) is amended by inserting "who, on the last day of the taxable year, is a citizen of the United States or an alien individual who has been admitted to the United States as a permanent resident, and" after "means an individual",

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to taxable years beginning after December 31, 1981.

Mr. DOLE. Mr. President, let me assure all Senators that they are technical in nature. They have been approved by the distinguished Senator from Louisiana (Mr. LONG) and by the Senator from Ohio; is that correct, Senator METZENBAUM? I ask unanimous consent that all of these technical amendments be considered even though they may touch the bill in places that have already been amended.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I know of no reason to debate the amendments.

I yield back my time. The Senator from Louisiana has no problem with the technical amendments?

Mr. LONG. No problem.

Mr. METZENBAUM. Mr. President, will the Senator yield for just one question? Would the Senator be good enough to represent for the RECORD that which I know has already been represented to me privately, that these, indeed, are technical amendments and include no substantive changes.

Mr. DOLE. The Senator is correct. I have been assured of that by the Joint Tax Committee. The answer is, "Yes."

Mr. METZENBAUM. I thank the Senator.

The PRESIDING OFFICER. Do the Senators yield back their time?

Mr. DOLE. Yes.

The PRESIDING OFFICER. All time is yielded back, the question is on agreeing to the amendment of the Senator from Kansas.

(Putting the question.)

The amendment (UP No. 318) was agreed to.

Mr. DOLE. I move to reconsider the vote by which the amendment was agreed to.

Mr. ROTH. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, the pending amendment is the amendment of the Senator from Kansas?

The PRESIDING OFFICER. The Senator is correct.

Mr. DOLE. Mr. President, I ask unanimous consent that that be temporarily laid aside so that we may now consider the amendment of the Senator from Delaware and the Senator from Montana, followed by the amendment of the Senator from Arizona and the Senator from Colorado.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 319

(Purpose: To restore declining balance rate on structures to 175 percent on a phased-in basis)

Mr. ROTH. Mr. President, I send an amendment to the desk on behalf of Senator BAUCUS and myself and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Delaware (Mr. ROTH), for himself and Mr. BAUCUS, proposes an unprinted amendment numbered 319.

Mr. ROTH. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 47, substitute a comma for the period at the end of line 11 and after line 11 insert the following new clause (iii):

"(iii) In applying the method of depreciation described in section 167(b)(2)—

"(I) the rate shall be 150 percent of the straight-line rate in the case of nonresidential real property placed in service prior to 1985,

"(II) the rate shall be 175 percent of the straight-line rate in the case of nonresidential real property placed in service in 1985, 1986, 1987, 1988, 1989 and 1990, and

"(III) the rate shall be 150 percent of the straight-line rate in the case of nonresidential real property placed in service after 1990."

Mr. ROTH. Mr. President, this amendment would simply restore a portion of the accelerated depreciation schedule for buildings that was deleted from the Finance Committee bill last week.

Under this amendment, nonresidential real property in the 15-year cost recovery class may be depreciated at declining balance rates of up to 175 percent of the straight-line method beginning in 1985, and continuing through 1990. In 1991 the rate would drop back to 150 percent. This is the year in which taxpayers will be permitted to expense construction period interest payments and taxes on nonresidential structures.

Since the changes contained in this amendment do not take effect until 1985, there is no revenue differential between it and the Finance Committee bill for the period 1981 through 1984. The Joint Tax Committee estimates the revenue loss in fiscal year 1985 to be $106 million and $238 million in fiscal year 1986. This is the revenue loss differential between this amendment and the committee bill as it currently stands.

Mr. President, the original bill that was reported by the Finance Committee would have permitted all real property to be depreciated over a 15-year period at rates based on the 200-percent declining balance method, that is, a rate equivalent to 200 percent of the straight-line method.

Under present law, buildings are depreciated over a range of 40 to 60 years. According to the Treasury Department, the average lives claimed by taxpayers for new buildings range from 32 years for apartment buildings to 43 years for bank buildings. The shorter average range reflects the use of the component method of depreciation under which a taxpayer allocates the cost of a building to its component parts such as the plumbing, heating and wiring systems. Different depreciation periods are then assigned to each component.

Currently, new commercial real estate may be depreciated at declining balance rates of up to 150 of the straight-line method. New residential real property may be depreciated at rates up to 200 percent.

The beauty of the Finance Committee bill is its simplicity. It would place all real property into one cost recovery category of 15 years. The original bill would have allowed all real property to be depreciated using the 200-percent declining balance method. This is what the original bill would have done.

However, last week, the distinguished chairman of the Finance Committee was forced, due to budgetary pressures, to offer an amendment to the bill which reduced the depreciation benefits for buildings. The chairman's amendment cut back the recovery rate from 200 percent to a 150 declining balance rate.

I understand the chairman's motives for offering this amendment. He simply had no choice following the adoption of the Packwood-Moynihan amendment on charitable deductions and the Weicker-Durenberger-Nunn amendment on small business. He could have either allowed the bill to break the bank or cut back in some other area in order to bring it back into balance. He had to cut back.

I believe my amendment is a reasonable compromise between the need to balance the budget by 1984 and the need to provide incentives in the bill to increase productivity and industrial growth.

My amendment would restore some of the bill's original recovery rates for nonresidential buildings beginning in 1985. It would have no revenue effect before that time.

It would place nonresidential real property depreciation on a phase-in track similar to that of equipment depreciation. Under the bill equipment may be depreciated under the 150 declining method. This increases to 175 in 1985 and to 200 percent in 1986.

I realize that even without my amendment the depreciation benefits afforded real property under the finance bill are far superior than under current law. But the purpose of this tax bill is to provide the greatest possible incentives to our Nation's businesses to enable them to increase their productivity and create new jobs for our youth and unemployed. Other provisions of the bill are aimed at reducing the individual tax burden and encouraging increased individual savings.

Clearly, the business side of this measure must provide the incentives to create investment capital without which our economy will continue to stagnate.

The accelerated cost recovery system proposed by the administration on June 9—and reported by the Finance Committee—provided two writeoff options for buildings used in manufacturing, wholesaling, and retailing. The first option provided for a 15-year depreciation period using the 200 percent declining balance writeoff method, subject to full section 1245 recapture, which means that all depreciation which a taxpayer has claimed and deducted is taxed at ordinary income rates in the year a building is sold.

Under a second option in the bill, taxpayers could elect a 15-year, straight-line writeoff method, also over a 15-year period, subject to section 1250 recapture rules—which means that no depreciation

claimed is subject to recapture when a building is sold.

My amendment is designed to provide for active users of buildings the same kind of investment incentive which ACRS provides for equipment and vehicles. But to understand why my amendment is necessary, it is important to understand the difference between active and passive users of buildings and their respective business objectives.

Active users of buildings who produce or distribute goods and are primarily benefited by accelerated depreciation rather than by freedom from "recapture." The manufacturers, wholesalers, and retailers for whom the 200 percent declining balance method was designed plan to own and do business in their buildings indefinitely.

This is especially true of retailing, where buildings are the primary form of equipment. Retailers can no more expect to do business without buildings than a newspaper can expect to do business without electronic or mechanical printing presses, or a steel company can expect to make steel without furnaces.

It is impossible to overstate the equivalent economic benefits which are produced by retail buildings on the one hand and manufacturing equipment on the other. Increased capital investment in more efficient retail structures, which lowers the distribution cost of a product, will stimulate demand and economic growth in exactly the same way as will increased capital investment in more efficient machinery in the manufacturing sector. Because retailing is highly competitive, lower costs achieved through efficiency result in lower prices to consumers.

An efficient distribution system creates a market and exerts a strong pullthrough effect on manufacturing. Without efficient distribution, there could be no mass production or mass consumption. Conversely, an inefficient distribution system has a dampening effect, by increasing costs and impeding product flows that may more than offset incentives granted to the manufacturing sector. The full benefits of capital cost recovery will not be realized if products manufactured at lower cost as a result of enactment of ACRS cannot be delivered and marketed to consumers in the most efficient possible manner.

The second building depreciation option which would be available under the ACRS system is intended to benefit passive investors and syndicators who own buildings simply as investments which may appreciate in value.

For active building users such as retailers, rapid depreciation is the important spur to productive investment. For passive building users, the most important aspect of ACRS is freedom from recapture—or the ability to convert ordinary income—now taxed at up to 70 percent—into capital gains—now taxed at no more than 28 percent.

Full recapture of depreciation under the accelerated writeoff method is essential and integral to the 200 percent declining balance method. Full recapture applies to the depreciation claimed on all equipment and all vehicles. Full recapture is an appropriate tradeoff for fast and highly accelerated depreciation. Moreover, with regard to buildings, full recapture is frankly and explicitly intended to discourage speculative investment by passive users in the kinds of real estate to which it applies. My amendment is designed to give back to active building users the incentive of rapid depreciation—the same incentive which ACRS provides for equipment and vehicles.

Specifically, under my amendment, between 1981 and 1984, business buildings, other than residential rental property, would qualify for a 15-year writeoff period using the 150 percent declining balance method of depreciation, switching to straight line. Similarly, equipment placed in service from 1981 through 1984 would be depreciated over a 5-year period also using the 150 percent declining balance method of depreciation switching to straight line. In 1985, under my amendment, acceleration on both buildings and equipment would be increased from 150 to 175 percent.

It is important to note that we are not proposing to provide precisely the same tax treatment for buildings and equipment. The writeoff period for buildings under any proposed method of acceleration would be 15 years, while the writeoff period for equipment would be 5 years. In addition, except for rehabilitation costs, no buildings would qualify for an investment tax credit. By contrast, virtually all equipment would qualify for a 10-percent investment tax credit.

Most important, for the calendar years 1981 through 1984, this amendment would entail no additional revenue loss. In 1985, the additional revenue cost would be $106 million.

Buildings used by manufacturers, wholesalers, and retailers are an integral part of the central economic system of this Nation. For precisely this reason, we should provide at least comparable—if not precisely equivalent—tax treatment for active and productive buildings, as we are contemplating providing for equipment and vehicles. My amendment, by phasing in more rapid depreciation, will accomplish this end.

At this time, I am happy to yield to the distinguished Senator from Montana.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, I first wish to thank the Senator from Delaware (Mr. ROTH) for his tireless efforts in working for this amendment. In the last couple of weeks, there have been many different approaches to solving this problem. Of course, also, the Senator from Pennsylvania (Mr. HEINZ) is also to be commended, but particularly the Senator from Delaware I think is to be commended for his help here.

There is no question that we in this tax bill are helping to increase productivity generally, and more particularly we are trying to provide the incentives for a manufacturing productivity increase, an area that deserves and needs specific help in our Nation's economy.

But, in addition to manufacturing, we also need to provide the stimulus for promoting the greater efficiency in commercial and retail structures.

Commercial real estate plays a vital role in creating new jobs and promoting greater efficiency in the use of capital resources. To build new efficient commercial structures and to renovate and retrofit old commercial structures is, in my judgment, one of the most significant things we can do to improve America's economy.

America is moving, increasingly, into a postindustrial age where the service sector we are providing is one of our most significant worldwide economic assets. This is one of the most viable parts of our economy, and we cannot forget it when we work to expand greater investment in the private sector.

To increase the accelerated depreciation to 175 percent is a small step toward achieving greater investment—productive investment—in our Nation's economy.

This amendment helps our country move in that area and helps our country move, I think, at a pace that is going to be needed in future years.

To give you an idea of how significant retailing is becoming to areas remote as Montana, I will ask to have printed in the RECORD an article which appeared in a recent edition of the Wall Street Journal. This article details at length the burgeoning retail market in Billings, Mont. It is my considered judgment that this kind of activity could occur throughout the country with the proper type of tax incentive. The Roth-Baucus amendment, if enacted, should provide the minimum incentive needed to achieve greater productivity in the commercial structure field. Indeed, it is my hope that my colleagues can see their way to expanding the depreciation level to 200 percent.

I ask unanimous consent to have the article from the Wall Street Journal printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

BILLINGS PROSPERS FROM BOOM AND AVOIDS MOST SIDE-EFFECTS

(By William E. Blundell)

No place is reaping more benefits from rapid energy development, at less cost, than Billings, Mont. Spreading out under the rimrock by the Yellowstone River, it has managed to become a prosperous boom town—without having to put up with any of the noise, mess and crowding of a boom.

The Magic City, as it's called, used to be a farm center and cow town where a man could let off steam. Those who did often regretted it after a visit to the doctor or an encounter with Ollie Warren, madam at the Lucky Diamond; she had the alarming habit of poking her head out the window upon spotting clients in the street and bellowing: "Hello, you old -----. When you comin' up again?" An Army medical officer once declared that 12 hours in town was enough to ruin any recruit for duty.

The town cleaned up prostitution, but it is still very much in the service business. Though it has no energy development of its own, it is getting filthy rich on those who do, selling everything from nose jobs to designer jeans to the people in remote towns gripped by oil and coal development. Mike Skaggs, economic development director for the chamber of commerce, says cheerfully:

"We get the money, and the small towns get the impact."

In the past decade Billings has grown from 69,000 to nearly 100,000 people. It is the largest town in thinly populated Montana and the unquestioned trade and services hub of the Big Empty, the tens of thousands of square miles of prairie and tableland that stretch from the Dakotas to the Rockies, from Canada deep into Wyoming. This stretch is Billings' natural trade area, perhaps the biggest any U.S. city can claim.

The tiny, once-depressed towns scattered over it are full of energy money. To the east, a roaring oil boom is under way in the Williston Basin, and all around Billings are the richest coal seams in a state that is the Saudi Arabia of coal. Production in the trade area has risen from 2.5 million tons in 1970 to about 38 million tons last year, and is expected to more than double by 1990.

That means even more cash funneling into Billings. A strip miner or oil roustabout 200 miles from town may make $25,000 to $40,000 a year but can't dispose of it locally. Entertainment in such places may amount to watching a clerk stock the shelves at the K mart, or drinking too many beers at the only bar in town. If a boomer wants a pair of Calvin Kleins, a decent restaurant meal, or a chance to see a first-run movie, he has to go to Billings. And he does. Some fly in from Canada or Wyoming for shopping sprees, others drive in by the thousands. The influx is expected to push retail sales in the Billings area to almost $720 million this year, compared with $332 million in 1975.

If a customer can't get to Billings, the town goes to him. Every Monday morning, hundreds of traveling salesmen for more than 350 wholesale houses in town drive off for a week of peddling in the remote reaches of the trade area. They rack up well over $1 billion in sales yearly, accounting for about a third of all the wholesale trade in the state.

Locked into the energy boom, the town seems almost immune to the economic cycle outside its market zone. Recessions pass by almost unnoticed. The unemployment rate is about 4.5 percent year after year. Attractive three- or four-bedroom homes can be had for under $100,000 and a ride on a new diesel bus cost 35 cents. "We're an island of prosperity in a sea of despair," says a merchant.

It's an island with a grotesquely lopsided economy. Few people in Billings actually make anything; of some 57,000 jobs, less than 10 percent are in manufacturing. Everyone else sells, services or just pushes paper. This imbalance worries some. "There are just an awful lot of people here taking in each other's laundry," says Ray Hart, president of Hart-Albin Co., Billings' major department store. "There is too much retail space being added, and there's been an actual reduction in manufacturing jobs."

It's also true that the energy-inspired prosperity may have hurt city government as much as helped it. Montana has no sales tax, which towns elsewhere depend on heavily, so Billings must lean on local property taxes. But assessment and collection lag far behind inflation and the costs for services needed by new residents and visitors. Last year Billings had to eliminate 55 of its 740 jobs.

To most, however, these are but tiny clouds on a bright horizon; within its economy Billings offers practically everthing a plainsman could want. Is he flush? Nearly a dozen brokerage firms vie for his trade where only three operated before. Is he sick? With some 200 physicians in every major speciality and most minor ones, and two huge hospitals employing 1,800 people, the Magic City makes sure it's the place he goes to. (Some fraying film stars go too; a lift here and a tuck there from the city's well-regarded plastic surgeons and the star can resurface in Beverly Hills with no one the wiser.)

Always a refining center, the town is regaining white-collar oil jobs it lost in the 1960s when an earlier boom in the Williston Basin fizzled. Also, some miners and construction workers working 100 miles away choose to live in Billings—so the town enjoys their property taxes and payrolls without having an ugly mess in its backyard.

The new prosperity has made Billings a more sophisticated and desirable place to live. Some managers of chain retail outlets have quit rather than accept transfer out. Headhunters in Denver used to demand bonuses to induce young geologists to go to Billings, says Langdon Williams, a consulting geologist who has hired for client firms. When they ask now, he replies: "Hell no. Denver is the town people want to move out of."

Mr. BAUCUS. Suffice it to say, the amendment is needed and promotes the retail industry and service industry, an area that we need to promote, in addition to the manufacturing industry that the main tax bill generally pays attention to.

Mr. President, I thank the Senator for yielding and urge the adoption of this amendment.

Mr. CHAFEE addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. CHAFEE. Mr. President, I would like to ask the sponsor of the amendment a question.

Mr. President, as I understand the depreciation schedules that have been agreed to as modified here last week, we go to 150 percent. Am I not correct that it is 150 percent of all buildings? Is that not right?

Mr. ROTH. That is correct.

Mr. CHAFEE. In other words, previously we were at 200 percent but that was changed last week?

Mr. ROTH. That is correct.

Mr. CHAFEE. What are we doing here? What is this 175 percent for retail buildings?

Mr. ROTH. For nonresidential buildings beginning in 1985 through 1990 it will permit 175 percent.

Mr. CHAFEE. In other words, we go to 175 percent. This would apply to all nonresidential buildings—manufacturing, warehouses, whatever it is?

Mr. ROTH. That is correct.

Mr. CHAFEE. So this is a compromise between the 200 percent that we came out of the committee with?

Mr. ROTH. That is right.

Mr. CHAFEE. And the 150 percent that we agreed to the other day? But this would not start until 1985?

Mr. ROTH. The Senator from Rhode Island is correct.

Mr. CHAFEE. I do not think in the original measure that we dealt with residential buildings. We did not have 200 percent of the residential; did we?

Mr. ROTH. They had 200 percent on residential in the committee bill.

Mr. CHAFEE. Getting to the point I want to make here, it is my understanding from talking with various real estate operators, it seemed to me that the plea was for a uniform depreciation schedule. For example, when the Senator talks about residential, what does that do to, say, apartment houses?

Mr. ROTH. They have changed residential to permit expensing.

Mr. CHAFEE. Who is "they"? What field?

Mr. ROTH. The legislation on the floor, as it is currently, permits expensing of residential buildings phased in over a period of time. It permits the expensing of the construction interests.

Mr. CHAFEE. But that is just a portion of it. I am talking about the value in an apartment building. The depreciation schedule for that would remain at 150 percent, am I correct, under this amendment?

Mr. ROTH. That is correct.

Mr. CHAFEE. What is the Senator's reason for treating residential buildings separate from all others?

Mr. ROTH. Because it gets the benefit of the early repeal of 189.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROTH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROTH. Mr. President, I would ask the distinguished Senator from Louisiana this question: Is my understanding correct that this amendment that I have offered is satisfactory to the minority manager as well as to the chairman of the Finance Committee?

Mr. LONG. That is correct.

Mr. ROTH. For that reason, Mr. President, I am ready to yield back my time.

The PRESIDING OFFICER. Does the Senator from Louisiana yield back the remainder of his time?

Mr. LONG. I yield back the remainder of my time, yes.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 319) was agreed to.

Mr. ROTH. Mr. President. I move to reconsider the vote by which the amendment was agreed to.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

IN SUPPORT OF THE ECONOMIC RECOVERY TAX ACT OF 1981

Mr. ROTH. Mr. President, I have listened patiently to the arguments from both sides of the aisle during the debate on the Economic Recovery Act. The opponents of this legislation, the most far-reaching tax reduction program in the history of our Nation, argue that it is a welfare program for the rich and well-to-do. They say the President's tax program is inflationary, tilted toward the wealth, nonresponsive to the needs of the poor and middle class, and destined to bankrupt the Federal Treasury.

I believe this aptly summarizes the inflamatory arguments of the opposition. Now let us look at the facts.

The legislation before us today is clearly the largest and probably the most innovative tax reduction program ever conceived in this country. I commend the distinguished chairman of the Finance Committee for his able and

strong leadership in fashioning this truly imaginative tax package. And I might add I am proud to have played a part in its development.

This package will reduce individual taxes by more than $250 billion over the next 3 years. It provides for a 25 percent across-the-board reduction in individual tax rates, a substantial reduction in the so-called marriage tax penalty for working couples, new incentives for savings and retirement, major reforms in the Federal estate and gift tax laws for farms and family-owned businesses, a complete revision of the business depreciation system, incentives for research and development, and significant new tax incentives for small and innovative businesses. In addition, all working Americans would be allowed to deduct contributions that they make to charity, whether or not they itemize. And, finally, the income tax brackets, personal exemptions and zero bracket would be adjusted, or indexed, to reflect the increase in the rate of inflation, as measured by the Consumer Price Index.

If anyone had said to me 4 years ago when JACK KEMP and I introduced our proposal for a 3-year across-the-board tax cut that the Senate would pass a legislative package such as the one before us today, I would have thought he had been standing out in the sun too long.

And, let me say today that anyone who categorizes this package as inflationary or irresponsible or unfair to the needs of the poor and middle class has definitely been standing out in the sun too long.

The Economic Tax Recovery Act is a well balanced and comprehensive plan designed to promote an expand economy which will insure new jobs for the young and unemployed.

This program is not tilted toward the wealthy. It is targeted toward developing a national policy of renewed economic growth which will benefit all Americans and particularly the working men and women of the often forgotten middle-class.

I am referring to the average middle-income citizen who has held true to the American dream that if you work hard you will be able to keep more and create a better life for yourself and your children.

Unfortunately, for these Americans just the opposite has been true over the last 15 years. Rising inflation and higher and higher taxes have taken away the incentives to work and save and invest in America. Today, it has become more attractive not to work simply because each additional dollar of income is either eaten up by inflation or taxed away by the Government.

The time has come to reverse this debilitating trend in our national economy. I think I speak for most of the working men and women of this country when I say that I am tired of the old, worn-out policies that have led our Nation down the road of economic decline, skyrocketing inflation, unemployment, and competitive weakness in international markets.

The American dream of working hard to advance one's career, to provide a home for the family, and to provide educational opportunities for one's children is in serious jeopardy.

The tax package before the Senate will restore and renew that dream by relieving the massive tax burden the American people have been forced to bear—a tax burden which has restricted our Nation's productivity, growth, and competitiveness.

As long as we maintain our current high rate of taxation, there can be no real growth in our economy, no new jobs created, and no improvement in our international competitiveness.

But, in order to provide new jobs and increase productivity, our Nation's businesses need something that is in very short supply—investment capital. Capital creates jobs, and more jobs equal an expanded and productive economy.

One of the largest sources of investment capital is increased individual savings.

However, our national savings rate currently averages between 4 and 6 percent a year. This compares to an average savings rate of between 20 and 24 percent in Japan, a country which has enjoyed enormous economic growth during the last decade.

Why the difference? In Japan, capital investment and savings are taxed at much lower rates than in the United States. As a result, Japan's businesses have available substantial and adequate sources of capital formation for growth, expansion, and modernization of plant and equipment. Indeed, in Japan, industrial plants are replaced every 15 years on average. In the United States, we replace our plants every 30 years. The reason it takes us twice as long to replace our plants is because we do not have the necessary capital.

How can we expect to compete with Japan or our other Western trading partners? The answer is simple—we cannot. We cannot competitively produce and sell products here and abroad as long as we operate with outdated plant and equipment.

This is all the more reason for the enactment of the tax package before us. This tax cut will provide the investment capital so vital to business expansion and industrial modernization. It will also help offset the social security tax increases and the automatic tax increases caused by inflation which virtually every American taxpayer faces next year.

I believe we need a real tax cut to offset these huge increases and reduce the total tax burden on the working men and women of this country. The Economic Recovery Act is just such a tax cut—one that can restore incentive to our stagnant economy, creating real economic growth and meaningful new jobs.

If this tax reduction program is not enacted, the working people of this country are going to get hit, and hit hard, with higher and higher taxes. Even with the 25 percent across-the-board tax cut in the bill, these individuals will be hard-pressed.

I believe it is time to enact a tax cut that will benefit every segment of our economy, a tax cut that will lead to dynamic growth and greater productivity, not the tired, old stuff we have seen over the past 20 years which merely seeks to redistribute wealth and income.

The across-the-board tax reduction concept is not aimed at redistributing the wealth of our country. It is instead a fair tax cut which will benefit all Americans because the benefits from the reductions will be in proportion to the taxes one pays. By reducing tax rates in this way, the President's program recognizes that all taxpayers deserve to share in the tax reduction just as they shared in the past tax increases.

Just who will benefit most from this cut in tax rates? Middle-income taxpayers, defined not in the statistician's image of $20,000 per year in median family income, but in their own image of $10,000 to $60,000 a year. These families pay 72 percent of all Federal individual income taxes and would receive 73 percent of the tax cut. These are families that save, with the amount of savings rising sharply as income levels rise. They are the people who have saved in the past and now hold the promise of increasing their savings in the future as a result of this tax cut.

When we help these Americans we help all Americans. As John Kennedy so eloquently said in the 1960's, "a rising tide lifts all boats." Middle-income Americans will use the benefits from this tax cut to increase their savings rate. This increased rate of savings will provide investment capital for business expansion and new jobs.

Every individual taxpayer will get a 25-percent marginal tax rate cut. Combined with other elements of this bipartisan tax cut plan, the savings to every American will be even more dramatic.

Take-home pay will increase and the reward for savings, investment, and harder work will be predictable and substantial.

The family of four making around $15,000 in 1982 with both spouses working will receive a 53-percent cut when all available cuts, incentives, and the marriage tax penalty relief are included.

The family of four making about $30,000 in 1982, the estimated median income level, will receive a 22-percent cut on the same basis.

In simple dollar terms, the family earning $25,000 today would as a result of cost-of-living raises earn $33,675 in 1984. It will pay $1,056 less that year than it would under present law. These are substantial tax savings indeed.

What will happen to the average American without these tax cuts? The answer in dollar terms is also simple.

Just in the last 10 years, Federal taxes have increased 177 percent.

Federal taxes will have increased 390 percent by 1984 at present rates without this tax cut. In fact, due to bracket creep and demands for higher taxes to fuel the big spenders' give-away programs, nearly 50 percent of all American taxpayers now face 50 percent marginal tax rate brackets, And, it has been estimated that without this tax cut, all current taxpayers will be in the 50 percent tax bracket by the year 2000, less than 20 years away.

The average family's actual buying power has steadily declined. The family earning $120 a week in 1970 is now making $250 but its dollars buy 8 percent less than 10 years ago. As taxes have gone up, Federal spending has skyrocketed from $196 billion in 1970 to $660 this year.

Taxpayers had to work until May 10 of this year just to earn enough to pay all of their direct and indirect taxes. That means the average worker spends 2 hours and 49 minutes of each working day funding the Federal Government. Spiraling taxes and inflation have robbed Americans' savings of its value. Savings worth $1,000 in 1977 are now worth only $851.

But the big spenders among us love high taxes. The big spenders do not want tax cuts. They want to keep revenues high to fund more of their big spending programs.

Now it is time for a change. It is time to change the policies which have virtually bankrupted our Nation.

And that, in a nutshell, is the basic philosophical difference between the supporters of this tax bill and its opponents, between those who want change and those who adhere to worn-out policies.

The supporters of the President's program believe that the growth of government must be flattened out so that the private sector may grow and expand and provide more jobs for the working men and women of this country.

The bill's opponents are those among us who want an expanded government not an expanded economy. They realize the American people want less spending and less government. But they are hopeing against hope that this is only a temporary phenomenon.

So the big spenders believe they can conduct a strategic withdrawal for as long as it takes to revert back to their worn-out approach of spending and spending in a vain attempt to cure our Nation's ills with new and even bigger social programs.

Unless taxes are cut and new incentives created, the American people will continue to face a future of high inflation, rising joblessness and high-interest rates.

The greatest unfairness of all would be for the Congress to deny the American people the tax relief they need.

I therefore urge my colleagues in the Senate to join with me and the distinguished chairman of the Finance Committee in supporting and voting for this measure. It is time to put aside partisanship and join in a united effort to get our Nation moving again. We have the chance. We must not let it pass us by.

Mr. DECONCINI addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. DECONCINI. Will the Senator from Delaware yield for an amendment?

Mr. ROTH. I yield the floor.

UP AMENDMENT NO. 320

(Purpose: To clarify employee stock ownership)

Mr. DECONCINI. Mr. President, I send an unprinted amendment to the desk and for its immediate consideration.

The PRESIDING OFFICER. Is there objection to temporarily laying aside the amendment of the Senator from Kansas? Without objection, it is so ordered.

The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Arizona (Mr. DECONCINI), for himself, Mr. HART, and Mr. ARMSTRONG, proposes an unprinted amendment numbered 320.

Mr. DECONCINI. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

"After Section 328 of subtitle C of title 3, insert the following new section:"

PREEMPTION OF STATE LAWS

(a) IN GENERAL.—Subparagraph (A) of section 514(b)(2) of the Employee Retirement Income Security Act of 1974 is amended by striking out "securities." and inserting in lieu thereof "securities, except that subsection (a) of this section shall apply so as to supercede any and all State laws regulating securities insofar as such State laws relate to (i) the establishment before December 31, 1981 or maintenance of an employee stock ownership plan by a qualified employer; (ii) the issuance of any qualifying employer security and sale or other transfer thereof by a qualified employer to an employee stock ownership plan if the issuance of such security was authorized on or before June 30, 1980 in accordance with the law of the State which issued the employer's corporate charter; (iii) the guarantee by a qualified employer of a loan to a trust forming a part of an employee stock ownership plan maintained by such employer if the proceeds of the loan are applied by the trust to acquire qualifying employer securities and such securities are acquired by the trust before December 31, 1981; or (iv) the distribution of any qualifying employer security from an employee stock ownership plan maintained by a qualified employer to any participant or beneficiary, for the purposes of this subparagraph, the term 'qualifying employer security' has the meaning assigned by section 407(d)(5), the term 'employee stock ownership plan' has the meaning assigned by section 407(d)(6), and an employer is a qualified employer if between January 1, 1980 and June 30, 1980 it increased its authorized shares of common stock from 20,000,000 to 50,000,000.

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply upon the date of enactment of this Act.

Mr. DECONCINI. Mr. President, this amendment has been cleared with the managers of the bill on both sides. I thank Senator LONG, Senator DOLE, and other Senators involved, for their cooperation in working out a solution agreeable to all parties concerned.

Mr. President, this amendment is intended to protect employee stock ownership plans, or ESOP's form being subjected to additional, unwarranted requirements beyond those currently required under the comprehensive regulatory framework enacted by the Congress in the Employee Retirement Income Security Act of 1974 (ERISA). This amendment particularly addresses the problem of the misuse of State securities laws to restrict or impede ESOP's, through duplicative and overlapping regulation.

For the past 8 years, the ESOP concept has been strongly supported by the Congress, in spite of occasional attempts by various agencies to impede ESOP implementation. The Trade Act of 1974, for example, provided preferential treatment under certain circumstances to corporations having ESOP's in the case of government guaranteed loans. The Employee Retirement Income Security Act of 1974, otherwise known as ERISA, expressly exempted ESOP's from certain restrictions and prohibitions imposed under other types of qualified plans.

Under the 1975 Tax Reduction Act, a qualifying ESOP ("TRASOP") enables the employer to claim an 11 percent (instead of 10 percent) investment credit if the employer contributes to the TRASOP an amount equal to the additional 1 percent credit. The Tax Reform Act of 1976 increased the contribution limits for TRASOPS to 1½ percent from 1 percent under certain circumstances.

The Chrysler financial relief bill required a substantial amount of stock of the corporation to be transferred to employees through an ESOP as a condition of the government assistance provided. A similar requirement accompanied the most recent funding authorization for Conrail. Pending legislation will provide further encouragement for implementation of ESOP's.

ERISA placed the implementation and maintenance of ESOP's within the jurisdiction of the Departments of Labor and the Treasury. ERISA, which was signed into law by President Ford on Labor Day 1974, was the end result of a 1965 report to President Johnson which was commissioned in 1962 by President Kennedy.

In enacting ERISA, the Congress undertook an elaborate process of interweaving the jurisdictions of the Departments of Labor and Treasury for the purpose of regulating the employee pension plan area. In considering that legislation, Congress carefully designed a regulatory scheme specifically tailored to protect the beneficiaries of pension plans, including ESOP's. Congress also quite clearly determined that regulation of such plans under ERISA by both Treasury and Labor was sufficient. Congress considered additional layers of Federal and State regulation to be wasteful redtape that could undermine the goal of providing a uniform system for governing this area.

The disclosure required by ERISA in connection with providing employee benefits is substantial. ERISA requires that a summary plan description be furnished to all participants and beneficiaries. This description must "be written in a manner calculated to be understood by the average plan participant," and "be sufficiently accurate and comprehensive to reasonably apprise such participants and beneficiaries of their rights and obligations under the plan." Disclosure must be made in the summary plan description of such matters as eligibility requirements and circumstances which may result in disqualification or denial of benefits, a description of relevant provisions of any applicable collective bargaining agreement, the sources of the plan's financing, claims, procedures, and remedies available for the redress of claims which are denied.

In addition, each plan must publish a complete annual report which is to be filed with the Secretary of Labor and made available to any participant who wishes to inspect it. A summary of this annual report must be furnished to plan participants. The annual report must include a comprehensive financial statement, an actuarial statement indicating the present value of assets and liabilities, and a statement by the plan's administrator indicating the number of employees covered, the names of all persons who rendered services to the plan and the compensation they received, and an explanation for any changes in the management personnel of the plan. ERISA also requires that plan participants be provided upon request with a statement of their total accrued benefits.

By comparison, the information available under State and Federal securities laws is not specifically geared toward protection of plan participants. In general, the information provided to the individual plan participant would omit much of the information that ERISA provides, and supply him or her with other data which is unnecessary and may divert the plan participant's attention from the more specifically applicable documents required by ERISA.

Furthermore, the additional costs imposed on an employer by subjecting plan interests to securities regulation would upset the balance between benefits to employees and costs to employers that Congress sought to achieve through specific pension legislation.

The U.S. Supreme Court, in 1979 has held that securities law regulation of pension plans is generally unwarranted in light of ERISA:

Unlike the Securities Acts, ERISA deals expressly and in detail with pension plans. ERISA requires pension plans to disclose specified information to employees in a specified manner. See 29 USC §§ 1021–1030 29 USCS §§ 1021–1030, in contrast to the indefinite and uncertain disclosure obligations imposed by the antifraud provisions of the Securities Acts . . .

The existence of this comprehensive legislation governing the use and terms of employee pension plans severely undercuts all arguments for extending the Securities Acts to non-contributory, compulsory pension plans. Congress believed that it was filling a regulatory void when it enacted ERISA, a belief which the SEC actively encouraged. *Not only is the extension of the Securities Acts by the court below unsupported by the language and history of those Acts, but in light of ERISA it serves no general purpose. See Califano v. Sanders*, 430 US 99, 104–107, 51 L Ed 2d 192, 97 S. Ct. 980 (1977). *Cf. Boys Markets, Inc. v. Retail Clerks*, 398 US 235, 250, 26 L Ed 2d 199, 90 S. Ct. 1583 (1970). Whatever benefits employees might derive from the effect of the Securities Acts are now provided in more definite form through ERISA. (Emphasis added.)

International Brotherhood of Teamsters, Chaufeurs, Warehouseman and Helpers of America v. Daniel, 439 US 511, 569–70 (1979).

This amendment will help to effectuate the intent of Congress to promote the use of ESOP's and to regulate pensions by more clearly restraining the application of State securities laws to circumvent this legislative intent. This amendment will bar State securities regulators from imposing conditions on certain ESOP's which are regulated under ERISA.

This amendment is drafted so as to apply to the situation now facing the employees of Continental Airlines. These employees have met with one bureaucratic barrier after another in their ongoing effort to become the Nation's largest employee-owned company.

Most recently, the California department of corporations has ruled that the airline cannot issue the shares for acquisition by the ESOP without a vote by shareholders and by employees.

This ruling was a great victory for an airline company that is now engaged in a hostile attempt to take over Continental Airlines. The ruling also follows the example set by the New York Stock Exchange last month when it ruled that the vote was necessary and that it would act to delist Continental if the airline persisted in issuing the new shares.

On the facts as I understand them, these regulatory agencies were ill advised in ruling as they did. This amendment preempts State action as it applies to this matter. Thus, this amendment should enable Continental Airlines to go forward with its ESOP.

As the statement makes clear, the purpose of the amendment is simply to facilitate the issuance of stock under certain conditions, particularly recently formed employee stock ownership plans.

I am very pleased that the distinguished Senator from Colorado (Mr. ARMSTRONG), a member of the Finance Committee, has taken a leadership role in obtaining approval of this very important amendment.

I yield to the Senator from Colorado.

Mr. ARMSTRONG. Mr. President, I thank the Senator from Arizona for his remarks. The fact of the matter is that it is he who has taken the lead and made it possible to offer this amendment. I am pleased to cosponsor it.

The effect of this amendment in its simplest terms is to permit the employees of Continental Airlines to go forward with plans they have for an ESOP. I think many of my colleagues are familiar with the highly publicized issues in this effort by the employees of that airline to obtain ownership and management of that business enterprise.

I send to the desk, and ask unanimous consent that there be printed in the RECORD at this point, a statement which has been prepared by employees of the airline and which is a general explanation of the principle of this amendment.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF WILLIAM L. ARMSTRONG

The amendment to this bill is intended to protect employee stock ownership plans, or ESOP's, from being subjected to additional, unwarranted requirements beyond those required under the comprehensive regulatory framework already enacted by the Congress in the Employee Retirement Income Security Act of 1974 (ERISA). This amendment particularly addresses the problem of the misuse of state securities laws to restrict or impede ESOP's, through duplicative and overlapping regulation.

For the past eight years, the ESOP concept has been strongly supported by the Congress. The Trade Act of 1974 provided preferential treatment under certain circumstances to corporations having ESOP's in the case of government guaranteed loans. The Employee Retirement Income Security Act of 1974, otherwise known as ERISA, expressly exempted ESOP's from certain restrictions and prohibitions imposed upon other types of qualified plans.

Under the 1975 Tax Reduction Act, a qualifying ESOP ("TRASOP") enables the employer to claim an 11 percent (instead of 10 percent) investment credit if the employer contributes to the TRASOP an amount equal to the additional 1 percent credit. The Tax Reform Act of 1976 increased the contribution limits for TRASOP's to 1½ percent from 1 percent under certain circumstances. The Revenue Act of 1978 provided for voting pass-through to employees in certain ESOP's and provided for favorable income and estate tax treatment upon a payment of ESOP benefits. The Chrysler Financial Relief Bill required substantial ownership of the corporation to be transferred to employees through an ESOP as a requirement for the government assistance provided. Pending legislation is expected to provide further encouragement for implementation of ESOP's.

ERISA placed the implementation and maintenance of ESOP's within the jurisdiction of the Departments of Labor and the Treasury. ERISA, which was signed into law by President Ford in 1974, was the end result of a 1965 report to President Johnson which was commissioned in 1962 by President Kennedy. In enacting ERISA, the Congress went through an elaborate process of interweaving the jurisdictions of the Departments of Labor and the Treasury for the purpose of regulating the employee pension plan area. Congress thereby carefully designed a regulatory scheme specifically tailored to protect the worker beneficiaries of pension plans, including ESOP's. Congress also quite clearly determined that regulation of such plans under ERISA by Treasury and Labor was sufficient. Congress considered additional layers of Federal and state regulation to be wasteful red tape that could undermine its goal of expanding employee income security and stock ownership.

The disclosure required by ERISA is substantial, including, interalia, "summary plan description," annual reports, and an actuarial statement indicating the present value of assets and liabilities.

By comparison, the information available under state and Federal securities laws is not specifically geared toward protection of plan participants. In fact, the United States Supreme Court, in 1979 has held that securities law regulation of pension plans is unwarranted in light of ERISA.

This amendment will help to effectuate the intent of Congress to promote the use of ESOP's and to regulate pensions by more clearly restraining the abuse of state securities laws to circumvent this legislative intent. The amendment will bar state securities regulators from imposing unreasonable conditions on certain pensions and ESOP's regulated under ERISA that go beyond or contradict ERISA. This legislation is required to specifically alleviate an unwarranted interference by a state official with the implementation of an ESOP plan that has previously been approved on a preliminary basis by the IRS, SEC, Department of Labor, appropriate state officials in 47 states, two Federal court tests and two state court tests. States will be prohibited from blocking the implementation or maintenance of an ESOP or other pension plan designed, in conformity with ERISA requirements, to invest primarily in qualifying employer securities by an ESOP or similar pension plan, such as through threats to prohibit trading in all securities if an ESOP in a corporation is implemented.

Mr. ARMSTRONG. To illustrate the purpose and effect of the amendment in one specific case, the Continental case, I ask unanimous consent to have printed in the RECORD a second statement by the employees of Continental which explains the background of their attempt to create and exercise the power of ownership under the ESOP.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

THE CONTINENTAL EMPLOYEES ATTEMPT TO CREATE AN ESOP

In February 1981, Texas International Airlines applied to the Civil Aeronautics Board (CAB) for authorization to purchase up to 48.5 percent of the outstanding shares of Continental Airlines common stock. The stated purpose of the purchase was to block the Continental Airlines—Western Airlines merger which was pending before the CAB.

Approximately 30 minutes after the CAB approved the Continental Western merger, the full CAB voted to allow Texas International to purchase up to 48.5 percent of Continental's stock to block the merger that they had just approved.

Three days later, Continental went back to the CAB, and requested that the CAB delay for ten days the Texas International offer pending the employee group's obtaining the necessary financing to make a counter tender offer to the public shareholders. This petition was denied as being "too little, and too late", even though such a counter offer would have given the public shareholders more money per share for their stock.

The employees then went out into the financial markets and acquired the necessary financial commitments from lending institutions to purchase up to 15.4 million shares of authorized but unissued shares of Continental's common stock in a tax exempt Employee Stock Ownership Plan (ESOP) in accordance with the Employee Retirement Security Act of 1974 (ERISA). The Continental employees voted on the proposed plan in April 1981. Of Continental's 11,000 employees, over 89 percent participated in the vote. Over 96 percent of those participating voted in favor of the proposed ESOP.

The proposed ESOP was brought before Continental's Board of Directors, along with Texas International's acquisition offer. The Continental Board voted unanimously to approve the employees offer and reject the Texas International offer. They noted the employees offer would infuse approximately $185,000,000 in new capital into the corporation, thereby dramatically reducing Continental's long term debt, while the acquisition plan of Texas International would leave the corporation with an untenable debt load of approximately $642,000,000. (That figure was essentially validated by the CAB Administrative Law Judge in his findings).

Continental subsequently received preliminary SEC, IRS, Department of Labor and state exemption approval from 47 states to authorize and implement the proposed ESOP. Texas International attempted to impede the implementation by throwing every conceivable legal and regulatory roadblock in the path of the proposed ESOP. This has denied management the exercise of the free market place choice of competing bids to buy a majority interest in the airline. In Texas International's suit, Judge Lawrence Lydick of the Federal District Court for Central California refused to grant injunctive relief to Texas International, whose contention was that the stockholders' 1980 stock issuance authorization vote was illegal, stating the Texas, International case was without merit to warrant a finding in their favor. The United States Federal Court of Appeals upheld Judge Lydick's decision.

Two dissident stockholders filed suit in California against implementation of the proposed Continental ESOP. Twice their suit was thrown out. Texas International filed a motion with the CAB demanding that the employees file an application for acquisition of control of Continental. That motion was rejected by the CAB.

Since the stock to be issued required an exemption from the state securities law as an ERISA exempt transaction, and since over 5,500 Continental employees were based in California, an application was made to the California Commissioner of Corporations for the required ERISA exemption. Although the California Commissioner of Corporations did not hold an evidentary hearing on the matter, and although 47 states had already approved the required exemption, the California Commissioner of Corporations denied the Continental application for the exemption. Her motion of denial contained such inaccuracies and distortion of fact that Continental deemed it worthy of filing suit against the Commissioner.

The Commissioner suggested that she would approve the required exemption provided Continental held a shareholders' vote and an employees' vote on the proposed ESOP. The Commissioner ignored the fact that the required votes had already been held, and that the CAB was required by federal statute to make a decision in the Texas International acquisition case no later than 31 August 1981.

It appears that the CAB decision could come as early as the second week in August. The reality of the situation is that such a vote of the shareholders would take approximately two months or longer. Complicating the issue is the fact that over 50 percent of Continental's shareholders are listed in the name of their brokerage houses only. Thus, the ballots would have to be mailed to the brokerage houses after they were printed, broken down into individual accounts, and remailed. In addition, in view of all the obstacles that Texas International has placed in the path of the proposed ESOP, it is expected a bitter proxy battle would ensue.

Time is of the essence in this matter. It is unlikely that the suit against the California Commissioner of Corporations could be heard, pending legislation in the California state legislature could be passed, or a stockholder vote could be held in sufficient time to deter the Texas International takeover attempt and implement the proposed ESOP. The Continental employees have decided that in view of the court decisions in their favor, and the exemptions granted for the proposed ESOP by 47 states, federal legislation to bypass the obstructive state roadblock in California could solve the problem caused by the California Commissioner of Corporations.

A legislative amendment, pertaining specifically to the Continental ESOP has been formulated. It has been informally approved by key senators. It would provide a one time amendment to the ERISA Act of 1974 to allow the qualifying employer (worded so specifically that it would apply only to Continental Airlines) to implement an ESOP that has been qualified under existing federal law, allowing such proposed ESOP to supercede any conflicting California state law or unilateral administrative decision on the part of the California commissioner.

This legislation would not cost the taxpayers any money, would allow the implementation of the proposed ESOP, and would infuse millions of dollars of new capital into the airline, thereby reducing corporate debt. This, in fact, should enhance profitability by reducing corporate loan interest burden possibly even increasing federal corporate tax revenues from Continental. Certainly it is a good example of supply side economics in action. The employees of Continental hope that this experiment in enlightened capitalism will be a beacon for other troubled companies to follow in the future.

Mr. ARMSTRONG. Mr. President, in nontechnical terms what this will do is to permit them to go forward notwithstanding the objections of the Department of Corporations of the State of California.

I would ordinarily be very reluctant to vote for, let alone join in sponsoring, an amendment the effect of which would be to overrule State law. I am a States righter. I consider myself to be such. It seems to me that in far too many instances the Federal Government has preempted State and local jurisdictions.

In this particular case, because of the unique facts and circumstances of this instance, and because of the very limited nature of the preemption involved, I am disposed to do so. Nonetheless, I would not have been willing to go forward on this amendment without first discussing the matter with California interests, since theirs is the State which is affected. I am advised by Senators from California that they are sympathetic to this amendment, that they have no objection to it being offered at this time.

Even so, in view of the very short notice which has been available to Senators to consider this matter, including the Senator from Arizona and myself, I must say to my colleagues that there are some aspects of this amendment which I am not as conversant with as I would like to be. I have discussed with members of the Finance Committee, who I expect to be members of the conference on this bill, what these concerns are and the reasons for them. It will be my purpose during the next couple of days to explore more fully the legal ramifications of this amendment to be sure that we are acting wisely and prudently.

It is my belief that the Senate is well justified in adopting this amendment, but I am concerned about the fact that it has come to my attention only within the last few hours and it has not given us time which ordinarily would be available to study it.

I am assured by the conferees that they will give it further study. It is the kind of thing that if there is a technical glitch in it this would be a fully conferencable item. If the amendment has consequences not foreseen by the Senator from Arizona or myself, those could be rectified at that time.

It is an unusual step for me to join in an amendment to preempt the State, but under this unusual circumstance, in view of the very timely and urgent nature of the problem which is addressed, and on the assurances that conferees will take another look at this issue, and in a thoughtful manner ask their legal advisers to do so, that I am very pleased to join my colleague from Colorado (Mr. HART) and the Senator from Arizona (Mr. DECONCINI) in presenting this amendment.

Mr. LONG. Will the Senator yield?

Mr. ARMSTRONG. I yield.

Mr. LONG. I favor the amendment but at the same time I want everybody to know what is involved here. There has been a continuing struggle on behalf of Continental Airlines and its employees to prevent another airline from taking their company. Some would call that a corporate raid, when one company tries to take over another. Continental Airlines' management proposed that there should be an employee stockownership plan with 51 percent of the stock held in trust for the employees and the employees would pay for the stock. They would pay for it by foregoing increased pay to which they are entitled.

Many of us, including this Senator from Louisiana, think that that is a better deal both for the company and for the public. In addition, we like the idea that the employees are committed to owning stock in the company, rather than have the company taken over by a cooperate raid from another corporation.

Continental Airlines has used its ESOP very properly to try to keep Texas International Airlines from acquiring their company. They have also tried to prevent the State of California from acting unfavorably toward this employee stockownership plan.

This amendment, as I understand it, is an amendment to the Employee Retirement Income Security Act (ERISA).

Mr. ARMSTRONG. The Senator is correct.

Mr. LONG. The Senator would amend ERISA and by amending the ERISA, it would have the effect of asserting Federal supremacy in this area. Basically, this is an amendment tailored to this type of situation and would permit this employee stockownership plan to go into effect where the employees could use an ESOP to acquire a 51-percent interest in that company.

So, Mr. President, may I say to the Senator, I have been one of the cosponsors of a resolution before the Committee on Commerce for some time, seeking to use the influence of Congress to help see that the employee stockownership plan would have its day in court and that it would have a chance to prevail in this area. We have not been able to report that bill from the committee because the Committee on Commerce was busy with other matters.

This is a somewhat different approach. This simply proposes to amend ERISA with regard to which the Committe on Finance has jurisdiction. The Committee on Labor also has jurisdiction. I ask the Senator, are the chairman of the Labor Committee and the ranking member of that committee familiar with the fact that this amendment is being offered?

Mr. ARMSTRONG. I appreciate the Senator's raising that question. I have discussed this with the chairman of the Labor Committee, the Senator from Utah (Mr. HATCH), and he is in agreement with it being offered. I have not discussed it with the ranking member. It is possible another Senator has.

We have been moving very quickly and it is a last-minute amendment, but we did want to touch base with the committee that has an interest in this matter.

In fact, if the Senator will yield a moment further, we have also discussed with the chairman of the Banking Committee (Mr. GARN) offering this amendment for the same reason, that some aspects of this bearing on the general question of securities law fall, at least to some degree, within the jurisdiction of the Banking Committee. So I undertook to discuss that with our colleague from Utah, again to let him know that this would be offered so that he would not be caught without notice. We have attempted, even in this short period of time, to put people on notice as to what is happening.

Mr. LONG. Mr. President, we have several new employee stockownership provisions in the bill. While those provisions had no particular reference to the Continental employee effort to acquire stock in their company, the inclusion of those provisions indicated a strong feeling in the U.S. Senate in favor of employee stockownership. I believe the sentiment in the Senate is overwhelmingly in favor of employees being permitted to acquire stock in a company, especially where the management of the company would like to have it that way. The Senator's amendment would seek to help bring that about.

You cannot be on both sides of an issue like this. You cannot be for the people who run the airline, the people who work for the airline, the employees, and also for the other company which wants to take the airline over against the wishes of the employees and against the wishes of the existing management.

This Senator, while he feels he has friends on both sides—at least he did—feels he should take the side of the employees and with the management, which would like to make the employees stockholders to a very major degree. I do believe that the States that are affected, as well as the employees and the management of the airline, all feel that this would be in the national interest. I know they feel it would be in their interest. I, therefore, shall vote for the Senator's amendment, Mr. President.

CONTINENTAL ESOP AMENDMENT

Mr. CRANSTON. Mr. President, I support the proposed amendment because I am in agreement with its practical purpose. It will permit the employee stock ownership plan of the Continental Airlines employees to go forward, notwithstanding the "blue sky" laws of California.

I believe the overwhelming public interest of California is best served by approval of the stock issuance sought by the Continental Airlines ESOP.

It is true that one result of this amendment will be a reduction in the property value of those who hold Continental stock. But the possibility of losing is always a risk for those who acquire large blocks of stock for the purpose of hostile takeovers must assume. Those who seek to play a form of "monopoly" game with the jobs, careers and economic futures of others, and the communities in which they live, should not be able to do so free of all risk. I think the corporations commissioner of California over-protected speculators who knowingly assumed risks and failed to protect employees who sought to assert their right to control their economic destiny through an employee ownership plan.

It is my view that the principle contained in the proposed amendment should be extended and made of universal application.

It is time that citizens and workers have a voice in their economic futures. ESOPs are a major factor in affording workers and communities an opportunity to protect their interests against hostile takeovers. I look forward to working with the distinguished Senators on such legislation in the future.

Mr. DECONCINI. Mr. President, I ask unanimous consent that the Senator from Hawaii (Mr. MATSUNAGA) and the Senator from California (Mr. HAYAKAWA) be added as cosponsors of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. Mr. President, I yield back the remainder of my time and move the adoption of the amendment.

The PRESIDING OFFICER. Is all time yielded back?

Mr. LONG. Mr. President, does anyone desire to speak for or against? I shall be happy to yield time.

I see no request for time, Mr. President; therefore, I yield back whatever time I have on the amendment.

The PRESIDING OFFICER. All time is yielded back. The question is on agreeing to the amendment.

The amendment (UP No. 320) was agreed to.

Mr. DECONCINI. I move to reconsider the vote by which the amendment was agreed to.

Mr. ARMSTRONG. I move to lay that motion on the table, Mr. President.

The motion to lay on the table was agreed to.

Mr. ROTH. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BIDEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The PRESIDING OFFICER. Without objection, the amendment of the Senator from Kansas is laid aside temporarily for consideration of the amendment of the Senator from Delaware.

Mr. BIDEN. I apologize, Mr. President. I did not hear the question of the Chair.

The PRESIDING OFFICER. Without objection, the amendment of the Senator from Kansas is laid aside and the Senator from Delaware may proceed.

UP AMENDMENT NO. 321

Mr. BIDEN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Delaware (Mr. BIDEN) proposes unprinted amendment numbered 321. At the end of the bill, add the following:

LIMITATION ON CREDIT FOR CERTAIN HOUSEHOLD AND DEPENDENT CARE SERVICES

SEC. . Notwithstanding anything else in this Act, no credit shall be allowed under the provisions of Section 44A of the Internal Revenue Code of 1954 (relating to expenses for household and dependent care services necessary for gainful employment) to any taxpayer where both spouses have earned income and the total of their adjusted gross income is in excess of $30,000.

Mr. BIDEN. Mr. President, the reason I let the clerk read the whole amendment is because I believe the amendment is self-explanatory. I do not plan to speak long on this amendment. But I will take as long as the opposition wants me to so that Senators opposing this amendment can have an opportunity to get to the floor.

Let me proceed as dispassionately as I can in order to explain what I am attempting to do here.

Mr. President, my amendment is fairly simple.

Last Friday, the Senate agreed to do something that I thought was very laudable and worthwhile. We decided that we would increase the amount of the child care tax credit a single parent or a couple would be able to receive if they placed their child in a day care center so that the parent or parents could earn enough to maintain their family and to keep the family off welfare.

We know a single mother, divorced or a widow, making even $30,000 a year has great difficulty bringing up her child unless she has a mother or mother-in-law willing to take care of the child or a father or father-in-law willing to take care of the child. The cost of child day care is considerable if she decides to seek employment in order to make a living.

Unfortunately, a number of us in this body have learned from personal experience that getting competent help to care for a child while the parent is working is a very expensive proposition.

For full-time help it costs in excess of $15,000 a year. So the efforts of Senators METZENBAUM, DURENBERGER, PACKWOOD, and others, to increase the amount of the credit for families and/or single parents is good, necessary, worthwhile, and savings to the taxpayer in the long run.

Now, comes the fly in the ointment. Current law, says that not only are we going to give a tax credit to single parents, raising children by themselves, not only are we going to give a tax credit to married couples who are in such serious financial condition that both parents must work; not only are we going to give that tax credit to persons with health impairments which physically prevent them from working and taking care of their children at the same time; but will give that credit to married couples who make any income whatsoever, regardless of need.

The result is that we have mothers and fathers, both pursuing careers, which is their right to do, making combined incomes of $50,000, $70,000, and $90,000. I am sure there are a number of people on all our staffs where the husband or wife on the staff may be making $30,000, $40,000, or $50,000, and the spouse works somewhere else in the city, either for a Federal agency, or a law firm downtown making another $40,000 or $50,000 a year. In order to be able to pursue their careers or for their convenience they get a tax credit if they put their child in a Government-funded or a privately operated or a corporate-operated day care center,

The result is that we have built into the tax code a social policy that says middle- and low-income taxpayers pay a tax to allow people who have neither the financial nor the physical need to put their child in a day-care center.

Mr. RIEGLE. Mr. President, will the Senator yield at that point?

Mr. BIDEN. I yield.

Mr. RIEGLE. As I understand the Senator he picked $30,000 combined income as the cutoff, and so the question I want to get to in a second is why that magic number rather than $35,000 or $25,000 or whatever? But my reason I ask the question is that I can conceive of, in fact I know of, families where both husband and wife would be working and there are extraordinary expenses in that family, where, for example, the family is not only tending to their own immediate family needs with children but have elderly parents with high medical costs and so forth, so that the amount of money that they need to hold their larger family unit together would be greater than $30,000. I am just wondering, if we are going to try to set a limit, and I question whether we can do that, I mean how do we pick $30,000 and then how does any arbitrary limit apply to those whose combined income may be $40,000 but they might need every penny because they are not only caring for themselves and their children, but for parents and other family members for whom they may be responsible.

Mr. BIDEN. Good question, and the answer is we establish the limit in the same way we set any other arbitrary limit in Federal law. Why do we set an arbitrary limit that says people who have reached the age of 18 have the reason and capacity to vote? Why do we establish an age limit to obtain a driver's license in every State? Why do we establish an age limit for drinking? The reason I picked $30,000 is that $30,000 was the magic figure used in the Metzenbaum amendment on Friday. It was judged by the sponsors of the admendment that poorer people should get a bigger tax credit than those above $30,000 and we phased out this increase at $30,000. So if a family is at the low end of the scale they can receive up to a 30-percent credit but once they hit $30,000 they receive no greater tax credit than someone making $32,000, or no more than someone making $40,000, or $50,000, or $60,000.

So I picked $30,000 because that was the cut-off used in the Metzenbaum amendment last Friday. But what is "good for the goose is good for the gander." If it made sense to establish the $30,000 cut-off and it was not arbitrary, then it seems to me that $30,000 makes sense and is not arbitrary now.

But the essential principle should not be lost here. I think it is bad social policy, and that is what we are doing here in the tax code, setting social policy, for us to say that the Federal Government is encouraging, at the expense of all other taxpayers, married couples who neither have the financial nor physical need to put their child in a day care center.

To be personal for a moment, I make a good salary, I am paid some $60,000 to be a Senator. My wife is a school teacher, and she makes around $15,000. She is a career woman. She is very devoted to her career, and very concerned about it, and she has good reason to be, and I am proud of the fact that she has such a career.

But it is outrageous to make my father, who makes less than $20,000 a year to pay a tax to see to it that I can put my child in a day care center. I think that is preposterous.

If my wife and I want to do that, no one should be able to stop us. We should be able to do that. That is our right because that is how we want our family unit to operate.

Well, that is fine. But my father should not pay for that. My next door neighbor should not pay for that, and other folks in low-paying jobs should not pay for that. We should be using that money to give more of a tax credit to those folks who have no choice.

But many single parents and two-earner households are working not because they want a new patio, not because they want to go to the mountains for a vacation, not because they want to be able to see Pavarotti the next time he sings. They are not doing it for that reason. They are doing it because they have no choice, no alternative.

All you have to do is to be a single parent for a couple of days and find out that you have no choice, you have to do something. You either stop working and take care of that 2-year-old child full time or you find someone in your family to take care of your child or you pay somebody to take care of your child. There is no choice. These are the people we should be giving money to because a $500 or $700 credit hardly makes a dent in the cost of day care for their children.

Why should a family with a combined income of $40,000, or $60,000, or $100,000, or $200,000 have their accountant say, "By the way, you get a tax credit here, Jack. Did you forget this? Check it off." It is preposterous.

Besides, it is not good social policy. The Government should not be in the business of saying that we encourage families to make the decision to entrust the primary care of their infant, of their young children, to a day care center. That should be available for people who do not have a choice.

Every social science study we receive, whether we are talking about the Judiciary Committee and juvenile delinquency or popular theories concerning raising children talk about how it is almost impossible for a parent to love a child too much, almost impossible to hug him and kiss him and touch him and be with him too much.

But here we are in the code saying

"Hey, look, for 8 hours a day let somebody else take care of your child when you do not have to, and you will get a tax break."

My generation has enough trouble figuring out whether or not to have any kids. When I was a public defender, you would show up in places where you held forums with the prosecutor, and you would stand there before a group, and one of the things the prosecutor liked to say was, "Do you know where your children are at this very moment?" The implication would be, if you did not know, then you are a bad parent.

We have a whole generation of Americans who are deciding that, "Well, let us get interested in the community. Let us make sure that we belong to everything from the PTA to the Ladies' Garden Club to the Men's Hunt Club."

There are some people who seem to think it may not be bad not to spend time with their child.

There are those who will say that this amendment will hurt women's opportunities to work, that it discriminates against women, well, I will stack my voting record on women's issues in the 9 years that I have served here in this body against anybody else in this body. I have been willing to fight for women's rights from the ERA to equal opportunity for women in any area.

But that is not the issue. I have no objection to the fact that if a mother and a father want to get together and say, "Hey, by the way, Joe, you take care of the child and I am going to pursue my career," that is fine. That is a personal decision, and I am all for it. But do not say to the taxpayers, "I am going to have a baby, and we are both going to pursue our careers, and even though we do not need the money financially in order to be able to take care of the child, you will pay for it. You pay for me to be able to pursue what I view to be in my interest." That is not necessary.

I look at the Senator from Iowa here on the floor and others who have very strong "pro-family" credentials and sometimes I take great issue with them and with their approach to the problems of the family, because I do not believe that the Moral Majority is always that moral. In many ways I consider this new wave to be a somewhat repressive movement on everything from civil liberties, to the way they believe we should be required to say certain prayers in school.

Yet my colleagues who are considered moderate to liberal sit back in the cloakroom and we scratch our heads and say, "Why is it that the moral majority seems to have gained some kind of credibility?" Guess what, folks. They are not all wrong.

The PRESIDING OFFICER (Mr. WARNER). The Chair wishes to advise the Senator from Delaware that all time has expired.

Mr. BIDEN. I thank the chair for the information and I yield the floor.

Mr. GRASSLEY. Mr. President, I yield 5 minutes to the Senator from Florida.

The PRESIDING OFFICER. The Senator from Florida is recognized.

Mrs. HAWKINS. Mr. President, I rise in opposition to the amendment by the Senator from Delaware. Earlier today the Senate adopted an amendment 94 to 1 which provided a tax credit for day care expenses. That amendment was sponsored by the Senator from Ohio, by the Senator from Florida, and many other cosponsors.

One of my motivations in cosponsoring that amendment was to restore some equity to the day care support programs of the Federal Government. Ninety percent of the current day care support is channeled through Head Start, title XX, and similar programs and for which middle-income families who work do not qualify.

It is important that we not unfairly discriminate against the middle class which pays most of the taxes to support all Government programs.

The amendment is ultimately self-defeating that the Senator from Delaware supports. It is based squarely on the argument that we have a legitimate right to take money away from those who have earned it and give it to those who have not.

Most people are willing to tolerate a little of that philosophy. We all recognize, I think, that we have obligations to one another, and we are perfectly willing to use the Government as a mechanism for effecting those transfers that we regard as legitimate.

But there are limits to how much we will tolerate. There are very clearly millions of people who think that Government is redistributing beyond what is justified by our moral sense. There is a strong feeling that we are approaching the condition of legal robin hooding, where the rich are fair game so long as the booty is given to the poor.

The evidence that we have exceeded the limit is the growth in the underground economy. There are differences of opinion about how large the underground economy is, but there is no dispute about its existence. It is there, and it is growing. Thousands and thousands of people are moving their economic transactions of the budget. It is a technique they probably learned from the Federal Government.

They know that if they pay and are paid in cash that there is no accounting for the income and no tax to be paid on it. It is less convenient, but it is some level of taxation. It pays them to think that way, and they are doing it.

Our day care amendment that passed this morning makes provisions for the elderly—the mothers and fathers of all of us—who need care in the daytime. Indeed, I am for rewarding those people that work.

I cannot understand any grown person's belief that the very poor have the right, if you will, to have exceptional care and even superior care while those that are in the middle class, those bearing the full burden for the total cost of society by contributing to the tax system of this country yet will not receive a tax credit.

I suggest that the amendment of the Senator from Delaware is antifamily. It is antimother and antifather. If a couple decides to stay together and they earn $20,000 each, they basically do not consider themselves as wealthy. If they have four children, for instance, and any one of them has to have help of any kind, they, indeed, are very, very poor.

In a society that has made us each an island unto himself, there are many lonely families out there. Indeed, a single parent, as I understand the amendment of the Senator from Delaware, would have no limit on the amount of income. A single parent can make up to a million dollars, if I understand it, and still collect the day care credit. So you are really encouraging single parents.

We just had a long discussion over the past few days on a marriage penalty, getting rid of a marriage penalty. I suggest that you are further inflicting penalties on couples that will stay together and bear this tremendous responsibility of raising children to be good members of society and reknitting the fabric that we need so desparately in our society of having a strong family unit.

Those parents that contribute, work hard, pick up their children in the evening, have great conversations with them and can exchange the experiences for the day should not be penalized by having to let those children tend one another.

Mr. BIDEN. Will the Senator yield for a question?

Mrs. HAWKINS. I would like to finish by telling you that I feel captive as a working parent by the amount of my mortgage, by the amount of my electricity payment, by the things that we obligated for earlier in our lifetime that now have become exorbitant sums of money.

Indeed, we are forcing, by high interest rates, by tremendously high mortgage payments, by inflation that is beyond all expectation, forcing what we used to call the middle class into the poverty class. I cannot find within the dollar framework the rich that the Senator from Delaware has so ably defined for himself. I cannot support a credit where a single parent can qualify but couples cannot.

Mr. BIDEN. Will the Senator yield for a question?

Mrs. HAWKINS. Yes.

Mr. BIDEN. The Senator appears to be suggesting that for fear of losing a $400 tax credit a family with a combined income of $60,000 might find it necessary to split up in order to take advantage of the $400 that they would get from that tax credit. Is that what the Senator suggests?

Mrs. HAWKINS. I suggest that there have been excuses flimsier than that for getting a divorce.

Mr. BIDEN. I thank the Senator.

Mr. GRASSLEY addressed the Chair.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. GRASSLEY. I yield 7 minutes to the Senator from Louisiana.

Mr. METZENBAUM. Mr. President, how much time is remaining?

The PRESIDING OFFICER. The Chair wishes to advise that the Senator from Iowa has 10 minutes remaining.

Mr. LONG. Will the Senator yield 5 minutes?

Mr. GRASSLEY. Yes.

Mr. LONG. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. LONG. Mr. President, it seems to me that we ought to recognize certain facts. One of them is that it should be a woman's right to join the work force if she desires to do so.

When a mother joins the work force, if she has small children, she has a problem. She needs to hire someone to look after those children while she is working to help provide income for the family.

Mr. President, I was very much impressed by a young professional woman who came before the Senate Finance Committee. She put it this way. She said, "David Rockefeller can hire himself a secretary to make his appointments, to arrange meetings, to answer telephone calls, to answer mail, and do all kinds of things for him. And he can deduct that."

She said, "I'm an author. I can write novels but I cannot write them without that babysitter. If I have to look after that baby, I cannot write the books." She said, "I need that babysitter every bit as much as David Rockefeller needs that secretary to answer the telephone calls, make his appointments and arrange his business for him." She said, "It is unfair and it is discriminatory."

And I think it is, Mr. President. And ever since I heard that type of testimony before the Senate Finance Committee, I have taken the view that a mother who joins the work force ought to be able to deduct the cost of hiring a babysitter, no matter what her tax bracket might be or what it costs to hire the babysitter. I predict, in time, that is where we are going to be, because it is discriminatory to do otherwise.

Now, the Senator would say at the $30,000 level the mother cannot get a deduction for hiring a babysitter. And he would make that the income cutoff for the income the mother and father together.

Mr. President, I have had many fine women work for me. Most of them, taken together with their husband's income, have incomes of more than $30,000. I would think any married woman working on Capitol Hill whose husband is also working would be left out, if you just take the people you know in your own offices.

Now, I would point out to the Senator that this tax credit would help not only the working mother to hire somebody to look after her child, but it also helps the person who gets hired by that mother and who may thus be moved off welfare and into employment. All tend to benefit from it. Therefore, Mr. President, I honestly believe that the Senator's amendment would mean that where we do recognize that a woman is entitled to join the work force, we would say on the other hand that if she is in the middle-income brackets or above, then she is not entitled to the same consideration as others.

I do not think that one can explain that to the middle-income women of America. I think they would resent it. I honestly think we would be better off to have nothing in the bill about day care than we would to have something where you go up to a $30,000 level for a couple and then cut it off, because I think that to do it that way, Mr. President, would create so much resentment that the resentment we would have on the one hand would more than offset any applause or approval that we had from those who might be favorably affected.

So I would hope, Mr. President, if we are going to go forward with the day care proposal, that we try to arrange it as much as possible so that everyone could participate.

Mr. BIDEN. Will the Senator yield for a question?

Mr. LONG. If I have time remaining.

Mr. BIDEN. The Senator is aware, is he not, that this amendment would not preclude a working mother, no matter what her income was, from taking this tax deduction, unless there was both a working mother and working father in the family that exceeded an income of $30,000?

Mr. LONG. I say to the Senator that he is the best expert on his amendment. The way I read it, is says $30,000. And there is a handwritten provision in this, and I assume it is written by your hand: where both spouses have earned income and the total of their adjusted gross income is in excess of $30,000.

Mr. BIDEN. But a poor working mother would not be in that category.

Mr. LONG. At $30,000 she would be out, right?

Mr. BIDEN. No, a single working mother could make $100,000 and still be included.

Mr. LONG. The amendment is most generous on this point. I regret the Senator could not carry this kindness uniformly across.

Mr. GRASSLEY. How much time remains on this side, Mr. President?

The PRESIDING OFFICER. The Senator from Iowa has 5 minutes and 8 seconds left.

Mr. GRASSLEY. Mr. President, on this side of the aisle we felt when we adopted the amendment on Friday, and again with the vote this morning, that this body had expressed its opinion that there has been a very delicate compromise worked out on this issue and that it should not be upset.

We would see this amendment as upsetting that compromise to some degree.

More importantly, I think a good reason for opposing this amendment is its arbitrariness. A hard and fast rule at $30,000, causes hardship since families below that, earning $29,999, might qualify for the tax credit and those above, earning $30,001, might not qualify.

It seems to me if this sort of principle is good it should be phased out rather than having an arbitrary cutoff point.

I would say there would be ample evidence that the Senator from Delaware is being unfair to couples with a median income, since two members of a household each earning $15,000 or thereabouts would be eliminated from this sort of help. They may be the family that would need it the most. As already suggested here, you could have one member of a household with an inordinately high salary and the family would not be cut off from this tax credit.

I think the point I would like to make to the Senator who authors the amendment, and he is absolutely right in saying that the whole point of tax legislation to a great degree is the passage of social policy, is that often we can look at the other side of the coin with respect to expenditure. I only use this to ask the Senator to think about this point of view. He raises the point, should people in this income category get this sort of help? I think when it comes to the whole question he used his own salary as an example, the salary of Members of this body, $60,000 plus, as to what extent we should have help by tax credits or anything else.

I can raise the point that probably he would support the school lunch program. Our children benefit from that subsidy.

I would suggest that maybe he voted for the middle-income college assistance program in 1978. People that fall into our income category can take the benefit of that program.

There may be some point where, legitimately, the questions the Senator raises can be raised, but I think they need to be raised as well on the expenditure side, where maybe the Senator is a little more reluctant to raise those questions than he is on the tax credit issue. I do not know whether there is an amazing difference of philosophy there. I would suggest perhaps there is.

Mr. BIDEN. Will the Senator yield?

Mr. GRASSLEY. I yield because I would like to hear his justification if he supports some of these programs that have a subsidy for people above $30,000 but he does not support tax credits for individuals in that bracket.

Mr. BIDEN. A very valid question. The Senator is right. The Senator from Delaware is consistent. I do not support subsidies for upper-income children in the school lunch program. I do not support subsidies for people who are making incomes that are considered almost any standard as reasonable to get along.

Mr. GRASSLEY. Did the Senator vote against the Middle-Income College Assistance Act of 1978?

Mr. BIDEN. No; the Senator did not vote against the Middle-Income College Assistance Act because the social policy it is promoting is something that I think is worthwhile.

What surprises me is that the Senator from Iowa is suggesting that by voting against this legislation that he thinks it is better for a child to be raised in a day care center than it is in the home with a mother and father there, when there is no financial need to do otherwise. It surprises me. that the Senator supports an idea like that.

The PRESIDING OFFICER. The Chair wishes to advise that all time has expired on both sides. The yeas and nays have been ordered.

Mr. LONG addressed the Chair.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. LONG. I yield the Senator from Ohio 4 minutes on the bill.

The PRESIDING OFFICER. The Senator from Louisiana has 9 minutes remaining on the bill and the Senator from Kansas 16 minutes.

The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I rise to say a short word about the subject. I appreciate the strong views and concerns that have been expressed by the author of the amendment. I know that he feels very deeply about the question of family life and the need to preserve it. I think he reflects the views of 100 Members of this body when addressing himself to that question.

I also understand his concern that somehow this law as it presently reads providing for tax credit for day care centers for mothers, or families that put their children in day care centers, somehow does not redound to the benefit or continuation of the family life.

But I also want to point out that this amendment would cut back on those who really should deserve the greatest amount of attention and deserve from those of us in the Congress at the present time. We have been talking on both sides of the aisle about concern for middle-income Americans. Those who earn between $30,000 and $50,000 a year do not have a golden opportunity. They are not living off the land. They are having difficulty making ends meet. When they have to take out of their family budget after taxes about $2,500 for day care centers, it makes their problems that much more difficult.

In this amendment we would be taking it away not only from those who are the most well off, but from the middle-income family between $30,000 and $50,000 a year. Frankly, that would be inconsistent with the entire thrust of this tax bill, which allegedly is attempting to protect those in the middle-income areas, although some of us feel very strongly it provides much better protection for those who earn substantially in excess of $50,000.

The tax bill does, in fact, recognize the discrimination that presently exists against two-earner families and does something about the marriage tax.

I have difficulty accepting the concept that a single wage earner making, as the distinguished Senator from Florida pointed out, $1 million a year, would get the credit, but a two-earner family, both members of the family working, struggling, maybe one making as little as $8,000 a year and the other $22,000 a year, or $23,000—it has to be over $30,000—would not get any help in trying to better themselves.

I very strongly urge the Members of this body not to accept this amendment. I think the Senate spoke loudly and clearly this morning as to its views with respect to day care centers and the need to provide some tax credits for working families. I hope we will not turn the clock back in less than a 12-hour period by accepting the amendment, notwithstanding the strong feelings of the Senator and the merit that the proponent feels the amendment has.

Mr. BIDEN. Will the Senator from Louisiana yield me 1 minute?

Mr. LONG. Yes, Mr. President.

Mr. BIDEN. Mr. President, let me sum up quickly and say that it seems to me the single biggest problem facing us today is our desire to avoid individual responsibility. We go out of our way in this country to find reasons to avoid it. Responsibility starts with blood. Blood is thick. If you have a mother, father, son, or daughter, it is your responsibility to make whatever sacrifices are necessary to provide for the care of those folks unless there is a financial or a physical inability for you to do so. We as a nation had better establish that we have an individual responsibility to take care of our own family.

That means bringing mom into your home when dad dies. That means taking care of your child instead of putting him in a day care center when the only reason to put him there is for convenience.

We go out of our way to avoid our responsibility as individuals and until we recognize that fact we are going to continue to see the disintegration of the American family and the prevalence of the "me" generation.

The PRESIDING OFFICER. All time having expired, the question is on agreeing to the amendment. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. STEVENS. I announce the Senator from Arizona (Mr. GOLDWATER) and the Senator from Nevada (Mr. LAXALT), are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 8, nays 90, as follows:

[Rollcall Vote No. 233 Leg.]

YEAS—8

Biden	Dodd	Matsunaga
Boschwitz	Dole	McClure
Denton	Inouye	

NAYS—90

Abdnor	Gorton	Nunn
Andrews	Grassley	Packwood
Armstrong	Hart	Pell
Baker	Hatch	Percy
Baucus	Hatfield	Pressler
Bentsen	Hawkins	Proxmire
Boren	Hayakawa	Pryor
Bradley	Heflin	Quayle
Bumpers	Heinz	Randolph
Burdick	Helms	Riegle
Byrd, Harry F., Jr.	Hollings	Roth
	Huddleston	Rudman
Byrd, Robert C.	Humphrey	Sarbanes
Cannon	Jackson	Sasser
Chafee	Jepsen	Schmitt
Chiles	Johnston	Simpson
Cochran	Kassebaum	Specter
Cohen	Kasten	Stafford
Cranston	Kennedy	Stennis
D'Amato	Leahy	Stevens
Danforth	Levin	Symms
DeConcini	Long	Thurmond
Dixon	Lugar	Tower
Domenici	Mathias	Tsongas
Durenberger	Mattingly	Wallop
Eagleton	Melcher	Warner
East	Metzenbaum	Weicker
Exon	Mitchell	Williams
Ford	Moynihan	Zorinsky
Garn	Murkowski	
Glenn	Nickles	

NOT VOTING—2

Goldwater Laxalt

So the amendment (UP No. 321) was rejected.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, what is the pending business?

The PRESIDING OFFICER. The pending business is the amendment of the Senator from Kansas.

Mr. DOLE. Mr. President, may we have order? I wish to set that aside.

Mr. ROBERT C. BYRD. Mr. President, I ask for the majority leader to state the program for the remainder of the evening.

Mr. BAKER. Mr. President, if the Senator will yield to me, I will answer the inquiry of the distinguished minority leader.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, may we have order?

The PRESIDING OFFICER. Senators be kind enough to cease their conversations and take their seats.

Mr. BAKER. Mr. President, I thank the minority leader for his inquiry.

I think we are making good progress and I am advised by the distinguished manager of the bill for the majority, and I believe he has conferred with the minority manager as well, that it appears that we can continue to make good progress. I expect at least two more rollcall votes tonight and the Senate to be in until 9:30 or 10 p.m.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished majority leader.

What time will the Senate likely resume consideration of this joint resolution on tomorrow?

Mr. BAKER. Yes. Mr. President, what I had anticipated was that we would come in early enough to accommodate any request for special orders and to be able to get on this joint resolution at 9 a.m. in the morning.

Mr. DOLE. Or earlier.

Mr. BAKER. So if we have four special order requests, which I understand we do, I estimate that we will be in at 8 a.m. tomorrow and on this joint resolution about 9 a.m. or a few minutes after.

Mr. ROBERT C. BYRD. I thank the Senator.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. BAKER. I yield.

Mr. DOLE. In response to the question of the Senator from West Virginia, I really believe there are not that many amendments remaining. I know we are not going to have any final vote or any form of final vote. But it would be very helpful to this Senator, because we are also engaged in a couple of items presently in conference, and I am holding up the whole conference. I guess, if we could dispose of a lot of these amendments. I think we are almost in agreement with two or three Senators. I have

just indicated to the distinguished Senator from New Hampshire and the Senator from Massachusetts what we might do, and if Senators could indicate to us that they are not going to call up their amendments, that is just the same to us. As long as it is pending, we are worried about whether it is going to come up.

The Senator from Missouri has an amendment which we will take, along with the amendment of the Senator from Mississippi.

There are no further amendments on this side except the so-called cash management amendment which I need to offer to make up the revenue shortfall we will be facing at the conclusion of floor action, and so we are almost at the point of wrapping this up. I think we can by 9:30 p.m., hopefully; if not, maybe by 10 p.m. or 10:30 p.m.

Mr. BAKER. Mr. President, if the Senator will yield to me, I do not plan at this time to ask for an order for the Senate to convene in the morning. Why do we not wait then and see how we get along tonight before we set the time for convening tomorrow?

Mr. ROBERT C. BYRD. I thank the distinguished majority leader and the distinguished Senator from Kansas.

Mr. DOLE. Mr. President, I ask unanimous consent that the pending amendment be temporarily laid aside and that the Senator from New Hampshire be recognized.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from New Hampshire is recognized.

Mr. RUDMAN. Mr. President, I thank the chairman of the Finance Committee for yielding.

Mr. KENNEDY. Mr. President, will the Senate be in order? The Senator from New Hampshire deserves to be heard. The Senate is not in order.

The PRESIDING OFFICER. The remark of the Senator from Massachusetts is well taken.

Senators are requested to take their seats, vacate the aisles, and kindly hold such conversations as necessary in the appropriate cloakroom.

The Senate still remains not in order.

Will the Sergeant at Arms restore order in the corner?

The Senator from New Hampshire may proceed.

Mr. RUDMAN. I thank the President.

UP AMENDMENT NO. 322

(Purpose: To provide a credit against tax for certain home heating costs)

Mr. RUDMAN. Mr. President, I send to the desk an unprinted amendment in behalf of myself, the Senator from Massachusetts (Mr. KENNEDY), the Senator from Rhode Island (Mr. PELL), the Senator from Minnesota (Mr. DURENBERGER), the Senator from Pennslyvania (Mr. HEINZ), the Senator from New York (Mr. D'AMATO), and the Senator from Florida (Mrs. HAWKINS).

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New Hampshire (Mr. RUDMAN) for himself and Mr. KENNEDY, Mr. PELL, Mr. DURENBERGER, Mr. HEINZ, Mr. D'AMATO, and Mrs. HAWKINS, proposes an unprinted amendment numbered 322.

Mr. RUDMAN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of title I, insert the following new subtitle:

Subtitle C—Residential Heating Credit

SEC. . HOME HEATING CREDIT.

(a) IN GENERAL.—Subpart A of part IV of subchapter A of chapter 1 (relating to credits allowed) is amended by inserting immediately before section 45 the following new section:

"SEC. 44H. CREDIT FOR RESIDENTIAL USERS OF ENERGY.

"(a) GENERAL RULE.—In the case of an individual, there is allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to the product of—

"(1) the amount paid or incurred during such taxable year for all qualified home heating energy sources, multiplied by

"(2) a per centum equal to 40 percent of the percent change in the price index (within the meaning of section 8331(15) of title 5) for December of the calendar year preceding the calendar year in which the taxable year begins over such index for December of the second preceding calendar year.

"(b) LIMITATIONS.—

"(1) MAXIMUM DOLLAR AMOUNT. — The amount of the credit allowed to a taxpayer under subsection (a) for any taxable year shall not exceed the excess (if any) of—

"(A) $200, over

"(B) 3 percent of so much of the adjusted gross income of the taxpayer for the taxable year as exceeds $15,000.

"(2) REDUCTION FOR GRANTS.—The amount of the credit allowed to a taxpayer under subsection (a) (after application of paragraph (1)) shall be reduced by any amount received by the taxpayer for any qualified home heating energy source under any Federal, State, or local program.

"(3) ONE INDIVIDUAL ELIGIBLE PER HOUSEHOLD.—

"(A) IN GENERAL.—In the case of any household, the credit under subsection (a) shall be allowed only to the individual residing in such household who furnishes the largest portion (whether or not more than one-half) of the cost of maintaining such household.

"(B) DETERMINATION OF AMOUNT.—In the case of an individual described in subparagraph (A), such individual shall, for purposes of determining the amount of the credit allowed under subsection (a), be treated as having paid or incurred during such taxable year for qualified home heating energy sources an amount equal to the sum of the amounts paid or incurred for such sources by all individuals residing in such household (including any amount allocable to any such individual under subsection (d)).

"(4) MARRIED INDIVIDUALS FILING SEPARATELY.—In the case of a married individual filing a separate return of tax, the provisions of subsection (b) of this section shall be applied—

"(A) by substituting '$150' for '$300', and

"(B) by substituting '$12,500' for '$25,000'.

"(5) APPLICATION WITH OTHER CREDITS.—The credit allowed by subsection (a) for a taxable year shall not exceed the tax imposed by this chapter for such taxable year, reduced by the sum of the credits allowable under a section of this subpart having a lower number or letter designation than this section, other than the credits allowable by sections 31, 39, and 43.

"(c) DEFINITIONS AND SPECIAL RULES.—For purposes of this section—

"(1) QUALIFIED HOME HEATING ENERGY SOURCE.—The term 'qualified home heating energy source' means any energy source used for a qualified use, including wood.

"(2) QUALIFIED USE.—The term 'qualified use' means use in connection with any principal residence of the taxpayer located in the United States for purposes of heating such residence.

"(3) PRINCIPAL RESIDENCE.—The term 'principal residence' has the same meaning as in section 1034, except that—

"(A) no ownership requirement shall be imposed, and

"(B) the principal residence must be used by the taxpayer as his residence during the taxable year.

"(d) ALLOCATIONS.—

"(1) TENANTS.—

"(A) IN GENERAL.—In the case of a tenant (other than a tenant-stockholder in a cooperative housing association) residing in a dwelling unit which is heated by a qualified home heating energy source and with respect to which the amount paid for such source is not separately stated, the amount determined under subsection (a)(1) for any taxable year for any qualified home heating energy source used for a qualified use shall be equal to the product of—

"(i) the per centum determined under subsection (a)(1)(B) for the taxable year, multiplied by

"(ii) an amount equal to that portion of rent paid by the taxpayer during such taxable year as is equal to the qualified rental portion.

"(B) QUALIFIED RENTAL PORTION.—For purposes of this paragraph, the term 'qualified rental portion' means that percentage of rental amounts paid for principal residences during a calendar year which the Secretary determines, after consultation with the Secretary of Housing and Urban Development or his delegate and after taking into account regional differences in climate and heating costs, to be the average percentage of rental amounts paid in a region of the United States attributable to the payment of the costs of the qualified home heating energy source so used for a qualified use in connection with the principal residence.

"(2) CONDOMINIUMS AND COOPERATIVES.—The Secretary shall provide by regulation for the application of this section to condominium management associations (as defined in section 528(c)(1)) or members of such associations, and tenant-stockholders in cooperative housing corporations (as defined in section 216), in such a fashion that the amount allowed by subsection (a) is allowed, whether by allocation, apportionment, or otherwise, to the individuals paying, directly or indirectly, for the qualified home heating fuel so used.".

(b) CLERICAL AMENDMENTS.—

(1) The table of sections for subpart A of part IV of subchapter A of chapter 1 is amended by inserting immediately after the line relating to section 44E the following new item:

"Sec. 44H. Credit for residential users of energy.".

(2) Section 6096(b) (relating to designation of income tax payments to Presidential Election Campaign Fund) is amended by striking out "and 44G" and inserting "44G, and 44H".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to the taxable year 1981.

Mr. RUDMAN. Mr. President, the first thing I wish to do is to express my appreciation to the distinguished chairman of the Finance Committee, Senator DOLE, and to the ranking minority mem-

ber of that committee, Senator LONG, and to our majority leader for their assistance in this day of some negotiations on this matter.

Mr. President, yesterday Senator KENNEDY and I proposed an amendment that was somewhat similar which failed to carry this Chamber in a 48-to-47 vote.

We felt very deeply about it then and we feel very deeply about it now that the people of the Frost Belt of this country, an integral part of the dynamic nature of this country, are suffering a very special burden suffered by no one else in America.

We all understand that inflation has gone up 77 percent in the last 10 years, but in our region of the country in New England, in particular, we have suffered a 550-percent increase in the cost of energy.

This amendment addresses that problem in a modest way for those individuals in what we would categorize as the lower middle income of America who receive no Federal grants for low energy income assistance but who are having a very difficult time in making it through the winter.

This amendment will recognize 40 percent of the inflation rate energy expenditures for all kinds of home heating with a cap of $200.

It will not be a great deal of money, Mr. President, but I can assure you those people come February and March of these long and cold winters in these regions of our country will find this modest amount of money very helpful to making it possible for them to feed their families.

Mr. President, I also say to the Senator from Massachusetts that I appreciate the help that his staff has given me in working through this day. I thank many Members who have agreed to cosponsor this with me.

Mr. President, I ask unanimous consent that the names of Senators D'AMATO, of New York, and HAWKINS, of Florida, be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RUDMAN. Mr. President, I yield to the Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I do not intend to take much time on this amendment, but I do wish to emphasize the importance of it to many people not only in Massachusetts and New England but all across this Nation who suffered from the increasing amount of their scarce resources being taken to pay for the soaring cost of energy.

The Senator from New Hampshire has explained this amendment well.

We were asked during the debate yesterday why we should be sensitive to the energy costs in this country. The reason is this. The cost of energy and in particular energy which is used to heat the homes of families in the colder areas of this country has increased two to three times faster than the cost of living.

This amendment is designed to help working families in this country. The benefits of the amendment are phased out for upper income groups. The working families in this country suffer heavily. By and large, they are not eligible for the low-income energy assistance program. That program is a valuable program, but it is primarily targeted toward the elderly and other needy people in our society.

Mr. President, this is a limited program, but the limited aid it provides will give important assistance to those who today are making the harsh and cruel choice between food on their tables, or heat for their homes, or a telephone that can reach out to their neighbors and their friends, and which, in many instances, is a lifeline, particularly for elderly people in many parts of this country.

Harsh and difficult decisions are being made by families in the colder climates of this Nation. This amendment will provide some modest but important help and hope to many hundreds of thousands of families.

So I want to commend the Senator from New Hampshire (Mr. RUDMAN) for the work he has done, my colleague from New England, Senator PELL, who has long sponsored this type of legislation. I also want to thank the members of the Finance Committee and the majority leader, as well as the Democratic leader for their attention and assistance in bringing us to this position this evening.

I yield the floor.

Mr. PELL. Mr. President, will the Senator yield?

Mr. DOLE. I am happy to yield time, 1 minute.

Mr. PELL. I wanted to say how grateful all of us are in my part of the country to the Senator from Massachusetts and the Senator from New Hampshire and the Senator from Kansas for the negotiations that have been going on that may provide an agreement on this amendment. It means a great deal to us and, as the Senator from Massachusetts pointed out, many of our people have to make the cruel choice between heating or eating, and this will permit them to spend a tiny bit less for heating and a little bit more for eating.

In any case it is a good amendment and I congratulate my colleagues for the work they have done in this regard.

Mr. RUDMAN. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. KENNEDY. As we prepare to vote, I want to point out there have been a number of issues which have divided the Senate along partisan lines on this bill. But this is one issue where there has been clear bipartisan support. I think the people ought to understand this. I certainly appreciate the very strong support that we have had from both Republicans and Democrats alike. We have worked well together, and I think that bodes well for the future.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. HARRY F. BYRD, JR. Mr. President, I yield myself 2 minutes on this bill.

Mr. President, this is a substantially different amendment dollarwise than was offered yesterday. It does not reduce the revenue to the degree that the one yesterday did.

However, the philosophy of it is still the same.

The argument is made that there has been a substantial increase in the price of heating oil, and certainly there has. But there has been a substantial increase in the cost of food, there has been a substantial increase in the cost of housing, there has been a substantial increase in the interest rates, and yet this proposal deals with only one segment in the tremendous increase in the cost of living.

I do not feel justified in voting for an amendment which gives a tax credit for the increasing cost of home fuel when none of these other problems in the increasing cost of living is being addressed.

I shall oppose the amendment.

Mr. RUDMAN. Mr. President, do I have any time?

The PRESIDING OFFICER. The Senator from New Hampshire has 9 minutes and 22 seconds.

Mr. RUDMAN. I simply want to say to my good friend, the senior Senator from Virginia, that normally I would agree with that logic, and that point would be well taken. But the indisputable facts in our region are as follows: the inflation rate for the United States of America for all the facts that the Senator mentioned and others was 77 percent in the period we are talking about.

In our region of the country the increase in energy costs to heat our homes is 550 percent, and I will tell you for people earning $12,000 and $14,000 a year, as difficult as it is to buy food and to buy bread, to get into the month of January and the month of February with small children in their homes and have to pay $1.29 a gallon for fuel oil with the dealer wanting the money in advance, I say to you, sir, that we do have special problems in New England.

I hope my colleagues in the Senate will recognize these are human problems that need humanity when we deal with them.

I thank the Chair.

Mr. DOLE. Mr. President, how much time does the Senator from Kansas have?

The PRESIDING OFFICER. Thirteen minutes and 22 seconds.

Mr. DOLE. How much time do I have on the bill?

The PRESIDING OFFICER. Approximately 16 minutes.

Mr. DOLE. Mr. President, I am only going to take a moment or two. I understand there are a number of Senators who want to get back to this vote, and I am not going to use much time, but we have notified those Senators who are not in the building at the present time that the vote will come very quickly.

I have discussed this amendment, as both Senators know, at length, most of this week, either with them, their staff, or with Treasury or with other Members who had an interest in the amendment.

I think it is well to point out that this amendment yesterday was defeated—not this amendment exactly but an amendment very much like it, a 3-year amend-

ment, yesterday, was defeated—by a margin of one vote. There was no motion made to reconsider and it was agreed by all Senators directly involved that that motion would not be made in the absence of the other Senators, and I appreciate that because this Senator had to be away from the floor at the time in a conference.

The Senator from Kansas does not believe this amendment is good tax policy. It seems to me we ought to find some better way to accomplish these goals. So I explained this to the Senator from New Hampshire, and he conveyed my remarks to the Senator from Massachusetts and I further suggested that maybe the best way to proceed is to adopt this for 1 year and see if we can find some fair measure that treats all parts of the country the same, and that really provides some relief. I think taking 40 percent of the CPI times whatever the costs may be, together with the income limitations involved, and the provision does not provide a great deal of relief.

But even in this more modest version is it good tax policy? I have been told as recently as 20 minutes ago that it is not by the Treasury. But with the Treasury sometimes anything is bad tax policy unless it raises revenue, and this loses some revenue.

So I suggested and I appreciate the Senator's accepting the suggestion made in good faith by the Senator from Kansas, that we limit it to 1 year. Let us have a vote on it. I assume the vote will be in the affirmative. The Senator from Kansas cannot vote for the amendment, but that does not mean as chairman of the conference, if the amendment is adopted, that I am going to do anything about the amendment but try to keep it in the bill.

I am willing to give that assurance to all the Senators involved.

I wish to thank those Senators for their patience and understanding. I want to try to stay neutral on the amendment at this point—if the 3-year amendment was not good, maybe a 1-year amendment is more acceptable. I think that is a positive way to approach it.

I think perhaps we have reached an agreement and accord that will satisfy half of this body, maybe more. We will find out in the vote and that will be helpful to us in the conference.

Mr. President, while the Senator has time, I am wondering if I might ask the distinguished Senator from Massachusetts, if it is all right to do that at this point, how many of his amendments we might expect to be called up.

Mr. KENNEDY. I expect one more, possibly two; but certainly one.

Mr. DOLE. Will the Senator be prepared to offer another amendment following the disposition of this amendment?

Mr. KENNEDY. I would rather not do it immediately following, though I do not exclude that if we are here a little while longer.

Mr. DOLE. Again, let me say to Senators who may be listening or staff members who may be listening that we are getting to the bottom of the heap or the bottom of the barrel, depending on how you perceive your amendment.

Mr. KENNEDY. The top of the barrel.

Mr. DOLE. Or the top of the barrel. Come to think of it, I have an amendment myself, so we are heading for the top of the barrel. If Senators could come to the floor with their amendments, we would be glad to defeat them. If we cannot defeat them, we will negotiate them. But the point being we would like to conclude nearly everything on this bill so that tomorrow morning we will be able to vote. I think everybody is about ready for that.

Mr. President, I suggest the absence of a quorum while I check to see whether all Senators are back. I ask that the time for the quorum call be charged to the bill.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. I yield back the remainder of my time.

Mr. RUDMAN. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from New Hampshire (Mr. RUDMAN). The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), and Senator from Nevada (Mr. LAXALT) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Montana (Mr. MELCHER), and the Senator from Hawaii (Mr. INOUYE) are necessarily absent.

I further announce that, if present and voting, the Senator from Montana (Mr. MELCHER) would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 71, nays 25, as follows:

[Rollcall Vote No. 234 Leg.]

YEAS—71

Abdnor	Grassley	Pell
Andrews	Hart	Percy
Baker	Hatch	Pressler
Baucus	Hatfield	Proxmire
Biden	Hawkins	Pryor
Boren	Heflin	Quayle
Bradley	Heinz	Randolph
Bumpers	Helms	Riegle
Burdick	Huddleston	Roth
Byrd, Robert C.	Humphrey	Rudman
Cannon	Jackson	Sarbanes
Chafee	Jepsen	Sasser
Cohen	Kassebaum	Schmitt
D'Amato	Kasten	Simpson
Denton	Kennedy	Specter
Dixon	Leahy	Stafford
Dodd	Levin	Stevens
Durenberger	Lugar	Thurmond
Eagleton	Mathias	Tsongas
East	Matsunaga	Warner
Exon	Metzenbaum	Weicker
Ford	Mitchell	Williams
Glenn	Moynihan	Zorinsky
Gorton	Murkowski	

NAYS—25

Armstrong	DeConcini	McClure
Bentsen	Dole	Nickles
Boschwitz	Domenici	Nunn
Byrd, Harry F., Jr.	Garn	Packwood
Chiles	Hayakawa	Stennis
Cochran	Hollings	Symms
Cranston	Johnston	Tower
Danforth	Long	Wallop
	Mattingly	

NOT VOTING—4

Goldwater	Laxalt	Melcher
Inouye		

So Mr. RUDMAN's amendment (UP No. 322) was agreed to.

Mr. RUDMAN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question recurs on the amendment of the Senator from Kansas.

UP AMENDMENT NO. 322, AS MODIFIED

Mr. DOLE. Mr. President, I ask unanimous consent—this has been cleared with both principal sponsors of the amendment—that I may offer a technical amendment.

On page 2 of the amendment just offered by the distinguished Senator from New Hampshire and the distinguished Senator from Massachusetts, on line 16, after the "B" which is in brackets, rather than 3 percent, it should read 2 percent.

The PRESIDING OFFICER. The Senator from Kansas is still on his amendment.

Mr. DOLE. I ask unanimous consent that that be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

We now proceed with the request of the Senator from Kansas to modify the previous amendment (UP No. 322). Is there objection?

Without objection, it is so ordered.

The amendment, as modified, is as follows:

At the end of title I, insert the following new subtitle:

Subtitle C—Residential Heating Credit

SEC. . HOME HEATING CREDIT.

(a) IN GENERAL.—Subpart A of part IV of subchapter A of chapter 1 (relating to credits allowed) is amended by inserting immediately before section 45 the following new section:

"SEC. 44H. CREDIT FOR RESIDENTIAL USERS OF ENERGY.

"(a) GENERAL RULE.—In the case of an individual, there is allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to the product of—

"(1) the amount paid or incurred during such taxable year for all qualified home heating energy sources, multiplied by

"(2) a per centum equal to 40 percent of the percent change in the price index (within the meaning of section 8331(15) of title 5) for December of the calendar year preceding the calendar in which the taxable year begins over such index for December of the second preceding calendar year.

"(b) LIMITATIONS.—

"(1) MAXIMUM DOLLAR AMOUNT.—The amount of the credit allowed to a taxpayer under subsection (a) for any taxable year shall not exceed the excess (if any) of—

"(A) $200, over

"(B) 2 percent of so much of the adjusted gross income of the taxpayer for the taxable year as exceeds $15,000.

"(2) REDUCTION FOR GRANTS.—The amount of the credit allowed to a taxpayer under subsection (a) (after application of paragraph (1)) shall be reduced by any amount received by the taxpayer for any qualified home heating energy source under any Federal, State, or local program.

"(3) ONE INDIVIDUAL ELIGIBLE PER HOUSEHOLD.—

"(A) IN GENERAL.—In the case of any household, the credit under subsection (a) shall be allowed only to the individual residing in such household who furnishes the largest portion (whether or not more than one-half) of the cost of maintaining such household.

"(B) DETERMINATION OF AMOUNT.—In the case of an individual described in subparagraph (A), such individual shall, for purposes of determining the amount of the credit allowed under subsection (a), be treated as having paid or incurred during such taxable year for qualified home heating energy sources an amount equal to the sum of the amounts paid or incurred for such sources by all individuals residing in such household (including any amount allocable to any such individual under subsection (d)).

"(4) MARRIED INDIVIDUALS FILING SEPARATELY.—In the case of a married individual filing a separate return of tax, the provisions of subsection (b) of this section shall be applied—

"(A) by substituting '$150' for '$300', and

"(B) by substituting '$12,500' for $25,000'

"(5) APPLICATION WITH OTHER CREDITS.—The credit allowed by subsection (a) for a taxable year shall not exceed the tax imposed by this chapter for such taxable year, reduced by the sum of the credits allowable under a section of this subpart having a lower number or letter designation than this section, other than the credits allowable by sections 31, 39, and 43.

"(c) DEFINITIONS AND SPECIAL RULES.—For purposes of this section—

"(1) QUALIFIED HOME HEATING ENERGY SOURCE.—The term 'qualified home heating energy source' means any energy source used for a qualified use, including wood.

"(2) QUALIFIED USE.—The term 'qualified use' means use in connection with any principal residence of the taxpayer located in the United States for purposes of heating such residence.

"(3) PRINCIPAL RESIDENCE.—The term 'principal residence' has the same meaning as in section 1034, except that—

"(A) no ownership requirement shall be imposed, and

"(B) the principal residence must be used by the taxpayer as his residence during the taxable year.

"(d) ALLOCATIONS.—

"(1) TENANTS.—

"(A) IN GENERAL.—In the case of a tenant (other than a tenant-stockholder in a cooperative housing association) residing in a dwelling unit which is heated by a qualified home heating energy source and with respect to which the amount paid for such source is not separately stated, the amount determined under subsection (a) (1) for any taxable year for any qualified home heating energy source used for a qualified use shall be equal to the product of—

"(i) the per centum determined under subsection (a) (1) (B) for the taxable year, multiplied by

"(ii) an amount equal to that portion of rent paid by the taxpayer during such taxable year as is equal to the qualified rental portion.

"(B) QUALIFIED RENTAL PORTION.—For purposes of this paragraph, the term 'qualified rental portion' means that percentage of rental amounts paid for principal residences during a calendar year which the Secretary determines, after consultation with the Secretary of Housing and Urban Development or his delegate and after taking into account regional differences in climate and heating costs, to be the average percentage of rental amounts paid in a region of the United States attributable to the payment of the costs of the qualified home heating energy source so used for a qualified use in connection with the principal residence.

"(2) CONDOMINIUMS AND COOPERATIVES.—The Secretary shall provide by regulation for the application of this section to condominium management associations (as defined in section 528(c)(1)) or members of such associations, and tenant-stockholders in cooperative housing corporations (as defined in section 216), in such a fashion that the amount allowed by subsection (a) is allowed, whether by allocation, apportionment, or otherwise, to the individuals paying, directly or indirectly, for the qualified home heating fuel so used.".

(b) CLERICAL AMENDMENTS.—

(1) The table of sections for subpart A of part IV of subchapter A of chapter 1 is amended by inserting immediately after the line relating to section 44E the following new item:

"Sec. 44H. Credit for residential users of energy.".

(2) Section 6096(b) (relating to designation of income tax payments to Presidential Election Campaign Fund) is amended by striking out "and 44G" and inserting "44G, and 44H".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to the taxable year 1981.

Mr. DOLE. Mr. President, the pending amendment is again the amendment of the Senator from Kansas?

The PRESIDING OFFICER. That is correct.

Mr. DOLE. I ask unanimous consent that that be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. The Senator from Ohio would like to speak for about 10 minutes. Then, hopefully, the Senator from Massachusetts will be prepared to call up an amendment and the Senator from Delaware will be prepared to offer an amendment, which I hope we can agree upon. Then the Senator from Kentucky and the Senator from Missouri can bring up their amendments, which we hope will be agreed upon.

Perhaps then the Senator from Massachusetts will be prepared to call up his amendment. I wonder if that will be a rollcall.

How much time does the Senator from Kansas have on the bill, Mr. President?

The PRESIDING OFFICER. The Senator from Kansas has 11 minutes on the bill. The Senator from Louisiana has 84 minutes.

Mr. DOLE. Mr. President, I wonder if the Senator from Virginia would yield to the Senator from Ohio whatever time he needs on the bill?

Mr. HARRY F. BYRD, JR. How much will the Senator need?

Mr. METZENBAUM. Ten minutes, possibly 5.

Mr. HARRY F. BYRD, JR. Mr. President, I yield 10 minutes to the distinguished Senator off the bill.

Mr. DOLE. Mr. President, I wonder whether the Senator from Virginia will yield to the Senator from Ohio whatever time he needs, from the bill.

Mr. HARRY F. BYRD, JR. How much time does the Senator from Ohio need?

Mr. METZENBAUM. Ten minutes, and possibly an additional 5.

Mr. HARRY F. BYRD, JR. I yield 10 minutes from the bill to the Senator from Ohio.

Mr. DOLE. Mr. President, will the Senator permit me to ask the distinguished Senator from Massachusetts whether there will be a rollcall vote on the next amendment?

Mr. KENNEDY. There is a good likelihood that there will be one. I will try to get back in a half hour or so.

The PRESIDING OFFICER. The Senator from Ohio is recognized for not to exceed 10 minutes, granted by the Senator from Virginia.

Mr. METZENBAUM. Mr. President, at this point in the evening I believe it is important that we address ourselves to what is developing on the other side of Congress; because I have great concern that some of the problems to which we have addressed ourselves concerning how we will treat the oil industry have now become a subject in the House of Representatives whereby one side is bidding against the other to see which is going to do more for the oil industry.

The measure we have before us this evening does a great deal for the oil industry. It provides $20 billion in tax reductions for the oil industry between now and 1990. But the oil industry thought that was not enough, so when they took the matter up with the Democrats, the Democrats were prevailed upon to increase that amount to $22 billion.

But, within the last 24 to 48 hours, we have heard that the President is so anxious to get votes on the House side that he is prepared to cut the taxes of the oil companies $40 billion to $50 billion between now and 1990.

As Members of this body well know, this is not a new issue for the Senate. This is an issue to which the Senate addressed itself for a number of hours during the past week. And after extended debate the Senate voted, and by a vote of 49 to 47—with those of us in the minority being on the 47 side—the Senate indicated that enough is enough.

An amendment to give the oil industry an additional $20 billion was taken down and an understanding was reached that two other amendments, as well, would not be offered. And those two amendments were not offered.

But the oil companies are not to be deterred. They are at work in the House, morning, noon, and night. They want more and more and more. The issue is not how much more we are going to do for the people of the country. The issue is not how much more we are going to give to kids who want to go to college. The issue is not how much more we are going to give for people on food stamps, for school lunch programs, for school milk programs, for youth employment programs. No. We do not care about what is going to happen to senior citizens. The only question is: What are we

going to do for the oil companies of this country?

I know that one of the subjects that is being discussed here this evening, and it will be discussed tomorrow and the next day, is: When are we going to go home? Well, if the bill comes back from the House of Representatives and has that $40 billion to $50 billion extra in it, the Senator from Ohio wants to place the Senate on notice to be prepared to stick around a bit, because I believe that the people of this country are entitled to know what is taking place. I hope that $40 billion tax break will not come our way.

I hope our conferees will say to the House, if they come forward with that kind of proposal, that enough is enough. I hope they will recognize that they have thrown too much on the table over in the House.

Frankly, the Senate Finance Committee bill is bad enough, and the additions that have been made by the House Ways and Means Committee increase the ante to $22 billion.

It provides a 500-barrel-a-day exemption on tier 3 oil in 1982 and thereafter. It provides a 100-barrel-a-day exemption on tier 1 oil in 1983 and 1984. The exemption increases to 200 barrels a day in 1985 and 350 barrels a day in 1986 and thereafter.

The Senate bill has a $2,500 tax credit for royalty owners, and so does the House Ways and Means bill.

Then there are additional tax write-offs of certain expenses. That bill is $22 billion, $2 billion more than the Senate bill.

Then comes the administration's package. The Conable-Hance bill is an incredible give-away, costing $40 billion and $50 billion, according to the Joint Tax Committee.

Some of us have stood on the floor of the Senate; we have been in the Budget Committee; we have been in the conference committees; and we fought for nickels and dimes for people-oriented programs—$200 million, $300 million. We cannot find the money, we have been told. We have to balance the budget. But when it comes to the oil companies this administration, apparently, is willing to pay whatever price it takes to buy a few votes in the House of Representatives.

The administration bill would match the Senate's plan to cut the windfall profit tax on new oil from 30 percent to 15 percent. It would exempt all independents from the windfall profit tax on all stripper wells. The independents include such people as Hunt Oil Co. and the Louisiana Land and Exploration Co., which have annual sales in the billions of dollars.

In all fairness, I have heard that some of the independents are truly in trouble, and I am concerned about those that are in trouble.

Word has come to me this evening that half the independents do not even own a corporate jet. That means it is a problem for them to exist in this economy. I certainly would not want to keep any independent oil company from having its own jetliner, and I recognize the need to provide some sustenance and assistance for those poor independents who cannot afford to have a jet. So maybe there is some merit to giving a little extra consideration to those independents. However, the fact is that the independents are doing billions of dollars of business, and they want to be exempted. The Reagan administration is prepared to exempt them from the entire windfall profit tax on stripper wells.

Their proposal would also freeze the oil depletion allowance at 22 percent. We fought for years around here to try to bring that issue to a head and finally did bring it to a head in 1978. The Congress decided to phase it down to 15 percent. But the administration's bill would stop the phasedown at 22 percent. That proposal amounts to giving them a bonanza, an absolute bonanza, of tax-free dollars amounting to billions.

Finally, the bill would exempt the first two barrels a day of production from the windfall profit tax for royalty owners from 1982 to 1984, with the exemption rising to four barrels a day from 1985 on.

Mr. President, we would all like to go home. We would like to be out of here Friday night or Saturday night. But before we can go home, we have to get this tax bill brought to a conclusion. The purpose of my standing on the floor this evening is to say to those who will be the Senate conferees—and I will not be one of them—that if you bring back a bill from the conference that has billions of dollars of extra tax goodies for the oil industry of this country, then I believe that the people of this country should know what the issue is all about. I do not believe they will learn it in 1 day or 1 hour or one Senate speech. I believe they will learn it only if they know that the tax bill is bogged down, and I do not believe that is the way we ought to go.

I hope that those who will be the Senate conferees will understand the message this Senator is sending them. I do not believe we should go beyond the point the Senate Finance Committee has already gone with respect to the windfall profit tax. A number of us took the floor to address ourselves to that issue in the past week.

Now we find that the issue is no longer in the Senate. The issue is now in the House of Representatives. And the administration is willing to pay whatsoever price is necessary in order to get some votes to help out the oil companies of this country.

Too much harm has already been done. There are too many problems that already exist. Frankly I do not believe that the oil companies need any more assistance.

The vice president of the Phillips Petroleum Co. was recently quoted in the New York Times as saying, "Energy prices are going high as a kite, and we are going to make tons of money."

And I agree with the vice president of the Phillips Oil Co., because they are indeed making tons of money and there is no one who is proposing to take some of those profits away from them. Some of us, however, believe that enough is enough is enough. The $20 billion in this committee bill that is before us this evening is beyond the point where it should be, but the $40 to $50 billion that the House of Representatives is talking about is just the straw that breaks the camel's back.

I thank you, Mr. President.

The PRESIDING OFFICER. Who seeks recognition?

Mr. HARRY F. BYRD, JR. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HARRY F. BYRD, JR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARRY F. BYRD, JR. What is the pending business?

The PRESIDING OFFICER. The question recurs on the amendment of the Senator from Kansas.

Mr. HARRY F. BYRD, JR. I ask unanimous consent that it be temporarily set aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 323

Mr. HUDDLESTON. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Kentucky (Mr. HUDDLESTON) for himself and Mr. FORD, Mr. MATSUNAGA, Mrs. HAWKINS, Mr. MATHIAS, Mr. BOREN, Mr. CHAFEE, and Mr. WARNER, proposes an unprinted amendment numbered 323.

Mr. HUDDLESTON. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 60, insert after line 9 the following:

"(5) RACE HORSES AND HORSES OVER AGE 11.—The term 'recovery property' does not include horses used for racing and horses over 11 years of age at the time the horses were placed in service. Horses described in the preceding sentence shall be depreciated in the same manner as under section 167 as in effect for property placed in service on December 31, 1980, and the useful lives of such horses may be determined under section 167 as in effect on such date.

Mr. HUDDLESTON. Mr. President, the purpose of the amendment is to insure that the new depreciation rules will not be more detrimental for certain categories of horses than is the case under present law.

In the Finance Committee bill, older breeding horses and racehorses would have to be depreciated over a longer period than is presently required under the useful life method of depreciation.

While there may be a few other types of property that will be pushed into a slightly longer writeoff period, the slight detriment is offset by a greater investment tax credit. Horses get no investment

tax credit—even though other livestock is eligible for the credit.

The proposal should have no significant revenue loss over present law since the amendment seeks to put them in the same situation horses are in today.

This amendment has been cleared on both sides of the aisle and I ask for its passage.

The PRESIDING OFFICER. Who yields time?

Mr. METZENBAUM. I ask the Senator from Kentucky to yield 2 minutes to me.

Mr. HUDDLESTON. I yield to the Senator from Ohio.

Mr. METZENBAUM. Mr. President, this subject was before the Senate several nights ago. At that time there was some question about the amendment as it was originally drawn.

The matter has been discussed and rediscussed. Apparently the bill that came out of the Finance Committee instead of helping the breeders as well as those who own racehorses would have been hurting them and changing the depreciation schedule in a negative way so that it would have increased their taxes.

This amendment restores the situation as it presently exists and I commend the Senator from Kentucky for his leadership in this effort and I certainly have no objection to it.

Mr. HUDDLESTON. I thank the Senator from Ohio.

Mr. HARRY F. BYRD, JR. As I understand it, the Treasury Department approves of this amendment?

Mr. HUDDLESTON. The Treasury Department has other preferences, but this amendment is acceptable to the other side of the aisle and to this side of the aisle as far as I know.

Mr. HARRY F. BYRD, JR. But while the Treasury Department is not enthusiastic about it, the Treasury Department is not opposing it.

Mr. HUDDLESTON. That is correct.

The PRESIDING OFFICER. Who yields time?

Mr. HUDDLESTON. I yield back the remainder of our time.

Mr. HARRY F. BYRD, JR. I yield back our time.

The PRESIDING OFFICER. All time having been yielded back the question is on agreeing to the amendment of the Senator from Kentucky.

The amendment (UP No. 323) was agreed to.

Mr. HARRY F. BYRD, JR. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I understand there are only 11 minutes or thereabouts remaining on this side of the aisle on the joint resolution.

I ask unanimous consent that I may suggest the absence of a quorum without the time charged at all.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I suggest the absence of a quorum under those conditions.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 500

Mr. DOLE. Mr. President, at an earlier time in the debate about 10 days ago the Senator from Maryland offered an amendment, and it was laid aside, the Senator from Maryland agreeing to lay it aside.

As I understand, that amendment is still pending, amendment No. 500.

The PRESIDING OFFICER. The amendment submitted by the Senator from Maryland was temporarily laid aside with the provision that he could call it back up.

Mr. DOLE. Right.

I understand the Senator from Maryland is now, after consideration and discussions, willing to withdraw the amendment; is that correct?

Mr. MATHIAS. Mr. President, amendment No. 500 is an amendment which has no cost to the Treasury. Therefore, it would be an appropriate amendment to be discussed in the second tax bill which the distinguished chairman of the Finance Committee has promised to bring to the Senate, it being the understanding that that second tax bill will probably be one which will have to balance out in gain or loss of revenue to the Treasury.

I understand that the questions that have been raised by the Treasury about this provision for allowing taxpayers to dedicate a part of their refund to contributions to the arts and the humanities would require some change in the tax form and would require a certain amount of accounting activity that the Treasury would like to inquire into.

In view of the fact that amendment No. 500 does appear to be appropriate for the second tax bill, and in view of the fact that the chairman of the Finance Committee has agreed to let us have hearings on this bill, I believe the chairman said in September, am I correct——

Mr. DOLE. The Senator from Maryland is correct. It is the hope of the Senator from Kansas that in mid-September we will be putting together what we consider to be the second tax package and we will hopefully have that completed, if not ready to report to the Senate, late this year, early next year, but we are going to start putting it together in September.

Mr. MATHIAS. I appreciate that offer on the part of the distinguished chairman.

I have discussed that suggestion with the cosponsors of the bill, the Senator from Montana (Mr. BAUCUS), the Senator from New Jersey (Mr. WILLIAMS), and the Senator from Arkansas (Mr. PRYOR), and we have all agreed that it would be a reasonable procedure to follow the suggestion of the chairman of the Finance Committee and, therefore, in reliance upon his assurances, Mr. President, I hereby withdraw amendment No. 500.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I wish to thank the distinguished Senator from Maryland. He does have my assurance that this matter will be seriously considered and, hopefully, we can do that as indicated in the RECORD sometime in September.

Mr. President, I understand the distinguished Senator from Delaware will be prepared to offer an amendment in just a few moments, one that has been cleared again by Treasury and by both sides; is that correct, have you talked with Senator LONG?

Mr. ROTH. Yes, I have, and it has been cleared by Treasury. Are you ready for me to proceed?

Mr. DOLE. Yes, whenever you are ready.

UP AMENDMENT NO. 324

(Purpose: To modify the investment tax rules applicable to railroad rolling stock)

Mr. ROTH. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Delaware (Mr. ROTH) for himself, Mr. PACKWOOD, Mr. PERCY, Mr. TOWER, Mr. BENTSEN, Mr. BIDEN, Mr. DIXON, Mrs. HAWKINS, and Mr. HAYAKAWA proposes an unprinted amendment numbered 324.

Mr. ROTH. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 97, after line 26, insert the following:

"(d) RAILROAD ROLLING STOCK.—Clause (ii) of section 48(a)(2)(B) (defining property used outside the United States) is amended to read as follows:

"(ii) railroad rolling stock, of a United States person (as defined in section 7701(a)(30)), which is used to and from the United States;"

On page 105, after line 4, insert the following:

"(4) RAILROAD ROLLING STOCK.—The amendment made by subsection (d) shall apply to taxable years beginning after December 31, 1980."

Mr. ROTH. Mr. President, this amendment is sought in an effort to achieve equality of treatment under the investment credit and cost recovery rules between railroad-owned and nonrailroad-owned rolling stock, where rolling stock is used in both the United States and Canada and Mexico.

I am aware that the amendment as it is proposed will modify the present law rule as it applies to railroad-owned rolling stocks. This modification may not be workable for the railroad industry, and, therefore, I am only proposing the amendment in this form so that further discussion can occur on the proper language for the amendment in connection with a Senate-House conference on this tax reduction legislation.

It is my intent, and the intent of Senators PACKWOOD, BENTSEN, and LONG, to recede to the House position on this issue

if appropriate modifications can be worked out in the conference.

This amendment is not meant to cover situations whereby U.S. persons enter into long-term leasing arrangements with foreign railroads which are intended to allow railroad rolling stock to be used largely outside the United States.

I would like to have the agreement of the chairman of the Finance Committee on this course of action.

Mr. DOLE. Mr. President, I understand the question of the Senator from Delaware, and I agree with his position to recede if appropriate language cannot be worked out in the conference. I know the Senator has had long discussions with Mr. Chapin of the Treasury Department.

Mr. ROTH. That is correct.

Mr. DOLE. As I understand it, there are a number of Senators who have an interest in this amendment, half a dozen or more. I think it is a fair solution.

I want to make certain that the Senator from Delaware has discussed this with the distinguished Senator from Louisiana. If he has no question, that is agreeable with the Senator from Kansas.

Mr. ROTH. The amendment has been discussed with the distinguished Senator from Louisiana, and he is agreeable to the proposal.

Mr. DOLE. Mr. President, I yield back the remainder of my time.

Mr. ROTH. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Delaware (Mr. ROTH).

The amendment (UP No. 324) was agreed to.

Mr. ROTH. I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, it is my understanding that Senator GARN has an amendment which has been agreed to by the Senator from Ohio and the Senator from Louisiana and also by the distinguished minority leader and the distinguished majority leader to make it in order to offer it at this time because of extenuating circumstances.

I ask unanimous consent that the Senator from Utah may be recognized to offer his amendment.

The PRESIDING OFFICER. Is there objection? Hearing none, it is so ordered.

UP AMENDMENT NO. 325

(Purpose: To amend section 274(b)(1)(C) of the Internal Revenue Code of 1954 with respect to the deductibility of gifts by employers to employees in recognition of length of service or achievement)

Mr. GARN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Utah (Mr. GARN) proposes an unprinted amendment numbered 325.

Mr. GARN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of title II insert:

That (a) subparagraph (C) of section 274(b)(1) of the Internal Revenue Code of 1954 (relating to limitation on deductibility of gifts) is amended to read as follows:

"(C) an item of tangible person property which is awarded to an employee by reason of length of service, productivity, or safety achievement, but only to the extent that—

"(i) the cost of such item to the taxpayer does not exceed $400, or

"(ii) such item is awarded as part of a permanent, written plan or program that does not discriminate in favor of officers, shareholders, or highly compensated employees as to eligibility or benefits, and the average cost of all such items awarded under such plan during the taxable year does not exceed $400, except that no deduction may be claimed for any portion of an item awarded under such a plan or program to the extent the cost exceeds $1,600.".

(b) The amendment made by subsection (a) shall apply to taxable years ending on or after the date of the enactment of this Act.

Mr. GARN. Mr. President, I ask unanimous consent that Senator HATCH be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GARN. Mr. President, this is an amendment that recognizes the employee safety award programs, retirement gifts, and incentive awards for production. The limit has been at $100 for many, many years. Simply, with the rising price of gold, it discourages employers from having safety incentive programs or gold watches for retirement.

So this would raise that amount to $400. The estimated revenue cost is between $5 million and the maximum of $10 million per year. I believe it is agreed to on both sides and will be accepted.

Mr. DOLE. Mr. President, under present law an employer can deduct the cost of a gift or award made to an employee in recognition of his or her length of service as long as the cost does not exceed $100. The amendment would increase the $100 amount to $400. That is, in essence, what it does.

It is a simple amendment. I think it is a good amendment. It has been cleared by the Senator from Louisiana and the Senator from Kansas and I would hope we would accept the amendment.

Mr. GARN. Mr. President, I ask unanimous consent that Senator CHAFEE be added as a cosponsor to my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

All time having been yielded back, the question is on agreeing to the amendment of the Senator from Utah (Mr. GARN).

The amendment (UP No. 325) was agreed to.

Mr. GARN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Will the Senator yield to me for a moment?

Mr. DOLE. Yes.

THE ECONOMIC RECOVERY TAX ACT OF 1981

Mr. PERCY. Mr. President, in these final 2 weeks of July, the focus in Congress is on the economic recovery program and its two most vital components. Both have my fullest support.

On the one hand, Senators and Congressmen are meeting this week to iron out their differences on the omnibus budget reconciliation bill that will save over $140 billion in the next 4 years. Nearly $40 billion in savings will be realized in 1982 alone. It is a landmark measure and one that I have supported every step of the way. I was an original cosponsor of the reconciliation instructions—which directed committees to come up with these cuts—and I, of course, supported the actual spending reductions contained in the reconciliation bill itself. Spending reduction has been the first part of the President's program that we have considered and I believe we can send the final version to President Reagan by August 1.

On July 15, the Senate took up the other major part of the economic recovery program: the Economic Recovery Tax Act. Like the spending reductions, this measure is vital to the success of the anti-inflation program. Together, these two measures will lay the groundwork for a true and sustained economic revival in this country that will not only reduce inflation and interest rates, but also generate new, productive jobs in the private sector. In short, they will put an end to the twin problems of inflation and unemployment—called stagflation by economists—that have haunted our economy for the past decade.

Perhaps one of the most eloquent statements on the importance of putting this economic recovery in place came to me from an Illinois constituent. A couple from Downers Grove, Ill., wrote me last winter that they supported this program, even though it "will affect us adversely."

The letter concludes with the following paragraph:

College aid and pork-barrel benefits are great, but neither are free. A substantial reduction in the rate of inflation will enable us as individuals and as citizens of Illinois to finance such programs ourselves. We believe the President's program is a beginning in the battle against inflation.

Mr. President, I ask that the entirety of this letter be printed in the RECORD at the close of my statement.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. PERCY. Two fundamental principles have guided the shaping of this tax cut and I would like to touch briefly on each of them.

First, this tax bill will cut individual rates substantially. We have experienced tax increases in the magnitude of $100 billion a year for the past several years, attributable to social security tax increases and bracket creep—the impact of inflation on take-home pay. By far the largest component of the tax cut is

for individuals. Of the $36 billion worth of taxes that will be cut in 1982, nearly $27 billion will go to individuals. The following chart gives an excellent picture of the distribution of tax reduction between individuals and business:

REVENUE EFFECTS OF THE ECONOMIC RECOVERY TAX ACT OF 1981

[In billions of dollars]

Provisions	Fiscal year—			
	1981	1982	1983	1984
Individual income tax	−0.04	−26.8	−70.6	−114.1
Business tax incentives	−1.6	−11.2	−19.6	−29.3
Savings incentives	0	−.09	−1.1	−3.5
Estate and gift tax	0	−.1	−1.7	−2.6
Commodity tax straddles	.1	1.3	0	0
Total revenue effect	−1.4	−39.9	−93.1	−149.5

Note.—Figures may not add due to rounding.

Source: Committee on Finance.

Mr. President, this chart shows clearly that individual taxes will be reduced far and away more than business taxes. This is a tax cut designed for middle-income Americans, a 25-percent reduction over 3 years. Under the committee's proposal, tax rates will be reduced as follows: 5 percent effective October 1, 1981; 10 percent in 1982 and an additional 10 percent in 1983.

These marginal rate reductions will provide relief for steadily rising tax burdens under present law and will also reduce the disincentives that result from the current high tax levels. Expressed as a percentage of income, the average tax burden is now higher than at any time in the past 20 years.

The distribution of the tax cut will be across the board so that all taxpayers share in relief in proportion to their tax liability. About two-thirds of the individual tax reduction will go to the 67 percent of taxpayers who earn less than $50,000 a year. The reductions—by cutting marginal tax rates—will boost the incentives for savings and work effort.

When these cuts in the marginal rates are coupled with the targeted tax cuts for savings in the bill, it becomes clear that this part of the legislation will give high priority to earners and savers. The impact that tax reduction will have on the average American family was succinctly put forth recently in a letter I received from a constituent in Cicero, Ill. His letter begins in this way:

Again as I approach the end of a month, it is necessary for me to go to the bank again and take out some money from my savings in order to help pay some of my bills for this month—not all, just some.

The gentleman who wrote me is 60 years old and has worked for 35 years. He continues in his letter:

I have very little savings. All we have to look forward to is Social Security and Medicare. I can't go out and get a second job; I work hard enough on my regular job. I'm having trouble keeping up with my job now at my age. I don't know where the working man can go from here . . . Help can only come from being able to keep more of the money we earn. We don't want any government "hand-outs" or new programs. Just let us keep the money we earn.

Mr. President, that is a heartfelt description of what we hope to accomplish with this legislation: Allow Americans to keep more of their own hard-earned money. I ask unanimous consent that my constitutent's letter be printed in full at the close of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2.)

Mr. PERCY. In addition to the individual tax rate reductions, the second basic principle underlying this bill are the investment incentives.

These tax reductions will move us toward a lower rate of inflation by spurring savings and investment in plant and equipment. They are solid proposals that have been proposed by Senate Republicans for years. Like the individual rate reductions, these business-related cuts have my full support.

Years of high inflation and lack of investment incentives have eaten away at our industrial base. U.S. productivity lags far behind that of our major competitors. Even the British do better than we do when it comes to productivity rate increases.

To deal with these problems, this tax bill restructures the present depreciation system. Our present tax laws on depreciation are excedingly complex and do not provide adequate cost recovery of investments. The committee proposal adopts the accelerated cost recovery system—ACRS—which allows investments to be written off over a period of 15, 10, 5, and 3 years, depending on the type of investment made. ACRS, originally recommended by President Reagan, will not only provide added incentives for the investment but it will also greatly simplify an overly complex tax system.

In addition to the landmark streamlining of the depreciation system, this legislation includes two other significant tax incentives for business. There is a 25-percent tax credit for incremental research and development wage expenditures and a graduated credit for rehabilitation of structures. This latter provision will be important to older industrial areas, of which we have a great many in the Midwest.

For small businesses, the tax bill contains special provisions, too. Obviously, all types of business will benefit from the general business provisions I mentioned earlier. These targeted measures include tax incentives for stock options, an increase to $150,000 in the investment credit for used property and an increase in the $150,000 cap on the credit against the accumulated earnings tax. The bill also cuts small business tax rates by 1 percent in each of the next 2 years.

Mr. President, in addition to these important incentives to get the economy on the move, this legislation contains two measures that will make the tax system fairer: estate and gift tax reform and tax indexing. I have supported these items for many years and am pleased to see that the Finance Committee has embraced them.

The estate and gift tax changes will mean that by 1986, estates of $600,000 or less will not have to pay an estate tax. This nearly abolishes the estate tax, for only three-tenths of 1 percent of all estates will be liable for any tax by then. This is an important milestone for small businesses and farmers, who have been so severely affected by the nearly-confiscatory estate taxes in recent years. In addition, this legislation will allow for the tax-free transfer of estates between spouses. It updates the gift tax—last addressed in 1943—so that up to $10,000 can be transferred tax free, instead of the present $3,000. These provisions have been extracted from legislation Senator WALLOP and I introduced earlier this year—S. 395—and I am pleased to see them in this legislation.

The Senate's indexing proposal, which the full Senate adopted by a vote of 57 to 40, has had my full support for many years. I believe the first vote I cast for this was in 1978 and I have supported indexing legislation in subsequent years. Under the Senate-passed plan, individual income tax brackets will be indexed to the Consumer Price Index beginning on January 1, 1985. This will help reduce one of the most expensive items in a family budget: Federal tax payments. For every 1 percent rise in inflation, Federal tax receipts rise by $1.7 billion. Although Congress has periodically cut taxes, these reductions have not compensenated all taxpayers equally and the tax cuts have not kept pace with inflation. The 1978 tax cut was erased by high inflation almost immediately. This simple and equitable proposal received my support on the floor.

Mr. President, I commend my good friend Senator DOLE for moving this key part of the economic recovery program ahead so quickly. It is my hope that this bill can be sent to the President's desk before Congress recesses in August. The economy demands that we give it our highest priority.

EXHIBIT 1

DEAR SENATOR PERCY: We are writing in regard to the President's economic package. Several features of the proposal will affect us adversely.

Since we pay very little in federal taxes, our tax reduction will be negligible. The wealthy, however, will receive substantial reductions.

We do pay substantial amounts into the Social Security fund, yet no reductions are planned in Social Security taxes.

Our oldest child will enter college next fall. (Two others will follow in the next three years.) We had looked forward to low interest federal college loans to make this dream possible. It appears funding for such loans is to be slashed.

It is also likely that Illinois will lose certain "pork-barrel" funding—another blow to us.

None-the-less, we ask you to wholeheartedly support the President's program.

Yes, our taxes will be reduced little, but how else can they be reduced since we pay in little? Certainly the wealthy will receive bigger reductions, but they will be able to invest a larger proportion of the tax-cut than the not-so-wealthy.

Social Security payments are not being cut, but continue to increase. Since the program will soon be unable to make payments (according to a study placed on President Carter's desk a few weeks before the elec-

tion) this is no time to hasten the bankruptcy of that fund. Rather, support whatever structural revisions will strengthen it.

College aid and pork-barrel benefits are great, but neither are free. A substantial reduction in the rate of inflation will enable us as individuals and as citizens of Illinois to finance such programs ourselves. We believe the President's program is a beginning in the battle against inflation.

Again, we urge you to support it.

Sincerely,

Mr. and Mrs. RONALD P. ZAHN.

EXHIBIT 2

DEAR SENATOR PERCY: Again as I approach the end of a month, it is necessary for me to go to the bank again and take out some money from my savings in order to help pay some of my bills for this month—not all, just some. Others I shall stall until the next check.

This same procedure has gone on for many, many months. I am speaking now of ordinary living expenses—no luxuries, no liquor, no tobacco, no clubs, no restaurants, no vacation trips, no movies, no sports, no entertainment. It sounds very dull but it happens to be a fact of the American working man's life.

The lives of many families have been disturbed by the necessity of the wife and mother going to work to help make ends meet. We are unable to do this in our family—we must live on my income only.

I am approaching 60 years of age and after working for over 35 years, I have very little savings. All we have to look forward to is Social Security and Medicare. I can't go out and get a second job; I work hard enough on my regular job. I'm having trouble keeping up with my job now at my age. I don't know where the working man can go from here.

Help can only come from being able to keep more of the money we earn. We don't want any government "hand-outs" or new programs. Just let us keep the money we earn.

I have a simple and direct solution. I wish to offer you a suggestion that would give the working man some immediate relief: for incomes of $25,000 or less, reduce income tax in half, which would give immediate help because the "withholding" would be cut in half and we would feel the improvement with the first check.

Then to help the working man catch up, refund to him one-half of the income tax he paid for the past two years with the stipulation that 50 percent of what was received must be put into a savings account. We will be able to have some money in the bank to fall back on and more money will be available for mortgages and maybe I will once again be able to pay my bills without borrowing.

I know this will cut down the income of the Federal government, but they will have to begin to live within their income just as the average American.

I know we are told time and time and time again that if the people have more money the inflation will get worse—but the people do not have more money and the inflation gets worse and worse and worse.

Lowering the income tax is the only thing that has not been tried. So let's try it. It may be the answer. Let the working man keep more of the money he earns.

A very important point that must be emphasized is that people of my generation need desperately to be able to catch up.

There must be some relief for the working people of America, the working middle class that makes America different from all other countries—that middle class is being destroyed by inflation.

I felt compelled to write to you because you and your colleagues in Congress are our only hope.

Month by month we are going deeper in debt or just plain broke.

Much has been said by Members of Congress since the President's State of the Union Address that is very discouraging. Some of them don't seem to realize that it is very difficult to get along on the $20,000 that is the national average income.

We need your help, we turn to you for help now.

(Name withheld by request.)

● Mr. HOLLINGS. Mr. President, I know that during the past couple of weeks Members of this body and Members of the U.S. House of Representatives have argued in earnest for tax cuts. Unfortunately, most of the tax cut has been debated by tweedle-dee and tweedle-dum.

President Reagan and his "supply-siders" have sought a deficit-financed tax cut which will produce deficits of $60 billion in each of the next 3 years. The House Democrats and several in this body want to only skew the individual portion of that tax cut so more dollars go into the pockets of families in the $15,000-to-$50,000 income range. But in the end, will we be any better off under either of these plans? I doubt it.

We started on the right course. We said we needed fiscal discipline, accountability and responsibility and we found some $37 billion in spending cuts. Some of us may have disagreed on specifics but by and large, Democrat and Republican alike, we agreed that we should control Federal spending in order to get a better handle on the Federal budget. So, though the first step was difficult, we did it.

With regard to tax cuts we also started on the right course. We talked of tax cuts that would spur productivity, investment and savings and the President promised us that such a program could lead to a balanced budget by 1984. Well, that is where we have detoured from the course. We do not have a tax package limited to the needs of the economy. We are not only attempting to spur productivity, investment and savings; we are trying to gear up for the 1982 elections. Every politician loves tax cuts. Taxpayers vote. Politicians are reelected. It is easy and it is cozy. But it is not responsible.

Instead of arguing about who gets what, we should be asking why, how much, will it help the economy and will it get us to a balanced budget by 1984. Despite the day's political rhetoric there is nothing new about tax cuts. Since 1964, whether it was done for election day favor or done in the name of "Keynesian economics," income taxes were cut eight times—increasing the Federal debt and adding to the very economic ills we seek to cure today.

Sooner or later we will have to face up to the fact of what we accomplished in 1981. Some people are already pointing up the facts. In an editorial piece for the San Diego Union, June 14, 1981, James Cary of Copley News Service was right on target:

Both the Reagan—that is, Republican—proposal and the Democratic alternative, to be provided by the House Ways and Means Committee, have much more in common than in dispute.

Mr. President, I ask that Mr. Cary's article entitled "The Tax Cut Question: Where Will Economic Gorilla Sleep?" be printed in the RECORD.

The article follows:

THE TAX CUT QUESTION: WHERE WILL ECONOMIC GORILLA SLEEP?

(By James Cary)

WASHINGTON.—The great gathering storm on Capitol Hill over President Reagan's tax cut plan may appear a little strange to future historians of American politics.

Both the Reagan—that is, Republican—proposal and the Democratic alternative, to be provided by the House Ways and Means Committee, have much more in common than in dispute.

Both call for major tax cuts for individuals, for faster depreciation allowances to spur business investment, modification of the so-called marriage penalty and larger exemptions for gift and estate taxes.

Their major differences are in size, distribution and duration of the cuts. Neither side has had the audacity to suggest perhaps there should not be any tax cut at all, a proposal that would open a real philosophical debate on the merits of the issue, providing voters with a clear choice.

Mr. Reagan is calling for a 25 percent reduction in individual income tax rates, beginning with a 5 percent cut this Oct. 1 and additional 10 percent cuts on July 1, 1982, and July 1, 1983. The Democrats are proposing a 15 percent reduction—5 percent this year and 10 percent next.

On the business side, there is still some Republican shifting around on the final increase in depreciation allowances to be proposed, but both parties presumably will come up with plans close to the so-called 10–5–3 formula of writing of real estate investment over 10 years, plant equipment in five and transportation in three.

The Democrats see the essential difference between the two tax cut concepts as being the two-year versus the three-year duration of the income tax reduction and in their efforts to provide more tax savings for lower and middle income families, particularly those in the $20,000 to $50,000 annual income bracket.

But to President Reagan and the supply-side tax planners who have helped shape his program, the critical difference is the failure of the Democrats to cut deeply enough over a long enough period of time and to reduce individual tax rates across the board.

The philosophy behind this is that the Reagan plan will provide sufficient additional income in the higher brackets to free large amounts of capital for investment to renew the American industrial plant, money they say is now being siphoned off into tax shelters.

An even more critical difference, perhaps, is what the Reagan plan will cost the Treasury in decreased revenue at a time when the budget is out of balance, has no certain prospects of returning to balance, and inflation is still strong although recent statistics indicate it could be abating somewhat.

The Reagan proposals will take an estimated $37.4 billion from the Treasury in 1982, another $92.1 billion in 1983 and $144.5 billion in 1984. Of this total $224.8 billion would be from the reduction in individual taxes and perhaps $49.2 billion from business depreciation reductions. However, the business revenue loss could go up about $4.5

billion under one version of the Reagan proposals, bringing the total revenue loss to about $278.5 billion.

Assuming both the Democrats and Republicans end up with nearly identical business depreciation plans, the main difference would be the $144.5 billion cut in personal taxes in fiscal 1984, a sizable amount, to be sure, but one that still leaves both parties heavily committed to the stimulative side of budget policy at a time when a reasonable argument could be made it might be much more responsible not to cut taxes at all, at least until the nation is certain where the economy is headed.

In one sense, the U.S. economy is like an 800-pound gorilla. It can sleep anyplace it wants to. In other words, it does as it pleases, pushed and molded by forces much more powerful than any the Republicans or Democrats could apply through tax policy.

Given their track record of recent years, it is also reasonable to question whether any economists can accurately forecast what the economy is going to do. Rather than devise policies to shape it, it might be prudent to let the gorilla tell us first by its actions where it is going to sleep, and then policies could be tailored to that situation.

The uncertainties embedded in the tax cut plans of both parties go much further than this. Very ltitle study has been given to the potentially inflationary effects of the massive outlays for defense now planned.

They are scheduled to expand from $158.6 billion annually to $336 billion over the next five years. That is an annual surge of 11.1 percent a year between fiscal 1982 and 1986, even greater than the 10 percent annual increase clocked during the Vietnam war, when the current inflation became rooted in the economy. It comes close to doubling the 6 percent annual defense growth envisioned by former President Jimmy Carter.

There is some evidence that this alone could place considerable strain on production capacity. A House Armed Services Committee report last December even questioned whether the Pentagon could spend the money economically.

If two such potentially inflationary forces are turned loose on the economy simultaneously—the defense build-up and the tax cuts—President Reagan's theory that his tax plan will produce non-inflationary economic growth will have to work well indeed to avoid an inflationary conflagration.

There is some documentation for Mr. Reagan's belief. A Republican staff study released May 1 by the Joint Economic Committee of Congress concluded: "Employment, real output, real wages, real saving, real investment and income velocity are all predicted to rise; nominal interest rates and the rate of price inflation are predicted to fall."

But the White House has already modified the plan twice, both to reduce the size of the deficits it was creating and to gain more conservative votes. The original plan called for a 10 percent, not 5 percent, cut the first year. The business depreciation plan has also been curbed in an attempt to balance the 1984 budget and thus attract more conservative Democrats.

Still, it remains essentially intact, with administration spokesmen repeatedly insisting it must not be dismembered if the major investment and economic benefits are to be realized. The argument is constantly made that similar cuts in the 1920s and again under President John F. Kennedy in the early 1960s did restore non-inflationary growth.

Against such arguments, it can be pointed out that the two periods cited differed considerably from the present, and Walter Heller, who was chairman of Kennedy's Council of Economic Advisers, also disagrees. He calls the Reagan tax cut too soon, too simple and too big.

A significant number of Wall Street analysts, including Henry Kaufman of Solomon Brothers, have expressed similar concern about the size of the cut. And Brookings Institution economists, in their annual study of the budget, have warned that the administration's economic forecasts for inflation and growth depend on a huge increase in the velocity of money—that is, the speed with which a dollar is put back into the economic system—if they are not to conflict with the tight money policy advocated by the President and being pursued by the Federal Reserve Board. If budget policy does collide with monetary policy in this way, interest rates could be sent soaring again.

With such uncertainties, it might be reasonably responsible to ask why there isn't a more sharply defined debate under way—instead of an argument by both major parties from the same side of the fence.●

TECHNICAL AMENDMENTS ON TAX STRADDLES

● Mr. MOYNIHAN. Mr. President, may I simply call attention to two of the technical amendments on straddles and ask the distinguished floor manager a question.

The committee bill contains a fairly broad exemption for hedging transactions. This exemption covers most ordinary uses of the commodity markets by farmers, grain dealers, banks, and other businessmen; however, the exemption does not cover banks when they purchase and sell foreign currency and foreign currency contracts, for example, which are both offsetting and entered into with customers in the normal course of business without a special intention to reduce risk. In the Finance Committee, we stated that the hedging exemption was supposed to cover such transactions.

Also, many U.S. corporations hedge the stock of their foreign subsidiaries and the net worth of the foreign branches which contain a variety of assets. Having property abroad is risky because the property is denominated in foreign currencies; its value changes as the dollar moves up or down against other currencies. The hedging exemption was supposed to cover U.S. taxpayers when they enter into forward exchange contracts to hedge such foreign property without changing the tax nature of such property; that was also our intention in the Finance Committee.

However, we could not figure out a way to phrase the exemption so that such taxpayers could be properly covered before the vote in Committee. When I introduced the committee bill on June 25, I called attention to this. I said there were technical matters that we would deal with on the Senate floor; two of the technical amendments were addressed to this problem.

One amendment would change the way the term "hedging transaction" is defined. Under the bill now, a hedging transaction is a transaction that meets three substantive tests. It must have been entered into in the ordinary course of the taxpayer's trade or business. It must have been done primarily to reduce price risk. And it must yield ordinary income.

The amendment introduces a special rule for banks. Banks would have to meet only two of the three tests. Their transactions are hedges if the transactions are entered into in the ordinary course of business and they yield ordinary income. There need be no showing that a bank's primary purpose was to reduce price risk.

Another amendment is related to this. Under the bill now, no property that is at any time part of a hedging transaction can later produce capital or loss. The amendment would change this to read no personal property that is at any time part of a hedging transaction can produce capital gain or loss.

The aim here is to allow corporations to hedge the foreign exchange risk associated with owning section 1248 stock and section 1321(b) assets, without changing the capital gains treatment of that stock or those assets in later years.

This leads to my question for the distinguished chairman of the Finance Committee. May I say to the chairman it is my understanding that section 1248 stock and section 1231(b) assets are not personal property, as we use that term.

Section 1248 stock is not personal property because personal property is defined by the committee bill specifically to exclude stock.

Section 1231(b) assets owned abroad are not personal property because the committee bill defines personal property as "personal property which is actively traded." the words "actively traded" are the key. Even though there is a market for leases in real estate, in our view, that market does not make real estate leases actively traded. Nor are mimeograph machines, desks and the other contents of office buildings actively traded.

Therefore, if a bank enters into forward contracts to hedge against the foreign exchange risk associated with such assets, the forward contracts would be covered by the hedging exemption, and any assets against which the bank is hedging would not be converted from capital assets into ordinary income property.

This is my understanding of what we are doing. May I ask the chairman: Is it his understanding also?

Mr. DOLE. The distinguished Senator from New York is correct in his understanding.

Mr. MOYNIHAN. I would ask the Senator from Kansas to clarify the intent of the committee with respect to the operation of the Secretary's authority to allocate unidentified offsetting positions for purposes of the loss deferral, holding period and capitalization of interest rules. Am I correct in my understanding that the Secretary will have the authority to allocate a single commodities position to as many as three separate positions to defer a loss, terminate holding period and require capitalization of interest?

Mr. DOLE. The Senator is entirely correct in his analysis of the operation of this bill. Of course, with respect to such three positions offset, the holding period terminated loss deferred, and interest capitalized will relate only to a single position.

Mr. MOYNIHAN. I would ask the distinguished chairman of the Finance Committee to clarify the intent of the committee with respect to the treatment of regulated futures contracts that offset a commodities position that is not

marked to market. Is my understanding correct that a regulated futures contract that offsets another commodities position that is not marked to market may terminate the holding period of such position and may require capitalization of interest and carrying charges on such position (or another position), but may not defer losses recognized on an offsetting position?

Mr. DOLE. The Senator is, of course, correct. I might note, however, that the result he describes will arise only if the mixed straddle he describes is not identified. If identified, the gain on the regulated futures contract may defer loss on the offsetting leg.

Mr. MOYNIHAN. I would like to ask the chairman of the Finance Committee to clarify the intent of the committee concerning one aspect of the loss deferral rules. Section 1092(b) of the bill provides that rules similar to those of section 1233 (b) and (d) are to be promulgated by regulation. Am I correct in my understanding that the rules of paralleling section 1233(b) will be applied to provide that a position in commodities that is not marked to market will terminate the holding period of any other offsetting position that has not been held for more than 12 months?

Mr. DOLE. The distinguished Senator from New York is indeed correct in his application of the provisions of section 1092(b). Of course, such principle is only to be implemented by the regulations which the Secretary is required to promulgate.●

LESSEE IS OWNER OF INTANGIBLE ASSET AND THE CONSEQUENCES IF HE DISPOSES OF THAT INTEREST TO SATISFY DEBT OR OTHERWISE

● Mr. DANFORTH. We are dealing with revisions of the leasing rules that would be contained in new section 168(f)(8), and further dealing with some technical amendments to that provision. It is my understanding that the statute would provide that the characterization by the parties to the agreement of one of them as the lessor-owner and the other as the lessor-user will control for all Federal income tax purposes.

Even though the lessee has legal title, the lessor is for Federal income tax purposes treated as the owner. Let us assume a sale and leaseback transaction where the lessee acquires the property, makes a nominal sale to the lessor but for State law purposes retains title, and then leases the property back from the lessor. What is the tax result if the lessee, who has title, sells the property? Suppose the lessee has financed the property with a bank and the bank forecloses.

Mr. DOLE. The Senator is correct. The lessor will for all Federal tax purposes be the owner even though the lessee has legal title for State law purposes. The lessee is just that—a lessee with a right to use the property for the term of the lease. If the lessee sells the property, in a mortgage foreclosure or otherwise, for Federal income tax purposes he has merely transferred an intangible asset which is his interest in the lease. The lessee would realize a gain in the amount by which the selling price or foreclosure price exceeds his tax basis in the lease.

The purchaser—the bank, for example—would have acquired an intangible asset for which no investment credit is allowed and which is not depreciable. The purchaser can, however, amortize his cost over the remaining term of the lease. The regular tax rules related to the purchase and sale of contractual or intangible rights apply.

In the transaction we just described there would be no tax effect on the lessor-owner. He has not transferred anything. If the lessor did transfer his interest under the agreement, then since he is for tax purposes treated as the owner, the regular tax consequences of transfer of ownership such as potential recapture of depreciation and the investment tax credit would apply.

HOW THE OFFSET RULE WORKS

Mr. DANFORTH. We are now adding a new section 168(f)(8)(G) to the leasing rules which relates to contingent payments and offset agreements. It is my understanding, for example, that in a typical sale and leaseback, the lessee-user could receive a down payment of cash. Thereafter the schedule of principal and interest payments to be made by the lessor-owner in any year could exactly match the schedule of rental payments the lessee-user would make to him—so it is a wash. The offset rule would eliminate the necessity of the parties actually going through the process of making the offsetting payments and all the tax consequences of basis, income, and deductions would be the same.

Mr. DOLE. That is correct. Current case law and Internal Revenue Service rulings are unclear whether a taxpayer, who acquires property under an obligation unduly burdened with contingencies, has created a basis for the full purchase price of the property. The addition of section 168(G) to the safe harbor leasing rules is intended to permit a lessor who acquires leased property to have a basis equal to the purchase price of the property even though the "agreement" required under section 168(f)(8) permits contingent payments or offsets, for example, the lessor can elect to offset its obligation to pay for the property by the scheduled rental payments due from the lessee. Also, section 168(f)(8)(C)(vi) was added to remove any doubt that an agreement which contains a provision for contingent payments or offsets qualifies for treatment as a lease under the section 168 safe harbor rules.

Section 168(G) sets forth the effects on taxable income for both the lessor and lessee in the event an offset provision becomes operative. Under that subsection, the lessor will be required to include in income the rental income scheduled to be received from the lessee and may deduct the interest scheduled to be paid to the lessee and the depreciation deductions in the same amounts and over the same number of years as agreed to by the lessee and lessor prior to the offset. The lessee may deduct its scheduled rental payments to the lessor and must include in income the "deemed" interest income from the lessor.

The purpose of this amendment is to provide a means whereby the lessor will receive all the depreciation deductions and investment tax credits it bargained for. Therefore, even though the lessee may be unable to meet its obligations, the lessor can be assured of realizing its tax benefits and thereby "neutralizing" credit worthiness as a consideration for using the safe harbor-leasing rules. This permits companies which are in a weak financial condition to participate in the leasing rules on an equal basis.

Mr. DANFORTH. It is my understanding that the amendments make it clear that the policy of facilitating use of the investment tax credit through leasing pursuant to the safe harbor rules applies equally to so-called credit pass-through leases. In these instances, property is leased to a lessee who then subleases the property back for the same term to the original lessor or an affilitate. The credit is passed pursuant to a section 48(d) election to the lessee-sublessor, who would be treated as the lessee for purposes of the Code. The original lessor or an affiliate obtains the benefit through the relative rentals under the lease and sublease.

Mr. DOLE. The understanding of the Senator is correct.●

INTEREST ON INSURANCE COMPANY DEPOSITS

● Mr. BENTSEN. Mr. President, last year when, as part of the Windfall Profit Tax Act, we enacted an exclusion from income for $200 of interest—$400 for taxpayers filing joint returns—we provided that interest on other evidences of indebtedness issued by a domestic corporation of a type offered by corporations to the public, other than those specifically enumerated in the statute, could, by regulation, also be excluded from income. At the time, I confirmed with the then-chairman of the Finance Committee on the floor of the Senate that one type of interest that could be excluded from income under Treasury regulations under this provision was the interest earned on amounts held by an insurance company under an agreement to pay interest on the amounts held.

In the present bill, we exclude from incomes starting in 1984, 15 percent of net interest received on savings, up to a ceiling of $450—$900 for taxpayers filing a joint return. This new provision, like the provision for the exclusion of $200 of interest last year, provides that interest on other evidences of indebtedness issued by a domestic corporation of a type offered by corporations to the public could, by regulation, also be eligible for the 15-percent exclusion.

I wish to reconfirm the understanding with respect to the new 15-percent exclusion that one type of interest that could be included in Treasury regulations is the interest earned on certain amounts held by an insurance company under an agreement to pay interest on the amounts held.

Mr. DOLE. Yes; that is correct.

Mr. BENTSEN. At the present time, I see no reason why the Treasury would not provide by regulations that the interest earned on certain amounts held by an insurance company under an agreement to pay interest should be eligible

for the new net interest exclusion. Specifically, policyholder dividends to the extent they do not exceed premium paid—and therefore are not taxed when withdrawn—and prepaid insurance premiums left on deposit appear to be quite similar to savings left on deposit with the sort of savings institutions specifically enumerated in the statute. Even life insurance policy proceeds left by a beneficiary with an insurance company under an agreement to pay interest may be sufficiently similar to other savings vehicles to qualify. The interest component of an amount received under an annuity contract, however, is clearly not eligible for the exclusion. Is this view shared by the distinguished Senator from Kansas?

Mr. DOLE. Yes, at the present time. I see no compelling reason why Treasury would not provide by regulations that interest earned on the amounts that you mentioned would qualify for the new net interest exclusion. If the Treasury and IRS agree that these interest payments are similar to interest paid on amounts left on deposit with savings institutions, I would expect regulations to so provide. The final determination, however, will be left up to the Treasury.

Mr. BENTSEN. Interest earned on policyholder dividends in excess of premiums paid and left on deposit with an insurance company may present different considerations, however. I believe it is appropriate therefore, in promulgating regulations, for Treasury to examine the question of excluding the interest paid on such dividends without our expressing a view as to the correct result.

Mr. DOLE. I agree.●

A CALVIN COOLIDGE TAX BILL

Mr. EAGLETON. Mr. President, as we approach the time of final passage of this tax bill, I think we should step back a moment and reflect on what we are about to do with respect to both the economic and social fabric of this Nation.

First, we should examine what has been done in the Federal budget.

To 3 million social security recipients receiving the $122 minimum payment—some of the oldest and poorest of our Nation—we have said we no longer can afford to provide you this minimum payment.

To 1 million recipients of food stamps—again, some of the oldest and poorest of our Nation—we have said we no longer can afford to provide you food stamps and to 1 million other recipients, we have said we must cut your benefits.

To thousands, maybe millions of people receiving the absolute minimum of medical care under medicaid, we have said we must cut back or altogether eliminate even the most elemental and basic medical care.

To 837,500 college students receiving student loans, we have said you will no longer be eligible for student loans.

To 800,000 poor children in elementary schools, we have said we can no longer provide that extra help necessary to overcome economic or social disadvantages.

To 1,500,000 young people enrolled in the vocational training program, we have said that we do not care if they reach adulthood without a career or any job prospects.

By way of contrast to what we have done in the budget bill, in the tax bill before us, we direct the lion's share of the tax cuts to the rich.

To taxpayers earning $50,000 and more—that is 5 percent of American taxpayers—this bill targets almost two-thirds, 61.5 percent, of the tax cuts. To the taxpayers earning less than $50,000—that is 95 percent of all American taxpayers—this bill targets about one-third, 38.6 percent, of the tax cuts. How is that for good old fundamental equity?

To very wealthy taxpayers with significant "unearned" income—stock dividends and the like—we reduce their maximum tax from 70 percent to 50 percent.

To taxpayers with "capital gains" on the sale of stock, we cut the rate from 28 percent to 20 percent.

The country is now being deluged with television, radio, and newspaper ads extolling the wonders of the administration's tax bill. Is it any surprise that this shameless effort to brainwash the American people is being financed by the very private interests that stand ready to reap the bulk of the benefits?

Perhaps the most unseemly and disgraceful activity of all was the "bidding war" which developed as various groups tried to fashion a coalition. In order to entice this or that House Member, more than $16 billion of tax cuts were directed to the oil industry.

In short, Mr. President, the economic and social policy that we have adopted in this bill is budget cuts for the poor, tax cuts for the rich, a gusher of tax cuts to the oil industry, and high interest rates for everybody. No wonder that President Reagan has restored the portrait of Calvin Coolidge to a place of prominence in the White House. Coolidge and his Secretary of the Treasury, Andrew Mellon, would be very much at home with the Reagan-Kemp-Roth economic and social scheme.

In Coolidge's time, it was called "trickle down." In Reagan's time, it is called "supply side," but there is not a scintilla of difference between them. Both proceed from the same view that when you feed the horses well enough, eventually the sparrows eat better, too.

As the Reagan-Coolidge tax bill before us demonstrates, we have not learned much from history. Let us hope there is a special providence somewhere which will spare us from reliving the consequences.

INTEREST EXCLUSION FOR PASSTHROUGH OF QUALIFIED INTEREST FROM REGULATED INVESTMENT COMPANIES AND REAL ESTATE INVESTMENT TRUSTS

● Mr. SCHMITT. Mr. President, on July 16, during the early days of the consideration of this bill, we adopted amendment No. 228, sponsored by myself and Senator DANFORTH, among others. One of the provisions of that amendment revised new section 128 of the Internal Revenue Code, effective for years beginning after 1983, to permit a 15-percent exclusion for certain types of interest, after subtracting from such interest certain types of interest paid. This provision is intended to encourage savings by permitting the return on certain types of savings to enjoy tax-favored status. While I would have preferred to give such tax-favored status to the return on all sorts of savings and investment, revenue constraints forced us only to favor interest.

Mr. President, it is my understanding that the interest exclusion provisions contained in the amendment list several specific types of interest that would be excluded from gross income. In addition, a provision is included that provides that, to the extent prescribed in Department of Treasury regulations, the exclusion includes interest on other evidences of indebtedness issued by a domestic corporation of a type offered by corporations to the public. It is my understanding that this provision concerning the other types of interest was included in order that other types of interest on corporate obligations that were not specifically named in the bill will be eligible for the interest exclusion. Can the distinguished manager of the bill confirm whether or not my understanding is correct?

Mr. DOLE. Yes, your understanding is correct.

Mr. SCHMITT. I am informed that regulated investment companies have historically been treated in the Internal Revenue Code as "conduits." No tax is levied upon the company so long as it currently distributes its income to shareholders, and the principal types of income received by the companies retain their character when passed through to the companies' shareholders. Thus, even though the distributions of such income to shareholders are denominated as dividends, net long-term capital gains distributed to shareholders as so-called capital gains dividends are treated as long-term capital gains in the hands of shareholders under code sections 852(b)(3)(B) and (C) and tax-exempt interest is flowed through as tax-exempt interest in the hands of shareholders under code section 852(b)(5).

Similar treatment is available for beneficiaries of a real estate investment trust. It seems clear to me, for purposes of the new 15-percent net interest exclusion, that otherwise qualified interest paid to a regulated investment company or real estate investment trust and passed through to its shareholders or beneficiaries nominally as "dividends" or other type of return should retain its character as interest qualified for the 15-percent exclusion in the hands of the shareholders or beneficiaries. Does the Senator from Kansas agree?

Mr. DOLE. Yes; I do. If the interest is otherwise qualified for the exclusion, and is distinguished from other income passed through, it should remain qualified when passed through to shareholders and beneficiaries.

Mr. SCHMITT. Is it the chairman's understanding, then, that one type of interest that can and should be excluded under Treasury regulations is such interest?

Mr. DOLE. Yes, that is my understanding. Determination, however, will be left up to Treasury.●

ORDER OF PROCEDURE TOMORROW

Mr. BAKER. Mr. President, if the Senator from Kansas would permit me, I have consulted with the minority leader, with the chairman, and with the ranking member of the Finance Committee. It seems clear that there are no other amendments that we can do tonight. So I wish to announce there will be no more votes this evening.

Mr. President, sometime shortly I will ask the Senate to enter an order to convene at 9 o'clock tomorrow morning. I inquire of the distinguished chairman of the committee if he is in a position to suggest a listing and sequence of amendments to be disposed of tomorrow and perhaps an overview of how many amendments remain and when he thinks we might reach the final stages of consideration of this bill on tomorrow?

Mr. DOLE. Mr. President, I would say to the majority leader and others that, as I understand it, the distinguished Senator from Missouri, Senator EAGLETON, would be recognized to call up his amendment, followed by the distinguished Senator from Massachusetts, Senator KENNEDY, to call up an amendment—I am not certain if he identified that amendment—and then the distinguished Senator from Montana, Senator BAUCUS, to call up an amendment on expensing, then the distinguished Senator from Tennessee, Senator SASSER, to call up an amendment following that. So there would be four amendments.

That would leave an amendment by the Senator from Montana, Senator MELCHER, an amendment by the Senator from West Virginia, Senator ROBERT C. BYRD, two amendments by the manager of the bill, one possible amendment by the Senator from Texas, Senator BENTSEN, and four other Kennedy amendments, but I understand they may not be called up tomorrow.

Mr. BAKER. I thank the Senator. Could he tell me the nature of the Baucus amendment to be offered?

Mr. DOLE. The Baucus amendment deals with small business expensing of $25,000.

Mr. BAKER. Mr. President, I am advised by the minority leader that they are agreeable on that side, may I advise the chairman, to a sequence of an Eagleton amendment as the first amendment, a Kennedy amendment from the list of amendments—I might say that the distinguished Senator from Massachusetts (Mr. KENNEDY), indicated to me that there is a possibility that he might offer two amendments, he thought it was only an outside possibility, and there is also an outside possibility he will not offer any. The second amendment would be a Kennedy amendment, the third amendment a Baucus amendment, and the fourth amendment a Sasser amendment and perhaps a Melcher amendment after that.

But I am advised that the minority side is willing to clear on their side the sequence of the four amendments at this time: Eagleton, Kennedy, Baucus, and Sasser. If that is agreeable to the distinguished chairman, I will make that request at this time, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Chair wishes to inform the majority leader and the distinguished Senator from Kansas that the time allotted on the bill to the Senator from Kansas is now exhausted.

Mr. BAKER. Mr. President, how much time remains to the distinguished minority manager of the bill?

The PRESIDING OFFICER. Seventy-four minutes.

Mr. BAKER. Mr. President, I ask unanimous consent that an equal time be allocated to the distinguished manager of the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, was that request granted?

The PRESIDING OFFICER. That is correct.

ORDERS FOR WEDNESDAY

ORDER FOR RECESS UNTIL 9 A.M.

Mr. BAKER. Mr. President, if the Senator from Kansas would permit me one more moment, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 9 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

REDUCTION IN LEADERSHIP

Mr. BAKER. Mr. President, this has been discussed with the minority leader.

Mr. President, I ask unanimous consent that on tomorrow the time allocated to the two leaders under the standing order be reduced to 2 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF CERTAIN SENATORS

Mr. BAKER. Mr. President, after the two leaders are recognized under the standing order as reduced, I ask unanimous consent that the following Senators be recognized for not to exceed 15 minutes each: the Senator from Oklahoma (Mr. NICKLES); the Senator from Kentucky (Mr. HUDDLESTON); the Senator from Wisconsin (Mr. PROXMIRE); and the Senator from California (Mr. HAYAKAWA).

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that, after the execution of the special orders just provided for, there be a period for the transaction of routine morning business not to exceed 5 minutes in length in which Senators may speak for not more than 1 minute each for the purpose of statements only.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO RESUME CONSIDERATION OF TAX MEASURE

Mr. BAKER. Mr. President, I ask unanimous consent that at the expiration of the time for the morning business just provided, the Senate return to the consideration of the pending measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE TOMORROW

Mr. BAKER. Mr. President, I thank the Senator from Kansas for permitting me to make these arrangements now. May I say to the Senator from Kansas that he, the Senator from Louisiana, the Senator from Virginia, and others, have done an extraordinary job in dealing with more than 100 amendments on this bill. I would hope that the handful of amendments that are yet to be dealt with can finish this bill sometime in the early part of the day on tomorrow.

I yield the floor.

Mr. DOLE. Mr. President, is it the intention of the majority leader that we will start on the bill at 10 o'clock?

Mr. BAKER. Mr. President, I would say to the Senator from Kansas it would be just a few minutes after 10. I have provided that the Senate would convene at 9 a.m.; the time of the two leaders would expire at 9:04; the time for special orders, if fully utilized, would take until 10:04; 5 minutes for morning business would be 10:09, so the latest we could be on this bill would be at 9 minutes after 10 o'clock tomorrow.

It is my estimate that we will be on the bill before that by reason of the failure of Members to use the time allocated under special orders or the lack of the requirement to use the full time.

Mr. DOLE. I thank the majority leader.

Mr. BAKER. Mr. President, there are certain housekeeping details to be attended to.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE CALENDAR

Mr. BAKER. Mr. President, I have a number of matters that are cleared on this side for disposition.

Mr. President, might I first inquire of the minority leader if he would be willing to examine his Executive Calendar for today? I observe that on our calendar we are prepared now to proceed to the consideration of all of the nominations appearing on page 2 beginning with "New Reports" and continuing on page 3, through "Department of Health and Human Services."

Mr. ROBERT C. BYRD. Yes, Mr. President, those nominations are cleared on this side of the aisle.

Mr. BAKER. I thank the minority leader.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate go into executive session for the purpose of considering the nominations just referred to.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the nominations be considered en bloc.

The PRESIDING OFFICER. Without objection, the nominations are considered and confirmed en bloc.

The nominations considered and confirmed en bloc are as follows:

DEPARTMENT OF EDUCATION

Donald J. Senese, of Virginia, to be Assistant Secretary for Educational Research and Improvement, Department of Education.

George A. Conn, of Maryland, to be Commissioner of the Rehabilitation Services Administration.

Anne Graham, of Virginia, to be Assistant Secretary for Legislation and Public Affairs.

Thomas Patrick Melady, of Connecticut, to be Assistant Secretary for Postsecondary Education, Department of Education.

ACTION AGENCY

Thomas L. Lias, of Iowa, to be an Assistant Director of the ACTION Agency.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

William E. Mayer, of California, to be Administrator of the Alcohol, Drug Abuse, and Mental Health Administration.

DEPARTMENT OF LABOR

William M. Otter, of Kentucky, to be Administrator of the Wage and Hour Division, Department of Labor.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Marie P. Tolliver, of Oklahoma, to be Commissioner on Aging.

STATEMENT ON THE CONFIRMATION OF MARIE T. TOLLIVER, OF OKLAHOMA, TO BE COMMISSIONER ON AGING

● Mr. NICKLES. Mr. President, I rise to voice my congratulations to Mrs. Lennie-Marie Tolliver, a fellow Oklahoman, on her appointment to serve as Commissioner on Aging.

Both in terms of educational background and job experience, Lennie-Marie will bring insight and expertise to this position. She has earned her Ph. D. in social work education from a university in Cincinnati, Ohio, and is currently serving as professor, associate director, and graduate program coordinator for the University of Oklahoma School of Social Work.

Chosen for such honors as listings in "Who's Who of American Woman" and "Who's Who in Black America," Lennie-Marie is also widely recognized by her peers as a woman of accomplishment and leadership.

I would like to encourage my colleagues to join with me in expressing our approval and pleasure with President Reagan's choice for Commissioner on Aging. We look forward to working with Lennie-Marie and seeing the results of what happens when a person of compassion, integrity, and expertise confronts the challenge of coordinating information and recommendations on the very sensitive and critical problems that our elderly face.●

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nominations were confirmed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask that the President be immediately notified that the Senate has given its consent to these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I have a number of other requests to make. I shall try not to detain the Senate very long. I believe each request has been cleared by the distinguished minority leader.

PROPOSED UNANIMOUS-CONSENT REQUEST CONCERNING CERTAIN TREATIES

Mr. BAKER. Mr. President, in respect to certain treaties that are on the calendar, I would like to propound another unanimous-consent request, as in executive session.

As in executive session, I ask unanimous consent that on Thursday, July 30, at 12 noon, the Senate go into executive session to consider five treaties on the Executive Calendar, those being Calendar Orders Nos. 5–9, under the following time agreement:

Twenty minutes total time on all five treaties to be equally divided between the chairman of the Foreign Relations Committee, Senator PERCY, and the ranking member or their designees, and that after the conclusion or yielding back of the 20 minutes of debate time, one rollcall vote occur counting for five rollcall votes on the five resolutions of ratification.

I also ask unanimous consent at this time that the five treaties be considered as having passed through the various parliamentary stages up to and including the presentation of the resolution of ratification.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object.

Mr. BAKER. Mr. President, I understand that perhaps the clearance process on that request has not been completed. I withdraw the request for the time being.

The PRESIDING OFFICER. The request is withdrawn.

REMOVAL OF INJUNCTION OF SECRECY—TREATY DOCUMENT NO. 97–15

Mr. BAKER. Mr. President, as in executive session, I ask unanimous consent that the injunction of secrecy be removed from the Supplementary Extradition Convention with Sweden (Treaty Document No. 97–15), transmitted to the Senate today by the President of the United States, and ask that the treaty be considered as having been read the first time; that it be referred, with accompanying papers, to the Committee on Foreign Relations and be printed for the use of the Senate; and that the President's message be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The message of the President is as follows:

To the Senate of the United States:

With a view of receiving the advice and consent of the Senate to ratification, I transmit herewith the Supplementary Convention on Extradition between the United States of America and Sweden, signed at Washington on May 27, 1981.

I transmit also, for the information of the Senate, the report of the Department of State with respect to the treaty.

The supplementary extradition treaty updates an existing extradition treaty with Sweden of October 24, 1961. It expands the list of extraditable offenses to include: tax evasion, obstruction of justice, offenses relating to the international transfer of funds, and conspiracy to commit extraditable offenses. Upon entry into force it will amend the extradition convention between the United States and Sweden.

This treaty will improve upon our current extradition treaty with Sweden and will thus contribute to international cooperation in law enforcement. I recommend that the Senate give early and favorable consideration to the treaty and give its advice and consent to ratification.

RONALD REAGAN.

THE WHITE HOUSE, *July 28, 1981.*

REFERRAL OF NOMINATION

Mr. BAKER. Mr. President, as in executive session, I ask unanimous consent that the nomination of John V. Graziano to be Inspector General of the Department of Agriculture be referred to the Committee on Governmental Affairs for not to exceed 20 days.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, for the moment, I yield the floor.

EL SALVADOR: THE SEARCH FOR PEACE

Mr. PERCY. Mr. President, Assistant Secretary of State for Inter-American Affairs, Thomas O. Enders, recently gave a speech to the World Affairs Council of Washington, D.C., outlining United States policy for El Salvador and giving the rationale for our strong support for an electoral solution to present political instabilities in that country.

Ambassador Enders notes three important points that must be realized if a political solution is to be found:

First, promises—with respect to reform—must be kept.

Second, there must be demonstrable progress in controlling and eliminating violence from all sources, and

Third, all parties that renounce violence should be encouraged to participate in designing new political institutions and in choosing representatives for them.

Mr. President, the Government of El Salvador is presently engaging in the necessary effort to build an electoral framework within which elections will take place. The first test will come in March of 1982 when elections for a constituent assembly are to be held.

Ambassador Enders makes a strong case for continuing United States assistance to the El Salvador Government so that a climate favorable to a political, electoral solution can be sustained.

This is a clear and important statement of our policy toward this troubled area. I ask unanimous consent that Assistant Secretary Enders' speech be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

EL SALVADOR: THE SEARCH FOR PEACE

This winter one of our neighbors—El Salvador—was the target of a deadly challenge. On Januray 10, insurgent groups that had developed in El Salvador—but had united with Cuban help, had trained many of their people in Cuba, had just obtained infusions of modern arms through Cuba—launched a "final offensive" to overthrow the Salvadoran government.

Timing was critical to the guerrillas. On Januray 9, the insurgents' Radio Liberation boasted from Nicaragua that the offensive to be launched the next day meant that the new president of the United States would come to office too late to stop the guerrilla victory. But an unspoken internal factor was probably more important. In 1980 the new Salvadoran government—after its predecessors had for years ignored pressing socio-economic problems—had started a program of land reform to benefit the poor. The reform addressed key issues that the insurgents had hoped to exploit as their own. Every passing day was demonstrating that the guerrillas' premises—that they were dealing from strength at home and abroad—were wrong.

El Salvador is in area the smallest mainland country of Latin America. It has not quite five million people. But it is our neighbor. When El Salvador appealed for our help to ward off an externally-armed attack, both the Carter and Reagan Administrations responded. The reason is simple: We cannot be indifferent to outside threats to the security of any friendly country so close to our shores.

A vital fact must be recognized: Cuba is manipulating and feeding the violence in El Salvador. Cuba helped Marxist groups to unify, and has been backing them with military training, arms, and propaganda.

This pattern is not unique.

Cuba applied it in Nicaragua, first to help overthrow the government, then to influence the new one.

With variations, Cuba is attempting to repeat this pattern in Guatemala and elsewhere in Central America.

And in South America last February, armed insurgents landed in Colombia in an attempt to undermine one of the hemisphere's most respected democracies. The landing force had just completed three months of combat training in Cuba.

Had the United States not responded to El Salvador's appeal for help, no country in the area could have considered itself safe from Cuban-backed violence.

Today, as in the past, the basic policy of the United States is to try to help resolve the problems of frail government institutions, of poverty, and of underdevelopment that create vulnerabilities to this form of aggression.

But when trained guerrillas with outside backing take up machineguns, mortars and recoilless rifles, no amount of fertilizers, schools or clinics can prevent them from sowing terror or attempting to seize power by force. That is why we responded to the appeals of the Salvadoran government to supplement our economic assistance with military assistance, and that is why we believe we should continue military aid in the small amounts we are providing.

Contrary to the insurgents' expectations, the Salvadorans contained the immediate January offensive on their own. Our assistance since has enabled the Duarte government to prevent the insurgents from turning their continuing outside support to new military advantage. Even more importantly, our assistance gives the Salvadoran people a chance to defend their right to self-determination by developing a political solution to the conflict.

And that is what I would like to talk about today: a political solution. For just as the conflict was Salvadoran in its origins, so its ultimate resolution must be Salvadoran.

For more than 18 months, El Salvador has had a government with a consistent and stable policy, one that emphasizes domestic reform, closer trade and diplomatic relations with neighboring nations, and firm resistance to outside intervention.

El Salvador, however, remains a divided country. It is divided between the insurgents and a great majority that opposes the extreme left's violent methods and foreign ties. It is divided between an equally violent minority on the extreme right that seeks to return El Salvador to the domination of a small elite and a great majority that has welcomed the political and social changes of the past 18 months.

The insurgents are divided within their own coalition—between those who want to prolong their ill-starred guerrilla campaign, and those who are disillusioned by their failure to win the quick military victory their leaders had proclaimed inevitable—between those who despise democracy as an obstacle to their ambitions to seize power, and those who might be willing to engage in democratic elections.

Finally, the vast majority of Salvadorans in the middle are also divided—over whether to emphasize the restoration of the country's economic health or the extension of the country's social reforms—between those who honor the army as one of the country's most stable and coherent institutions, and those who criticize it for failing to prevent right-wing violence—between those who see the need to develop participatory institutions, and those who maintain that there is no alternative to the old personalistic politics.

Only Salvadorans can resolve these divisions. Neither we nor any other foreign country can do so. It is therefore critical that the Salvadoran Government itself is attempting to overcome these divisions by establishing a more democratic system.

We wholeheartedly support this objective. Not out of blind sentiment, not out of a desire to reproduce everywhere a political system that has served Americans so extraordinarily well, and certainly not because we underestimate the difficulties involved.

Rather, we believe that the solution must be democratic because only a genuinely pluralistic approach can enable a profoundly divided society to live with itself without violent convulsions, gradually overcoming its differences.

How can a country beset by so many troubles get from here to there? The first thing to say is that promises must be kept.

One can debate endlessly about El Salvador's land reform—whether the takeover of the big farms might have a high penalty in lost production for export, whether one can really give clear titles to over 200,000 individual peasant workers, and so forth. But the changes that have already taken place are real. The issue is no longer whether land reform is advisable or not. The issue now is how to consolidate and perfect what has been done. Individual titles are a practical necessity if peasants are to know that their new opportunities to work their own way out of subsistence poverty are fully legitimate. There is no other choice if economic and social chaos and an eventual guerrilla victory are to be avoided.

This understood, the compensation promised should also be provided, and on a just and effective basis. This is not only a matter of right, it is a practical necessity. El Salvador is known for the vigor and skill of its modern entrepreneurs, but entrepreneurs will not stay and work in El Salvador or anywhere else if they cannot expect fair treatment.

Titling and compensation would bring important elements of stability to the reform process. In addition, the assurance that existing reforms will be made to work before new economic changes are introduced, and that predictable rules of the game will be developed in consultation with both employers and workers, would go a long way to consolidate moderate forces, frustrate the guerrillas' economic warfare, and help restore El Salvador's economy.

Second, there must be demonstrable progress in controlling and eliminating violence from all sources.

Violence of the left and violence of the right are inextricably linked. Since the failure of the January offensive, the tragic cycle of violence and counter violence has been most evident in Chalatenango and Morazan, the remote areas where guerrilla forces are concentrated, and where most of the violent incidents recently attributed to the far right and to government forces have taken place. Elsewhere, the violence has tended to fall as the level of nation-wide insurgent activity has declined. The investigations into the murders of the four American Catholic women and the two AIFLD experts, though still unfortunately incomplete, have led to detentions.

But more needs to be done.

Cuban and Nicaraguan supplies to the guerrillas must stop. There is no doubt that Cuba was largely behind the arms trafficking that fueled the guerrilla offensive this winter. In April, when Socialist International representative Wischnewski confronted Castro with our evidence of Cuban interference, Castro admitted to him that Cuba had shipped arms to the guerrillas—just as we had said.

After their arms trafficking was exposed, Cuba and Nicaragua reduced the flow in March and early April. Recently, however, an ominous upswing has occurred, not to the volume reached this winter, but to levels that enable the guerrillas to sustain military operations despite their inability to generate fresh support.

The other side of the coin is that more Salvadoran Army leadership is needed, both to fight rightist death squads and to control security force violence. This is a primary objective of our training effort. There must be improvement.

The basic reality, however, is that violence will likely be countered by violence until a rational and legitimate political process is devised to break this vicious circle.

This brings me to my third point, that all parties that renounce violence should be encouraged to participate in the design of new political institutions and the process of choosing representatives for them.

The government of El Salvador has announced that it will hold presidential elections in 1983. Prior to that a Constituent Assembly to be elected in 1982 will develop a new constitution. Four months ago, in March, President Duarte appointed an electoral commission to develop the necessary procedures. Last week, the government officially approved measures recognizing the legal status of registered parties and setting the procedures whereby these parties, and any new parties that come legally into existence, can participate in the election.

The parties already legally registered include two groups associated with the insurgent political front: the National Revolutionary Movement led by Guillermo Ungo, and the Democratic National Union, the electoral vehicle of the traditional Communist party. These parties, and any others that may wish to do so legally, now have before them the opportunity to test their strength against reformist and conservative parties according to the ultimate test of democracy: ballots, not bullets.

Before developing this critical point further, let me note that the value and importance of elections as a means for resolving and overcoming differences should not be underestimated in Central America today.

Costa Rica has been able to resolve its political differences peacefully largely because elections have been held uninterruptedly since 1948—and are scheduled again next February.

Honduras elected a Constituent Assembly in April 1980 and will elect a President and a Legislative Assembly this coming November. The courage of Honduran leaders in standing by their election commitments despite regional turmoil and economic difficulties deserves recognition as an important contribution to the advancement of peaceful political processes in their country and in the region as a whole.

Guatemala this month began a campaign that is to lead to constitutionally-mandated presidential elections next March. All of Guatemala's friends hope the campaign will evolve in a climate free of violence and contribute to the resolution of Guatemala's serious problems.

In all of Central America, only Nicaragua has no elections scheduled in the months ahead. The government has reneged on its promises to the people who overthrew Somoza two years ago, and has said only that elections may be possible sometime in the future—maybe in 1985. What an extraordinary contrast between this clear lack of self-confidence on the part of the new revolutionary rulers of Nicaragua, and the invitation from the embattled Salvadoran revolutionary junta to the political parties of El Salvador to organize for free elections.

As basic expressions of self-determination and national sovereignty, elections involve many delicate questions. They include technical matters (such as steps to ensure an accurate tally), confidence-building measures (such as providing witness of fairness and absence of coercion or intimidation from any source), and a host of fundamental matters such as the design of institutions, security for participants, and assurances that the results will be respected.

But one asks: can a campaign be held in El Salvador? There are some recent indications it can. Two months ago the leading peasant union, the UCS, held a rally of 10,000 people without incident. A month ago, the Christian Democratic Party held a National Congress, with 2,500 delegates many of them women, in attendance. The electoral commission has made it clear it welcomes observers "not only for the day of elections, but also in anticipation of them, observing the entire process."

Nonetheless, before elections could take place, all parties would want to know how campaign security will be assured, and whether extremists might ultimately permit an actual election campaign without violence.

If elections are held, would the results be respected? The government's intentions are clear. El Salvador's new military leaders have made the reform process possible. An army confident that its integrity will be respected, and that elections will be fair, can also be effective in curbing violence from the right as well as from the left. But it is only realistic to recognize that extremists on both left and right still oppose elections, and that an army suspicious that its institutional integrity might not be respected could itself become a destabilizing element. In this regard, we should recognize that El Salvador's leaders will not—and should not—grant the insurgents through negotiations the share of power the rebels have not been able to win on the battlefield. But they should be—and are—willing to compete with the insurgents at the polls.

To develop a serious, reliable electoral process in El Salvador, all non-violent political groups, whatever their relationship to the current government, will have to make their views known to each other and to the Electoral Commission. This will doubtless require careful discussion and quite possibly negotiation among the parties.

Elections are quintessentially matters of internal policy. But there may be ways other nations can assist. If requested by the government of El Salvador—and desired by those involved—other countries might be invited to facilitate such contacts and discussions or negotiations on electoral issues among eligible political parties. The United States is prepared, if asked, to join others in providing good offices to assist the Salvadorans in this task, which could prove critical to the search for a political solution to the conflict.

We have no preconceived formulas. We know that elections have failed in the past. We have no illusions that the task now will be anything but difficult. But we believe that elections open to all who are willing to renounce violence and abide by the procedures of democracy can help end El Salvador's long agony.

I have one more thing to say.

That is that the search for a political solution will not succeed unless the United States sustains its assistance to El Salvador.

This spring, after their offensive revealed their lack of popular support, the Democratic Revolutionary Front thought—we know from their own documents—that negotiations should be used as a delaying tactic while the insurgents attempted to regroup militarily.

Should members of the guerrilla command believe that they can make gains by military means, no participation in elections, no meaningful negotiations, no political solutions are likely to be forthcoming. The point is not that sustained U S assistance might lead to a government military victory. It is that a political solution can only be achieved if the guerrillas realize they cannot win by force of arms.

To ensure a climate in which a political solution can take place, the limited military programs we now have should be sustained. Our economic assistance, already more than three times our military aid, must continue to offset the guerrillas' efforts to prolong the war by sabotaging the economy.

The war is a terrible ordeal for the Salvadoran people. Many thousands of persons have lost their lives. The conflict is deeply rooted in domestic Salvadoran political and socio-economic problems. But by providing arms, training, and direction to this local insurgency and by giving it global propaganda backing, Cuba and other radicals have intensified and widened the conflict, and greatly increased the suffering of the Salvadoran people.

Our concern for El Salvador is not unique. The United States has met challenges like this before. Since World War II, under Democratic and Republican Presidents alike, the United States has used all appropriate instruments—political, economic, and military—to help friends and allies secure their vital interests as well as our own.

Our help for El Salvador is really very small—but it is vital. With it, El Salvador is making progress. The government, the Church, the trade unions, agrarian organizations, professional bodies, and organizations of businessmen are now all increasingly engaged in seeking a peaceful outcome to the conflict. Last March, the guerrillas' use of violence led the Apostolic Administrator to comment that "most of the public has turned its back on them". Elections now offer to those among them who want to end the violence a chance to work for peace.

The culmination of the search for peace is necessarily the responsibility of Salvadorans. But Salvadorans look to us for understanding and assistance. We can help by:

Extending economic and military assistance to counter the disaster visited upon El Salvador by enemies of democracy;

Standing by our friends while they work out a democratic solution; and

Identifying and seizing opportunities to help such a solution actually take shape.

A HIGHER STANDARD OF EXCELLENCE FOR TELEVISION

Mr. PERCY. Mr. President, I recently read a by-line article by Patricia O'Brien, of Knight-Ridder newspapers, in which she comments on the recent paper poll stating that Americans get more satisfaction from watching television than from anything else except their families.

The same day, I read a recent speech given by O. B. Butler, chairman of the board and chief executive officer of the Proctor and Gamble Co., to the Academy of Television Arts and Sciences in which he tells what P. & G. intends to do "to actively seek programs of exceptional artistic quality which are truly inspirational and which challenge the very best in human nature."

In the support that the Federal, executive, and legislative branches of government offer to public broadcasting, we are doing our share to help establish a yardstick for a higher standard of excellence. Organizations like P. & G., now the Nation's largest user of television, are helping to establish a higher level of quality for commercial television.

Mr. President, I ask unanimous consent that copies of the two aforemen-

tioned pieces be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

HAS TV TURNED US INTO A NATION OF BYSTANDERS?

(By Patricia O'Brien)

It's time to acknowledge something depressing about the millions of television screens mesmerizing us every night: As a nation, we are really hooked.

According to a recent Roper poll, Americans get more satisfaction from watching television than from anything else except their families.

That finding is worth a moment of silence, if only we could bring ourselves to turn down the volume and think about it.

The Roper people listed 15 of the everyday pleasures of life and asked a scientific sample of 2,000 adults to rank them according to what gives them the most personal satisfaction or enjoyment day in and day out. The choices included many of the things that add a little spice and flavor to life.

In order, after family and television, Americans said they enjoyed spending time with friends, listening to music, reading, their homes, their work, radio, socializing, good food, hobbies, their cars, exercise, following sports and their clothes.

The choices were offered to appeal to as many people as possible. Nothing, it seems, is quite as much fun as settling in for an evening with "The Dukes of Hazzard" or Merv Griffin.

"It isn't surprising," said Shirley Wilkins of the Roper Organization. "Just remember that the median amount of time American adults spend watching TV is two hours and 55 minutes a day—at least that's what they admit to."

Perhaps that makes it reasonable, but it doesn't make it less depressing. We apparently prefer, say, the jokes of Johnny Carson to the splendor of Mozart, or to hoisting a few beers with friends, or to taking in a good football game.

Some of the reasons for TV fixation are easy to understand. More of us are living alone, and television has a powerful appeal for lonely people. Also, we move around a lot, and our ties to friends may be looser than our ties to the television set.

It is hard to accept the image of a nation of men and women looking to television for its primary comfort and diversion. It colors us so gray.

If this attachment were primarily an escape from the gloomy realities of the economy, it would make some sense. After all, our parents and grandparents buried themselves in the glamorous world of movies during the Depression years. They needed a taste of fantasy and something to make them laugh.

We are different. We aren't headed off for the Bijou Theater once or twice a week to forget our troubles. We are shortcutting our need for new experiences and fresh ideas and dreams by sitting for hours in front of an electronic box that churns out mush: pre-digested points of view, sound tracks to cue our laughter, and endless violence to give us thrills.

Maybe the problems of the world and our lives have gotten so dreary, we prefer being bystanders. Maybe all our traditional get-up-and-go is played out. Maybe television has become the equivalent of curling up in a blanket and sucking one's thumb.

"What compels you (Americans) to stare, night after night, at all the glittering hokum that has been deliberately put together for you?" a puzzled author, J. B. Priestley, once asked.

That was in 1947. He should see us now.

TELEVISION CAN SHOW AND TELL BUT CAN IT LISTEN?

STATEMENT FROM O. B. BUTLER, CHAIRMAN, THE PROCTER AND GAMBLE COMPANY

Officers, members and friends of the Academy, and guests—good afternoon.

The opportunity which I have today fulfills a fantasy which I believe I share with every American beyond the age of six or seven. Every one of us has at some time or another tried to talk back to the television screen and have been frustrated because we knew it wasn't listening. For the first time, I'm going to have a chance to truly talk to all of you creative people who conceive, bring to life, and broadcast the thousands and thousands of hours of programing that appear every year. The challenge which you face staggers the imagination of a layman. The demands of television could in a single year easily consume all of the great literature created in the five centuries preceding this one. Given the size and insatiability of the appetite, probably the single most remarkable thing about the material available on commercial television is that so much of it is so very good.

If television were nothing more than an occasional entertainment medium, if it were nothing more than a carrier of commercial messages, I would not be here today or, if I were, the subject of my discussion would certainly be different. The fact is, as all of you know, that television not only entertains and informs, but, in the process of entertaining and informing, it plays a major role in shaping the future of our society. Generations of Americans not only learned to read from McGuffey's Readers, but they also learned that thrift, honesty, and hard work were virtues and that extravagance, cheating, and laziness were vices. Generations of Americans are being taught far more powerfully about virtues and vices, about morality, about society and individual responsibility by the things they watch on television, the things which you create and produce. There is a large, serious and increasingly vocal segment of our population who believe that much of what you are teaching is destructive, that it tears at the character which enabled this country to become what it has become, and there are many, including myself, who believe that what this country has become, with all its faults, is the finest society yet built by mankind.

My purpose in being here today is to try to help you understand how I as an individual, Procter & Gamble as a company, and Procter & Gamble as an advertiser view this phenomenon—that is, how we feel about censorship, how we feel about boycotts, and how we feel about the Coalition for Better Television and its member groups.

The Coalition, as you know, has been monitoring television programs to establish ratings based on the incidence of sex, violence, and profanity, and for overall constructive value. One of the highly publicized and controversial aspects of their plan is their intent to organize a boycott of sponsors whose commercials appear on the most offensive shows.

I am sorry they chose that particular method. In the long run, I think the problem which they, and we, believe exists must be solved by mutual understanding and not by confrontation. On the other hand, the Coalition may well believe that this was the only way they could ever get very many people to listen.

The threat of boycott in and of itself cannot become the basis for our selection of programming. My first experience with the threat of a boycott came in the Spring of 1952, and it was pretty emotional. I had just returned from a year in Korea, having, with my wife's support, voluntarily left her and two very young children, as well as a career, to go off to Southeast Asia and physically oppose the attempt to expand Communism by force of arms. I wasn't in a mood to take lessons on patriotism from anybody, and I didn't have much sympathy with one of my biggest customers who told me he was going to boycott our products because we had, in his words, "dirty little Communist writers and actors crawling all over our television shows." I told him politely what he could do with his business, and I took great pride in our Company's refusal to bow to the threatened boycotts.

My next experience with a boycott is more relevant to the current issue, and it was a beauty. In March, 1977, I returned to the office from a trip and found a letter from the Vice President-Advertising advising me that we had bought first-run television rights to a film called Jesus of Nazareth and that he, incidentally, had left the country on a business trip. It was only later that day that I learned that the previous sponsor had withdrawn from the show after receiving over 13,000 complaints and threats from people who had never seen the show, but were reacting to rumors about the program's content. The complaints were at that time continuing to arrive at the rate of about 1,000 a day, and when the news broke that we had picked up sponsorship, the threats were directed at us. In the next ten days, we received threats of boycott, threats of picketing stores which carried our products, and even threats from a bank officer that he would encourage shareholders to sell our stock. We received more complaints in those ten days preceding the airing of that TV show than we had received on all our television programs during the entire preceding year.

We take these kinds of complaints very seriously and we listen very carefully. Our media people had, of course, seen advance tapes of the film before agreeing to take full sponsorship. Nevertheless, we had the tape transmitted to Cincinnati and I, along with a number of other officers, viewed the film. We made arrangements for responsible leaders from the Protestant, Catholic, Jewish, and Moslem religions to preview the film. We and they concluded that it was high quality programming. It fit very well with our standards of good taste. We determined therefore that we could not withdraw sponsorship, regardless of the threats and regardless of whether the threats might in fact be carried out.

This conclusion grows out of a simple conviction, and it applies to both of the examples I cited. We must be responsible for the programming which we support through our sponsorship, and we must be responsible for the environment in which our commercials appear. We cannot abdicate that responsibility by turning it over to any group, no matter how highly motivated they may be.

I have just told you what we haven't done and what we won't do, but if I were to stop here, I would leave you with a very false impression of both our attitude and our behavior, because while we stand very firm in the conviction that we must not let our programming decisions be made by threats of boycott, we have simultaneously made an intense effort to listen very carefully to what the vocal critics, as well as the general public have to say about the kind of television programs we sponsor.

Going back to the Jesus of Nazareth example, we did go ahead with sponsorship, but we also previewed the film for a group

of our employees who would answer telephone calls and letters. We developed a list of clergy from a variety of denominations who had previewed the film and who volunteered to take calls from members of their denominations if we referred them. In other words, we listened to the critics carefully, we took their concerns seriously, and we went to great pains to explain why we had made the decision we did. This is completely in keeping with our day-in and day-out approach to the public, virtually every one of whom is a consumer of one or more of our products. We like to listen; we think it is good business. We think it is such good business that we not only print our name and address on virtually every package of our products, but we have recently added a toll-free telephone number to encourage consumers to tell us about their questions or their complaints.

Beyond these voluntary contacts, we make hundreds of thousands of calls every year on our own initiative to find out what consumers think about our products and our advertising. We get Nielsen shares for our products just as the networks get Nielsen shares for your products, but we don't think that is enough. Nielsen shares, at best, only tell us what the public did; they don't tell us why, they don't tell us how they felt about their decision, and they don't tell us much about what they are likely to do next.

Don't you agree that it might be equally valuable for your industry to look beyond the Nielsens, and to conduct regular and thorough research into the question of what the public really wants in television programming? I suspect that you will find, as we have, that careful and thoughtful listening, particularly to your critics, can be a valuable marketing asset. Complaints and criticism, if looked on as a productive force can help improve current programs, and identify new opportunities which will assist your industry during the development of cable, pay cable, and other new media. Listening to critics isn't going to diminish anyone's First Amendment freedoms. It should stimulate, rather than stifle, creativity.

And this brings me to what is presently the most vocal critic of television programming—the Coalition for Better Television—which includes Reverend Wildmon's National Federation for Decency, Reverend Falwell's Moral Majority, and nearly 400 other groups.

Technically, we don't agree with the research techniques which the Coalition uses for the rating of programs and for the rating of advertisers. We think the system is capable of producing some wrong answers. We cannot agree with a rating system which treats all incidents of sex and violence the same, whether they are essential to an important story, such as the violence in "Holocaust" or "Roots," or whether they are purely gratuitous "jiggle" and unnecessarily bloodthirsty violence. I believe deeply that the context and the treatment of the material must be considered in reaching a judgment as to whether or not a program is suitable.

Despite this concern about the technique, we think the Coalition is expressing some very important and broadly held views about gratuitous sex, violence, and profanity. I can assure you that we are listening very carefully to what they say, and I urge you do the same. I can't help wondering how many of you have personally listened to Reverend Wildmon or Reverend Falwell. Certainly they and their constituents have spent a lot of hours watching and listening to what you produce wouldn't you be better served by listening first-hand to what they are saying instead of reacting to a second or third-hand, and probably false, understanding of these people and their message?

For example, while we don't agree with their method of establishing ratings, the fact is that their list of the top ten sex-oriented programs includes seven programs which we had previously decided either to avoid entirely, or schedule only rarely, because of the difficulty of finding episodes which are consistent with our guidelines governing excessive and gratuitous sex. We review every program on which we schedule advertising, and even beyond the Coalition's list, we find it necessary to withdraw sponsorships periodically because of offensive program content. You may be interested to know that during this television year, we have withdrawn sponsorship from over 50 programs, including movies, for reasons of taste. In short, the Coalition is not alone in their concern.

This is not to say that we won't tackle controversial programs. We have been proud sponsors of White Shadow, which has dealt with any number of difficult and controversial subjects. Last year, we were taken severely to task by the National Federation for Decency under a headline entitled "CBS, P&G promotion sex between teacher and student." We are perfectly willing to defend our sponsorship of that program and even that episode, and we have done so. What we can't defend is the pre-show publicity which included ads placed without our knowledge and featuring the headline "Teacher Seduces Student."

The fact is that much of the problem which television now faces may grow out of the kind of promotional materials cited in a recent Federation newsletter. For example:

For: Quincy—"Politics and sweet seduction"; One Day at a Time—"What's a little love between business partners"; Women Who Rate a 10—"Sexy super ladies who stack up"; Lobo—"Blackmail in a sex clinic"; and White Shadow—"His girlfriend is young, pretty and pregnant".

Those aren't Reverend Wildmon's headlines . . . those are yours.

With headlines like these, is it any wonder that the industry is being accused of exploiting sex? Is it any wonder that a large body of our population who continue to adhere to what many of you may think of as an old-fashioned morality are offended and are determined to fight back?

You can, of course, choose to ignore or to ridicule the Coalition and its leaders, but you do so, in my opinion, at your peril. While the Coalition itself claims to represent more than five million members, there are other critics just as concerned if not currently as vocal. The National PTA, for example, Morality in Media, National Coalition on TV Violence, are but a few. Beyond these organized groups, columnists like Patrick Buchanan, George Will, and William Safire have echoed the Coalition's concern about television programming, even though they may not agree completely with its tactics. The newspaper editorials we've seen which address television programming generally support the view we share with the Coalition that too much of it is exploitive. A broadly based independent study conducted last year indicated that 64 percent of the viewers agreed with the statement that "there is too much sex on television," and 70 percent agreed "there is too much violence on television."

The public cares. Commercial television is too powerful a force in shaping the character of our society to be ignored. In this country the public, one way or another, does get its way.

I know what Procter & Gamble is going to do about it. For sound commercial reasons, we are not going to let our advertising messages appear in an environment which we think many of our potential customers will find distasteful. Beyond that, we are going to be guided by our conscience on the kind of material we sponsor. A corporation is not without personality and character and conscience. A corporation like ours has a character which is the sum of all the tens of thousands of people who have made up that corporation for more than 140 years, and our definition of the kind of media which we would support with our advertising has always involved some moral considerations.

It is completely within our character not only to screen out problem programs, but also to actively seek programs of exceptional artistic quality, which are truly inspirational and which challenge the very best in human nature. We've done this in the past, investing in such programs as the Corn Is Green with Katharine Hepburn, two Christopher Award winning shows: Son Rise: A Miracle of Love and Private Battle, and most recently, the four-hour drama: Peter and Paul. We will continue to invest in that kind of programming in the future.

Procter & Gamble has no desire to be a censor. We believe in the First Amendment. But we don't believe that means we can disregard our responsibility for the programming which we sponsor. We will not have our programming dictated by threats of boycott, but we will surely listen to those who have strong views about our programming whether they threaten boycott or not. And we stand ready to be persuaded if our standards are in fact too strict or too loose. My hope is that you will listen, too, and that you have or will devise standards in which you believe and which you can defend. We may have the best society that mankind has created, but we certainly don't yet have the best society of which mankind is capable. Certainly some part of everything we do ought to be pointed at that objective.

COMMENDATION OF SENATOR HATFIELD ON OPENING STATEMENT IN SUPPLEMENTAL APPROPRIATIONS

Mr. CRANSTON. Mr. President, some days ago, at the outset of Senate consideration of the Supplemental Appropriations and Rescissions Act of 1981 (H.R. 3512), a remarkably fine opening statement was made by the distinguished chairman of the Appropriations Committee, the senior Senator from Oregon (Mr. HATFIELD).

I commend it to any of my colleagues who may have missed it.

With his usual eloquence and skill, and with no small measure of political courage, Senator HATFIELD has urged that we scrutinize with the utmost care and thought the huge military buildup planned by this administration. He has called attention to the potentially damaging effect the large increases in defense expenditures may have on our efforts to control inflation (particularly in the light of the proposed Kemp-Roth tax cuts) and to reindustrialize our economy.

Our colleague from Oregon reminded us that the seeds of our present inflation were planted during the buildup for the Vietnam war, when our tax policy did not produce sufficient revenue to pay for our spending.

Now President Reagan insists on repeating that mistake.

The chairman of the Senate Appropriations Committee has served notice that he will apply the same careful scrutiny to future defense spending requests as his committee now applies to domestic expenditures. Coming as it does from across the aisle, those words are welcome indeed.

I commend the Senator for his words, for his sound judgment, for his courage,

and for his conscientiousness which assures us that his commitment will be kept.

SHRINERS' BURN PREVENTION CAMPAIGN

Mr. HAYAKAWA. Mr. President, about 1 million children suffer serious burns in the United States every year. The Ancient Arabic Order of the Nobles of the Mystic Shrine of North America, the Shriners, are spreading the word that prevention is the best treatment for burns.

The Shriners have organized a national "Stop Burn Injuries" (SBI) campaign for 1981 to educate children and parents about burn prevention in the home and school. Through the news media, they are discussing the many potential sources of burns including scald, flame, electrical, chemical, and contact.

SBI was launched in San Francisco by former President Gerald Ford, a Shriner, on January 10, 1981. President Ford, who is honorary cochairman of the Shrine Burn Prevention Committee, spoke during halftime at the East-West Shriners football game.

President Ford said:

> Burns claim more pre-schoolers' lives than any infectious disease. Work by Shrine medical experts has taught us all too well that the best treatment of a burn is prevention, and 75 percent of the burns that occur today are preventable.

The Shriners, renowned for their support of children's orthopedic care and burn treatment, manage a network of 18 orthopedic hospitals and 3 burn centers across the United States. The Shriners raise operating funds and provide free medical care to burned children, regardless of race, religion, or relationship to a Shriner. In California alone, 62,000 Shriners raise funds annually from circuses, parades, sports events, and many other philanthropic activities.

The Shrine's 181 local temples have organized an aggressive grassroots public education program as part of SBI, with Shrine medical experts spreading the word about burn prevention throughout U.S. cities. The Shriners are offering free literature and community presentations including elementary-level teaching materials about burn prevention.

Recently, the Shriners requested State legislatures to lend their support in focusing public attention on burn prevention. I am proud that California joined 49 other States in declaring June 28 through July 4 as "Stop Burn Injuries Week." This was a platform from which the Shriners could further educate Americans about the potential for burn injuries in places where children are active.

A recent Lou Harris poll commissioned by the Shrine revealed that only 32 percent of American parents discuss burn prevention with their children. Most parental instruction in this area concerns what to do after a burn occurs, rather than how to prevent the injury. This underlines the importance of the Shriners' efforts, and the need for us all to listen to their message and make burn prevention a priority in our own homes.

I urge citizens in every State to take advantage of the information being distributed during the SBI campaign. For 14 years, many parents have turned to the Shriners' burn centers in times of crisis when their children were seriously burned. As parents and grandparents, let us turn to them again, before a tragic burning occurs in our family. I commend the Shriners and thank them for their continued unselfish service in their burn centers and during the "Stop Burn Injuries" campaign.

DEATH OF A. B. (ABE) FENNELL

Mr. THURMOND. Mr. President, the State of South Carolina and our Nation lost a great American upon the death of A. B. "Abe" Fennell. He died on Monday, July 13, at the Veterans' Administration Hospital in Columbia, S.C.

Abe was a native of South Carolina and attended Bailey Military Institute in Greenwood. A 1928 graduate of the Citadel in Charleston, he taught school for several years after graduation, and in 1934 Abe became the first full-time sports editor of the State newspaper in Columbia. He served in that capacity until 1942, when he joined the U.S. Army. After discharge in 1946 with the rank of lieutenant colonel, Abe served in several business capacities until 1955, when he was appointed the veterans' employment representative for the Department of Labor in South Carolina. He occupied this position until he retired several years ago.

Mr. President, Abe was a strong advocate for veterans and their benefits. He was active in the American Legion and other veterans' organizations at the local, State, and national levels. In South Carolina, he was referred to as "Mr. Veteran." Abe displayed those qualities of fairness, dedication, service, and belief in the strength of America so important in meeting the real needs of those he represented and served so well.

As a past commander of the South Carolina American Legion, Abe was a national figure in American Legion circles. In 1972, he was named American Legion "Man of the Year" at the national convention. One of Abe's pet projects was the American Legion baseball program. Serving as State director of this program for 21 years, Abe saw between 15,000 and 16,000 boys participate in this worthy program.

Mr. President, Abe was a close personal friend of mine. With his death, I lost a wise counselor. To his wife, Jewell, and family, I extend my condolences at this time of sorrow, and I share with them this great loss.

Mr. President, several articles have appeared in various newspapers across South Carolina paying tribute to "Abe" Fennell. In an effort to inform my colleagues of the contribution this great American and South Carolinian made to our Nation, I ask unanimous consent that these articles be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Columbia Record, July 14, 1981]

LEGION HONOREE A. B. FENNELL DIES

A. B. Fennell, 74, of Dinwood Circle, the American Legion's 1981 South Carolina Distinguished Service Award recipient, died last night in the Veterans' Administration Hospital.

Funeral services will be held tomorrow at 10 a.m. in the Lutheran Church of the Incarnation, conducted by the Rev. Dr. George Meetze and the Rev. David Donges. Burial will be in Elmwood Cemetery.

Mr. Fennell, who won national recognition from the American Legion for his services to veterans and for his work with that organization's baseball program, was known as "Abe" to his many friends.

He was retired state veterans employment representative and had held that post since appointment by the U.S. Department of Labor in 1955. This put him in contact with South Carolinians all over the state. He was a former state commander of the American Legion in 1965.

Always interested in sports, and a former sports editor of The State newspaper, he was strongly attached, as legionnaire and enthusiast for the game, to American Legion baseball. This led him into active participation in the program, and he became the state director, a capacity in which he served for 21 years.

As in his vocation as veterans representative, his Legion baseball role associated Mr. Fennell with hundreds of boys and parents over the state, and also moved him into a position of national leadership in the operation of the program. He served as an official in 12 of the "Little World Series," which each year determine the Legion championship.

At the time of his retirement as director of the South Carolina program, he said that between 15,000 and 16,000 boys had gone through the program in the state during his 21-year involvement.

Operating the program was complicated and expensive, and Mr. Fennell was credited with exercising especial executive skill in carrying it through. He reorganized the structure, step by step, and left it in good operating form.

He was recognized at the Legion's national convention at Chicago in September 1972, when he received the "Man of the Year" award of the National Past Department State Commanders Club.

E. Roy Stone Jr. of Greenville, then the South Carolina national executive committeeman of the Legion, presented the award to Mr. Fennell, praising him as a man, legionnaire and friend of youth.

"Many youth throughout our state and nation owe their rewards in this great Legion youth experience to this man . . . for he has traveled, promoted and developed new techniques in their behalf to better this program," Stone said.

Mr. Fennell was born in Columbia, a son of J. Braxton and Louisa O. Fennell.

He attended grammar school in Columbia, Mount Pleasant Collegiate Institute, Bailey Military Institute in Greenwood and was graduated from The Citadel in 1928 with a degree in chemistry.

He taught school for many years at Brookland-Cayce High School and coached athletics there.

He also taught in Spartanburg County and at Wellford-Lyman-Tacapau High School a preparatory school in Blackstone, Va., before joining the staff of The State in 1934.

Mr. Fennell served four years in the Army during World War II, two of them in the European theater as assistant corps engineer. He retired as a lieutenant colonel in 1946.

He was active in the American Legion until

he suffered a stroke while attending a Legion function. He was past South Carolina Department commander of the Legion, past commander of Columbia Post 6, chairman of the Legion's National Preference Committee from 1966 until his death and served on numerous post, department and national committees.

He was member of the Lutheran Church of the Incarnation and past president of the Columbia Exchange Club.

Surviving are his wife, Mrs. Jewell Meetze Fennell; three sons, A. B. and Richard B. Fennell of Columbia and J. Rivers Fennell of Dallas, Texas; a brother, John B. (Jack) Fennell of Charlotte, N.C.; and eight grandchildren.

Another brother, Capt. Huss C. Fennell of the South Carolina Highway Patrol, died last year.

Memorials may be made to the American Legion Child Welfare Fund.

[From the State, July 15, 1981]

ABE FENNELL, 74, HONORED LEGIONNAIRE, DIES

A. B. Fennell, 74, of 77 Dinwood Circle, the American Legion's 1981 South Carolina Distinguished Service Award recipient, died Monday at Veterans' Administration Hospital.

Born in Columbia, he was a son of the late John Bratton and Louisa Summers Fennell.

Mr. Fennell attended grammar school in Columbia, Mount Pleasant Collegiate Institute, Bailey Military Institute in Greenwood and was graduated from The Citadel in 1928 with a degree in chemistry.

He taught school for many years at Brookland-Cayce High School and coached athletics there. He also taught in Spartanburg County and at Wellford-Lyman-Tucapau High School, a preparatory school in Blackstone, Va., before joining the staff of The State in 1934. He was the first sports editor of The State, serving in that capacity from 1938 to 1942.

Mr. Fennell, who won national recognition from the American Legion for his services to veterans and for his work with that organization's baseball program, was known as "Abe" to his many friends.

He was retired state veterans employment representative and had held that post since his appointment by the U.S. Department of Labor in 1955. This put him in contact with South Carolina residents all over the state. He was a former state commander of the American Legion in 1965.

He was strongly attached as legionnaire and enthusiast for the game to American Legion baseball. This led him into active participation in the program, and he became the state director, a capacity in which he served for 21 years.

As in his vocation as veterans representative, his Legion baseball role associated Mr. Fennell with hundreds of boys and parents over the state and also moved him into a position of national leadership in the operation of the program. He served as an official in 12 of the "Little World Series," which each year determines the Legion championship.

At the time of his retirement as director of the South Carolina program, he said that between 15,000 and 16,000 boys had gone through the program in the state during his 21-year involvement.

Operating the program was complicated and expensive, and Mr. Fennell was credited with exercising special executive skill in carrying it through. He reorganized the structure, step by step and left it in good operating form.

He was recognized at the Legion's national convention at Chicago in September 1972, when he received the "Man of the Year" award of the National Past Department State Commanders Club.

E. Roy Stone, Jr., of Greenvile, then the South Carolina national executive committeeman of the Legion, presented the award to Mr. Fennell, praising him as a man, legionnaire, and friend of youth.

"Many youth throughout our state and nation owe their rewards in this great Legion youth experience to this man . . . for he has traveled, promoted and developed new techniques in their behalf to better this program," Stone said.

Mr. Fennell served four years in the Army during World War. II, two of them in European theater as assistant corps engineer. He retired as lieutenant colonel in 1946.

He was active in the American Legion until he suffered a stroke while attending a Legion function. He was past South Carolina Department commander of the Legion, past commander of Columbia Post 6, chairman of the Legion's National Preference Committee from 1966 until his death and served on numerous post, department and national committees.

He was a member of the Lutheran Church of the Incarnation and past president of the Columbia Exchange Club.

Surviving are his widow, Mrs. Jewell Meetze Fennell; three sons, A. B. and Richard B. Fennell of Columbia and J. Rivers Fennell of Dallas, Texas; a brother, John B. (Jack) Fennell of Charlotte, N.C., and eight grandchildren.

Another brother, Capt. Huss C. Fennell of South Carolina Highway Patrol, died last year.

Services will be held at 10 a.m. today at the Lutheran Church of the Incarnation, conducted by the Rev. Dr. George Meetze and the Rev. David Donges. Burial will be in Elmwood Cemetery.

Pallbearers will be James Hamilton, Jim Sherrill, John A. Montgomery, W. C. Plowden, Jr., Alec Geiger and Milford Forrester.

The family suggests that those who wish may make memorials to the American Legion Child Welfare Fund.

Dunbar Funeral Home, Gervais Street Chapel, is in charge.

[From the Columbia Record, July 15, 1981]

RITES HELD FOR A. B. FENNELL

Funeral services for A. B. Fennell were held today at the Lutheran Church of the Incarnation, conducted by the Rev. Dr. George Meetze and the Rev. David Donges. Burial was in Elmwood Cemetery.

Pallbearers were James Hamilton, Jim Sherrill, John A. Montgomery, W. C. Plowden, Jr., Alec Geiger and Milford Forrester.

Mr. Fennell, 74, of 77 Dinwood Circle, the American Legion's 1981 South Carolina Distinguished Service Award recipient, died Monday night in the Veterans' Administration hospital.

Mr. Fennell, who won national recognition from the American Legion for his services to veterans and for his work with that organization's baseball program, was known as "Abe" to his many friends.

He was retired state veterans employment representative and had held that post since appointment by the U.S. Department of Labor in 1955.

Mr. Fennell was a former state commander of the American Legion in 1965.

He was active in the American Legion until he suffered a stroke while attending a Legion function. He was past South Carolina Department commander of the Legion, past commander of Columbia Post 6, chairman of the Legion's National Preference Committee from 1966 until his death and served on numerous post, department and national committees.

Memorials may be made to the American Legion Child Welfare Fund.

[From the State, July 16, 1981]

ABE, A.B. OR MR. FENNELL, NAME MADE NO DIFFERENCE, CALL HIM "FRIEND"

(By Bob Spear)

One of my favorite people was buried Wednesday, and I never knew his name. His real name, I mean.

A lot of people shared that dilemma, not knowing the real name of this man christened Alva Beckman Fennell. He was "A.B." to some and "Abe" to others. The important thing, though, is he was "friend" to everybody.

He was one of the genuine good guys to pass this way, and anybody who enjoyed the good fortune to cross his path is richer for the experience. Maybe he sounded gruff at times, but he had a heart as big as all outdoors.

He was, in fact, the perfect subject for a "most unforgettable character" sketch.

A graduate of The Citadel with a degree in chemistry. Teacher and coach. Athletic official. Sports editor of this newspaper. Army officer. Civil servant. A pillar in the American Legion.

Abe did a little bit of everything, and anybody who met him never forgot him. And he didn't forget you, either.

A giant of a man in both stature and deed, Abe Fennell died at age 74 Monday. His legacy of achievement is one that most would be proud to claim.

He touched many lives in many ways, and some who profited from his service never realized their benefactor.

I knew him best in his role of state director of American Legion baseball, a program he operated for 21 years in a classic labor of love. He merely developed it into one of the best in the country.

He presided over American Legion baseball in South Carolina with an iron hand. To tamper with his project guaranteed a stinging rebuke.

His guiding principle: what's best for the youngster.

Once, a coach kept his pitcher on the mound for all 16 innings of a marathon regular-season game. Too long, much too long, Abe decided.

The next year, he installed a rule limiting pitchers to 12 innings over three days. One pitcher was ruined by a coach," he said. "Durned if it's gonna happen again in South Carolina."

A Palmetto State prep football coach earned Fennell's everlasting wrath by luring his players, the heart of the state championship Legion baseball team, to the gridiron for drills prior to the baseball regionals.

Abe went to his grave believing that football coach "ruined one of the best Legion teams this state ever produced."

Abe could sound gruff, but "that's when you knew he was feeling good," says Tiny Meeh, Fennell's successor at the helm of the state Legion program. "He was straight up and down the line, and everything was fine if he was barking."

Oh, how he hated to fly. He preferred the train—"the rattler," George Rulon, national head of the Legion baseball program insists.

"I met him at the airport in Hastings, Neb., one time, and he had had a rough flight with lost baggage and everything else," remembers Rulon. "The airline's slogan was 'a better way to fly.' Abe said, 'no, what it should be is there's got to be a better way to fly.' "

Rulon and Fennell first met in 1961 at Florence on the eve of a regional tournament in Sumter.

"My commercial flight was landing and a private plane pulled out in front," Rulon says. "The pilot turned the air blue yelling at the small plane. Abe's standing there and sees the whole thing.

"I get off and he says, 'I hope our relationship gets on a better tempo than it's started.'

"Needless to say, it did. He contributed a great deal to South Carolina and he helped me a great deal. We had a very close relationship, and I'm so pleased that I got to see him earlier this month."

Fennell served on Rulon's staff in operating the American Legion World Series on many occasions.

"One clear picture I cherish is Abe at the 1965 Series in Aberdeen, S.D.," Rulon says. "The word 'South' was about the only thing familiar to him; it was really cold, and he was complaining in that gruff way of his.

"After a couple of days, he took matters into his own hands. I looked down and there he is, sitting beside the dugout with a blanket wrapped around his legs, wearing a ski jacket and a cap with the flaps down around his ears. He looked like an ice fisherman instead of an official watching a baseball game."

Another time, Fennell left the tourney site with Rulon's folding chair in the trunk of his car. Months later, Rulon visited Columbia and, loading his luggage in Abe's car, spied the missing chair.

"Forgot to return the durn thing," Abe stammered like a youngster caught with his hand in the cookie jar.

In 1966, Orangeburg hosted the Legion championship tournament and Fennell, always loyal to his friends, wanted South Carolina umpires to work the Series. Instead, the crew consisted of three of "Abe's" umps and three from the professional minor leagues.

The pros experienced rough sledding, "Abe's" men worked well.

"I told you so," Abe told Rulon afterwards.

Abe had stories to top every story.

He liked to reminisce about his days in the sports-writing profession, and perhaps his favorite involved "cutting the wire to the only telephone in the press box" one night in Newberry. "After I filed my story, of course," he would say mischievously. "But I'd paid to have that phone installed, and I couldn't help it if those other reporters didn't have one."

Just recently, he took the owners' side in the confrontation over escalating players' salaries. "How a guy batting .240 can even consider himself a major-league player is beyond me," he said. "Then, they have the nerve to want $200,000 a year. Ridiculous."

He also liked to talk about circumventing the stuffy baseball executive who said he "could not help" solve a sticky rules interpretation. "Pro ball only," the man told Abe.

"So I phoned Calvin Griffith (owner of the Minnesota Twins)," Abe said. "Calvin called the guy, put the screws on him and got what I wanted."

Abe could get what he wanted. He had friends everywhere, in every walk of life.

Maybe they didn't know his real name, but nobody could forget this giant of a man.

[From the Columbia Record, July 16, 1981]

"ABE" FENNELL

No one, it is safe to say, did more for American Legion baseball in South Carolina than A. B. "Abe" Fennell. Few could match his commitment, love and enthusiasm for the sport.

He was more than a baseball fan, however. He brought a shrewd and sound business mind to bear on Legion baseball, spreading the word and encouraging literally thousands of young South Carolinians to challenge themselves on the baseball diamond.

Abe Fennell was active in Legion affairs up until his death this week. With everything he did, he was no mere "joiner." He was an achiever, an active participant in what he believed. He believed in the American Legion and what it meant in terms of patriotism and personal initiative. His commitment to fundamental values made for a rich legacy, testament to an earthly existence lived full and well.

[From The State, July 17, 1981]

A. B. FENNELL

News of sports is a major ingredient of The State today, but it was not always so. Forty-three years ago, there were no sports pages as we know them today.

We remark upon that now because of the death Tuesday of A. B. "Abe" Fennell of Columbia. He was the first sports editor of The State. In his book, The Story of the State, the late S. L. Latimer, Jr., recorded this:

"Indeed it was not until 1938 that there was established a desk through which was channeled all sports copy and assignments. Alva Bratton Fennell was the sports editor at that time. Soon a second man was added. Gradually the staff has been increased.

"Mr. Fennell, an enthusiastic follower of athletics and a varsity football player during his Citadel days, left in 1942 to enter the war as a captain. He rose to be a lieutenant colonel. After the war, of his own accord, he did not return to newspaper work, but has kept up his interest in sports and for many years has directed American Legion junior baseball for South Carolina. In addition he is prominent on the national scene in this fine youth program."

The obituaries properly emphasized Abe Fennell's devotion to the American Legion, to veterans, to the Legion's junior baseball program which thrived under his direction. But it should also be recorded that he was a warm and loving family man, an active churchman and keeper of friendships.

He will be fondly remembered at this newspaper, however, as a former employee and its first sports editor.

THE U.S. ARMY WAR COLLEGE GRADUATION CEREMONIES

Mr. THURMOND. Mr. President, I recently had an opportunity to review a transcript of a speech delivered by the Secretary of the Army, Jack Marsh, and I found his comments both inspiring and timely. The speech was delivered before the graduating class of the U.S. Army War College at Carlisle, Pa., on June 8, 1981.

Secretary Marsh uses the 200-year anniversary of the victory of the American Army at Yorktown, an anniversary which will occur this October, to set the theme for a call for greater flexibility and creativity in military leadership and in defense planning generally. I believe his comments are worthy of the attention of Senators, and, for that purpose, I ask unanimous consent that his remarks be printed in full in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS BY HON. JOHN O. MARSH, JR.

This coming October marks the 200th Anniversary of the victory of the American Army at Yorktown. This is an event of enormous significance. I charge you with not only remembering it, but also with seeking ways to commemorate it. And it is my hope the following remarks will stimulate you in this regard.

We are at a point of unprecedented examination and discussion of military thinking. This is occurring in:

The Congress,

The Fourth Estate,

Military writers including Defense journalists and some former officers,

Proponents of Defense plans and programs who are speaking out in response to a growing Soviet threat,

Critics who attack Defense requests because of scarce resources and who speak for other forces within our society competing for a share of the Federal budget.

In this dialogue on military thinking, we should remind ourselves of the educational background of our military leaders. It is estimated the typical American officer will spend 25 percent of his time in schools. The range of Army schools is a vast one which goes from language training to communications, from transportation to medicine, from management to tactical and strategic warfare.

I think it is fair to say from the middle level officer ranks and above, the Army has one of the best educated group of leaders of any United States institution. Almost without exception, you find master's degrees in many disciplines and a growing number of Ph. D.'s from nearly every American university, in addition to attendance at one of the war colleges.

I would have to say, however, that I think there is not enough emphasis, particularly at the junior level, to train officers to communicate in the written form. It has been said the pen is mightier than the sword. I simply suggest that we must develop both of these important weapon systems.

Today, I want to give you some of my own views about military leadership. I would like to use the War Between the States as my initial frame of reference. But I would also like to direct your thinking to the American Revolution, because I think there are great lessons in American military leadership that are overlooked from that conflict. There is much we can learn from the study of such men as Washington and Greene—the latter I believe by the end of the war was our greatest field commander—Morgan and Marion, and a number of overlooked commanders of smaller commands.

We have also overlooked the sophistication, skill and enormous contribution of the American intelligence effort in that war. It is my hope by raising this point, that I will also stimulate further study on your part.

But, first, the War Between the States.

It continues to be of intense interest, appealing to a broad audience because of:

Battles and campaigns;

Leaders and soldiers;

Combat intensity and chivalry.

It was the first of the modern wars, but interest is heightened because there were two major technological innovations of great consequence. Although the nature of the tactics and force structure of the combat arms was the same as former wars, there was something dramatically new—it was the first war to employ the railroad, a transportation breakthrough which changed the movement of men, units and logistical support.

It was also a war that saw the first use of the telegraph, a device that provided a giant leap in communications from higher or more subordinate commands.

That War shows how change drives national policy and strategy, and impacts on tactics. Commanders can never overlook how new developments and innovation can drive strategy and tactics. Success will go to those commanders who adapt and incorporate change in the planning of operations and employment of their units.

Perhaps in no other field is this more certain than the military field.

Let me take you through an exercise that reflects some of my own thinking. It is an examination of leadership which I frequently use. At the outset, it is a theory which can be applied to the civilian sector, including

political leadership, as well as military leadership.

Perhaps others have made similar observations, but much of what I am about to say reflects my own thinking.

Generally speaking, I think there are two types of leadership, which for purposes of discussion, I would categorize as Creative and Doctrinal. Doctrinal might be called "Conventional."

First, let me define creative leadership. I have to do this in terms of an individual. As a general rule, the creative person is idea oriented, is more sensitive, takes great pride in his ideas, and is very imaginative; but, because of their ingrained sensitivity, their ideas and personality may have a fragility. The creative leader is more rare for reasons I have mentioned. They are more vulnerable to being rebuffed and are more easily crushed, because often ideas suggest new approaches or changes that go across the main stream.

Now the military environment is difficult for the creative leader. Of necessity, the military stresses conformity and the uniformity—the status quo. Consequently, the system can easily rebuff or squelch what appears to be dissent or non-conformity. It is important we not view new ideas as dissent. All too frequently they are, I am afraid.

The Creative Leader is the one who will rewrite doctrine, employ new weapons systems, develop new tactics, and who pushes the state of the art. As he forges ahead, he leaves it to others in future years to consolidate gains and to tie up loose ends—to build on his new doctrine. The senior creative military leader will test and exploit new ideas.

In personality, he has developed a mental toughness which enables him to survive the system. He will harbor a new concept gained as a Captain—but which was crushed or rebuffed under the system—until he is a senior commander, and then he comes forward and tries it again. Many potential creative leaders in military and civilian life do not make it through the middle level. They become casualties on the battlefield of their career. They are the walking wounded about whom others speculate as to their great potential which was never realized.

Now, let's examine the doctrinal or conventional leader.

He is the predictable, sound, sturdy leader, that follows and builds on basics. Resolute and not easily crushed, the military is a friendly environment. The conventional leader follows doctrine. He masters existing tactical concepts, exploits to the fullest available weapons systems, and prefers the tried rather than testing the new. He is thorough in execution. He capitalizes on the gains made by creative leaders. Because he plans and follows through, he leaves little to chance and avoids loose ends.

As you first consider this exercise, most people opt to be a creative leader. But I want to challenge your thinking. So now I will select several of our military greats and put them in categories, knowing full well that some of you will argue with me and differ as to the following selection process.

A Caveat—Do not let flamboyance influence whether you define a leader as being creative.

CREATIVE LEADERS

General Greene of the American Revolution, because of the way he rose from the ranks and mastered command and doctrine to emerge at the close of the war as perhaps our ablest general.

Jackson because of his outstanding Valley campaign, and his use of the railroad to shuttle troops.

Lee because of his brilliant retrograde maneuvers against overwhelming forces in the last year of the war.

Marshall—who forged a global strategy for United States forces and conceived the NATO plan for the rebuilding of Europe, defensively and economically.

MacArthur because of his broad, island hopping amphibious envelopment strategy and later his decisive surprise at Inchon.

General Billy Mitchell because of his concepts of air power.

General Howze for the development of the air mobile concept.

Two non-Americans:

1. Lord Nelson for his brilliant and sometimes unorthodox leadership at sea; and

2. Rommel for his desert warfare and use of armor.

DOCTRINAL OR CONVENTIONAL LEADERS

Washington—for his adherence to basic principles, who took loss after loss on the field, but held an army together and won the war.

Grant—for the outstanding orchestration of arms and men in a resolute strategy that produced victory.

Longstreet—sometimes criticized, but probably the most conventional of Confederate commanders.

Pershing—for the training and leadership of American forces which won the respect of foreign conventional armies.

Bradley—who mastered years of training and doctrine to build the Army of World War II.

Eisenhower—whose leadership could span both military and civilian fields to weld together forces of separate nations.

Although I have tried to avoid leaders of a more contemporary time, I would mention in the creative category General Taylor, who helped prepare the Army for the nuclear battlefield, as well as for a multi-faceted career; General Stan "Swede" Larsen, for his tactical concepts on air mobility; and General William Yarborough for his contribution to unconventional warfare. A doctrinal leader—General Abe Abrams, who I consider to be one of the most superb soldiers of recent times.

I said I could get argument on these selections, and I mentioned that many people at first would opt for creative leadership. However, I call to your attention that in the list of doctrinal leaders, there are three Presidents of the United States.

What I think this exercise points out is that the successful leader may be predisposed by natural talent toward either creative or doctrinal leadership, but invariably the greatest leaders are a blend of both, or learn to use both, although one leadership trait may dominate.

I think you will observe that the best creative leaders master fundamentals. It is from this base that they push forward to new concepts. By mastering these fundamentals, they win the confidence of their peers. Creative leaders—with certain exceptions—all use the system and work within it. On the other hand, successful doctrinal leaders—without exception—are broad gauged and open-minded enough that they do not rebuff new ideas and will take advantage of change and new systems to achieve their end. To me, Grant is a classic in this regard, and may be America's greatest doctrinal leader. In fact, you could argue that his efforts in exploiting existing resources were really creative.

You can take this exercise and extend it even further by looking at unconventional warfare and such names as Marion, Mosby and others. You can find examples where creative leaders over-reached because they did not master fundamentals. You can also find examples where doctrinal leaders were defeated because they were wedded to the old way of doing things.

To summarize, the best creative leaders use conventional forms and modes to their maximum advantage. The best doctrinal or conventional leaders are those who are receptive to change and new ideas.

Rigidity, inflexibility, and excessive parochialism can be the pariah of the would-be military commander.

As never before, military leaders must not only be well trained, but must also be well educated. Their areas of knowledge must be broad enough to give them both confidence and certainty in command, yet they still must question and stimulate inquiry into those things with which they are not familiar—things that could impact on their duties and command performance.

We need leaders who are grounded in the principles of command, yet who are responsive to new ideas; who have not only the flexibility to cope with and direct change, but the audacity to take the measured risk in order to gain victory on the battlefield.

This requires all of the forces of intelligence, competence and courage.

I am certain these qualities of human character will be found in abundance in this class, and will be reflected in your future service to your country.

Two centuries ago, on the 19th of October 1781, the British forces under Cornwallis, surrendered to the American and French forces, led by General Washington.

Yorktown was a bridge between two great ideas, two great concepts which fell almost equal distance time-wise between those two events—The Declaration of Independence with its hope of Life, Liberty and the Pursuit of Happiness, and the Constitution of the United States.

The Constitution captured and harnessed the forces of liberty into a structure of orderly Government.

As a mark of the traditional dedication the American Officers Corps has had to the concept of civilian authority, I would remind you that with the signing of the Treaty of Paris in 1783, there was only one national, viable force in the country. That was the Army.

Following the example of their Commander, the officers resigned their commissions, the Army disbanded, and returned to civilian pursuits. When the Constitution was written, authority to raise armies and spend on their behalf was clearly and unequivocally vested in the Legislative Branch.

It is interesting to note of the 39 signers of the Constitution, 22 had served in the Army.

The Congress looks to you for the leadership this Army needs. In the words of one of our greatest Commanders in Chiefs, President Lincoln, I leave you this charge:

"The dogmas of the quiet past are inadequate to the stormy present. The occasion is piled high with difficulty, and we must rise with the occasion. As our case is new, so we must think anew and act anew. We must disenthrall ourselves, and then we shall save our country."

Good luck, and Godspeed in your new assignment.

APPOINTMENT BY THE VICE PRESIDENT

The PRESIDING OFFICER (Mr. HAYAKAWA). The Chair, on behalf of the Vice President, appoints the Senator from South Dakota (Mr. PRESSLER) to attend the United Nations Conference on New and Renewable Sources of Energy, to be held in Nairobi, Kenya, August 1981.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry

nominations and a treaty which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

PRESIDENTIAL APPROVAL

A message from the President of the United States reported that on July 23, 1981, he had approved and signed the following act:

S. 1395. An act to extend the time for conducting the referendum with respect to the national marketing quota for wheat for the marketing year beginning June 1, 1982, and to eliminate the requirement that the Secretary of Agriculture waive interest on loans made on 1980 and 1981 crops of wheat and feed grains placed in the farmer-held grain reserve.

MESSAGES FROM THE HOUSE

At 12:44 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following bill, without amendment:

S. 1040. An act to amend the District of Columbia Self-Government and Governmental Reorganization Act to increase the amount authorized to be appropriated as the annual Federal payment to the District of Columbia.

The message also announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 4119. An act making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1982, and for other purposes.

ENROLLED BILL AND JOINT RESOLUTIONS SIGNED

The message further announced that the Speaker has signed the following enrolled bill and joint resolutions:

S. 1104. An act to amend the International Investment Survey Act to provide an authorization for further appropriations, to avoid unnecessary duplication of certain surveys, and for other purposes;

H.J. Res. 84. Joint resolution designating the week of October 4 through October 10, 1981, as "National Diabetes Week"; and

H.J. Res. 191. Joint resolution designating August 8, 1982, as "National Children's Day."

The enrolled bill and joint resolutions were subsequently signed by the President pro tempore (Mr. THURMOND).

ENROLLED BILL SIGNED

At 7:18 p.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the Speaker has signed the following enrolled bill:

S. 1040. An act to amend the District of Columbia Self-Government and Governmental Reorganization Act to increase the amount authorized to be appropriated as the annual Federal payment to the District of Columbia.

The enrolled bill was subsequently signed by the President pro tempore (Mr. THURMOND).

HOUSE BILL REFERRED

The following bill was read twice by unanimous consent, and referred as indicated:

H.R. 4119. An act making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1982, and for other purposes; to the Committee on Appropriations.

ENROLLED BILL AND JOINT RESOLUTION PRESENTED

The Secretary reported that on today, July 28, 1981, he had presented to the President of the United States the following enrolled bill and joint resolution:

S. 1104. An act to amend the International Investment Survey Act to provide an authorization for further appropriations, to avoid unnecessary duplication of certain surveys, and for other purposes; and

S.J. Res. 28. Joint resolution designating the week beginning March 7, 1982, as "Women's History Week".

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC–1672. A communication from the Secretary of Agriculture, transmitting, pursuant to law, notice of the delay of the submission of a report on a study to determine the potential of using agricultural exports to obtain resources needed by the United States; to the Committee on Agriculture, Nutrition, and Forestry.

EC–1673. A communication from the Assistant Secretary of the Air Force (Research, Development, and Logistics), transmitting, pursuant to law, a report with respect to converting the family housing maintenance function at Minot Air Force Base, North Dakota, and the decision that performance under contract is the most cost-effective method of accomplishment; to the Committee on Armed Services.

EC–1674. A communication from the Director of the Defense Security Assistance Agency, transmitting, pursuant to law, a report on the Department of the Army's proposed letter of offer to Saudi Arabia for defense articles estimated to cost in excess of $25 million; to the Committee on Armed Services.

EC–1675. A communication from the Director of the Defense Security Assistance Agency, transmitting, pursuant to law, a report on the Department of the Army's proposed letter of offer to Greece for defense articles estimated to cost in excess of $25 million; to the Committee on Armed Services.

EC–1676. A communication from the Secretary of the Federal Energy Regulatory Commission, transmitting, pursuant to law, a rule which provides for an exemption from incremental pricing pursuant to the Natural Gas Policy Act; to the Committee on Energy and Natural Resources.

EC–1677. A communication from the Attorney General of the United States, transmitting, pursuant to law, notice that the United States will not ask the Supreme Court to review the decision of the district court in Evans versus Schweiker; to the Committee on Finance.

EC–1678. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of legislation adopted by the Council on June 16, 1981; to the Committee on Governmental Affairs.

EC–1679. A communication from the General Counsel of the Department of Defense, transmitting a draft of proposed legislation to authorize the establishment of a Senior Cryptologic Executive Service and merit pay and awards system within the National Security Agency, and to make necessary amendments to title 5, United States Code; to the Committee on Governmental Affairs.

EC–1680. A communication from the Assistant Secretary of Energy (Management and Administration), transmitting, pursuant to law, additional information about the proposed revision of two Privacy Act systems of records; to the Committee on Governmental Affairs.

EC–1681. A communication from the Deputy Assistant Secretary of the Interior, transmitting, pursuant to law, notice of three new Privacy Act systems of records for the Department; to the Committee on Governmental Affairs.

EC–1682. A communication from the Vice Chairman of the Merit Systems Protection Board, transmitting, pursuant to law, the first annual report of the Board on the significant actions of the Office of Personnel Management for calendar year 1980; to the Committee on Governmental Affairs.

EC–1683. A communication from the Special Assistant to the Secretary of Defense, transmitting, pursuant to law, the report on Department of Defense procurement from small and other business firms for October 1980 to February 1981; to the Committee on Small Business.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM–846. A resolution adopted by the City Council of Oakland, Calif., opposing measures preempting local control; to the Committee on Banking, Housing, and Urban Affairs.

POM–347. A resolution adopted by the Board of Levee Commissioners of the Orleans Levee District, New Orleans, La., favoring legislation which will restrict the jurisdiction of the U.S. Corps of Engineers over discharge of dredged or fill material to those discharges which are into navigable waters; to the Committee on Environment and Public Works.

POM–348. A bill passed by the Legislature of the State of Oregon; to the Committee on the Judiciary:

"HOUSE BILL 3247

"Section 1. (1) The proposed amendment to the Constitution of the United States relating to the District constituting the seat of government of the United States, as set forth in this Act, hereby is ratified.

"(2) The Secretary of State shall send certified copies of this Act to the Administrator of General Services of the United States, to the presiding officer of the United States Senate and to the Speaker of the House of Representatives of the United States."

"ARTICLE

"Section 1. For purposes of representation in the Congress, election of the President and Vice President, and article V of this Constitution, the District constituting the seat of government of the United States shall be treated as though it were a State.

"Sec. 2. The exercise of the rights and powers conferred under this article shall be by the people of the District constituting the seat of government, and as shall be provided by the Congress.

"Sec. 3. The twenty-third article of amendment to the Constitution of the United States is hereby repealed.

"Sec. 4. This article shall be inoperative, unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States within seven years from the date of its submission."

EXECUTIVE REPORTS OF COMMITTEES

By Mr. PERCY, from the Committee on Foreign Relations:

William Jennings Dyess, of Alabama, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States to the Kingdom of the Netherlands.

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: William J. Dyess.

Post: Ambassador to the Netherlands.

Contributions, amount, date, and donee:

1. Self: None.

2. Spouse: None.

3. Children and spouses, Chandler (15): None.

4. Parents: Mrs. T. J. Dyess: None.

5. Grandparents: None living during reporting period.

6. Brothers and spouses: None.

7. Sisters and spouses: None.

I have listed above the names of each member of my immediate family including their spouses. I have asked each of these persons to inform me of the pertinent contributions made by them. To the best of my knowledge, the information contained in this report is complete and accurate.

WILLIAM J. DYESS.

Arthur W. Hummel, Jr., of Maryland, a Foreign Service officer of the class of career minister, to be Ambassador Extraordinary and Plenipotentiary of the United States to the People's Republic of China.

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Arthur W. Hummel, Jr.

Post: Ambassador to China.

Contributions, amount, date, and donee:

1. Self: None.

2. Spouse, Betty Lou Hummel: None.

3. Children and spouses, William and Varuni Hummel, Timothy Hummel: None.

4. Parents: Deceased.

5. Grandparents: Deceased.

6. Brothers and spouses, Sharman and Marie Hummel: None.

7. Sisters and spouses: Deceased.

I have listed above the names of each member of my immediate family including their spouses. I have asked each of these persons to inform me of the pertinent contributions made by them. To the best of my acknowledge, the information contained in this report is complete and accurate.

ARTHUR W. HUMMEL, Jr.

John Langeloth Loeb, Jr., of New York, to be Ambassador Extraordinary and Plenipotentiary of the United States to Denmark.

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: John L. Loeb, Jr.

Post: Ambassador to Denmark.

Contributions, amount, date, and donee:

1. Self, John L. Loeb, Jr., see statement.

2. Spouse: None.

3. Children and spouses, Alexandra Loeb and Nicholas M. Loeb: None.

4. Parents, John L. Loeb, Sr., and Frances Lehman Loeb, see statement.

5. Grandparents: Deceased.

6. Brothers and spouses: Arthur Lehman Loeb, see statement.

7. Sisters and spouses: James Brice/Deborah Loeb Brice: None.

Ann Loeb Bronfman and Judith Loeb Chiara. see statement.

I have listed above the names of each member of my immediate family including their spouses. I have asked each of these persons to inform me of the pertinent contributions made by them. To the best of my knowledge, the information contained in this report is complete and accurate.

Jay F. Morris, of Maryland, to be an Assistant Administrator of the Agency for International Development;

Jon D. Holstine, of Virginia, to be an Assistant Administrator of the Agency for International Development;

Francis Stephen Ruddy, of Texas, to be an Assistant Administrator of the Agency for International Development; and

W. Antoinette Ford, of Michigan, to be an Assistant Administrator of the Agency for International Development.

(The above nominations were reported from the Committee on Foreign Relations with the recommendation that they be confirmed, subject to the nominees commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

Mr. PERCY. Mr. President, I also report favorably two nomination lists in the Foreign Service which appeared in the CONGRESSIONAL RECORD on July 15 and 23, 1981, and, to save the expense of printing them on the Executive Calendar, ask unanimous consent that they lie on the Secretary's desk for the information of Senators.

The PRESIDING OFFICER. Without objection, it is so ordered.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. METZENBAUM (for himself, Mr. KENNEDY, Mr. RANDOLPH, Mr. WILLIAMS, Mr. DECONCINI, and Mr. PELL):

S. 1524. A bill to amend the National Labor Relations Act to provide that the duty bargain collectively includes bargaining with respect to retirements benefits for retired employees; to the Committee on Labor and Human Resources.

By Mr. ABDNOR (for himself, Mr. PRESSLER, Mr. EXON, and Mr. ZORINSKY):

S. 1525. A bill to direct the Army Corps of Engineers to undertake certain studies affecting waters within the States of South Dakota, Montana, and Nebraska; to the Committee on Environment and Public Works.

By Mr. NICKLES (for himself and Mr. BOREN):

S. 1526. A bill to change the name of Clayton Lake in the State of Oklahoma to Sardis Lake; to the Committee on Environment and Public Works.

By Mr. ABDNOR (for himself, Mr. PRESSLER, Mr. EXON, and Mr. ZORINSKY):

S. 1527. A bill entitled the "Coal Pipeline

Act of 1981"; to the Committee on Energy and Natural Resources.

By Mr. DOLE (for himself, Mrs. KASSEBAUM, Mr. BAUCUS, Mr. BIDEN, Mr. BURDICK, Mr. CANNON, Mr. COCHRAN, Mr. DANFORTH, Mr. HEINZ, Mr. HOLLINGS, Mr. INOUYE, Mr. LEAHY, Mr. LEVIN, Mr. LUGAR, Mr. MELCHER, Mr. MOYNIHAN, Mr. NICKLES, Mr. PELL, Mr. PRYOR, Mr. RANDOLPH, Mr. ROTH, Mr. SASSER, Mr. SCHMITT, Mr. D'AMATO, and Mr. WILLIAMS):

S.J. Res. 101. Joint resolution designating "National High School Activities Week."; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. METZENBAUM (for himself, Mr. KENNEDY, Mr. RANDOLPH, Mr. WILLIAMS, Mr. DECONCINI, and Mr. PELL):

S. 1524. A bill to amend the National Labor Relations Act to provide that the duty bargain collectively includes bargaining with respect to retirements benefits for retired employees; to the Committee on Labor and Human Resources.

RETIRED EMPLOYEE BENEFITS ACT

● Mr. METZENBAUM. Mr. President, Senators KENNEDY, RANDOLPH, WILLIAMS, PELL, DECONCINI, and RIEGLE join me in introducing the retired employee benefits act of 1981. This legislation is designed to restore to retired workers in this country their right to have their interest represented in the collective-bargaining process.

The high rate of inflation that we have experienced in recent years has taken its toll on all Americans, but for those who are retired on fixed incomes, inflation has meant a constant, losing struggle against price increases that threaten to place necessities like food, housing, medical care, and utilities beyond the reach of millions of our people.

It is a sad fact, but true, that fewer than 2 percent of those who today receive benefits from private pension plans are eligible for cost-of-living adjustments.

Until 1971, labor unions frequently raised the issue of retiree benefits at the bargaining table. In that year, however, the Supreme Court held in Allied Chemical and Alkali Workers against Pittsburgh Plate Glass that retirees cannot be considered as employees or as members of a bargaining unit as defined by the National Labor Relations Act. As a result, benefits for retired workers cannot be considered a mandatory subject of collective bargaining.

This decision placed a severe and unfair burden upon the very people whose personal sacrifices built the union movement and whose financial contributions formed the basis for today's powerful pension funds. And it has condemned thousands who contributed in good faith toward pensions during their working years to poverty during retirement.

Mr. President, this legislation does not require any increase in retiree benefits. It merely amends section 8(d) of the National Labor Relations Act in order to make retirement benefits for retired workers a legitimate subject for collective bargaining. It means that if labor brings up the subject, management must discuss those benefits. And it says that retirees may in the future have reason to hope that their legitimate interests will be represented at the bargaining table.

Mr. President, I ask unanimous consent that the text of this bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1524

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the first sentence of section 8(d) of the National Labor Relations Act is amended—

(1) by inserting after "other terms and conditions of employment" the following: ", including retirement benefits for retired employees", and

(2) by inserting after "all the terms and conditions" in paragraph (4) of the proviso the following: "(including terms and conditions relating to retirement benefits for retired employees)".●

By Mr. NICKLES (for himself and Mr. BOREN):

S. 1526. A bill to change the name of Clayton Lake in the State of Oklahoma to Sardis Lake; to the Committee on Environment and Public Works.

SARDIS LAKE

● Mr. NICKLES. Mr. President, the bill I am introducing today along with Senator BOREN is to amend the Flood Control Act of 1962 by changing the name of a lake that was authorized for construction in Pushmataha County, Okla. The original legislation refers to this new reservoir as Clayton Lake.

Ten miles from the site of the new lake is an existing Clayton Lake. Unless this change is made, there will be two lakes by the same name in Pushmataha County.

A public meeting was held by the local citizens on July 24, 1981, and requested the name change to Sardis by a vote of 322 to 1. The name "Sardis" will commemorate the village which will be partially inundated by the new reservoir.

Mr. President, I urge early consideration by my colleagues of this legislation to rename the new lake Sardis Lake. I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1526

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the lake known as Clayton Lake, which is being constructed as part of the project for the Clayton and Tuskahoma Reservoirs, Kiamichi River, Oklahoma, authorized in the Flood Control Act of 1962, shall hereafter be known and designated as "Sardis Lake". Any reference in a law, map, regulation, document, record, or other paper of the United States to Clayton Lake shall be held and considered to refer to "Sardis Lake".●

By Mr. DOLE (for himself, Mrs. KASSEBAUM, Mr. BAUCUS, Mr. BIDEN, Mr. BURDICK, Mr. CANNON, Mr. COCHRAN, Mr. DANFORTH, Mr. HEINZ, Mr. HOLLINGS, Mr. INOUYE, Mr. LEAHY, Mr. LEVIN, Mr. LUGAR, Mr. MELCHER, Mr. MOYNIHAN, Mr. NICKLES, Mr. PELL, Mr. PRYOR, Mr. RANDOLPH, Mr. ROTH, Mr. SASSER, Mr. SCHMITT, Mr. D'AMATO, and Mr. WILLIAMS):

S.J. Res. 101. Joint resolution designating "National High School Activities Week"; to the Committee on the Judiciary.

NATIONAL HIGH SCHOOL ACTIVITIES WEEK

Mr. DOLE. Mr. President, it gives me great pleasure to introduce a joint resolution designating "National High School Activities Week" this fall during the week of October 19–October 25. For months, the National Federation of State High School Associations has been making recommendations for the promotion of their activities in high schools across the country. The federation has already gained the support of the President's Council on Physical Fitness and Sports for this resolution.

IMPORTANCE OF EXTRACURRICULAR ACTIVITIES

Mr. President, I believe we all recognize the importance of a formal, academic high school education. But I still believe that experience can be the best teacher, and I am pleased to recognize the opportunities for experience offered through our high school's extracurricular programs.

For too long, too little attention has been paid to the role played by this "other half of education" in channeling the energies and talents of young people. It is the development of teenage interests outside the classroom that helps provide high school students a means of social involvement and interaction among their peers. And it is these extracurricular activities that often extend the opportunity for involvement in community affairs—an involvement that serves to instill in our youth an early sense of civic duty.

Yet perhaps the most beneficial outcome of a student's involvement in extracurricular activities is the realization that he, as an individual, can contribute to the society in which he lives. High school activities provide students a chance to exercise their talents in areas which are of special interest to them, and because they are specifically interested, they tend to do very well, even to the point of excelling.

Certain high school activities—such as forensics, dance, theater, or involvement with a student newspaper—promote skills and talents in performance of an individual nature. Others—such as athletics, debate, and participation in student government—provide opportunities for interaction and cooperation with individuals of the same age group who possess similar interests.

LEADERSHIP ROLE OF ACTIVITIES DIRECTORS

While emphasizing the importance of the activities themselves, it is also important to recognize the role that the guidance and encouragement of teachers, coaches, and program directors play in

enriching the lives of high school students. Because young people go through so many changes during this period, being a teenager is a difficult time of life. It is often a time of fragile personalities, sometimes resulting from a lack of support or reinforcement from parents and siblings.

Yet highly qualified teachers and other individuals who give so much of their time often step in to fill this void, and in the process often become friends, counselors, and even role models for the young people with whom they work and play. It is from these positions, as well as from their place in the classroom, that such leaders instill in their students the attitudes and values that will serve them throughout their lives.

I think it appropriate, therefore, that we express our appreciation to those whose commitment and dedication make such valuable extracurricular activities possible, and whose chief reward comes only from the fulfillment of witnessing the growth and development of the young people they serve.

FUTURE SUCCESS POTENTIAL OF ACTIVITIES

That growth and development was documented well in a recent article by David Harty that expressed the long-range value of these extracurricular programs in terms of the future development of high school students.

At this point, I ask unanimous consent that a portion of that article be printed in the RECORD:

There being no objection, the material was ordered printed in the RECORD, as follows:

NATIONAL HIGH SCHOOL ACTIVITIES WEEK

(By David Harty)

The American College Testing Service (ACT) conducted a study of itself, comparing the value of four factors in predicting success (measured by self-satisfaction in participation in a variety of community activities two years after college). Three of the four factors—high grades in college, high grades in high school and high scores on the ACT test—were found to have no predictive value. The only factor which could be used to predict success in later life was achievement in "extracurricular" activities. The College Entrance Examination Board's Scholastic Aptitude Test (SAT) was also examined for its accuracy in predicting how successful a person might be at a chosen career upon graduation from college. Results indicated that "the SAT's offered virtually no clue to capacity for significant intellectual or creative contributions in mature life." The study found that the best predictor for creativity in mature life was a person's performance during youth, in independent, self-sustained ventures. These youngsters who had many hobbies, interests and jobs or were active in extracurricular activities were most likely to be successful in later life. Participation in activities does make better citizens.

The "Study Report on the Cost Impact of Interscholastic Programs" presented April 6, 1979, by the Minnesota State High School League indicates in a random sampling of school districts in Minnesota that approximately 2.03 percent of the general fund budget is spent on the interscholastic program. An informal tally of several school districts in the state of Iowa, revealed that somewhere between 1.5 percent and 2 percent of the general fund budget was expended on the interscholastic program for the 1977–78 school year. School activities are a bargain.

Mr. President, I can think of few worthier causes that would deserve more public awareness than the important role that high school activities play in the lives of our Nation's teenagers. Communities themselves benefit from the involvement of students in healthful, constructive activities, and that involvement often helps those students assume positions of leadership in civic and community affairs.

With so much emphasis being placed strictly on classroom training, I believe it is time we recognized and generated a greater amount of public awareness of the value of the "other half of education." I ask the support of my colleagues in supporting this resolution.

ADDITIONAL COSPONSORS

S. 569

At the request of Mr. JEPSEN, the Senator from New Mexico (Mr. SCHMITT) was added as a cosponsor of S. 569, a bill to amend the Internal Revenue Code of 1954 to provide an investment tax credit for certain soil and water conservation expenditures.

S. 1107

At the request of Mr. SIMPSON, the Senator from Nebraska (Mr. ZORINSKY) was added as a cosponsor of S. 1107, a bill to amend certain provisions of title 28, United States Code, relating to venue in cases of a local or regional nature which involve the United States as a party.

SENATE JOINT RESOLUTION 65

At the request of Mr. PELL, the Senator from Florida (Mrs. HAWKINS) was added as a cosponsor of Senate Joint Resolution 65, a joint resolution proclaiming Raoul Wallenberg to be an honorary citizen of the United States, and requesting the President to ascertain from the Soviet Union the whereabouts of Raoul Wallenberg and to secure his return to freedom.

SENATE JOINT RESOLUTION 72

At the request of Mr. HAYAKAWA, the Senator from North Carolina (Mr. HELMS), the Senator from Idaho (Mr. MCCLURE), and the Senator from Alabama (Mr. DENTON) were added as cosponsors of Senate Joint Resolution 72, a joint resolution proposing an amendment to the Constitution of the United States with respect to proceedings and documents in the English language.

SENATE JOINT RESOLUTION 78

At the request of Mr. COCHRAN, the Senator from Virginia (Mr. HARRY F. BYRD, JR.) was added as a cosponsor of Senate Joint Resolution 78, a joint resolution to provide for the designation of October 2, 1981, as "American Enterprise Day."

SENATE JOINT RESOLUTION 93

At the request of Mr. HAYAKAWA, the Senator from Virginia (Mr. HARRY F. BYRD, JR.), the Senator from Pennsylvania (Mr. SPECTER), and the Senator from North Dakota (Mr. ANDREWS) were added as cosponsors of Senate Joint Resolution 93, a joint resolution to clarify that it is the basic policy of the Government of the United States to rely on the competitive private enterprise system to provide needed goods and services.

SENATE RESOLUTION 21

At the request of Mr. HAYAKAWA, the Senator from North Dakota (Mr. BURDICK), the Senator from New York (Mr. D'AMATO), the Senator from Nebraska (Mr. EXON), the Senator from Arizona (Mr. GOLDWATER), the Senator from Florida (Mrs. HAWKINS), the Senator from Hawaii (Mr. INOUYE), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Nevada (Mr. LAXALT), the Senator from Indiana (Mr. LUGAR), the Senator from Maine (Mr. MITCHELL), the Senator from New York (Mr. MOYNIHAN), the Senator from South Dakota (Mr. PRESSLER), the Senator from Alaska (Mr. STEVENS), the Senator from Wyoming (Mr. WALLOP), the Senator from Connecticut (Mr. WEICKER), the Senator from Nebraska (Mr. ZORINSKY), the Senator from Massachusetts (Mr. TSONGAS), and the Senator from Tennessee (Mr. BAKER) were added as cosponsors of Senate Resolution 21, a resolution to commend James duMaresq Clavell for his contributions to literature.

AMENDMENT NO. 513

At the request of Mr. MOYNIHAN, the Senator from New Jersey (Mr. WILLIAMS), the Senator from Montana (Mr. BAUCUS), and the Senator from New York (Mr. D'AMATO) were added as cosponsors of amendment No. 513 proposed to House Joint Resolution 266, a bill to provide for a temporary increase in the public debt limit.

AMENDMENTS SUBMITTED FOR PRINTING

PRICE SUPPORTS AND PRODUCTION INCENTIVES FOR FARMERS

AMENDMENT NO. 524

(Ordered to be printed and to lie on the table.)

Mr. HATFIELD submitted an amendment intended to be proposed by him to the bill (S. 884) to revise and extend programs to provide price support and production incentives for farmers to assure an abundance of food and fiber, and for other purposes.

NOTICES OF HEARINGS

SUBCOMMITTEE ON FEDERAL EXPENDITURES, RESEARCH, AND RULES

Mr. DANFORTH. Mr. President, the Subcommittee on Federal Expenditures, Research, and Rules of the Committee on Governmental Affairs will hold a hearing on Tuesday, September 15, 1981, to consider S. 719, the "Consultant Reform and Disclosure Act of 1981." The hearing is scheduled to begin at 10 a.m. in room 3302 of the Dirksen Senate Office Building.

COMMITTEE ON SMALL BUSINESS

Mr. WEICKER. Mr. President, I would like to announce for the information of the Senate and the public that the Small Business Committee will hold a full committee hearing on July 30, 1981, at 11:30 a.m., in room 424 of the Russell Senate Office Building to consider the nomination of Frank S. Swain to be Chief Coun-

sel for Advocacy of the Small Business Administration.

For additional information contact Mike Haynes, chief counsel of the committee at 244–5175, or Kim Elliott of the committee at 224–5175.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Tuesday, July 28, to hold hearings on standby oil allocations.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Wednesday, July 29, to hold a business meeting to discuss the following pending business:

First. S. 1031, to amend section 303 of the Federal Land Policy and Management Act.

Second. Committee resolution urging the Senate to return the filling of the strategic petroleum reserve to the budget at the earliest date.

Third. S. 901, to prepare and protect the Georgetown waterfront for the recreational use of the public.

Fourth. S. 1475 and S. 1512, to extend the expiration date of section 252 of the Energy Policy and Conservation Act.

Fifth. S. 146, to authorize the Secretary of the Interior to assist in the preservation of historic Camden in the State of South Carolina, and for other purposes.

Sixth. S. 187, to authorize the Secretary of the Interior to convey certain lands near Miles City, Mont.

Seventh. S. 188, to authorize the Secretary of Agriculture to convey certain lands in the Gallatin National Forest, and for other purposes.

Eighth. S. 512, to direct the Secretary of Agriculture to convey certain National Forest System lands in the State of Nevada, and for other purposes.

Ninth. S. 634, to authorize the exchange of certain lands in Idaho and Wyoming.

Tenth. S. 656, to preserve, protect and maintain the original boundary stone of the Nation's Capital.

Eleventh. S. 763, to authorize and direct the Secretary of the Interior to convey, by quitclaim deed, all right, title and interest of the United States in and to certain lands that were withdrawn or acquired for the purpose of relocating a portion of the city of American Falls out of an area flooded by the American Falls Reservoir.

Twelfth. S. 764, to provide for protection of the John Sack Cabin, Targhee National Forest in the State of Idaho.

Thirteenth. H.R. 618, an act to convey certain interests in public lands to the City of Angels, Calif.

Fourteenth. S. 794, to amend the National Trails System Act to designate the General Crook Trail in Arizona and the Beale Wagon Road in Arizona, for study to determine the feasibility and desirability of their designations as national historic trails.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Thursday, July 30, to hold hearings on standby oil allocations.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be authorized to meet during the session of the Senate on Wednesday, July 29, to hold hearings on monetary policy.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet during the session of the Senate at 8:30 a.m. on Wednesday, July 29, to hold hearings on the nomination of James Richards to be Inspector General of the Department of Energy.

The PRESIDING OFFICER. Without objection, it is so ordered.

SPECIAL COMMITTEE ON AGING

Mr. BAKER. Mr. President, I ask unanimous consent that the Special Committee on Aging be authorized to meet during the session of the Senate on Wednesday, July 29, to hold hearings on medicare reimbursement to competitive medical plans.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INDIAN AFFAIRS

Mr. BAKER. Mr. President, I ask unanimous consent that the Select Committee on Indian Affairs be authorized to meet during the session of the Senate at 10 a.m. on Wednesday, July 29, to hold a hearing on S. 792, a bill to create an institute for American Indian art and culture.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Select Committee on Indian Affairs be authorized to meet during the session of the Senate at 9:30 a.m. on Thursday, July 30, to hold hearings on S. 159, a bill dealing with Navajo BLM land exchange, and S. 1340, a bill concerning the distribution of judgments awarded the Clallam Tribe of Washington State.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE OF SMALL BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Small Business be authorized to meet during the session of the Senate on Thursday, July 30, to hold hearings on the nominations of Frank Swain to be Chief Counsel for Advocacy of the Small Business Administration.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON INTERGOVERNMENTAL RELATIONS

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Intergovernmental Relations of the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Wednesday, July 29, to hold oversight hearings on alternative service delivery.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Intergovernmental Relations of the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Thursday, July 30, to hold oversight hearings on alternative service delivery.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON ECONOMIC POLICY

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on International Economic Policy of the Committee on Foreign Relations be authorized to meet during the session of the Senate on Thursday, July 30, to hear testimony on an overview of U.S. policy toward international investment from public witnesses.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Friday, July 31, to receive a briefing by administration officials on the military situation in El Salvador.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

GAO PAPERWORK CHECKLIST NOW AVAILABLE

● Mr. DANFORTH. Mr. President, some time ago the Senate passed a rule—rule 26.11(b) to be exact—requiring committees to estimate the paperwork and privacy impact of proposed legislation. But—compliance with the rule has been perfunctory at best. On the theory that committee performance might improve if the process for doing estimates were somewhat more disciplined and if committee staffs had a better idea of where they could go for assistance, Senator CHILES and I asked the General Accounting Office to prepare a checklist to assist committees in preparing paperwork estimates.

We are pleased to announce that that guide is now complete and available from the GAO (Document Number GGD–81–76). Copies may be obtained by calling the GAO's document facility at 275–6241. We hope that committees will make good use of it.●

TESTIMONY OF SENATOR DOMENICI BEFORE THE CONSTITUTION SUBCOMMITTEE ON S. 584 AND S. 585

● Mr. DECONCINI. Mr. President, the Senate Committee on the Judiciary's Subcommittee on the Constitution has held a series of hearings recently on two bills introduced by the distinguished Senator from Utah (Senator HATCH) who is also the chairman of the subcommittee. These two bills, S. 584 and S. 585, have as their purpose the limitation of liability of local governments. Recent Supreme Court decisions have expanded that liability dramatically and it has become a cause of great concern to local government officials. Last week my distinguished friend and colleague from New Mexico (Senator DOMENICI) testified before the subcommittee and he was most eloquent in his discussion of the issues and ultimate support for the bills. As ranking minority member of the Constitution Subcommittee, I felt his testimony fairly stated the issues and offered constructive remedies, and I would like to share his thoughts with all my colleagues.

I ask that the statement of Senator DOMENICI before the Constitution Subcommittee on S. 584 and S. 585 be printed in the RECORD.

The statement follows:

STATEMENT BY SENATOR PETE V. DOMENICI

Mr. Chairman, it is a pleasure for me to appear before your subcommittee today to express my support and views with respect to the proposed amendments to 42 U.S.C. Section 1983. From the outset, my interest in this legislation stems particularly from my experience as Chairman of the City Commission and ex officio Mayor of Albuquerque, New Mexico.

Recent state and federal judicial decisions have significantly expanded beyond its intended purpose, the coverage of Section 1983 of the Civil Rights Act of 1871, 42 U.S.C. Section 1983. Specifically, in *Maine* v. *Thiboutot*, 448 U.S. 1 (1980), the Supreme Court last Term broadly construed Section 1983 to authorize suits redressing violations by state officials not only in cases of deprivation of constitutional and statutory equal rights but also with respect to rights created by *any* federal statute. In *Owen* v. *City of Independence*, 445 U.S. 622 (1980), the Court—departing from the previous strict construction of that section—broadly interpreted Section 1983 to impose strict liability on municipalities for constitutional violations rejecting any form of qualified immunity for municipalities.

Taken together, these decisions dramatically expand—without firm legal and policy support—the liability of state and local officials in such a way as to disturb the balance between the important public interests contemplated by the original legislation and the legitimate fiscal and administrative interests of state and local governments. As a former mayor, I am particularly concerned that this balance be maintained. In the face of the existing imbalance triggered by recent judicial activity, I am co-sponsoring legislation, pending in the Senate Judiciary Committee, which—while not compromising the original intent of Section 1983 to protect the constitutional and statutory equal rights of an individual—will effectively limit its reach.

The first bill, S. 584, is designed to amend Section 1983 by replacing the unqualified phrase "and laws" with more specific language "and by any law providing for equal rights of citizens or of all persons within the jurisdiction of the United States." In *Maine* v. *Thiboutot, supra*, the Court—although broadly interpreting the phrase "and laws" to include all federal laws—admitted that "legislative history does not permit a definitive answer" with respect to its construction and invited clarification from Congress. This amendment seeks to provide that clarification. It would limit the liability of local and state officials to actions clearly found to deprive citizens of rights secured by the Constitution and by those laws which provide for equal rights—not for violations of any and all federal statutes. While protecting the intended civil and constitutional rights of individuals, this amendment to Section 1983 will prevent the harassment of state and local officials which would otherwise result from the unintended broader interpretation. It will also save countless dollars for state and local governments which would otherwise be required to defray the entire burden of liability for violations of statutory "civil rights" even when federal officials are involved equally with state officials in the administration of the affected program. Absent the amendment, literally hundreds of cooperative regulatory and social welfare enactments—including management laws and grant programs—may be affected.

The second bill, S. 585, provides that municipalities and other political subdivisions of a state shall have a good faith defense, or qualified immunity, in Section 1983 actions. This amendment is responsive to the Court's misdirected decision in *Owen* v. *City of Independence, supra*, and the more recent Supreme Court decision in *City of Newport* v. *Fact Concerts, Inc.*, 49 U.S.L.W. 4860 (June 26, 1981), which admits that the "contours of municipal liability under § 1983 . . . are currently in a state of evolving definition and uncertainty." This amendment seeks to provide additional certainty with respect to municipal liability under Section 1983.

Such immunity would still leave the municipality liable for bad faith or unreasonable constitutional deprivations. It would obviate, moreover, the need for costly damage judgments to be paid for by local and state governments where officials have acted in good faith but, because of strict liability, would be held liable. Finally, it would avoid the undesirable result of strict liability for municipalities described by the dissent in *Owen* v. *City of Independence*, 445 U.S. at 658–59:

"The Court now argues that local officials might modify their actions unduly if they face personal liability under § 1983, but that they are unlikely to do so when the locality itself will be held liable. *Ante*, at 655–656. This contention denigrates the sense of responsibility of municipal officers, and misunderstands the political process. Responsible local officials will be concerned about potential judgments against their municipalities for alleged constitutional torts. Moreover, they will be accountable within the political system for subjecting the municipality to adverse judgments. *If officials must look over their shoulders at strict municipal liability for unknowable constitutional deprivations, the resulting degree of governmental paralysis will be little different from that caused by fear of personal liability.* Cf. *Wood* v. *Strickland*, 420 U.S., at 319–320; *Scheuer* v. *Rhodes*, 416 U.S., at 242." (Emphasis added.)

This amendment strikes an equitable balance between two very important considerations—the constitutional rights of individuals and the ability of local governments to serve all the people. In so doing, it attempts to meet the undesirable policy consequences which, left unchanged, the existing law will cause.

The state of the law with respect to municipal liability under Section 1983 is clearly in present need of clarification by Congress. Two additional Supreme Court decisions involving municipal liability under Section 1983, handed down last month, underscore most recently the inadequacy of a piecemeal judicial construction of this legislation of the post-Civil War reconstruction era.

In *City of Newport* v. *Fact Concerts, Inc.* 49 U.S.L.W. 4860 (June 26, 1981), the Court—after reviewing the legislative history of Section 1983—determined that Congress did not intend to abolish the doctrine of municipal immunity from punitive damages. Likewise in *Middlesex County Sewerage Authority* v. *National Sea Clammers Association*, 49 U.S.L.W. 4783 (June 25, 1981), without either party raising the issue, the Court determined that, where a State official is alleged to have violated a federal statute which provides its own comprehensive enforcement scheme, Congress intended not only to foreclose implied private actions but also to supplant any other remedy which otherwise would be available under Section 1983. While welcome, these recent decisions point up the need for clear Congressional clarification and direction with respect to Congress' original intention in passing this legislation.

Absent Congressional action, these judicial decisions, and no doubt others, will continue the uncertainty concerning interpretation of Section 1983 and severely impair the ability of local and state governments to serve the people. This it will continue to do under the mistaken "guise" of protecting the constitutional rights of individuals. I am, accordingly, urging immediate action on these two amendments to Section 1983.●

ETSI LEGISLATION

● Mr. ABDNOR. Mr. President, today our Nation faces an energy environmental dilemma as we attempt to look inward to meet our energy needs and find ourselves faced with the possibility that meeting those needs will impose irreversible scars on the face of our country. In my State of South Dakota we are acutely aware of the problem because of the energy-hungry looks attracted by the vast reserve of coal which our neighboring States of the West are fortunate to possess.

While I recognize the need for energy independence, I am also very determined that it be achieved without upsetting the delicate balance of nature that exists in many areas of the West. Two measures, Senator EXON, Senator ZORINSKY, Senator PRESSLER and I are introducing today address one aspect of this problem—the use of ground water to transport coal in a slurry pipeline. The first bill would establish new policy to govern Federal involvement in promoting such uses of ground water; and the second addresses the specific problem South Dakota, Montana, and Nebraska are facing.

Under the first bill no rights-of-way across Federal land could be granted for a coal slurry line without the approval of each State whose ground water would be affected and under which lies the aquifer to be utilized as a source of water by the proposed pipeline.

The problem with existing law is that it is not designed to deal with the present circumstances, in which water may be pumped out from under one State from wells in another State, mixed with coal, and exported 1,800 miles across several States, for the benefit of citizens

in still other States. Under present law, the Federal Government has no obligation to check with each State whose water rights may be affected, prior to participating in the approval of a coal slurry line through the granting of rights-of-way. In my view this is highly unacceptable, given that a wrong decision could be devastating to future generations in the affected areas, because the ability of land to sustain life is so dependent on the water that nurtures it.

This legislation is merely an extension of the concept on which President Reagan campaigned and has begun to institute in other areas, that is returning decisionmaking authority to the governmental entities closest to the problems and where the solutions are best understood.

The second bill relates specifically to the problem that exists in South Dakota, Wyoming, Montana, and Nebraska with respect to use of the Madison aquifer for coal slurry pipeline purposes. It would direct the Corps of Engineers, which is conducting an ongoing study of the water resources of western South Dakota, to investigate the impact of possible ground water withdrawals for slurry purposes.

The State of Wyoming has granted Energy Transportation System Inc. (ETSI) a permit to remove 20,200 acre feet per year from the Madison formation in Niobrara County, Wyo., which borders South Dakota and Nebraska. There is a lot of well-founded concern that the drawdown from the Madison will adversely affect recreational, municipal, scenic, domestic, and agricultural uses in South Dakota, Montana, and Nebraska, but none of these States had a voice in the decision to grant the water right.

The ETSI project does require a permit to cross 36 miles of Federal land and consequently must go through the Bureau of Land Management's environmental impact statement (EIS) process. But, the ETSI draft environmental impact statement (DEIS) was so inadequate that every member of the South Dakota delegation, as well as several from the Nebraska delegation, registered complaints with BLM. Due to the quantity and quality of the complains BLM decided to delay publication of the EIS for 2 months to study further the hydrology, socioeconomics, spill contingency, and the all-rail option.

This month the final EIS was publicized, but the fact that the DEIS was so inadequate as to require a 2-month delay for rewriting of several major areas further substantiates that decisions affecting whether whole counties will continue to exist on arable but semiarid land should not be made from Washington.

Chairman UDALL will be holding hearings on coal slurry legislation (H.R. 4230) before the House Interior Committee on July 30, 1981. It is my hope that the affected States review concept embodied in the legislation I am introducing today will be reflected in any legislation passed by the House or the Senate to promote the development of coal slurry pipelines.

It is my hope that this legislation wil be enacted to protect South Dakota, Montana, and Nebraska in this instance, but also any other State which happens to share an aquifer with a State where a coal slurry pipeline is being considered in the future.●

RECESS UNTIL TOMORROW AT 9 A.M.

Mr. BAKER. Mr. President, there being no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until the hour of 9 a.m. tomorrow.

The motion was agreed to and, at 10:32 p.m., the Senate recessed until tomorrow, Wednesday, July 29, 1981, at 9 a.m.

NOMINATIONS

Executive nominations received by the Senate July 28, 1981:

IN THE AIR FORCE

The following-named officer under the provisions of title 10, United States Code, section 8066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 8066, in grade as follows:

To be lieutenant general

Maj. Gen. Charles L. Donnelly, Jr., [redacted] FR, U.S. Air Force.

The following-named officer under the provisions of title 10, United States Code, section 8036, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 8066, in grade as follows:

To be lieutenant general

Maj. Gen. George D. Miller, [redacted] FR, U.S. Air Force.

DEPARTMENT OF EDUCATION

George A. Conn, of Maryland, to be Commissioner of the Rehabilitation Services Administration, vice Robert R. Humphreys, resigned.

Anne Graham, of Virginia, to be Assistant Secretary for Legislation and Public Affairs, Department of Education, vice Martha Keys.

DEPARTMENT OF LABOR

William M. Otter, of Kentucky, to be Administrator of the Wage and Hour Division, Department of Labor, vice Xavier M. Vela, resigned.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Marie P. Tolliver, of Oklahoma, to be Commissioner on Aging, vice Robert Clyde Benedict.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee on the Senate.

EXTENSIONS OF REMARKS

THE DEFENSE OF THE UNITED STATES

HON. ROBERT K. DORNAN
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. DORNAN of California. Mr. Speaker, recently the television program "CBS Reports: The Defense of the United States," has received a great deal of attention. Members and those on their staffs who missed this program when it first aired may have seen it at special screenings arranged by the Congressional Research Service.

As is the case with all CBS documentaries, "The Defense of the United States" was forcefully presented, and was at times tendentious. I submit for the RECORD a report, compiled by Accuracy In Media, which is also forceful, and which may help viewers arrive at a balanced assessment of this program.

AIM report follows:

THE CBS ATTACK ON NATIONAL DEFENSE

The debate over the ratification of the SALT II Treaty and the Soviet invasion of Afghanistan served to heighten the consciousness of the American people about the growth of Soviet military might, their willingness to use it aggressively, and our own diminished ability to defend ourselves and the free world.

A consensus quickly developed that we had to rebuild our defense capabilities, and this was one of the mandates that Ronald Reagan received when he won the election. The Reagan administration has moved quickly to carry out that mandate, but those who did so much over the years to undermine public support of military preparedness have now begun a vigorous counterattack.

CBS News is in the vanguard of this effort to destroy the new pro-defense consensus. It launched its attack with a five-part series, an hour-long program on five successive nights, beginning on June 14. This unprecedented, costly series began with a program that was designed to convince the public that there could be no such thing as a winable nuclear war. It included a dramatic simulation of the explosion of a powerful nuclear bomb on Omaha, Nebraska, followed by a discussion with two proponents of the view that the Soviets cannot be contemplating a nuclear attack on us, because they know that it would bring about their own destruction.

It concluded with a report by Walter Cronkite from Moscow, which utilized Soviet disinformation experts to convey the same message. The series had opened with a clip of Ronald Reagan saying, "Our friends and allies no longer feel they can depend on us, can trust us, and the Soviet Union has shown its contempt for us and how much it knows it now outpowers us militarily. It is time for us to start a build-up and it is time for us to build that to the point that no other nation on this earth will dare raise a hand against us, and in this way we will preserve world peace."

After five hours that was given over largely to questioning or challenging Reagan's premises and conclusions, it was not the President of the United States, but spokesmen for the Kremlin, Walter Cronkite and Dan Rather who had the last word. Walter Cronkite's message was that our relationship with the Soviet Union is dominated by "the same old fears and doubts" because we don't have a genuine dialogue. The Kremlin's message was that it is the United States, not the Soviets, that is striving for an impossible military superiority and that we are constantly trying to use force in the world, while creating fantasies about Soviet aggression. Rather put his message in a series of questions: "Do we make ourselves stronger by unquestioning faith in new weapons technologies? Will our European alliance be strengthened by a strategy that might force us to destroy Europe in order to save it? Will we increase our national security by insisting there is a way to fight a limited nuclear war without mutual destruction?"

The loaded questions suggested the negative answers that CBS obviously hoped that its viewers would reach after watching its five-hour series.

CRONKITE TRUE TO FORM

Walter Cronkite has long been in the forefront of the Big Media effort to play down the need for stronger national defense. Back in 1974, when he was asked about charges that CBS News was not reporting fairly the case put forward by those who wanted to see our defenses strengthened, Mr. Cronkite said: "There are always groups in Washington expressing views of alarm over the state of our defenses. We don't carry these stories. The story is that there are those who want to cut defense spending."

In 1979, Cronkite was interviewed by a Soviet journalist named Vitali Kobysh, who quoted the CBS anchorman as agreeing that "the Soviet threat" is probably a myth and as saying that he didn't believe in it, "in the sense that it is usually meant." Kobysh quoted the following exchange with Cronkite on this subject.

Kobysh: How can you agree with the idea that the Soviet Union menaces someone, that our people are preparing for war?

Cronkite: If you watched my program every evening for several years you must know that I never agreed with that and do not agree.

Kobysh: Then I'll put it more broadly. How can an honest person, knowing that the Soviet people lost 20 million dead during the war, believe that the USSR is preparing for war, that it might attack someone?

Cronkite: An honest person cannot believe that, and I am positive that the overwhelming majority of Americans do not believe it. But they are thoroughly muddled. They are being scared on all sides.

Kobysh: What do you think has to be done in order to establish full confidence between our peoples, to develop broad cooperation between our countries in all fields?

Cronkite: I think . . . the main thing is to dispel mutual distrust, suspicion, to be better informed and more tolerant. To the best of my ability, I work in this direction . . . I saw the legacy of the war, and I will never believe in a "Soviet threat."

Cronkite concluded with this message: "I'd like readers to know that I consider myself a friend of your country and I will do everything in my power to ensure mutual understanding between our peoples."

Cronkite later told AIM that he had been misquoted by Kobysh, but he also claimed to have lost his copy of the tape recording of the interview. Subsequently, when pressed to explain precisely how he had been misquoted, the "most trusted man in America" explained that he was thinking of the Soviet threat as meaning "an unprovoked nuclear attack" and that he might have said that the Soviet people were not preparing for nuclear war, because he drew a distinction between the people and the government.

Cronkite denied that he had suggested that anyone could divine his views in these matters by watching his program regularly, but his contribution to the "Defense of America" series was quite consistent with the views that Vitali Kobysh had attributed to him.

CRONKITE ABETS DISINFORMATION

Cronkite's assignment was to explain to America what his friends, the Russians, were up to. Were they threatening us? Were they contemplating launching a nuclear attack? Should we be concerned about their arms build-up?

To provide authoritative answers, Cronkite interviewed on camera two authoritative spokesmen for the Kremlin. The first was General Mikhail Millstein, introduced as "a leading officer in the Soviet Army for almost 40 years," in the field of military intelligence. This dialogue was aired.

Cronkite: What if the United States tried to wipe out the Soviet land-based missiles in an American first strike? What if the United States decided that a limited nuclear war was not unthinkable?

Millstein: There is now in the United States some sort of propaganda as to the possibility of such a war, and frankly, it is very dangerous, because there cannot be a nuclear conflict . . . There is a great propaganda about the possibility of a first strike against land-based missiles. In the United States they say that the Soviet Union is planning such a first strike. Well, that's all just a very dangerous way of military thinking, because they are trying to persuade people that a nuclear war is possible. No, a nuclear war is impossible.

Cronkite: But isn't it true that through the last few years the Soviet Union has been developing these missiles at a much faster rate than the United States?

Millstein: My answer is categorically not. The U.S. had in the beginning Polaris A-1, then Polaris A-2, then Polaris A-3—it is a MIRV—then Poseidon with MIRV system, then the Trident system is already going up. The land-based missiles—Minuteman I, Minuteman II, then Minuteman III.

Cronkite did not disagree with Gen. Millstein. He later told the audience that the

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

79-059 O - 85 - 47 (Vol. 127) Pt. 13

Soviets had launched an enormous missile building program after the 1962 Cuban missile crisis, but he did not note that then they had fewer than ten ICBMs capable of reaching the U.S. By 1979, they had 1,400, exceeding the 1,052 that we had accepted as a ceiling under the SALT I Treaty. In addition, they had 1,037 submarine-launched ballistic missiles compared to our 656. Cronkite did not ask Gen. Millstein why the Soviets were going all out to develop the ability to knock out all of our land-based ICBMs in a single strike. William J. Perry, the Pentagon's Director of Defense Research, said in December 1980 that the Soviets could take out over half of our land-based ICBMs and that within three years they would be able to destroy between 80 and 100 percent of these missiles.

Nor did Mr. Cronkite, or anyone else in the lengthy CBS series, raise the question of why the Soviets have spent billions of dollars on civil defense if they are operating on the assumption that nuclear war is unthinkable. Experts who have studied the Soviet civil defense preparations believe that these are intended to keep deaths to a fraction of what we would suffer in the event of a nuclear exchange. They also have elaborate defenses to protect their industries in the event of a nuclear attack, something which the U.S. has neglected to undertake.

Later Cronkite brought Millstein on again to charge that influential people in the United States do not want military parity with the Soviet Union, they want superiority. Millstein argued that superiority was impossible for the U.S. or for the Soviet Union. "It only leads to the arms race," he said, "and it's very dangerous."

Again, Cronkite did not raise the embarrassing question of the tremendous surge in Soviet weaponry over the past 15 years that has given the Warsaw Pact forces superiority over the NATO forces on land, sea and air by decisive margins in most categories. Instead of rebutting these assertions with hard statistical evidence, Cronkite put on another Kremlin witness who contended that the Soviets had merely achieved military equality with us and we interpreted that to mean that we had fallen behind them. The trouble with Americans, we were told, is that we want superiority over everyone else in the world.

Gen. Millstein is an expert at disinformation, according to Igor Glagolev, a high-level defector who knew him well at the Institute of the United States and Canada, where Millstein serves as chief of the Military and Political Department. Glagolev says this institute is under KGB control and that Millstein is a leading disinformation specialist. He says that contrary to what Millstein fed Walter Cronkite, he was actually opposed to arms control. Moreover, his statement on the impossibility of nuclear war contradicts published Soviet military doctrine on this subject.

Glagolev says that the official position on nuclear war was explained in Military Strategy, a book edited by Marshal V. D. Sokolovsky, which has gone through several editions. This book states that the Soviets can and will win a nuclear war by virtue of greater firepower. Glagolev points out that they have already achieved superiority in nuclear firepower, but in addition they are developing both anti-ballistic missile defenses and anti-space satellite defenses. Combined with the huge civil defense program, these demonstrate that what Millstein and the other disinformation experts told Cronkite is the exact opposite of the true Soviet intentions. That, of course, was what Gen. Agayants, the former head of the KGB's Disinformation Department, told his staff to do—confuse the world about the true intentions of the Soviet Union. It makes their task a great deal easier when they can get the help of Walter Cronkite and his associates at CBS News.

SOVIET AGGRESSION

Cronkite's Soviet friends had some other important ideas they wanted to implant in the minds of the CBS viewers. It was political fantasy to think that they had any aggressive intentions, according to Alexander Bobin, who was described as a speech writer for Leonid Brezhnev. He could understand our concern for the security of the oil supplies on the Persian Gulf area "Do you really believe that we will go from Afghanistan through Pakistan to the Indian Ocean?" he asked. "This is a political fantasy. The Afghan problem worries us too, and we will be solving this problem."

Walter Cronkite did not ask why it was such a fantasy to think that the Soviets might just make that move through Pakistan, once they have "solved" the Afghan problem. Nor was he so rude as to ask just what the Soviets were doing in Afghanistan in the first place.

Nor did Mr. Cronkite challenge the assertion of Vitali Zhurkin, Deputy Director of the Institute of the U.S. and Canada, that the Soviets are against the "export of revolution." They had nothing to do with the rebellion in El Salvador, Zhurkin assured us. Then Mr. Bobin added that they had no involvement in Nicaragua, nor even in Ethiopia. None of that got a rise from Walter Cronkite. He didn't visibly raise an eyebrow even when Bobin told him that the Soviets would be prepared to intervene in South Africa if there was a black uprising there and they asked for help. "We are a civilized people," said Mr. Bobin. "We are against apartheid. What would we say? No, we will not help you? Of course not."

Rather than dwell on this astonishing Soviet threat of direct intervention in strategic South Africa Mr. Cronkite immediately asked Bobin what he thought of statements by President Reagan and Secretary Haig on "the morality of Soviet leaders." Cronkite later told his viewers that the Reagan administration was telling only half the story on the Soviet Union, needlessly frightening us. Cronkite flashed on the screen two lists of 12 countries each. One supposedly showed countries in which the Soviets had made gains since 1960. The countries were Afghanistan, Angola, Cambodia, Congo, Cuba, Ethiopia, Laos, Libya, Mozambique, Syria, South Yemen and Vietnam. Missing from this list were such countries as Nicaragua, Grenada and Chad, where coups have brought pro-Soviet regimes to power, as well as many countries, such as Panama, Guyana and Tanzania, which are showing far greater respect for the Soviets than they were 20 years ago. The countries where the Soviets have lost ground, according to Cronkite, are Albania, Algeria, Bangladesh, China, Egypt, Ghana, Guinea, Indonesia, Mali, Somalia, Sudan and North Yemen. We question putting Algeria and Guinea on this list.

CRONKITE'S EXPERTS

It is a measure of the superficiality of the CBS series that much of the expert testimony presented came from people of doubtful expertise. For example, to discuss the Navy's new F-18 fighter plane, CBS called upon two young congressmen, neither one a member of the Armed Services Committee and both with anti-defense voting records. Both were critical of the plane.

To discuss Soviet nuclear strategy and military objectives, Cronkite did not call upon any distinguished scholars, dipomats or military experts. He sat down and "rapped" with the correspondents of The New York Times, The London Times, and The Washington Post in Moscow. All three revealed their lack of knowledge of Soviet diplomatic history by agreeing that the Soviets had a good record of living up to formal agreements.

However, Kevin Klose of The Washington Post did contradict Cronkite's Kremlin spokesmen on two important points. He said there was no doubt that the Soviet leadership was expansionist, and he pointed out the contradiction between their military doctrine and what they put out for public consumption (through disinformation experts such as Millstein). He said their military doctrine was that they could take Paris in three days. But the reporters had no scholarship or expertise to bring to bear on the question of Soviet nuclear strategy. Tony Austin of the New York Times was of the opinion that they would not launch a nuclear first strike, because "that takes you into the area of madness." That was as deep as that discussion went.

That, of course, was also the predetermined conclusion of the CBS series. The abundant evidence that the Soviets are trying to build a first strike capability was not even discussed in this five-hour series. In the first hour, it was dismissed as unthinkable on the grounds that the Soviets know that a nuclear exchange would result in their destruction as well as ours. But unremarked by CBS, the Soviets are proceeding with billions of dollars of expenditures that make sense only in the context of their published military doctrine that they can win a nuclear war—or a nuclear showdown. We won such a showdown when they tried to install missiles in Cuba in 1962 because we had overwhelmingly superior firepower. Their efforts to obtain that overwhelming superiority will be assisted if our media can be used to persuade the public and Congress that nothing the Soviets are doing poses a threat to our security that must be met by the increased defense expenditures proposed by the Reagan Administration. CBS News and Walter Cronkite have given that campaign valuable assistance.●

CHARLES A. CUSICK

HON. GARY A. LEE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. LEE. Mr. Speaker, colleagues, I take this occasion to share with you the loss of one of my congressional district's most respected and admired persons, Charles A. Cusick, of Auburn, N.Y.

Mr. Cusick was an attorney and for 14 years, served his friends and his community as a member of the New York State Assembly. He is survived by his wife and son, to whom we today extend our heartfelt sympathy on Mr. Cusick's passsing.

Those are the facts, simple as they may sound, but they cannot relate the full story of this man. The term "American" is most rightfully applied to the career and community value we each placed on Charles Cusick. As a member of countless organizations and community-betterment causes, his neighbors in the central New York area always knew that they had a thoughtful, caring friend available to help them in times of need. And they knew that they had a willing and amicable partner when the community had cause to celebrate. Charles Cusick was, not seldom, the reason and the moving force behind those celebrating occasions.

We will miss this American. I take this occasion today to offer my condolences and those of all my colleagues in this House who, directly or otherwise, mourn the passing of a community spirit and a leader of substantial value.●

HOW LAWS ARE MADE

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. LEHMAN. Mr. Speaker, due perhaps in part to the media explosion, the processes of our American Government are discussed more widely today than ever before. We sometimes overlook the fact that the lawmaking process, especially, is not always clearly understood by many Americans. Recently there have been a number of inquiries about just how a bill becomes a law. I would like to submit this brief summary of the process, which I hope will be helpful to all interested citizens.

How Laws Are Made

The very first provision of the Constitution of the United States creates the legislative branch by providing that, "All legislative powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and a House of Representatives."

Our laws are meant to be the expression of the desires and needs, the ideas and ideals of the American people as enacted by their representatives in the Congress: 435 in the House of Representatives, and 100 in the Senate. A bill is the form used for most legislation. Bills may originate in either the House of Representatives or the Senate. However, all spending measures (appropriations) and all bills for raising revenue (taxes) must originate in the House of Representatives.

A bill originating in the House of Representatives is designated by the letters H.R. followed by a number. A Senate bill is designated by the letter S. followed by its number. Any member of the House or Senate may introduce a bill embodying a proposed law or revision of existing laws at any time when the respective House is in session. When introduced, the bill will be entered in the Journal of the House, and the title and sponsors of it printed in the CONGRESSIONAL RECORD of that day.

Each bill introduced is assigned a number by the clerk of each House and referred to the committee having jurisdiction over the subject matter by the presiding officer, that is the Speaker of the House or the President of the Senate. Copies of the bill are printed by the Government Printing Office and made publicly available from the congressional document rooms.

THE DELIBERATIVE STAGE

Acting through its chairman, the committee decides whether a bill should be taken up by the full committee or referred to a subcommittee for its initial consideration.

The committee's deliberations are the most important stage of the legislative process. It is here that detailed study of the proposed legislation is made and where people are given the right to present their views in public hearings. When the chairman has set a date for public hearings, it is generally announced by publication in the CONGRESSIONAL RECORD.

Copies of the bill under consideration by the committee are customarily sent to the executive departments or agencies concerned with the subject matter, for their official views to be presented in writing or by oral testimony before the committee. The number of witnesses, pro and con, heard by the committee is largely dictated by the importance of the proposed legislation and the degree of public interest in it.

TESTIMONY

The transcript of the testimony taken is available for inspection in the individual committee offices. Quite frequently, depending on the importance of the subject matter, the committee hearings on a bill are printed and copies made available to the public.

After conclusion of the hearings, the committee proceeds to meet in executive sessions—sometimes referred to as "markup sessions"—to discuss the bill in detail and to consider such amendments as any member of the committee may wish to offer. Each committee has its own rules of procedure, but they generally conform to the rules of the House itself.

THE COMMITTEE REPORT

By a formal vote the committee decides whether to report favorably to the House the bill with or without amendments. A committee report must accompany the bill, setting forth the nature of the bill and reasons for the committee's approval. The report sets forth specifically the committee amendments and, in compliance with the rules of each House, indicates all changes the bill would make in existing laws. Any committee member, individually, or jointly, may file additional supplemental or minority views to accompany the majority committee report. The committee report accompanying the bill is viewed by the courts and the administrative agencies as the most important document for expressing the intent of the Congress in the proposed legislation.

THE REPORT GOES TO THE HOUSE

When a bill is reported by the committee it is placed on the appropriate calendar. The majority leadership decides how and when the bill will be considered on the floor. In general the bill is allowed to remain on the calendar for several days to enable members to become acquainted with its provisions.

In both Houses numerous measures of relatively minor importance are disposed of by unanimous consent. In the Senate, where debate is unlimited, major bills are brought up on motion of the majority leader. In the House they are called up under a privileged resolution reported from the Rules Committee, which fixes the limits of debate, and whether amendments may be offered from the floor. The Rules Committee resolution is called a rule for consideration of a bill: a closed rule if no amendments are allowed, and an open rule if amendments can be offered.

REACHING CONSENSUS

While there are distinct differences between the House and the Senate procedures, in general, a bill is debated at length with the proponents and opponents presenting their views to acquaint the membership, as well as the general public with the issues involved, for the purpose of arriving at consensus. Amendments are frequently offered to make the measure more in conformity with the judgment of the majority. In both the House and the Senate there are various parliamentary motions which may be offered to determine the sentiment of the members with respect to the bill. The measure may be postponed to some future date or referred back to the committee which reported it.

At the conclusion of general debate and the reading of the bill for amendments, the question becomes whether the House or Senate, as the case may be, will pass the bill in its final form. The CONGRESSIONAL RECORD of the day the bill is under consideration will set forth the verbatim debate on the bill, and the disposition made of such amendments as were offered.

AFTER PASSAGE

With the passage of a bill by either body, it is sent to the other House with the request that they concur. If no action has been taken on a similar measure by the receiving body, the bill is usually referred to the appropriate committee of that body for consideration. Hearings may again be held and the bill reported for floor action. On relatively minor or noncontroversial matters, the Senate or the House accepts the measure as sent to it by the other body.

If there are substantial differences between the House and Senate versions of a given bill, the measure is sent to a conference committee which is appointed by the Speaker and the President of the Senate from the ranking committee members of each body having original jurisdiction over the bill. The object of the conference committee is to adjust the differences between the two bodies and to report its agreement back to both. The report of the conference committee must be in writing and signed by those agreeing to it. It must have the signature of the majority of the conferees of each House.

CONFERENCE REPORT

The report of the conference committee cannot be amended and must be accepted or rejected by each House as it stands. If either House finds itself unable to accept the conference committee report, a further conference is usually requested.

When the bill has been agreed to in identical form by both bodies, a copy of the bill is enrolled, signed by the Speaker and the President of the Senate for presentation to the President. The bill becomes law with the President's signature of approval, or it may become a law without his signature if he does not return it with his objections to the Congress within ten days of its presentation to him.

If the President should return the bill with his objections to the originating body of the Congress, his veto may be overridden by two-thirds of both the House and Senate voting to have the bill become law, the President's objections notwithstanding. Both the President's veto message and a record of the vote of the individual Members on the motion to override are required in the constitution and set forth in the CONGRESSIONAL RECORD.

PUBLICATION

One of the important steps in the enactment of a valid law is the requirement that it shall be made known to the people who are to be bound by it. Our laws are published immediately on their enactment so that they may be known to the people.●

TAX CUT APPROACHES

HON. STAN PARRIS

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. PARRIS. Mr. Speaker, as the vote on the tax cut approaches, there have been increasing claims by some Members that the bill reported by the Ways and Means Committee is better for working people. Nothing could be further from the truth.

One of the irreversible facts of life is that to be a working person, you must first have a job. The Conable-Hance substitute, the President's bipartisan proposal, will do more for job creation than the Ways and Means bill, and it will also insure that those working taxpayers will be permanently able to keep more of what they earn.

At yesterday's hearing conducted by the House Task Force on Economic Policy, which I chair, Dr. John M. Albertine, president, American Business Conference offered an excellent statement on the effects of the bipartisan substitute on job creation.

I believe my colleagues will find Dr. Albertine's statement informative.

The statement follows:

Mr. Chairman, my name is Jack Albertine. I am President of the American Business Conference.

Mr. Chairman, there can no longer be any doubt that the economic problems confronting this Nation have assumed crisis proportions. Month after month evidence of the scope and complexity of our economic problems becomes more compelling.

After years of priming the pump, we have been forced to pump the prime rate to historic levels.

Mr. Chairman, it was not very long ago when most Americans thought that this country's economy was too strong and its political system too stable for it to experience anything like double-digit inflation rates during peace time.

It was not that long ago when most Americans thought a prime rate of 5 percent would constitute unimpeachable evidence of usury.

An unemployment rate of over 7 percent used to be thought completely unacceptable.

Our economic performance has been so dreary during recent years that many Americans have become pessimistic about the capacity of American industry to compete with the seemingly invincible industrial enterprises of our trading partners. But that pessimistic perception ignores some of the success stories of the American enterprise system.

I appear today on behalf of a group of disparate, business success stories who make up the American Business Conference. The ABC is a new organization limited to the chief executive officers of 100 of America's most successful and energetic firms. These firms have annual revenues between $25 million and $1 billion and each has grown at least 15 percent a year for the last 5 years, which means each has doubled in size during that period.

The American Business Conference is an organization of some of the winners of the American enterprise system. Last year, ABC companies had an average sales growth rate of 29 percent. Our companies grew about 33 percent faster than the top 10 performers of the fortune one hundred.

The members of the ABC, whose firms are located in all parts of the Nation and represent the full spectrum of American commerce, have joined the ABC because they believe that they have gained some valuable insights from having succeeded in business during a period not favorable to economic growth. They want to use the ABC as a vehicle to transmit those ideas to policymakers and the American people so that the number of business success stories will grow exponentially during the last part of this century.

Mr. Chairman, the members of the American Business Conference have endorsed and reaffirmed on three separate occasions their unequivocal support for the entire economic program constructed by the administration and its Republican and Democratic allies in the Congress.

They support the bipartisan Hance-Conable tax proposal because it is designed to improve the entrepreneurial climate during the last 20 years of a century that began with a strong entrepreneurial spirit.

They believe that inflation has eroded the incentive structure of our economy. That is why they support this administration's attempt through Hance-Conable to systematically reduce marginal tax rates.

For 40 years, the thrust of tax policy in this country has been to maintain a structure of high nominal tax rates. For 40 years, the thrust of tax policy in this country has been to sacrifice economic growth—which is most important to disadvantaged Americans attempting to climb their way out of poverty—on the altar of some tax expert's version of tax equity.

The result has been a miserable productivity performance which has diminished our ability to compete successfully in the markets of the world—including the world's largest and most accessible market, the United States of America. That has meant the export of jobs disadvantaged Americans, in particular, cannot affort to lose.

The American Business Conference supports Hance-Conable because it reverses the historic tax policy of keeping nominal tax rates high for the average American while more fortunate Americans hire skilled lawyers and accountants to construct ingenious ways to get them out from under these high rates. By lowering all tax rates substantially across the board, Hance-Conable will permit our market system to more efficiently and effectively allocate this Nation's scarce resources. That will improve productivity and increase the number of jobs created per buck invested in the American economy.

Mr. Chairman, oscillations and gyrations of Federal economic policy are perhaps as damaging to economic growth as a consistently bad economic policy. Business needs to know what the rules are if it is going to plan its use of economic and physical resources wisely. A 3-year tax bill is better than a 2-year tax bill because it gives business one-third more planning flexibility. Better business planning will inevitably mean greater economic productivity for the economy as a whole.

And make no mistake about it, a 3-year tax bill with a trigger for the third year is a 2-year tax bill for business planning purposes. Serious business planners will simply not take seriously the trigger included in the bill passed by the Ways and Means Committee.

Mr. Chairman, the bill proposed by the Ways and Means Committee contains many features which would be good for many of the businesses of the American Business Conference. But the test our organization uses to judge the efficacy of competing pieces of economic legislation is much broader than a narrow standard of what is best for us in the first approximation.

We want to know which bill will improve most the performance of our economy. Which bill will increase economic growth at the fastest rate? Which bill will create the most jobs for disadvantaged Americans? Which bill will improve most our productivity performance which is the key to increasing the standard of living for the average working American? Which bill will end the process of force-feeding demand and starving supply which has created the imbalance in the American economy which has lead to declining productivity and inflation?

Mr. Chairman, last Thursday the 12 CEO's who constitute our task force on capital formation/taxes came to Washington to personally tell many Members of the Congress that we support the bipartisan Hance-Conable bill because it successfully meets the broader test our organization has established in deciding which tax bill we ought to support.

Mr. Chairman, we can no longer afford to hang onto the heavy baggage of old economic theories as we try to tackle the complex problems facing our economy today. We need new ideas. We need new approaches that deal with today's reality. The members of the American Business Conference believe that Hance-Conable and the entire economic program outlined by the administration does represent a new beginning for new ideas in Washington.●

A MAN FOR ALL SEASONS—LEON L. MILLER

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. STARK. Mr. Speaker, I would like to take this opportunity to recognize an individual whose public service career has been exemplary. Leon L. Miller is truly a man for all seasons.

Each step in his career has been a highlight. He served as chief of the bureau of consultative services, Alameda County Health Care Services

Agency from 1951 to 1970, where he directed health education services for the department of health, coordinating programs for public health social workers, nutritionists, and public health representatives, as well as having responsibility for public relations and consulting to community leaders, departmental administrators, field staff, and supervisors.

Leon has left a positive mark along his career path. His life is devoted to helping others and his high energy and love of people has been beneficial to Alameda County in California. Among his other endeavors, he developed and managed his own real estate and casualty sales business, was administrative assistant to California State Senator Nicholas Petris, was a lecturer at U.C. Berkeley's Graduate School of Public Health, where he earned his M.P.H. degree.

His wartime service saw him as one of the first black flying officers commissioned by the U.S. Army Air Force during World War II.

A particular highlight of Leon's career was the development of the first areawide health plan for Los Angeles County. The plan was recognized by State and National agencies as the most innovative effort in health facilities and services. Leon's efforts resulted in the restructuring of rules by the State of California in awarding prepaid health contracts and affecting an estimated 7,073,000 people.

Pacific Economic Resources League, Inc., based in downtown Oakland, Calif., was founded and is currently under the directorship of Leon Miller. PERL provides management and technical assistance to small and minority businesses and has contributed immensely to Oakland's economic development.

Leon Miller has worked tirelessly in Alameda County and I am honored to call his contributions to the attention of my colleagues. He is a rare individual with wit, charm, and sensitivity. We will continue to rely on his expertise and positive efforts as a model for all to follow.●

SOCIAL SECURITY BENEFITS

HON. ALBERT LEE SMITH, JR.

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. SMITH of Alabama. Mr. Speaker, I rise today to urge my colleagues to put aside partisan politics and work together while there is time to save social security benefits working Americans have earned.

To say that social security is in deep trouble is to put the matter mildly. The system is broke and it is misleading to let our citizens think otherwise. The system is billions and billions of dollars in debt and right now the retirement system does not have enough money to pay benefits after mid-1982.

If ever there was a time and need for Congress to work together, social security is it. Rather than exploit our Nation's elderly by playing retirement roulette, we must work together to protect the basic retirement benefit structure and make sure the social security system does not run out of money next year or the year after or in the future.

Several plans have been offered to rescue old age, survivors, and disability insurance. While I have not endorsed any specific plan and will not until I have the opportunity to carefully research the proposals put forward and discuss them with my constituents, there are several points which I consider nonnegotiable, items which I ask you to keep in mind as we seek to strengthen the social security system.

First, social security benefits must never be taxed.

Second, the retirement age for full benefits should not be raised above 65.

It would be unconscionable to pull out the rug from under those who have spent a lifetime contributing to the system. To deny men and women approaching retirement benefits on which they have planned and to which they are entitled is unethical.

Third, Congress should repeal the so-called earnings limitation test which penalizes senior citizens who choose to work past the age of 65. Retirees up to age 72 now lose $1 of social security income for every $2 they earn above $5,500. This is unfair. Social security is not Congress money. It belongs to the 36 million elderly Americans who have earned it and allowed Uncle Sam to use it until their retirement without interest.

Fourth, Congress must not eliminate the annual cost-of-living increase that helps retirees keep pace with inflation. It is imperative that elderly retirees now on social security—as well as future retirees—remain eligible for cost-of-living increases.

Fifth, Congress should enforce existing laws that would weed out the $60 million each year in social security benefits that now go to thousands of prison inmates across the country to subsidize drug trafficking, gambling, and other underground prison activities.

Finally, any changes must be phased in gradually to allow workers to plan for their retirement. We must avoid abrupt and unnecessary restructuring of basic benefits. Major changes must be phased in gradually to give workers time and the opportunity to adjust to those changes.

We face the most serious crisis in the 46-year history of our social security system. The question before Congress is whether the 36 million Americans who currently depend on social security can count on receiving any check at all in less than 1 year from now. Unless changes are made—and made soon—there will not be any benefits for those retiring in the future and those now receiving benefits are going to lose them completely.

If ever there was a time for Congress to work together, this is it. We have a responsibility to the millions of Americans who in good faith have contributed to social security to insure the short-term and long-term solvency of it. I pledge to vigorously work to strengthen the social security system and to protect those benefits working Americans have earned.●

INDEXING OF FEDERAL INCOME TAXES

HON. DOUGLAS K. BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. BEREUTER. Mr. Speaker, I rise today to reiterate my longstanding support for the indexing of personal Federal income taxes. As a cosponsor of a tax indexing proposal for the past 3 years, I was very pleased to see the President include this concept in his latest tax proposal. I agree with the editorial viewpoint of the Lincoln Sunday Journal & Star in my district, which said indexing is an idea whose time has finally come.

Under our current tax structure, nonstop inflation drives taxpayers into higher and higher tax brackets. In an informative article on the matter, the Omaha World-Herald noted that this often leaves the worker with a net loss in real income despite frequent pay raises. It also leaves the Government with extra income to spend, discouraging the fiscal restraint that is so necessary as we face our Nation's economic problems.

I believe indexing would produce a simpler, more equitable tax system and reduce inflation by discouraging Federal spending and encouraging workers to demand smaller wage increases. It is essential that indexing, "truth in taxation," as embodied in the Conable-Hance substitute tax bill, be enacted into law to begin in 1985.●

ABA URGES HANDGUN CONTROL

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. RODINO. Mr. Speaker, for many years I have advocated Federal action to help State and local law enforcement officials halt the rising handgun violence that claims the lives of over 10,000 Americans each year.

The American Bar Association in June voiced its opinion that the Federal Government should take a more active role in helping to prevent handgun violence, and it made specific policy recommendations for handgun control to the Attorney General's Task Force on Violent Crime.

It is encouraging to me that the ABA has taken the time and effort to analyze the crime issue that is on the minds of all Americans. I am hopeful that the Attorney General and his task force will seriously consider the ABA's recommendations for handgun control.

I urge my colleagues to read the following ABA statement as it was submitted to the Attorney General's Task Force on Violent Crime.

STATEMENT OF THE AMERICAN BAR ASSOCIATION CONCERNING CONTROL OF CRIMES COMMITTED WITH HANDGUNS

The American Bar Association welcomes the opportunity to submit comments to the Attorney General's Violent Crime Task Force on the tragic and deadly problem of violent crimes committed with handguns. The ABA has passed resolutions since 1965 urging that the federal government take action to reduce the rate of crimes committed by handguns. Today the ABA strongly recommends, consistent with its longstanding policies, that the Attorney General emphatically urge (1) that his department be given resources to investigate and prosecute crimes committed with handguns; and (2) that certain provisions of the recently introduced Handgun Crime Control Act of 1981 be enacted without delay.

THE ATTORNEY GENERAL IS THE CHIEF FEDERAL LAW ENFORCEMENT OFFICER

It is highly appropriate that the Attorney General, who is the chief federal law enforcer in the Nation, has appointed a Task Force on Violent Crime. One area where violent crime is the most deadly is violent crime involving the use of handguns. And since handguns are easily concealed, they are frequently used in the commission of crime. But the Attorney General has not been given sufficient tools in the form of either legislation or resources to enforce firearms violations, as evidenced by the ever increasing rate of crimes committed by handguns. Even the Secretary of the Treasury, with his enforcement responsibilities, lacks sufficient legislation and resources. It is absolutely crucial that the Attorney General be given the tools to fight handgun violence, which tools will not interfere with the rights of law-abiding citizens but, on the contrary, will give law-abiding citizens, including legitimate firearms owners, the right to live peaceably without fear of being victimized by sudden, deadly, handgun violence.

VIOLENT AND DEADLY CRIMES COMMITTED WITH HANDGUNS ARE INCREASING

In August 1975, the ABA recommended that adequate resources be appropriated so that federal law enforcement officials could investigate and prosecute those who commit crimes with handguns and who illegally possess handguns. The ABA also recommended that legislation be enacted to provide "effective control of the importation, sale, transportation and possession of firearms." But resources and legislation are still seriously lacking. In August 1975, the ABA "recognized the increase in serious and violent crimes committed by those in possession of handguns. . . ." Since that time there has been an even greater increase in violent crimes committed by people with handguns. One month after the ABA recommendations, President Ford was shot at with a handgun but luckily was uninjured. President Reagan was less lucky. In March 1981, he was shot and seriously injured. John Lennon was even less lucky. In 1980, he was shot and killed. In 1979 so were 10,728 other Americans.[1]

Many more Americans were terrorized by handguns. Violent crime increased by 13 percent in 1980,[2] and over 250,000 Americans were robbed, threatened or raped at gunpoint in that year alone.[3] The handgun violence rate in America is higher than in other Western countries, and its handgun control laws are the weakest. In Canada, there were 52 handgun murders.[4] In England, Scotland and Wales, there were 55 handgun deaths in 1979, of which 8 were murders.[5] In June 1981, Queen Elizabeth was shot at in England, but with a blank cartridge pistol.[6] Since it shoots only blanks, no one was injured.

CURRENT LEGISLATION IS INSUFFICIENT TO CONTROL CRIMES COMMITTED WITH HANDGUNS

Under the present federal gun control law, a person can buy a handgun from any one of 160,000 licensed handgun dealers or pawnbrokers.[7] Anyone can become a dealer by simply paying $10. (18 U.S.C. § 923(a)(3)). Under federal law a handgun purchaser need not wait after filling out a form saying he or she is not an ex-felon, drug addict, or mental incompetent before taking possession of the handgun. The handgun used to injure President Reagan was a handgun that was assembled in the United States from inexpensive imported Saturday Night Special parts and was sold by a pawnshop.

On April 9, 1981, the Handgun Crime Control Act of 1981 ("HCCA") was introduced in the Senate of the United States, S. 974, by Senator Kennedy with 8 sponsors, and in the House, H.R. 3200, by Congressman Rodino, with 50 sponsors. Many of the recommendations made by the ABA in 1975 are now contained in the HCCA. The Act would stop the manufacture, sale and transfer of "Saturday Night Specials." A handgun could not be sold unless its model had been approved by the Attorney General, who will approve only handguns suitable for sporting purposes. The ABA policy recommends banning the importation of Saturday Night Special parts (to close a loophole in current federal legislation), and ABA policy recommends enacting a definition of sporting purposes, which could be expanded by the Secretary of the Treasury, to limit the types of handguns that can be sold. (The HCCA of 1981 would transfer handgun enforcement activities from the Department of the Treasury to the Department of Justice. Although the ABA recommendations do not address that specific suggestion, it is not inconsistent with ABA policy, which recommends adequate appropriations for both prosecutive and investigative federal law enforcement officials, and also recommends that priority be given to prosecution of firearms offenses. Adequate enforcement of violence control legislation is crucial to the control of violence.)

Under the HCCA, a waiting period between ordering and receiving a handgun would be required, and local police and the Federal Bureau of Investigation would determine that a potential handgun purchaser not be a convicted felon, an adjudicated mental incompetent, a drug addict, an illegal alien or a person who renounced United States citizenship. Handgun manufacturers and dealers would maintain records on purchasers and later transactions so that handguns could be traced. (Proposed 18 U.S.C. § 929(e)(5)). This is consistent with sections of the ABA policy, which would not only impose a waiting period so that the identity of a potential purchaser could be checked, but would also require periodic reviews of the eligibility of handgun owners consistent with due process.

The HCCA would require all persons in control of handguns to report their theft or loss and would require the premises of licensees to be secure. (Proposed 18 U.S.C. § 922(p)). ABA policy recommends those obligations be required of dealers, manufacturers, importers and transporters of firearms. The ABA has formulated no policy on the responsibilities of handgun owners, and thus expresses no position at this time on that issue.

HCCA also would impose more stringent requirements for licensing dealers, as the ABA has strongly recommended.[8]

The ABA strongly recommends that the Task Force on Violent Crime develop legislation to incorporate the provisions described above and seek adequate resources for the enforcement of existing and future violence control legislation.

CURRENT FIREARMS LAW MUST NOT BE WEAKENED

In 1965, the ABA passed a resolution recommending firearms control legislation. The Gun Control Act of 1968 tracked many points in the ABA's recommendation. As subsequent ABA recommendations have indicated, that legislation is necessary but not sufficient in controlling crimes committed by people using handguns. The 1968 Act prohibits convicted felons, fugitives, drug addicts and adjudicated mental defectives from acquiring firearms. (18 U.S.C. § 922(h)). It prohibits interstate trafficking of firearms except by licensed dealers. (18 U.S.C. § 922(a)). Incredibly, the 1981 McClure-Volkmer legislation (S. 1030 and H.R. 3300) has been introduced to weaken this legislation. The bills would weaken existing controls on illegal transfers of firearms, would severely undermine state laws governing firearms, would reduce penalties for federal firearms law violators, would make it easier for convicted felons to obtain firearms and would weaken enforcement for

[6] The alleged assailant is being charged under the Treason Act for an offense carrying a maximum penalty of 7 years. He is not being charged with illegal possession of a firearm, which carries a maximum penalty of 14 years in England.

[7] Bureau of Alcohol, Tobacco and Firearms Statistics.

[8] The HCCA also has some features on which the ABA has no policy statement. Those features are not inconsistent with the ABA's policies, but the ABA takes no stance on them at present.

While the ABA favors stiff penalties for those who commit crimes with or in possession of a firearm or facsimile thereof, the ABA opposes mandatory minimum sentences, see ABA Standards for the Administration of Criminal Justice, and thus opposes that portion of the HCCA.

federal firearms controls. Certainly they will not stop crimes committed with handguns.

That legislation that would weaken the Gun Control Act of 1968 suggests that individual citizens have a constitutional right to keep and bear arms. But the Second Amendment does not guarantee that right. The ABA Report accompanying its 1975 Recommendations said: "In addition to the five decisions in which the Supreme Court has construed the Amendment, every Federal court decision involving the Amendment has given the Amendment a collective, militia interpretation and/or held that firearms control laws enacted under a state's police power are constitutional." (citations omitted)

No case has held to the contrary since.

THE PUBLIC SUPPORTS HANDGUN CONTROL

Public opinion polls have shown strong public support for handgun control for almost fifty years. A Washington Post-ABC News Poll taken following the attempted assassination of President Reagan in March 1981 showed that 65 percent of the American people favor "stronger legislation controlling the distribution of handguns." Another poll taken by the Associated Press and NBC News a month later shows that 71 percent of the American people favor a law that would require a person to obtain a police permit before he or she could buy a handgun. Most recently, a May 1981 Gallup Poll shows that 81 percent of the American people want a law requiring a person to obtain a license to carry a handgun outside the home.

The ABA agrees with the majority of the public and urges that the Attorney General take a strong stance to obtain legislation and resources to combat the serious menace of handgun crimes, while protecting the rights of law-abiding citizens.●

FREE ENTERPRISE WITHOUT POVERTY

HON. JOHN LeBOUTILLIER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. LeBOUTILLIER. Mr. Speaker, nearly every day in committee and on the floor, my colleagues in the House discuss problems of the economy. In the course of this ongoing, important debate, we have come to realize that we need to revitalize all segments of our Nation's economic life. And, we can all agree that the primary goal of this revitalization is full employment.

But how can we have a renewed economy which provides economic security for all our citizens?

Dr. Leonard Greene, an economist and mathematician, has considered this question and proposed an answer in his new book. "Free Enterprise Without Poverty." Dr. Greene says that millions of people who are dependent on Government and private sector benefit programs are weighing down the productive potential of our economy. In his research, he has concluded that the welfare system acts as a disincentive to work. Moreover, Government bureaucracy created to administer Federal benefit programs and industries established to profit from private social benefit programs work together to expand the system.

Dr. Greene has proposed a comprehensive plan for welfare reform that includes a work incentive, promotes the integrity of the family, offers uniform benefits, is integrated into our tax system, and is easy to administer. His proposal is called the graduated income supplement.

Outlined simply, every person in the Nation will receive a taxable income supplement of equal size. The supplement will be applied to the individual's income tax bill, reducing taxes owed by the amount of the supplement. If the amount of taxes owed is less than the supplement, the taxpayer will receive the difference as a cash refund. A family with no income will receive the full amount of the supplement in cash payments. Because the supplement is taxable income, the net value is greater for those with lower incomes.

Dr. Greene's book outlines a step-by-step plan to reform the existing Government dependency system. The reforms adhere to the following principles:

First, scattered, duplicatory, and contradictory programs should be consolidated.

Second, benefits should be paid in cash instead of services.

Third, cash benefits should be subject to taxes in order to recoup part of the payments as recipients move up the economic ladder.

Fourth, reforms should not increase the Federal Government's welfare budget. (This goal realistically can be achieved by substituting the income supplement for existing programs, by taxing cash benefits, and by saving money through increased efficiency.)

Mr. Speaker and my colleagues, I have found Dr. Leonard Greene's book, Free Enterprise Without Poverty, to be a thoughtful and thought-provoking analysis of the problems of our welfare system. I urge each and every one of you to study Dr. Greene's proposals carefully. The American Nation and its people at all economic levels will be the beneficiaries.●

WITH THE CHEAP COST OF LIBERTY NOWADAYS

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. DORNAN of California. Mr. Speaker, I call to the attention of my colleagues the following essay written by Sara Shulsinger, of Rancho Palos Verdes, Calif., on the cost of liberty each American citizen must pay. This was Sara's fourth winning entry to the Herbert Albright Americanism Essay Contest and she read it at this year's Palos Verdes Independence Day celebration on July 4, 1981.

Perhaps we all can learn something more about what is expected of us as American Citizens in reading her essay.

WITH THE CHEAP COST OF LIBERTY NOWADAYS

O, to be an American Citizen! To eat steak by night and wear polyester by day! To have two cars, a steady job, and a house in suburbia! More realistically, to share a heritage with bold pioneers and creative entrepreneurs across a continent. Most Importantly of all, to vote, think, and be free.

Certainly these rights are marvelous, beyond the imaginations of many not enjoying them as we do. To accept these good things, however, we must willingly meet certain responsibilities.

The most obvious and most easily, thus frequently, neglected duty of the American citizen is voting. Not only is it our right to thus determine how our country is run, but it is our challenge and obligation. Yet casting a blind vote is as irresponsible as not voting at all. To truly fulfill the responsibility is to take the time to be informed on all issues and to vote upon them based on the information gathered. Many don't realize that it's actually simpler in the long run to go ahead and vote than to avoid it; but isn't it easier to go out of the way a few times a year with open eyes than to live in darkness under someone else's rules?

A controversial duty we also hold is the payment of taxes. Everyone wants the goodies; no one wants to pay for them. But the support of liberty costs—if not lives, then money. And, of course, merely writing the IRS a check every year is not enough. We must make sure the money is spent responsibly. Wasted money is wasted time and energy, which could at some time mean the nation's survival.

Many vote properly, pay their taxes, and consider that enough to be counted as supporters of America. Although such actions are essential, the real test is in the heart. The single most important obligation we owe America is loyalty. This does not mean pledging a willingness to die for America in a philosophical discussion in someone's comfortable living room, although that's nice, too. This means doing all the chores expected of us as citizens, and really caring about the results—every day.

Yes, it takes both gallant and mundane courage to be a patriot; but the cost is still cheap. Courage is America's heritage.●

REAGAN TAX PROPOSAL MEANS INCREASED PERSONAL SAVINGS

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. FIELDS. Mr. Speaker, as we continue our tax debate, I believe each of us should ask ourselves which proposal would best serve to put this Nation back on the road to economic recovery.

I, for one, believe very fervently that President Reagan's tax proposal is our

best, perhaps our last hope of getting our economic house back in order.

I was particularly impressed to find that as a result of President Kennedy's across-the-board marginal tax cuts in the early 1960's, the rate of savings in this Nation dramatically increased from 5.4 to 8.1 percent—making more money available for new homes and business ventures and creating thousands of new jobs.

Frankly, I find no reason to believe that the Reagan tax proposal will not at least duplicate President Kennedy's accomplishment. This means that President Reagan's proposal would create at least $60 billion in new savings to be used to create thousands of jobs, to increase productivity, and to restore economic prosperity to this Nation.●

LOWERING OF EMISSION LIMITS HURTING SOUTHEASTERN OHIO

HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. APPLEGATE. Mr. Speaker, the recent action by the U.S. Environmental Protection Agency, in conjunction with the Reagan administration, to make final the lower sulfur dioxide emission limits for two Cleveland Electric Illuminating plants that were proposed in June of 1980 only serves to tighten the noose around the neck of southeastern Ohio.

I am referring to an announcement that was made by the EPA on July 22 that made permanent a set of lower emission standards for the Avon and Eastlake plants of C.E.I., the electrical utility company that serves greater Cleveland and which purchases large amounts of southeastern Ohio coal.

On June 12, 1979, the standards for these two plants were increased from a very low rate to a level that would permit burning of southeastern Ohio's high-sulfur coal. About a year later, on June 24, 1980, a proposal was made by the EPA to lower the standards by nearly one-third; thus, a lower sulfur coal must be used. Because of the lower standard, not nearly as much local coal could be burned or mined. The latest action by the EPA reaffirms and makes permanent the June 24, 1980, proposal.

It is infuriating to once again be denied by the administration in office the kind of help that is desperately needed in our area and which is the kind of help the administration is fully capable of providing if they so chose. I cannot understand the insensitivity to our economic problems that both past and present Presidents have displayed, especially considering that the major problems we are experiencing are the direct result of excessive Government rules and regulations enforced by such bureaucracies as the EPA and Office of Surface Mining (OSM).

I have sent a strong letter to President Reagan informing him of the added decay to the local economy this decision will allow. The text of the letter to Mr. Reagan follows:

I have enclosed with this letter a copy of the July 22, 1981 Federal Register announcement by the U.S. Environmental Protection Agency pertaining to the emission standards for two plants of the Cleveland Electric Illuminating Company. The notice is self-explanatory.

By taking this action, the E.P.A., in conjunction with this Administration, is tightening the noose around the neck of Southeastern Ohio because of the large amounts of coal mined in this area and sent north to these two facilities. This portion of the state is already experiencing economic havoc as a result of these and other bureaucratic and overburdening rules and regulations. This latest action will only serve to allow further decay in the local economy.

During the 1980 campaign, Mr. President, you made strong and numerous statements regarding the need for increased coal production, reductions in government rules and regulations with particular emphasis on the E.P.A., and expressed a strong desire to put people back to work. This Federal Register announcement is contrary to every one of those goals.

The people of Southeastern Ohio who directly and indirectly depend on the coal mining industry, of which thousands upon thousands do, only stand to lose that much more as a result of this action. Can anyone blame them for being disillusioned and disgusted with their own government. As the people of this area's elected representative and you as the President, I believe we owe it to them to reverse this negative trend. I ask for your help in the future to achieve these goals.●

FARMERS HOME PROGRAMS MERIT SUPPORT

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. SIMON. Mr. Speaker, yesterday the House passed the Agriculture appropriations bill by an overwhelming margin. I supported the bill, but I would like to point out an area in which I think we should have done more. That is the Farmers Home Administration's rural development programs.

The Farmers Home Administration in Illinois has done an excellent job, within its means, in meeting the needs of small communities and rural areas in the State and, Mr. Speaker, those needs are great.

The funding level provided in the bill passed yesterday represents an improvement over the proposals submitted by the administration, but we are spending less than we should. I have taken the position that all areas of government must be willing to take some cuts. The restraint that the President has called for is needed. But where the gains are short range and there is long-range damage, in those areas cuts should be minimal. And the Farmers Home Administration programs fall into that category.

Let me focus for a moment on just one program—the rural water and waste disposal grant program. In one section of my district, and this is typical, fully 25 percent of the households are not served by a water system. That figure includes those living in communities served by municipal systems, so the percentage of those without water in rural areas is even higher than that.

In my district, the Farmers Home Administration has had sufficient funds to meet only half of the requests for assistance under the program. I am sad to say that we are losing the fight to bring essential services to the rural citizens of this Nation. The money we are providing for this program is barely enough to enable communities to make needed repairs and improvements on existing systems, let alone begin to provide service to those who are forced to haul water to drink from unsafe wells. And yet we have reduced funding for the water and sewer program by $50 million from this year's level.

The loan program is clearly not capable of doing the job by itself. Even with the existing 5-percent loan rate, 75-80 percent of the applications in my district also require grant funds if projects are to be built. The alternative is to require less well-to-do residents and senior citizens to pay unaffordable minimum water bills. Nearly 100 percent of the applications for new rural water systems and half of those for repairs and improvements need the maximum grant amount. And yet not only are we reducing this essential grant program, but I am now hearing about the disturbing possibility that the loan interest rate may be raised to 7 percent or even 10 percent. If that happens, I think it is safe to assume that there will be no new water systems built in southern Illinois and very few improvements made to existing systems.

In cutting this program, rather than expanding it, I think we are turning our back on rural America. We are denying a large and growing number of our citizens the right to basic services. And how, I would ask, can we expect that rural America will be able to participate in the economic growth we claim to be stimulating by so massively cutting this and other Federal programs, if we deny our rural residents and communities the physical infrastructure needed to attract business and industry?

I supported the appropriations bill because it is obviously better than the

alternatives that have been proposed, but I am disturbed that we are not doing more. Rural development programs are an investment in the future.

Let me add my appreciation for the appointment of Charles Shuman as the Administrator of the Farmers Home Administration. His work will be a credit to President Reagan, and to Secretary John Block. I have known Charles Shuman for some years and have always respected his solid, commonsense approach to problems. He will serve the Nation well in this capacity. What we in Congress must do is to make sure he has the resources needed to do the job.●

ECONOMIC COVERUP

HON. JIM MATTOX

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. MATTOX. Mr. Speaker, JACK KEMP said in a public meeting of the Budget Committee that "the Republican Party no longer worships at the altar of the balanced budget." Everybody knows that this is a 180-degree turnaround from what I thought was the most unmovable position. But apparently JACK KEMP was right.

The so-called economic recovery program of the President will cost the American taxpayers $132.5 billion in deficit spending from 1981 through 1985. There will be no balanced budget in 1982 or 1983 or 1984 or 1985. These are not my estimates or the House Budget Committee's estimates, but rather these are the estimates of the Republican administration's Department of Treasury. What is also hidden under this program is that there will have to be massive cuts in our social security program which take away the earned benefits of people who are working now in order to keep the deficit from skyrocketing out of sight.

This is not economic recovery. This is economic coverup. And the American working people are the ones who will pay the bill.●

EL SALVADOR MUST HAVE U.S. ARMS

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. DORNAN of California. Mr. Speaker, some months ago, I inserted into the CONGRESSIONAL RECORD my report on El Salvador which was based upon my personal visit to that troubled country. I witnessed for myself the critical need for military assistance on the part of the Duarte government in order to combat what I have characterized as the most infamous gun-running operation in the history of the Western Hemisphere. This massive outside intervention on the part of the Soviet Union, Cuba, Nicaragua, and other Communist countries dramatically changed the nature of the struggle in El Salvador from an internal conflict to an international one with East-West dimensions. The Reagan administration has recognized the necessity of supplementing political and economic aid to El Salvador with military assistance so as to give the Duarte government a fighting chance against the well-armed band of revolutionary Marxist guerrillas.

The administration's balanced and reasonable approach has come under sharp criticism by former Secretary of State Cyrus Vance. However, in a letter to the editor of the Washington Star, June 30, 1981, Willard L. Beaulac, a retired Foreign Service officer and a former chargé d'affaires in El Salvador as well as Ambassador to five Latin American countries, has taken Mr. Vance to task and underscored the wisdom of the Reagan administration's balanced approach in El Salvador. I commend Mr. Beaulac's letter to my colleagues and to all concerned citizens:

[From the Washington Star, June 30, 1981]

EL SALVADOR MUST HAVE U.S. ARMS

(By William L. Beaulac)

On June 21, former Secretary of State Cyrus Vance, in a nationwide television broadcast, said that what El Salvador needs is not the military assistance the United States is extending to it but political, economic and social improvement.

That El Salvador needs that kind of improvement is a truism. Not only El Salvador needs it, every other Central American country needs it. The Salvadoran government itself wants that kind of improvement and is trying hard to bring it about.

Indeed, the Marxist-led guerrillas who are trying to overthrow the government also want it. But they and the Russian and Cuban governments which support them militarily define improvement differently from the way the Salvadoran government defines it and the way Mr. Vance would define it. And it is precisely for that reason that U.S. military assistance must continue.

If Central American governments are denied the means to counter international communism's effort to overthrow them by military and other means, not only El Salvador but Guatemala, Honduras and even that admirable democracy, Costa Rica, will be lost to communism. The opportunity to bring about true political, economic and social improvement will be postponed and possibly lost, and the domino theory, under whatever name, will have been validated.

Mr. Vance also demonstrated a disturbing lack of familiarity with Latin America, its people and its practices when he added that all Latin American governments support the view he expressed. Mexico does, in fact, support that view, and numerous politicians throughout Latin America also support it because supporting it is good politics. It enables them to live in the best of worlds so long as it lasts.

While they are profiting from United States willingness to prevent communist takeovers in Central America, they can simultaneously make political capital with leftists and nationalists in their own countries by charging that the "imperialistic" United States is "intervening" in Latin America.

The long-term effects on Latin American countries of that practice are lamentable, but short-term results for politicians are good and will continue to be good so long as there are persons such as Mr. Vance to give credibility to the charges against the United States.●

TURKISH TROOPS IN CYPRUS 7 YEARS

HON. CARDISS COLLINS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mrs. COLLINS of Illinois. Mr. Speaker, this summer marks the seventh year that Turkish troops have occupied Cyprus. The presence of these troops has caused countless damage to the thousands of Greek inhabitants. Their so-called sovereign state continues to be hampered by the control of 40 percent of the land by the Turkish occupational force.

When the Turkish army invaded Cyprus in 1974, they created 200,000 Greek refugees. The strain of resettling them has caused great economic hardship to the Cypriot Government. In addition the 40 percent of Cyprus that Turkey controls represents 70 percent of the economic wealth. With only 18 percent of the Cypriot population being Turkish this condition is wholly unjust.

The U.N. has tried numerous times to solve this continuing problem. Yet, there has been no progress. With their peacekeeping force in Cyprus, they have tried to keep the tensions between the two sides at a minimum. Yet this does not solve the problem. We must urge Turkey to relinquish their occupation and to give back the occupied land to its rightful owner. We must urge this administration to continue to push Turkey to return the land and allow the Greek refugees to return to their homes. This is not only a concern of the Greek and Turkish community, but affects the whole world. We must strive for peaceful relations, not violent acts as policy. I hope that the future will lend to improvement in this situation in Cyprus.●

INFLATION

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. FIELDS. Mr. Speaker, those who have voted year after year in this

Chamber for a bigger and bigger—and increasingly expensive—Federal bureaucracy, have all too rarely considered the effects of their actions on their constituents. As we prepare to vote on the President's tax proposals, I think it would do us well to consider some of the Washington-induced problems our people face.

The biggest single cause of inflation is excessive Federal spending, brought on by a desire by Federal bureaucrats and others to overregulate our people and small businesses, and permitted by excessive Federal taxes that make much of that excessive spending possible.

But Ronald Reagan has looked beyond these problems to see a new, stronger America in which our people will not wear the shackles of excessive Federal regulation and will not labor under the burden of excessive Federal taxes. In that new, stronger America, our people will feel a new freedom to work harder and longer, keeping more of their own money.

Mr. Speaker, as we march toward this new, stronger America under the leadership of Ronald Reagan, let us never forget the problems and miseries created by those who served in this body earlier, who voted to spend billions of dollars without a thought, who voted to build great new bureaucratic empires, and who voted to condemn our people to a steadily declining standard of living. To help my colleagues remember that old world, I submit for the RECORD an excellent article by Jim Barlow which recently appeared in the Houston Chronicle:

INCOME OF AVERAGE HOUSTONIAN DECLINES 22 PERCENT DURING PAST 13 YEARS, AND TAXES TAKE A GREATER PART

(By Jim Barlow)

Inflation has dealt a devastating blow to the average Houstonian over the past 13 years, with his or her real income declining by 22 percent, a survey shows.

While the cost of living climbed 284.6 percent in Houston since 1967, the average per person income of Houstonians went up by only 214.5 percent.

Even while the real income of Houstonians has been dropping, they have been paying a greater total of their pay each year to the federal government in taxes.

In 1967, a family of four with one breadwinner making the average per capita income in Houston and taking the standard deduction would have paid 14.8 percent of their total pay in income taxes. In 1980, despite being worse off in real purchasing power, the same family would pay 26.1 percent of their total income in federal income taxes.

In 1967, a family of four with an average Houston income would have earned $12,668 a year, according to a U.S. Commerce Department survey. In 1981, the average family of four in Houston has a total income of $39,836 according to a survey by Urban Decisions Systems, Inc.

In 1967, our mythical wage earner paid 2.3 percent of income in Social Security taxes. In 1981, he will pay 5 percent of total income to Social Security.

If both husband and wife were working earning that average income, their tax load would be greater since both would pay Social Security taxes. Also, married couples who both work pay higher taxes than they would if both were single.

While the overall Houston Consumer Price Index was going up by 284.6 percent from 1967, the base year for that index, other costs here went up even faster.

The biggest increase came in the cost of home ownership, which soared 413.7 percent in the period.

A person who spend $25,000 in 1967 to buy a new home and pay other household costs would have to spend $128,425 today for the same value.

Renting an apartment only increased by 191.7 percent in the same period. But home ownership allows the owner to participate in the benefits of inflation, since he or she can usually expect to sell the home for much more than the investment.

The cost of meals in restaurants climbed 355.6 percent in the period with a $20 dinner for two increasing to $91.12. But telephone service for a private line with one telphone and unlimited local calls climbed only 60.2 percent in the same period, from $70.80 a year to $113.40. Compare that with the 260 percent rise in postage with 1967's 5-cent stamp selling today for 18 cents.

Groceries went up 274.7 percent over the 13 years. It took $374.70 to purchase the same groceries that would have cost $100 in 1967.

Here are how other goods and services have fared in Houston during this inflationary period:

Natural gas. Entex says a typical consumer paid $75.24 a year in 1967, and $299.76 today, up 298.4 percent. At the same time, average monthly residential consumption went up slightly, from 5.97 thousand cubic feet to 6.02 thousand cubic feet.

Electricity bills for the average Houstonian rose 388.7 percent with a yearly bill of $145.46 in 1967 and $710.95 today. Again, consumption rose over that period from 8.475 kilowatt hours to 14.219 kilowatt hours. Most of that increase came because of the increased use of air conditioning and kitchen and laundry appliances, says Steve Gonzales of Houston Lighting and Power.

Buying water from the city of Houston went up by just 72.4 percent with the average yearly residential cost climbing from $49.68 to $85.68. Dan Jones of the city Public Works Department, said average residential water use also climbed from 2,000 gallons a month to 6,000 gallons, mostly from a proliferation of dishwashers.

Household costs, including furniture, drapes, linens, appliances and upkeep, went up 234.5 percent with $100 worth of goods and services in 1967 costing $344.50 today.

Except for gasoline, transportation costs went up more slowly than the general cost of living over the 14-year period. The average price of a new car sold nationwide (no Houston figures are available) went up 135 percent. In 1967 the average new car, including accessories, tax, title and license, cost $3,200. In 1980, the last figures available, it was $7,520.

That means our Houston average consumer would have had to work just a bit over 13 weeks in 1967 to pay for a new car, but only 10 weeks in 1980.

There is no general inflation figure for airfares. Currently there are wide swings in prices between selected cities because of increased competition from deregulation of the airline industry.

One route, New York to Houston round trip, rose by 197.1 percent in the 1967-81 period. Delta Airlines charged $178.20 for the trip in 1967 and $529.52 today. Both figures exclude tax.

Bill Jackson of Delta said much of the increase is due to higher prices for jet fuel. In 1972, he said, Delta paid 11.5 cents a gallon for jet fuel. Today, the average cost is $1.05 to $1.06 per gallon.

Gasoline, fueled by the giant price hikes imposed by Organization of Petroleum Exporting Countries, shot up 354.8 percent. In 1967, the average price of a gallon of regular gas was 29.9 cents. Glenn Nilson of the Lone Star Service Station Association in Houston, said the average full-service price of regular is $1.36 a gallon.

Consumers of gasoline are marginally better off because most are getting more miles per gallon in their cars. Hal Rothenberg of the Motor Vehicle Manufacturers Association in Detroit, said in 1967, the average miles per gallon for all American cars sold was 14, while today it is 21 mpg.

Medical care was another big gainer in the inflation parade, going up 312 percent. Medical goods and services going for $100 in 1967, cost $412 today in Houston.

The cost of buying clothes and keeping them clean went up 224.4 percent while items of personal care like cosmetics and hair cuts rose 276.4 percent.

A night on the town which cost you $30 in 1967 would go for $97.11 today, up 223.7 percent. If you want to drink, buy it at the package store. Those goods only went up 220.9 percent.

The cost of living in Houston is still less then it is in most metropolitan areas of the country. The U.S. Bureau of Labor Statistics surveys annually to see what it costs an average family to live, with three classifications of lower, moderate and upper standards of living.

In 1976, for families on the lower standard of living, Houston ranked 35th cheapest in cost of living out of 40 urban areas. For the moderate and upper income standards. Houston was 39th out of 40.

In 1980, the same survey showed Houston ranked 23rd out of 25 urban areas surveyed in cost of living for all three standards of living.

One of the reasons for Houston's continued lower cost of living was the relatively light local and state tax burden, said Sharon Cohany of the bureau's Dallas office. In 1980, a Houston family on the moderate standard would have to spend just 93 percent of the U.S. average. But if Texas had the same average local tax load as other states, that family would be spending 98 percent of the U.S. average.

To see how you've done since 1967, merely multiply your salary that year by 3.846. (That figure includes the 284.6 percent inflation rate, plus your original salary). Compare the result with what you are actually making today.

Try not to cry.●

MINIMUM SOCIAL SECURITY BENEFITS

HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. APPLEGATE. Mr. Speaker, on July 21, 1981, the House of Representatives voted in favor of a nonbinding resolution to express its opinion that the $122 minimum monthly benefit, currently being received by about 2 million Americans, should be continued. I voted in favor of this resolution, and I want to go on record again of being totally against reducing social security benefits for current recipients.

As you know, a provision in the proposed fiscal year 1982 budget, presently in conference, calls for the elimination by April 1982 of the minimum monthly benefit for all individuals. The Reagan administration endorses the provision and it will become law unless action is taken by the budget conference committee to eliminate it.

Although both House and Senate versions of the fiscal year 1982 budget contain provisions to eliminate the $122 minimum monthly benefit, I believe the resolution passed by the House on July 21 sends a strong message to the conference committee that we believe it is crucial to continue this small degree of help to America's elderly. The minimum benefit goes to nearly 2 million elderly Americans, most of whom are very poor. Especially affected would be women over 70 years of age because for most of them, this $122 per month is their only income.

I doubt that any Member would disagree that the social security system needs some repair. But you cannot save a sinking ship by taking away the liferafts of those already in the water.●

THE DRUG ABUSE WORKSHOP FOR NEW YORK'S 26TH CONGRESSIONAL DISTRICT

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. GILMAN. Mr. Speaker, to help formulate a concerted community effort to prevent drug abuse and drug trafficking in New York's 26th Congressional District, approximately 150 leaders representing parents, teachers, students, school administrators, law enforcement officers, treatment specialists, business and labor officials participated in holding a drug abuse workshop at the Monroe-Woodbury Middle School in Central Valley, N.Y., on June 6, 1981, to discuss the problem of preventing and controlling drug abuse in our region.

Through the efforts of Joan Ball, president of the New York State Parents, Teachers Association; Mary Bianchini, representing the Business and Professional Women of Rockland County (N.Y.); Rev. Jansen Dederick, counselor of Pius XII Youth and Family Services (Outreach), in Haverstraw, N.Y.; Jonathan Eig, student at Spring Valley Senior High School; Georgine Hyde, New York State School Boards Association; Edward Meyer, Orange County district attorney; Dean Seifried, former board chairman of the Orange/Rockland Utilities Co; and Dr. Leo Wagner, principal of the Nyack Junior High School, we were able to form seven workshop panels focusing on drug abuse prevention, public awareness of the drug problem, citizen participation and short-range community projects to help prevent alcohol and drug abuse in our region.

Joan Ball led the panel on parents; Rev. Jansen Dederick, the panel on community leaders; George Doering, the panel on treatment and mental health; Jonathan Eig, the panel on students; Ed Meyer, the panel on law enforcement; Dean Seifried, the panel on business and labor; and Dr. Leo Wagner, the panel on education.

Dr. Robert Nible of the New York State Division of Substance Abuse Services delivered a dynamic keynote address entitled, "Your Health and Narcotics"; Sal Rubino, R.Ph., executive director of the New York State Pharmaceutical Society, discussed the role of congressional advisory committees with the workshop participants; and Anthony DiBenedetto, chief of the New York State Bureau of Drug Education, commented on the problems of drug abuse prevention with the Panel of Education.

Through the efforts of Julio Martinez, director of the New York State Division of Substance Abuse Services, and the gentleman from New York (Mr. ZEFERETTI), chairman of our House Narcotics Select Committee, Jim Noonan, Bob Bixler, Kathleen Coughlin and Elliott Brown provided staff support for the workshop.

At the conclusion of the drug-abuse workshop, we established a Congressional Advisory Committee on Drug Trafficking and Substance Abuse to help iron out the recommendations and to formulate a plan for their implementation.

Dean Seifried will serve as chairman of our advisory committee, which consists of the following leaders from our region: Elizabeth Ader, Virginia Aitken, Joan Ball, Roy Barfield, Marilyn Belchinsky, Barbara Bennett, Joel Berg, Mary Bianchini, Barbara Buckley, Ed Burbridge, Rev. Jansen Dederick, Dr. Patrick DiCaprio, George R. Doering, Jr., Jonathan Eig, Phyllis Eig, Edward A. Eisley, Diana Gilbert, Richard S. Gillette, Sharon Herstein, Leigh F. Hunt, Georgine Hyde, Judi Jaffee, Stuart Kalmanowitz, M. Claire Knapp, Irene C. Lee, Cleveland Lockett, John B. McCabe, Maryann McDonald, Lee Marino, Edward Meyer, Joseph F. Miele, Theresa Migli, Roberta Murphy, Barbara Mutino, Edith M. Nathan, Diane Nosworthy, Anne Nowicki, Father Daniel M. O'Hare, Steve Posnak, Margo Reilly, Paul Schrauer, Krista Schulte, Allen M. Seiss, Dr. Leo Wagner, Don Weber, Robert W. Weber and Claudia Wysocki.

Mr. Speaker, if we are going to win the war on drug abuse, it will require the thoughtful, dedicated assistance of many citizens at the local level. In that regard, I am inserting at this point in the RECORD the concerns, conclusions, and recommendations that were generated at our Central Valley drug abuse workshop and hope that it will be of some help to my colleagues in their efforts to help prevent and control drug abuse in their constituencies:

DRUG ABUSE WORKSHOP PANEL RECOMMENDATIONS

PANEL ON PARENTS

Concerns

Lack of parental involvement.

Need to reduce peer pressure which influences alcohol and drug abuse.

Lack of consistent law enforcement and the enforcement of the rules by school officials regarding the use of drugs.

Apathy by school officials.

Lack of parental recognition of children's drug abuse.

Classroom boredom.

Need for greater parent-school cooperation in combatting substance abuse.

Conclusions and recommendations

Need for a clear understanding by the parents regarding the school's authority to search lockers and students for drugs and to call parents about student drug abuse.

Need to educate parents and students at an early age regarding the dangers of drug abuse; courses to help students better understand themselves, their peers and their parents and for parents to better understand their children and the problems of peer pressure.

Parents must help parents become aware of the dangers of drug abuse and that there is no disgrace in having a child with a drug abuse problem.

Youngsters need to recognize that they can socialize without resorting to drugs.

Need to find ways for schools and parents to cooperate.

Need for consistent rules in the school and for youngsters to know and understand the rules regarding the use of alcohol and drugs.

PANEL ON COMMUNITY LEADERS

Concerns

How can community leaders combat public's drug abuse apathy?

How to economically establish teenage drug programs.

How to eliminate peer pressure.

How to cope with daily pressures and improve communications at home and abroad.

Conclusions and recommendations

Community leaders must work together to develop local drug programs that would help combat public apathy.

Need to develop communication skills for families and communities; to examine the role of peer pressure, self-esteem, decision making.

Develop drug education programs and workshops for the entire community.

Provide drug education programs for parents.

Need to revise jurisdictions of school districts that cross townships and townships that cross school districts.

Develop school programs that emphasize personal achievement rather than competition.

Programs to help parents help their children combat boredom and anxiety.

PANEL ON TREATMENT AND MENTAL HEALTH

Concerns

Proposed budgetary cuts in treatment and mental health.

Increased number of students in the grade schools who are resorting to drugs.

Lack of resources for treatment and mental health facilities.

Absence of adult role models.

Need for parent training in drug education and prevention.

Need for activities for students not interested in sports. Communities, service groups, churches, self-help groups, and clubs need to be involved in student activities.

Need for health insurance coverage in the treatment process for alcohol and drug abuse.

Expand corporate involvement in drug prevention.

The media's glamorization of the use of drugs.

Lack of understanding and need for more publicity of the chemical effects of drugs.

Student education should start in elementary grades.

Overprescription of drugs.

Need for positive prevention programs to coordinate school, family, churches, community, government agencies.

Urgent need to control influx of narcotics from foreign sources.

Need for public education regarding the dangers of drug abuse.

Conclusions and recommendations

Establish drug prevention programs at the grade school level.

Need more drug education funds to develop strategies involving the entire community and to provide a multi-disciplinary approach to the entire area of alcohol and drug abuse.

Establish programs to help parents be better parents.

Create better working relationships between government agencies.

Establish a data resource bank to inform citizens regarding drug problems and the resources available to deal with the problems.

Fulfill the need for more detoxification and treatment slots and the need for different kinds of treatment in residential settings.

More effective treatment facilities including better trained professional staffs, accountability, and follow-up programs.

PANEL ON STUDENTS

Concerns

Community involvement in the drug problem.

Stop the flow of drugs.

Realize that drugs do not solve problems.

Make the legal consequence of drug violations known to students.

More guidance from adults.

Make parents aware of all drug problems.

Commence drug education at earlier ages (ages 8-12) and include drug education in health classes.

Provide community activities to help relieve tension and boredom.

Mandatory drug therapy.

Conclusions and recommendations

Provide active drug awareness program in the elementary schools to educate students on the dangers of drug abuse when they are young and impressionable.

Establish student committees in the high schools to deal with social problems. Committees would meet with students to confidentially discuss their problems, to make recommendations to government officials and to send reports to news media, and others deemed appropriate by the committee.

Need for community centers where students participate in activities with their friends and away from the drug environment.

Provide speakers on the drug problem, especially former drug uses.

Teach alcohol and drug abuse in one unit.

Allocate funds for school activities.

Educate students on the short term effects of drugs.

Enforce law and provide strict punishments.

Teach immediate results of a drug usage.

Provide stiffer penalties for the drug dealer as compared to the drug user.

Reverse the socially acceptable status of drugs.

PANEL ON LAW ENFORCEMENT

Concerns

Panel discussion ranged from Marihuana smoking in the schools to the illicit importation of heroin and other dangerous drugs. The law enforcement community is frustrated by current budgetary cuts, which restrict efforts to enforce drug laws.

Conclusions and recommendations

Law enforcement officers should participate in drug education programs in the schools, especially at the elementary and junior high school levels.

Need a consistent approach to drug law enforcement by school leaders, parents, teachers, students, the police and the judicial system.

Create a countywide task force to establish a uniform plan for local control of drug abuse.

Federal funds to assist law enforcement.

PANEL ON BUSINESS AND LABOR

Concerns

Major problem confronting the business and labor communities is alcohol abuse, which creates loss of productivity, absenteeism and problems within the family.

Public and professional apathy toward substance abuse.

Conclusions and recommendations

Labor has been active in helping employees overcome alcohol and drug abuse through union-sponsored programs.

Management has not been active in recognizing the existence of drug-related problems and has not taken a firm stand to help resolve substance abuse problems.

Management needs to be more involved in preventing substance abuse.

Top management should take the lead and fight the war on alcohol and drug abuse within their companies.

Need for cooperation and understanding of the drug problem by management that also must be shared by front-line managers.

Management and labor need to be educated on detecting and treating substance abuse problems.

Cutbacks in drug funding programs will cause a crisis; the drug problem is growing not diminishing.

Federal and State funds are needed to help create programs staffed with trained professionals in addition to the need for better management of funds and programs.

PANEL ON EDUCATION

Concerns

Not enough time is devoted to substance abuse in the elementary grades.

There is too little public awareness regarding the licit and illicit drugs by parents, students and teachers.

Increased numbers of students at the junior high school level are resorting to alcohol and drugs.

There is a breakdown in parent-student-teacher communications.

Conclusions and Recommendations

A genuine commitment by the local boards of education to the new State K-12 drug education curriculum is needed; this should begin in the primary grades. State Government must be committed to the drug education curriculum by providing funds necessary to implement the program.

There should be a concentrated effort through television, newspapers, and scientific approaches to implement any support programs that will aid public awareness in educating and preventing drug abuse.

Require high school students to take a course in "Marriage and Parenting" that would include drug prevention, teenage pregnancies, single parenting families, child and drug abuse.

Need for allocating more funds for drug abuse prevention.●

RESULTS OF QUESTIONNAIRE ON CURRENT DEBATE ON TAX MEASURES

HON. WILLIAM M. BRODHEAD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. BRODHEAD. Mr. Speaker, the results of a questionnaire recently mailed to my constituents in the 17th Congressional District of Michigan pertain in part to the current debate on tax measures. I would like to share those results with my colleagues. They represent replies from more than 15,000 citizens.

RESULTS OF QUESTIONNAIRE

(1) In order to solve funding problems of the social security system, President Reagan has proposed reducing benefits in a series of steps from 42 percent to 38 percent of preretirement earnings. Do you favor this proposal?

Yes, 21 percent; no, 79 percent.

(2) Do you favor the President's plan to sharply reduce social security beneifts for those who choose early retirement at age 62?

Yes, 25 percent; no, 75 percent.

(3) The President has proposed a tax cut which provides greater percentages of re-

ductions for high-income taxpayers in order to encourage them to invest. Would you favor reworking this program to provide greater tax cuts for the average American family?

Yes, 73 percent; no, 27 percent.

(4) President Reagan has proposed doubling military spending over the next 5 years. Do you support this much of an increase?

Yes, 41 percent; no, 59 percent.●

CENTENNIAL TRIBUTE TO ATATURK—AN EXTRAORDINARY STATESMAN

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. SOLARZ. Mr. Speaker, the celebration of the centennial of the birth of Kemal Atatürk began on May 19, 1981, and will continue for a full year. Numerous governments and individuals across the globe have already paid tribute to this extraordinary world statesman, and many more testimonials to his legendary achievements will surely follow during the remainder of the centennial year.

It seems to me entirely fitting that Atatürk's memory should be so honored. Perhaps once in a thousand years is such an individual born: A man of enormous intelligence, or incredible dedication, of unparalleled political brilliance. In short, a man who serves as an inspiration not only to Turks but to free men and women wherever they may be in the world.

I was recently privileged to be present at a meeting of the American Turkish Society, where Ambassador Talat Halman of the Republic of Turkey gave an insightful speech about Atatürk's legacy. I would like to share the text of this speech with my colleagues:

TEXT OF THE SPEECH GIVEN BY TALAT HALMAN

Your excellencies, Governor and Mrs. Carey, Mayor Koch, Congressman Solarz, Dr. Kissinger, Senator and Mrs. Javits, Senator and Mrs. Ribicoff, Chairman and Mme Ertegün, President and Mrs. Danisman, Distinguished Guests, Ladies and Gentleman:

If Atatürk, the founder of modern Turkey, were alive today, he would be immensely happy to see this dazzling gathering of Americans and Turks. He felt a special fondness for the American people: In a message to the American people (as quoted in the Congressional Record) in 1923, he said: "The great George Washington, foremost modern pioneer of liberty, who won independence for his country by driving out the foreign despots oppressing it, is the man whose example inspires and influences me most deeply." In a subsequent interview, he stressed the need for closer ties between the two nations, observing that "America is the oldest democracy in the West and ours is the youngest in the ancient world."

In 1933, on the tenth anniversary of the Turkish Republic, President Roosevelt sent him a message of congratulations, and praised his "outstanding success" and in reply Atatürk expressed "the assurance of my very sincere friendship."

Atatürk has occasionally been called "The George Washington of Turkey". *That* he was. But, according to Turks, he was also Jefferson and Lincoln, Franklin Delano Roosevelt and Truman, Eisenhower and Kennedy. Do you notice how this list is perfectly bi-partisan?

The American Turkish Society itself is non-partisan and non-political. I hope the distinguished American politicians and the top diplomats from all over the world at this Luncheon won't mind that I will give a very short non-political talk, that I will speak only about culture.

The Centennial of Atatürk's birth started on May 19th, 1981. It will end on May 19th, 1982. During the Year, in scores of countries—from Japan to Argentina, from Indonesia to England, from Hungary to Australia and all points in between—governments and universities and the media will pay tribute to an extraordinary world statesman.

Atatürk saved his nation from foreign invaders—and from the Sultans, from dynastic theocracy—and created a modern progressive Republic. Then, he launched a broad spectrum of reforms the likes of which have not been seen elsewhere. The legislators and lawyers here may shudder at the fact that, for instance, Turkey's legal and political system was overhauled in its entirety. Atatürk made education and all branches of the government secular. To invoke an analogy from the United States today, he led the moral majority into secular humanism.

He liberated us men from the fez with the funny tassel on top, and brought the women out from behind the veil.

He was a one-man Women's Lib. "Everything we see on the face of the earth," he said, "is the creative work of women,"—and he proceeded to give Turkish Women their equal rights and opportunities. Once, he talked about the natural superiority of women. He had good reason to. Because he knew that, in the 6th, 7th, 8th centuries, there had been Turkish female heroes and commanders and rulers. Also, Ottoman women poets who had proudly asserted their greatness: About five hundred years prior to Kate Millett and Gloria Steinem, our Mihri, a very naughty Ottoman lady, a truly liberated woman, wrote:

Since, they say, woman has no brain or wit,
Whatever she may speak, they forgive it.
But your humble servant Mihri demurs,
And states with that mature wisdom of hers:
Far better to have one woman with class
Than a thousand men all of whom are crass.
I would take one women with acumen
Over a thousand muddle-hearted men.

Atatürk had the right idea. In 1935—when even French and Swiss women had no political rights and when not many American women had yet been elected to Congress, Turkey's Parliament could boast of 18 women members, one of whom actually came from a poor village. Turkey also had, that year, the world's first woman Supreme Court Justice. Since then, we have had women cabinet members and university presidents—and innumerable doctors, lawyers, architects, authors, scientists and professors of "the fair sex". We have yet to find a Barbara Walters. That is not easy. It is a huge challenge. But sooner or later we shall have our own Barbara Walters.

The Turkish Women's Lib has achieved such glorious success that, in the 21st century, it may be necessary for men to start their own Liberation Movement.

Another remarkable success is the Language Revolution that Atatürk launched more than fifty years ago. Consider the extent of the transformation: Imagine, as Americans, having to change from your own script to the Arabic script within six months. Imagine having to write from right to left after you have been writing all your life from left to right. And the vocabulary changes: Assume that you must suddenly say "Mishkelap" instead of "Good morning" or "loomeray" instead of "happiness". That is what happened in Turkey. A Latin alphabet replaced the Arabic script overnight. And thousands of common words gave way to new coinages. Only a genius like Atatürk could have accomplished such a feat.

Atatürk was a champion of human rights, and a benefactor to minorities. In his Republic, all minorities were, as they still are, free to have their own schools, churches and synagogues, their own cultural life. And they were free—as they are today—to participate in any and all segments of Turkish society. In the 1930s, when Jewish professors in Nazi Germany were requesting asylum in other countries and many of them were being turned down for fear of causing Hitler's ire, Atatürk—with admirable courage and without any hesitation at all—granted them asylum. Scores of them came to the Universities of Istanbul and Ankara where they were given the top professorial positions at the highest salaries. They and their families led a happy and constructive life in Turkey. Back in the fifteenth century when the Jews of Spain were leaving at the time of the Inquisition, it was the Ottoman Sultan who gave haven to them although all other countries were rejecting them. These are facts of history and human stories that are crying out be written. Who knows, maybe some day a newspaper or a book publisher or a documentary producer will take up these espisodes of humanitarian concern.

Atatürk was and still stands as a major world statesman. He was a pioneer of national liberation movements—and a model for new leaders. He expressed his faith in "Peace at home, Peace in the world." He believed in harmony and cooperation among nations. "Peace," he said, "is the most effective way for nations to attain prosperity and happiness." He gave voice to his hope—"Citizens of the world should be educated in such a way that they shall no longer feel envy, avarice, and vengefulness."

In 1930, Venizelos and Atatürk signed the Greek-Turkish Treaty, and even talked of their vision of the eventual establishment of a Turco-Hellenic Federation.

No wonder Turkey became the first and only country to be invited by the League of Nations to become a full-fledged member. When Atatürk died, the League called him "a genius peacemaker."

UNESCO has declared 1981 as "The Atatürk Year". Its General Assembly passed a unanimous resolution which pays tribute to him as "the remarkable promoter of the sense of understanding between peoples and durable peace between the nations of the world . . . he worked all his life for the development of harmony and cooperation between peoples of color, religion and race."

The United Nations will offer a wide range of cultural activities to observe the Atatürk Centennial—and Secretary General His Excellency Kurt Waldheim will receive from our Foreign Minister His Excellency Ilter Türkmen "The Atatürk Award to the

United Nations" at a special ceremony at the UN during the coming General Assembly Session.

In April, the White House issued a Statement which states, in part, "Atatürk was a great national leader in times of war and peace . . . For Turkey and its people, the Atatürk Centennial is as important an event as the 1976 Bicentennial was for us."

Now, let me do some apple-polishing for the Big Apple. The Mayors of San Francisco, Chicago, and Pittsburgh have issued Proclamations—and we are grateful to all of them. Even the much smaller city of Poughkeepsie whose mayor is of Greek origin has issued one, too—and we would like to express our gratitude to him.

The most important Proclamation, of course, came from New York, America's first city and the world's business, financial and cultural capital. They say New York is the world's most important city—second only to Istanbul. Is that true? We are truly and profoundly grateful to Mayor Koch for the eloquent Proclamation he issued making May 19th "Atatürk Day" in New York City. His Proclamation describes Atatürk as "one of this century's most inspiring leaders" and praises his "many principles which represent the best ideals of humanity in our times, including equal rights for women, free education, secular administration, social justice, freedom, dignity and equal opportunity for every person."

The Turkish community and the American friends of Turkey are very happy about the Proclamation. If Mayor Koch were to put to them his famous question, already an American classic, "How am I doin'?", I am sure they would reply in unison: "Mr. Mayor, you're doin' great. Mr. Mayor, you're the greatest."

It is interesting that, as if to thank him in kind, we have invited to this Luncheon two of Turkey's most prominent businessmen one of whom—not incidentally—happens to be Koç and the other Koçman. In a sense, since May 19th, the Turks in and around New York are all Kochmen and Kochwomen.

We are also grateful to Governor Carey who has graced us with his presence for the second year in a row, and to Congressman Solarz, who is here for the first time. Congressman Solarz is a true friend of Turkey and a bulwark of U.S.-Turkish relations.

All this is part and parcel of the abiding friendship between Americans and Turks. We have been staunch allies for more than 35 years now. In Korea we have fought together. In the 1950s, the U.S. press was full of stories about Turkish soldiers who gave their lives trying to save American lives.

America was an ideal for many Turks after World War II. In the 1950s, a Turkish Prime Minister said in a speech: "We shall turn Turkey into a Little America." When things were beginning to go wrong in the States in the 1960s, a Turkish humorist said: "Now America is turning into a Big Turkey."

We have so much in common. Take slow bureaucracy. The word for slow in Turkish is "Yavash" . . . To express it with a bit of exaggeration we often say "Yavash yavash" meaning slowly and slowly. The Americans who were working in Ankara in the 1950s observed its similarity to Washington and started calling the Turkish capitol "Yawashington".

We idolize your movie stars. When the Queen of England Elizabeth II came to Turkey in 1971 on a state visit, a provincial newspaper ran an eight-column banner headline: "Queen of England Elizabeth Taylor Arrives". We lap up your TV series. When "Dallas" was shown on Turkish TV, Istanbul and Ankara streets were utterly deserted week after week.

Atatürk had admired George Washington, enjoyed the company of U.S. ambassadors, struck up a stimulating friendship with General MacArthur in the early 1930s when the two of them accurately predicted the course of events before, during and after World War II. I am sure that if he were alive today, he would have held Dr. Kissinger in high esteem, because he admired intelligence, knowledge and wit.

Above all, Atatürk felt deep admiration for America's achievements, for the American spirit of enterprise and creativity. I do hope that, in the Atatürk Centennial, Americans will once again remember Atatürk's own achievements. I do hope America will take note of his aspirations for Turkey's progress and for a dignified and mutually beneficial solidarity between Americans and Turks as true friends.●

VIGIL FOR ABBA TARATUTA

HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. PEPPER. Mr. Speaker, it pains me to stand before you, once again, to remember, like a bleeding ulcer, the plight of human beings caged in a country they would like to leave, prohibited from going to a country that is eager to accept them and even beaten, jailed, or treated as insane for voicing their thoughts in nonviolent, normal ways.

What free human beings consider normal is obviously considered insane in the Soviet Union. There, the Government expects the people on pain of punishment to work at a job deemed suitable by bureaucrats, to live in a place prescribed by bureaucrats, to forego travel opposed by the Government, to think in ways approved by the Government, to read material approved by the Government, not to read materials opposed by the Government, and to have religious faiths as ordered by the Government. Here is a Government which has successfully denied itself by denying the people it purports to govern. People who cannot express themselves freely will have a government chained in deed as well as in thinking to the granite of human resentment and regret.

Abba Taratuta, my adopted Soviet refusenik, has suffered with his family in this abominable way since 1973, when he applied for emigration from the Soviet Union. As a mathematician, he was denied on grounds of security and his family and he had been badly treated by being denied education, commensurate jobs, and the freedom to leave and build a new life out of the shambles of their life in the Soviet Union. What a country which treats its people thus. It is my fervent hope that Abba and his family will soon be allowed to emigrate.●

A DEVASTATING COURT OPINION

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. CLAY. Mr. Speaker, the Supreme Court in its June opinion involving Phillip Agee seriously tampered with the first amendment. Of course the former CIA agent was wrong in exposing employees of the Central Intelligence Agency to great harm by printing their names and distributing them in foreign countries. But for the Court to rule that the Secretary of State has the power to deny a passport to anyone he determines "might do serious damage to our national security or American foreign policy" is stretching the equation a bit too much. That language gives carte blanche license to any Secretary who may wish to stifle dissent or curtail criticism.

The decision went entirely too far. It used a sledge hammer to flatten Phillip Agee when a mallet would have been sufficient. Just imagine what the Secretary of State under President Johnson or Richard Nixon could have done to stop reporters and newsmen from reporting on the atrocities in Southeast Asia—simply revoke their passport. Giving such broad powers to the Secretary to determine who constitutes "serious damage to the national security or to American foreign policy" is an infringement on the right of free speech. It smacks of McCarthyism and makes legal what the Government did illegally during the heyday of the infamous Senator from Wisconsin.

Hundreds of American citizens were illegally denied passports because Senator Joseph McCarthy believed they were part of a worldwide Communist conspiracy to overthrow our Government. An excellent case in point is the treatment of Paul Robeson. He was everything that all red-blooded American youth are taught to aspire. He was an all-American football player in college; premiere actor, singer, producer, orator. He was an intellectual who was admired, almost deified around the world. He spoke seven languages fluently. But his political philosphy and his socialistic endeavors rankled the Senator from Wisconsin. Therefore, he became persona non grata in this country and the State Department refused to grant him a passport. Thus he was placed in a position of not being able to share his marvelous talents with those outside our country and in the process denied the right to earn a living inside.

Paul Robeson was in such demand as an artist that during the McCarthy era he staged a performance on the Canadian-United States border; 25,000 Canadians stood while he entertained them without setting foot outside of the "land of the free and the home of the brave."

The seven Supreme Court Justices who supported the Agee decision rendered an injustice to those who honor and cherish the first amendment. The Congress of the United States should "with all deliberate speed" rectify this travesty. Nothing in the Bill of Rights or the Constitution is more meaningful than the guarantee of free speech and travel.●

FORGOTTEN WIDOWS

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. DYSON. Mr. Speaker, today I am introducing legislation to remove one of the tragic inequities from the military retirement survivor benefit plan. My bill would provide an annuity for military widows whose husbands died in retirement after 20 to 40 years of service and before the first survivor benefit plan (SBP) was passed by the Congress on September 21, 1972. When the 92d Congress passed the survivor benefit plan it was hailed as "one of the most important pieces of legislation ever introduced for military personnel." In nearly every instance that assessment is still valid today.

When a member of the Armed Forces retires, many changes occur in his or her circumstances, but none as dramatic as those in the benefits available to the family in the event of death. All benefits which the survivors would receive, with the exception of social security, are either lost or are at best in question. This is because of the status change from active duty to retirement. Dependency and indemnity compensation (DIC), paid by the Veterans' Administration in the event of an active duty death and based on the pay grade of the deceased, will not be paid in retirement unless the cause of death can be attributed to military service. Death in retirement occurs far more frequently from nonservice connected causes; hence, there is no payment made to the surviving spouse and children from the VA.

The problem compounds itself for the surviving spouse as her last child attains age 18 when social security payments to the surviving spouse are suspended until she is at least age 60. Therefore, if the death is nonservice connected and the last child is age 18 when the surviving spouse is in the age range of 45 to 55, there would be no money coming from any Government source until age 60 or later.

The above situation is one in which many widows find themselves today, creating the class distinction of forgotten widows. Tragically, the Congress never seriously addressed the plight of these widows who virtually have no one to turn to but this body. Consequently, I am introducing legislation which will provide an SBP annuity for these widows, equal to 55 percent of their deceased husband's retired pay at time of death, which in most cases was very low compared to present pay scales. It is estimated that there are less than 40,000 of these pre-1972 widows, most of whom are between 60 to 90 years of age.

These military widows are victims of long war periods with low pay, many of whom are existing in poverty. They spent most of their lives in a military transient status. As captives of these circumstances many are minimum income widows who are in dire straits due to runaway inflation. These widows of military personnel had little or no opportunity to enter the work force during their marriages. The transient life did not lend itself to a second career in the family; thus, the military wife could not build up either social security or any other type of retirement plan for herself. Moreover, in a similar but less constraining situation a precedent was established for civil service widows. The civil service survivor benefit plan was passed in 1948. In 1958 it was made retroactive to include all pre-1948 widows. This was fine; however, the military SBP was not passed until 1972, and it was not made retroactive which created an inequity that was discriminatory.

It is encouraging to note that some of the forgotten widows were provided for in Public Law 96-402. In an effort to help some, the widows of retirement-eligible—20 years or more of military service—servicemen who died on active duty before September 21, 1972, were brought under SBP, since widows whose husbands died on active duty after that date were included in the original SBP law in 1972. Consequently, the SBP was made retroactive for some widows, but not for all of them.

This action by the Congress eliminated one inequity, but it left the other forgotten widows without help. The widows of retired servicemen who died before September 21, 1972, were not included in the SBP bill when it passed. Living retirees, even though they had previously not elected any sort of annuity initially for their surviving spouses, were accorded an open period in which to take advantage of the new SBP. The widows had no such option. Their retired servicemen were dead. This seems sadly inconsistent within the spirit of that law when widows whose retired husbands lived long enough after September 21, 1972, to make that election, and those whose husbands—because of fate—were unable to do the same.

These forgotten widows have been left to the mercy of the Congress. They do not have a strong voice in our country. And, clearly, the time has come for this body to acknowledge the tremendous contributions of these women and to act favorably and with compassion on this vital legislation.●

GUNS AND BUTTER—THE TAXPAYERS' NIGHTMARE

HON. DONALD J. PEASE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. PEASE. Mr. Speaker, I read the July 17 Washington letter of the National Farmers Union with great interest.

It appears that the Farmers Union Milk Marketing Cooperative is unhappy about the reluctance of Secretary of State Haig to sell surplus butter to New Zealand. Secretary Haig is concerned that the butter would be resold to the Soviet Union at world market prices or even below the current market price. As I have pointed out several times in the past, the sale of this butter on the world market is equivalent to the U.S. Government giving a Federal subsidy to the Soviet Union.

We have spent several of the last few weeks discussing how to spend hundreds of billions of dollars for the defense of our country and those of our allies against the threat of Soviet strength and influence. The reality of this threat is being demonstrated in Afghanistan every day. A potential subsidy of any kind to the Soviet Union is unthinkable.

In order to increase the strength of our national defense, we have called upon all Americans to sacrifice. We have reduced or eliminated many vital social programs. To expect the American people to support our national defense and the Soviet Union is just not rational.

This is not to suggest that the butter and other surplus dairy products be left to rot in storage. This would be a further waste of money, not to mention the storage costs involved; over $25 million in the last 2 years. The Agriculture Act of 1980 provided for food bank demonstration projects. These projects could be the simple solution to a complex problem: the disposal of surplus dairy products and getting food to the poor and needy people of America.

The Department of Agriculture has been painfully slow in its progress on this project. But finally, the Federal Register has just published the regulations for application for participation in the program. Hopefully, the De-

partment of Agriculture will move more expeditiously toward implementing of these projects.

The Farmers Union Milk Marketing Cooperative is asking for a signal from the administration. I trust that signal will be that we will not, under any circumstances, ask American taxpayers to subsidize the Soviet Union.●

TOWARD PERMANENT TAX REDUCTION

HON. DAVID F. EMERY

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. EMERY. Mr. Speaker, tomorrow morning, the House of Representatives is scheduled to consider the 1981 Tax Incentive Act as well as the Conable-Hance bipartisan substitute endorsed last night by President Reagan in his straightforward address to the Nation. The positive public response to the President's speech has been overwhelming with telephone calls to my Maine district offices running 2 to 1 in favor of the bipartisan substitute. The debate on H.R. 4242 and the bipartisan alternative may be, in short, the single most important legislative activity of the 97th Congress. The votes we cast tomorrow will shape economic activity in the United States for the next decade.

The differences between these two approaches to reducing taxes are clear; the philosophies inherent in their designs distinct. Conable-Hance provides a guaranteed, 3-year, 25-percent personal income tax cut which will provide greater relief to individuals in all income brackets than will the committee bill. The third-year tax cut included in the Ways and Means Committee bill is triggered only if the economy meets specific performance goals. The irony of the situation is that those economic assumptions were devised by the administration based on the consumption, investment, and savings patterns which would follow passage of a long-term, minimum, 3-year tax reduction. The short-term, shortsighted 15-percent cut included in the committee bill effectively insures a substantial tax increase for Americans in 1983 and thereafter.

In addition to giving taxpayers a cut whose percentage and duration will allow all wage earners to plan ahead, add to their savings, or invest in the market over the next 3 years, the Conable-Hance bipartisan substitute includes an income tax indexing provision similar to that approved by the Senate, but not found in the Ways and Means Committee bill. The indexing provisions slated to begin in 1985 will all but end the "bracket creep" which pushes wage earners into higher tax brackets during inflationary periods and robs them of all hard-earned salary increases. Equally important, with the adoption of indexing, Congress will be forced to act explicitly to raise taxes. No longer will the Federal Government have the luxury of an inflation-induced tax windfall to finance unnecessary, wasteful but politically-expedient Government support programs. For once, the taxpayer will have some protection as well as the first genuine guarantee of permanent tax relief he or she has ever received.

Taken together, the 3-year tax cut, coupled with the institution of indexing, set the Conable-Hance bipartisan substitute apart from the Ways and Means Committee alternative. On the basis of personal tax cuts alone, the bipartisan package should be expediently adopted. However, there are other differences between the two approaches to economic policy which enhance the bipartisan substitute's stature as the strongest, most viable path to economic recovery.

Conable-Hance utilizes the 10-5-3 rapid depreciation system included in the original Capital Cost Recovery Act and cosponsored by over 260 Members of this House. The legislation is specifically designed to provide all categories of business with the ready capital they desperately need to expand operations, create new jobs, and increase productivity. It is precisely this type of tax cut, in combination with the scaled back rates for businesses making less than $50,000 in profits, which will prove invaluable to all job-creating enterprises in this country.

In contrast, the business tax provisions in H.R. 4242, the Ways and Means Committee bill, are designed to give large corporations the lion's share of tax cuts as a result of a 7-year phased reduction in the maximum corporate tax rate from 46 percent to 34 percent by 1987. Additionally, by creating a new aid for distressed industries program, the committee bill gives a blanket refund option to all businesses falling under the broad category of distressed industry. Undoubtedly, the domestic auto, steel, mining, and airline industries are suffering, but there are a number of healthy companies included within the industry captions. At the very least, guidelines should be imposed insuring that only substantially distressed companies rather than entire industries receive tax concessions.

The differences between the business provisions in the Ways and Means Committee bill and Conable-Hance can be succinctly summarized. While the committee bill provides a generous slice of tax relief to large corporations and distressed industries, the bipartisan substitute more carefully targets the bulk of tax relief to that sector of the economy responsible for two out of every three new jobs: small and growing business. Additionally, the bipartisan substitute's long-term reductions in personal cuts will assist the literally millions of "mom and pop" operations which use the standard 1040 form. The Ways and Means Committee bill provides only 2 years of guaranteed relief for these businesses. Right now, the bulk of tax cuts should be going to those sectors of the economy where the bulk of new jobs are actually created and in Conable-Hance that is precisely what we will get.

At this juncture, passage of the Conable-Hance bipartisan tax package must be our first priority and, given our record to date and the successful approval of over $37 billion in budget cuts, I am confident that Congress will ultimately deliver a tax bill to the White House designed to encourage the investment and personal savings necessary to put our economy squarely on the road to recovery.●

SEVENTH YEAR OF TURKISH OCCUPATION OF CYPRUS

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 21, 1981

● Mr. LANTOS. Mr. Speaker, this month marks the seventh anniversary of the stormy Turkish invasion of Cyprus. Thirty thousand Turkish troops form a menacing army of occupation on Cypriot soil. Minimal progress has been made in resolving this untenable crisis which has devastated the lives of hundreds of thousands of Cypriot people. Efforts to achieve representative self-government on Cyprus are at a standstill.

Turkish forces currently occupy 40 percent of the land on Cyprus and control 70 percent of the island's vital resources. Two hundred thousand Greek Cypriots have fled to the more populous south, where they remain refugees in their own homeland. Eight thousand people still live in tents. Two thousand Greek Cypriots—and eight Americans—remain yet unaccounted for.

The United States has both a moral and a strategic obligation to press for a swift, equitable agreement for self-government on Cyprus. America—as a nation built upon the ideal of individual rights and self-government for all citizens—cannot allow this flagrant violation of Cypriot national sovereignty to continue. As a nation committed to international stability and mutual cooperation, we must pursue all avenues to promote peaceful democratic self-determination in this critically strategic location at the crossroads of the Mediterranean.

I commend President Reagan and Secretary of State Haig for making the concerns of the Cypriot people a priority on their international agenda.

I call upon this administration to intensify its efforts to achieve a just and lasting resolution to this devastating effrontery of international justice. The United States cannot—and will not—tolerate a Turkish army of occupation in the homeland of the Cypriot people.●

THE IMPACT OF REAGAN'S CUTS IN YOUTH JOBS PROGRAMS

HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. VENTO. Mr. Speaker, the first impact of the Reagan budget cuts are beginning to emerge in our communities. Ron Finnegan, a program director in the St. Paul public schools, is close to the action. In the following article from the St. Paul Dispatch of July 27, 1981, he relates the practical impact of the Reagan policy on the kids and on our community:

FUND CUT WILL END JOB TRAINING FOR CITY YOUTHS

(By Denise Johnson)

About 180 St. Paul young persons now working and attending school on a special earn-and-learn program will get their last paycheck Friday—even though they expected to be working for another two months.

The students will lose their jobs because federal funds, allocated last year for this summer's project, have been cut off.

City authorities were recently notified that the Youth Employment and Training Program will be terminated and will not receive the remaining $51,000 that was allocated for this fiscal year. Students who were supposed to work until the end of September will be out of work at the end of this month.

Program directors say that because of anticipated additional federal budget cuts they expect another 150 youths to lose their jobs by the end of September, including about 90 Indochinese youngsters who are being trained as language tutors.

The training program and several other youth work-study programs for economically disadvantaged people between the ages of 14 and 21 are administered by the St. Paul School District through its Center for Youth Employment and Training. Funds for the program come from the federal government through the Comprehensive Employment and Training Act—often referred to as CETA—and are channeled to the School District by the city's Manpower office.

The purpose of the program is to provide part-time jobs for economically disadvantaged youths who have dropped out of school. They also are encouraged to set up a program for returning to school, which can include a General Educational Development degree program, attending night school or going back to a traditional school. Program participants are placed in minimum-wage jobs that often are related to the student's educational goals.

Ron Finnegan, program director, said the training program and its predecessor, the Neighborhood Youth Corps, have provided a valuable service to the community by keeping kids out of trouble and helping young people become viable contributors to the economy.

"We're putting kids out of work two months early. The private sector is not in any position to pick them up," Finnegan said, "Our kids come from low-income families, some have children and are supporting themselves. They don't have many (financial) options.

"Kids that are not working are going to find some other way to make money," he added, explaining that some students could resort to criminal activity or the welfare system.

Five youth-oriented, federally funded job programs, including the youth training program, are operated out of the school district's Center for Youth Employment and Training, and it is expected that two other projects will be terminated at the end of September. The Indochinese youth training program, and the Youth Community Conservation Improvement Program also will be disbanded if further budget reductions recommended by President Reagan are approved.

"It really hurts me, because out program works," said Finnegan, explaining that he has been working in St. Paul job-study programs since 1965. "If they (the Reagan administration) are basing decisions on other projects nationally that haven't been successful, we shouldn't be penalized for it."

Finnegan said the St. Paul center serves about 2,000 students a year, many of whom go on to complete their high school educations.

"There are many young people in St. Paul today who have damn good jobs who were our students," Finnegan said. "In fact, one of the people we will have to lay off has been with us for 12 years. He started in this program while in high school, later went to college and then came to work here in 1976."

Also as a result of the budget cutbacks, Finnegan will have to reduce his staff from 23 to about 10 within the next several months.

Jacquie Shabolm, a former Neighborhood Youth Corps student, is now a city Manpower planner and works on youth programs. She says the federal budget cuts could result in a "dramatic increase in teen-age unemployment and the accompanying antisocial behavior."

"My concern is that we don't have a comprehensive view of all the cuts. Those are only the CETA reductions. What about the cuts in the Department of Education and other areas that will affect kids?"

Readus Fletcher, assistant Manpower director, said he considers the reductions a "giant step backwards."

"These kids do not have economic viability," he said. "What is happening in England right now is a result of young people in that same situation. I believe we are going to see a lot of frustration like we did in the late 1960s and early 1970s—with the same results."●

THE DEMOCRATS' TAX CUT PLAN

HON. JAMES V. HANSEN

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. HANSEN of Utah. Mr. Speaker, as this tax debate rages on, Members on the Democratic side of the aisle insist on claiming that the O'Neill-Rostenkowski proposal will give more tax relief to those earning below $50,000.

Well, the Congressional Research Service has just completed a study which casts grave doubts on that Democratic claim. The CRS study shows that if a third year of tax cuts goes into effect, the cutoff point for relief is not $50,000, but rather $35,000; and of course if there is no third-year tax cut—which is highly likely if O'Neill-Rostenkowski passes—all Americans, including those earning less than $50,000, will pay much more in taxes under that 2-year 15-percent plan than under President Reagan's 3-year, 25-percent tax cut.

In reality, the O'Neill-Rostenkowski plan will increase taxes for all levels of wage earners, because, taxes, driven by inflation, will increase by 22 percent over the next 3 years. Therefore, under the 15-percent Rostenkowski plan, the American taxpayer will pay an average of 7 percent more in Federal taxes in 1984. Under President Reagan's 25-percent tax cut, American taxpayers will receive an average 3-percent tax break.

So, at the end of the 1984 tax season, the tax score will either be minus 7 or plus 3 for the beleaguered American taxpayer. Which will it be?●

TAX CUT LEGISLATION

HON. SAM GEJDENSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. GEJDENSON. Mr. Speaker, the House of Representatives will soon consider the biggest tax cut in history. I have stated publicly on many occasions that I support cuts to relieve the effects of inflation on American wage-earners, to correct inequities in the Tax Code, and to encourage business investment and increased productivity. I have cosponsored a number of measures which are consistent with my views. My goals in addressing my colleagues today are to reaffirm my support for tax cuts and to state the objectives which I feel the reforms should reflect.

Before I can endorse any tax plan, I have to look at the issues of who will benefit most and whether the changes will be effective in producing economic results.

A major tax cut proposal must be subject to careful scrutiny for fairness. Rather than working for a strictly across-the-board cut in income taxation, I favor reductions which focus on low- and middle-income wage earners. I believe that any tax cut which shortchanges working Americans is unfair. Yet President Reagan first pro-

posed a 3-year, straight cut which offered 30 percent of its benefits to families with incomes of over $60,000—a group which files only 4.4 percent of all tax returns. If his plan were to be adopted and fully phased in by 1984, a family earning over $100,000 would experience a 10.5-percent increase in disposable income, as opposed to a 1.1-percent bonus to the family living on $10,000.

In the question of effectiveness, I feel it is wrong to commit billions of dollars in tax cuts for the next 3 years while we continue to have strong doubts that the promised economic results will be produced. The goals of a tax cut are twofold: To relieve the tax burden on the American consumer and to encourage savings and investment in the private sector. All we know is that lower marginal tax rates will give people more money to spend. What we do not know is where—and how much—people will save and invest. I do not support efforts to spread tax cuts around without first considering where the help is needed and where it will do the most good. The program cannot be effective unless efforts and relief are targeted.

I believe that reform must be directed at most Americans, not at the small percentage of wealthy families, and must be designed to increase incentives to work and save. To help our Nation achieve these goals, I have:

Cosponsored a bill which would totally exempt from Federal income taxation the first $1,000 ($2,000 on joint returns) earned on deposits in savings institutions;

Cosponsored legislation to expand the individual retirement account concept so that more people can take advantage of this tax-sheltered plan;

Cosponsored a bill to offset the marriage tax penalty, an inequity which has become more acute as the number of two-earner families has increased;

Endorsed the idea of widening tax brackets for people earning under $50,000, since these individuals are most adversely affected by the "taxflation" which occurs when their cost-of-living raises simply push them into higher brackets;

Cosponsored legislation to permit tax-free savings certificates which would provide more funds for mortgages;

Supported some type of reduction in marginal tax rates, but with reductions targeted to the $15,000 to $50,000 income classes.

If properly implemented, a tax cut plan can give families the help they need in these days of high inflation while encouraging savings and investments so that businesses have more capital upon which to build. I intend to do all I can to see that the upcoming debate—and the Internal Revenue Code changes which emerge from it—are consistent with these goals.●

CHIKARA HIGASHI

HON. WILLIAM M. BRODHEAD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. BRODHEAD. Mr. Speaker, in the course of my work on United States-Japanese trade problems, it has been a pleasure to become acquainted with Mr. Chikara Higashi, a distinguished official of Japan's Ministry of Finance. Mr. Higashi has been serving as a visiting scholar at the Brookings Institution and finishing his doctoral degree in business administration at George Washington University.

Now, Mr. Higashi is returning to Japan to resume his responsibilities at the Ministry of Finance. I would like to share with my colleagues some insights into this excellent civil servant and ask them to join me in wishing him well in his important work in Japan.

Besides being a man of great warmth and charm, Chikara has a remarkable intellect and tireless energy. He has used these talents to become an expert on the politics and economics of the United States and to help us to understand the policies of his own country. His advice and guidance have been invaluable to me and to many others in our attempts to understand the Japanese viewpoint and work toward mutual solution of our problems. He has become a cross-cultural man, serving as a conduit for the two-way communication which is so vital to good intergovernmental cooperation.

As he leaves Washington, Chikara leaves behind a great many good friends both in and out of government. I am proud to be one of them and I know that he will continue to work for the cause of international friendship and understanding.●

RESOLUTIONS IN OBSERVANCE OF CAPTIVE NATIONS WEEK

HON. BOBBI FIEDLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Ms. FIEDLER. Mr. Speaker, to mark the 23d observance of Captive Nations Week, I wish to insert resolutions from Americans for Freedom of Captive Nations, Los Angeles, Calif., and the State of California. It is my very great privilege to be able to show the broad and deep support that exists in California—and throughout America—for the captive nations and their brave and enduring peoples:

AMERICANS FOR FREEDOM OF CAPTIVE NATIONS' RESOLUTION

We, Americans for Freedom of Captive Nations, assembled at the Patriotic Hall Auditorium in Los Angeles on July 11, 1981, adopt this resolution:

Whereas, Captive Nations Week is annually observed in the Third Week of July, since 1959, according to Public Law 86-90 of U.S. Congress, and

Whereas, the Bolshevik Communist leadership of the Soviet Union persists on a course of expansion of its colonial empire over the entire world, and

Whereas, Soviet troops continue to carry out abysmal atrocities against the people of Afghanistan, and

Whereas, systematic genocide is being committed against many captive nations in the Soviet Union, with the goal of eradicating their cultural and ethnic values, and

Whereas, Central Europe is subjected to Soviet foreign rule and crippled by the pervasive Communist intrusion into all spheres of life, and

Whereas, the world is being terrorized by assassinations and attacks on the life of world leaders, fostered by the Soviets, and

Whereas, the incorrigible evil of Communism is given recognition in treaties, which affirm the unprecedented Soviet domination over men and peoples in the expanding Soviet sphere of influence: Now, therefore

We propose to the legislative, judiciary and executive branches of the United States Government

To affirm the truth that men and women are created equal and have certain inalienable rights, called freedoms in our Constitution;

To state that the Constitution comes first, foreign treaties come second and must not diminish any rights under the Constitution;

To state that treaties supportive of terrorist policies, such as granting spheres of absolute interest to the barbarian Communists, have no substance since they violate the basic principles of the Constitution;

To state that the regimes of states with political systems based on totalitarianism can only be recognized by the United States de facto, but no de jure;

To adopt a One-Mankind policy, similar but not the same as the One-China policy, under which the treaties with the National Republic of China on Taiwan were broken;

To promote Human Rights under the One-Mankind policy, including a condemnation of the last colonialist system, the Soviet military occupation of Central Europe and Afghanistan;

To let the Bloodless, Peaceful World War that has begun in August 1980 in Gdansk/Poland run its course and win the Peace;

To suggest to the Soviet leadership to follow the Polish reform example in order to stave off their own economic and agricultural collapse and a famine. The United States should not supply grains to the professed enemy who shifts more labor force from food to armaments;

To continue providing leadership against terrorism in the world.

We demand the release of American Benedict Scott, held in a Mordovian prison camp. We ask the Administration to request damages to be paid to him.

We shall assemble documentary material, nation by nation, in a Whitebook on Soviet crimes, so that the Soviet debt can be assessed and charged, and the official lies of the Red propaganda refuted.

RESOLUTION PASSED BY THE CITY COUNCIL OF LOS ANGELES, CALIF.

Whereas, the week of July 12 through July 18 has been designated by the Presi-

dent of the United States as "Captive Nations Week"; and

Whereas, this observance reminds freedom-loving peoples that communist imperialism continues, through the use of force, as exemplified by the current brutal invasion of Afghanistan, to deprive a large proportion of the world's population of their freedom and independence; and

Whereas, the Soviet Union's protestations of support for "self determination, peaceful coexistence, and detente" are but cruel mockeries as long as millions of people in the "captive nations" are denied elemental human rights; and

Whereas, this enslavement of great and historic nations by communist imperialism and the denial of human rights to millions undermines and threatens freedom and peace throughout the world: Now, therefore, be it

Resolved, That the Los Angeles City Council declares the week of July 12 through July 18 as "Captive Nations Week, 1981", and joins freedom-loving peoples throughout the world in indelible support of the restoration of the independence, freedom, and human rights of the "captive peoples"; and be if further

Resolved, That the Los Angeles City Council joins with free peoples throughout the world in global solidarity with the emergent Polish organizations seeking to form indigenous free and independent trade unions.●

OFFICIAL HOME OF THE BALD EAGLE

HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. YOUNG of Alaska. Mr. Speaker, 1982 will be the 200th anniversary of the selection of the bald eagle as the symbol of the United States of America. For that period of time we, as Americans, have been associated with the bald eagle. To see this bird in its natural habitat would make any of us proud to be affiliated with this great creature. Its beauty and grace are fitting representation of our country.

I do not know how many of you have actually seen this great bird in flight. I have, and I assure you that such a sight is not quickly forgotten. There are but few places in the world where man can see this specimen of natural integrity and force. Perhaps the largest single concentration of bald eagles lies in southeast Alaska. This region has all of the elements of nature that are essential to the life of the bald eagle; a temporate climate, a sea filled with fish, and most important, a human population that is responsive to the welfare of these magnificent creatures.

There is one special place in southeast Alaska that is the scene of an annual gathering of bald eagles that exceeds all others in the world. At the Eagle Council Grounds there is a festival of sorts that took place long before men saw it. But men have seen it, and we have revelled in its splendor. And the festival goes on despite the relative proximity of human settlement.

Haines, Alaska, is close to the Eagle Council Grounds and is privileged to witness the remarkable gathering every year. Yet, were it not for the careful use of the land and sea there would not be such an event. If Haines had developed as many American towns did, the bald eagle would have deserted the Eagle Council Grounds long ago. But the people of Haines are not as shortsighted as that, they realize that no material gain would ever match the unique beauty of the bald eagle. I for one am in debt to these citizens of Haines and you are too if you prize the natural world as I do.

That is why I feel that it is only right that Haines, Alaska, be proclaimed the official home of the bald eagle. In passing the legislation to this effect we will only be ratifying a natural fact. Please join with me and make Haines, Alaska, the official home of the bald eagle.●

DIFFERENCES BETWEEN THE PRESIDENT AND THE HOUSE LEADERSHIP

HON. GERALD B. H. SOLOMON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. SOLOMON. Mr. Speaker, your new public relations policy of making yourself more available to the press and television cameras appears to be paying off. Rarely has the Speaker of the House of Representatives managed to generate so much publicity. And by drawing attention to yourself as leader of the loyal opposition, Mr. Speaker, you are making it clear to the American people that there really are opponents of the President's economic recovery program. If the President's plan is not implemented and the economy does not recover like it should have, then the American people will know who to blame. In that respect you have done the country a service.

The differences between the President and the House leadership are, without question, becoming more clearly defined. I have here an editorial published last Wednesday by the Times Record in Troy, N.Y. that is all about you, Mr. Speaker. It is really quite a humorous piece, but as you know, there has to be an element of truth in satire to make it funny. I am afraid there is more than just an element of truth in this editorial and I am inserting it into the CONGRESSIONAL RECORD for my colleagues to read.

[From the Times Record, July 22, 1981]

"TIP" O'NEILL TRANSLATED

House Speaker "Tip" O'Neill's rage at the repudiation of his spend-spend-spend brand of liberalism has him popping up with apoplectic regularity on television and in newspaper reports. He always seems to say basically the same thing: "What's a president doing running the country?" Followed by a few bars of "Let It Be Me."

But like all politicians, "Tip" needs a translator. We modestly accept the job, translating his remarks into what he really means.

O'Neill: The Moral Majority "has so much clout in the White House . . . They have President (Reagan's) ear, no doubt about that . . . Ah, there's selfishness and hatred there."

Translation: I used to have clout too. Remember? I used to have a president's ear too. Remember? And boy, you sure wouldn't find any selfishness and hatred in a Democratic White House.

O'Neill: I'm "frightened" by the Moral Majority because it sends representatives into the offices of congressmen "and says, 'Here are the tapes we are going to run against you if you vote against the president next week.' That's a dangerous group."

Translation: What happens if the Moral Majority persuades my constituents to toss me out of office next year? I'm too old to get a job. And besides, where would I get one, the job market being what it is thanks to my progressive liberal policies the last few years. Wow, the thought of losing that big paycheck and those perks is frightening.

O'Neill: Reagan is "all powerful. I would hate to see an imperial president."

Translation: I would hate to see an imperial conservative Republican president. Now, you take Teddy, that would be another matter. Teddy is noble and good and honest and trustworthy and helps lady Supreme Court justices across the street. And besides, that's an ear into which my whisper "spend, spend, spend" wouldn't go unheeded.●

REPORT ON THE MX

HON. RON PAUL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. PAUL. Mr. Speaker, an outstanding report on the MX missile was recently written by Jeffrey Rogers Hummel, and I would like to bring it to my colleagues attention.

Jeff Hummel, a former Army officer, is a Ph. D. candidate in history at the University of Texas. His analysis deserves the most careful consideration, as we vote on the MX program.

GOING MOBILE: A REPORT ON THE MX

The Missile Experimental, or MX, is an extremely controversial weapons system, and deservedly so. The MX would involve one of the most extensive construction and engineering projects ever undertaken. Air Force Brigadier General Guy Heckler described the MX as "man's largest project—larger than the Great Wall, larger than the pyramids, larger than the Alaska Pipeline or the Panama Canal". When completed, the MX will include 4,600 hardened missile shelters, two operating centers together employing between 13,000 and 17,000 workers, three to six area support centers, and 9,000 miles of connecting roadway. This mileage is equivalent to about one-fourth the interstate highway system. Not all of these roads

will be paved, but they will all have to be strong enough to carry the 800-ton MX transporter. The Air Force will need access to 8,500 square miles, an area about the size of the state of New Hampshire.

The Air Force estimates that the cost of developing and building the MX system will be $33.8 billion in 1980 dollars, while yearly operating costs will be $425 million in 1980 dollars. If one assumes that inflation continues at the current rate, the $33.8 billion acquisition figure will rise to $108 billion. That total does not include the cost of the 2,000 nuclear warheads needed for the system, which will be supplied by the Department of Energy. If past cost overruns on weapons are any guide, the total cost should be increased by another 50 percent. The General Accounting Office has already found $816 million of unanticipated expenditures that the Air Force is covering up.

The Air Force's environmental impact statement examines nine potential alternative deployment arrangements for the MX. By the beginning of July, President Reagan should have made a final decision, picking one of these nine. Seven of them would place the system entirely within the states of Nevada and Utah; one would place the system entirely within the states of Texas and New Mexico; and one, the split-basing mode, would divide the system between Nevada/Utah and Texas/New Mexico. Each of these alternatives has its own long list of disadvantages.

Most of the land required for Nevada/Utah basing is government-owned land already, so the main problems with these two states are environmental. Water is the most severe environmental problem. The Air Force predicts that MX construction and operating will consume between 310,000 and 570,000 acre feet of water (about 100 to 200 billion gallons). In contrast, the entire city of Las Vegas uses only 72,000 acre feet of water in a year. The environmental impact of Texas/New Mexico basing is only slightly less troublesome, and water is still an issue. More important, most of the land for Texas/New Mexico basing is privately owned, and productive farm land at that. Many homes would require relocation.

Needless to say, the residents of all four of these states are not exactly overjoyed at the prospect of having their homeland turned into a giant "nuclear sponge", to use the words of Air Force General Lew Allen. Broad-based coalitions, encompassing groups representing the entire political spectrum, have organized in these states to fight the MX. Even the extremely conservative Mormon Church has declared its opposition.

Most of the MX's opponents focus either on the system's massive cost or its harmful environmental impact. The case against the MX, however, is not simply a matter of costs outweighing benefits. Even from a purely military standpoint, the MX system is unjustified. Indeed, some of the most dangerous aspects of the MX are its military features.

The MX is an advance, land-based mobile ICBM (intercontinental ballistic missile) system. There are two distinct aspects to the system: (1) the basing mode and (2) the missile itself. Although these two are frequently discussed together, they really should be considered separately, because they each have their own set of alleged justifications. It is possible to have the MX basing mode with a different missile (such as the Minuteman III) or a different basing mode for the MX missile.

The source of the MX system's great expense is its mobile basing. The justification for mobile basing is the alleged increasing vulnerability of hardened U.S. ICBM silos to a Soviet attack. Soviet ICBMs have always carried higher-yield warheads than their U.S. counterparts, but recently the Soviets have begun to match the U.S. in missile accuracy. This increased accuracy has improved the hard-target kill capability of Soviet missiles and threatens, it is argued, the survivability of U.S. land-based ICBMs in the event of a Soviet preemptive first strike.

To close this "window of vulnerability," the Air Force plans to hide each MX missile in one of a cluster of 23 multiple protective shelters. These shelters will be arranged in a linear road system with a distance of approximately one mile between them. An 800-ton shielded transporter will carry the missile from shelter to shelter, stopping at each shelter during its rounds so that the missile's actual location will remain uncertain to outside observers. A total of 200 missiles is envisaged. If the system works as planned, the Soviets will have to target all 4,600 shelters in order to carry out a first strike.

One objection that can be raised to this basing mode is that it implicitly assumes that the Soviets will observe the SALT II limitations on the number of ICBMs and MIRVs (multiple independently-targetable reentry vehicles) in their arsenal. Otherwise, the Soviets can neutralize the MX shell game simply by building more missiles and/or increasing the number of MIRV's on each missile. Either way, the Soviets reach a point where they can target all the shelters with plenty of warheads left to spare. Without SALT II, the necessary expansion of the MX system faces no upper bound, as it becomes just as vulnerable as present land-based ICBMs.

Several alternatives to the multiple-protective-shelter basing mode have been suggested. One of these would put the MX missile on small diesel powered submarines, one or two per sub, operating close to U.S. shores. This basing mode would be much less expensive, but the Air Force opposes it strenuously because it would turn control of the MX over to the Navy. Another alternative involves protecting the MX with a BMD (ballistic missile defense) essentially a new abbreviation for ABM) system. Some even want a BMD system as a supplement rather than substitute for mobile basing.

All of the proposed alternatives, even when cheaper than multiple protective shelters, miss the basic point. U.S. land-based ICBMs are not vulnerable to a Soviet preemptive first strike, and it does not matter even if they are. There are any number of reasons why the Soviets could not pull off a successful first strike, each one of them sufficient to deter even the most diabolical aggressor.

First, despite their increasing accuracy, Soviet missiles are still not lethal enough to knock out a sufficient number of U.S. ICBMs. The Pentagon has a history of exaggerating Soviet capabilities, but if their latest intelligence is correct, the most lethal MIRVed Soviet ICBM is the SS-18 Mod 4, which carries ten 500 kiloton warheads each with a CEP (circular error probably) of 850 feet. CEP measures the accuracy of an ICBM by giving the radius within which one half of the warheads are expected to fall. This combination of accuracy and yield give the Soviets only a 60 percent chance of destroying a U.S. Minuteman silo.

Admittedly, as time goes on, the Soviets will improve the accuracy and kill probabilities of their ICBMs. But even the 60 percent figure, or whatever probability value the Soviets can attain in the forthcoming years, overestimates Soviet capabilities. There are problems both with the equations used to compute these probabilities and the variables put into the equations. The most serious uncertainties surround the CEPs of ICBMs. The ability of either U.S. or Soviet ICBMs to duplicate in practice the accuracies they achieve under artificial test conditions is open to question. Neither the Soviet Union nor the U.S. has ever test fired an ICBM over the North Pole, which would be the missile's route in an actual nuclear exchange. The ICBM's inertial guidance system must be programmed with precise data on the gravitational anomalies along its intended path. Even with such data, the warhead's accuracy can be degraded by such phenomena as thunderstorms and solar flares, if they affect the warhead's trajectory after the missile has burned out.

Not only have the U.S. and Soviet Union never test fired an ICBM over the North Pole, they have never exploded a nuclear warhead at the end of an ICBM flight, nor have they fired more than a few ICBMs in conjunction. An effective first strike requires that all components of the attacking force work together as flawlessly as they do when tested separately under unrepresentative circumstances. Furthermore, they must all do so the first time. With a first strike, there can be no test runs or second chances.

If all of the above is not enough to give Soviet leaders second thoughts about their ability to launch a preemptive first strike, there is the additional fact that a first strike does no good if the U.S. adopts a launch-on-warning posture. Although the U.S. officially disavows launch-on-warning, the Soviet leaders can never be sure.

More important than all the operational difficulties in conducting a successful first strike is the fact that U.S. land-based ICBMs compose only one leg of the U.S. government's strategic nuclear triad. The U.S. continues to maintain a strong nuclear deterrent on the other two legs: strategic nuclear bombers and submarine-launched ballistic missiles. Suppose the unlikely event that the Soviets conducted a successful preemptive attack that wiped out all U.S. land-based ICBMs, and all U.S. strategic nuclear bombers, and the 45 percent of U.S. missile-launching submarines that are not continuously on station—within range and ready to fire—at any particular time. The U.S. would still retain on the remaining missile-launching subs a nuclear arsenal of approximately 3,000 warheads carrying the equivalent of 470 megatons. That amounts to more than 10 warheads for every Russian city with a population over 100,000. According to the Pentagon's conservative damage estimates, which take into consideration mainly the blast effects of nuclear explosions, 400 equivalent megatons will destroy 70 percent of Soviet industry and 35 percent of the Soviet population.

Only because U.S. nuclear doctrine requires that each leg of the strategic nuclear triad be able to independently deter a Soviet attack has U.S. ICBM vulnerability become an issue. The defense planners remain blind to the fact that, if the U.S. ICBMs are truly becoming vulnerable, the solution is to totally scrap land based ICBMs and move to a strategic dyad, rather than spend a fortune on mobile basing.

While the MX basing mode is the most expensive part of the system, the MX missile itself is the most dangerous. Currently, the U.S. Minuteman III with a Mark 12A warhead has a CEP of 730 feet and a hard-target kill probability against Soviet silos of 55 percent, roughly comparable to Soviet capabilities. In comparison, the MX missile will carry ten 335 kiloton MIRVs each with a CEP of 300 feet, giving the MX a single-shot hard-target kill probability of 99 percent!

Of course, a preemptive first strike is as unfeasible for the U.S. as it is for the Soviet Union. If the Pentagon, however, is paranoid about the survivability of U.S. land-based ICBMs, imagine how the MX will make the Soviet leaders feel about the survivability of their land-based ICBMs, which account for a large portion of their overall nuclear arsenal. Over 70 percent of Soviet warheads are on their ICBMs, as opposed to less than 25 percent for the U.S.

The MX is a destabilizing counterforce weapon. Counterforce, the ability to destroy the military capabilities of an opponent, figures prominently in scenarios involving limited nuclear exchange. U.S. planners claim they are only interested in "second-strike counterforce", but from the Soviet perspective, U.S. weapons designed for "second-strike counterforce" are indistinguishable from weapons designed for a preemptive first strike designed to knock out Soviet second-strike capabilities. Deployment of the MX will heighten international tension, and may even precipitate the very first strike it was designed to deter. The MX will usher in a new and more deadly phase to the nuclear arms race, in which any world crisis could trigger nuclear holocaust.

In short, libertarians must prevent deployment of the MX. Doing so is the prerequisite for bringing the insane nuclear arms race between the U.S. and Soviet governments under control. Stopping the MX is not simply a matter of avoiding an enormously expensive, unnecessary weapons system that will destroy the environment and disrupt communities, although these are important factors. Stopping the MX is a matter of survival.●

NFIB SUPPORTS REAGAN TAX PLAN FOR SMALL BUSINESS

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. KEMP. Mr. Speaker, the president of the United States' largest small business organization, the National Federation of Independent Business, has issued a strong statement of support for the President's bipartisan tax proposal. I would like to submit Mr. Wilson S. Johnson's statement for the RECORD, and to urge all my colleagues to recognize the benefits which the bipartisan bill offers for the greatest job creators in our country: Small business men and women.

NFIB PRAISES SMALL BUSINESS ADDITIONS TO PRESIDENT'S TAX PROPOSAL

WASHINGTON, D.C., July 24, 1981.—The National Federation of Independent Business (NFIB), the nation's largest business organization with an excess of one-half million members, commended last night's addition of small-business incentives to the president's tax cut package, now under consideration in the House of Representatives.

"This is a major step forward in addressing the needs of small and independent businesses, which have a great deal to gain from the president's proposal," said NFIB President Wilson S. Johnson. The president's package, termed the Hance-Conable Economic Recovery Tax Act (H.R. 3849), is the largest ever considered by Congress. Besides reducing individual tax rates by 25 percent over three years, reforming death (estate) taxes and depreciation, the proposal includes the following:

Reduction of corporate rates to 16 percent on the first $25,000 of income and 19 percent on the next $25,000, in 1982. Further rate reductions of 15 and 18 percent, respectively, would be effective in 1983.

Increase of the investment credit limitation on used equipment from $100,000 to $125,000 between 1981 and 1984 and to $150,000 thereafter.

Increase in the maximum number of Subchapter S shareholders to 25, with trusts being allowed as shareholders under certain circumstances.

Increase in the minimum accumulated earning credit from $150,000 to $250,000.

Removal of impediments to small-business use of LIFO inventory accounting rules. In addition, the Treasury Department shall prescribe certain simplifying changes in LIFO's use and prepare a study on LIFO inventory and cash accounting by December 1982.

"Tax reform ranked highest in an April survey of NFIB members," said NFIB's director of Federal Legislation, James D. "Mike" McKevitt. "The president's proposal will certainly benefit small business; the House Ways and Means proposal mainly deals with cuts at the top. Since small businesses usually buy used equipment, an increased investment tax credit will help them. Increasing permitted Subchapter S shareholders will spur small-business investment, as will an accumulated earnings credit and simplified accounting."●

COMMENTS BY YAROSLAV STETSKO

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. DERWINSKI. Mr. Speaker, in 1941, Yaroslav Stetsko and other members of the Organization of Ukrainian Nationalists led a revolt against the Soviets, and convened a national assembly. The assembly appointed Stetsko prime minister of the newly independent government. Two weeks later, because of his lack of cooperation with Hitler, he was arrested by the Nazis, and jailed in the Sachsenhausen concentration camp.

Now a resident of Munich, Mr. Stetsko recently visited Washington, D.C., and addressed Members of Congress at a luncheon held in honor of Captive Nations Week and the 40th anniversary of this Ukrainian national state. I include his address along with an article that appeared in the Washington Post July 21:

YAROSLAV STETSKO, THE LONELY PATRIOT

(By Maria Riccardi)

The small, thin man introduces himself simply as "Stetsko, prime minister of Ukraine."

Nearly 40 years ago, at age 28, Yaroslav Stetsko and other members of the Organization of Ukrainian Nationalists seized Lviv, then capital of Ukraine, from the Soviets, and convened a national assembly. The assembly appointed Stetsko prime minister of the new independent government. But on the day he took office he knew what awaited him. Two weeks later, because of his lack of cooperation with Hitler, he says, the Germans arrested him and put him in Sachsenhausen concentration camp.

Stetsko spent the next three years in "the bunker"—the prison he says the Germans reserved for "the serious cases." Slowly and carefully, he describes the solitary confinement, the physical and mental torture. "I was alone with only my spirit telling me to continue," he says, shaking his head. "I couldn't give up no matter what happened to me."

The prime minister and his wife, Slava, were in Washington last week for the 23rd observance of Captive Nations Week, celebrating the 40th anniversary of renewed Ukrainian statehood. "It is something so important to us," says Slava Stetsko, who was imprisoned for nine months by the Nazis. "We have dedicated our total selves to our country."

They return to stories of the war, their voices at times shaking with emotion. In the concentration camp, Stetsko says he refused to resign his office even when he knew that 65 of the 70 prisoners in that camp had died. He couldn't give up, he explains, his troops were still fighting for Ukrainian freedom.

Once the war was over, he says, "The one thing in my mind was to conquer that Communist empire."

In 1946 he became president of the anti-Bolshevist Bloc of Nations, and still holds the office. Today 33 subjugated countries, including Poland, Lithuania and Afghanistan, belong to the group. He is also head of the Ukrainian Liberation Movement.

His involvement in these organizations, he says, has placed him in danger. In 1959, the man who admitted to the murder of Stepan Bandera, Stetsko's friend and chief of the Ukrainian Insurgent Army, said he was about to assassinate Stetsko in Munich, which is his home.

"There is always someone on our heels," says Slava. "We have to travel in such secrecy. We cannot live openly. We cannot live secure lives because of what we believe."

They travel widely, visiting Ukrainian emigrants and gathering moral and political support. When the Ukranian nationalist army "was completely crushed" in 1951 by the Soviets, Stetsko says the country was defeated only physically. "It was not a moral defeat," he insists. "We can't be squashed. We are fighting for the great ideal—the liquidation of the Soviet supremacy."

He sighs deeply. For a moment, the 68-year-old man's eyes sadden. He picks up a copy of the speech he gave to members of Congress at a luncheon. Suddenly, his energy returns. "Synchronized national liberation revolutions within the Russian colonial empire are the only alternative," he reads aloud with power in his words. "Soviet

Russia has skillfully exploited western fear of nuclear war by blackmailing the West into meekly acquiescing to ever-increasing conquests."

Another pause. He has faith that the youth of subjugated countries will carry on this war against communism. "In our country, the younger generation has found strength in the graves of our heroes," says Slava. "They take pride in our great historical past."

The Stetskos do not have children. "We have put all of our strength to Ukraine," the woman says, fingering the gold cross around her neck.

"I have given everything," her husband adds, "and I will continue to fight until my death."

ADDRESS TO THE MEMBERS OF THE CONGRESS OF THE UNITED STATES

I would like to begin by thanking the Congress of the United States for adopting the Captive Nations resolution on July 17, 1959 and for reaffirming your commitment to the principles thereover the course of the last 22 years. I am particularly pleased that the resolution was adopted unanimously and I expect that this resolution, which remains in the interests of not only the subjugated nations but also the entire Free World, will be an integral component of the United States foreign policy.

Allow me to express my heartfelt appreciation to the Hon. Edward J. Derwinski, the Hon. Samuel Stratton and to Dr. Dobriansky for organizing today's commemoration of the 40th anniversary of the declaration of the reestablishment of the Independent Ukrainian State. I would also like to convey my sincere gratitude to the Hon. William Green for introducing a resolution in the House of Representatives designating June 30, 1981, as Ukrainian Independence Day. The future will justify the support that you are demonstrating today for the liberation of Ukraine by commemorating the latest period of Ukrainian statehood which began with the reestablishment of the Independent Ukrainian State on June 30, 1941 and lasting through 1951.

It is my conviction that the events of June 30, 1941 were of historical significance not only for my own nation, but also for all other subjugated nations. The proclamation of the restoration of Ukrainian statehood of June 30, 1941 marked the beginning of a period in our history known under international law as the Ukrainian Underground State. As a result of this proclamation the Ukrainian nation launched a two-front war of liberation against Nazi Germany and Soviet Russia—two of the greatest imperialistic, totalitarian and military powers of the twentieth century. The act of June 30, 1941 and the subsequent struggle to consolidate the renewal of Ukrainian statehood are a manifestation of the unshakable will of the Ukrainian nation to achieve the restoration of its freedom and independence.

The Ukrainian Government, created following the proclamation of independence, included not only representatives of the Organization of Ukrainian Nationalists under the leadership of Stepan Bandera, but also National Democrats, Socialists, Social Revolutionaries and individuals not affiliated with any party. On the initiative of the organization of Ukrainian Nationalists a parliamentary body was formed under the chairmanship of Dr. Konstantyn Levytskyj, a National Democrat and former Prime Minister of the Western Ukrainian National Republic of 1918. The present patriarch of the Ukrainian Catholic Church, Cardinal Josyph Slipyj, was a leading member of parliament, while Metropolitan Count Andreas Sheptytskyj was elected Honorary President. Both the primate of the Ukrainian Catholic Church and Metropolitan Polikarp Sikorskyj of the Ukrainian Autocephalous Orthodox Church issued pastoral letters in support of the newly formed government. The new Ukrainian Government enjoyed the total support and loyalty of all strata of the Ukrainian nation. This was the only Democratic government and parliament in continental Europe at that time.

The ideological and political foundation upon which Ukrainian statehood was restored in 1941 was contained in a manifesto issued in 1940 by the organization of Ukrainian Nationalists, which stated: "We Ukrainians have raised the banner of struggle for the freedom of nations and man . . . we struggle for the dignity and freedom of man, for the right to openly profess one's beliefs, for freedom of all religious denominations and full freedom of conscience . . . we struggle for the right of the working man to openly profess his political convictions . . . for freedom of assembly and the establishment of political, social and professional organizations . . ." Furthermore, the manifesto called upon the revolutionaries of other subjugated nations to join forces with the Ukrainian Nationalists in the struggle to destroy the Soviet Russian empire. This was the origin of ABN. It also stood as a challenge to Nazi Germany at the time when both totalitarian powers, having divided Europe between themselves, were at the zenith of their might.

The newly-formed government had the support of the Ukrainian Nationalist military formation and numerous insurgent units throughout Ukraine, which immediately engaged the Soviet Army on the field of battle. Having secured the main radio station in Lviv, the revolutionary government informed the nation of the restoration of Ukrainian statehood. Upon learning of these momentous developments, the Ukrainian population openly and enthusiastically endorsed the new government at mass assemblies in towns and villages throughout the country.

Consequently, the Nazis were forced to divulge their imperiocolonial aims. Following a period of tempestuous activity of consolidation of the newly-formed state, myself and other members of our government, as well as several leading members of the Organization of Ukrainian Nationalists, including its leader Stepan Bandera, were arrested by the Gestapo and sent into the concentration camps. Later, the Gestapo murdered three members of the government. Subsequently, the Organization of Ukrainian Nationalists went underground to continue the struggle for Ukraine's independence.

On behalf of our government, I sent my last letter of protest against the Nazi military occupation of Ukraine to the German Reich's Chancellor in October, 1941 from the police prison in Berlin. In that letter I warned that Germany's war in the east would be lost within three years, resulting in the Russian Communist occupation of vast areas of central Europe. Despite this projection, I openly stated that Ukraine and the other freedom-loving subjugated nations would never cease their just struggle for liberty and independence.

On three separate occasions I was confronted with an ultimatum from the highest levels of the German Reich to revoke the declaration of Ukrainian state independence, to resign as Prime Minister and to dismiss the government. Each of these demands were adamantly rejected.

A state of war existed between Germany and Ukraine. Many thousands of Ukrainian Nationalists and other patriots were executed upon capture, hundreds of thousands were put in prisons and concentration camps. A two-front war against the Russian and German occupiers of Ukraine was fought by the Organization of Ukrainian Nationalists and by the Ukrainian Insurgent Army. Operating underground, the Ukrainian Supreme Liberation Council continued the work of the arrested government.

By autumn of 1941, thousands of members of the Organization of Ukrainian Nationalists were executed, many more thousands were imprisoned by the Nazis who were acting on orders from Berlin such as these:

HEADQUARTERS,
November 25, 1941.

From the Service Command of the Security Police and of the Security Service S/5

To the advanced posts of Kyiv, Dnipropetrovsk, Rivne, Mykolaiv, Zhytomyr and Vinnytsia.

Subject: Organization of Ukrainian Nationalists (Bandera movement)

It has been ascertained that the Bandera movement is preparing a revolt in the Reichscommissariat which has as its ultimate aim the establishment of an independent Ukraine. All functionaries of the Bandera movement must be arrested at once and, after thorough interrogation, are to be secretly liquidated as marauders.

Records of such interrogation must be forwarded to the Service Command C/5.

Heads of Commands must destroy these intructions on having made a due notice of them.

——— ———,
SS—OBERSTURMBANNFUHRER.

The Ukrainian underground state and the mass armed struggle continued from 1941 to 1951. The Ukrainian Supreme Liberation Council, as the natural extention of the Ukrainian Government, exercised national authority for a decade on various parts of Ukrainian territory. The sovereignty of revolutionary authority was preserved through the military underground of the organization of Ukrainian Nationalists and the Ukrainian Insurgent Army.

The scope of the struggle had even been acknowleded by the Russians and Germans alike. For example, Nikita Khrushchev wrote in his memoirs that, and I quote: "During the second half of the war he (Stepan Bandera, leader of the Ukrainina Liberation Movement—Y.S.) fought against both us and the Germans. Later, after the war, we lost thousands of men in a bitter struggle between the Ukrainian Nationalists and the forces of Soviet Power."

A German General, Ernst Koestring, also reported that, and I quote again: "The military organization known as the Ukrainska Povstanska Armiya (the Ukrainian Insurgent Army) was formed with the aim of establishing an independent Ukraine, controlled neither by Moscow, nor by Germany. . . When western Ukraine was recaptured by the Red Army the OUN and the UPA called upon the Ukrainian masses to fight against the Bolshevists—the Russian enemy. German officers who fought their way back to us in 1945 reported that the plight of the Red Army was similar to ours: it controlled only the towns of the main communication routes, while the country

itself remained in the hands of the resistance movement."

The contemporary international situation is particularly grave. The expansion of Russian Imperialism is well known to us all. Policies of friendship, appeasement, containment, convergence and detente have proven to be useless in stemming the centuries old brazen Russian Imperialism which aims at complete world domination.

But the West must realize that within the Russian Empire there exists a new ideological and political revolutionary superpower—the subjugated nations, which is destroying the empire from within. The processes of the disintegration of the Russian Empire are at different stages in the various subjugated nations: Afghanistan, Ukraine, Poland, Lithuania, Turkestan among others.

Taking this factor into consideration, the following points should be included in Western political and military strategy:

(1) The Free World should engage Soviet Russia in the struggle of ideas and ideologies by recognizing the liberation movements of the subjugated nations as the legitimate representatives of these countries at all international forums including the United Nations;

(2) The West should provide access to the national liberation movements to the various forms of mass media to facilitate communication with their countrymen behind the Iron Curtain on a mass scale;

(3) Assistance should also be provided in the form of military training as well as other political, material and technological means of support;

(4) All of the nations of the Free World should proclaim a great charter of independence for all of the nations subjugated by Russian Imperialism and Communism.

The danger of nuclear holocaust cannot be negotiated away. Soviet Russia has skillfully exploited Western fears of nuclear war by blackmailing the West into meekly acquiescing to ever-increasing conquests. Our strategic alternative is based on the knowledge that the subjugated nations within the Russian Empire represent a vast untapped force, which in a common front with the nations of the Free World provides the strategic raison d'être for defeating the last remaining empire. Synchronized national liberation revolutions within the Russian Colonial Empire is the only alternative.

I would like to end my address to you, ladies and gentleman, with the words of an unforgettable personal friend of mine and an outstanding British military thinker, Major General J. F. C. Fuller, who wrote: "Only the unity of the Western nations and their agreement with the national liberation movements behind the Iron Curtain can insure final victory . . . the reason should be obvious. It is that the Kremlin is living on a volcano, and it knows that the most explosive force in the world is not to be found in the hydrogen bomb, but in the hearts of the subjugated peoples crushed under its iron heel . . ."●

GARDENA SISTER CITIES ASSOCIATION HONORS DARLENE OYLEAR

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. ANDERSON. Mr. Speaker, this Friday, July 31, 1981, the Gardena, Calif., Sister Cities Association will hold its annual installation dinner and honor out-going president Darlene Oylear. As I know Darlene is worthy of this tribute, I'd like to add my own congratulations and thanks.

Darlene has been a resident of Gardena for some 25 years now. After growing up in Salt Lake City, she married Dallas Oylear in 1944, and moved to Gardena the following year. In 1946 Darlene gave birth to the first of four children, Becky. Five years later Becky had a baby sister, Sally; two baby boys followed, Bruce in 1954 and Dwight in 1961. The Oylears' children obviously were a source of great happiness to the couple, but they and other children also were partly responsible for developing Darlene's interest in community service. For instance, as quoted in the Gardena Valley News, she describes her involvement in the March of Dimes as follows:

There was a polio epidemic in 1950, at the time Sally was born. . . . A very good friend of mine got polio, and her baby was born while she was in the iron lung. The March of Dimes picked up her bills, so that group has always been close to the heart of the family.

Many other groups have been blessed with Darlene's help, including the 153d Street School PTA, the Robert Peary Junior High School PTA, the Gardena High School PTA, the Girl Scouts, Boy Scouts, and the Gardena Junior Women's Club. There is one organization that has not only been blessed with her assistance, but largely owes its very existence to her dedication: the Gardena Valley YWCA. When Sally joined a YWCA youth group in 1967, Gardena did not have its own separate chapter, but was served by the Los Angeles Metropolitan YWCA. Shortly after, Gardena was served by the Harbor Area YWCA rather than the LA YWCA, but the community still lacked its own independent branch. Darlene devoted a great deal of time to changing this, serving as chairman of the board of the Gardena branch of the Harbor Area YWCA from 1972 to 1974. From 1974 to 1975 she was the vice-president of the organizing board of the soon-to-be independent Gardena Valley YWCA. She served as president of the Gardena provisional YWCA from 1975 to 1977, and then, finally, as president of the newly affiliated Gardena Valley YWCA from 1978 to 1979.

It has been a long tradition in American social life that the local community holds the major responsibility for the welfare of the individuals in it. Hence, while the residents rely on the good of the community, the community can only be as good as the residents who make it up. With this in mind, I am always heartened when I run into people like Darlene, for she makes me feel both proud of the people in my area and optimistic about the future of communities like Gardena. My wife, Lee, and I congratulate Darlene for her many contributions to her community.●

SAVING MINIMUM SOCIAL SECURITY BENEFITS

HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. VENTO. Mr. Speaker, last week this body overwhelmingly approved a resolution, House Resolution 181. This vote reaffirmed our commitment to the recipients of social security benefits by stating,

That the House of Representatives strongly urges that the necessary steps be taken to insure that social security benefits are not reduced for those currently receiving them.

As my colleagues are well aware, unless Congress acts in a positive manner, 3 million Americans will lose essential minimum benefits. The House and Senate versions of H.R. 3982, the Omnibus Reconciliation Act of 1981, have both targeted the minimum social security benefit for elimination. As such this item is not subject to modification by conference committee. Thus, it is necessary that the House waive this restrictive rule and instruct the House conferees to recede and concur to an amendment which deletes the section repealing minimum social security benefits.

I and nearly 100 of my colleagues have cosponsored House Resolution 197 to achieve this goal. This amendment offers a real opportunity for Congress to act in support of current recipients of social security and to fulfill the President's commitment of yesterday when he said:

I will not stand by and see those of you who are dependent on social security deprived of your benefits. I make that pledge to you as your President. You have no reason to be frightened. You will continue to receive your checks in the full amount due you.

I urge my colleagues to cosponsor and support House Resolution 197. At this time, I would like to bring to my colleagues, attention my "Dear Colleague" letter on this issue and the text of House Resolution 197.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., July 28, 1981.

DEAR COLLEAGUE: Yesterday, we introduced a resolution, H. Res. 197, which will give the House an opportunity to take action to prevent the elimination of the social security minimum benefit and demonstrate its support for President Reagan's pledge not to cut social security benefits.

As you are likely aware, the Omnibus Reconciliation Conference Report, because of its unprecedented breadth and complexity, will require a rule waiving various points of order for its consideration in the House.

Specifically, our resolution, which has been referred to the Rules Committee, would instruct House Conferees on the Omnibus Budget Reconciliation Act to recede and concur in an amendment which deletes the section repealing minimum social security benefits. Passage of H. Res. 197 on the House Floor would require House Conferees, within the context of the rule, to seek the timely agreement of the Senate on the original Conference Report with the single exception of preserving minimum social security benefits. Our resolution also prohibits consideration of any Conference Report reducing the minimum benefit prior to the Second Session of the 97th Congress. We think this step, though unusual, is necessary if we are to carry out the overwhelming bipartisan sentiment of the House as expressed in H. Res. 181. As Members will recall, the text of H. Res. 181 "strongly urges that the necessary steps be taken to insure that social security benefits are not reduced for those currently receiving them".

H. Res. 197 offers those Members who voted for H. Res. 181 last Tuesday a real opportunity to make a meaningful vote on the social security minimum benefit issue. If you would like to co-sponsor this important resolution, please call Harry Hoffman at 5-6631 or Marilyn Harris at 5-5871.

Let's help the President maintain his pledge not to cut social security benefits.

Warm regards.

Sincerely,

MARY ROSE OAKAR,
BRUCE F. VENTO,
CLAUDE PEPPER,
Members of Congress.

H. RES. 197

Whereas most Americans carefully prepare for their retirement over many years and base their expectations and financial commitments on their right, guaranteed by law, to receive social security benefits; and

Whereas the House of Representatives, by a four-fifths majority in support of H. Res. 181, has urged that the necessary steps be taken to insure that social security benefits are not reduced; and

Whereas the joint House-Senate conferees on H.R. 3982, the Omnibus Budget Reconciliation Act of 1981, have agreed to reduce social security benefits despite the vote of the House: Now therefore, be it

Resolved, That upon adoption of this resolution, the House shall not consider prior to the opening of the Second Session of the Ninety-Seventh Congress any bill, resolution, or conference report thereon reducing social security benefits; and be it further

Resolved, That the requirement of clause 3 of Rule XXVIII is hereby waived for the deletion of section 15203, repealing minimum social security benefits, of the conference report on H.R. 3982; and be it further

Resolved, That the House conferees on H.R. 3982 are hereby instructed to recede and concur in an amendment consisting of the text of the conference report on H.R. 3982 with the deletion of section 15203 repealing minimum social security benefits.●

VIGIL FOR SOVIET JEWRY—THE KALENDAREV FAMILY

HON. BOBBI FIEDLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Ms. FIEDLER. Mr. Speaker, today, as part of the Congressional Vigil for Soviet Jewry, I would like to call the attention of my colleagues to the plight of Mikhail and Eugenia Kalendarev and their son Boris. They are refuseniks—those who have asked for and been denied a visa to leave the Soviet Union—and live the hard life of nonpersons in a totalitarian regime. Today, we must keep faith with the Kalendarevs and thousands more refuseniks. It is only through the efforts of those who can still speak and travel freely that the refuseniks can have any hope of joining their friends and relatives who live in freedom.

The Kalendarevs were design engineers in the Soviet Union—a well-respected and well-paid profession—when they applied for exit visas in November 1973. They were refused not once, but twice, and told they would have to wait 10 years before their application would even be considered. What befell them after that is all too typical of refuseniks—Mikhail was demoted and forced to change his place of work. Both Mikhail and Eugenia were unable to work at all for a long time—all doors of employment were closed to them.

Boris Kalendarev has suffered more than anyone else in the family. When his sister, Mila, emigrated to Israel in 1976, he was, in retribution, expelled from the Polytechnical Institute in Leningrad. He was systematically squeezed out of all educational opportunities until, in March 1979, he was arrested. His parents were refused permission to see their son until after the trial. In May 1979, Boris was sentenced to 2 years hard labor. I am pleased to say that, unlike many, he has survived and is now back in Leningrad. Meanwhile, his parents have had their apartment ransacked and been subject to an intense program of harassment. All that sustains the Kalendarevs is the hope of, one day, being free to reunite their family in a more happy land.

If that day is ever to come about, we must show the Soviet Government that the Kalendarevs and all those like them have not been forgotten. That is the purpose of this Vigil for Soviet Jewry. Those who have finally been able to leave have come here to tell us that our words do have effect. We must continue to urge the Soviet Government to grant exit visas to the Kalendarevs and other refuseniks, following the family reunification provisions of the Helsinki accords. We must continue to protest conduct that, on its face, appears blatantly illegal under Soviet law or even standards of common decency. We must continue in every possible way to fight for freedom for those who have none and to speak out for those who are silenced—for the Kalendarevs and all Soviet Jewry.●

HARRY CHAPIN

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. DYSON. Mr. Speaker, there is a young man of 15 years who lives in Salisbury, Md., who wrote to me recently about the death of Harry Chapin. I would like to insert his letter in the RECORD because it shows the kind of sensitivity that our young people expressing to issues such a eliminating world hunger.

I have known Marc Raith for sometime and I want to share his excellent remarks with the rest of the House.

JULY 22, 1981.

DEAR CONGRESSMAN DYSON: Harry Chapin, entertainer and major contributor to the hunger cause recently died in an automobile accident. He served on President Carter's Commission on Hunger and donated approximately five million to world-wide hunger.

There are very few people who have committed themselves to such a worthy and humane cause. I feel Harry Chapin was one of them.

I request that Congress commemorate Harry Chapin for his achievements.

Sincerely,

MARC RAITH,
Salisbury, Md.●

CHINA-ITTEP PROGRAM MOVES FORWARD

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. MARKEY. Mr. Speaker, I have noted with great interest that there are nearly 6,000 students, scholars, and exchange visitors from the People's Republic of China currently studying in the United States. This has important significance, of course, for Massachusetts since higher education is such a critically important part of the economy of Massachusetts. I wish, however, to call my colleagues' attention to the larger national purpose that is being served by the development of good relations between China and the United States.

China will purchase 25 percent of the export crop of American cotton this year. She will purchase huge amounts of American wheat. Trade between China and the United States is growing rapidly and all indications are

that it will continue to expand at a rapid rate.

I believe that the exchange of individuals between China and the United States is very important in its own right. It is essential that we have an increase in mutual understanding as well as knowledge of each other's language if our trade and political relationships are to continue to expand. I believe that independent agencies, colleges and organizations frequently are the most effective instruments that we have available to us in order to stimulate increased educational and cultural exchange with China.

The International Teaching Training and Exchange Program Inc. (ITTEP) is a good example. Attached is a copy of the agreement between ITTEP and the China National Oil and Gas Exploration and Development Corporation (CNOGEDC). This agreement, when implemented, will bring five Chinese petroleum experts to the United States for a year or two each.

I hope that the official agencies of our Government, particularly in times of acute budget cuts, will take better advantage of the possibilities of using some public money to unleash and trigger private funding by increased support of organizations that provide a strong multiplier effect. I am persuaded that there are many institutions and organizations that would be pleased to help support educational exchange programs.

I hope also that those organizations, like ITTEP, Inc., that are working to increase educational exchange with China will also encourage a greater involvement of Japan in educational and cultural exchange with the United States. Attached is a copy of the ITTEP agreement with the China National Oil and Gas Exploration and Development Corporation (CNOGEDC). I am confident that all of my colleagues are pleased to know of the increased exchange, especially those involving American industry directly, between the United States and China. A copy of the agreement follows:

AGREEMENT BETWEEN ITTEP AND THE DEPARTMENT OF TRAINING AND EDUCATION OF CHINA NATIONAL OIL AND GAS EXPLORATION AND DEVELOPMENT CORPORATION

First. This agreement is designed to promote the important work of China's four modernizations. It is also designed to encourage and to foster deep and abiding friendship between the people of China and the people of the United States of America.

Second. ITTEP will place in the United States five (5) Chinese petroleum experts to undertake advanced training and education in the field of oil and gas engineering or processing.

Third. These Chinese experts will be nominated by the China National Oil & Gas Exploration and Development Corporation.

Fourth. ITTEP will arrange these Chinese experts visa's and handle all administrative details concerned in the United States.

Fifth. The China National Oil & Gas Exploration and Development Corporation (CNOGEDC) will provide their travelling expenses to and from their site in the United States.

Sixth. ITTEP will arrange a carefully designed program to meet the precise needs and requirements of the petroleum experts nominated by China.

Seventh. ITTEP will see to it that all the expenses of the experts in the United States are covered and provided such as tuition, food, housing, medical insurance, life insurance, transportation and daily expense funds.

Eighth. CNOGEDC will inform ITTEP by Telex (89-8403) or by letter in case an educational delegation from the CNOGEDC is coming to the United States.

Ninth. The CNOGEDC acknowledges an understanding that CNOGEDC will give helpful aid and convenience to any of the USA institutions, organizations, associations or individuals sponsored by ITTEP through the required negotiations in advance, when they come to China.

Tenth. Upon the successful placement in the USA or Canada of the five petroleum or gas experts mentioned in these agreements ITTEP will, in consultation with the Corporation begin an expanded program. The second stage would involve (25) twenty-five experts coming to the USA or Canada for advanced training and education.

Eleventh. All questions or issues that may arise will be settled in a spirit of mutual cooperation between friends: Mr. Wang Zhechun (telephone 44-4313) for CNOGEDC and Mr. William M. Cloherty (telephone 202-363-1620) for ITTEP.●

PERSONAL EXPLANATION OF MISSED VOTES

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. LANTOS. Mr. Speaker, due to official business on July 27, 1981, I was unable to be present for the following rollcall votes. I am submitting for the RECORD this statement of how I would have voted had I been present:

Rollcall No. 164: "Nay" on H.R. 2819 to increase the Federal payment to the District of Columbia.

Rollcall No. 165: "Yea" on H.R. 2818 to increase the borrowing authority of the District of Columbia.●

BULLETIN EDITORIAL ADDRESSES CRITICAL DEFENSE AND GOVERNMENT SPENDING ISSUES

HON. SAM GEJDENSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. GEJDENSON. Mr. Speaker, a recent editorial in the Norwich (Conn.) Bulletin highlights the significance of the successful sea trials of one of the most impressive technological achievements of the decade, the Trident submarine *Ohio*. I think the editorial makes some exceptionally good points that have often been missed when we debate defense spending on the floor of the House. I would like to share the editorial with my fellow Members of the House.

[From the Norwich Bulletin, July 27, 1981]

CHEAPENING A TRIUMPH

The Space Shuttle blasted into the sky from Cape Canaveral early one Sunday morning for its trials above the earth. Half the nation witnessed the event on television.

The reusable spacecraft circled the planet for two days before making a picture-perfect landing on a California desert, to the amazement of the world.

America's technological ego and the spirit of the people soared with the shuttle's success. It provided a long-overdue flush of national pride.

The shuttle project's afterglow dispelled widespread public concern over the Columbia's staggering cost overruns, years of delays and government-ordered redesigns.

Months later, an event of equal national importance took place in eastern Connecticut, with far different public response.

No widespread acclaim emerged when another technological triumph, the sea trials of the Ohio, America's first Trident, took place.

The massive submarine slipped through the fog one early morning for two days at sea. The mission was shrouded in secrecy, mandated by the U.S. Navy, but news leaked out that the vessel performed nearly perfectly.

More flawlessly than the shuttle, according to some well-placed sources.

Neither the shuttle nor the Trident are bargains, from the standpoint of cost. But while the shuttle overran its federal allocation by a factor of 9, the Trident went to sea just percentage points above its original cost estimates.

Perhaps Admiral Hyman G. Rickover's harangue about Electric Boat poisoned the well prior to the Ohio's maiden voyage. Perhaps Navy allies on Capitol Hill, during the Seapower Subcommittee hearings, unleashed too many barbs against the shipyard.

One point stands out. The Ohio, for all its significance to future national security, didn't draw the attention given the Columbia despite, in many aspects, surpassing the space shuttle as a triumph of American enterprise and technologicial achievement.

Rather, the Trident program seems to be fair game for Navy and congressional cheapshot artists who seem hell-bent on a mission to discredit the only shipyard capable of such accomplishment.

A case in point—

In the most-recent issue of *Time* magazine, Adm. Rickover is quoted as telling a congressional committee, "They (workers and management at EB) don't care if they manufacture horse turds or ships."

We can't fathom why the admiral would make such statements.

Why would a national news magazine print such a statement—two months after the fact?

The logic escapes us, other than the magazine was used as a conduit for a Navy compulsion to hold the shipyard, its employees and the Trident program itself up to national ridicule.

The last thing EB, eastern Connecticut or the nation needs is to have the shipyard

continually tarred over the Trident program.

Trident was constructed in Groton—by thousands of men and women who live in the region.

Ignoring, downplaying and now ridiculing the significance of the Trident is an unacceptable low blow.

It is time for Trident to be recognized fully for what it really is: technology equal to or greater than the shuttle, and at a cheaper delivery cost. It is also time for Rickover and his allies in the Navy and on Capitol Hill to offer cooperation rather than crude vituperation.●

SLOVAK WORLD CONGRESS

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. RITTER. Mr. Speaker, recently I had the privilege, along with my colleague from Rhode Island, Congresswoman CLAUDINE SCHNEIDER, of participating in the Slovak World Congress triannual convention in Toronto, Canada. Convention delegates and members from around the globe used the occasion to bring to world attention the continued gross violation of Slovak human rights inside Czechoslovakia and to pay tribute to their respected leader, Canadian industrialist Stephen B. Roman.

Mr. Speaker, I was impressed and moved with what I saw in Toronto. And I would like to take this opportunity to enlighten my colleagues about the Slovak cause, the convention and Mr. Roman himself.

A humble and devoutly religious man, Stephen Roman was just 16 when he immigrated to Canada in 1937. It was to be a brief stay, but World War II changed his plans. Starting as an $8-a-month laborer, he built up one of the most impressive natural resource empires in the free world. It is valued today at more than $10 billion.

But Stephen Roman has a passion greater than making sure his various companies show progress. That is his passion for presenting to the world the plight of his brethren inside Czechoslovakia, deprived of their liberty in a most beautiful land. He does this through the Slovak World Congress—an amalgamation of all the Slovak fraternal, civil, social, and religious groups in the United States, Western Europe, Canada, South America, and even Australia. The congress promotes the goal of helping to free the Slovak nation from Soviet bondage. And its members are almost as numerous as their brethren inside Czechoslovakia—some 5 million.

Mr. Speaker, Slovakia is a nation with a long history and a unique heritage. Unfortunately, it has also long been the victim of hostilities from one side of its borders or another.

The early Slavs formed the Great Moravian Empire, with Svatopluk as their leader. Svatopluk sought to show the Slavs that they must stick together if they were going to withstand the pressures of their enemies. But, after Svatopluk died, his empire soon was torn apart by the Tartar hordes from the steppes of Asia. These invaders ultimately settled south of the Danubian basin and for 1,000 years, subdued the Slovaks.

With the end of World War I, Slovak leaders joined forces with their western neighbors, the Czechs, to found the first state of Czecho-Slovakia. Each nation—Czech as well as Slovak—was to have autonomy in the domestic area. But, as it turned out, the stronger and more numerous Czechs were predominant.

In 1939, Hitler invaded this region and both the Czech nation and the Slovaks were under Nazi subjugation until 1945. At the end of World War II, the Czechs and Slovaks were both "liberated" by Soviet forces, as General Patton's Army stood by for weeks because of the Yalta agreement. In effect, Czechoslovakia was ceded to the Soviet sphere of influence.

Today, there are so many Soviet troops inside the eastern part of the Slovak territory that the inhabitants fear it will be amalgamated to the Soviet Union proper. American visitors recently described a very tense situation, as more and more Soviet troops flood northern Slovakia, perhaps amassing for an invasion of Poland. There is great apprehension that they are there to stay.

A renewed wave of arrests of clergy has been mounting in the Slovak land, where, despite the militant promotion of atheism, devout Catholics and Lutherans continue to resist. They practice their religious beliefs in secret, further incurring problems for the clergy and the faithful once they are found.

This is what unifies all Slovaks behind the dynamic leadership of Stephen B. Roman. The Slovak World Congress provides that unity of purpose, and Stephen Roman provides that new leadership. Together, they appeal to all Americans of ethnic heritage who perhaps do not realize the real value of those ideals for which mankind cites its civilizing progress—until we lose them. They appeal to us, as Americans, Canadians, and as citizens of other non-Communist countries, to help them; to listen to their plight and to protest with them against the Communist regime of Czechoslovakia; to ask the Communists to stop mistreating their own citizens and their own subjects as though they were the enemy.

And Stephen B. Roman, the leader that he is in the business community of Canada, is also a leader for all the Slovaks. He motivates the young people by providing scholarships for youth festivals. Last August, over 400 youngsters met their counterparts from the European countries in the Olympic village near Munich to learn about their heritage. From there, they went to Rome, where the Pope offered the group a special private audience.

Stephen Roman motivates college students to research and write serious papers promoting their cultural traditions. He continues to motivate the older people to provide a keen interest in Slovak culture and traditions, citing the Jewish nation as it inspires its young and old to help rebuild their own destiny.

Mr. Speaker, I was most impressed with what I saw at the recent Slovak World Congress in Toronto. The Slovaks throughout the free world are unifying and preparing for the day when communism will be no more. They feel that day is coming. Let's hope it will be soon.

At this point, Mr. Speaker, I would like to have appear in the CONGRESSIONAL RECORD the remarks of Stephen B. Roman at the banquet of the recent Slovak World Congress triannual convention. They sum up the spirit and commitment of modern-day Slovaks.

ADDRESS OF STEPHEN B. ROMAN AT THE SLOVAK WORLD CONGRESS BANQUET

I would like to take this opportunity to extend my personal thanks to all participants of the Congress for their expression of concern and charity in the cause of freedom and justice.

My friends, I appreciate your total commitment: the giving of your time; the expense involved in traveling to Toronto; and you dedication and unselfish approach. All of which is so necessary if we are to attain our ultimate goal—eliminate tyranny in Czechoslovakia and create an environment where freedom can blossom.

There are moments in the lives of us Slovaks when we are very clearly and sometimes very painfully aware of who we are, where we came from, and where we should be going.

These intimate perceptions are not frequent. Usually, they come when the volume and tempo of persistent cares diminish, or just before the making of a critical decision.

At such times, we intuitively understand our relationship and responsibility to ourselves, to our immediate and distant relatives and friends, to our nation, to mankind and to God.

Over a long period of time, we developed a collective consciousness, a set of intrinsic values which blend together to create a common bond among us.

We are products of a nation that has cherished and developed its distinct character over millennia, and which has absorbed a full range of human talents and achievements in that process.

Every page of our history bears the imprint of pain and suffering, from which have emerged our traditional values. We are descendants of a large nation that was reduced to its present size as the result of aggressive invasion and dominating neighbors.

They may have conquered our forefathers' fortresses and burned down their set-

tlements but, they never broke their spirit to survive. No wonder then that, in our nation, courage and tenacity have always triumphed over oppression and hardship. What our forefathers went through marked our national personality—deepened and strengthened it.

Our people found strength in the soil. This close tie with the land imbued our nation with its typical characteristics: Industry, endurance, faith in ourselves and faith in God.

From a natural reconciliation with nature, grew other virtues: the virtues of hospitality, of justice, of judgment, and of creativity.

The feeling of togetherness brought brotherhood. From oppression and want, we crystallized a sense of fair play. The reality of mortal life brought judgment; and, a growing quality in day-to-day life provided time for the enrichment of the soul.

Who are we today?

We are no more, and no less, than one generation in the development of this particular spirit. We have inherited the gift of our history. We are to advance the tradition of our forefathers; and, walk a few steps further along the road toward our human destiny, which they marched on over the centuries.

We are the custodians of their virtues. We are the ones who were left to aggrandize their tradition; and, this makes us responsible for further progress both as members of our nation and as part of the commonwealth of mankind.

A talent has been passed on to us for which we are responsible, and which we have to return, with interest, in the spirit of the best tradition and trust in Divine Providence.

Where do we go? We continue in the footsteps of our fathers, perhaps with greater strides, perhaps with a stronger will, hopefully with an even higher goal—confident because of the firm steps behind us; responsible for so many steps ahead.

Our successes will not be ours alone; they will be shared by the nation; they should penetrate into the consciousness of mankind. Each one of us adds in his own way; each one of us takes credit towards the overall account of this process.

Our people have seen many a crisis. The last one seems to have no equal, the strong have seized our nation and our nation is, again, praying and suffering.

Yet, though the enemy may take its comforts from it, for a time—silence it—they cannot obliterate our souls. The Slovak nation will survive this current evil. Our task is to surmount this trial, to achieve new successes in the shape and execution of democracy and freedom.

We must grow in our humanity, in our unshakeable self-confidence, in our will to enrich what we are. Only then will we have grown under the test—will we feel needed—will we have pride that we are judged by measures applicable to all mankind, and that we come out well in the balance.

I believe that every nation has a Divine destiny to fulfill. Slovak destiny, although at times obscure, is to improve and enhance that part of the world where its influence can be a positive factor for genuine advancement of humanity.

The solid value of the word of a Slovak, and the uniquely spiritual warmth of the sons and daughters of Slovakia—can be a radiant source of edification to others, and the contribution of Slovaks to their new homelands exemplifies what can be accomplished by work and good will, for God and country.●

UNITED BROTHERHOOD OF CARPENTERS AND JOINERS CELEBRATE 100th ANNIVERSARY

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. ANDERSON. Mr. Speaker, I would like to take a few moments today to recognize an important date for the United Brotherhood of Carpenters and Joiners of America—the UBCJ—for this organization was founded on August 8, 100 years ago, in 1881.

I think that there can be little doubt in anyone's mind that one of the institutions which has played a fundamental role in shaping our unique American economic and social structure is the tradition of the independent labor union. And it is equally true that the United Brotherhood of Carpenters and Joiners has consistently been a crucial influence on that tradition. The Carpenters' early secretary-treasurer, Peter J. McGuire, issued the call in August 1881 for the Structural Alliance, the forerunner of the AFL-CIO Building and Construction Trades Department. Five years later, he chaired the convention that named the American Federation of Labor. He has been referred to as the architect of the AFL, and I agree with that appellation. But McGuire is only one example of the kind of men and women who compose the UBCJ and make it the bulwark of the rights of the working people that it is.

While the UBCJ has historically maintained a strong presence in our country, it also has a strong positive effect in my own district in southern California. There are 13 local chapters from my area, including the Carpenters Locals 1140, 710, 721, 1407, and 1506, the Independent Carpenters Local 530, the Shipyard Local 2431, the Furniture Workers Local 3161, the Public Service Section Local 2231, the Floorworkers Local 2144, the Millwright Local 1607, the Shipwrights and Caulkers Local 1335, and Piledrivers Local 2375. In these locals, under the excellent leadership of Paul Miller, secretary-treasurer of the Los Angeles County District Council of Carpenters, the productivity of the members is an essential part of our economic well-being and our social progress. The efforts of the union through the years to advance the dignity and well-being of its members have benefited all of us in the South Bay area, through the maintenance of good labor-management relations, the enhancement of personal dignity, the fostering of economic prosperity, and the development of legislation to improve the status of all our citizens.

Finally, I would like to add a personal note. My wife, Lee, and I are good friends with Bill Sidell, who originated from local 721, and is the immediate past general president of UBCJ, as well as many others in the union. At the national level, Bill exerted the kind of responsible leadership that would have made Peter McGuire proud had he been alive today. And the present national general president, William Konyha, is carrying on the fine traditions of the UBCJ. I am proud to be associated with them and honored to join in celebrating their first century of progress for their members. A firm foundation is in place for the next century of the United Brotherhood of Carpenters and Joiners.●

PRETRIAL SERVICES AND BAIL REFORM ACT OF 1981

HON. HAROLD S. SAWYER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. SAWYER. Mr. Speaker, on behalf of myself and eight other members of the Committee on the Judiciary, I am today introducing the Pretrial Services and Bail Reform Act of 1981.

Mr. Speaker, this legislation is designed to provide a comprehensive and complete approach to the problem of pretrial release in this country. The Subcommittee on Crime, on which I serve as the ranking minority member, held a series of hearings in this area which impressed upon me the need for a complete overhaul of chapter 207 of title 18 of the United States Code with two goals in mind. First, we must insure that the judges and magistrates who are called upon to decide whether and under what conditions a defendant should be released prior to trial, have adequate information on which to base such decisions. Similarly, there must be a mechanism for supervising released defendants and informing the court of bail violations. To these ends, my bill authorizes pretrial services in judicial districts which elect them. Second, the Bail Reform Act of 1966 must be amended to permit judges to consider "danger to the community" in all cases and to permit pretrial detention under certain carefully defined circumstances. The bill which I am introducing today would apply the District of Columbia "preventive detention" law throughout the country.

Under the current provisions of chapter 207, pretrial services are being operated in 10 Federal judicial districts. My bill would expand this demonstration program by authorizing other judicial districts to establish

those services, if they wish to do so. This bill has several cost-saving mechanisms built in. It does not mandate services where there is no need or desire for them. Furthermore, it permits services to be provided by existing probation offices, through contracts with existing State or local agencies, or through a separate agency.

As commonsense suggests, judges cannot make bail decisions in a vacuum. They must have the information they need to determine whether a defendant would fail to appear at trial or whether he would pose a danger to any other person or the community while released. In addition, a support mechanism to supervise released defendants and to notify the court if bail conditions have been violated must be in place. To achieve these goals, this bill authorizes providers of pretrial services to collect, verify, and report any relevant information pertaining to the pretrial release of an individual, to inform the court and the U.S. attorney of all apparent violations of pretrial release conditions or arrests, and to recommend appropriate modifications of release conditions. Magistrates and judges who appeared before our subcommittee indicated that they have found these services invaluable and that they have contributed to significant reductions in failures to appear and crimes committed on bail. This bill contains one improvement over earlier versions by requiring the providers of information to bring to the judge's attention any information that may be relevant to a determination of whether or not the defendant will pose a danger to any other person or the community if released and information pertaining to any such danger that he has come to pose after release.

Mr. Speaker, the only real controversy that has surrounded the pretrial services provisions of this bill during their recent consideration in the Committee on the Judiciary and in the Rules Committee was the fact that they provide only an indirect response to the serious and fundamental problem of crime committed on bail. Under the Bail Reform Act of 1966, 18 U.S.C. 3146 et seq., which pretrial services were designed to implement, in setting bail conditions in noncapital cases, judicial officers may not consider the danger that a defendant might pose to another person or the community. They may only consider the likelihood that the defendant will fail to appear at trial. The Chief Justice of the United States has recently called for a restoration "to all pretrial release laws the crucial element of dangerousness to the community based on a combination of the evidence then available and the defendant's past record, to deter crime-while-on bail," I agree wholeheartedly.

Prompt legislative response to the problem of rising crime in America is imperative. The FBI's Uniform Crime Reports indicate that violent crime rose by a frightening 11 percent in 1979 and 13 percent in 1980. Recent studies show that public anxiety about crime is rampant, resulting in a significant alteration of behavior by, and consequent infringement on the liberties of, most Americans. As the cosponsors of this bill and I noted in our additional views to a committee report on pretrial services, a contributing factor to this problem is the "revolving door" which releases dangerous defendants to commit more crime. Testimony before the Subcommittee on Crime provides strong support for an amendment to the Bail Reform Act of this nature. Some of the more disturbing testimony suggested that, in their frustration, many judges are considering the factor of "danger to the community" sub rosa to insure that dangerous criminals are not unleashed on the public to do further irreparable harm. This situation fosters disrespect for the law and should be corrected without delay.

The bill that I am introducing today incorporates, virtually verbatim, a law that has been successfully tested for a decade in the District of Columbia. It permits the judicial officer to consider "danger to the community" in setting bail conditions and authorizes "preventive detention" where certain dangerous and violent crimes are involved, if procedural due process protections are honored. In spite of the hysterical predictions made upon its passage, the number of defendants incarcerated under the District's law has been modest—55 in 10 years—but warranted. Furthermore, the Chief Justice's remarks and the recent 7 to 2 decision by the District of Columbia Court of Appeals have substantially defused the constitutional controversy that has plagued the law since its inception.

Mr. Speaker, this body has a solemn responsibility to protect the lives, liberties, and spirits of our citizens. That obligation demands that we address problems such as bail crime in a comprehensive and effective manner. I believe that the Pretrial Services and Bail Reform Act of 1981 will provide such a solution and I urge my colleagues to support its passage.●

SYNTHETIC FUELS ARE STILL NEEDED FOR NATIONAL DEFENSE AND ECONOMIC HEALTH

HON. JAMES J. BLANCHARD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. BLANCHARD. Mr. Speaker, there currently is a behind-the-scenes struggle within the administration to determine whether this country should move rapidly ahead in the development of a commercial synthetic fuels industry.

Under the "fast-start" interim program contained in the Defense Production Act amendments last year, such a program is mandated upon the President of the United States for the production of synthetic fuels for defense uses. There appears to be a lot of hesitation and delay, possibly because of the availability of crude oil in the world market today. However, that situation could change literally overnight as we have so painfully learned in the past.

Stressing this point is an editorial in the June 29 issue of the Oil and Gas Journal which I would like to share with my colleagues. The text follows:

[From the Oil & Gas Journal, June 29, 1981]

PRICE REDUCTIONS SHOULDN'T BE USED AS EXCUSE TO KILL SYNFUELS PROJECTS

The soft crude oil market that has sent price forecasters back to their econometric models illustrates why there is no significant synthetic fuels industry in place in the U.S.

Present technology may suggest that shale oil is competitive at today's crude oil prices. But who can say what the price will be when a commercial scale plant comes on stream toward the end of the decade? That is the risk that investors in synfuels plants must take.

At about the time crude oil prices reach the level that should make liquids and gas from oil shale and coal attractive, something happens. Consumers turn to coal or other substitutes. Shortage becomes surplus, oil price drops, and the crisis psychology in which the U.S. synfuels program was legislated disappears, replaced by something bordering on complacency.

The ripple of price cuts working its way through the market is the very thing investors in alternate fuels fear most. Plants on the drawing boards, estimated to cost billions of dollars each, could become costly white elephants if the real price of energy declined over the long term.

It would be a great mistake to allow this fear and this risk to postpone commercial synfuels production yet again. The project sponsors who were ready to go at their own risk before the price break may be having second thoughts. Some, however, appear undeterred. Their inclination to proceed in spite of current developments is most encouraging. The basic problem perceived when crude oil was in tighter supply and more expensive remains: Long term, the petroleum supply is finite, and supplements

will be needed. Before limitations of the resource base are felt, political disruptions will create costly and dangerous temporary shortages—perhaps several.

A synthetic fuels industry is an insurance policy that will help minimize that risk. But a crash government subsidy program is not the answer. It would cost too much and discourage conventional energy development. Still, the government has a definite role to play. It can support development of technology to the point that commercial production appears possible. Government participation in this way is justified, as with the Strategic Petroleum Reserve, as a matter of national defense. By helping develop synfuels technology, the government helps reduce U.S. dependence on foreign oil sources and, thus, decreases chances it will be called upon to defend those interests militarily.

Federal and state governments can help in another important way: by removing permitting and other unnecessary regulatory burdens, which carry an economic risk as serious as fluctuating prices.

Once technology reaches the commercial stage, however, the job of financing and building synfuels plants belongs to private industry, which should not be discouraged by the recent dip in crude prices.

The finite nature of the petroleum resource promises a general oil price increase over the long term. And synfuels provide immediate benefits that will compensate for price disadvantages possible in the near term. Dependability of supply should give synfuels a premium value. And steady production of crude substitutes would enable refiners to trim the expensive inventories of crude they have been carrying as a buffer against supply interruptions. That potential savings is an extra incentive for synfuels investment.

Ultimately, synthetic fuels will justify themselves by putting a cap on the price of oil and gas. It will not required a massive industry producing several million barrels a day of liquid fuels to achieve this.

Once synfuels have become a real alternative to imported oil and gas, just as coal and nuclear power are in some uses today, runaway prices will no longer be a threat.

A paper industry, which is essentially what synfules is today, is not a live alternative to conventional oil and gas. It offers no short-term contribution to supply and therefore has no influence on prices.

But commercial synfuels production, even on a small scale, will grab the attention of oil exporters and their customers. Just the start of such projects should have a healthy effect. It is this kind of action that will assure stable energy supply and prices, and industry and governments should cooperate to bring it about as soon as possible.●

CUTTING THROUGH THE FOG ON FINANCING SOCIAL SECURITY

HON. JOHN F. SEIBERLING

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. SEIBERLING. Mr. Speaker, last Friday's Wall Street Journal contained an outstanding article by Water W. Heller. In place of the scare tactics employed recently by spokesmen for the administration, Mr. Heller provides a calm appraisal of the facts and various options available for solving both the short-term and the long-term problems of financing social security.

Mr. Heller points out that while the total benefits to be paid out by the social security system next year are expected to exceed total receipts next year, the system has sufficient reserves in the disability insurance and medical benefits funds to make up any deficiency in the OASI fund. So the immediate problem can be resolved either by reallocating payroll tax revenues among the three funds or to provide for interfund borrowing.

Mr. Heller also recommends two other pressure-relieving steps: One is to index benefits by the lesser of wage increases and price increases or finance the cost of indexing that exceeds wage increases by paying the excess out of general revenues. The second is to use general revenues to pay part or all of medicare benefits. This latter change was proposed by both President Ford's and President Carter's Advisory Councils on Social Security and would be accomplished by a bill, H.R. 1605, which I introduced in the last Congress and reintroduced in this Congress with a number of cosponsors.

Mr. Heller notes that these changes would also improve the system's ability to meet its longrun problems but that further structural changes are necessary to preserve the soundness of the system when the wave of retirements of the postwar baby boomers begins around the year 2010. However, he points out that the 23-percent reduction in social security benefits proposed by the White House in May far exceeds the amount needed to avoid trust fund deficits in the long run.

In addition to the two changes already mentioned, Mr. Heller suggests:

First, a very gradual reduction in benefits for those who take early retirement. Presumably, this would not affect anyone who is already approaching the age where he or she would be considering early retirement.

Second, a gradual raising of the full-benefit retirement age from 65 to 68 years.

Third, making part of the benefits taxable for those retirees in high income brackets.

Without necessarily agreeing with all of Mr. Heller's recommendations, I believe that his article is a major contribution to the debate over the future of social security financing and one which all Members interested in this subject will wish to read. Accordingly, I offer it for inclusion in the RECORD immediately following these remarks:

THE SOCIAL SECURITY MUDDLE

(By Walter W. Heller)

With his usual flair for understatement, OMB Director Stockman recently warned Congress that unless it acts quickly, "The stark, ominous, and unavoidable fact . . . is that the most devastating bankruptcy in history will occur." That is not only overkill. It is not only insensitive to the fears of tens of millions of Social Security beneficiaries. It is nonsense.

Yes, the Social Security system has problems. Yes, revenues of the system are "out of sync" with benefit payments because of high unemployment and inflation. Yes, if nothing is done, the system will be in crisis 30 years from now when the baby boom generation retires. And yes, there are disparities and imbalances that need correcting.

But none of this calls for calamity-howling or rash action to slash benefits. Let's see where a calm appraisal, anchored in fact rather than fear, might lead us.

The first step is to sort out the facts and find a sensible way out of the short-term "crisis" under which the Social Security revenue stream will fall somewhat short of the benefit stream. The problem is especially acute in the Old Age and Survivors Insurance fund, for two reasons:

One, contrary to previous experience, wages have been rising less rapidly than inflation so that the wage base on which payroll taxes are levied has been rising less rapidly than the inflation-adjusted base on which benefits are distributed.

Two, the problem is compounded by high unemployment, which further shrinks the base and induces earlier retirement.

The total sums involved in the system's three funds—OASI, disability insurance and hospital insurance, or Medicare—are enormous. Roughly $145 billion is being paid in 1981 in OASI and disability benefits, plus $30 billion in Medicare. Trust fund receipts will roughly match the $175 billion total.

By next year, under reasonably optimistic assumptions, total benefits will run about $200 billion, while total receipts will fall somewhat short. Overall, then, the system will have to draw down its reserves. A further draw-down will occur in 1983 and 1984. In other words, the government has a Micawber-like problem. It also has a lot of options that weren't open to Micawber.

For example, there is nothing sacred about the way payroll tax revenues are divided up among OASI, disability, and hospital trust funds. That division was based on actuarial projections (not forecasts) of the costs of each program. In light of actual developments, it turns out that OASI has been shortchanged while disability insurance and hospital insurance have comfortable balances.

HOLDING THE FORT

So the top priority is either to reallocate payroll tax revenues among the three funds or to provide for interfund borrowing. This would tide the hard-pressed old age and survivor's benefits over the immediate future. And if the roseate Reagan economic scenario materializes, it would hold the fort until the scheduled 1985 tax increases start boosting reserves.

But when it comes to whipping Congress into line on the Reagan Social Security changes, HEW's Secretary Schweiker shows little confidence in that scenario. He paints a bleak, even black, picture using much more pessimistic economic projections. He defends that as "worst-case prudence." But his Senate inquisitors—including Senators Baucus, Bradley, Heinz and Moynihan—suggest (with considerable justification) that the administration is "keeping two sets of books," and that it is using the worst-case

scenario and shortrun problem to get Congress to cut overall spending and the deficit.

At this point, the debater's ships really passed in the night. Schweiker's angry and self-righteous retort: "That is completely false. . . . Not any of the trust funds will go to any other purpose" than Social Security. He was using the finest kind of debater's point: stating a resounding truth that answers a charge no one has made. Nobody is suggesting that the administration is about to deprive Social Security beneficiaries of a single penny of payroll tax receipts. But under unified budgeting, any year's excess of payroll tax revenues over benefits serves to shrink the overall federal deficit.

Given interfund borrowing (together with cuts in the minimum and student benefits that are already in the reconciliation process) beneficiaries are not about to find the Treasury cupboard bare.

But merely keeping the wolf from the door is clearly not enough. Further steps have to be taken to cover short-run contingencies and provide longer-run insulation against the cold winds of economic fluctuations. In addition to the vital initial step of authorizing the three trust funds to borrow from each other, two other pressure-relieving steps are highly desirable:

One is to adopt some version of the proposal, widely supported by conservatives and liberals alike, to stop boosting benefits faster than wage increases. this can be done by indexing benefits by the lesser of wage increases and price increases.

If the administration regards the present cost-of-living adjustment as sacrosanct, it should consider this logical alternative: Pay the cost of the excessive indexing out of general revenues. Why should the insurance system—that is, existing wage earners—foot the bill for this extra benefit or subsidy?

The second change, proposed by both President Ford's and President Carter's Advisory Councils on Social Security, would be to use general revenues to pay part or all of Medicare hospital benefits. Since the need for health insurance is unrelated to work experience, this change makes good sense.

Providing these buffers against the short-run buffetings of the Social Security system would also improve the system's ability to meet its long-run problems. Still, further structural changes are necessary to preserve the soundness of the system in the longer run. Demographic changes in the form of mortality improvement, continuance of low fertility rates, and, most dramatically, the wave of retirements of the post-war baby boomers around 2010 could put the Social Security system into a real bind. One way of visualizing the problem is this: Currently, the ratio of workers paying into the system and those drawing benefits is about 3 to 1. By 2025, this ratio will shrink to 2 to 1.

REBUKING THE PRESIDENT

So the second assignment that Congress faces is to phase in some basic structural changes that will maintain the soundness of the system well into the 21st Century. This rules out the crash program that Mr. Reagan has called for Congress (including the Senate, in a unanimous vote) has already rebuked the President for the initial version of his proposals, the most callous of which would have summarily slashed the promised benefits of those about to retire at the age of 62.

The 23% reduction in Social Security benefits proposed by the White House in its budget amendments and May 12 announcement far exceeds the amount needed to avoid deficits in the long run under existing law. In other words, the Reagan proposals go far beyond merely guaranteeing the integrity of the system. In effect they would curtail benefits of early retirees and other recipients to provide more elbow-room for tax cuts.

The menu of changes from which Congress could choose need not include any payroll tax increases other than those already scheduled. It should focus on weeding out low-priority benefits and making some of the structural adjustments that various advisory committes and commissions have long recommended. Two have already been mentioned: elimination of over-indexing and the use of general revenues to pay a goodly share of Medicare, both of whch would help in both the short and the long runs. Others are:

A very gradual reduction of benefits for those who take early retirement.

A gradual raising of the full-benefit retirement age from 65 to 68 years.

Making part of the benefits taxable as in the case of private pension payments. This would have very little impact on low-income beneficiaries. One would hope that the White House would not categorically reject this move because its impact would be mainly on high-income beneficiaries.

Considering extending Social Security coverage to all workers.

It would serve everyone's interests if the debate were stripped of its overheated, cry-wolf, rhetoric; it the administration would stop trying to stampede Congress into making precipitate changes that would squeeze an already hard-pressed segement of our population in the name of avoiding a bankruptcy that is not going to occur, and if Congress would promptly undertake a tiding-over operation that will enable the Social Security system, especially OASI, to meet its full obligations in the short run and them turn to the desirable reforms in the system for the long run.●

R. & D. TAX CREDITS: A PROBLEM FOR THE ENGINEERING JOB MARKET

HON. MARILYN LLOYD BOUQUARD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mrs. BOUQUARD. Mr. Speaker, I would like to call your attention to the current job market situation for engineers, a situation which might be seriously affected by the implementation of a tax incentive for research and development. It is my belief that if we take time to seriously consider the effects of the proposed tax legislation, we can avoid prolonging and exacerbating an already threatening problem. In order to make the seriousness of this problem clear, I will summarize for you what I have learned in contacting various associations of engineers and engineering educators.

Rapidly increasing demand for engineers has caused severe "compression" in salaries. The spread in salary between experienced engineers and engineers fresh out of college is virtually nonexistent. According to the National Society of Professional Engineers' most recent survey, the median income of engineers with 30 or more years experience is actually less than the income of engineers with under a year of experience. This imbalance is grossly inequitable and has detrimental implications. Second, there are more than 2,000 vacant positions on the faculties of the Nation's engineering schools, and there is a severe shortage of engineering Ph. D.'s to fill these slots. Though the country should be producing nearly 4,000 engineering doctorates per year in order to satisfy the needs of both industry and academia, only 2,800 doctorates are awarded each year. Of these, 1,000 are foreign students, often under some obligation to return to their own countries after graduation.

There are two important causes of this problematic situation. One is that because of high demand for engineering graduates, companies have bid up the price of starting salaries. The second cause is that stipends for graduate engineering students have not kept pace with inflation, often remaining as low as $5,000 per year. The increment in salary one gains by remaining in school for a doctorate is inadequate compensation for the cost of remaining in school. It is extremely hard for a young engineer—especially for one who has already borrowed money for college—to forego 4 to 6 years of those extremely generous salaries the companies are offering. If he makes that choice, his peers are gaining valuable years of experience and salary increases while he still remains in school.

Five years after receiving a B.S., an engineer earns an average of $23,800. If he has also received an M.S., he will earn $25,300. If he has finished his Ph. D. already and is in the job market, he will earn $29,100. After another 4 to 6 years, they will earn an average, respectively, of $27,750, $29,750, and $32,400. (This information derives from a report entitled "Professional Income of Engineers—1980" compiled by the Engineering Manpower Commission of the American Association of Engineering Societies, November 1980.) A rough calculation shows that it takes nearly 19 years for a Ph. D. in engineering to recover the added cost (in foregone income) of his education in increased salary. If he receives a $10,000 annual stipend as a graduate student, he can recover the cost in 9 years. But most universities cannot afford to award their engineering graduate students nearly that much of a stipend.

In addition, if the current situation persists, there will be few Americans qualified to teach engineering. We will pay dearly for the extra engineers being hired now at the bachelors degree level with a severe shortage of engineers in the future. If we defer to market forces, perhaps the situation

will correct itself. But if we intercede carelessly, we stand to exacerbate the already threatening situation and it will become critical.

Both the Senate and the House will soon be considering tax legislation which will have a severe impact on research and development. Both tax packages will include vigorous incentives for increasing private sector spending on research and development, and will encourage a higher level of cooperation between universities and industry. During recent years, industry has provided less than 5 percent of the funds for the Nation's colleges of engineering. If this were to increase dramatically enough to outweigh the decreases in Federal funding, perhaps stipends for graduate students could be increased and one problem would abate. Substantial increases in the level of industry funded research at universities could enhance the attractiveness of a university career in engineering. However, increasing the demand for engineers in the private sector by allowing tax writeoffs for wages of R. & D. workers may ruin the universities' already weakened ability to compete for both B.S. students for graduate school and for Ph. D.'s to become faculty.

It is very difficult to project which of these effects will dominate, but the effects of a specific portion of the legislation are more predictable. Both the House Ways and Means and Senate Finance Committees' tax packages include a tax credit equal to 25 percent of the increment in wage expenditure for research and development (and the credit in the Ways and Means version is extended to cover other expenditures too). Coming at a time when the demand for engineers already far exceeds the supply, such a proposal, if enacted, would promote the private sector to bid up the salaries even higher. Even fewer people will continue on for graduate degrees, and of those, far fewer will be willing to remain in academia. In the not too distant future, the universities will be utterly incapable of training an adequate number of engineers. Industry will suffer, and so will the rest of us.

I know that my colleagues, if they reflect on this matter, will act judiciously. We must act carefully, and determine whether a well-thought out amendment to the tax package being offered us may be appropriate.●

THE MORNING AFTER

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 28, 1981

● Mr. COLLINS of Texas. Mr. Speaker, ith the new administration, Congress has an opportunity to improve foreign trade. This is especially true in regard to the legislation which has the unfortunate name of Foreign Corrupt Practices Act. This act needs to be studied and reworked so that we can establish strong and effective export relationships.

This subject was clearly analyzed on the editorial pages of the Dallas Morning News.

In Congress, we all know JIM WRIGHT, who is majority leader on the floor. Down in Texas we also point with pride to JIM WRIGHT, who is the editorial director of the highly respected editorial page of the Dallas Morning News. Here are their comments on the Foreign Corrupt Practices Act.

THE MORNING AFTER

Watergate and the fall of Nixon were barely behind us when the news got out: Various American corporations had been paying bribes to foreign governments. Angrily, not to say righteously, Congress reacted by passing the Foreign Corrupt Practices Act—which U.S. Trade Representative William Brock now says needs "major surgery."

No wonder. "Apparently," wrote Brock, on this newspaper's Viewpoints page, "the United States is the only country in the world to impose a comprehensive extra-territorial anti-bribery law upon all of its foreign business practices, public and private."

The law is hard to understand, Brock contends. It raises questions even about Christmas presents and local charities. It makes business uselessly spend a lot of money on record-keeping. Yet lawyers, accountants and government officials disagree on the responsibilities mandated by the law's accounting provisous.

Brock, seeing the act as a major obstacle to U.S trade, would have Congress limit the accounting requirements and "eliminate the current liability of American citizens for unknown and unauthorized actions by agents in foreign markets." And surely he is right.

The Foreign Corrupt Practices Act is preeminently a creature of post-Watergate moral fervor, when suspicions of businessmen, military officers, conservative Republicans and U.S. intelligence agents (but not bureaucrats, war protesters, liberal Democrats and network newsmen) were at flood tide.

The reaction by Congress to perceived, or merely reported, abuses was savage—expressed in legislation like the FCPA. Only in the cold light of day has it become possible to understand how badly we overreacted. A good thing this period of distrust and hyper-righteousness didn't last longer, or we would be in far deeper trouble than we are in right now.●
